It was appalling enough in the first instance for Waverely B. Council to quietly drop the Greenbelt status on the proposed Aarons Hill site in order to proceed with the ill-considered housing scheme without first consulting the local community and now you intend to follow in the same suit to drop both Green Belt and AGLV status to your portion of what is effectively one field, in order to build even more houses again without proper consultation or God forbid, consideration of the increased impact upon not just the local community but grid-locked Godalming itself.

I can assure you that your proposals and those of Waverely B.C do not sit well with the people of Godalming let alone those who will suffer the brunt from the development.

Despite the problems within the N.H.S the general public view the Green Belt in much the same way; a safeguard of sorts, to protect our much loved and internationally recognized and respected countryside, and thought by many as a last refuge for our declining wildlife; the reality being that our raiming but decreasing farmland still supports an incredible amount of flora and fauna. I know this because my family and I have overlooked this particular field for most of our lives and now ecologists and experts confirm what we knew and much more besides, both there and in the surrounding areas.

Taking farmland permanently out of production increases our dependency upon imported foodstuffs; that suits our European neighbours. I'm sure that they are laughing at the moment.

'The wildlife of today is not ours to dispose of as we please. We have it in trust. We must account for it to those who come after.' King George VI. That is still the motto of the Shooting Times and Country magazine and as a non bunny hugger, mine as well.

The much subjugated first nation North American Indians had a very good saying, 'you cannot eat your wealth'

Never mind Material comments: it is about time some common sense entered the fray.

Comment: MM39 - LPMM18/4218  Respondent: Gareth Barnes 20814849  Agent:
An appalling lack of consultation with regard to the extra 200 houses you propose for the Aarons Hill site and complete disregard for the local community, Not all of which are either council or ex-council tenants. These deep concerns come from all parts of Godalming and beyond, particularly when Green belt and AONB designated areas are removed. Yourselves and W.B.C. have attempted to hoodwink the general public from Day one. The whole scheme has not been thought through properly and you have diminished your own standing

Attached documents:

**Comment:** MM39 - LPMM18/4582  **Respondent:** Louise Welburn 20825729  **Agent:**

I wish to register my objection to Local Plan - Main Modifications MM39: Release of Green Belt land at Aaron’s Hill, Godalming for the development of 200 homes.

This is Green Belt land, but in MM39, it is referred to as Godalming Urban Area. Is this a mistake or are you trying to remove it from the Green Belt by stealth? A response would be much appreciated.

The proposed release of Green Belt land and large-scale development will:

- Devastate the protected species on this land, one of which is the Barbastelle bat which is extremely rare and vulnerable to extinction wildlife (European Protected species and UK Biodiversity Action Plan species). The land is also home to many RSPB red and amber listed birds due to rapid population decline (as a result of loss of habitat/food sources). Mitigation measures of dotting about some bat and bird boxes are woefully inadequate when you’re concreting over their habitat and food sources.

- Worsen traffic on roads that already experience frequent congestion and pollution levels already in excess of safe limits (see Waverley Borough Council’s own website). Pollution levels at the nearest monitoring site, located on the A3100 Ockford Road are already in excess of safe limits. (E.g. DEFRA published NO2 limits in the “National Air Quality Objectives and European Directive Limit and Target Values for the Protection of Human Health.” The annual mean should not exceed 40 μg/m3. The mean of the NO2 diffusion tube results for Ockford Road between 28/09/17 and 03/01/2018 was 42.97 μg/m3 which already exceeds the limit, and between 3/1/18 and 4/7/18, the mean of the NO2 diffusion tube results for Ockford Road again exceeds the 40 μg/m3 limit at 40.22 μg/m3.

In their “UK plan for tackling roadside nitrogen dioxide concentrations - An overview July 2017”, DEFRA and the Department for Transport state that: “Evidence collated by Defra, Public Health England and the Local Government Association shows that short-term exposure to high levels of air pollution can cause a range of adverse health effects including exacerbation of asthma, effects on lung function, increases in hospital admissions and mortality. A review by the World Health Organization concludes that long-term exposure to air pollution reduces life expectancy by increasing deaths from lung, heart and circulatory conditions. There is emerging evidence from the Royal College of Physicians (amongst others) of possible links with a range of other adverse health effects including diabetes, cognitive decline and dementia, and effects on the unborn child.”

Attached documents:

**Comment:** MM39 - LPMM18/4781  **Respondent:** Christine Davies 20832129  **Agent:**

As recently as 2017 compelling reasons were given for maintaining the Green Belt status of this land. WBC has now chosen to disregard the evidence for this decision, and GBC appears set to do the same.
The impact of the proposed developments on this area due to lack of infrastructure, increase in traffic on already heavily congested roads and the effect on the natural environment appears to have been given little consideration or, in some cases, misrepresented. Apart from meeting housing quotas well in excess of what is now required it is difficult find anything positive in this plan.

Attached documents:

Comment: MM39 - LPMM18/4825  **Respondent:** Nina Mileksic 20832321  **Agent:**

Please see my comments on proposed Main Modifications 2 and 39 (Aarons Hill land) which also form the basis for my objection to allocating Aarons Hill land for house building under the local Guildford plan.

**Transport and Traffic**

Sustainability assessment states there is good bus service which is incorrect. The bus service is currently once an hour, with residents reporting the buses frequently get stuck in traffic and often missing out the entire Aarons Hill area as the drivers attempt to cut delays to their schedules.

There is only one access road to the estate (Eashing lane) which is narrow, with steep hill from A3100 junction up to Aarons Hill. Pavements are narrow and unsuitable for elderly, prams or people with mobility constraints, and in places the pavements are a death trap, especially in winter. No traffic calming measures or speed limit enforcement means drivers often speed along the entire stretch of Eashing lane, making it unsafe for pedestrians and cyclists alike.

This would be the only access for emergency vehicles for an estate of well over 1500 people (including Waverley side of the development and existing Aarons Hill estate), which is inadequate. Pairing this up with frequent traffic jams and the narrowness of Eashing lane from A3 to A3100, there is a serious risk that emergency vehicles would not be able to access the new development in a timely manner.

Eashing lane is a narrow country lane, for most of it without any pavements for safe pedestrian use and it is unsafe for cyclists due to sharp corners and excessive speed of many drivers. In most places it is too narrow for a car and a lorry to meet – there have been instances of the road being blocked by a lorry that got stuck for over 20 minutes and needed help of residents to manoeuvre out of Lower Eashing.

**Ecology**

The Waverley side of the field was surveyed by an ecologists as part of the existing planning application for 262 dwellings. Even though the ecology reports significantly downplayed the impact of the development on the environment, it became very clear that the site holds an astounding levels of biodiversity. Some of the protected species identified are listed below:

7 species of bats, one of which is Barbastelle bat, Habitats Directive Annex II protected species and classified as Vulnerable to Extinction. This is an important find and if there is a maternity colony on site, this site could be a good candidate for a Special Area of Conservation. Further investigation is needed to establish the size of Barbastelle population and how they use the site. They can cover wide areas and it would be key to understand if they are present on the Guildford side as well.

There is also potential for Hazel Dormouse to be present and Natural England requested more information to be obtained on this matter.

In addition, the following protected birds were identified to be using the site:

**Birds:**
RSPB **red listed** due to rapid population decline (as a result of loss of habitat/food sources):

- Skylark (*Alauda Arvensis*),
- House Sparrow (*Passer Domesticus*) – also Defra Red listed
- Starling (*Sturnus Vulgaris*) – also Defra red listed
- Song Thrush (*Turdus philomelos*) - also Biodiversity Action Plan species

RSPB **amber** listed due to population decline (as a result of loss of habitat/food sources):

- Swift (*Apus apus*);
- Dunnock (*Prunella modularis*)
- Kestrel (*Falco tinnunculus*)

As the ecology reports were of inadequate quality and were downplaying the impact on the environment, it is highly likely that significant omissions of other protected species occurred.

An independent ecology survey of the entire site would be necessary to establish the level of biodiversity overall and the impact of any development on the protected bats, birds and any Hazel Dormice.

Even without an additional survey it is clear this site contains a significant level of biodiversity which - according to the NPPF - should be protected for future generations.

**Climate change**

Recent scientific evidence has shown that climate change can adversely impact two important factors in food production and distribution: weather related events can cause significant disruption to transport infrastructure, and it can reduce crop yields on a global scale, which in turn can cause stress to agriculture industry, in turn causing food insecurity in certain regions and disrupt the food supply chain. On the national/local level, that means that over-reliance on food imports can cause significant concern in terms of food supply. As the instances of severe weather events are likely to occur more frequently, it is important to consider these factors (food production and distribution) in local planning terms.

In the light of the emerging climate risks it would be unwise to continue to build on fertile farmland – the proposed Aarons Hill site is in its entirety a fertile field growing a wide variety of crops.

**Housing Projections**

The latest ONS statistics (published September 2018) and population growth projections based on 2016 data showed significant decline in population growth. This was before the effect of Brexit referendum on immigration showed in the data. The immigration after Brexit referendum has fallen significantly.

According to ONS, the two main factors contributing to population growth are immigration and longevity (birth rates keep declining). As immigration has significantly fallen since June 2016, and life expectancy is stagnating (according to ONS data 2015-2017), the next data set for 2018 is likely to show even more significant decline in population growth.

This puts the current planned housing numbers for Guildford in a very different context, and needs serious consideration.

In addition, the type of housing required in order to address the affordable housing need is housing available to core workers (care, education and services – e.g. hospitality) at about 50-60% market rate. Private housing and so called “affordable” housing at 80% market value is not accessible to the vast majority of core workers who are on lower than average salaries (average Surrey salary is around £30 000 pa, which is too low to afford even 25% of shared ownership scheme flat or 80% of the market rent).
As it stands, private housing (even when classified as 'affordable' according to the legal definition) will not be accessible to the majority of local population, even further exacerbating the housing affordability problem.

**Deliverability of the Plan in years 1 – 5**

The Aarons Hill site would require significant enabling works (water supply, sewage, electricity, gas) as it has never been built on before. It is not clear whether delivering 200 homes on the Guildford side of Aarons Hill site within first 5 years of the plan is deliverable. By comparison, the Waverley Land Availability Assessment plans to deliver only 25 homes (out of 262) in the first 5 years of their plan.

**Communities and economic impact**

The development could result in adverse economic and social impact on the local community. The new neighbourhood will bring a significant increase in population of Godalming and the brunt will be carried by Godalming town. It is not clear what employment opportunities are there to cater for this population (see comments on retail industry below).

Increase in elderly population also means new development will have to cater for their specific needs - there is need for accessible and reliable public transport and cater for mobility and health issues, with easy access to GP surgeries and hospital care (there are no nearby GP surgeries or other amenities on site, and GP surgeries in and around Godalming are oversubscribed as it is).

Considering the site is on top of a hill, with only one narrow access road which is frequently congested, and no amenities or doctor surgeries nearby, the site does not cater for elderly or disabled residents even with infrastructure improvements. Emergency vehicle access can also be frequently compromised, especially in winter.

In addition, the elderly need special care services to be available - for which care service providers need staff. There is not enough housing available to core workers such as care workers and nurses as they are priced out of the area. As such - and in absence of key workers housing at 50-60% of market value - the Plan is potentially discriminating against vulnerable population (elderly, disabled) and against core workers on lower incomes.

Significant proportion of businesses in Godalming and surrounding areas are rural businesses (see Waverley BC Economic strategy) which may be adversely impacted by increased road congestion and urbanisation of the area. A significant appeal of the area is its ‘rural character’ and that feature is frequently used for marketing – that would be completely lost with continued urbanisation and is likely to have negative consequences for the local economy.

One important trend to note is that retail industry is in significant decline, with over 39000 retail jobs lost or at risk in 2018 alone (http://www.retailresearch.org/2018yearofcrisis.php). This means that the local economy cannot put reliance on retail but needs to find other opportunities to advance the local economy. With significant shift to online purchasing and home delivery, this would also put additional strain on the roads.

The Sustainability analysis does not address these emerging trends, putting the Local Plan at risk of being undeliverable or having detrimental economic consequences for the local area.

The Sustainability assessment also does not take into consideration emerging trends and economic risks and disruption arising from transition to low carbon economy, which has the potential to significantly disrupt the economy at all levels in the next 10-15 years - this period falls well within the period of the Local Plan.

As such, the Community and Economic Sustainability analysis is inadequate to account for emerging economic and social risks of the future.
For all the above reasons, the Main Modifications 2 and 39 relating to Aarons Hill land (Godalming) should be rejected.

**Comment: MM39 - LPMM18/6173  Respondent: John Kelland 20870817  Agent:**

I wish to object to this land being removed from the Green Belt. I live at 55 Eashing Lane and enjoy walking in the area, the character of which would be irreversibly damaged by this proposal. Godalming is already heavily developed and needs its remaining green spaces.

**Attached documents:**
Wisley should be a candidate for removal from the Plan. Revised housing need figures weaken the justification for development. It does not adjoin Guildford.

Attached documents:

---

I am writing in response to the modifications you propose to the development of the former Wisley Airfield. I think that the proposed modifications will still be to the detriment of the area and do not negate the results of the enquiry held last year.

To start with:

**The number of houses the Council is proposing for this site is wrong because it is based on outdated figures.** I believe that the hearing should be re-opened so that the latest ONS figures and household projections can be taken into account. These figures particularly need revision because they are allowing for meeting some of Woking’s unmet need. This should not be allowed because it will need the release of green belt land. The council is not following its own strategies which require that developments take place first in the town centre, the urban area and brownfield sites and only then to land in villages and green belt land.

**The modifications do not deal adequately with the problems of motorised transport in the area.** The delay in the improvements of J10 (the A3/M25 junction); A3 improvements at Guildford will cause real problems and these will have a negative effect on development in the area. The problems for other forms of transport ie cycling, walking, are not even acknowledged. This development will result in a huge increase in car use at a time when the government is proposing a reduction because of climate warming.

**The modifications reduce the size of the SNCI and yet the whole site qualifies on ecological grounds.** The biodiversity of the SNCI will be destroyed when there is rapidly increasing evidence that global warming and human life itself needs this diversity in order to continue.

An Appropriate Assessment and Habitats Regulation Assessment have not been carried out. This is in breach of case law.

Comment: MM40 - LPMM18/3762  Respondent: Effingham Village Plan (Jon Short) 8568225  Agent:

We also object to the former Wisley Airfield being considered for development at this stage and would ask that it is removed from being an inset site and a site selected for development. Following the Inspector’s comments when dismissing the Wisley planning appeal, he identified a number of very serious issues that have not yet been overcome or mitigated. It would seem appropriate to drop the former Wisley Airfield from being inset and as a development site until the serious problems identified by the Inspector have been overcome.

Attached documents:

Comment: MM40 - LPMM18/1944  Respondent: Mrs Fiona Curtis 8570273  Agent: Mrs Fiona Curtis

Revised housing need figures weaken the argument for the inclusion of this development.

Apart from the wastewater requirements, the changes lack any rationale or benefit. The condition of the SNCI will be inevitably compromised by the development itself. Moving references to unique places and unique context from opportunities to requirements is no doubt intended to strengthen the expectations but involves turning a very vague expectation into a similarly vague requirement

Attached documents:

Comment: MM40 - LPMM18/2815  Respondent: Harry Eve 8573793  Agent: SITES

There are no exceptional circumstances for removing land from the Green Belt to enable the current site selection.

A35

The continued inclusion of this site is a perverse decision. Guildford Borough Council’s apparent desire to build on this land regardless of the impacts on biodiversity is made clear by their proposed major reduction in the area of the SNCI. Local Authorities should be acting to maintain their SNCIs – not destroy them. I object to the proposed reduction in the SNCI and to the continued inclusion of this site.

The environment that Guildford Borough Council inherited from past generations will be passed on in a far worse state if this Local Plan is implemented. This is in direct opposition to the stated objective of the current Government.

Attached documents:
Comment: MM40 - LPMM18/1582  Respondent: Mr John Sweeting 8579393  Agent:

Re: Sites numbered:

A25 – Gosden Hill
A35 – Former Wisley Airfield
A42 – Land at Burny Common Heath
A43 and A43a - Land at Burnt Common – known as Garlick's Arch
A58 - Land around Burnt Common warehouse
A63 - Land at Aldertons Farm

in the revised draft local plan.

I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. There remains considerable uncertainty in the number of houses needed in the Borough. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.
   This view is now confirmed by the recent Office for National Statistics (ONS) prediction that the number of homes needed in the Borough in the plan period is 4662 – a substantial reduction compared to the earlier forecast of 7717. To increase the number of sites – i.e. the addition of site A63 - and to increase the development at other sites is perverse to say the least and simply ignores ONS figures and the wishes of most of the residents to keep the area semirural.
2. With the revised ONS forecast, the requisite number of homes can be met from brownfield sites – as noted by Councillor Susan Park. Continuing with the increased number will result in unnecessary loss of the Greenbelt. This is a tragedy and contradicts policy MM9 as 'special circumstances' necessary for reclassification have not been established.
3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area.
   In particular this could provide the starting link in connecting Guildford to the M25.
   The Greenbelt policy was originally introduced to counteract urban spread and has worked well for many years and there does not appear to be any reason to abandon it at this time as once the space has gone it will never be recovered.
4. These developments place a disproportionate burden on the north east of the Borough.
5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours when additional congestion at the junctions in the vicinity of the A3 is likely.
6. With specific reference to site A63, there is currently less than 100 homes with a frontage on Send Marsh Road, adding 120 homes at this site with access from Send Marsh Road will inevitably increase the traffic and during peak hours is likely to cause serious congestion at both ends of the road and Send Marsh Green.
7. Other infrastructure.
   The Garlick's Arch, Clockburn and Winds Ridge sites are estimated to result in an increase demand of 45% on the infrastructure in that area. Is there adequate power, drainage and sewage provision for industrial development? And are there sufficient school, medical and similar provisions for domestic expansion?
8. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society.
   It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.
   If, despite their adverse impact, the sites continue to be included in the plan, provision should be made for strict control of noise and light pollution emanating from the sites – particularly at night time.
9. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. Examples are Garlick's Arch in particular contains ancient woodlands and even the Aldertons site contains a large mixed hedge. It seems perverse that planning permissions have been refused because of the impact on individual trees whilst the wholesale destruction of woods and hedges seems inevitable if these sites are included. It seems difficult to reconcile these two extreme positions. If, despite their adverse impact, the sites continue to be included in the plan, preservation orders should be placed on appropriate trees as a minimum requirement.

Attached documents:

Comment: MM40 - LPMM18/1212  Respondent: Burpham Neighbourhood Forum (Jim Allen) 8581505  Agent:

Policy A35; Former Wisley airfield, Ockham

Policy box requirements (3)

(3) There is a clear requirement for south facing slips at this location to allow traffic to and from this development to access Guildford. No safeguarded land has been provided for such provision, thus until it is provided this site is unsustainable. We also know that this is a requirement for the RHS Garden Wisley expansion plans located directly opposite on the other side of the A3. Therefore a new policy A35a is required safeguarding land south of the Ockham roundabout for this purpose.

Attached documents:

Comment: MM40 - LPMM18/3584  Respondent: Linda Parker-Picken 8587105  Agent:

A35 MM40. The increase in the minimum floor space at Burnt Common warehouse site is unreasonable due to the already heavy traffic in and around this site. The Employment Lands Needs Assessment showed a reduction in demand for Industrial Land. There is no need for new industrial sites when Slyfield has unused capacity. Other off-site highway works to mitigate the impacts of the development makes no mention of the A247 through Send, which would inevitably carry more traffic from the Wisley Airfield development to Woking.

Attached documents:

Comment: MM40 - LPMM18/5057  Respondent: Surrey Wildlife Trust (Mike Waite) 8591041  Agent:

Policy A35: Land at former Wisley Airfield

*The Surrey Wildlife Trust maintains its objection to the scale of development allocated for this site (and see comment above in relation to Policy S2).
1. Three Farms Meadows:
   1. An appropriate assessment under the Habitats Regulations has not I gather been carried out. If so, such an absence is a breach of case law.
   2. MM47 – The size of the SNCI will be reduced and much of its biodiversity would be destroyed.
   3. The site would be very visible to and from the Surrey Hills AONB. A clear breach of the objectives of protecting AONBs.
   4. On an Inspector’s recommendation, the site has been rejected already for housing by the Secretary of State.

Comment: MM40 - LPMM18/3228  Respondent: Michael Bruton 8591169  Agent:

Comment: MM40 - LPMM18/5746  Respondent: Sarah Belton 8598561  Agent:

MM40 Fails to address the fact that this site is greenbelt land and was meant to be returned to farm land after WWII. This development must not be permitted on these grounds. The Council continues to ignore this without justification, and valid protests from local residents.

Comment: MM40 - LPMM18/2657  Respondent: CPRE Surrey Branch & Guildford District (Tim Harrold) 8607169  Agent:

4. ROAD TRAFFIC CONGESTION

All residents and many visitors to the town are aware of the deteriorating traffic congestion.

This is not just a matter of infrastructure in built-up areas but also the countryside. Here are examples of where sustainability is failing:
+ Decisions taken regarding new housing in Dunsfold and Cranleigh in Waverley District will lead to the use of country lanes through Albury, Blackheath, Chilworth, St Martha's, Shalford, and Wonersh. Narrow sinuous single track lanes with a “D” classification will be used to try to gain access to Guildford and elsewhere. Proposed development at Hornhatch Farm will further undermine the situation. POLICY A62 MM 40

Comment: MM40 - LPMM18/2662  Respondent: CPRE Surrey Branch & Guildford District (Tim Harrold) 8607169  Agent:
GUILDFORD LOCAL PLAN : STRATEGY & SITES - MAIN MODIFICATIONS 2018
MM40: POLICY A62 - LANE AT HORNHATCH FARM ADJOINING NEW ROAD, CHILWORTH

CPRE is very familiar with this site and with its past planning history. We object to its selection as a main modification to the draft Guildford Local Plan. There are a number of grounds for this objection which are given below.

1. The map of this Chilworth location omits to show that the boundary of the site is crossed by a gas main or indicate the position of a number of wells around the Hornhatch farmland. This information formed part of the ground investigation report dated February 2013 when a previous application for 30 houses at this site, to which both CPRE and Shalford PC objected, was refused.

2. The map also fails to show clearly that Hornhatch Farm adjoins the boundary of Wonersh Parish in Waverley District close to the grade 1 listed building of Great Tangley Manor House dating back to 1584, which is of national architectural significance, and located in attractive AGLV countryside that is to be considered by Natural England for upgrading to an Area of Outstanding Natural Beauty. Clearly, objection to another new development - this time for 80 houses - is likely to be made because of its proximity to what Pevsner describes as the most impressive of Surrey's half timbered houses. Although the site will be partially screened by trees, it must be recognised that these are subject to loss, damage and disease.

3. Objection to the construction of 80 houses at this site will be made not only by the inhabitants of Chilworth but also the communities of Shalford, St Martha, Wonersh and Albury. The prospect of additional traffic congestion will be extremely unpopular in this whole area which already suffers from severe tail-backs, which will deteriorate further as a result of Waverley BC plans for extra housing at Cranleigh and Dunsfold.

4. It has to be recognised that the Inspector has requested GBC to indicate Main Modification sites that will permit extra housing development to take place in the next 5 years without further delay. CPRE believes that GBC has not considered the problems which will result from their proposal, which will in our view require reconsideration of how to handle the road junction at Rice's Corner that has already been a source of disagreement with Surrey County Council over many years. To meet the requirement in terms of essential traffic improvement in this area, a great deal of extra money will have to be invested by sec at a time when it is generally acknowledged that they are financially in difficulty and resources are restricted. By adding to this financial burden the cost of tackling extra car congestion from 80 new houses is a daunting prospect, especially when one considers the poor service offered the community in terms of both current rail and bus services and its consequent reliance on private cars for work, medical services, secondary schools and anything beyond basic shopping.

CPRE therefore urges that this proposal be reconsidered and refused.

4. ROAD TRAFFIC CONGESTION

All residents and many visitors to the town are aware of the deteriorating traffic congestion.

This is not just a matter of infrastructure in built-up areas but also the countryside. Here are examples of where sustainability is failing:

+ Decisions taken regarding new housing in Dunsfold and Cranleigh in Waverley District will lead to the use of country lanes through Albury, Blackheath, Chilworth, St Martha's, Shalford, and Wonersh. Narrow sinuous single track lanes with a "D" classification will be used to try to gain access to Guildford and elsewhere. Proposed development at Hornhatch Farm will further undermine the situation. POLICY A62 MM 40

Attached documents:

Comment: MM40 - LPMM18/3277  Respondent: Valerie Thompson 8671969  Agent:
3. The development of over 2000 houses at Wisley/Ockham, "Three Farms Meadows" (also called Wisley airfield) was refused by the Secretary of State. His reasons included unsustainability, catastrophic impact on local rural life and the impact on the character of the area. GBC should not give the owners more time and consultations in order for this land to be developed. I object to this area being included again.

4. The houses, if built at Wisley, cannot be occupied until the A3/M25 junction is rebuilt, which will not happen for many years.

5. I object to yet more land having been added to the proposed development site.

Attached documents:

---

**Comment:** MM40 - LPMM18/6110  **Respondent:** Mr Kes Heffer 8672993  **Agent:**

**Specific to site A35 (Three Farm Meadows).**

- The addition of land to the south of the appeal site does not mitigate the issue of density because development of this additional land is within a certain distance of the air traffic control beacon, often critical to Heathrow flights. This additional land is also contiguous with the Ockham Conservation area such that its development would have an entirely deleterious effect on an important historical heritage. It would also increase the visibility of the site from the Surrey Hills AONB.

Attached documents:

---

**Comment:** MM40 - LPMM18/1486  **Respondent:** John and Susan Burge 8686913  **Agent:**

4. Site Specific A35

The inclusion of Three Farms Meadow/Wisley Airfield in the latest plan makes a mockery of the rejection of the site by both the Planning Inspector and the Secretary of State. I OBJECT to its inclusion in the Local Plan.

Attached documents:

---

**Comment:** MM40 - LPMM18/5368  **Respondent:** Helen Jefferies 8717921  **Agent:**

**MM39-45**

Object No need for additional sites particularly those in the green belt.

**MM40**

(3) Track changes do not appear to accurately reflect the previous wording

(23) This is a rural site in the countryside where “the highest standard of URBAN design are not appropriate”.

**MM40**
Object I strongly object to the change in the SNCI boundary.

I am writing regarding the modifications to the Local Plan and wish to object to the inclusion of the Wisley airstrip as an area for future development. As you are aware, this site was recently subject to a planning application in which all the pros and cons of developing the land were thoroughly reviewed by the Council and later by a government inspector. The outcome was that the site was considered unsuitable for a development of the scale suggested by the Council in its Local Plan. The site should therefore be removed from the Local Plan. A development comprising 2000 homes will have a huge negative impact on the surrounding area, our local services and infrastructure. Please re-consider.

Attached documents:

3. Site Policy A35, the former Wisley airfield

In June 2018 the Secretary of State refused the appeal of the site owner to develop this site with a new settlement of 2000+ homes. His reasons for refusing planning permission were clear and strong. Yet GBC have still retained this site within the Local Plan. I am incredulous by GBC’s approach. The case for removing this site from the local plan is clear and overwhelming. In summary:

1. The site is unsustainable, with the worse sustainability rating of any in the Local Plan;
2. The site is wholly dependent upon major infrastructure projects whose deliverability is very uncertain;
3. The site fails the Exceptional Circumstances test needed for Green Belt release;
4. Development of a new settlement will have major ecological consequences;
5. The site will have – in the words of the appeal inspector – a ‘catastrophic’ impact on the character of the existing Ockham community;
6. The site is not needed within the Local Plan for it to meet the assessed housing needs of the borough.

On this basis GBC should take the decision to remove this site from the Local Plan.

Accordingly, I OBJECT to Site Policy A35 and request that it is removed from the Local Plan.

Attached documents:

Local problems

MM40 Wisley should be retained as Green Belt and removed from the Plan. Revised housing figures weaken the justification for development. All the reasons it was turned down by the inspector are still valid.

Attached documents:
I strongly object to the former Wisley Airfield still being included in this local plan, despite the projected number of houses required (according to the ONS) having fallen by 40% and despite the site having been confirmed unsuitable for large scale development by the Secretary of State in June 2018.

**Comment:** MM40 - LPMM18/5612  **Respondent:** David Scotland 8803969  **Agent:**

- SITE SPECIFIC – A35 – Three Farms Meadows
  - The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR
  - Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB
  - MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.
  - The biodiversity of the SNCI will be destroyed by the proposed development.
  - An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law.

Attached documents:

**Comment:** MM40 - LPMM18/2018  **Respondent:** Peter Warburton 8805249  **Agent:**

- A35 – Three Farms Meadows
  - The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR.
  - Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.

Attached documents:

**Comment:** MM40 - LPMM18/2710  **Respondent:** Alan Robertson 8819265  **Agent:**

- A35 – Three Farms Meadows
  - The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR
  - Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB
SITE SPECIFIC – A35 – Three Farms Meadows

• The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR
• Land to the south abuts the Ockham Conservation area and another Grade II Listed Building (Bridge End House) and increases the visibility of the site to/from the Surrey Hill AONB

Comment: MM40 - LPMM18/4580  Respondent: R Brind 8837281  Agent:

Attached documents:

Comment: MM40 - LPMM18/3819  Respondent: John F. Wood 8852289  Agent:

Site Specific: A35 Three Farms Meadow

1. The presence of the VOR constrains the density of the area and adding land to the south of the appeal site will not mitigate this.
2. Land to the south is next to the Ockham Conservation area.
3. Land to the south means that the site is more visible from the Surrey Hills AONB.

Attached documents:

Comment: MM40 - LPMM18/5902  Respondent: Claire Yates 8859585  Agent:

A35 MM40. The increase in the minimum floor space at Burnt Common warehouse site is unreasonable due to the already heavy traffic in and around this site. The Employment Lands Needs Assessment showed a reduction in demand for Industrial Land. There is no need for new industrial sites when Slyfield has unused capacity. Other off-site highway works to mitigate the impacts of the development makes no mention of the A247 through Send, which would inevitably carry more traffic from the Wisley Airfield development to Woking.

Attached documents:

Comment: MM40 - LPMM18/5388  Respondent: Judith Allen 8880353  Agent:

MM47 the size of the SNCI Is drastically reduced despite the whole site qualifying on ecological grounds, no justification for altering the boundary of the SNCI.

Biodiversity will be destroyed.
An Appropriate Assessment and a Habitats Regulation Assessment have not been completed - a breach of case law.

As a resident I believe that I have a right to be notified of the Local Plan, I have not received any such notification.

I therefore request that this Plan be scrapped as unsound for the reasons stated.

Attached documents:

Comment: MM40 - LPMM18/3106  Respondent: Carol Wilson 8896161  Agent:

POLICY A35: FORMER WISLEY AIRFIELD (MM40)

- GBC refused planning permission for this site, then the Inspector and Secretary of State refused it too. Yet it is still there again in the plan. What a nonsense and waste of time and money.
- With the ONS reduced numbers this site will not be needed.
- Similar reductions will apply for Woking and so their ‘unmet need’ will no longer exist to be foisted upon Guildford.
- The Site of Nature Conservation Importance is not being treated as it deserves and as it was promised to be treated by avoidance and mitigation measures. There is no justification for altering the boundaries.
- Land to the south has been added to the site. Building here would do additional damage to the Conservation area.

Attached documents:

Comment: MM40 - LPMM18/2397  Respondent: Marianne Pascoe 8896961  Agent:

SITE SPECIFIC – A35 – Three Farms Meadows

- The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR
- Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB
- MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.
- The biodiversity of the SNCI will be destroyed by the proposed development.
- An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law

I you support the representation made by Wisley Action Group (WAG) which was written with advice from Richard Harwood QC.

Further, I would like the examination in public to be reopened so that the latest Office of National Statistics figures can be used, which show a reduced need in housing.

Attached documents:
Apart from the wastewater requirements, the changes lack any rationale or benefit. The condition of the SNCI will be inevitably compromised by the development itself. Moving references to unique places and unique context from opportunities to requirements is no doubt intended to strengthen the expectations but involves turning a very vague expectation into a similarly vague requirement.

**Attached documents:**

---

1. MM40 and MM35

On the 20th September the ONS released new household growth projections for Guildford for the Plan period. The new figures reduced the projected growth in households from 11,142 (applied to the previous version of the Plan) to 6,635, a reduction of 4,507 households, a 40.5% reduction. This change should have come as no surprise as in May 2018 ONS had already released their population projections that clearly foreshadowed a substantial drop in household projection. A reduction of 4,507 households equates to well over 2 strategic sites, for example MM40 and MM35.

**Attached documents:**

---

4. Policy A35 Former Wisley Airfield MM40

On 13th June 2018 the Secretary of State upheld the Council's decision to refuse permission for the Wisley Airfield planning application (15/P/00012) and the applicants planning appeal was dismissed. Three months later the Local Plan (including Policy A35 for development of essentially the same scale on Wisley Airfield) was submitted for the present public consultation. This seems very strange when the official household projections on which the Local Plan was based had been reduced by 40%.

The SNCI which used to cover the entire site has been reduced to about 15-20% of its former size. This contradicts the Local Plan which states that "Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures".

Consequently, Wisley Airfield should be withdrawn from the Local Plan.

**Attached documents:**

---
2. The proposal to develop the former Wisley airfield should be withdrawn from sites proposed for housing development, given the outcome of the recent appeal process and the comments of the Government’s inspector and Secretary of State justifying the appeal’s rejection. Any development, particularly on the scale proposed, will have a devastating impact, inter alia, on the locality and its infrastructure.

**Comment: MM40 - LPMM18/5917  Respondent: Andrew Frackiewicz 8900769  Agent:**

Regarding the proposed modification to the Plan I fully agree and endorse the comments and points of objection expressed in the two letters from East Horsley Parish Council dated 10 October 2018 dealing with (i) various comments on the proposed modification (ii) Policy A35 - Land at former Wisley Airfield, Ockham, and also those from Wisley Action Group.

...  

Policy A35 - Land at Wisley Airfield (Three Farm Meadows): The continued retention of this land in the Local Plan for an enormous settlement remains totally unacceptable and is ill-founded and against the views of the vast majority of the population currently residing in East & West Horsley, Ockham, Ripley, etc. The continued inclusion of this site is in my opinion a complete disregard by Guildford Borough Council officials to the fact that development on this site was rejected by the Secretary of State following a Public inquiry. This site should be removed from the Plan.

**Comment: MM40 - LPMM18/4619  Respondent: Anne Elkington 8910817  Agent:**

4. POLICY A35: FORMER WISLEY AIRFIELD (MM40)

The inclusion of Wisley airfield as a development site in the Local Plan ignores the recent dismissal of planning appeal on that site by Secretary of State. The traffic impacts of the proposed development would be the same as those just rejected by the Secretary of State, and are therefore unacceptable, as are the impacts on the local infrastructure (parking, medical provision, schooling etc), particularly when ONS household projections, on which the Local Plan should be based, have been reduced by 40%.

The Site of Nature Conservation Importance (SNCI) which used to cover the entire airfield site has been reduced to about 15-20% of its former size, and about one third of that residual area is land that is “safeguarded” for waste operations. This is inconsistent with paragraph 10(a) of the Policy A35 which states that “Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures.”

I object to the inclusion of the site.

Thank you for taking account of my views during the consultation period.

**Comment: MM40 - LPMM18/4994  Respondent: Tim Elkington 8915777  Agent:**
4. POLICY A35: FORMER WISLEY AIRFIELD (MM40)

53 MM40

Quality requirements for FWA

Apart from the wastewater requirements, the changes lack any rationale or benefit. The condition of the SNCI will be inevitably compromised by the development itself. Moving references to unique places and unique context from opportunities to requirements is no doubt intended to strength the expectations but involves turning a very vague expectation into a similarly vague requirement.

Attached documents:

Comment: MM40 - LPMM18/3465  
Respondent: William Logan 8921153  
Agent: Please focus your development on Wisley Airfield as its an open semi developed site which is no longer an area of natural beauty.

Attached documents:

Comment: MM40 - LPMM18/1514  
Respondent: Sue Reeve 8928961  
Agent: 1. Policy A35: FORMER WISLEY AIRFIELD (MM40) OBJECTION

- On 13th June 2018 the Secretary of State published his decision to uphold the Councils’ decision to refuse permission for the Wisley Airfield planning application (15/P/00012), and the applicant’s planning appeal was dismissed. Yet three months later the Local Plan (including Policy A35 for a development of essentially the same scale on Wisley Airfield as that rejected by the Secretary of State) was submitted for the present public
consultation. This seems very odd at a time when the official household projections on which the Local Plan was based had been reduced by 40%.

- In the Requirements section of this Policy, paragraph 10(a) states that “Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures.” However, in all previous versions of the Plan the area designated as a Site of Nature Conservation Importance (SNCI) covered the entire proposed development site, whereas the current Plan shows the area of the SNCI as being only about 15 – 20% of its earlier size. Moreover about a third of that remaining area of the SNCI includes a zone that is “safeguarded land for waste” (covered in the Surrey Waste Plan), so the net effect has been to emasculate what was formerly a substantial area of protected countryside, while stating that “every effort must be made to reduce the harm ...”. This is completely contradictory. It is outrageous that the area is reduced.

- The additional new land to the south of the site does not mitigate the density problems on Three Farms meadows as development on much of that land will be constrained by the presence of the VOR beacon

- The additional new land to the south of the site abuts the Ockham conservation area and increases the visibility of the site form the AONB

Attached documents:

Comment: MM40 - LPMM18/432  Respondent: East Horsley Parish Council (Nick Clemens) 8929057  Agent: Guildford Local Plan: comments on Proposed Modifications

East Horsley Parish Council (“EHPC”) submits this letter under GBC’s current local plan consultation addressing Site Policy A35, land at the former Wisley airfield in Ockham. Comments by EHPC on other policy modifications are provided in a separate letter.

POLICY A35 Land at former Wisley airfield, Ockham

MM40 of the Modifications Schedule sets out a number of minor changes to site policy A35, the development of a new settlement at the former Wisley airfield site. However, our primary concern is why, after a public inquiry and the Secretary of State’s robust refusal of planning permission, have GBC chosen to keep this site policy within the local plan?

Implications of planning appeal decision

In September/October 2017 an extensive public inquiry was held following a planning appeal by the site owner, Wisley Property Investments Ltd (‘WPIL’), subsequent to the unanimous refusal of planning permission by GBC’s Planning Committee in April 2016. The site addressed at the appeal was marginally different from Site Policy A35, which has been expanded to include land surrounding Bridge End Farm at the southern edge of the site.

On 13th June 2018 the WPIL appeal was refused by the Secretary of State, the announcement being made whilst the local plan was still being examined. In reaching their decision both the inspector and the Secretary of State gave considerable weight to the Green Belt harm caused by the proposed development, gave substantial weight to the severe impact on the strategic road network, considerable weight to the harm done to heritage assets, significant weight to the harm done to local character and appearance, and significant weight to irreversible landscape harm, including permanent harm to views from the Surrey Hills AONB.

The appeal inspector, Mr Clive Hughes, was particularly critical about the impact which the development would have on the character of the local area, commenting in paragraph 20.95:

“...the overall impact would result in substantial harm to the character of the immediate area. Being sited at the very heart of Ockham parish it would, in effect, link all the surrounding hamlets. It would erode the historic pattern of development in the area to the detriment of the character of these settlements. It would fail to reflect or respect its immediate setting and I agree with the nearby residents that this impact would be catastrophic on their rural way of life.”
With such a clear refusal of the WPIL appeal, it was therefore surprising that just two days’ later on 15th June 2018, GBC issued a ‘Discussion Note’ stating their intention to retain Site Policy A35 within the local plan. Three main grounds were cited by GBC for this position:

a) that Policy A35 was different to the appeal site, being a total of 95.9 hectares in size compared to the 114.7 hectares of the appeal site, although the developable land area was increased by approximately 20%;

b) that the removal of this site from the Green Belt would mean Green Belt harm was no longer a relevant planning consideration;

c) that Highways England and WIPL were close to finalizing an agreement over infrastructure contribution which would allow Highways England to withdraw their objection to this development that they had lodged at the appeal.

Site Policy A35, like all of the larger sites within the local plan, has been subjected to examination by the local plan examiner, Mr Bore, in the first half of 2018. In February 2018 EHPC submitted a Statement to Mr Bore addressing Site Policy A35 – ie, well before the WPIL appeal decision had been announced. For ease of reference a copy of this Statement is given in Appendix 1 of this letter and provides a detailed argument as to why Site Policy A35 is unsound, including (in its Appendix B) a detailed planning balance demonstrating that the Exceptional Circumstances test needed to justify removing this site from the Green Belt is not met.

The examiner’s public hearing for Site A35 was held on 5th July 2018, the very last item to be considered at the examiner’s open sessions. At this hearing EHPC’s representative drew attention to the flaws in GBC’s argument that the site is materially different from the WPIL appeal site. As our representative explained, the difference between the two sites only increases the overall planning harm, it does not reduce it. He further explained that the strongly negative planning balance means the Exceptional Circumstances test is not met, so the argument that Green Belt harm is irrelevant is fallacious. A copy of this hearing address is given as Appendix 2 to this submission.

At the public hearing it also became evident that Highways England had still not finalized any agreement with WPIL over the road infrastructure commitments required to support site development.

Despite all of the arguments against this site, as soon as the Site Policy A35 hearing was concluded the examiner summarised his overall position on the local plan, announcing he was not intending to recommend the removal of any sites.

**Flaws in the local plan process**

EHPC believes the local plan process contains a series of flaws in respect of Site Policy A35, including the following:

a) The examiner’s decision on Site Policy A35 was made within a few minutes after the closing of the public hearing. He could not possibly have had the time to properly consider and assess all of the arguments presented during that day. This is a clear case of pre-determination;

b) The examiner did not recommend the removal of any sites from the local plan. Given the large number of well-argued cases presented against many sites within the local plan, the absence of any one single site being proposed for removal implies either that the examination process in reviewing sites was little more than a token exercise, having no real validity, or that the benchmark level used by the examiner for assessing the soundness of any site policy was set so high as to be effectively worthless;

c) The examiner did not permit any further written submissions from hearing participants on Site Policy A35 following the publication of the Secretary of State’s appeal decision, other than from GBC. In view of the importance of the appeal decision towards assessing the soundness of Site Policy A35, we believe such submissions should have been permitted.

d) GBC issued their Discussion Note on Site Policy A35 within two days of the Secretary of State refusing the WPIL appeal. The extensive arguments made by the appeal inspector and the Secretary of State cannot possibly have been properly reviewed by GBC and their advisers. Yet it seems that GBC are so determined to retain this site within the local plan that even the reasoned arguments of the appeal inspector and the Secretary of State counted for nothing.
The deficiencies of this site have been covered at length in earlier consultation submissions made by EHPC and many others. The Secretary of State and the appeal inspector in their June 2018 report provided a detailed review of the key planning benefits and harms involved by this development. The modest differences between the WPIL site and Site Policy A35 have no qualitative impact on the fundamental planning issues in this respect.

EHPC believes the case for removing Site Policy A35 from the local plan is now overwhelming. In particular we would highlight the following factors:

a) The Exceptional Circumstances test for Green Belt release is not met, as set out in detail in our Statement to the examiner shown in Appendix 1;

b) The site is fundamentally unsustainable. This is one of the most fundamental requirements of NPPF policy, yet the updated Sustainability Appraisal provided to GBC by AECOM still shows this site as having the worst sustainability of any large site within the local plan;

c) All necessary infrastructure facilities have to be newly provided. This will involve a number of substantial new infrastructure projects of different kinds with considerable uncertainties over their delivery and funding. We note in particular:

i. The development is effectively dependent upon the completion of a major new road improvement scheme at the busy A3/M25 junction, the timing and design of which still remains uncertain;

ii. The development is also dependent upon the building of new south-facing slip roads to and from the A3 at the Burnt Common junction, whose timing and funding is also uncertain;

iii. Policy A35 requires a mitigation scheme to address traffic issues at the junction of Ripley High Street and Newark Lane (leading to Woking), but it is not evident that such mitigation is physically possible;

iv. Major new sewage facilities will be needed at Ripley sewage works, the timing of which is uncertain;

v. Highways England objected to the proposed development at the WPIL appeal due to its harmful impact on the strategic road network and although GBC’s Discussion Note of July 2018 indicated an agreement between WPIL and Highways England was imminent, no such agreement has yet been announced.

d) Additional ecological protection may be required from that proposed by WPIL in their refused planning application. This follows from two recent landmark judgements in the Court of Justice for the EU, namely the ruling on 25th July 2018 by Advocate General Kokott concerning nitrogen deposition at protected sites, and the decision on 13th April 2018 in the matter of ‘People Over Wind’ which potentially alters the UK position in relation to appropriate assessments under the Habitats Directive. Previously-proposed SANG provisions and other ecological measures may have to be significantly enhanced at Site A35 as a result of these rulings, potentially reducing the developable area of the site still further.

e) The only reason for having such an unsustainable site within the local plan is its potential contribution towards new housing supply in the borough. However, we note that:

i. The latest national housing projections released by ONS show major reductions in the projected housing need through to 2034, an approximate 25% reduction nationally from previous projections. Accordingly, it may well be questioned whether the future housing need will actually exist to justify building new homes on the scale proposed for this new and remotely-located settlement;

ii. Total housing numbers planned in the latest version of the local plan show the Wisley site is unnecessary for meeting the overall assessed housing needs of the borough, as estimated in the new version of the local plan. At the examination hearing it was GBC’s own QC who told the examiner that: “It is true we could do without 2000 homes from the totalled site allocations”

iii. Due to delays in delivering infrastructure, it is now highly unlikely that this site will make any contribution to the 5 year housing supply of the borough. This appears to have been the most important factor used by the examiner in deciding not to remove any sites from the local plan.
Concluding remarks

Site Policy A35 is based upon a site which is unsustainable and totally reliant on infrastructure whose delivery is highly uncertain. The appeal inspector commented that the impact of this development on local residents would be ‘catastrophic’ to their way of life, yet its contribution to borough housing targets appears unnecessary.

Accordingly, we urge GBC to remove Site Policy A35 from the local plan.

Appendices:

1. EHPC Examination Statement: Site Policy A35, the former Wisley airfield

2. EHPC hearing address on Site Policy A35

Appendix 1:

Examination statement by East Horsley parish council: Site Policy A35, Wisley airfield

The following is an extract from the examination statement submitted by East Horsley parish council to the local plan examiner, Mr. Bore, on 8th May 2018.

2. PART TWO:

Site Policy A35, new settlement at Wisley airfield

Matters & Issues: 11.33

2.1 In paragraph 11.33 of Matters & Issues (ID-3) the inspector asks in relation to Site Policy A35, the proposed new settlement at the former Wisley airfield in Ockham: “Are there local level exceptional circumstances that justify the release of the site from the Green Belt?”

2.2 EHPC contends that there are not and indeed that the policy fails all four of the tests for soundness set out in the inspector’s Guidance Notes (ID-2), as discussed in turn below.

Tests for Soundness:

2.3 Is the policy positively-prepared? - based on a strategy which seeks to meet objectively assessed development and infrastructure requirements.

2.3.1 Site Policy A35 proposes a new settlement with approximately 2,000 new homes. This represents 16% of the plan’s overall housing target for Guildford borough and around 19% of estimated OAN. It would be the largest single site housing contribution to the plan.

2.3.2 However, this large scale is also a major weakness, given the very significant risks associated with the delivery of this site. Major infrastructure investments of various different kinds are required in order to enable the site to function effectively and the timescale and delivery of such infrastructure remains highly uncertain.

2.3.3 Examples of this delivery risk include:

a) Highways England objected to the WPIL planning application at the Wisley public inquiry held in September/October 2017 due to the projected impact of the development on A3 traffic flows. As the statutory authority any future development at this site would normally require their support.

b) All local services will need to be established including substantial new sewage treatment facilities, which Thames Water have indicated will require a minimum of 3 years to construct from the time planning approval is granted.

c) Local opposition to the proposed development has been very strong and future legal challenges against this complex development cannot be ruled out, potentially delaying the development or even preventing it entirely.

2.3.4 In preparing the plan GBC have not attempted to define the locations of housing need across the borough. This is unfortunate since it is evident from the ONS population projections that the greatest housing need of the borough arises
primarily within the metropolitan area of Guildford. The Wisley airfield site is not needed to satisfy the housing needs of the parish of Ockham, nor any of the surrounding parishes. It is needed primarily to satisfy housing needs within the Guildford metropolitan area, some 10 miles away. However, no connecting railway or bus services currently serve this site, which would be highly car dependent, housing commuters who drive daily into Guildford or London for their employment.

2.3.5 All of this uncertainty in delivery means that there are very considerable risks associated with this entire project. Whilst Policy A35 is ambitious, the overall plan viability is being put at risk if there is any failure to deliver this large site in an effective and timely manner.

2.3.6 Accordingly, EHPC believes that the risk concentration associated with this site is too high for the plan and as such it fundamentally undermines its robustness and viability. Therefore, on the test of being ‘positively-prepared’ EHPC believes that Policy A35 should be considered unsound.

2.4 Is the policy justified? - the most appropriate strategy when considered against the reasonable alternatives, based on proportionate evidence.

2.4.1 The NPPF requires that a local plan demonstrates ‘exceptional circumstances’ to justify the release of land from the Green Belt. The customary approach is to consider all of the cumulative benefits or gains arising from the proposed development and compare them against all of the various damage or harms that would result. EHPC’s assessment of the planning balance for Site Policy A35 is provided in our Appendix B.

2.4.2 EHPC’s assessment shows benefits only from the provision of new housing, plus a minor employment gain, arising from a site which is not sustainable. As detailed in Appendix B, offsetting this are the harm to the Green Belt from inappropriate development, harm to the openness of the Green Belt, harm to the purposes of the Green Belt, harm due to impacts on the strategic and local road network, harm to local air quality, harm to protected environmental areas and biodiversity, harm due to the loss of best and most versatile agricultural land, harm to local character and heritage assets, harm to views from the Surrey Hills AONB and harm due to impacts on social infrastructure across the area.

2.4.3 The weighting which EHPC attributes to these planning gains and harms in the planning balance is summarised below:

<table>
<thead>
<tr>
<th>Factor</th>
<th>Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gain: Housing</td>
<td>Substantial</td>
</tr>
<tr>
<td>Employment</td>
<td>Minor</td>
</tr>
<tr>

<tr>
<td>Heritage assets</td>
<td>Substantial</td>
</tr>
<tr>
<td>Social infrastructure</td>
<td>Minor/Moderate</td>
</tr>
</tbody>
</table>

2.4.4 The preponderance in the planning balance is therefore overwhelming harm from the proposed development, set against the selection of an unsustainable site for inappropriate housing development.

2.4.5 The planning balance emphatically addresses the inspector’s fundamental question raised in Matters & Issues 11.33 – there are no exceptional circumstances to justify the release of this site from the Green Belt.

2.5 Is the policy effective? - deliverable over its period and based on effective joint working.

2.5.1 The site is certainly available for development. Whether it is deliverable is highly uncertain. In particular major infrastructure uncertainties remain, the most fundamental of which relate to the strategic road network.
2.5.2 The site lies in close proximity to the M25/A3 junction, one of the busiest in the country, and one where major improvement works are now being planned by Highways England. The final design and timescale of this improvement scheme are still to be determined but these decisions will have a significant bearing on the timescale and traffic patterns around the proposed new settlement. As mentioned in paragraph 2.3.3 earlier, Highways England objected to the planning application in the 2017 public inquiry due to its impact on A3 traffic flows in the area.

2.5.3 A further A3 junction is also proposed in connection with this site involving new slip roads being constructed at Burnt Common in Send. Timing, layout, design and funding for these proposed slips roads and the associated access roads are all very uncertain at this juncture, yet this expanded junction would have a major impact on traffic flows in the area. This is particularly acute through the already congested Ripley village and at the Ockham roundabout, the main access point into and out of the new settlement.

2.5.4 All other infrastructure at the site will need to be newly provided. For waste water, Thames Water has determined that additional capacity will be needed at the Ripley sewage treatment works, with at least three years’ construction time required.

2.5.5 The concept of ‘effective joint working’ is curious. The site owner, WPIL, is based in the Cayman Islands and does not disclose its beneficial ownership. At this juncture it is unclear as to who precisely will take on the responsibility for delivering this new settlement.

2.5.6 Local opposition is substantial. Over 90% of local residents oppose the development, as do all the local parish councils, Cobham Conservation & Heritage Trust, the RSPB and Highways England. This situation only adds to the fundamental uncertainties associated with this project.

2.5.7 Given the high level of uncertainties for deliverability of the new settlement, on the test of effectiveness EHPC believes Policy A35 must be considered unsound.

2.6 Is the policy consistent with national policy? – able to achieve sustainable development in accordance with the Framework’s policies.

2.6.1 The inadequate sustainability of this site is not in dispute. The site is located in a relatively isolated position with limited opportunities for promoting alternative sustainable modes of travel other than by car. There is no existing public transport. The nearest train stations are Horsley and Effingham Junction some 2 – 3 miles away. Neither station currently has significant parking capacity. The proposed new settlement will add to traffic congestion in the area and lead to further pressure on an already strained rural road network.

2.6.2 There are presently no schools, medical services or shops within walking distance of the site. None of the schools or medical services in nearby settlements has capacity to service the additional population arising from 2,000 new homes. New on-site facilities proposed under Policy A35 will need time to be established, forcing early residents to travel around the local area by car. All on-site services will need to be established.

2.6.3 Presently, there is no employment at the site and only modest levels likely after the development is completed. Most site residents will travel to work outside of the site. At the 2017 public inquiry a modal analysis presented by WPIL’s transport consultant, WSP, showed that the very large majority of residents will continue to travel from the site by car long after the settlement has become fully established. All current local bus services need heavy subsidies and the policy requirement for a shuttle bus service to be established in perpetuity remains financially uncertain.

2.6.4 In June 2017 GBC’s consultant, Aecom, published a Sustainability Appraisal of all policy sites within the Local Plan. Policy A35 received 8 ‘red flags’ out of the 20 assessed criteria, giving it the worst sustainability of any large site in the plan.

2.6.5 Given its high dependence upon car transportation, EHPC believes that Site A35 does not meet an acceptable level of sustainability. As such it is contrary to the most fundamental of NPPF policies.

2.6.6 There are many more NPPF policies with which Policy A35 fails to comply, including the following:

---

**Paragraph** Subject
The need to pursue sustainable development

Recognising local circumstances in achieving sustainable development

Presumption in favour of sustainable development

Importance of local context, character & rural communities

Responding to local character & history

Promoting local distinctiveness in design

Need to integrate into the natural, built & historic environment

Need to improve the character & quality of an area

The fundamental importance given to the Green Belt

The various purposes of the Green Belt

Need to promote sustainable patterns of development

Weight given to Green Belt harm

Inappropriate forms of development in the Green Belt

Priority given to protecting the best & most versatile agricultural land

Conservation & enhancement of biodiversity

2.6.7 The list above is by no means exhaustive but its considerable length highlights the material non-compliance of this site with NPPF policies.

Comment: MM40 - LPMM18/433  Respondent: East Horsley Parish Council (Nick Clemens) 8929057  Agent:

2.7 Overall assessment

2.7.1 There are three basic criteria for site selection in any development plan: availability, deliverability and sustainability. In the case of Site A35 these may be summarised as follows:

Availability: Yes, the site is available
Deliverability: Possibly, although there are major uncertainties
Sustainability: No, the site is not sustainable

2.7.2 The planning balance of our Appendix B shows that exceptional circumstances do not exist to justify removal of this site from the Green Belt. Taken together with the failure to satisfy the inspector’s four tests for soundness, EHPC believes that Site Policy A35 should be considered unsound.

2.8 Proposed modification to the plan:

How can the plan be modified to make it sound?

2.8.1 EHPC contends that the plan can only be made sound if Policy A35 is removed from the plan.

2.8.2 The loss of housing numbers in the plan implied by this removal may be partially compensated from additional housing that will arise as a result of planning decisions and appeal decisions made outside of the plan. This would include, from recent months, the Howard of Effingham School site in Effingham (295 homes) and the Guildford Station re-development (438 homes), both of which may result in significantly earlier housing delivery than would otherwise come about from a new settlement at Wisley airfield.

East Horsley Parish Council
8th May 2018

APPENDIX B Site Policy A35: the planning balance (Appendix to examination statement of 8th May 2018)
1. **a) Introduction**

This Appendix provides comments on the overall planning balance for Site A35, land at the former Wisley airfield in Ockham, provided as support in addressing the inspector’s Matters & Issues No. 11.33, namely: “Are there local level exceptional circumstances that justify the release of the site from the Green Belt?”

The customary approach towards assessing ‘exceptional circumstances’ is to consider all of the cumulative benefits or gains arising from Site Policy A35 and compare them against the various damage or harms that would result from the proposed development.

Much of the material in this Appendix has been drawn from the public inquiry held in September/October 2017 in relation to a planning appeal by the site owner, Wisley Property Investments Ltd (‘WPIL’). Such material was not fully available prior to the public inquiry, in which EHPC acted as a joint Rule 6 party.

At the time of writing, this planning appeal is still to be determined by the Secretary of State.

1. **b) Planning gains**

B1.1 With 2,000 new dwellings proposed at the new settlement, housing represents the main planning gain from Policy A35. Such housing is not needed to satisfy the housing needs of Ockham parish, nor the collective needs of the other four parishes surrounding this site. Justification comes from its important contribution to Local Plan housing targets across Guildford borough. Effectively, this means a contribution towards the housing need of the Guildford metropolitan area – despite the fact that Guildford town centre is around 10 miles away from this site.

B1.2 Given its significance to Local Plan housing targets, EHPC attributes ‘substantial’ weight to this planning gain.

B1.3 Policy A35 additionally proposes 4,300 square metres of employment floorspace, 1,100 square metres of retail space and 1,050 square metres of local services space. Given the relatively small scale of these facilities and the large-scale availability of office and factory units in nearby Brooklands, in a planning balance EHPC attributes only a ‘minor’ weighting to such employment gains.

B1.4 Policy A35 also proposes a range of new infrastructure. Substantial contributions to two major A3 projects are included - the A3/M25 junction and new slip roads at Burnt Common – plus smaller traffic and cycle route projects. All such contributions arise from the need to mitigate the impacts of the development and as such cannot be considered a planning gain.

1. **b) Planning harms**

**B2.1 Harm to the Green Belt**

B2.1.1 Site A35 is currently part of the Metropolitan Green Belt. Development at this site is therefore considered inappropriate and harmful to the Green Belt.

B2.1.2 In the Green Belt & Countryside Study by Pegasus Planning, Appendix I provides a Green Belt Purposes Assessment in which land parcels across Guildford borough are assessed to determine whether or not they meet the NPPF-defined purposes of the Green Belt.

B2.1.3 Site A35 falls primarily within Land Parcel C18 and accounts for the majority of that area. Pegasus give the following assessment:

*Purpose 1* Does not check the sprawl of large built-up areas  
*Purpose 2* Does not prevent neighbouring settlements from merging  
*Purpose 3* Minimal existing development, therefore safeguards the countryside from encroachment  
*Purpose 4* Preserves the setting of Ockham historic village and conservation area

Since Pegasus consider Parcel C18 fulfils two purposes of the Green Belt (Purposes 3 & 4), they assess it as Medium Sensitivity Green Belt.
B2.1.4 EHPC believes this analysis is flawed. The site is located in a key strategic position just outside the M25 circle, set between the suburban developments of the London conurbation, Woking and the rural village areas outside the M25. Development here will represent the loss of a vital ‘salami-slice’ that could eventually culminate in urbanisation of the entire A3 corridor from London to Guildford. Purpose 1 is clearly being fulfilled.

B2.1.5 Regarding Purpose 2, the separation of the historic villages of Ockham, Cobham, Wisley, Ripley, West and East Horsley is being achieved by a number of areas of countryside of which this site represents the largest and most important. Purpose 2 is thereby being fulfilled.

B2.1.6 As such, EHPC believes the site fulfils four of the defined purposes of the Green Belt, not two, and should rightly be classified as High Sensitivity Green Belt.

B2.1.7 The site is also very open – it could hardly be more so. Even the brownfield element of the runway and hard-standing is all open land. Harm due to the loss of openness to the Green Belt is self-evident.

B2.1.8 Accordingly, removing Site A35 from the Green Belt will represent harm from inappropriate development, harm to the openness of the Green Belt and harm to the purposes of the Green Belt. EHPC therefore attributes ‘substantial’ weight to this Green Belt harm in the planning balance.

B2.2 Traffic impacts

B2.2.1 It is inevitable that locating a new settlement close to one of the busiest road junctions in England will create additional traffic congestion. In their refusal of WPIL’s planning application in 2015, GBC cited ‘severe traffic impacts’ on both the strategic road network and the local road network amongst their 14 reasons for refusal.

B2.2.2 At the 2017 public inquiry, Highways England objected to the proposed development due to its impact on A3 traffic flows. As the statutory body in this matter such opinion is normally definitive.

B2.2.3 The local road network consists of narrow, winding country lanes established many years ago to serve the local farming community. Most local roads do not have pedestrian pavements except for short lengths within the villages, few have street lighting and road surfaces are often in a poor state of repair due to high HGV volumes.

B2.2.4 Traffic modelling presented by WPIL at the 2017 public inquiry demonstrated the significant impact the development would have on this local network. For example, along Ockham Lane traffic volumes are predicted to rise by 150% as a result of the development – a severe impact indeed.

B2.2.5 Policy A35 also includes the following cycle route provision: “An off-site cycle network to key destinations including Effingham Junction railway station, Horsley railway station/Station Parade, and Ripley and Byfleet to be provided with improvements to a level that would be attractive and safe for the average cyclist”.

B2.2.6 Safe cycle links to the closest railway stations of Horsley and Effingham Junction would be important for commuters. The natural routes run along Ockham Road North and Old Lane but both are narrow rural lanes, with tightly bordered carriageways and are presently suitable only for cyclists with advanced skills. Creating safe cycleways along these roads will require major road widening projects, even assuming additional land could be acquired.

B2.2.7 A cycle link to Byfleet would be dependent upon securing a right of way down Muddy Lane which runs underneath the M25. This is the subject of a future public inquiry and being opposed by local residents and landowners.

B2.2.8 Policy A35 requires that a new local bus service be secured in perpetuity to provide a sustainable transport option to site residents going to Effingham Junction and/or Horsley stations, Guildford, Woking and Cobham. High levels of subsidy are presently needed to support local public bus services around this locality, raising significant doubts over the financial viability of any ‘in perpetuity’ commitments.

B2.2.9 The car parks at both Horsley and Effingham Junction railway stations are presently operating at around capacity, a situation likely to be exacerbated by a further 400+ homes proposed for development in the Horsleys under the
Submission Local Plan. However, there is no provision under Policy A35 to expand these car parks, nor was there any such provision in the Section 106 agreement signed during the public inquiry.

B2.2.10 The two retail areas closest to the site are in East Horsley and Ripley. Parking is very limited at both locations and likely to be severely strained if residents from the site choose to visit these villages for their shopping and services.

B2.2.11 In view of the significant impacts on both the strategic and local road network, EHPC considers the weight to be given to traffic harm in the planning balance should be ‘Substantial’.

B2.3 Environmental harm

B2.3.1 The site is immediately adjacent to Ockham Common, a designated SSSI, and falls within the Thames Basin Heath SPA Zone of Protection. Nearly three quarters of the site is greenfield. Even that part which is previously developed land is largely designated an SNCI and therefore must be considered as having high environmental value.

B2.3.2 Air quality near the busy A3 currently exceeds EU guidelines for nitrogen dioxide levels. Development at the site and the resultant increase in vehicle volumes will further deteriorate air quality, particularly on its western side. Governmental guidelines require no new schools should be built in areas of deficient air quality.

B2.3.3 The Thames Basin Heath SPA is subject to nitrogen pollution in excess of critical loads near this site. Development is expected to further increase nitrogen deposition, which will have a direct impact on plant health, high levels of NOx being toxic for plants.

B2.3.4 Whilst some mitigation may help limit environmental impacts, (eg. through warden monitoring of SANG areas), it is inevitable that a settlement of around 5,000 persons, plus their pets, will cause some degree of harm to these internationally important nature conservation assets. Accordingly, EHPC attributes a weighting of ‘Moderate’ to ‘Substantial’ to this environmental harm, depending upon the mitigation provided.

B2.4 Harm to agriculture

B2.4.1 The development will result in the loss of 63 hectares of agricultural land from within Grades 2, 3a and 3b, of which 44 hectares comprise ‘best and most versatile’ land. This is contrary to Policy RE7 of the current development plan and to Policy E5 of the Submission Local Plan.

B2.4.2 Accordingly, EHPC gives ‘substantial’ weight to this loss of agricultural land in the planning balance.

B2.5 Harm to local character

B2.5.1 The site lies within the landscape designation of Ockham and Clandon Wooded Rolling Clayland, which is characteristically rural with development consisting of scattered farmsteads, grand houses in parkland and rural villages. These villages have grown up organically over hundreds of years with a pattern of growth reflecting movement routes between them.

B2.5.2 This landscape character is valued by local people and forms the basis of positive recommendations for future conservation and enhancement of the landscape in the Guildford Landscape Character Assessment (GLCA). Policy A35 will cut directly across the GLCA landscape strategy and conflict with its prescriptions. It will cause significant harm to those attributes of the environment which people value and which contribute to their perception of the attractiveness and uniqueness of this area.

B2.5.3 Whilst Policy A35 does not itself specify the settlement configuration or masterplan layout, the constraints of the SPA and site geography mean that options are limited to a linear form of settlement. To achieve 2,000 homes within this constrained area a high density development is also necessary, such as that proposed by WPIL in their planning application. The visibility of such development is accentuated by its location on an existing ridge line - the WPIL planning application involved a line of 3, 4 and 5 storey housing running for 2 km.

B2.5.4 Such constraints would therefore lead to a wholly inappropriate form of development which would be highly urban in character and not take its design lead from the pattern of local villages, nor retain the traditional relationship
between villages and the surrounding landscape. It will fundamentally diminish the rural character of this locality and be totally at odds with the built environment objectives of the GLCA and with Policy D4 of the Submission Local Plan.

B2.5.5 Due to its fundamental and irreversible impact on the character of this rural area, EHPC attributes a weighting of ‘substantial’ to such harm in the planning balance.

**B2.6 Harm to views from the Surrey Hills AONB**

B2.6.1 The development will be clearly visible from the Surrey Hills AONB, a well-used and much valued area of beauty used for recreational purposes. The length of the development and its height along an existing east-west ridge line serve to increase the visibility of the development and its consequential impact on the otherwise predominantly rural scene. From viewpoints in the Surrey Hills AONB above West Horsley this 2km long development will subtend an angle of 23 degrees and be the dominant feature of the panorama. Large expanses of glass windows, as well as south-facing solar panels fixed to building roofs, will tend to reflect sunlight and accentuate the intrusive impact.

B2.6.2 Due to the large-scale irreversible impact on views from the Surrey Hills AONB, EHPC attributes ‘substantial’ weight to this harm in the planning balance.

**B2.7 Harm to heritage assets**

B2.7.1 Ockham and the four surrounding parishes of East Horsley, West Horsley, Ripley and Wisley, are historic villages containing a total of 185 listed buildings. All have designated conservation areas. The insertion of a modern high-density urban settlement into their midst will adversely impact their heritage character, contrary to Policy D3 of the Submission Local Plan.

B2.7.2 Several listed buildings are situated close to the site, including the cottage of Yarne on its eastern boundary. The setting and views from Yarne will be fundamentally impacted by this development.

B2.7.3 The impacts on the heritage character of the area and on the setting of Yarne will be fundamental, impacts not capable of effective mitigation under Policy A35. Accordingly, EHPC attributes ‘substantial’ weight to such harm.

**B2.8 Harm to social infrastructure**

B2.8.1 Medical centres and schools in this area currently have little or no spare capacity to absorb large numbers from the Wisley airfield site. Although Policy A35 supports building a medical centre and a school on-site, mechanisms for delivering these facilities are uncertain, as are timescales for the commencement of services.

B2.8.2 Impacts on social infrastructure are capable of mitigation through additional resourcing and Section 106 provisions. Accordingly, EHPC attributes a weighting of ‘minor’ to ‘moderate’ for such harm, dependent upon mitigation measures provided.

1. **c) The overall planning balance**

B3.1 The NPPF requires that a local plan demonstrates ‘exceptional circumstances’ to justify the release of land from the Green Belt.

B3.2 The overall planning balance for Policy A35 shows benefits only from the provision of new housing, plus a minor employment gain. Offsetting this are the wide range of harms as discussed above.

B3.3 The weighting which EHPC attributes to these planning gains and harms is summarised as follows:

<table>
<thead>
<tr>
<th>Factor</th>
<th>Weight attributed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Gain: Housing</td>
<td>Substantial</td>
</tr>
<tr>
<td>Employment</td>
<td>Minor</td>
</tr>
<tr>
<td>Harm:</td>
<td>Green Belt Substantial</td>
</tr>
<tr>
<td>Traffic impacts</td>
<td>Substantial</td>
</tr>
</tbody>
</table>
Environment Moderate/Substantial
Agricultural land Substantial
Local character Substantial
Surrey Hills AONB views Substantial
Heritage assets Substantial
Social infrastructure Minor/Moderate

B3.4 The preponderance in the overall planning balance is overwhelming harm arising from the proposed development set against the selection of an unsustainable site for inappropriate housing development. The ‘exceptional circumstances’ test is not met.

Appendix 2:

EHPC hearing address: Site Policy A35, the former Wisley airfield

The following address was delivered by EHPC’s representative, Mr Peter Bennett-Davies, at the examiner’s hearing held in Millmead on 5th July 2018.

Sir, as advised when I spoke on 26th June, I am a resident of East Horsley and have been asked by Mr Robert Taylor - Chair of East Horsley PC Planning Committee who is on holiday - to make a statement on Site A35.

The additional 19 hectares surrounding Bridge End Farm do offer an opportunity to expand the developable area of the site, although this land is subject to certain constraints. For instance, it slopes steeply in places, parts are subject to ongoing NATS beacon restrictions, parts will impact on the setting of the listed Bridge End House, parts are classified as Flood Zones 2 & 3, and there is a 0.5km boundary fronting directly on to Ockham Lane.

Both the Appeal site and Site A35 propose the same number of new dwellings. Therefore, inclusion of this additional land around Bridge End Farm should reduce overall housing density. In the Appeal, WPIL’s consultant estimated net housing density to be 49 dph in his masterplan. Since these additional 19 hectares represent 20% of Site A35, a comparable reduction in housing density may be anticipated – on a pro rata basis 39 dph is implied. However, given the site constraints mentioned, and dependent upon the masterplan proposed, something in the range of 40 – 45 dph might perhaps be more likely.

In their Position Statement issued after the Appeal decision, GBC has suggested these additional 19 hectares “could allow a less dense and linear development...” and that this would therefore lessen the harm to the character of the area so clearly identified by the Appeal inspector and Secretary of State. However, I would suggest that 40 to 45 dph still represents a high urban density and one which would necessitate extensive use of large-scale apartments. Moreover, the main central part of the site would, because of other site constraints, still require a strongly linear form.

In their Position Statement issued after the Appeal decision, GBC has suggested these additional 19 hectares “could allow a less dense and linear development...” and that this would therefore lessen the harm to the character of the area so clearly identified by the Appeal inspector and Secretary of State. However, I would suggest that 40 to 45 dph still represents a high urban density and one which would necessitate extensive use of large-scale apartments. Moreover, the main central part of the site would, because of other site constraints, still require a strongly linear form.

+ With reference Appeal Inspector’s Report at paras 10, 18, 19 and 20 re the Surrey Hills AONB. The 2 km linear form subtends an angle of 22.5 degrees when viewed from a public viewpoint in the AONB.

Accordingly, any benefits of reducing harm to the character of the area are likely to be imperceptible, if not entirely illusionary. It may also be noted that the closest village of comparable size to Site A35 is East Horsley, which has a net housing density of 8 dph across its settlement area.

Considering the changes between the Appeal site and Site A35, I suggest that the incremental effect on these various items to the planning balance would be as follows:

1. a) Green Belt harm is worsened under Policy A35, since an additional 19 hectares of Green Belt fields around Bridge End Farm would be developed under this policy compared with the Appeal site;
2. b) The severe impact on the strategic road network would remain unchanged, since the housing numbers, (and by implication the numbers of car journeys), are the same;
3. c) Harm to heritage assets is increased. Bridge End House is a 16th Century Grade II listed building whose setting will certainly be affected by development very close by. Upton Farmhouse, a 15th Century Grade II listed building facing the extended settlement across Ockham Lane, may be similarly affected;
4. d) Harm to character, appearance and landscape are all worsened with the additional loss of 19 hectares of fields around Bridge End Farm, to be replaced by new housing development. Any minor reduction in overall site
housing density is unlikely to produce the qualitative change needed to yield a perceptible lessening in harm to the character and appearance of this rural area. Since the new settlement will extend alongside Ockham Lane for an additional 0.5 km, it will also become much more visible from outside the site – whereas the WPIL masterplan had stressed its separation and screening from the existing Ockham community.

As such, sir, East Horsley Parish Council believes you should conclude that Exceptional Circumstances are not demonstrated and therefore that Site Policy A35 is unsound.

Attached documents:

Comment: MM40 - LPMM18/4344  Respondent: Malcolm Scott 8930625  Agent:

I object to the continued inclusion in the Guildford Local Plan of the proposals for development of land on the former Wisley Airfield on the grounds that they would:

damage irrevocably the character and appearance of the local area;

be completely inappropriate in the Green Belt;

cause enormous and unacceptable harm to the local road network;

create damaging impacts on the already inadequate local infrastructure;

and have harmful impact on the A3,

all of which were cited by yourselves, the Planning Inspector and the Secretary of State in relation to the planning application previously submitted.

I support the views on this matter of Ockham Parish Council, East and West Horsley Parish Councils and Wisley Action Group.

Attached documents:

Comment: MM40 - LPMM18/4063  Respondent: Elizabeth Murphy 8931105  Agent:

I object to the inclusion in the Local Plan of proposals relating to the development of the former Wisley Airfield, particularly and inter alia because:

i. they would be in breach of Green Belt policy, very special circumstances not having been demonstrated;

ii. they would urbanise a rural area;

iii. existing infrastructure is vastly inadequate and the proposal does not address this;

iv. proposed road closures are unsuitable and would impact unacceptably on the immediate and further communities.

The proposals constitute completely inappropriate development in a wholly unsuitable site. I support the views on this matter of West Horsley Parish Council, East Horsley Parish Council, Wisley Action Group and the CPRE.
Again I do not see the logic of persevering with the plane for the major development at Wisley Airfield when in June 2018 the Secretary of State upheld GBC’s decision to refuse planning permission for the site. All the objections that were considered by The Secretary of State at that time still apply today.

* I object to the proposals for the inclusion of Wisley Airfield in the Local Plan in the light of The Secretart of State's decision and in the light of the ONS figures.

I also point out that the GBC have NOT kept Guildford residents well informed of developments regarding the Local Plans. I have responded each time a plan has been forward and I have requested notifications as appropriate. These have been VERY spasmodic.

Attached documents:

---

53 MM40 Quality requirements for FWA

Apart from the wastewater requirements, the changes lack any rationale or benefit. The condition of the SNCI will be inevitably compromised by the development itself. Moving references to unique places and unique context from opportunities to requirements is no doubt intended to strength the expectations, but involves turning a very vague expectation into a similarly vague requirement.

Attached documents:

---

I object strongly to the Wisley Airfield ‘newtown’ development scheme on the same grounds, and on environmental and traffic grounds: also on views ‘to and from the Area of Outstanding Natural Beauty’ affected by 5 storey buildings. It is disengenuous of Councillors to claim that the A3/M25 so-called ‘improvements’ will mitigate the congestion, when they have no control over the traffic scheme. Also it is now proven that more road-space ‘induces’ more and heavier traffic.

Comment: MM40 - LPMM18/4502  Respondent: Wisley Property Investments Ltd. (Wisley Property Investments Ltd.) 9079393  Agent: Savills (Ruth Bryan)
Policy A35

2.2 As previously stated WPIL are supportive of the eGBLP and Allocation WPIL do however have a number of minor comments on the main modifications relevant to Allocation A35 (ref: MM40). These are set out below, and are all considered to be minor modifications:

- In respect to the SNCI at Wisley Airfield and as outlined above, WPIL have agreed a Statement of Common Ground on this matter with It is important to note that the SNCI at Wisley Airfield is important in respect of species - particularly reptiles. It is therefore wholly possible for development proposals on the site to mitigate the impact on species for example through retention of habitats or translocation of species. This was also demonstrated through the appeal proposals;
- The numbering sequence in the policy has not been updated following modifications being made to the This is particularly evident in the sections labelled ‘Transport Strategy’ and ‘Other Infrastructure’. This should be updated by GBC prior to adoption of the eGBLP;
- An addition has been made in respect of Ripley Wastewater Treatment Works, through the appeal process, WPIL agreed with Thames Water a number of conditions which secure appropriate capacity;

2.3 The only objection which WPIL maintain in respect of Allocation A35 is to the proposals map which includes a notation on Wisley Airfield as a “safeguarded waste plan”. As outline previously, this reflects the out of date Surrey Waste Plan (2008) which is currently being updated by Surrey County Council (SCC). WPIL have confirmed to SCC that the Site is not available for a waste development and Officers have confirmed that they will not be allocating the Site in the emerging Waste GBC should therefore remove this notation from the Proposals Map. This is considered to be a minor alteration to the proposals map which does not relate to any specific policy in the eGBLP and can therefore be altered via a minor modification prior to adoption of the Plan.

3. Conclusions

3.1 WPIL are supportive of the eGBLP and support the adoption of the Plan as soon as The majority of the principles of the eGBLP and its spatial strategy has been found sound by the Inspector, including Allocation A35.

3.2 The main modifications proposed by GBC are generally supported by WPIL object to only two small elements of the eGBLP and main modifications which can be altered via minor modification:

- MM12 Supporting Text to Policy P5 – this should be reworded to reference the relevant legislation and guidance in respect of Habitats Regulation Assessments and the Special Protection Area;
- Proposals Map Wisley Airfield – the reference to “Safeguarded Waste Site” should be removed from the proposals map;
- Various drafting and numbering updates to A35;

3.3 On the basis of these minor alterations being taken forward by GBC prior to adoption of the eGBLP, WPIL consider the Plan to be sound and support the adoption of the

Comment: MM40 - LPMM18/3209  Respondent: Peter Cordrey 9244641  Agent:

I am a resident of Ockham after 36 years and I wish to register my objections to the local plan for THREE FARM MEADOWS:-

1. Current and new evidence demands that the examination of this site/development is re-opened.

2. With the current expansion of RHS WISLEY there will be a huge increase in vehicles around Ockham, A3 and M25.

3. Delays to improvements of the M25 / J10 will worsen all traffic problems already evaluated.

4. You must consider the EU Advocate General's view on mitigation.

5. New ONS statistics indicate REDUCED HOUSING will be required in the area.

6. Additional land has been attached to the south of the site but without the full, usual public consultation.

7. Removing the site from the larger GREEN BELT the SOS GB objection is overcome but ALL the other issues/problems remain.

8. A public examination needs to be instigated to take account of new information from the Office of National Statistics.

9. Please note my profound support for the objections made on my behalf by WAG, all of which were written with advice from Richard Harwood QC.

Comment: MM40 - LPMM18/5197  Respondent: David Reeve 9335041  Agent:

Policy A35: Former Wisley Airfield, Ockham

MM40 – OBJECTION A35-1

Given the excess number dwellings proposed in the Local Plan (see Objection S2-1 to modification MM2), the equivalent of at least two strategic sites should be removed from the Plan in accordance with Objection S2-3 above. This review should include Site A35 (former Wisley airfield).

MM40 – OBJECTION A35-2

On 13th June 2018 the Secretary of State published his decision to uphold the Councils’ decision to refuse permission for the Wisley Airfield planning application (15/P/00012), and the applicant’s planning appeal was dismissed. Notwithstanding some amendments to the submissions of some of the statutory consultees, it is nevertheless extraordinary that as little as three months later the Local Plan – including Policy A35 for a development of essentially the same scale as that rejected by the Secretary of State – should be submitted for a public consultation, and when the
official household projections on which the Local Plan was based had been reduced by 40% (see Objection S2-1 to MM2 above). The public perception of this situation can only be that it is bizarre and perverse.

**MM40 – OBJECTION A35-3**

In all previous versions of the Local Plan the area designated as a Site of Nature Conservation Importance (SNCI) covered the entire proposed development site, whereas the current Plan shows the area of the SNCI as being only about 15 – 20% of its earlier size (according to my visual estimation from the map). Moreover about a third of that remaining area of the SNCI includes a zone that is “safeguarded land for waste” (which I believe is covered in the Surrey Waste Plan), so in the long term the area of SNCI is likely to be further reduced.

According to GBC’s Sites of Nature Conservation Importance Surveys (2004 –2007), the SNCI boundary was last amended at meeting of the Surrey Nature Conservation Liaison Group (SNCLG) in March 2007. At that time the “boundary was extended following advice and survey information from Surrey Amphibian & Reptile Group. The document states that “This site is selected for its importance for reptiles, plants and birds. 9 notable Surrey plant species have been recorded on the site. In addition 3 RSPB red list bird species and 7 RSPB amber list bird species have been recorded on the site. The site has an exceptional or good population of a number of reptiles and amphibians.”

In the light of the currently-proposed reduction in the size of the SNCI, the obvious question is “What has changed in the last eleven years to justify a reduction in the area which more than reverses the extension that was considered appropriate in 2007?” It is difficult to believe that this reduction is unconnected with a desire on the part of the Council to allocate the site for development, however the Requirements section of Policy A35, paragraph 10(a) states that “Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures.” In my opinion this sort of Orwellian doublespeak is little short of disgraceful when it is apparently intended to emasculate the SNCI, and it deserves no place in document produced by a public authority

**Comment: MM40 - LPMM18/3710  Respondent: Ian Wilkinson 10326081  Agent:**

SITE SPECIFIC – A35 – Three Farms Meadows

The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR

Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB

 Attached documents:

---

**Comment: MM40 - LPMM18/3712  Respondent: Ian Wilkinson 10326081  Agent:**

[This comment is assumed to relate to policy A35 - Former Wisley Airfield]

The biodiversity of the SNCI will be destroyed by the proposed development.

An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law

 Attached documents:
SITE SPECIFIC – A35 – Three Farms Meadows

- The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR (the air traffic control beacon which prevents construction within a certain radius)
- Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB
- MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.
- The biodiversity of the SNCI will be destroyed by the proposed development.
- An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law

Attached documents:

1. c) Modification MM40 – Site Policy A35, the former Wisley airfield:

The Secretary of State has refused the appeal of the site owner to develop this site. His reasons for refusing were clear and strong. But GBC have still retained this site within the Local Plan. Why? This site should be removed from the Local Plan at once because:

   1. a) It is unsustainable;
   2. b) It is wholly dependent upon major infrastructure projects which are very uncertain;
   3. c) It fails the Exceptional Circumstances test for Green Belt release;
   4. d) The site will have a ‘catastrophic’ impact on the character of Ockham;
   5. e) The site is not needed to meet housing needs within the Local Plan.

GBC should immediately remove this site from the Local Plan.

I OBJECT to having Site Policy A35 in the Local Plan.

Attached documents:

4. POLICY A35: FORMER WISLEY AIRFIELD (MM40)

The inclusion of Wisley airfield as a development site in the Local Plan ignores the recent dismissal of planning appeal on that site by Secretary of State. The traffic impacts of the proposed development would be the same as those just rejected by the Secretary of State, and are therefore unacceptable, as are the impacts on the local infrastructure (parking, medical provision, schooling etc), particularly when ONS household projections, on which the Local Plan should be based, have been reduced by 40%.
The Site of Nature Conservation Importance (SNCI) which used to cover the entire airfield site has been reduced to about 15-20% of its former size, and about one third of that residual area is land that is “safeguarded” for waste operations. This is inconsistent with paragraph 10(a) of the Policy A35 which states that “Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures.”

Attached documents:

Comment: MM40 - LPMM18/5267  Respondent: Keith Jones 10775041  Agent:

I find it extremely disappointing and indeed very angry that I have to once again have to write to GBC to OBJECT to your continued plans to build houses on Three Farm Meadows (Wisley Airfield). How many times does there have to be declinatures on your Plan with the most recent one from the Secretary of State. Do you not respect both local and national democracy? You know there is massive resentment in Guildford to what you are doing and yet you continue?

I fully support the fantastic work being done by Wisley Action Group and their recent representation made by WAG with advice from Richard Harwood QC. As part of these efforts I would call for the examination in public to be reopened so that the latest Office of National Statistics be used

Attached documents:

Comment: MM40 - LPMM18/5514  Respondent: Guildford Greenbelt Group (Susan Parker) 10799425  Agent:

MM47 Map Amending SNCI Former Wisley Airfield

The amendment drastically reduces the size of the site of nature conservation importance at the Former Wisley Airfield. However the ecological interest of the land still merits SNCI designation. The published SNCI designation is sound and there is no justification for changing it.

The change appears to be to facilitate the new settlement. However SNCI designation depends upon the merits of the land rather than desires to develop it. Policy ID4(6) sets out the test to be applied to weigh any benefits of a scheme against the harm to a SNCI. It is not there to be bypassed by the removal of SNCI designations because land is allocated for development or SANG.

MM40 Quality requirements for FWA

Apart from the wastewater requirements, the changes lack any rationale or benefit. The condition of the SNCI will be inevitably compromised by the development itself. Moving references to unique places and unique context from opportunities to requirements is no doubt intended to strength the expectations, but involves turning a very vague expectation into a similarly vague requirement.

**Comment:** MM40 - LPMM18/4371  **Respondent:** Gillian Lachelin 10918977  **Agent:**

I am writing to very strongly object to the inclusion of the Three Farms Meadows/Former Wisley Airfield site in the GBC Local Plan on several grounds.

The planning application was rejected by GBC. I attended the public enquiry last autumn and the appeal was rejected. The plan was, as I recall, described as catastrophic by the inspector. The modified submission is similarly catastrophic. The impact on the area and particularly on the local traffic would be absolutely horrific.

There are no exceptional circumstances which would allow building on the green belt. Development should take place on brownfield sites and not on the green belt. The housing target numbers are wrong and should be reexamined using the latest ONS statistics.

Comment: MM40 - LPMM18/3197  Respondent: Trevor W. Orpwood 10991873  Agent:
Proposed Amendments to Guildford Borough Local Plan

General Objections

I object to the Council unilaterally removing the Wisley Airfield Site from the Green Belt they have no mandate from the people of Guildford and Surrey to do this.

The only reason for this this dubious manoeuvre is to undermine the Secretary of State for the Environment’s decision that the Wisley Airfield development “would represent inappropriate development in the Green Belt, and should not be approved except in very special circumstances” and to try to get around the fact that the provision of housing is not an “exceptional circumstance.”

It is also illogical that GBC should take this action given that they unanimously supported the refusal of the original application, and because the conservative members stated in their election manifesto that they would not build on green belt land.

I also object to the Council’s failure to communicate adequately with residents about the current amendments to the Local Plan under the guise of compliance with GDPR. All the 32,000 or so persons who responded to the plan in 2016 should have been given the opportunity respond this time and not to have done so is a clear and unilateral disenfranchisement.

Attached documents:

SITE SPECIFIC – A35 – Three Farms Meadows

I object to the amendments relating to this site as follows:

1. The addition of land to the south of the appeal site does not mitigate the density issue as much as it appears to on the plan as building is not permitted within a certain radius the Ockham VOR (vhf omni-directional range) air traffic control beacon).

2. The land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.

3. In breach of case law an Appropriate Assessment and a Habitats Regulation Assessment have not been completed.

Conclusion

Due to the inadequacies and shortcomings listed above and the fact that so many people have been excluded from this consultation I hereby call for the examination in public be re-opened.

Attached documents:

Local Problems:
1. MM40 Wisley should be retained as Green Belt and removed from the plan especially after the Inspectors report.

Attached documents:

Comment: MM40 - LPMM18/3588  Respondent: Greta Edwards 11001505  Agent:

With specific regard to THREE FARMS MEADOWS - for former Wisley airfield - may I point out that the addition of land to the south of the appeal site does NOT mitigate the density issue as much of the said land is constrained by the VOR air traffic control beacon.

Attached documents:

Comment: MM40 - LPMM18/5963  Respondent: Joanne Graham 11005505  Agent:

MM40 Policy A35: Former Wisley Airfield

Whilst this Policy sets out a number of minor changes to Site Policy A35, it seems to completely miss the fact that the Secretary of State gave a robust refusal to planning permission for a similar development earlier this year (June 18). Please could you explain why the GBC have thus chosen to keep this site development within the local plan?

In providing his verdict the Secretary of State gave substantial weight to the harm which would be caused to the Green belt by this development. Further he stated that there would be massive impact to the road infrastructure, to the heritage assets, the character and appearance and the landscape including view from the Surrey Hills. Personally, I cannot see the difference in the development proposed by the “Wisley Property Investments Ltd.” and the proposal put forward by the GBC I thus do not see how you can keep Site A35 in your proposal. Please remove it immediately from the local plan and allow the Secretary of State’s decision to stand.

I would ask you to please consider and act appropriately to this feedback

Attached documents:

Comment: MM40 - LPMM18/5683  Respondent: Stephen Gill 11010945  Agent:

Site A35, the Former Wisley Airfield/Three Farms Meadows

In addition to the above, I object to the following:

12  **Failure to conduct an Appropriate Assessment or a Habitat’s Regulation Assessment:** Guildford Borough Council has failed to conduct/ensure that such assessments have been conducted in respect of the Former Wisley Airfield/Three Farms Meadows. This is a breach of applicable case-law. The continued inclusion of Site A35 in the Draft Plan is therefore. The Draft Plan is therefore unsound and the Examination should be reopened.

13  **Failure to take into account the fact that the whole of the Former Wisley Airfield/Three Farms Meadows is a Site of Nature Conservation Interest:** The proposed development will destroy the bio-diversity of the SNCl. The
continued inclusion of Site A35 in the Draft Plan is therefore unsound. The Draft Plan is therefore unsound and the Examination should be reopened.

14 MM47 Proposal to reduce the size of the SNCI: The whole of the Former Wisley Airfield/Three Farms Meadows is a Site of Nature Conservation Interest. There is no justification for the proposal to significantly reduce the size of the SNCI. The continued inclusion of Site A35 in the Draft Plan is therefore unsound. The Draft Plan is therefore unsound and the Examination should be reopened.

15 Addition of new land to the south of the appeal site: This land abuts the Ockham Conservation Area, and increases the visibility of any development on the Former Wisley Airfield/Three Farms Meadows to/from the Surrey Hills AONB. The continued inclusion of Site A35 in the Draft Plan is therefore unsound. The Draft Plan is therefore unsound and the Examination should be reopened.

16 Addition of new land to the south of the appeal site: Development on much of this “new” land is constrained by the VOR. The inclusion of this new land therefore fails to mitigate the density of the proposed development, which remains objectionable and unacceptable and totally inappropriate for the location. The continued inclusion of Site A35 in the Draft Plan is therefore unsound. The Draft Plan is therefore unsound and the Examination should be reopened.

Attached documents:

SPECIFIC SITES

MM40 (A35) Three Farms Meadows aka Wisley Airfield

I object to this Strategic site. The Plan includes here Policy A35 for a development on essentially the same scale on Wisley Airfield as that rejected by the Secretary of State on 13th June 2018. The Councils decision to refuse permission for the planning application 15/P/00012 was upheld by the Secretary of State and the planning appeal was dismissed.
This Site with proposed development of 2000 houses, and similar in scale to that of the above planning appeal, has been inserted again in the proposed Local Plan. It is based on the above planning application which was proposed by developers, rejected by GBC and refused by the government only 3 months ago.

The proposed number of houses and scale of development as suggested on this site would still be wholly inappropriate for the area, the site being in Green Belt. Many issues and objections have been raised by residents and the Council in response to the appeal dismissed in June 2018. These remain the same or are not sufficiently mitigated.

It does not make sense to base the development of this site on household projections that have been reduced by 40.5%.

The addition of other new land to the south of the appeal site does not mitigate the density problems as much of that land is constrained by the VOR.

The land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.

Attached documents:

Comment: MM40 - LPMM18/6234  
Respondent: Andrea Moran 11043809  
Agent:  

The NPPF has 3 strands: Economy, Infrastructure and Environment. Guildford Borough Councils Local Plan is still not fit for purpose legally on the environmental pillar of the NPPF.

I OBJECT to GBCs recommendation to dismember Biodiversity Opportunity Area (BOA) TBH06 by diminishing the SNCI at the heart of this BOA to a very small percentage of its recognised size since 2007. There is no ecological grounds for this ‘redrawing of the map’ as this site was reenforced as recently as 2016 by SyNP and the landowner. This move can only be an effort to overcome environmental law which might highlight the inappropriateness of a new town on this SNCI, in this BOA.

The current owners, WPIL bought the site as an SNCI, they have no grounds to reject its validity.

The picture below is Biodiversity Opportunity Area TBH06 as recognised by SyNP in 2015.
[see attachment for image]

BOA TBH06 includes an extensive 100+ hectare SNCI, as well as over 3,000 hectares of SSSI and SPA which include Ockham and Wisley Commons. The SNCI forms a critical buffer for the SSSI and increases the biodiversity and habitat diversity in the BOA. The SNCI which was enlarged to its approximate current size by GBC in 2007.

All versions of the local plan to date have recognised this SNCI in its entirety, with minor extensions recommended by SyNP in 2016 to the size of the SNCI.

The BOA and SNCI are endorsed by Surrey Nature Partnership SyNP since 2015, as part of the scoping of BOA TBH06 and reviewed and reinforced by SyNP in 2016 in a formal SNCI review carried out in conjunction with the land owners environmental researchers.

SyNP has assent from DEFRA since 2012 to create a positive plan for the environment as part of the NPPF, for Surrey County as part global climate change commitments and environmental protections such as Aichi 2020, the Paris Accord commitments and any new commitments needed for IPCC 2018 implementation.

The 25 Year environmental plan recently created and endorsed by Michael Gove and Theresa May, as part of Brexit exit strategies highlight the importance of the UK’s environment and its singular importance above and beyond the needs of housing and local politics.
GBC needs to adopt the BOA TBH06 and safeguard its biodiversity intactness as part of the GBC local plan. Only in adopting the SyNP BOA TBH06 in the Local Plan, can GBC implement the required national and international environmental and climate change protection measures in the borough. GBC can not be permitted to undermine the recognised SNCI and attempt to build a new town on top of an SNCI in already protected by both greenbelt and being part of a defined Biodiversity Opportunity Area. Such action would be in contravention of the NPPF, Aichii 2020, The Paris Accord and the UKs newest 25 year Environmental Plan.

There are other strong grounds for protecting this SNCI:

1 The SNCI in BOA TBH06 includes at least 45.6 hectares of the Best and Most Versatile Agricultural Land in the country, -graded 2 and 3A . The farming of this land commercially for hundreds of years, possibly thousands of years, has not diminished its biodiversity intactness and it still qualifies as an SNCI in its entirety as assessed in 2016.

The farming of the land is contributing in a meaningful way to the food security of the the UK. Being in such close proximity to London and the South of England, this land contributes fully to BMV values of sustainable agriculture, close to its market and still contributing to biodiversity intactness.

The SNCI review in 2016 recognised the arable land contributions to this SNCI in plants found on site, in the birds found on the site. It required further specialist bird investigations to confirm that the SNCI included nationally significant BAP Biodiversity Action Plan level habitats for Arable land. The arable land is not restricted to the small corner of the SNCI that GBC proposes to ‘save’

The SNCI review in 2016 recognised the former tarred surfaces of an old airfield included in the SNCI formed valuable open mosaic habitat of national significance - also BAP Biodiversity Action Plan level habitats for open mosaic habitats. The open mosaic habitat is not restricted to the small corner of the SNCI that GBC proposes to ‘save’

2 The SNCI provides a catalogue of protected species, plants, and habitats it protects by its presence. Government is required to recognise its contribution to UK biodiversity intactness and its contribution to the global recovery of biodiversity and to counter the worst ravages predicted by climate change escalating past 1.5% global warming.

The SNCI creation and revalidation process creates and records a catalogue of biodiversity intactness on private land that may be inconvenient for landowners who wish to overturn its greenbelt protections, its SNCI status, undermine its BOA integrity. Because of the SNCI there is already a record of priority habitats, species, fungi, herbtotfauna and plants that ensured that this area has been continuously monitored and protected by government agencies since it has fallen out of the direct control of the local farmers who safeguarded its biodiversity until 2015, when the desire to build a new town on the site escalated. Through this catalogue it is possible for environmentalists to ensure that ‘No Harm’ is done to the biodiversity on this site, and any such harm can be pursued through environmental law.

The BOA has clear targets for the SNCI upto 2020 to ensure that it is protected by planning policy and in positive management. as seen below:

It would be travesty of the NPPF and SyNP if GBC and WPIL, owner of the SNCI can be permitted to reduce the SNCI to a mere fraction of its currently endorsed size which was reconfirmed with the

3 The SNCI provides a buffer for the umbrella of protected land, water ways and ponds, species, plants, and habitat types it protects by its presence.

A: The body charged with the international protections of the SPA in the UK and in Surrey’s Thames Heath Basin, the JNCC and JSPB have over time undermined the planning protections at the critical barrier of 400m-2kms and between
2km and 5kms as highlighted in the concentric purple lines in the illustration below. Owners co-operation as recently as 2016.

[see attachment for image]

Consequently there are very stringent protections of a 400 NO new buildings or threat from predatory domestic animals within 400m of an SPA protected for its birdlife.

There continues to be protections in place for a general buffer of 400m-5KM limiting housing developments and a requirement for developers granted permission to build incompatible developments inside this buffer to pay a contribution to the maintenance of the SPA.

The recognition of the 400m-2km buffer however is the critical loss, it would have prevented the plans for a new town on this SNCI, and instead focused attention on promoting its biodiversity intactness.

The planned development on this SNCI includes 2000 houses, a primary school, a secondary school, 2 nursery schools, car parking for 4000 resident cars, a visitor centre, a care home for 100 people, shops, an eatery. It is estimated this new population will bring 800+ cats and 950+ dogs to area between 400meters and 800meters from the boundary of the SPA. Local birdwatchers have catalogued on recognised bird watching sites in the UK, over 116 different bird species in the vicinity of the SNCI. If 800 cats without adequate garden space are located on the same site as 116 different bird species, the impact on the bird population and nesting patterns of these ground nesting birds in SNCI and in the SPA will be fundamentally damaged. It prevented big housing developments inside the cat predation zone of the SPA. The greenbelt should be doing this job in the location of the BOA TBH06, however GBC wish to undermine this protection.

B: The protection of habitats from Climate change impacts should be prioritised over houses which can better compensate for flooding.

The red zone is safe for habitats even through climate change, it should not be prioritised for housing.

[see attachment for image]

C: To protect the local aquifer and drinking water which could be adversely impacted by development and should be safeguarded to help minimise the impacts of climate change.

[see attachment for image]

D: to Protect adjacent habitats and locally protected species and plants:

[see attachment for image]

Destroying the existing SNCI is against all environmental protections.

It fails to recognise the legal weight of environmental law such as ‘People Over Wind’ or the 2016 ‘Briel’ judgement in recognising the legal protections in place to safeguard environmentally protected land, habitats and species. There is still no positive plan for safeguarding and enhancing the biodiversity intactness of sites of strategic importance nationally and internationally within the borough.

There is still no positive plan for safeguarding and enhancing Best and Most Versatile Land in the Borough for the food security of Guildford Borough for current and future generations.

The sites with the greatest biodiversity intactness scores in the borough, such as Biodiversity Opportunity Area TBH06 Ockham in the current Local Plan are with the greatest burdens for high density Housing, schooling, Strategic road Infrastructure expansion in the Borough.

TBH06 being is one of the most inaccessible places in County of Surrey and has extremely low sustainability scores for meeting the commuter, urban amenities and urban infrastructure connectivity needs of a resident population in a cost effective way. The local plan has still not recognised this major problem.
The close proximity of Junction 10, without an effective commuter connectivity solution reduces THB06 to an isolated car dependent commuter town with a traffic spur from the A3 providing a skeletal traffic infrastructure for 4000+ new cars along a single carriage way through the new town. Not only will this be detrimental to the health and viability of THB06, this vanity project has still not raised planning concerns about NOx for children living, walking, going to school and doing all their sport and leisure activities in this heavily polluted microcosm, despite By contrast, THB06 is ideally set up as a London Metropolitan greenbelt destination for ecotourism, climate change research, educational enrichment programs for students at all levels. It is in close proximity to Junction 10 of the A3/M25, allowing access from London, Guildford and Surrey as well as easy access to Heathrow and Gatwick. It includes RHS Wisley.

Even the latest version of the GBC Local plan only focuses on Economic growth and housing to the detriment of the environment, and infrastructure.
1 The housing target has not dropped in proportion to the fall in the ONS housing projections.
2 The SNCI at Former Wisley Airfield being downsized to make way for a housing estate.
3 Despite the falling ONS housing numbers and the increase in sites in the centre of Guildford, The Former Wisley Airfield, a remote unsustainable site greenbelt SNCI site, adjacent to an SPA has not been dropped from the plan, despite being rejected in 2018 by the Secretary of State.

4 People Over Wind, Article 6(3), 6(4) Precautionary principle: No net harm can be compensated or core component mitigated in case of Natura2000 site Briel 2016 highlight the courts increasing power to legislate in favour of environmental protection. Research backs this up highlighting that old biodiversity takes 100-1000 years to be replaced and can only be successful on very large ratios of swap land (1:20+) and even then is only up to 40% successful. Research has proven that old declining and vulnerable biodiversity is a better option than attempts to transpose/recreate habitats even without being planted into a hostile environment. There has been no proof a housing estate in close proximity to the SPA will be successfully mitigated. There is no proof that Environmental Impact Assessments and Statements effectively mitigate against damage. There is no proof that land swaps work, there is no proof that there ratios for offset land works, there is no proof that a SANG can be co-located with an SNCI, and a resident leisure population of 5000 humans and a resident population of approx 900 cats and approx 800 dogs and an office block and a primary school and a secondary school and 2 nursery schools, and a visitor centre and 4000+ cars and through traffic and its associated pollution. Pressure for action on Climate Change, Housing Demand:- ONS ONS figures for needed new homes have dropped by 40% in Guildford in 2018, while pressure for rapid and drastic action on climate change and environmental safeguarding have been escalated by the IPCC paper in October 2018, pressure is on M Gove to provide solutions. This drop in housing need is good for the planet and the UK economy. Climate change needs to be turned around globally within the life of this GBC Local Plan. There is no positive plan for climate change in this GBC local plan. The current GBC local plan includes dramatic negative environmental plans for GBC during this Local plan which includes building new car dependent towns in rural countryside, on top of existing areas of nationally and internationally significant biodiversity intactness. Houses can be build on boats and on stilts, nature can’t. The local plan needs to leave the nature where it is, on land un threatened by climate change.

in the next 12 years. Globally the ‘Impacts on people’s health, livelihoods, food security, water supply, human security, and economic growth are projected to increase with global warming of 1.5°C and increase further with 2°C. Limiting global warming to 1.5°C is expected to reduce the number of people in poverty by up to several hundred million by 2050, and to reduce the number of people globally exposed to water stress by 50%’ Stockholm Resilience Centre.

The NPPF pillar to support environment is badly needed in the UK. It is Surrey Nature Partnership role, as given assent by DEFRA in 2012 to fulfil this obligation. Building sustainable food sources close to London and safeguarding pollinators, wildlife and climate stability can be now prioritised in the GBC local plan as IPCC directives give us just 12 years - the local planning period to effect change. The ONS drop in housing need can be directly diverted from housebuilding towards government should use these latest ONS figures to divert resources from housing towards climate change targets in reducing c02,

22/10/2018 - The world’s consumption of raw materials is set to nearly double by 2060 as the global economy expands and living standards rise, placing twice the pressure on the environment that we are seeing today, according to a new OECD report… the projected increase in the extraction and processing of raw materials likely to worsen pollution of air, water and soils, and contribute significantly to climate change.

The nationally and internationally significant biodiversity intactness of the Former Wisley Airfield, which is entirely an SNCI, and its immediately rich hinterland which is a Biodiversity Opportunity Area, an SSSI, an SPA, an LNR, and has pockets of Ancient Woodland, is wasted on housing. There is no local need for 2000 houses. The Former Wisley Airfield
is at the heart of the very rural historic Ockham village. Ockham is not on the outskirts of an urban centre, it is remote and rural, without footpaths, streetlights, without a single shop. Exceptional circumstances do not exist in this remote location for car dependent homes in this greenbelt location where no efficient public transportation solution can solve the very significant hidden costs for householders to this location: multiple transportation links, time wasted on commuting, unreliable connections, no local mass employer, no urban infrastructure, no urban amenities, no significant retail options.

The NPPF is about the harmony between Infrastructure, Economy and Environment. IPCC and Paris Accord remind us of the dire state of the planet and the rapid need - in the next 12 years - to start living within the limits of the planet's resources. Building 40% more houses than the ONS projects as needed is in direct contravention of the NPPF, the 25 year plan for nature in the UK, Aichii 2020, the Paris Accord. On the 6pm News on radio 4, 22nd October 2018

Chronic housing shortages have been talked up in Guildford for nearly 10 years. The facts don't back up the talk but back up the ONS figures and the NHS figures.

Are population projections real:
NHS Data records 200,000 patient records across Guildford and Waverley together. Guildford claims a population of 150,000 and Waverley claim a population of 120,000. How many of these 70,000 unaccounted for people are actually not registered with a GP in Waverley Guildford because their permanent home is elsewhere: those in prisons, old people homes, universities, Further Education Colleges, seasonal visitors?

[see attachment for images]

Pegasus wrote the Sites allocations document for GBC.
This is how Pegasus sees the impact of their work in Guildford:

‘Andy Meader, director of consultancy Pegasus Group, said that recent case law had established that the intensity of housing need was a key factor in demonstrating the exceptional circumstances required to justify green belt release in local plans.

"In other words, the greater the shortage of housing, the more exceptional the circumstances are likely to be," Meader said.

"If the objectively-assessed need is suddenly to reduce for any reason, then that can have implications."

"It is a very significant consideration," Meader said, which could have "a fundamental impact" on councils' ability to demonstrate exceptional circumstances."

Other key factors needed to demonstrate exceptional circumstances, he said, included fully investigating alternative sources of development in the area.

"It’s going to be very important to have undertaken those exercises," he said. "Otherwise, there is the potential criticism that you just don’t really know what potential there is."

Meader, whose firm has recently carried out a green belt review for Guildford Borough Council, added that authorities wanting to make green belt releases should justify such changes both in principle and on an individual site basis in order to demonstrate exceptional circumstances.

[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

Yes Mr Kit will seek to change the goalposts again to support the UK building trade but these houses will not be for locals but permitting the enlargement of the stock of dormant UK houses and homes held by international buyers and investors, as financial assets around the world, not to enable those living in the UK to live here in their own home. To change numbers of UK people owning their own homes Mr Kit needs to change what houses are build and where they are built.
Criteria for assessing new site validity is different to old criteria. All sites new and old need to be measured against same criteria to ensure that the threshold for reaching exceptional circumstances on greenbelt land has indeed been met.

SNCI: map says marking out spa buffer zone, but actually obscures SNCI detail on site A35, it also ignores need to outline ancient woodland and LNR and SSSI, it doesn’t indicate BAP priority habitats for which the SNCI is recognised, it doesn’t show that this is a medium aquifer and protected water zone and it doesn’t show that this is also a Biodiversity Opportunity area.

SNCI has been renegotiated by Surrey Wildlife Trust, however it is the Surrey Nature Partnership who has the Assent from DEFRA to implement the Biodiversity 2020 programme and consequently the environmental pillar of the NPPF in Surrey and the national 25 year Plan for biodiversity and the Environment:

About Surrey Nature Partnership
SyNP is one of England’s 48 Local Nature Partnerships, recognised by Defra in 2012. Our Vision is to see a healthy natural environment throughout Surrey supporting economic and social benefits.

Our Mission is to hard wire recognition of the value of the natural environment into all decision making resulting in more informed decisions for Surrey. It will increase recognition of the value of our natural capital and ecosystems as critical assets for Surrey, as important as its financial, social and other capitals, and promote the need for thoughtful, sustainable management of these assets.

The Investment Plan
In November 2015 SyNP published Naturally Richer: A Natural Capital Investment Strategy for Surrey, which set the direction for managing Surrey’s natural assets. The Natural Capital Investment Plan (NCIP) sets out how SyNP will achieve healthy natural capital in Surrey over the next 25 years.

The size of the conservation impact investment market within which the NCIP will operate has been growing exponentially for a number of years, particularly in the USA where the Nature Conservancy has developed a systematic approach to nature conservation investing through NatureVest. Most recently a report on the scale of private investment into conservation showed that the total size of private capital now committed is $8.2 billion and this has increased by 62% over the period 2014/15 (State of Private Investment in Conservation 2016). This in itself shows the scale of the investment opportunity and when coupled with the social and environmental benefits is an important element in achieving the objectives of the NCIP.

Further work to understand the size of this opportunity in Surrey and SE England is required as part of preparing the full NCIP.

Objectives of the Investment Plan
The NCIP will:

- Identify the existing natural capital assets in Surrey as well as giving an assessment of their condition.
- Provide an understanding of the level of functionality of these assets and how far below critical functioning threshold they are.
- Outline the mechanisms to achieve capital investment for uplift of the assets to a viable, functioning threshold (assuming most assets are currently below viable)
- Proactively link the demand side (need for funding of natural capital assets through conservation projects) with the supply side (investors seeking investments with conservation impact) by promoting a deeper mutual understanding between investors and providers of conservation projects to deliver scalability as well as developing mechanisms for capital investment
- Develop the potential mechanisms to provide a revenue flow to maintain the assets in the long term (through e.g. NaturEtrade).
- Provide a clear set of actions for the period 2017 to 2022. The plan will operate within the context of the 25 year Environment Plan, Housing White Paper and Industrial Strategy.
Throughout this latest round of consultation and each previous consultation, including the inspectors hearing on the GBC Local Plan, the people of Guildford
Guildford Vision Group, Guildford Residents Association, Guildford Society, parish councils, resident associations, ramblers groups, CPRE, etc are united in condemning this housing for housing sake plan.

No-one is objecting to realistic housing targets, the people of Guildford are united in objecting to mass off-grid housing estates that serve no economic area and are served by no retail areas and have no urban infrastructure.

[see attachment for image]

There is no sustainable transport corridor for this site at Three farms meadows. the people of Guildford want the latest NPPF to be respected and the third pillar of the NPPF, the environmental sustainability to be recognised as having equal weight economy and infrastructure.

There is no basis to shrink the SNCI on Three Farms Meadows to facilitate a housing estate for 2000 homes. This site is
in a Biodiversity opportunity Area for the following reasons:

[see attachment for image]

where the household running costs are exponentially higher because the planned homes are too far removed from sustainable and effective transportation

There should be no possibility to build a town next on Three Farms Meadows, the former Wisley Airfield according to the revised NPPF:

It is in the London Metropolitan Greenbelt
It has no SNCI with 9 UK Biodiversity Action Plan (UK BAP) Priority Habitats on the site
Ancient Woodland
The site is only xx hectares of which 45.6 are UK Best and Most Versatile Agricultural land
The entire site is within 800 meters of an SPA and SSSI
The site abuts one of the largest and most important junctions in the UK: Junction 10 of the A3/ M25, transit point between London, Heathrow, Gatwick and the South
The site is on a plateau, overlooked by the Surrey Hills AONB

Lower housing need figures could have 'fundamental impact' on green belt release, conference told

10 October 2018 by David Dewar

Reduced housing need arising from the latest household projections could make it harder for councils to demonstrate the exceptional circumstances needed for green belt changes, the Planning for Housing conference was told yesterday. Andy Meader of Pegasus Group speaking at yesterday's Planning for Housing conference Andy Meader of Pegasus Group speaking at yesterday's Planning for Housing conference

Andy Meader, director of consultancy Pegasus Group, said that recent case law had established that the intensity of housing need was a key factor in demonstrating the exceptional circumstances required to justify green belt release in local plans.
"In other words, the greater the shortage of housing, the more exceptional the circumstances are likely to be," Meader said.

"If the objectively-assessed need is suddenly to reduce for any reason, then that can have implications."

"It is a very significant consideration," Meader said, which could have "a fundamental impact" on councils' ability to demonstrate exceptional circumstances.

Other key factors needed to demonstrate exceptional circumstances, he said, included fully investigating alternative sources of development in the area.

"It’s going to be very important to have undertaken those exercises," he said. "Otherwise, there is the potential criticism that you just don’t really know what potential there is."

Meader, whose firm has recently carried out a green belt review for Guildford Borough Council, added that authorities wanting to make green belt releases should justify such changes both in principle and on an individual site basis in order to demonstrate exceptional circumstances.

Mark Andrews, planning and housing policy manager at Coventry City Council - whose recently adopted local plan released green belt land for 7,000 homes - said that key tips for carrying out a green belt review included having a clear and consistent methodology and working with a wide range of stakeholders.

He also advised that those undertaking reviews should have realistic expectations.

"Your review will never be accepted by everyone and it will never be perfect," Andrews said. "If you go into the process thinking ‘I’ve got to make this right for everyone and I’ve got to get everyone to like what comes out of this green belt review,’ you will set yourself up to fail.

"The most important thing is to be happy yourself that the information you have collected is evidence that you are comfortable with and works for you as an authority," he said.

Paragraph 136 of the final says: "Once established, green belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans". Paragraph 137 sets out these exceptional circumstances, including a test of whether the local authority has made as "much use as possible of suitable brownfield sites and underutilised land" and, through strategic policies, "optimises the density of development" in existing built-up areas.

While planning authorities should consider the construction of new buildings in the green belt as "inappropriate", the new framework now countenances such exceptions as affordable housing "for local community needs" set out in development plans or development on brownfield land that does "not cause substantial harm to the openness of the green belt".

5. **POLICY A35: FORMER WISLEY AIRFIELD (MM40)**

- On 13th June 2018 the Secretary of State published his decision to uphold the Councils’ decision to refuse permission for the Wisley Airfield planning application (15/P/00012), and the applicant’s planning appeal was dismissed.
• Three months later the Local Plan (including Policy A35 for a development of essentially the same scale on Wisley Airfield as that rejected by the Secretary of State) was submitted for the present public consultation and fails to specify concrete in terms of what is planned for the town, whereabouts it is planned, or when it is proposed that it should happen.

• Three months later the Local Plan (including Policy A35 for a development of essentially the same scale on Wisley Airfield as that rejected by the Secretary of State) was submitted for the present public consultation.

• This seems very odd at a time when the official household projections on which the Local Plan was based had been reduced by 40% (see point 1 above).

• The Site of Nature Conservation Importance (SNCI) which used to cover the entire site has been reduced to about 15-20% of its former size, and about one third of that residual area is land that is “safeguarded” for waste operations (as in the Surrey Waste Plan). However, the Local Plan states that “Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures.”

Attached documents:

Comment: MM40 - LPMM18/3568  Respondent: Sue Carmichael 11086529   Agent:

Site A35.

• The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the air traffic control beacon.

Attached documents:

Comment: MM40 - LPMM18/4660  Respondent: Bridge End Farm, Ockham (Julian and Nicola Harris) 11268769   Agent: CBRE Ltd (Phoebe Juggins)

MM40

We support the proposed amendments to Policy A35, but also suggest that a specific design requirement ensuring interconnectivity across the site allocation is included, to ensure that the site layout is flexible enough to respond to the inevitable phasing of the large strategic site which comprises more than one land ownership.

Attached documents:

Comment: MM40 - LPMM18/3298  Respondent: Barry Lewis 11556161   Agent:

A35 Wisley

With further work this site could be developed (as Dunsfold) but currently J10 delays and other infrastructure failings (local roads, rail
and pedestrian/cycle) need addressing before this site can be developed. In principle a developable “new town” site but with all the necessary infrastructure upgrades BEFORE building works commence.

**Attached documents:**

---

**Comment:** MM40 - LPMM18/5779  **Respondent:** Mr Timothy Hewlett 15216129  **Agent:**

**SITE A35 – Three Farms Meadows:**

The addition of land to the south of the appeal site does not mitigate the housing density issue as so much of that land is constrained by the VOR (the air traffic control beacon which prevents construction within a certain radius from the beacon).

Land to the south abuts the Ockham Conservation area and increases the visibility of the site to and from the Surrey Hill AONB.

The size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds.

There is absolutely no justification for altering the SNCI boundary.

The biodiversity of the SNCI will be destroyed by the proposed development.

An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law.

Any development at Three Farms Meadow and its surrounding area along the lines previously proposed would destroy the village of Ockham - an historic and beautiful location and therefor SITE A35 must be taken out of the local plan and never be considered for development again.

It is clear to anyone that the current Local plan proposal in fatally flawed and must be withdrawn in order that a proper planning and consultation process can take place.

**Attached documents:**

**Comment:** MM40 - LPMM18/4436  **Respondent:** Sharon Pask 15227329  **Agent:**

I understand from Wisley Action Group that I need to raise my objections to, and comments on, the modifications of the Guildford Borough Council (GBC) Local Plan by noon tomorrow.

This unrealistically tight timeframe is as a result of the Council failing to keep me informed of the intended modifications despite my having previously been in contact with the Council in relation to the Local Plan. Please ensure that my name and email details are added to your mailing list.

I wish to **object** to the proposed modifications to the Local Plan. The modifications essentially mean that land is being added to the south of the Wisley Airfield appeal site which will inevitably have a significant and adverse effect on the historic village of Ockham and will destroy the biodiversity of the site.

In addition to the unacceptable and unjustifiable effect on the area itself, the Council has based its modifications to the Local Plan on unsound data.
In the circumstances the examination which led to the modifications should properly be reopened and all current and relevant evidence should be considered.

**Attached documents:**

---

**Comment:** MM40 - LPMM18/4573  **Respondent:** James Pask 15227617  **Agent:**

**Objection to GBC Local plan modifications**

There are a number of grounds on which I object to the proposed modifications to the GBC Local Plan, namely the adverse impact any development on the additional land to the south of the appeal site would have on the existing local transport structure, the negative effect on the Ockham Conservation area which abuts it and the detrimental impact on a site of nature conservation interest.

**Attached documents:**

3. Policy A35 - Land at Wisley Airfield (Three Farm Meadows): The continued retention of this land in the Local Plan for an enormous settlement remains totally unacceptable and is ill-founded and against the views of the vast majority of the population currently residing in East & West Horsley, Ockham, Ripley, and other surrounding areas of population. The continued inclusion of this site is in my opinion a complete disregard by Guildford Borough Council officials of the fact that development on this site was rejected by the Secretary of State.
following a Public inquiry. This site should be removed from the Plan once and forever to allow the local communities to live in their chosen environment without the continued threat of development on the former Wisley Airfield and its surrounding land.

Attached documents:

Comment: MM40 - LPMM18/4270  Respondent: Ripley Parish Council (Jim Morris) 15278369  Agent:

5. A35 Former Wisley Airfield (FWA)

It appears that further green belt farmland is being purchased by the would-be site developer, with a view to extending the site considerably, and thus overcome a number of the current limitations on the current site. This type of creeping development on such a massive scale places not only Ockham under further threat but much of the surrounding area. This could lead to any number of agricultural sites being converted into additional construction sites. Policy A35 MM50 also hugely and unacceptably reduces the site’s designated SNCI.

Ripley Parish Council continues its objection to the principal of the FWA development and reiterates that it is entirely disproportional, totally lacks the required infrastructure and is a wholly unsustainable venture. This is borne out, for example, by the woefully inadequate site transport scheme being proposed.

Attached documents:

Comment: MM40 - LPMM18/2627  Respondent: Mr John Kettle 15349761  Agent:

Policy A35 Former Wisley Airfield (MM40)

As the Secretary of State, on 13/6/18, dismissed the planning application appeal for development of this site, it is extraordinary that the GBC Local Plan includes this site for development. With the latest ONS projections for housing growth there is no justification for this site to be included in the Local Plan.

I request that the Public Examination of the Plan by the Planning Inspector be re-opened

Attached documents:

Comment: MM40 - LPMM18/2313  Respondent: C R Woodland 15373153  Agent:

I continue to be concerned about A35 Wisley Airfield. The most suitable use for the site would be as a park-and-ride 'hub' with buses going to Guildford, Woking (via Send), Heathrow and Gatwick Airports and possibly other places such as Effingham Junction as well. This would reduce traffic flows on the M25, A3 and other local roads.

The transport strategy in the Send/Send Marsh/Burntcommon/Ripley area does not look as though it will help deal with traffic congestion in the area but more likely to make it worse.

The timing is such that the developments in the area are front end loaded, mostly in the first 5 years of the plan, whilst major road improvements are mostly scheduled to not be completed until later years.

The road developments appear anyway to be designed to bring yet more traffic through these villages including to and from Woking which will increase pollution, delays and gridlock. To build many of the proposed new homes in advance of road improvements will only make matters worse.

The potential future all movements junction of the A3 with the A3100 London Road, the B2215 London Road and the A247 Clandon Road for the provision of land for a connector road to the B2215 London Road/A247 Clandon Road in MM35 Gosden Hill Farm under Transport Strategy (2) and Opportunities (6) sounds like a recipe for yet more traffic to be drawn through Burntcommon/Send Marsh/Send/Ripley making things even worse so although a plan for the future I object to it now.

Site A35.

The addition of land to the south of the site does not mitigate the housing density as much of this land is constrained by the VOR beacon.

I therefore demand that the examination of the Local Plan be re-opened so that current factual evidence can be considered to include ONS figures and that a revised retail demand forecast for Guildford Town Centre be commissioned, if not already available.

I also understand that GBC has been hiding behind a mis-interpretation of the GDPR regulations by only sending out 2,600 reminders and not 10,500 (last time) - no doubt in an attempt to reduce responses.

Please therefore take this latter as a formal objection to the proposals.

Comment: MM40 - LPMM18/2954  Respondent: Mr (Mr David Boothby) 15475841  Agent:

Having reviewed the submission I would like to register my complaint to that part of the plan dealing with the proposal for up to 2000 homes to be sited on/around the old Wisley Airfield.

This appears to be yet another backdoor approach to breaching the findings of recent Enquiries/Appeals that have rejected others’ plans for residential and commercial building to take place on the site.

I wish to add my note of complaint to the proposal and am against Guildford borough including the site within the local plan. I object to the number of houses under consideration and as a minimum request the considerations leading the number of dwelling amounting to 2000 be reconsidered as massively disproportionate and out of keeping with the supply of all current and likely proposed future services in the surrounding environs – to include inappropriate saturation of vehicle traffic (during construction and after any dwellings are built) on local traffic flow, abuse of an area of outstanding natural beauty, the desecration of the Green Belt which should remain sacrosanct, and levels of pollution already present and likely to be added to by any development.

Please keep me appraised of any developments relating to the inclusion of any housing stock at the old Wisley Airfield site and register my strong disagreement to its current proposed inclusion within the plan, in any case.

Proposal: Guildford Local Plan: Strategy and Sites - Main Modifications 2018

Thank you for consulting the RSPB. We have limited our response to considering the Main Modifications to Policy A35: Former Wisley airfield, Ockham (MM40).

We remain very disappointed that despite previous concerns raised, Wisley Airfield Site is still allocated for housing in the Guildford Local Plan. The RSPB is not aware of any proposed changes to the design of the SANGs or of any proposals to modify any of the public rights of way, which run through Wisley airfield; in particular those that link to the Thames Basin Heaths Special Protection Area (SPA). The RSPB’s concerns in relation to the impacts that this scheme is likely to have upon the SPA remain. Consequently, the RSPB maintains its objection and believes that Policy A35 should be removed from the plan.

We note the inclusion of MM10a; (10a) *'Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures'*. While welcome, we do not consider this as adequate to address our concerns or sufficient to justify the inclusion of the Wisley site.

We hope you find these comments useful. We would be grateful to be kept informed of progress with the development of the Guildford Local Plan.

Guildford Local Plan: comments on Proposed Modifications

I submit this letter under GBC’s current local plan consultation and it addresses Site Policy A35, land at the former Wisley Airfield in Ockham.

**POLICY A35 Land at former Wisley Airfield, Ockham**

MM40 of the Modifications Schedule sets out a number of minor changes to Site Policy A35, the development of a new settlement at the former Wisley Airfield site. However, my primary concern is why, after a public inquiry has so robustly refused planning permission for this site, have GBC chosen to keep this site policy within the local plan?

**Implications of planning appeal decision**

In September/October 2017 an extensive public inquiry was held following a planning appeal by the site owner, Wisley Property Investments Ltd (‘WPIL’) subsequent to GBC’s refusal of planning permission in April 2016. The site addressed at the appeal was marginally different from Site Policy A35, which has been expanded to include land surrounding Bridge End Farm at the southern edge of the site.
On 13th June 2018, the WPIL appeal was refused by the Secretary of State, the announcement being made whilst the local plan was still being examined. In reaching their decision both the inspector and the Secretary of State gave considerable weight to the Green Belt harm caused by the proposed development, gave substantial weight to the severe impact on the strategic road network, considerable weight to the harm done to heritage assets, significant weight to the harm done to local character and appearance, and significant weight to irreversible landscape harm, including permanent harm to views from the Surrey Hills AONB.

The appeal inspector, Mr Clive Hughes, was particularly critical about the impact which the development would have on the character of the local area, commenting in paragraph 20.95:

"...the overall impact would result in substantial harm to the character of the immediate area. Being sited at the very heart of Ockham parish it would, in effect, link all the surrounding hamlets. It would erode the historic pattern of development in the area to the detriment of the character of these settlements. It would fail to reflect or respect its immediate setting and I agree with the nearby residents that this impact would be catastrophic on their rural way of life."

With such a clear refusal of the WPIL appeal, it was therefore surprising that just two days later on 15th June 2018, GBC issued a ‘Discussion Note’ stating their intention to retain Site Policy A35 within the local plan. Three main grounds were cited by GBC for this position:

95. a) that Policy A35 was different to the appeal site, being a total of 95.9 hectares in size compared to the 114.7 hectares of the appeal site, although the developable land area was increased by approximately 20%;
96. b) that the removal of this site from the Green Belt would mean Green Belt harm was no longer a relevant planning consideration;
97. c) that Highways England and WIPL were close to finalizing an agreement over infrastructure contribution which would allow Highways England to withdraw their objection to this development that they had lodged at the appeal.

Site Policy A35, like all of the larger sites within the local plan, has been subjected to examination by the local plan examiner, Mr Bore, in the first half of 2018. In February 2018 EHPC submitted a Statement to Mr Bore addressing Site Policy A35 – ie, well before the WPIL appeal decision had been announced. The examiner’s public hearing for Site A35 was held on 5th July 2018, the very last item to be considered at the examiner’s open sessions. At this hearing EHPC’s representative drew attention to the flaws in GBC’s argument that the site is materially different from the WPIL appeal site. As the representative explained, the difference between the two sites only increases the overall planning harm, it does not reduce it. He further explained that the strongly negative planning balance means the Exceptional Circumstances test is not met, so the argument that Green Belt harm is irrelevant is fallacious. A copy of this hearing address is given as Appendix 2 to this submission.

At the public hearing it also became evident that Highways England had still not finalized any agreement with WPIL over the road infrastructure commitments required to support site development.

Despite all of the arguments against this site, as soon as the Site Policy A35 hearing was concluded the examiner summarised his overall position on the local plan, announcing he was not intending to recommend the removal of any sites.

Flaws in the local plan process

I believe the local plan process contains a series of flaws in respect of Site Policy A35, including the following:

1. The examiner’s decision on Site Policy A35 was made within a few minutes after the closing of the public hearing. He could not possibly have had time to properly assess all of the arguments presented. This is a clear case of pre-determination;
2. The examiner did not recommend the removal of any sites from the local plan. Given the large number of arguments made against many of the sites within the local plan, the absence of any one single site being proposed for removal implies either that the examination process in reviewing sites was little more than a token exercise, having no real validity, or that the benchmark level used by the examiner for assessing the soundness of any site policy was set so high as to be effectively worthless;
3. The examiner did not permit any further written submissions from hearing participants on Site Policy A35 following the publication of the Secretary of State’s appeal decision, other than from GBC. In view of the importance of the appeal decision towards assessing the soundness of Site Policy A35, we believe such submissions should have been permitted.

4. GBC issued their Discussion Note on Site Policy A35 within two days of the Secretary of State refusing the WPIL appeal. The extensive arguments made by the appeal inspector and the Secretary of State cannot possibly have been properly reviewed by GBC and their advisers. Yet it seems that GBC are so determined to retain this site within the local plan that even the reasoned arguments of the appeal inspector and the Secretary of State count for naught.

The case for removing Site Policy A35 from the local plan

The deficiencies of this site have been covered at length in earlier consultation submissions made by EHPC and many others. The Secretary of State and the appeal inspector in their June 2018 report provided a detailed review of the key planning benefits and harms involved by this development. The modest differences between the WPIL site and Site Policy A35 have no qualitative impact on the fundamental planning issues in this respect.

In our Statement to the examiner, EHPC provided an analysis of the summary planning balance for this site, included as our Appendix 1 here, in order to demonstrate that the Exceptional Circumstances test required to remove this site from the Green Belt is not met.

EHPC believes the case for removing Site Policy A35 from the local plan is now overwhelming. In particular we would highlight the following factors:

1. The Exceptional Circumstances Test for Green Belt release is not met;
2. The site is fundamentally unsustainable. This is one of the most fundamental requirements of NPPF policy, yet the updated Sustainability Appraisal provided to GBC by AECOM still shows this site as having the worst sustainability of any large site within the local plan;
3. All necessary infrastructure facilities have to be newly provided. This will involve a number of substantial new infrastructure projects of different kinds with considerable uncertainties over their delivery and funding. We note in particular:
4. The development is effectively dependent upon the completion of a major new improvement scheme at the busy A3/M25 junction, the timing and design of which still remains uncertain;
5. The development is also dependent upon the building of new south-facing slip roads to and from the A3 at the Burnt Common junction, whose timing and funding is also uncertain;
6. Policy A35 requires a mitigation scheme to address traffic issues at the junction of Ripley High Street and Newark Lane (leading to Woking), but it is not evident that such mitigation is physically possible;
7. Major new sewage facilities will be needed at Ripley sewage works, the timing of which is uncertain;
8. Highways England objected to the proposed development at the WPIL appeal due to its harmful impact on the strategic road network and although GBC’s Discussion Note of July 2018 indicated an agreement between WPIL and Highways England was then imminent, no such agreement has yet been announced.
9. Additional ecological protection may be required from that proposed by WPIL in their refused planning application. This follows from two recent landmark judgements in the Court of Justice for the EU, namely the ruling on 25th July 2018 by Advocate General Kokott concerning nitrogen deposition at protected sites, and the decision on 13th April 2018 in the matter of ‘People Over Wind’ which potentially alters the UK position in relation to appropriate assessments under the Habitats Directive. Previously-proposed SANG provisions and other ecological measures may have to be significantly enhanced at Site A35 as a result of these rulings, potentially reducing the developable area of the site still further.
10. The only reason for having such an unsustainable site within the local plan is its contribution towards new housing supply for the borough. However, we note that:

   1. The latest national housing projections released by ONS show major reductions in the projected housing need through to 2034, an approximate 25% reduction nationally from previous projections. Therefore, it may be questioned whether sufficient housing need may actually arise to justify the proposed new settlement;
2. Total housing numbers planned in the latest version of the local plan show the Wisley site is unnecessary for meeting the overall assessed housing needs of the borough, as estimated in the new version of the local plan;
3. It is now highly unlikely that this site will make any contribution to the 5 year housing supply of the borough.

Concluding remarks

Site Policy A35 is based upon a site which is unsustainable and totally reliant on infrastructure whose delivery is very uncertain, whilst its contribution to borough housing targets appears potentially unnecessary. The appeal inspector commented that the impact of this development on local residents would be ‘catastrophic’ to their way of life.

Accordingly I urge GBC to remove Site Policy A35 from the local plan.

Guildford Local Plan: comments on Proposed Modifications

I submit this letter under GBC’s current local plan consultation and it addresses Site Policy A35, land at the former Wisley Airfield in Ockham.

POLICY A35 Land at former Wisley Airfield, Ockham

MM40 of the Modifications Schedule sets out a number of minor changes to Site Policy A35, the development of a new settlement at the former Wisley Airfield site. However, my primary concern is why, after a public inquiry has so robustly refused planning permission for this site, have GBC chosen to keep this site policy within the local plan?

Implications of planning appeal decision

In September/October 2017 an extensive public inquiry was held following a planning appeal by the site owner, Wisley Property Investments Ltd (‘WPIL’) subsequent to GBC’s refusal of planning permission in April 2016. The site addressed at the appeal was marginally different from Site Policy A35, which has been expanded to include land surrounding Bridge End Farm at the southern edge of the site.

On 13th June 2018, the WPIL appeal was refused by the Secretary of State, the announcement being made whilst the local plan was still being examined. In reaching their decision both the inspector and the Secretary of State gave considerable weight to the Green Belt harm caused by the proposed development, gave substantial weight to the severe impact on the strategic road network, considerable weight to the harm done to heritage assets, significant weight to the harm done to local character and appearance, and significant weight to irreversible landscape harm, including permanent harm to views from the Surrey Hills AONB.

The appeal inspector, Mr Clive Hughes, was particularly critical about the impact which the development would have on the character of the local area, commenting in paragraph 20.95:

“...the overall impact would result in substantial harm to the character of the immediate area. Being sited at the very heart of Ockham parish it would, in effect, link all the surrounding hamlets. It would erode the historic pattern of development in the area to the detriment of the character of these settlements. It would fail to reflect or respect its immediate setting and I agree with the nearby residents that this impact would be catastrophic on their rural way of life.”
With such a clear refusal of the WPIL appeal, it was therefore surprising that just two days’ later on 15th June 2018, GBC issued a ‘Discussion Note’ stating their intention to retain Site Policy A35 within the local plan. Three main grounds were cited by GBC for this position:

95. a) that Policy A35 was different to the appeal site, being a total of 95.9 hectares in size compared to the 114.7 hectares of the appeal site, although the developable land area was increased by approximately 20%;
96. b) that the removal of this site from the Green Belt would mean Green Belt harm was no longer a relevant planning consideration;
97. c) that Highways England and WIPL were close to finalizing an agreement over infrastructure contribution which would allow Highways England to withdraw their objection to this development that they had lodged at the appeal.

Site Policy A35, like all of the larger sites within the local plan, has been subjected to examination by the local plan examiner, Mr Bore, in the first half of 2018. In February 2018 EHPC submitted a Statement to Mr Bore addressing Site Policy A35 – ie, well before the WPIL appeal decision had been announced. The examiner’s public hearing for Site A35 was held on 5th July 2018, the very last item to be considered at the examiner’s open sessions. At this hearing EHPC’s representative drew attention to the flaws in GBC’s argument that the site is materially different from the WPIL appeal site. As the representative explained, the difference between the two sites only increases the overall planning harm, it does not reduce it. He further explained that the strongly negative planning balance means the Exceptional Circumstances test is not met, so the argument that Green Belt harm is irrelevant is fallacious. A copy of this hearing address is given as Appendix 2 to this submission.

At the public hearing it also became evident that Highways England had still not finalized any agreement with WPIL over the road infrastructure commitments required to support site development.

Despite all of the arguments against this site, as soon as the Site Policy A35 hearing was concluded the examiner summarised his overall position on the local plan, announcing he was not intending to recommend the removal of any sites.

Flaws in the local plan process

I believe the local plan process contains a series of flaws in respect of Site Policy A35, including the following:

1. The examiner’s decision on Site Policy A35 was made within a few minutes after the closing of the public hearing. He could not possibly have had time to properly assess all of the arguments presented. This is a clear case of pre-determination;
2. The examiner did not recommend the removal of any sites from the local plan. Given the large number of arguments made against many of the sites within the local plan, the absence of any one single site being proposed for removal implies either that the examination process in reviewing sites was little more than a token exercise, having no real validity, or that the benchmark level used by the examiner for assessing the soundness of any site policy was set so high as to be effectively worthless;
3. The examiner did not permit any further written submissions from hearing participants on Site Policy A35 following the publication of the Secretary of State’s appeal decision, other than from GBC. In view of the importance of the appeal decision towards assessing the soundness of Site Policy A35, we believe such submissions should have been permitted.
4. GBC issued their Discussion Note on Site Policy A35 within two days of the Secretary of State refusing the WPIL appeal. The extensive arguments made by the appeal inspector and the Secretary of State cannot possibly have been properly reviewed by GBC and their advisers. Yet it seems that GBC are so determined to retain this site within the local plan that even the reasoned arguments of the appeal inspector and the Secretary of State count for naught.

The case for removing Site Policy A35 from the local plan

The deficiencies of this site have been covered at length in earlier consultation submissions made by EHPC and many others. The Secretary of State and the appeal inspector in their June 2018 report provided a detailed review of the key
planning benefits and harms involved by this development. The modest differences between the WPIL site and Site Policy A35 have no qualitative impact on the fundamental planning issues in this respect.

In our Statement to the examiner, EHPC provided an analysis of the summary planning balance for this site, included as our Appendix 1 here, in order to demonstrate that the Exceptional Circumstances test required to remove this site from the Green Belt is not met.

EHPC believes the case for removing Site Policy A35 from the local plan is now overwhelming. In particular we would highlight the following factors:

1. The Exceptional Circumstances Test for Green Belt release is not met;
2. The site is fundamentally unsustainable. This is one of the most fundamental requirements of NPPF policy, yet the updated Sustainability Appraisal provided to GBC by AECOM still shows this site as having the worst sustainability of any large site within the local plan;
3. All necessary infrastructure facilities have to be newly provided. This will involve a number of substantial new infrastructure projects of different kinds with considerable uncertainties over their delivery and funding. We note in particular:

4. POLICY A35: FORMER WISLEY AIRFIELD (MM40)

The inclusion of Wisley airfield as a development site in the Local Plan ignores the recent dismissal of planning appeal on that site by Secretary of State. The traffic impacts of the proposed development would be the same as those just rejected by the Secretary of State, and are therefore unacceptable, as are the impacts on the local infrastructure (parking, medical provision, schooling etc), particularly when ONS household projections, on which the Local Plan should be based, have been reduced by 40%.

The Site of Nature Conservation Importance (SNCI) which used to cover the entire airfield site has been reduced to about 15-20% of its former size, and about one third of that residual area is land that is “safeguarded” for waste operations. This is inconsistent with paragraph 10(a) of the Policy A35 which states that “Every effort must be made to reduce the harm to the SNCI through appropriate avoidance and mitigation measures.”

I object to the inclusion of the site

Attached documents:

SITE SPECIFIC – A35 – Three Farms Meadows

- The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR
- Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB
- MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.
- The biodiversity of the SNCI will be destroyed by the proposed development.
- An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law.

Attached documents:

4. Former Wisley Airfield – MM40 Policy A35- OBJECT

a. It is a nonsense for this site to still be included in the Plan when the development application of similar scale was refused by the Council (15/P/00012) and on appeal was subsequently rejected by the Secretary of State.

b. Additionally, when you look at the reduced ONS projection for housing growth, at least two of the “strategic sites” should now be removed from the Plan.

Comment: MM40 - LPMM18/1239  Respondent: Jim Allen 20674913  Agent:

Page 53: Policy A35; Former Wisley airfield, Ockham

Policy box requirements (3)

(3) There is a clear and obvious requirement for south facing slips at this location to allow this development to access Guildford. No safe guarded land has been provided for such provision, thus until it is, again claimed as not required by HE and SCC yet as this proposal remains untried or tested via modelling this site is unsustainable. Noting this requirement is also required for the RHS Gardens expansion, thus a new policy is required (A35a) safe guarding land south of the Ockham Roundabout (13a) There is no spare foul water capacity for this site at Ripley. this should read this site is unsustainable until Ripley Treatment works is upgraded.

Comment: MM40 - LPMM18/1434  Respondent: Mr Nick Mellstrom 20690721  Agent:

I would like to OBJECT strongly to the following amendments:-

MM9 I OBJECT most strongly to the site of Three Farms Meadows still not being exempt from design constraints. The addition of land to the south of the site does not in any way help the density issue as much of it is already prevented by VOR from construction within a certain radius of the air traffic control beacon. This is also land next to the Ockham conservation area and an AONB

Attached documents:

Comment: MM40 - LPMM18/5937  Respondent: Dirk Mercer 20699553  Agent:

SPECIFIC SITES

MM40 (A35) Three Farms Meadows aka Wisley Airfield

I object to this Strategic site.

The Plan includes here Policy A35 for a development on essentially the same scale on Wisley Airfield as that was rejected by the Secretary of State on 13th June 2018. The Councils decision to refuse permission for the planning application 15/P/00012 was upheld by the Secretary of State and the planning appeal was dismissed.

This Site with proposed development of 2000 houses, and similar in scale to that of the above planning appeal, has been inserted again in the proposed Local Plan. It is based on the above planning application which was proposed by developers, rejected by GBC and refused by the government only 3 months ago. It is wrong to repeatedly include it using at best, questionable figures. This is in essence attempting to frustrate the will of the electorate and the Secretary of State.

The proposed number of houses and scale of development as suggested on this site would still be wholly inappropriate for the area, the site being in the Green Belt. Many issues and objections have been raised by residents and the Council in response to the appeal dismissed in June 2018. These remain the same or are not sufficiently mitigated.
In my opinion, it does not make sense to base the development of this site on household projections that have been reduced by 40.5%.

The addition of other new land to the south of the appeal site does not mitigate the density problems as much of that land is constrained by the VOR.

The land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.

**Attached documents:**

---

**Comment:** MM40 - LPMM18/2615  **Respondent:** Kris Nasta 20762433  **Agent:**

I object to the amendments relating to this site as follows:

1. The addition of land to the south of the appeal site does not mitigate the density issue as much as it appears to on the plan as building is not permitted within a certain radius the Ockham VOR (vhf omni-directional range) air traffic control beacon).

2. The land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.

3. In breach of case law an Appropriate Assessment and a Habitats Regulation Assessment have not been completed.

**Conclusion**

Due to the inadequacies and shortcomings listed above and the fact that so many people have been excluded from this consultation I hereby call for the examination in public be re-opened.

**Attached documents:**

---

**Comment:** MM40 - LPMM18/3220  **Respondent:** Nancy and John Shafee 20778625  **Agent:**

Our objections to excessive building in these areas remains the same as previously stated.

We object on the following grounds:

A) Surface water is a continual problem in the area with some recent building projects being delayed due to lack of provision for disposing of excess water on site. Ripley Lane and a short section of The Street are frequently flooded and impassable during times of heavy rainfall and this can only be exacerbated by building on land near to or adjoining these roads.

B) The roads are already overcrowded at peak times. Queues build up at the intersection where East Lane, The Drift and Ockham Road South meet. Queues
build up even in non-peak times at the southern end of The Street/A246 at the 'Bell & Colvill roundabout'

There is almost constant congestion joining the A3 at with 'Wisley roundabout'

NB - this can only get worse with the inclusion of additional housing at Area 35

C) There is insufficient primary schooling in the village and has been for more than 25 years. Some children have to travel more than four miles for primary schooling

There is no guarantee that local children will be allocated secondary schooling at the nearest secondary school in Effingham

D) Already it can take 3 weeks to get an appointment with a chosen GP

It would make more sense to discuss additional housing

AFTER the land has been properly surveyed and resolutions found for diverting surface water

AFTER provisions for schooling and medical needs are addressed

AFTER discussions and a workable plan addressed for infrastructure - in particular roads and drainage

SITE SPECIFIC – A35 – Three Farms Meadows

The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR

Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB

MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.

The biodiversity of the SNCI will be destroyed by the proposed development.

An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law

Attached documents:
3.0 RESPONSE TO SITE A35 WISLEY

3.1 The Modifications Schedule sets out in section MM40 several proposed changes to site policy A35, the development of a new settlement at the former Wisley airfield site. This Parish Council’s continued objection to Site A35 is fundamental and questions why, after a major Public Inquiry, the Secretary of State’s robust refusal of planning permission and the latest housing supply trajectory with 1500 dwellings over the OAN total directed by the Examining Inspector for the Plan period, is GBC choosing to keep this site allocation within the Submission Local Plan?

Implications of planning appeal decision

3.2 The history of the former Wisley airfield planning application, the unanimous refusal of planning permission by GBC’s Planning Committee in April 2016 and the major public inquiry into a planning Appeal by Wisley Property Investments Ltd (WPIL) is comprehensively on record. The site addressed at the Appeal was marginally different from the slightly enlarged Site depicted in Policy A35, which now includes land surrounding Bridge End Farm along the southern edge of the site.

3.3 On 13th June 2018 the WPIL Appeal was refused by the Secretary of State, the announcement being made whilst the Submission Local Plan was still under Examination. In reaching their decision both the Inquiry Inspector and the Secretary of State gave:

• considerable weight to the Green Belt harm that would be caused by the proposed development
• substantial weight to the severe impact on the strategic road network
• considerable weight to the harm done to heritage assets
• significant weight to the harm done to local character and appearance
• significant weight to irreversible landscape harm, including permanent harm to views from the Surrey Hills AONB.

3.4 The Inquiry Inspector, Mr Clive Hughes, was particularly critical about the impact the development would have on the character of the local area, commenting in paragraph 20.95:

“...the overall impact would result in substantial harm to the character of the immediate area. Being sited at the very heart of Ockham parish it would, in effect, link all the surrounding hamlets. It would erode the historic pattern of development in the area to the detriment of the character of these settlements. It would fail to reflect or respect its immediate setting and I agree with the nearby residents that this impact would be catastrophic on their rural way of life.”

3.5 It was therefore surprising that just two days later, on 15th June 2018, after such a strong and clearly stated refusal of the WPIL Appeal, GBC issued a ‘Discussion Note’ declaring their intention to retain Site Policy A35 within the Submission Local Plan. The main reasons cited by GBC for this step were:

a) that Policy A35 was different to the appeal site, being a total of 95.9 hectares in size compared to the 114.7 hectares of the appeal site, although the developable land area was increased by approximately 20%
b) that the removal of this site from the Green Belt would mean Green Belt harm was no longer a relevant planning consideration
c) that Highways England and WIPL were close to finalizing an agreement over infrastructure contribution which would allow Highways England to withdraw their objection to this development they had lodged at the Public Inquiry.

3.6 Site Policy A35, like all the larger sites within the Submission Local Plan, has been subjected to Examination by Inspector J Bore. In May 2018 Colin Smith Planning submitted, on behalf of WHPC, a representation to the Examining Inspector in which Section 4 set down comments on Site Policy A35 (NB: this was several weeks before the Appeal Inquiry decision was published by the Secretary of State in mid-June).

3.7 For ease of reference a copy of Section 4 from the representation is given in Appendix 2 of these representations. The representation essentially makes the same detailed arguments made by East Horsley Parish Council (WHPC and EHPC were a Rule 6 party for the Appeal Planning Inquiry) as to why Site Policy A35 is significantly unsound. In particular the detailed planning balance demonstrates that the Exceptional Circumstances test needed to justify removing this site from the Green Belt is not met.
3.8 The Examination public Hearing for Site A35 held on 5th July 2018, heard a short address from East Horsley Parish Council’s representative which drew attention to the flaws in GBC’s argument that the site is materially different from the WPIL Appeal site. As the EHPC representative explained, the difference between the two sites only increases the overall planning harm, it does not reduce it. He further explained that the strongly negative planning balance means the Exceptional Circumstances test is not met, so the argument that Green Belt harm is irrelevant is fallacious (Note: copy of the EHPC address included at Appendix 3 of this letter).

3.9 It also became evident at the public Hearing that Highways England had still not finalized any agreement with WPIL over the road infrastructure commitments required to support site development.

3.10 Despite all of the representations and verbal arguments put to the Examination re this site, as soon as the Site Policy A35 hearing was concluded the Examining Inspector summarised his overall position on the Submission Local Plan by announcing he was not intending to recommend the removal of any sites.

**Attached documents:**

**Comment:** MM40 - LPMM18/3428  **Respondent:** West Horsley Parish Council 20790113  **Agent:** Colin Smith Planning Ltd (Colin Smith)

**The case for removing Site Policy A35 from the Local Plan**

3.12 The Secretary of State and the Appeal Inspector in the June 2018 letter and accompanying Inquiry Report set down a detailed review of the key planning benefits and harms by the proposed development. The modest differences between the WPIL site and Site Policy A35 have no qualitative impact on the fundamental planning issues in this respect.

3.13 WHPC together with EHPC believes the case for removing Site Policy A35 from the Submission Local Plan is now irrefutable. Both the Horsley Parish Councils highlight the following factors:

a) The Exceptional Circumstances Test for Green Belt release is not met, as set out in detail in EHPC’s Statement to the Examiner.

b) The site is fundamentally unsustainable. This is one of the three most important requirements of National Planning Policy Framework. Indeed, the updated Sustainability Appraisal provided to GBC by AECOM still shows this site as having the worst sustainability of any large site within the Submission Local Plan.

c) All necessary infrastructure facilities are completely absent and will have to be provided. The provision of these substantial new infrastructure projects of different kinds, will introduce varying degrees of uncertainty over their delivery and funding. In particular it is noted that:

i. The development is effectively dependent upon the completion of a major new road improvement scheme at the busy A3/M25 junction, the timing and design of which remains uncertain.

ii. The development is also dependent upon the construction of new south-facing slip roads to and from the A3 at the Burnt Common junction, whose timing and funding is also uncertain.

iii. Policy A35 requires a mitigation scheme to address traffic issues at the junction of Ripley High Street and Newark Lane (leading to Woking), but no proposals have been advanced by any party to demonstrate such mitigation is achievable.

iv. Major new sewage facilities will be needed at Ripley sewage works, the location of which in the Green Belt will have environmental impact and for which the timing is uncertain.
v. Highways England objected to the proposed A35 Site Policy at the WPIL Appeal due to its harmful impact on the strategic road network. GBC’s Discussion Note of July 2018 signalled an agreement between WPIL and Highways England was imminent, but to date no such agreement has yet been announced.

d) Additional ecological protection may be required from that proposed by WPIL in their refused planning application. This follows from two recent landmark judgements in the Court of Justice for the EU, namely the ruling on 25th July 2018 by Advocate General Kokott concerning nitrogen deposition at protected sites, and the decision on 13th April 2018 in the matter of ‘People Over Wind’ which potentially alters the UK position in relation to appropriate assessments under the Habitats Directive. Previously-proposed SANG provisions and other ecological measures may have to be significantly enhanced at Site A35 as a result of these rulings, potentially reducing the developable area of the site still further.

e) The only reason advanced for having such an unsustainable site within the local plan is its potential contribution towards new housing supply for the borough. However, it is noted that:

i. The latest national housing projections released by ONS show major reductions in the projected housing need through to 2034, an approximate 25% reduction nationally from previous projections. Accordingly, it may well be questioned whether future housing need will actually exist to justify building new homes on the scale proposed for this new and remotely-located settlement;

ii. Total housing numbers planned in the latest version of the local plan show the Wisley site is unnecessary for meeting the overall assessed housing needs of the borough, as estimated in the new version of the Local Plan. At the Examination hearing it was GBC’s own QC who told the examiner that: “It is true we could do without 2000 homes from the totalled site allocations”

iii. Due to delays in delivering infrastructure, it is now highly unlikely that this site will make any contribution to the 5-year housing supply of the borough. This appears to have been the most important factor used by the Examiner in deciding not to remove any sites from the local plan.

Recommendation

3.14 Site Policy A35 is based upon a site which is unsustainable and totally reliant on infrastructure whose delivery is highly uncertain. The Appeal Inquiry Inspector commented that the impact of this development on local residents would be ‘catastrophic’ to their way of life, yet its contribution to borough housing targets appears unnecessary.

3.15 Accordingly, WHPC urges GBC to remove Site Policy A35 from the Local Plan.

Comment: MM40 - LPMM18/3455  Respondent: John Dixey 20790945  Agent: 

I object to the Council unilaterally removing the Wisley Airfield Site from the Green Belt. They have no mandate from the people of Guildford and Surrey to do this.

It appears that the only reason for this this dubious manoeuvre is to undermine the Secretary of State for the Environment’s decision that the Wisley Airfield development “would represent inappropriate development in the Green Belt, and should not be approved except in very special circumstances” and to try to get around the fact that the provision of housing is not an “exceptional circumstance.”
It is also illogical that GBC should take this action given that they unanimously supported the refusal of the original application, and because the conservative members stated in their election manifesto that they would not build on green belt land.

SITE SPECIFIC – A35 – Three Farms Meadows

I object to the amendments relating to this site as follows:

The addition of land to the south of the appeal site does not mitigate the density issue as much as it appears to on the plan as building is not permitted within a certain radius the Ockham VOR (vhf omni-directional range) air traffic control beacon).

The land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.

In breach of case law an Appropriate Assessment and a Habitats Regulation Assessment have not been completed.

**Conclusion**

Due to the inadequacies and shortcomings listed above and the fact that so many people have been excluded from this consultation I hereby call for the examination in public be re-opened.

Site A35.

- The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the air traffic control beacon.
- MM47: the size of the SNCI is significantly reduced despite the whole site qualifying on ecological grounds; there is no justification for altering the SNCI boundary.
- The biodiversity of the SNCI will be destroyed by the proposed development. An Appropriate Assessment and a Habitats Regulation Assessment have not been completed, in breach of case law.
- Strategic sites should not be exempt from design constraints.

**Attached documents:**
MM40 again incorrect given the new data from the ONS – the planned impact on the SNCI should be re-instated to its former size.

Attached documents:

Site Specific: Site A35, the Former Wisley Airfield/Three Farms Meadows:

In addition to the above, I object to the following:

12 Failure to conduct an Appropriate Assessment or a Habitat’s Regulation Assessment: Guildford Borough Council has failed to conduct/ensure that such assessments have been conducted in respect of the Former Wisley Airfield/Three Farms Meadows, breaching applicable caselaw. The continued inclusion of Site A35 in the draft Plan is unsound, rendering the draft Plan unsound.

13 Failure to take into account the fact that the whole of the Former Wisley Airfield/Three Farms Meadows is a Site of Nature Conservation Interest: The proposed development will destroy the bio-diversity of the SNCI. The continued inclusion of Site A35 in the draft Plan is unsound, rendering the draft Plan unsound.

14 MM47: Proposal to (drastically) reduce the size of the SNCI: The whole of the Former Wisley Airfield/Three Farms Meadows is a Site of Nature Conservation Interest. There is no justification for the proposed reduction in size of the SNCI. The continued inclusion of Site A35 in the draft Plan is unsound, rendering the draft Plan unsound.

15 Addition of new land to the south of the appeal site: Development on much of this “new” land is constrained by the VOR. The inclusion of this new land therefore fails to mitigate the density of the proposed development, which remains objectionable and unacceptable. The continued inclusion of Site A35 in the draft Plan is unsound, rendering the draft Plan unsound.

16 Addition of new land to the south of the appeal site: This land abuts the Ockham Conservation Area, and increases the visibility of any development on the Former Wisley Airfield/Three Farms Meadows to/from the Surrey Hills ANOB. The continued inclusion of Site A35 in the draft Plan is unsound, rendering the draft Plan unsound.

Attached documents:

MM40 Policy A35: Former Wisley Airfield

Whilst this Policy sets out a number of minor changes to Site Policy A35, it seems to completely miss the fact that the Secretary of State gave a robust refusal to planning permission for a similar development earlier this year (June 18). Please could you explain why the GBC have thus chosen to keep this site development within the local plan?

In providing his verdict the Secretary of State gave substantial weight to the harm which would be caused to the Green belt by this development. Further he stated that there would be massive impact to the road infrastructure, to the heritage assets, the character and appearance and the landscape including view from the Surrey Hills. Personally, I cannot see the difference in the development proposed by the “Wisley Property Investments Ltd.” and the proposal put forward by the
GBC I thus do not see how you can keep Site A35 in your proposal. Please remove it immediately from the local plan and allow the Secretary of State’s decision to stand.

Thank you very much for the consideration of the above points and please feel to get in contact directly should you wish to speak further.

**Attached documents:**

---

**Comment: MM40 - LPMM18/4539  Respondent: Gary Pask 20824737  Agent:**

Specifically, I **object** to the modification on the following grounds:

Adding land to the south of the Wisley Airfield appeal site does not mitigate the density issue since a significant part of the ‘new land’ is constrained by the VOR.

Land to the south abuts the Ockham Conservation Area and makes the site more visible to and from the Surrey Hills, an Area of Outstanding Natural Beauty.

It is inevitable that the biodiversity of the SNCI will be destroyed by the proposed development. It is worth noting that the modifications drastically reduce the size of the SNCI despite the fact that it qualifies on ecological grounds. It appears that the necessary assessment of the area in terms of Habitat Regulation have not been carried out as required by law.

**Attached documents:**

Should Garlick’s Arch be retained as Green Belt in view of revised housing need, rather than expanded?

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2886    **Respondent:** Mr Brian East 8559745    **Agent:**

I strongly object to the latest Guildford local plan for Send, which if approved will destroy our village, quality of life and cause much stress to local residents.

My objections to the main modifications are as follows:-

MM41 Land at Garlicks Arch, Send Marsh, Policy A43.

Increased from 400 to 550 homes.

I'm dismayed to find that despite over 7000 objections previously to this development this was ignored and the number of houses has been increased to 550. This is over development in what is Green Belt and will undoubtedly result in major increases in traffic on the surrounding roads and cause an overburden on our schools and medical facilities which are already under strain.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2890    **Respondent:** Mr Brian East 8559745    **Agent:**

MM27, MM41, MM42 & MM48 Transport Strategy.

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons plus of course Gosden Hill and Wisley/Ockham are major and not adequately addressed with the proposed A3 changes etc.

It will I feel result in thousands more cars daily using Send Barns Lane and Send Road going to/from Woking etc past schools, medical centre and shops with major delays and gridlocks, noise and air pollution all to an intolerable and unacceptable level for our village.

**Attached documents:**
Comment: MM41 - LPMM18/2987  Respondent: Chris Brown 8561057  Agent:

Comments on MM for the Guildford Local Plan

I make the following comments on the Main Modifications to the proposed sites as follows:

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

I object to the proposal to increase the number of homes on this site from 400 to 550. Anyone who has actually visited the site will see how unsuitable it is.

I object to the number of homes being increased by 37%. With an average of 2 people per house will mean a possible 1000 plus residents who will all require access to roads and amenities.

I went to the hearing about this site and listened to the overwhelming and compelling evidence presented by various groups about how unsuitable this site was. The councils representatives had few answers to this and so the conclusion from the Inspector that the site should be increased and not scrapped is astounding.

It is likely this will add over 750 additional cars to the traffic in the surrounding area. Access to both Guildford and Woking would add to the massive traffic jams at present at Send Dip and the Burnt Common Roundabout. Send Road is already the main access road between Woking and the M25 carrying heavy goods vehicles and articulated trucks.

There is nothing in the Local Plan about additional road infrastructure so the current small roads we currently have which are over-crowded already will simply not be able to cope. If the other proposed sites all go forward then these roads will simply gridlock making life a misery for everyone concerned. There is a serious safety angle to this problem as cars bunch and speed limits are broken to enable to get from A to B on time. The situation will be far worse during weekdays. The additional traffic which will result from the excessive building programme in Send will make the situation far worse and in all probability result in gridlock.

With the additional houses there will inevitably be families requiring schools for their children. There is only now one primary school for the villages of Send and Ripley since the recent closure of Ripley School. George Abbot is the nearest secondary school and for many years the children of Send and Ripley do not get into the school due to it being over-subscribed. The next nearest school is the Howard of Effingham which currently does not take children from the villages.

There are no plans to build any new schools, surgeries, dentists or amenities. More houses will mean the current amenities will be over stretched and unable to cope.

In my opinion this is an irresponsible and ill-conceived site to chose.

**Attached documents:**

Comment: MM41 - LPMM18/2992  Respondent: Chris Brown 8561057  Agent:

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.
There is no improved traffic policy or any plans to upgrade or improve roads or bus routes. Currently buses run one an hour to Woking and so people are forced to use cars.

Attached documents:

**Comment:** MM41 - LPMM18/6030  **Respondent:** C Sheard 8562561  **Agent:**

**MM41 Policy A43 Land at Garlicks’ Arch, Send March**

This has increased from 400 to 550 homes, of which 450 are to be built in the first 5 years. This increase of 37% in the number of homes is excessive and if the outline plans shown at the Local Plan Examination are anything to go by will breach many of the other policies contained within the Local Plan regarding new sites reflecting the Local Character. It also ignores the 6000 plus objections to the previous proposal. The land is currently Green Belt and includes Ancient Woodland, which should have protected status under both the previous and current NPPFs and there would be no need for any incursion into the Green Belt were the Local Plan to be re-visited in light of the new housing requirements figures issued in September 2018 as outlined above.

The inclusion of this site seems to be driven by the Councils desire to expend the Bunt Common Junction with the A3 to a full four-way Junction which Highways England appear to be of the view cannot be delivered within the Safety Standards in their Manuals. Resolving this issue will render it impossible to deliver the proposed 450 houses within the first five years since otherwise the increased traffic on local roads will be intolerable and cost lives! The site is not suitable for housing local school and medical facilities will not cope.

Attached documents:

**Comment:** MM41 - LPMM18/6033  **Respondent:** C Sheard 8562561  **Agent:**

**MM41 Transport Strategy**

The Local Plan is proceeding with inadequate traffic modelling that understates the roads infrastructure requirements that will be generated by its excessive housing number and site selection.

Attached documents:

**Comment:** MM41 - LPMM18/553  **Respondent:** Mr David Gianotti 8565153  **Agent:**

I find it both frustrating and disappointing that I need to write once again to object to the latest series of proposals.

Below you will see just some of my comments and thoughts:

MM41

- This land is Green Belt and contains ancient woodland that needs to be preserved;
- Results in significant over development to an area I have lived in for many years for its space, quiet and rural attraction;
• The estimated 800 extra cars will result in gridlock; and
• GP surgeries, schools and hospitals will be strained to breaking point.

Attached documents:

---

Comment: MM41 - LPMM18/557  Respondent: Mr David Gianotti 8565153  Agent:

MM27 MM41 MM42 and MM48

• Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads; and
• No proper assessment of the traffic impact with thousands more cars in the area every day adding to increased pollution, noise, delays and gridlock.

Attached documents:

---

Comment: MM41 - LPMM18/1252  Respondent: Mr David W Lazenby 8566049  Agent:

1. Item MM 41

The previous version of the plan Included some 400 houses, which was excessive for this village and not properly justified. To increase this to 550 is astonishing. The land is Green Belt, which should, be protected. The infrastructure is already over-loaded. At present we sometimes have to wait 4 or 5 minutes to drive out of Sanger Drive onto Send Road. In busy times, particularly in the evening rush (5.00 to 6.15 pm) and traffic towards Woking queues for half a mile into Old Woking. The social infrastructure of medical surgeries, schooling and places for people to meet, would be overwhelmed. I OBJECT to this gross overdevelopment.

1. Items MM41, MM42, MM44, and MM9 and MM48

I OBJECT to the great concentration of development in and around the village of Send. It is neither sensible nor equitable to propose such enormous overloading of one village, when many could share any possible load.

Attached documents:

---

Comment: MM41 - LPMM18/5697  Respondent: David Calow 8567105  Agent:

4. There is no plan to deal with the added congestion development brings beyond hoping other authorities will pay for very expensive new roads.

Attached documents:

Comment: MM41 - LPMM18/5374  Respondent: Miss Edwina Attwood 8568193  Agent:
MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/1945  Respondent: Mrs Fiona Curtis 8570273   Agent: Mrs Fiona Curtis

The impact of development within and outside Guildford has not been thoroughly modeled and that which has been done has not been scrutinised or even fully publicised (an FOI response to my request about traffic modelling was met with the answer that it was not a good use of Council’s time).

The Local Plan is proceeding with inadequate traffic modelling that understates the roads infrastructure requirements that will be generated by its excessive housing number and site selection.

Comment: MM41 - LPMM18/2168  Respondent: G Mansbridge 8571137   Agent:

REF. MM41

LAND AT GARLICKS ARCH, SEND MARSH, POLICY A43

OBJECTIONS: Too many houses for infrastructure to cope with.

Green Belt with ancient trees

Flooding and contamination

REF. MM27, 41, 42 and 48

TRANSPORT STRATEGY

OBJECTIONS: There would be total gridlock at rush hours if this amount of development overall is allowed in our small village.

Attached documents:

Comment: MM41 - LPMM18/5855  Respondent: Mr Gordon Farquharson 8571617   Agent:

MM41 – I support the provision at (0b) and a through vehicular link between the B2215 and the A247 that relieves pressure on the Send Marsh roundabout. I have already commented under MM23

on the importance of an infrastructure strategy for Gosden Hill Farm and I suggest that the infrastructure strategy for Gosden Hill Farm should also include these elements taken from MM41.

Attached documents:
MAIN MODIFICATION MM41 Land at Garlick's Arch, Send Marsh, Policy A43

I object to an increase of 37% from 400 to 550 when two drafts earlier this site was taken out of the plans altogether. The fact that 450 of these houses are planned for the first five years is unacceptable since that figure is based on the now discredited total given in the paragraph above. It is regrettable that all the reasons given by residents earlier have been totally ignored by Guildford Council: it is green belt, ancient woodland, subject to flooding, contaminated by lead shot, would generate between 800 and 100 extra cars which the adjacent roads cannot accommodate and the additional population would strain school and medical facilities to breaking point. It is irresponsible for these very material reasons to be ignored.

MAIN MODIFICATIONS MM27 MM41 MM48 Transport Strategy

I object that consideration of the full traffic implications of all these proposals have received such scant attention. With the neighbouring sites at Ockham and Gosden Hill the aggregate impact on traffic in Send Barns Lane and Send Road have simply not been appreciated, still less calculated. The authors of this part of the plan show all the signs of a lack of familiarity with what they are writing about, including in respect of non-vehicular transport routes. Clearly they do not understand the magnet effect of Woking especially Woking Station. Increased noise and nitrogen dioxide pollution will rise to intolerable levels for people living on those two roads, made worse by the impact of the proposed Clandon slip roads. None of this should happen unless and until an in depth study is made to measure the effects and establish whether there would be any ameliorating solutions. I strongly object to the cavalier approach of Guildford Council that it will sort out these matters later.

Attached documents:

The new housing plan calls for increases to the Garlicks Arch area, adjacent to Send Marsh (MM41) Policy A43 from 400 to 550 homes and reintroduction of 120 homes to Aldertons Farm, Send Marsh (MM44) Policy A63. This latter area was withdrawn from an earlier plan for very good reasons. With Clock Barn (60) and Winds Ridge (40) it adds 770 houses to the 1700 currently in Send and Send Marsh villages, an increase of 45%. More importantly the Garlicks Arch and Aldertons Farm sites are set at each end of the village of Send Marsh which is taking an unrealistic ' Hit of Development ', scheduled for the first five years of the plan on Green Belt Land! This is not sustainable and will put pressure on an already stressed infrastructure.

2) MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years.

7,000 objections to the previous lower number of houses have been ignored.

It is Green Belt land containing ancient woodland.

It constitutes vast over development with Aldertons Farm to the village of Send Marsh.

As is the case with Aldertons Farm it is subject to flooding.

At least 800 cars plus over 200 cars from Aldertons Farm will back up the adjacent village roads.

Again medical and school facilities be strained to breaking point.
At this moment in writing my objection to the Local Plan with many more objections in my head I am beginning to wonder why after all these years I bother to write my objections yet again and still vote for a Conservative Guildford Borough Council! There is in my mind and those of numerous local residents that our very valid concerns continue to be ignored! Stop blaming the Government Inspector and defend our Borough. He clearly has an agenda and that will not enhance this Governments position in this area, one of their strongholds, enough is enough!

Do not let us waste our precious time year after year objecting. You had a plan that meant our previous objections had been ignored and now you pile more insult on our local residents. I am serious that I want the Inspector to know my and our residents feelings on this matter. I would like to think that our Council would be on the side of their residents and not capitulate at the first fence with an uninformed Government Inspector.

Attached documents:

**Comment:** MM41 - LPMM18/1583  **Respondent:** Mr John Sweeting 8579393  **Agent:**

Re: Sites numbered:

A25 – Gosden Hill
A35 – Former Wisley Airfield
A42 – Land at Burny Common Heath
A43 and A43a - Land at Burnt Common – known as Garlick's Arch
A58 - Land around Burnt Common warehouse
A63 - Land at Aldertons Farm

in the revised draft local plan.

I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. There remains considerable uncertainty in the number of houses needed in the Borough. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.
   This view is now confirmed by the recent Office for National Statistics (ONS) prediction that the number of homes needed in the Borough in the plan period is 4662 – a substantial reduction compared to the earlier forecast of 7717. To increase the number of sites – i.e. the addition of site A63 - and to increase the development at other sites is perverse to say the least and simply ignores ONS figures and the wishes of most of the residents to keep the area semirural.
2. With the revised ONS forecast, the requisite number of homes can be met from brownfield sites – as noted by Councillor Susan Park. Continuing with the increased number will result in unnecessary loss of the Greenbelt. This is a tragedy and contradicts policy MM9 as 'special circumstances' necessary for reclassification have not been established.
3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area.
   In particular this could provide the starting link in connecting Guildford to the M25.
   The Greenbelt policy was originally introduced to counteract urban spread and has worked well for many years and there does not appear to be any reason to abandon it at this time as once the space has gone it will never be recovered.
4. These developments place a disproportionate burden on the north east of the Borough.
5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours when additional congestion at the junctions in the vicinity of the A3 is likely.

6. With specific reference to site A63, there is currently less than 100 homes with a frontage on Send Marsh Road, adding 120 homes at this site with access from Send Marsh Road will inevitably increase the traffic and during peak hours is likely to cause serious congestion at both ends of the road and Send Marsh Green.

7. Other infrastructure.
   The Garlick's Arch, Clockburn and Winds Ridge sites are estimated to result in an increase demand of 45% on the infrastructure in that area. Is there adequate power, drainage and sewage provision for industrial development? And are there sufficient school, medical and similar provisions for domestic expansion?

8. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society.
   It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.
   If, despite their adverse impact, the sites continue to be included in the plan, provision should be made for strict control of noise and light pollution emanating from the sites – particularly at night time.

9. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. Examples are Garlick's Arch in particular contains ancient woodlands and even the Aldertons site contains a large mixed hedge. It seems perverse that planning permissions have been refused because of the impact on individual trees whilst the wholesale destruction of woods and hedges seems inevitable if these sites are included.
   It seems difficult to reconcile these two extreme positions.
   If, despite their adverse impact, the sites continue to be included in the plan, preservation orders should be placed on appropriate trees as a minimum requirement.

Comment: MM41 - LPMM18/2245  Respondent: Leslie Brown 8586017  Agent:

The Guildford Local Plan

So once again we have the opportunity to comment on your planning proposals.

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I object to the proposal to increase the number of homes on this site from 400 to 550. I objected to the original proposal and now the number has been increased by 37%. Potentially an additional 1000 residents and possibly about 750 cars to add to the traffic in the surrounding area. Access to both Guildford and Woking would add to the incessant traffic at present at Send Dip and the Burnt Common Roundabout. Send Road is already the main access road between Woking and the M25 carrying heavy goods vehicles and articulated trucks. Today the 20th October temporary traffic lights at the Old Woking roundabout prior to road works in this coming week have resulted in long tail backs in both directions and today is Saturday. The situation will be far worse during the ensuing weekdays. The additional traffic which will result from the excessive building programme in Send will make the situation far worse and in all probability result in gridlock. This is quite apart from the need for additional school places made worse by the recent closure of Ripley School.

Attached documents:

Comment: MM41 - LPMM18/2250  Respondent: Leslie Brown 8586017  Agent:
MM27 MM41 MM42 and MM48 Transport Strategy

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC seem to be intent on joining Send to Ripley and changing them from villages into towns. I am also unclear as to who all this additional housing is for, because there is no industrial development which requires more people to live in the area and the type of housing proposed is not low cost housing which would be affordable to most. Furthermore no mention has been made of the number of people the Council is seeking to provide accommodation for.

Attached documents:

Comment: MM41 - LPMM18/3484  Respondent: Trans Lease Services (Mrs Lisa Scott) 8586625  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The increase from 400 to 550 homes of which 450 to be built in the first five years

- It is Green Belt containing ancient woodland
- An increase of 37% in the number of houses proposed is excessive
- 7000 ejections to the previous lower number have been ignored
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

Attached documents:

Comment: MM41 - LPMM18/3581  Respondent: Linda Parker-Picken 8587105  Agent:

MM41 – Policy A43. At the Public Enquiry, the only reason put forward for increasing the housing number at Garlick’s Arch to 550 was that the developers would be able to help fill quotas in the first five years of the Plan. That is a completely spurious planning argument. The objections to the original 400 houses were clearly expressed: problems with traffic, flooding, contaminated land, disturbance to ancient woodland and the fact that this is Green Belt land. This housing would link Burnt Common and Ripley, which are currently separated by green land. There is an acknowledgement, in the addition of wording at MM41, of the argument that Garlick’s Arch is poorly related as a site to both the existing built form of the villages and the services provided by Send. Send does not have the capacity to service this additional growth in housing. MM17.

Attached documents:

Comment: MM41 - LPMM18/1551  Respondent: Michael R. Murphy 8589953  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43.
I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

This is an increase of 37% in the number of houses to be built and I can only assume that the Conservative Guildford Borough Council are punishing Send for throwing out the Conservative Councillors and electing Green Belt Councillors.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking.

This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

This site is contaminated by many years of Clay Pigeon Shooting and is prone to frequent flooding.

Up to a thousand cars and between 1600 to 1700 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

I am Chairman of our Local Patients Participation Group and confirm that our local Health Centre is already oversubscribed and working in overwhelming conditions.

There is no money to build any extension or employ more health staff.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added?

**MM27. MM41. MM42. and MM48 Transport Strategy.**

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

**Attached documents:**

**Comment: MM41 - LPMM18/2260  Respondent: Mr Michael J Harris 8590209  Agent:**

**Main Modifications to Guildford Local Plan**

I am aghast at the Modifications to the Local Development Plan that you have released for public consultation by 23rd October 2018, particularly in regard to our villages of Send, Send Marsh and Burntcommon.

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

The proposed increase in homes on this site from 400 to 550 is absolutely preposterous, being an increase of 47% on the previous proposal. This site is Green Belt land anyway, and is subject to frequent flooding, apart from which at least some of the site is contaminated by lead shot caused by the firing range on it, which has been in operation for many years. Part of the land contains ancient woodland, which simply must not be interfered with. 550 homes on this site is gross
over development and will cause a further 800 or so cars to be trying to use the adjacent roads, which are over busy already. The local schools cannot cope with such a massive increase in pupils and the Villages Medical Centre will be strained to breaking point with so many additional residents in its area.

Policy A43: Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley

*The Surrey Wildlife Trust maintains its reservation for further representation on the individual development management decisions at this site.*

Attached documents:

**Comment:** MM41 - LPMM18/3225  **Respondent:** Michael Bruton 8591169  **Agent:**

1. MM41. Transport strategy relies on inadequate modelling. In particular the delay of J10/M25 . There is little certainty that J10 enlargement will take place in the foreseeable future.
2. A3. The Plan relies heavily on the chimera of A3 improvements. Any improvements are not controlled by GBC and reflect its wishful thinking.

Attached documents:

**Comment:** MM41 - LPMM18/2342  **Respondent:** Jane Whatley 8595905  **Agent:**

**Objections to modification MM41**

I object to the number of houses you are proposing in our village. The increase in the numbers for Garlick's Arch were very unpopular when first proposed and have now been increased still further. This development will destroy ancient woodland and join Send and Ripley together as one. Ultimately, this is not good for the villages, and means that pressure will be on then to develop further tracts of land which suddenly will fall 'on the edge of the village'. Increasing the size of any village quickly and in such proportion changes them forever.

This development at Garlick's Arch will stretch the infrastructure and facilities to breaking point. Even with the introduction of any new facilities (which will not be in place before the building will be done and are NEVER guaranteed as developers do not stick to their promises), will bring chaos to the surrounding area as new residents, school children and service vehicles commute in and out. Our village is already a busy one, and it takes very little now to bring everything to a halt.

Attached documents:
Comment: MM41 - LPMM18/3924  Respondent: Allen Fencing (Mr Paul Cope) 8598433  Agent:

**MM41 – Garlicks Arch (policy A43)**

The land itself is GREEN BELT, and there are no apparent ‘special conditions’ to exempt it. The land contains ancient woodland, which should be preserved. Many trees carry TPOs (preservation orders).

One key purpose of retaining GREEN BELT is to prevent urban sprawl, and development here would compromise this, essentially linking Ripley to Send/Burnt Common.

The site itself has been subject to flooding in the past, and this should render the site unsuitable for development. The extra traffic generated would be unacceptable for existing infrastructure, which is already bursting at the seams.

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further.

Having closed the primary school in Ripley, there is no tangible capacity for schooling.

We OBJECT to this development and the proposed modification.

Attached documents:

Comment: MM41 - LPMM18/3943  Respondent: Allen Fencing (Mr Paul Cope) 8598433  Agent:

**MM27 / MM41 / MM42 / MM48 – Transport Strategy**

The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).
The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

In summary, the modifications are simply too much for the village of Send and Burnt common, that already suffer from increased traffic and congestion / pollution.

Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’.

ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan.

It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising. A loss of more countryside/Green Belt would exacerbate this.

Abandoning the new A3 slip-road (policy A43a) would save money which could be better spent on other services for existing residents, who pay high levels of Council Tax.

(such measures could include traffic-calming, road repairs and noise reduction)

Attached documents:

Comment: MM41 - LPMM18/5747  
Respondent: Sarah Belton 8598561  
Agent:  

MM41 Fails to address the fact that this site is greenbelt land and contains ancient woodland. This development must not be permitted on these grounds. The Council continues to ignore this without justification, and valid protests from local residents. The persistent increase in housing numbers in each local plan proposal indicates the Council’s disdain for local residents and due democratic process.

Attached documents:

Comment: MM41 - LPMM18/1601  
Respondent: Mr Richard D Jarvis 8599201  
Agent:  

The cumulative effect of the addition development proposed in and around Send on traffic conditions has not been assessed. Further analysis is needed to demonstrate that local roads will be able to cope, or what measures may be required.

Attached documents:

Comment: MM41 - LPMM18/2947  
Respondent: Roger Newland 8600929  
Agent:  

...
With regard to the impact on Send and Ripley I would comment as follows:

**MM41 and MM44** housing on Garlics Arch and Aldertons, Send.

The combined development at Garlic's Arch and Aldertons is disproportionate and will have the effect of nearly doubling the population of the village of Send Marsh with little or no improvements to the infrastructure, notably schools and health facilities. The proposal to add 670 homes (the total of both sites) all within the Green Belt in a five year period will change the nature of Send Marsh as a semi rural village. The impact on Send as a whole and Ripley with regard to traffic will be horrendous particularly if the A3 slip roads North are provided.

It is appreciated that the borough needs smaller affordable properties but the Garlics Arch proposal is environmentally unsuitable for dense development being close to the A3 with attendant noise and air pollution and it will not lead to a sustainable environment for the new residents.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2138  **Respondent:** Susan Greenman 8606081  **Agent:**

Ref:- Local Plan for Send, Surrey.

I am writing once again to strongly object to the Local Plan for Send. I refer below specifically to:-

**MM41 - Land at Garlicks Arch, Send Marsh, Policy A43**

I object to the proposed increase from 400 to 550 homes at this site. This is an increase of 37% which is excessive. 400 homes are too many and over 7,000 objections have been ignored by your council.

This is Green Belt land which contains ancient woodland. This proposed project will ultimately join the now separate villages of Ripley and Send meaning over development.

This site is subject to frequent flooding and contamination.

The potential of another 800 cars on already congested roads is unacceptable.

The current medical and school facilities could not cope with this increase of population.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2143  **Respondent:** Susan Greenman 8606081  **Agent:**

**MM27, MM41, MM42 and MM48 - Transport Strategy**

The traffic implications on Send from the proposed plans for Garlick's Arch, Burnt Common, Clockbarn and Aldertons added to nearby Gosden Hill and Wisley/Ockham are not being taken into account re the changes to the A3 and Clandon slip roads.

The impact from these developments on Send Barns Lane and Send Road will be huge. The roads in Send are already totally congested particularly during rush hour in the morning and evening. Send Road is now one of the main roads from Woking to the M25. Also from Guildford to Woking.
The increase in traffic will cause more chaos, noise, nitrogen dioxide pollution, gridlock and hazards.

Potters Lane, Send has now become a "Rat Run" in the morning and evening. Traffic starts at 5am and when there are problems on the northbound A3 (which is frequently) the traffic diverts down Potters Lane. This lane is in its name a "LANE" not a major road. It is narrow and has many bends some of which are blind and very dangerous. I have encountered huge lorries and it is only a question of time before there is a major accident and fatality. The Police I believe want this Lane shut off from the A3 due to the many accidents when drivers think it is the Ripley exit slip road. In fact there is now traffic using Potters Lane constantly all day long and throughout the night - often by taxi drivers.

I have written many times to the appropriate Councils and authorities on this specific problem - to no avail. We just have to wait for the accidents.

The increase in noise and pollution for the local residents in the Lane, is now a serious problem.

---

Comment: MM41 - LPMM18/899  Respondent: West Clandon Parish Council (John Stone) 8609217  
Agent:

Guildford Submission Local Plan: Strategy and Sites - Main Modifications

Thank you for the opportunity to respond to the consultation on the above.

West Clandon Parish Council has very grave concerns about many of the proposed main modifications within the proposed plan and the subsequent impact on increased traffic problems on The Street, West Clandon (A247) which is already totally inappropriate to be classed as an A road and experiences many difficulties.

The road does not have the capacity to carry the expected increase in traffic. Problems already include:
1. The sharp bend at the Lime Grove junction with The Street (A247) where traffic routinely exceeds the 30mph limit.
2. The dangerous junction with the approach road to Clandon Station where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump.
3. The site lines for the exit of the Onslow Arms car park.
4. The narrowness of the road near Summers.
5. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement.
6. The sharp bend near Clandon Regis.
7. The narrowness of the road at the Bull’s Head Public House.
8. The speed of traffic past Clandon Junior School and in places the narrow footpath for children walking to school.
9. The sharp bend with poor sight lines in either direction at the Church.

---
10. The lack of a continuous footpath through the length of the village
11. The speed of traffic
12. The classification as an A-road without it having the capability of an A-road.

Our concerns also include the following:

Policy S2 MM2
We believe the OAN included in the Plan may be overstated. We note the latest ONS household projections and current uncertainties over the methodology to be used in the calculation of the OAN. These issues must be fully explored and outstanding issues resolved before the housing need is finalised if we are to have any confidence in the figure adopted.

We also object to any unmet need for housing in the Woking area being added to the Guildford Plan when the review of the Woking Plan provides an alternative mechanism for correcting any shortfall within the Woking area.

Guildford has been obliged to introduce additional green belt sites in the early years of the plan. Should these prove to be unnecessary, Green Belt will have been damaged without good reason.

There will be greatly increased traffic flow because of the following modifications:

1. MM41. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247.
2. MM35 The development of 1800 houses at Gosden Hill.
3. MM44 The development of 120 houses (new site) at Alderton’s Farm, Send Marsh.
4. MM42 The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic.
5. A43a The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247. We object to the proposed opening of the Burnt Common Rds as this will direct additional traffic along an unsuitable road. In any event this should not be considered until the A3 widening is completed.

As an alternative to access to the A3 at Burnt Common further consideration should be given to South facing slip roads at Ockham Park which will have less negative impact on unsuitable local roads.

In any event Policy ID2 (MM27) generally gives insufficient assurance that developments will not be allowed before the A3 widening scheme is committed in that it appears to allow a series of incremental developments each in itself unlikely to make an already difficult situation much worse. Cumulatively we are concerned that the severe impacts envisaged will occur by stealth.

We are pleased to see allowance made for environmental and traffic mitigation measures on the A247 through Clandon. Funding for this scheme is specifically linked in the Plan to MM41 Garlicks Arch and MM42 Burnt Common. Other schemes likely to have an impact on the A247 include MM35 (Gosden Hill) and A35 (Wisley Airfield) which do not have such a condition at present. This should be rectified in the final plan.

We note however, that while it may be possible to implement measures which have a positive impact on traffic speed and vehicle/pedestrian safety there is no easy solution to the problems of increased traffic volume that the above developments will produce. The development of Park Lane/Merrow Lane as an alternative route to the A3 and the improvement of the Railway Bridge at Merrow Park remain the only long-term solution and provision for a future scheme should be included in the Plan.

Attached documents:

Comment: MM41 - LPMM18/1060  Respondent: Allan Howlett 8656417  Agent:
Transport strategy MM27, MM41, MM42, MM48

The proposed developments will add to the already overcrowded roads, where journeys take far longer than necessary. Most residents now have to factor in the probability that there will be delays.

The road network is in desperate need of a major maintenance programme. In Send the surface at the traffic light intersection has completely broken up with holes appearing in all approaches. This non slip surface has broken down, wasted money, poor design. Or too much traffic?

The bridge over the A3 on the Clandon road has had the road surface pushed into the kerb resulting in large undulations that force motorists into the middle of the road.

Priority should be given to getting existing roads into a reasonable condition over the building new developments that will only increase traffic and make the matters worse. Most roads in the areas have kerb stones, and service covers dislodged and numerous potholes.

Who decides what a reasonable time is to queue on the roads into and out of Guildford and Woking getting to and from work. What is the environmental impact of thousands of cars, lorries and busses queuing every morning and evening polluting the atmosphere, wasting fuel and residents and commuter’s time?

**Attached documents:**

**Comment: MM41 - LPMM18/1065  Respondent: Allan Howlett 8656417  Agent:**

M41 Garlick's Arch

This development has no immediate affect on where we live, but will bring additional traffic to the area. As it is a remote development I have yet to see anyone addressing the problem of supplying new infrastructure, ( mains services, schools, medical facilities, etc.), to this project and who will bear the costs. Will it fall on local taxpayers to put in the required infrastructure.

The A3/M25 interchange is already congested on and off every morning,

At least new residents will be able to access the main supermarkets up and down the A3 in Guildford, Brooklands and Cobham, but only will further increase congestion on the A3.

I confirm that I have a general objection to these proposals and specific objections to the modifications, which I do not consider as minor, MM9, MM27, MM41, MM42, MM44, and MM48

**Attached documents:**

---

**Comment: MM41 - LPMM18/3771  Respondent: Victoria Sinnett 8667713  Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Attached documents:**
10 I object to Send being overwhelmed with huge housing estates, which will require residents to commute in thousands of extra cars in the narrow roads of Send, Ripley and Horsley. The schools and surgeries locally will not be able to accommodate so many extra people.

Attached documents:

MM39-45

Object No need for additional sites particularly those in the green belt.

MM41

(1) I object to the increased number of homes

(Oa) I object. This proposal is too dangerous.

(Ob) I object due to the disruption to other residents

(Oc) I object because I do not understand the meaning of this phrase

Attached documents:

Object to the proposed increase in number of houses to 550 - this is excessive for the site and overdevelops the area and infrastructure. The ancient woodland contained within this site makes it unsuitable for this scale of development and should be preserved as per national guidelines. This land acts as a buffer between Send and Ripley and in combination with MM44 will effectively join the 2 villages.

Attached documents:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments
This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:
My objections relates to the Main Modification to the proposed development for Send.

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

In spite of previous objections by numerous residents, this has been increased from 400 to 550 homes of which 450 to be built in the first five years. An increase of 37% in the number of houses proposed is excessive.

Approximately 7,000 objections to the previous lower number have been ignored and proposed development continues to increase in scale. My objections are on the basis of:

- This is Green Belt containing ancient woodland.
- Send and Ripley villages will be joined and this constitutes over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will cause congestion in the adjacent roads which are not designed to cope with this scale of traffic
- School and medical facilities will be strained to breaking point; to this point I have seen no plans to increase the capacity of these services

**Attached documents:**

**Attached documents:**

---

**Comment: MM41 - LPMM18/1896  Respondent: Brian Wolfe 8792193  Agent:**

MM41 The transport strategy for this site at Send and that at Wisley relies on the inappropriate use of traffic modelling initially used in the failed planning application for the development at Wisley. It was not possible to challenge the data used in the modelling as no current data was provided. Earlier version where challenged by SCC and HE which has now resulted in HE & GBC agreeing that a **new model** needs to be developed to determine the true picture for both LRN and SRN. This clearly indicates that current decision made around these 2 key sites in terms of transport infrastructure and their inclusion in the Local Plan are premature and can only be included in the plan with a suitable caveat.

MM41 There is too much reliance on the improvements for the Guildford stretch of the A3 the Wisley section of the A3 and the M25 junction 10 all of which impact on the time table for the above sites.

**Attached documents:**

---

**Comment: MM41 - LPMM18/445  Respondent: Janet Manktelow 8793025  Agent:**
We wish to object in the strongest possible terms to the latest modification proposed for Send, Send Marsh and Burnt Common area.

The residential implications of the increase in housing for our village represent a 37% increase over current numbers which is unacceptable. Our village would be swamped without better infrastructure changes, more shops, schools etc. In fact a school in Ripley has closed this summer which will increase the challenges faced locally and this would in turn change the character and image completely.

**MM41**

We had already objected to the plan to put a large development on the lad at Garlick’s Arch. The very fact that the number of dwellings has been increased so dramatically by 150 to 550 dwellings beggars belief. The land contains Ancient Woodland and is on the Green Belt. There are no exceptional circumstances as to why this development should be permitted. Some of the land in this area is prone to flooding. The land is well used for field sports.

Schools in the area are already heavily populated and the medical centre is working to capacity. The increased vehicles this development will bring will merely exacerbate the traffic problems in the area as no changes are proposed for the local feeder roads.

If this development should happen there will be no tangible break between the villages of Send and Ripley.

Additionally the four way junction for the A3 in this vicinity will bring more complications.

**Attached documents:**

**Comment:** MM41 - LPMM18/449  **Respondent:** Janet Manktelow 8793025  **Agent:**

**MM27, MM41, MM42 and MM48 Transport Strategy**

The traffic changes for this village are hideous. The situation of the 4 way junction will pile on the traffic nightmares for local people. No changes are planned to relieve congestion in the surrounding villages which already suffer congestion every day. The current A3 is blocked every morning and evening. Adding a four way junction will do nothing to relieve this situation. Any slight accident blocks within minutes and takes hours to clear.

**Attached documents:**

**Comment:** MM41 - LPMM18/1381  **Respondent:** Mr Paul Tubman 8794529  **Agent:**

The proposed increase of 37% in the number of houses in the Garlick's Arch development from 400 to 550 is excessive. This will further exacerbate the increased demands on the road infrastructure in the area, and put more pressure on the already stretched schools and medical facilities in the area.

This development together with the increased size of the Burnt Common development (MM42) and the proposed development at Gosden Hill Farm (Policy A25) will result in the Send becoming part of the extended Guildford conurbation. This will change the local character of the area and goes directly against Policy D1 (6) in MM23 which states 'All new development will be designed to reflect the distinct local character of the area and will respond and reinforce locally distinct patterns of development.'
The total new housing proposed for Send when including Garlick's Arch, Winds Ridge (40), Clockbarn (60) and Alderton's Farm (120) (MM44) adds 770 houses to the 1700 currently in Send, increasing the total development by 45%. This is an unreasonable increase and the local traffic, educational and medical infrastructures will not be able to cope.

I object to this increased size of development at Garlick's Arch.

Comment: MM41 - LPMM18/4589  Respondent: Timothy Bruton 8803617  Agent:

I further object to the modifications as I think they will cause a dangerous increase in traffic. Neither the Alderton’s Farm site (MM44) and Garlick’s Arch (MM41) have good public transport or cycle paths and the pavements along Send Marsh Rd are very narrow so there would be an inevitable increase in the number of car journey’s to and from these sites. The Alderton’s Farm site had previously been rejected as unsuitable.

Furthermore for Garlick’s Arch there are no amenities planned for this site and there is only a convenience store and a farm shop some distance away requiring car journeys. Send school is on the A247 and there are already safety concerns about parking and children crossing the road so extra traffic would increase this danger.

I also object to the allocation of industrial premises Burnt Common. This site has been previously rejected as unsuitable by GBC.

To exit this site it is necessary to go South along the Old London Rd (B2215) and the to turn right along a narrow strip then right again onto the north bound slip road off the A3. This is presently very dangerous as traffic leaving the A3 have very little time to see and slow down for lorries leaving the distribution centre and crossing on to the north bound A3 slip road. Extending the site would make this an even more dangerous hazard.

Attached documents:

Comment: MM41 - LPMM18/948  Respondent: Wellesley Theodore Wallace 8803841  Agent:

Policy A43 : Land at Garlick’s Arch (MM 41)(MM 42)(MM 48)
The allocation for homes should not be increased from 400 to 550; even 400 homes is excessive. The additional allocation fails to pay proper regard to paragraph 154 of the NPPF and to ID3(1), (2)(c) and (7).

Requirement (Oe) under "Transport Strategy" recognises "the otherwise adverse material impacts on communities and the environment including in … West Clandon". This clearly refers to traffic on the A247. The Response of Surrey County Council ("SCC") to the 2014 Draft Plan included "the A247 is a very heavily trafficked A class road and carries a very heavy proportion of HGVs". This is significant coming from the Highway Authority. The current level of traffic including HGVs has certainly not lessened since 2014.

The additional traffic resulting from 150 more homes on Site 43 can only accentuate the "adverse material impacts", particularly in view of the commercial and goods traffic generated under Policy 58 which specifically refers to "storage and distribution". It is inevitable that a material proportion of the additional traffic will travel south along the A247, if only to avoid the junction of the A3 with the M25 and the M25 itself.

The Assessment by MK of Transport Impacts at para 2.3 forecast that the additional housing at Garlick’s Arch would result in 24 additional movements in the AM peak hour and an additional 25 in the PM peak hour and stated, "Additional mitigation may be required on the local road network where the impact will be at its highest." The forecast of only 24 or 25 additional movements at the peak hours generated by 150 additional homes seems remarkably low.

Requirement (Od) specifies a "contribution towards an off-site walking and cycle network to the village centre of Send, the Burnt Common Warehouse site and Clandon railway station".

Traffic management and environmental improvement on the A247 are also covered at Infrastructure Project LRN 26 to be delivered by SCC with the likely cost of £1m to be developer funded. There is no detail of what traffic management or mitigation is envisaged. It is not clear whether separate cycle lanes would be required in each direction or whether cycle lanes would be shared with pedestrians. It is difficult to see what traffic management or mitigation is practicable or indeed possible, particularly on Clandon Road and The Street.

The A247 is clearly not wide enough to accommodate even one cycle lane and road widening would involve extensive compulsory purchases, since, apart from the field between the bridge over the A3 and Green Lane, there is housing on both sides of the road. It would also involve felling many fine trees which contribute greatly to the character of West Clandon all of which is in the Green Belt. Most of the A247 only has a footpath on one side of the road, often quite narrow. When walking from the A43 site to the station it is necessary to cross the A247 four times.

The requirements at (Od) and (Oe) are devoid of any effect because the are in practice incapable of being met and therefore they do not comply with ID3(1),(2)(c) and (7).

Paragraph 154 of the NPPF states that Local Plans should be realistic. It includes the following, "Only policies that provide a clear indication of how a decision maker should react to a development proposal should be included in the plan". Policy A43 does not meet this requirement. ID3(10) is not sufficient.

The Statement of Common Ground dated 3 July 2018 signed on behalf of the Council and the developers during the public examination states at paragraph 10 that Site 43 "can be accessed by sustainable modes of transport including a well-established pedestrian network that incorporates pedestrian crossings on key desire lines" and bus routes 462/463 which follow routes incorporating Clandon Station. In fact there are no crossings at all between Site 43 and Clandon Station; further, since 1 September 2018 there have been no Sunday buses and during the week there are only seven buses daily arriving at the station from Burnt Common, the earliest being at 0759 and the last at 1857, and only five buses daily passing the station towards Burnt Common, the earliest being at 1005 and the last being at 1740; these buses are at intervals of at least two hours. SCC observed in 2014 that there was "a very limited bus route" along the A247. Although the September 2018 version of the Local Plan lists under "Opportunities" at (3) "improve bus frequency", any improvement would have to be dramatic to merit the description "sustainable mode of transport".

Attached documents:

Comment: MM41 - LPMM18/6098  Respondent: Alena Thomas 8805633  Agent:

3. The Plan covers housing, industrial sites and other construction of buildings in some detail, but gives very little attention to the issue of infrastructure to support this development. Schools and medical facilities will need to follow and more thought should be given to how these can cope with demand. Where will the children go to school? Where the education providers been consulted on the influx of children? Let me guess…no. How the medical centre will cope? Nothing of it is explained in the plan, no opinion of the relevant specialist is provided. NONE.

*Roads* on the other hand are something it's very difficult to imagine coping with the suggested levels of new build, however you choose to plan them.

It is ludicrous that your “research” suggests the increase of 3% of traffic will follow. Maybe at 11 o’clock in the morning when granny drives to the shop, but not when 1500 additional cars join the local roads to get to work, children to school and so on.

Roads are already clogged: Send residents in the last few weeks have had roadworks with temporary traffic lights in two adjacent spots on the Portsmouth Road between Ripley and the A247 roundabout, and one on Send Road, plus the closure of Tannery Lane - these are all within half a mile of each other and have made it almost impossible to get anywhere, but they are just a tiny very local and current example of how the existing roads creak under the burden of existing traffic. The road into Guildford (crucial for all those new commuters you'll be creating) are far worse. Your proposals will add around 770 new houses to an area with about 2,000 in it at present and which already experiences these difficulties - do you honestly think sufficient roads can be built to carry the extra traffic without completely tearing up the local countryside?

**MM27 MM41 MM42 and MM48 / Transport Strategy**

Proposed changes to the A3 and the Clandon slip roads (document 003a, sections 11.14 to 11.34) will help to feed traffic more quickly into the local road system - what then? Jams will feed back onto the major roads and cause massive problems for both local and longer-distance motorists. Remember my remarks in the beginning of the letter, yes, it was me standing in traffic trying to get on time to RSH for work.
GBC's assessment of possible solutions to this is extremely superficial - it's easy to write a few sentences promising infrastructure will follow but this is a real problem to which there won't be an acceptable solution: a proper amount of infrastructure to cope with this amount of development will devastate the green belt and destroy the character of the area. Will make the life of existing and new residents miserable, extend commute time and pollute the air.

Your current document suggests (Appendix 11.4 of GBC Responses to Matters, Issues and Questions reference 003b) that the increase in morning traffic on the A247 Send Road will be just 3% - after adding nearly 40% to the housing stock of the village. The estimate is out by an order of ten and as far as I am concerned is just plain falsification.

**Attached documents:**

**Comment:** MM41 - LPMM18/6099  **Respondent:** Alena Thomas 8805633  **Agent:**

**Specifically, I object to the current proposals on the following grounds:**

*MM41 Land at Garlicks Arch, Send Marsh, Policy A43*

The Garlick's Arch proposals (document 003a sections 11.36 to 11.37) will bring Send, Ripley and surrounding areas to a standstill, *even if* new roads are built cutting through more of the green belt - and these plans have been considerably enlarged since that time (550 houses instead of 400). The area also contains ancient woodland and is unsuitable for other reasons including frequent flooding.

**Attached documents:**

**Comment:** MM41 - LPMM18/4817  **Respondent:** Gaenor Richards 8813601  **Agent:**

**MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.**

**Attached documents:**

**Comment:** MM41 - LPMM18/5207  **Respondent:** Celia Howard 8817121  **Agent:**

**MM41 policyA43/  
MM42 policy A58  
MM44policy A63  
MM9 Green belt policy  
MM27/MM41 /MM42/MM48  
I write to object to the local plan for Send**
I feel for all the sites in this area no consideration appears to have been given to the congestion on local roads, school places, parking and the medical centre where it's difficult to get an appointment and this is now (looking further afield the parking and appointments at the Royal Surrey are also hard to come by)

I think the council should think carefully before wiping out the green belt and turning another Surrey village into suburbia a corridor from Guildford to Woking

We need to keep the small pockets of countryside for the wildlife and our health benefits instead of increasing the pollution in the village

Attached documents:

Comment: MM41 - LPMM18/755  Respondent: Irene Cope 8817185  Agent:

I am once again writing to object to plans for the local area around Send and Ripley. The suggestions for the local area are madness which would destroy the environment around both Send and Ripley

My first objection is the planning of Garlicks Arch [Reference no. MM41] the ancient woodland here will be destroyed and the extra volume of traffic this would produce is ridiculous. Even with the expected expansion of the M25/A3 junction and the developments around the local area the roads would be unable to cope with the extra traffic. Local people’s opinions are very important and it is disappointing that thousands of objections have been ignored by Guildford Borough Council.

Attached documents:

Comment: MM41 - LPMM18/2115  Respondent: Mrs. (Mrs. Kim Meredith) 8817537  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I object to the increase in housing from 400 to 550.

This land is Green Belt, ancient woodland and should not be built on.

The development of this land will join up Send and Ripley causing loss of identity.

The village schools and the medical centre will not be able to cope with the huge increase in population. They are already full to capacity.

The local highway infrastructure is not able to cope with the traffic we have at the moment, never mind an increase in traffic by over 800 cars from just this one site, let alone all the other sites proposed for Send and surrounding areas. This would cause traffic gridlock and total misery to anyone trying to use the roads.

The increase of between 1600-1700 extra people will completely overwhelm all the local amenities and facilities including sewage and water.

MM27 MM41 MM42 and MM48 Transport Strategy
Implications to traffic increasing to thousands more cars using our local roads and causing complete chaos, gridlock and air pollution have not been addressed. I therefore object and wish for more effort to be used to sort this major problem out.

Attached documents:

Comment: MM41 - LPMM18/5144  Respondent: Julian Masters 8818433  Agent:

MM41 Garlick's Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/2707  Respondent: Alan Robertson 8819265  Agent:

- MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43 – Garlicks Arch; MM44 – Aldertons Farm].
- There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/420  Respondent: Mr Howard Turner 8819457  Agent:

I object to the increase in the number of proposed dwellings on an already inappropriate Green Belt site.

The proposed development is on land designated as important grade 2 agricultural land and ancient woodland, forming part of the Green Belt. The development would be completely isolated from the village community and bounded on all sides by busy highways which would ensure that the residents of such a development would have no contact with the adjoining village of Send Marsh/Burnt Common.

Send Marsh/Burnt Common has no infrastructure (doctors, schools, shops or road capacity) to support the proposed increase in population.

The character of the villages of Send, Send Marsh/Burnt Common, Clandon and Ripley would all be adversely affected by the proposal. Air and noise pollution are already unacceptable and this would be detrimentally and proportionately increased with an increase in the number of dwellings proposed. The currently open vista from the A3 would be adversely affected and not alleviated by the proposed screening of trees due to its sloping land profile.

| • MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43 – Garlicks Arch; MM44 – Aldertons Farm].
• There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale. |
| **Attached documents:** |
**I object to MM41,MM42,MM44,MM9, MM27, POLICY S2.**

At the public examination, the figure for Guildford Borough housing need used by the inspector was 789 per year. This figure was obtained by Guildford Borough Council (GBC) Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated. The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year. In addition, using data from the Office of National Statistics population forecasts, suggests that the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of GBC consultants figures which have always been very suspect. I believe the number of houses per year to be unreasonably high, and that the actual figure should be revised downwards for more responsible and reasonable levels of development.

**Attached documents:**

---

**I object to MM27, MM41, MM42 and MM48 Transport Strategy.**

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful way addressed by the Road changes of the A3 and Clandon Slip Roads. This massive increase in traffic heading to and from Woking along Send Barns Road and Send Road, which are single lane roads, will cause horrendous noise, air pollution delays and gridlock. I live just off Send Road on Wharf Lane and find the road is already congested during rush hours. Additional development to the scale described in the plan would undoubtedly result in significant increased congestion, air and noise pollution and very real decrease in quality of life for Send’s residents.

**Attached documents:**

---

**I object to MM41 Land at Garlicks Arch, Send Marsh, Policy A43.**

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years. This is an increase of 37% in the number of houses to be built which was already very high for this site, which shouldn’t have any such development on it to begin with. Despite the promises by developers and GBC, the ancient woodland on the site will be ruined. Ancient woodland has been around since at least the time of Henry VIII or even much older, and are the natural environment’s equivalent of a Grade I listed property. We wouldn’t tear down a Grade I listed building to build new homes, we should not destroy ancient woodlands to build new homes.

This over development will effectively join Ripley to Send and add to creeping sprawl by connecting the separate villages.

Parts of this site are prone to frequent flooding and should therefore not be used for housing or building development.
Up to a thousand cars and between 1,600 to 1,700 extra people will create huge amounts of congestion on surrounding roads and overwhelm the already full to capacity schools, health facilities and transport, sewage and water infrastructure. This development will add approximately 2,500 additional car journeys daily on local roads, a huge number for the currently already congested A247 and B2215.

Why have over 7,000 objections to the earlier plan been ignored and more houses and development added? It makes a mockery of the consultation process.

As a parent of a child about to start school, I have visited several schools and know that local schools are already full or oversubscribed. Our medical facilities are already stretched and I do not believe that the thousands of new residents for this size of development can be accommodated without severe strain on local infrastructure. I have not seen any creditable plans to increase provision for local infrastructure, which makes all the proposed developments very unsustainable and irresponsible.

Attached documents:

Comment: MM41 - LPMM18/5174   Respondent: David Burnett 8839553   Agent:

Re: MM41 – land at Garlicks’ Arch, Send March Policy A43

I OBJECT to the modifications to the local plan.

This site has increased from 400 to 550 homes, of which 450 are to be built in the first 5 years.

This increase of 37% in the number of homes is excessive. 7000 objections to the previous proposal have been ignored.

This is Green Belt and includes Ancient Woodland, which should have protected status under both the previous and current NPPFs. The inspector queried how residents would arrive to Guildford by public transport and I wonder the same - the road network will be too busy to reach central Guildford in a timely manner by bus and to reach Clandon station is too far to walk and there are no bicycle lanes.

This will join the communities of Send and Ripley, and thereby breach one of the key functions of GreenBelt.

The site is not suitable for housing: it is subject to frequent flooding and is contaminated by former uses.

The burying of overhead electrical cables is costly.

The air pollution from the A3 which is adjacent will cause lung issues for residents.

At least 800 extra cars will block adjacent roads, and school and medical facilities will not cope.

Attached documents:

Comment: MM41 - LPMM18/1579   Respondent: David K Reynolds 8840193   Agent:

MM41 The Transport strategy and inadequate modelling does not take in to account Highways England 2 year delay to junction 10, this this affects sites A35, A43 & A44.

Attached documents:
**Comment: MM41 - LPMM18/2011  Respondent: Brendan McWilliams 8840353  Agent:**

MM41  **Garlick's Arch** should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Attached documents:**

---

**Comment: MM41 - LPMM18/3815  Respondent: John F. Wood 8852289  Agent:**

MM41: The council's plan relies too heavily on improvements to the A3. These are beyond their control and there is no fixed timescale.

MM41: It appears that GBC's transport scheme relies on insufficient modelling, especially the problems at Junction 10 of the A3/M25 interchange. Highways England RIS scheme of at least 2 years will have huge impact on this and all development that relies on these improvements, such as MM41, Site A43 (Garlick's Arch) and MM44, Alderton's Farm.

**Attached documents:**

---

**Comment: MM41 - LPMM18/184  Respondent: Mr Charles Gibson 8853025  Agent:**

My name is Charles Gibson and [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] I wish to object to the following proposed modifications:

**MM 41 Land at Garlicks Arch Policy A43**

- An increase of 37% in the number of houses proposed (from 400 to 550) is excessive
- This with other sites proposed in Send will add 770 houses to the current 1700 in Send. An increase of 45% is too much for one village to bear and will totally destroy the village feel of Send, its amenities and infrastructure
- The site is within the Green Belt and contains ancient woodland. It is subject to flooding
- Over 7000 objections were received by your council to the original number of houses. The views of local residents has totally been ignored
- The development (coupled with MM44) will join up the distinct and separate villages/communities of Ripley, Send Marsh and Send to the detriment of all three
- The increase in the number of units will put undue pressure on local roads and particularly Send Barns Lane and Send Road
• There is no provision for increased school places (and indeed further pressure on school places has resulted from the closure of Ripley Primary School) or for an increase in medical facilities which are at present fully subscribed

Attached documents:

Comment: MM41 - LPMM18/189  Respondent: Mr Charles Gibson 8853025  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

• The traffic implications for Send and Send Marsh as a result of the above modifications are not addressed by the A3 changes and the proposed Clandon slip roads. Indeed the traffic on Send Barns Lane and Send Road will suffer an increase not merely on account of the proposed new housing but also as a result of traffic and particularly commercial traffic using these new slip roads to access Woking rather than at present accessing Woking via Guildford
• No proper assessment has been made by the Council to any od the prosed development yet alone the modifications. Increased noise and pollution will add to the inevitable delays and gridlock on local roads

Attached documents:

Comment: MM41 - LPMM18/1007  Respondent: Desmond McCann 8854785  Agent:

Re GUILDFORD LOCAL PLAN

I wish to object to the modifications to the Guildford Plan. I hope this time there will be more regard taken of local views especially as it now seems that local housing requirements have been overestimated.

MM41 Land at Garlicks Arch, Send Marsh Policy A43

I strongly object to this development:

• It will destroy ancient woodland and create ribbon development from Ripley to Send thereby damaging the integrity of the two villages which go back to the time of Domesday and before.
• The new homes proposed take no account of the infrastructure required to sustain them. Both the school and the medical centre in Send are at capacity - not helped by the closure of Ripley School.
• The local roads are already very busy and 550 homes would mean thousands of extra car journeys - increasing congestion and pollution.
• If new slip roads onto the A3 go ahead this will attract many extra cars through Send and Clandon which are already too busy More cars will also only exacerbate the A3 at Guildford which gridlocks every day as it is.

Attached documents:

Comment: MM41 - LPMM18/1888  Respondent: Mrs Mary Teague 8855425  Agent:
MM41: The modelling for the Transport strategy remains inadequate, including in its complete failure to take into account the impact of a delay of at least two years in the Highways England RIS scheme.

Site A35: I support the representation made by the Wisley Action Group (WAG).

2. There is too much reliance on A3 improvements and they are beyond the council's control.

9. MM41 Transport Strategy

Traffic is already at intolerable levels causing congestion, delays and damage to the environment and to business, the extra housing with limited new infrastructure will make life in and around Guildford intolerable.

Attached documents:

---

**Comment:** MM41 - LPMM18/5889  **Respondent:** Claire Yates 8859585  **Agent:**

MM41 – Policy A43. At the Public Enquiry, the only reason put forward for increasing the housing number at Garlick’s Arch to 550 was that the developers would be able to help fill quotas in the first five years of the Plan. That is a completely spurious planning argument. The objections to the original 400 houses were clearly expressed: problems with traffic, flooding, contaminated land, disturbance to ancient woodland and the fact that this is Green Belt land. This housing would link Burnt Common and Ripley, which are currently separated by green land. There is an acknowledgement, in the addition of wording at MM41, of the argument that Garlick’s Arch is poorly related as a site to both the existing built form of the villages and the services provided by Send. Send does not have the capacity to service this additional growth in housing. MM17.

**GUILDFORD LOCAL PLAN OBJECTION**

I refer you to my comments submitted in my letter of 18/7/2016. The proposed revisions to the Local Plan not only disregard the serious social, economic and environmental objections that I and many other local residents have raised, the increased numbers of houses and industrial area grossly exceeds the strategic errors in the previous plan.

I am gravely concerned about the integrity of Guildford Borough Council planning intentions to the village of Send. The increased proposals are heavily loaded on our community. This appears to be politically motivated because Send residents replaced our two previous Conservative councillors with independent councillors. There appears to be a deliberate intention to dump excessive development in Send, or that the Planning Council have deliberately ignored the representations of our Councillors. It is a grim reflection on the integrity of all those direction the planning policy of Guild Borough Council.

I am also concerned that green belt land in the village is I understand owned by a member of the Government. Although not identified in the current plan the proposed urbanisation and relaxation of Green Belt boundaries of the Parish of Send potentially increases the development potential and land value of this site. Was this ownership known to the Inspectors team when they proposed to intensify the scale of development in the revised local plan? This raises question about the integrity of the current planning process.

The housing supply in Send has been recently compromised by the decision of Vision Engineering to abandon its commitment to replace its old factory site with residential housing. Instead it has sub-let the old factory for other commercial and industrial use.

It appears that the original planning consent for the new Vision Factory omitted the condition that the old factory should be demolished once the company moved to the new factory. This appears to be a grave and curious planning omission. Furthermore the Council appears to have taken no action about this change of land use in the village.

These changes must be taken into account in reassessing additional residential and industrial use in Send’s Green Belt. Additional industrial use has been tacitly granted. The opportunity for 50-70 or more new residential properties has been discarded. The revised plan should be amended accordingly.

For all these reasons I suggest that the transparency of the Local Planning process as it affects Send is now in grave doubt. The Council should be prepared for formal legal challenges and investigation.

**Regarding MM41 Land at Garlics Arch, Send Marsh, Policy A43**

As I described in my previous letter the site at Garlics Arch, adjacent to the derestricted A3, is unsuitable for new residential development because of the severe noise and environmental pollution of the A3 corridor. These environmental conditions are likely to affect the physical and mental health of residents, as in many other traffic regions.

Guildford already has a shameful reputation for locating a traveller site adjacent to the Blackwater Valley highway. To locate further traveller sites adjacent to the A3 is scandalous.
In accordance with national planning policy there should be at least a 100 metre buffer zone between the A3 and any new residential development at Garlic’s Arch.

For this reason the original proposal for 400 properties plus traveller or circus accommodation was not appropriate. To increase this to 550 is utterly irresponsible and may even justify a Human Rights action on behalf of any Traveller sites intended within 100 metres of the A3.

Re: Guildford Local Plan Main Modifications - Send / Burnt Common

Please see my following comments regarding the modifications to the draft plan for Send / Burnt Common:

- MM41 I OBJECT to the proposed increased by over a third of the number of houses to be built on the land at Garlick's Arch. No exceptional circumstances exist to develop this beautiful site with an area of ancient woodland; an area that is also subject to frequent flooding. The surrounding roads cannot cope with the additional traffic that would be generated by the 550 planned homes. Development here would join up the villages of Ripley and Send which defeats the key objective of the Green Belt. Destroying the trees and greenery which help absorb noise and air pollution from the A3 will mean higher pollution in our villages. There were 7,000 objections to the previous proposal of 400 houses yet these objections seem to have been totally ignored and the number increased.

Attached documents:

**Comment:** MM41 - LPMM18/1982  **Respondent:** Sean Gilchrist 8875969  **Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

---

**Comment:** MM41 - LPMM18/5387  **Respondent:** Judith Allen 8880353  **Agent:**

MM41 The transport strategy relies on inadequate modelling including including the delay to J10 of theM25 of at least two years and will have an impact on all development which relies on schemes such as Garlicks Arch. There is too much reliance on the A3 improvement scheme, the timescale of which GBC has no control.

Attached documents:

---

**Comment:** MM41 - LPMM18/2123  **Respondent:** John Telfer 8880385  **Agent:**
Further to my previous objections to planning proposals this letter is to object to the latest modifications of the Local Plan etc.

MM41 Land at Garlick's Arch, Send Marsh, Policy A43

The proposed increase from 400 to 550 houses comment be justified and is excessive because it contradicts the latest Office of National Statistics that it has overestimated demand for housing by 25%

Previous objections have been totally ignored and is contradicting to Green Belt Policy (MM9).

[unreadable text] destruction of established woodland contradicts government policy to retain and increase woodlands and to provide a breathing space between Send and Ripley.

The high tension electricity transmission lines will require a maintainence corridor which cuts light through any proposed development [unreadable text] at the developers expense.

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/2389  Respondent: Marianne Pascoe 8896961  Agent:

I am writing to OBJECT to the local plan Main Modifications as outlined below:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years

- An increase of 37% in the number of houses proposed is excessive
- 7000 objections to the previous lower number have been ignored
- It is Green Belt containing ancient woodland
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point
MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock. There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Send is a village with beautiful green fields and to suggest almost doubling the number dwellings will be the death of what we have. Previously I have written several times with my objections as has thousands of others and these objections continue to be ignored. Reiterating the objections.

1. We have old woodlands which are home to animals and birds including protected bats. Extreeme development as proposed will join up other local villages and become over development. Garlick's arch is subject to flooding and by concreting over will make other areas more susceptible. Local infrastructure already poor will be drowned by at least another 1000 cars and local medical centre Will not cope. Schools also are not available for more children.

2. Land at Burntcommon is proposed to be increased by 100per cent, previously this was deleted from the 2014 plan and now increased twice. There is no need to industrialise our village further when a Slyfield Trading estate has unused capacity contradicting MM9. Send' narrow roads will be affected even more with heavy goods vehicles and air contamination.
3. Land at Aldertons site again green belt land with no special circumstances (policy MM9). The number of new homes projects is unreasonable which will put increased pressure on traffic lights at Send crossroads already choked during periods of the day. Our villag life is being destroyed. All this additional housing nearing the double we have is far excessive for our current infrastructure.

4. The proposed developments in Send do not take into account the traffic implications are not adequately addressed by the A3 changes and Clandon slip roads. Send Barns lane where I live will be swamped by thousands of more lorries and cars heading towards Woking.

5. This consultation only includes the proposed developments listed and does not allow for comments on the additional 40 houses and traveller sites on Send Hill and 60 houses at Clockburn in tannery lane. The 25 per cent increase to the send business centre despite the Wey conservation area. Finally we do not need this massive increase to local house building which is unaffordable to most younger people, various new build developments already remain only half sold. New affordable housing needs to built in Guildford and brown field sets.

yours faithfully

mr m. Jordan

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

This is a letter I should never have to write. It is not about 'main modifications' to the plan but the plan itself, as now approved by the independent inspector. Guildford council submitted these plans in the knowledge that they were rejected by the majority of residents in this area and are ultimately responsible for the outcome.

Despite 7000 objections to MM41, land at Garlicks Arch was approved initially for 400 homes, now increased to 550, without addressing any of the far-reaching implications of doing so. By my calculation, this means that 15 members of your electorate objected to it for every single councillor's approval. This is not democracy. This country fought 2 world wars for democracy and saved the lives of the very people who are now oblivious to it.

As pointed out in previous letters on this subject (totally ignored) the plan for Garlicks Arch and associated development, never considered the holistic detriment to the surrounding area that it will cause. It happens to be, in no small part, a valued area of Surrey, the lungs of London and in a county that people from all over the World travel here to visit for its peace and tranquility. It is not acceptable to turn it into a dumping ground for industrial proliferation, excessive housing and a disastrous transport anomaly. The idea of directing Woking-bound M25 traffic onto the A247 in Send is asinine.

What happens to it once it reaches Old Woking, a medieval village?

So, while your planning department tinkers with the detail of this concept, using up tax-payers money destined for the care of the elderly, Rome burns. You have totally and flagrantly ignored the wishes of the people of this area so expect no quarter by return. Continued intransigence by Guildford Council to address the concerns expressed here will ultimately leave us no choice but to take direct action.

**Comment:** MM41 - LPMM18/4375  **Respondent:** Colette Clegg 8910273  **Agent:**

However, the key objection which should be of concern to all of Surrey, is regarding the transport strategy. MM41 - the transport strategy modelling, which is used by your plan, is inadequate. Specifically the fact that the delay in J10 of the M25 by Highways England RIS of at least two years will impact all development that relies on this scheme. In addition the fact that there is no suitable rail infrastructure with capacity and within a suitable distance of the site means that the site is wholly dependent on car transport. This will put too much traffic onto the already overcrowded local road network and is, by definition, unsustainable and dangerous. Given the issues with J10 of the M25, this will, in effect, put a congestion “stopper” in the top of Surrey. Moreover, I do not believe that the Highways England scheme to develop J10 will have any impact on the congestion levels as the issue lies not with the A3 but with the M25 - the M3/M25 junction has a similarly improved junction and the congestion there continues to be very severe.

Attached documents:

**Comment: MM41 - LPMM18/5769  Respondent: Ockham Parish Council (Peter Bevan) 8916001  Agent:**

MM41: the Transport strategy is based on inadequate and out of date modelling, not least as a result of the announced delay of 2 years or more in the J10 Highways England RIS scheme. This will significantly impact proposed developments which rely on that scheme such as at A35 (Three Farms Meadows/the former Wisley airfield) and A43 (Garlicks Arch),

The “strategic sites” are perversely stated to be exempt from a number of design constraints. Such constraints are all the more important for large sites and developments.

Recent case law such as in “People over Wind” has apparently not been taken into account.

MM27, MM41, MM42 and MM48

As a resident in Send Marsh I use the car every day for travel to and from work and it is preposterous that no proper assessment as to the aggregate traffic impact on Send Barns Lane and Send Marsh Road will be affected. The pace of development in Woking and the proposed scale of new residential development in Guildford and more specifically Garlicks Arch (MM41) and potentially Aldertons Farm (MM44) will have a major impact on the roads in the immediate area, a situation which has got steadily worse during the last five to ten years.

Whilst I accept that there has been population growth Surrey and particularly West Surrey, is a popular place to live and the traffic implications for Send Marsh are worrying. The A3 is gridlocked on a regular basis, particularly during school term time and it often takes me over an hour to reach the office which via the A3 is only some 5.5 miles distant.

The proposed development is 550 houses at Garlicks Arch, 60 units at Clockbarn, 40 units at Winds Ridge adds over 770 houses to the 1,700 currently in Send, an increase of some 45% which is simply too much for the current infrastructure to accommodate.

I find it abhorrent that Guildford Borough Council are proposing to set aside such an astronomical number in the North-West part of the Borough when there are far more appropriate sites for development closer to Guildford Town Centre where there are adequate transport nodes, particularly following the recent consent on appeal for the redevelopment of Guildford mainline railway station.

MM41 - Land at Garlicks Arch, Send Marsh:

It is staggering that there is a potential for an increase of 150 homes from the original 400 proposed to 550 which is an increase of some 37%, notwithstanding the fact that 7,000 objections to the previous lower number have already been raised! It is a Green Belt area containing ancient woodland and will effectively form a link between Send and Ripley and surely must be considered as over-development completely out of character with the surrounding area. Such a development will elicit a phenomenal number of extra cars, whilst the existing educational and medical facilities which are already at breaking point will be strained even further.

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/3868  Respondent: Claire Bridges 8923905  Agent:
MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I object to the proposal to increase the number of homes on this site from 400 to 550.

Anyone who has actually visited the site will see how unsuitable it is.

I object to the number of homes being increased by 37%. With an average of 2 people per house this will mean a possible 1000 plus residents who will all require access to roads and amenities.

I went to the hearing about this site and listened to the overwhelming and compelling evidence presented by various groups about how unsuitable this site was. The council’s representatives had few answers to this and so the conclusion from the Inspector that the site should be increased and not scrapped is incomprehensible.

It is likely this will add over 750 additional cars to the traffic in the surrounding area. Access to both Guildford and Woking would add to the massive traffic jams at present at Send Dip and the Burnt Common Roundabout. Send Road is already the main access road between Woking and the M25 carrying heavy goods vehicles and articulated trucks.

There is nothing in the Local Plan about additional road infrastructure so the current small roads we currently have which are over-crowded already will simply not be able to cope. If the other proposed sites all go forward then these roads will simply gridlock making life a misery for everyone concerned. There is a serious safety angle to this problem as cars bunch and speed limits are broken to enable to get from A to B on time. The situation will be far worse during weekdays. The additional traffic that will result from the excessive building programme in Send will make the situation far worse and in all probability result in gridlock.

With the additional houses there will inevitably be families requiring schools for their children. There is only now one primary school for the villages of Send and Ripley since the recent closure of Ripley School. George Abbot is the nearest secondary school and for many years the children of Send and Ripley do not get into the school due to it being over-subscribed. The next nearest school is the Howard of Effingham which currently does not take children from the villages.

There are no plans to build any new schools, surgeries, dentists or amenities.

More houses will mean the current amenities will be over stretched and unable to cope.

In my opinion this is an irresponsible and ill-conceived site to choose.

Attached documents:

Comment: MM41 - LPMM18/3872  Respondent: Claire Bridges 8923905  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

**MM41 - Garlicks Arch**

An increase to 550 homes in an area that floods and is in Greenbelt will increase traffic by at least 1,000 cars as most homes have an average of 2 cars. The area is not well served by public transport and car usage is inevitable. This will have an affect on the local roads and the nearby villages of Ripley and Send, the former already subject to over European limit pollution and both with severe parking issues.

Further detailed traffic modelling is required which does not rely on the A3 and other SRN's which beyond GBC control.

first five years since otherwise the increased traffic on local roads will be intolerable and cost lives! The site is not suitable for housing local school and medical facilities will not cope.

**M41 Transport Strategy**

The Local Plan is proceeding with inadequate traffic modelling that understates the roads infrastructure requirements that will be generated by its excessive housing number and site selection.

**Attached documents:**

**Comment:** MM41 - LPMM18/2068  **Respondent:** Tim J. Harrold 8971233  **Agent:**

MM41

+Transport strategy relies on inadequate modelling, including the delay in the Junction 10 Highways England RIS scheme of at least two years, which will impact all development that relies on this scheme. This will include Site A35 (former Wisley Airfield), Site A43 Garlicks Arch, Site A63 Land west of Alderton’s Farm (MM44).

**Attached documents:**

**Comment:** MM41 - LPMM18/4613  **Respondent:** Victoria Sandu 9042049  **Agent:**

Change MM41

I object to this increased size of development at Garlick's Arch for the following reasons:

- The proposed increase of 37% in the number of houses in the Garlick's Arch development from 400 to 550 is excessive and will further increase the demands on the already extremely stretched road infrastructure in the area. This will also put more pressure on the already inadequate schools and medical facilities in the area. School resources have already been reduced by the recent closure of Ripley Church of England Primary School.

- This development together with the increased size of the Burnt Common development (MM42) and the proposed development at Gosden Hill Farm (Policy A25) will result in the Send Marsh / Burnt Common becoming part of the extended Guildford conurbation. This will change the local character of the area and goes directly against Policy D1 (6) in MM23 which states 'All new development will be designed to reflect the distinct local character of the area and will respond and reinforce locally distinct patterns of development.'

- Total new housing proposed for Send when including Garlick's Arch, Winds Ridge (40), Clockbarn (60) and Alderton's Farm (120) (MM44) adds 770 houses to the 1700 current houses in Send. This is an increase of 45%! This is an unreasonable increase and the local road, educational and medical infrastructures will not be able to cope. And also the levels of pollution will cause the already dangerous levels of nitrogen dioxide to become even worse.

**Attached documents:**

**Comment:** MM41 - LPMM18/4354  **Respondent:** Patricia Wood 9237953  **Agent:**
MM41: Improvements to the A3 play too large a part in the Council’s plans. These are beyond GBC's control and there is no fixed timescale.

MM41: It appears that GBC's transport scheme relies on insufficient modelling, especially with regard to the problems at Junction 10 of the A3/M25 interchange. Highways England Road Investment Strategy covers at least 2 years and will have an enormous impact on this and all development that relies on these improvements, such as *Site A35 Three Farms Meadow, *MM41 Site A43 (Garlick's Arch) and *MM44, Alderton's Farm.

Comment: MM41 - LPMM18/144  Respondent: Jillian Tallick 10423265  Agent:

I would like to register my objections to the current planning for additional developments around Send Village.

In particular I would like to object to the developments MM44 and MM41.

As well as impacting on the heritage of the area around Send Marsh Green, MM44 also contradicts the Green Belt policy of MM9. This land has always been listed as green belt land and therefore other non-green belt sites should be considered before developing this green belt land. In addition, the whole area around Send is at full capacity for what the current infrastructure can support, this includes:-

- Roads
- Schools
- Doctors
- Dentists

Send Villages Medical Practice is full, takes many days if not weeks to get a Doctor's appointment. Ripley has now lost its local primary school and only has one small dentist practice. The roads around this area are heavily congested at all times and safety is becoming an issue as more and more major accidents are happening on the A3 section parallel to the Send/Ripley area as well as parking being pretty non-existent during peak times. With no local schools being able to take a large influx of new residents, this would result in yet more traffic as new residents would have to drive their children to
distant schools outside of the local area.

Therefore, without substantial additional infrastructure to support the above, this area cannot support any more additional housing as shown in MM44 and MM41.

---

**Comment:** MM41 - LPMM18/3500  **Respondent:** Rosslyn Reeves 10443169  **Agent:**

I am writing to protest most strongly to the latest Draft Guildford Local Plan which has substantially increased Green Belt Development in Send and Send Marsh. I would like my comments to be seen by the Planning Inspector.

The recent Planning Inspectors report on the Guildford Local Plan was worrying as it suggests even more development in Send and Send Marsh than the previous Plan.

The new housing plan calls for increases to the Garlicks Arch (MM41) area Policy A43 from 400 to 550 homes and the reintroduction of 120 homes to Aldertons Farm, Send Marsh (MM44) Policy A63. This latter plan was withdrawn from an earlier plan for very good reasons. With development planned for Clockbarn (60) and Winds Ridge (40), it adds 770 houses to the 1700 currently in Send and Send Marsh, increasing it by 45%. More importantly the Garlicks Arch (MM41) and Aldertons Farm (MM44) sites are at either end of Send Marsh, which is taking an unrealistic hit of development which is scheduled for the first five years of the plan on Green Belt Land! This is not sustainable and will put pressure on an already stressed infrastructure.

In addition, the land at Burnt Common Policy A58 has been increased from 7000 sq metres of Industrial Development and Storage to a minimum of 14800 sq metres. Why is this taking place when land at Slyfield is available for further development of industrial development?

Land at Aldertons Farm (MM44) is Green Belt land with no special circumstances so it contradicts Policy MM9. These fields, now paddocks for grazing horses, act as natural drainage resulting in flooding in the lower field during the winter. Send Marsh is a marshland and concreting over it will exacerbate the problem. There is also wildlife flourishing on these fields e.g. deer.

There are already streams occurring in Tuckey Grove from the fields following heavy rainfall and building 120 houses will result in further water issues.

The traffic at Send Cross Roads will increase and already the roads are heavily congested at peak times. The Medical Surgery is already oversubscribed, and the local school has had to take more intake following the closure of Ripley First School.

With regard to the proposal of 550 homes being built on Garlicks Arch (MM41), there have already been 7000 objections to this which seems to have been ignored. This area is Green Belt containing ancient woodland.

Attached documents:

---

**Comment:** MM41 - LPMM18/396  **Respondent:** Shelagh Smith 10540161  **Agent:**

I strongly object to the main modifications as listed below. I also want to point out that it is incredulous that you have ignored the previous 7000 legitimate objections to your plan involving Send, Send Marsh, Burnt Common and Garlick’s Arch.
MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

**I strongly object to the increase from 400 to 550 homes.** This proposal refuses to acknowledge the negative impact on the environment – specifically the noise and pollution from the loss of the Ancient Woodland which creates the natural barrier from the A3. Send Marsh sits in topography which is low lying and therefore the air will be even more affected from traffic pollution with the loss of the woodland at Garlick’s Arch. The Ancient Woodland is irreplaceable; ‘Ancient Woodland’ carries a higher level of protection in the planning system (ref Para 118 of the National Planning Policy Framework) which you need to adhere to. Surely, there is a need to preserve this irreplaceable wood and habitat in a similar way that we have Preservation Orders on the Oak trees in Oaks Way?

Attached documents:

---

**Comment:** MM41 - LPMM18/401  **Responder:** Shelagh Smith 10540161  **Agent:**

**MM27, MM41, MM42, MM48 Transport Strategy**

**I strongly object to even more traffic resulting from your intentions in the plan modifications.** As above, the increased pollution and the resulting gridlocked roads in the immediate area are already evident. The A3 and local A Roads are already at breaking point and this has a continuous overflow impact on surrounding village and the nearby narrow B roads. Your assessment for your proposed transport strategy is unrealistic and inadequate.

**Comment:** MM41 - LPMM18/2932  **Responder:** Sarah Wright 10543937  **Agent:**

Please see my comments below regarding the 2018 modifications to the Local Plan.

I wish my comments to be seen by the Planning Inspector

I object to the following specific modifications to the Local Plan:

**Policy A43, Land at Garlicks Arch, Send Marsh (Modification MM41)**

**I object to modifications MM41 Land at Garlicks Arch due to the following points.**

An increase of 37% in housing numbers is excessive and will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further additions to the housing numbers are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This green belt land contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it with additional housing numbers.

An extra 150 houses means easily an extra 300 cars on the local roads, which cannot be accommodated.
This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

The local school and medical facilities won’t be able to accommodate extra housing. It is already at maximum capacity (not helped by the feeble decision to close Ripley school).

Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the previous consultations.

I’m writing to object on a number of policies that are being resubmitted by Guildford Borough Council

MM41 policy A43

I’m objecting to the 37% increase of the number of houses this is very excessive why were the 7000 previous objections ignored this area is all ancient woodland and greenbelt and needs to be just preserved it will join send in Ripley and constitute over development. This area floods the whole time and is contaminated by lead shot not suitable for development. There will be at least an extra thousand plus cars and these will block up all of the roads in the area causing gridlock schools and medical services are already at breaking point and will not cope with new developments.

Attached documents:

Comment: MM41 - LPMM18/2461  Respondent: Anne Davies 10551937  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/2605  Respondent: Ian Cameron 10562049  Agent:

I am objecting to your modification development reference MM41 at Garlicks Arch, Send Marsh, Policy A43. On the following grounds:
I find amenities in Send ie.: our Roads (traffic congestion), Schools, Medical (GPs), Shops, and Public Transport, are already under pressure in terms of capacity and often quality.
I cannot imagine how existing amenities will cope with another 400 new homes, let alone the increase to 550, ie.: with another 1000 or so extra people.

I am objecting to all your modification developments reference MM41, MM42 and MM44, Policies A43, A58, and A63 - taken as a whole.
These are huge changes in relation to the size of the village.
Their impact will be devastating. Thinking about the inevitable traffic chaos alone fills me with gloom.

You have gone over the top in targeting Send, like as if you have a vendetta.

Attached documents:

Comment: MM41 - LPMM18/2193  Respondent: John Creasey 10563457  Agent:

MM41 Land at Garlicks Arch, Send March, Policy A43

I object to the huge increase to the number of proposed number of houses from 400 to 550 to built at Garlicks Arch which amounts to a 37% increase despite 7,000 objections to the previous lower number.

450 of which to be built in the first five years.
This site is subject to frequent flooding and contaminated by leadshot.

The land in question is green belt containing ancient woodland and with this number of houses Send and Ripley will be joined up and cease to separate villages. It will constitute over development.

Traffic in the area is already extremely heavy at peak times and this amount of houses will mean at least another 800 cars.

The school and Medical facilities will be strained to breaking point.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2198  **Respondent:** John Creasey 10563457  **Agent:**

**MM27/MM41/MM42 and MM48 Transport Strategy**

I object to the proposed changes to the A3 junction at Burnt Common. The increased traffic on the A247 through Send will be intolerable as at peak times it is already at capacity. It will cause unavoidable congestion, pollution and traffic will come to a standstill.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2201  **Respondent:** Hazel Creasey 10563777  **Agent:**

**MM41 Land at Garlicks Arch, Send March, Policy A43**

I object to the huge increase to the number of proposed houses to built at Garlicks Arch which amounts to a 37% increase despite 7,000 objections to the previous lower number.

The land in question is green belt and with this number of houses Send and Ripley will cease to be separate villages.

Traffic in the area is already extremely heavy at peak times and this amount of houses will mean at least another 800 cars.

The School and Medical Facilities will be overwhelmed.

**MM27/MM41/MM42 and MM48 Transport Strategy**

I object to the proposed changes to the A3 junction at Burnt Common. The increased traffic on the A247 through Send will be intolerable as at peak times it is already at capacity. It will cause unavoidable congestion, pollution and traffic will come to a standstill.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2429  **Respondent:** Sheila Mardle 10565569  **Agent:**

**Objection to development MM41 Land at Garlicks Arch,Send Marsh,Policy A43**
Dear Sir

As a resident of Send I wish to object strongly to the above proposal on several grounds AS OUR PREVIOUS OBJECTIONS HAVE BEEN IGNORED.

The land involved is Green Belt and ancient woodland and is often subject to flooding and no doubt has contamination from lead shot. It will constitute over development by joining Send and Ripley.

Our roads cannot take the extra traffic in the area as local residents have been aware of for many years and pedestrians are already affected by road crossing problems, inadequate footpaths and excessive traffic fumes on our roads.

With the closure of Ripley school and nursery our school is already stretched and adding all the proposed homes on this site will stretch both school and medical facilities to breaking point.

Attached documents:

Comment: MM41 - LPMM18/4608  Respondent: Laura Richards 10570977  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/2329  Respondent: Iris Prole 10582145  Agent:

Re: High Noon For Send

1) The disgusting plan for building at Burnt Common, the area will be ruined. With the space at Slyfield Green I feel it is unnecessary. WHAT HAPPENED TO GREEN BELT.

Attached documents:

Comment: MM41 - LPMM18/5159  Respondent: G Rabin 10617601  Agent:

A3 is congested and any time there is a breakdown or accident the road grinds to a halt. This happens weekly if not daily.

Air pollution should be a priority.

The size of the SNCI is drastically reduced even though the site qualifies on ecological grounds. The biodiversity will be destroyed.

Attached documents:

Comment: MM41 - LPMM18/1969  Respondent: Trudi Harris 10667073  Agent:
MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

**Comment:** MM41 - LPMM18/1135  **Respondent:** Mrs Jennifer McIndoe 10670529  **Agent:**

I object to this proposal on the following grounds:

1. 7000 people objected to the previous proposal for 400 homes on this site; I feel sure that their objection was not because they considered that this was too few homes! The proposal for an almost 50% increase to the number already rejected by local residents is nothing short of insulting!!

2. The proposed site is Green Belt and contains ancient woodland which should be protected.

3. If the proposal were to go ahead, even more pressure would be put on already over-crowded roads, schools and medical facilities.

Attached documents:

**Comment:** MM41 - LPMM18/214  **Respondent:** Clare McCann 10677665  **Agent:**

I wish to object to the modifications to the Guildford Plan as I understand previous letters on the subject are just ignored. I hope this time there will be more regard taken of local views especially as it now seems that local housing requirements have been overestimated.

MM41 land at Garlicks Arch, Send Marsh Policy A43

This development is wrong on so many levels

- It will destroy ancient woodland and create ribbon development from Ripley to Send thereby damaging the integrity of the two villages which go back to the time of Domesday and before.
- The new homes proposed take no account of the infrastructure required to sustain them. Both the school and the medical centre in Send are at capacity - not helped by the incompetence and or duplicity of SCC and the diocese in closing Ripley School.
- The local roads are already very busy and 550 homes could well lead to an extra 800-1000 cars - increasing congestion and pollution.
- If new slip roads onto the A3 go ahead this will gobble up more land to very little benefit as the adjoining roads (from Clandon and Send) cannot be widened to accommodate extra cars and as we all know the A3 at Guildford gridlocks everyday as it is.

Attached documents:

**Comment:** MM41 - LPMM18/1175  **Respondent:** Margaret Bruton 10683457  **Agent:**

I would like to register my opposition to the latest modifications of the Guildford Local Plan which are relevant to Send
The Office of National Statistics’ prediction is that there is a decrease in the previously anticipated number of houses needed in Guildford and this has important consequences for the proposed developments in Send. The Local Plan modification will enable increase in housing in Send over and above those in the original Local Plan proposal. These new ONS figures make it unnecessary to plan in extra housing in Send.

I specifically object to development at the site at Alderton’s Farm (MM44). And is a valuable green area which is an important part of the rural character of the village of Send and housing here would destroy this important area. In addition houses on this site would lead to further congestion at busy times of day at either end of Send Marsh Rd (B368) where it either joins the Portsmouth Rd (B2215) or the already congested A247 at May’s Corner.

I further object to the modifications as I think they will cause a dangerous increase in traffic. Neither the Alderton’s Farm site (MM44) and Garlick’s Arch (MM41) have good public transport or cycle paths and the pavements along Send Marsh Rd are very narrow so there would be an inevitable increase in the number of car journey’s to and from these sites Send school is on the A247 and there are already safety concerns about parking and children crossing the road so extra traffic would increase this danger.

Furthermore these additional houses would put extra pressure on the already busy medical centre and the school which is a new build and is already full.

I also object to the allocation of industrial premises Burnt Common.

To exit this site it is necessary to go South along the Old London Rd (B2215) and the to turn right along a narrow strip then right again onto the north bound slip road of the A3. This is presently very dangerous as traffic leaving the A3 have very little time to see and slow down for lorries leaving the distribution centre and crossing on to the north bound A3 slip road. Extending the site would make this an even more dangerous hazard.

Attached documents:

Comment: MM41 - LPMM18/4999  Respondent: Ben Gamble 10701537  Agent: 

I make the following comments in regard to the modifications to the Local Plan:

Sites A43 Garlick’s Arch; A63 Aldertons Farm; and A58 Burnt Common Strategic Employment Site will have significant combined impacts upon the villages of Ripley, Send and Send Marsh. The development of these sites will increase the traffic on already over crowded and busy roads in these villages.

It is extremely concerning that there does not seem to be any firm commitment to the construction of policy site A43a the A3 Burnt Common slip roads during the period of the Plan. It is vital that this is constructed prior to developing the above sites.

The development of these site do not provide enough community infrastructure Ripley Primary School has recently been closed by Surrey County Council. The Villages Medical Centre is already heavily subscribed.

Attached documents:

Comment: MM41 - LPMM18/5035  Respondent: Frank Fuller 10703745  Agent: 

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.
RE: Objections to Guildford Borough Council (GBC) Local Plan – Consultation due to close on 23.10.2018.

I am writing in response to the latest version of the Local Plan as outline in GBC-LPSS-026. As in earlier versions of the plan, the modifications presented for Send are inappropriate, excessive and will be highly detrimental to our village, our quality of life and our future. These changes will result in irreversible destruction of our village.

The local plan in its current form illustrates the continued failure of GBC to provide a plan that is fit for purpose, supported by competent data made available in the public domain, which provides for the needs of current residents, and secures the best future for them and LISTENS TO LOCAL VOICES.

**MM41 LAND AT GARLICK'S ARCH, SEND MARCH, POLICY A43**

- I object to GBC going against Government guidance in their proposals to build on Greenbelt land and failing to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.

- I object that this development is proposed on Green Belt Land and will destroy countryside and ancient woodland.

- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.

- I object because local infrastructure will not be able to support the additional demands of new residents.

- I object because local schools and medical facilities will not be able to support the massive increase in demands resulting from this plan.
  - I object because wildlife will be displaced.
  - I object because the site is subject to frequent flood, which will only worsen with increased buildings and ground coverage.
  - I object because the land is contaminated by lead shot and this will compound the problem of increased flooding as outline in my previous objection and be detrimental to health and well-being.
  - I object to GBC ignoring the 7,000 previous objections raised by local residents with regard to developing this area.
  - I object to GBC increasing by 37% the number of houses in this development, which is excessive and not supported by need but demand and proposed to promote excessive and unnecessary housing development in this area.
  - I object to this development as it will ‘join up’ Send and Ripley and local character will be destroyed by this over development.
  - I object that GBC continues to stand by its discredited and unreliable estimate for future housing need and fails to adjust this downwards by considering its erroneous assumption about student population forecasts in Guildford. This would of course impact on housing need across neighbouring areas including Send.

**Attached documents:**
MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

**Comment: MM41 - LPMM18/704**  **Respondent:** Zareena Linney 10718625  **Agent:**

MM41

The figure of 550 home is too great a number its such a large increase. The numbers and amount will impact badly on infrastructure of village and traffic and impact

Areas of concern for me would be (had already objected long with others and this was ignored)

The impact on the greenbelt land and nature wildlife.

The amount of traffic roads congested and getting unsafe and damaged.

School, medical facilities and shops and infrastructure not wide enough to accommodate.

Attached documents:

**Comment: MM41 - LPMM18/708**  **Respondent:** Zareena Linney 10718625  **Agent:**

MM27, MM41MM42 and MM48

Traffic implication again as more cars will use my road Send road, as it is my son is learning to drive and the road is too congestion for us to even get out of. The speeding and level of traffic dangerous. The house has experienced cracking and damage due to it being roadside and volume and amount of traffic.

Will we as home owners be compensated? we have complained previously? the increase in volume of traffic in Send Road is damaging our house and its losing value and council increasing numbers and traffic this will make it worse.

Its often gridlock in Send road outside our house. If an incident on A3 nothing moves. Its impacting on our ability to work/drive and move about.

Pollution would be increased with even more traffic and we may have health issues due to this. With weight and volume of traffic the house cracking i mentioned could become unsafe made worst by the councils plans.

Attached documents:

**Comment: MM41 - LPMM18/5067**  **Respondent:** Stewart Fenton 10719297  **Agent:**
MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The previous plan for 400 homes on this site alone already represented a disproportionate quantity for a village such as Send. I object that this has now been increased to 550 homes of which 450 are to be built in the first five years. This is all on Green Belt land, outside the village boundary, containing ancient woodland. This development will effectively join Send and Ripley and represents urban sprawl and over development, especially when considered alongside the other developments proposed along the A3 corridor. With Ripley school closing, Send school cannot be expected to cope with even more children moving into the area. The existing Medical facilities and other infrastructure will also be unable to accommodate so many more residents.

MM27 MM41 MM42 and MM48 Transport Strategy

I object to the changes to the A3 junction. They will encourage more traffic from the A3 to divert through Send in order to gain access to and from Woking and beyond. This will cause more traffic problems on Send Barns Lane and Send Road, which are already subject to heavy congestion on a daily basis, particularly during rush hours. This will be in addition to the extra traffic that will result from the increased development in and around the immediate area.

Attached documents:

Comment: MM41 - LPMM18/716  Respondent: Linda Holland 10719553  Agent:

MM41 I object to MM41 for many reasons but mainly
1 Schools, medical facilities and local roads will not be able to cope
2 more nitrogen dioxide pollution, delays and grid lock

MM41 I object to MM42 for many reasons but mainly
1 This is on top of a 25% increase at Send Business Centre making a much bigger concentration in Send than any other village in Guildford with no proven demand
2 The overall infrastructure will not cope and more nitrogen dioxide pollution

MM27/MM41/MM42 and MM48

The traffic implications for the above have not been adequately addressed and no proper assessment has taken place bearing in mind more traffic increased noise nitrogen pollution delays and gridlock

Attached documents:

Comment: MM41 - LPMM18/2213  Respondent: Y Beraud 10721089  Agent:

Re Guildford Local Plan: Strategy and Sites - Main Modifications 2018

I object to the recent proposed plan by Guildford Borough Council for MM41 Land at Garlicks Arch Send Marsh Policy A43. The increase from 400 houses to 550 is excessive. It is green belt containing ancient woodland which will join Send and Ripley and constitute over development. The site is subject to flooding and contaminated with lead shot. School and
medical facilities will be at breaking point. There will be at least 850 extra cars that will block up the adjacent roads. Toxic pollution and noise pollution will be detrimental to the current population and even more so to future generations.

Attached documents:

Comment: MM41 - LPMM18/2218  Respondent: Y Beraud 10721089  Agent: 

I object to G.B.C MM27, MM41, MM42 AND MM48 TRANSPORT STRATEGY

Traffic implications for Send Garlick's Arch, Burnt Common, Clock barn and Alderton's Farm added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. G.B.C offer fine words but NO proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased Noise, Nitrogen pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/1142  Respondent: L Beraud 10721121  Agent:

I would like to formally object to the following Planning Applications

**MM41 Land at Garlicks Arch**  Policy A43..... the 7000 objections to the previous 400 houses have been ignored and now the proposal is 550 this is unacceptable

This is Green Belt that contains ancient woodland and also if the existing school and medical facilities are only just sufficient to the existing local needs how will they cope with the extra residents

Can you explain how with this application it will not constitute over development by joining Ripley and Send

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1335  **Respondent:** Mrs Ashley Gurdon 10722177  **Agent:**

With the current works being carried out by Affinity it has been clear that there is already a large amount of traffic that passes down the B2215 and through Ripley. How is the area meant to cope with another 700 plus cars? Also the area is Green Belt with woodland, again is that not something to be proud of and protected? Not just ignored when it suits the Planners and Developers. The Village Medical Centre is already impossibly busy and over subscribed, will another surgery be opened, and will other schools be provided for the extra homes that are planning to be built?

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2050  **Respondent:** Judith Pound 10723553  **Agent:**

I am writing to object to the latest version of the Local Plan which seems to be penalising Send with far more than its share of development, with significant volumes of housing targeted for Garlick's Arch (MM41), and Alderton's Farm (MM44). A total of 670 new houses is a staggering number for a village the size of Send.

I have lived in the area for nearly 30 years and in that time seen a vast build up in traffic levels and do not see how the local road network can sustain the resulting increase. Neither can increased traffic levels be introduced without an impact to nearby bottle necks. These include Ripley, Old Woking and, of course, Guildford itself, which cannot handle the amount of traffic it faces already, and, in the case of any incident, quickly becomes gridlocked. I am particularly concerned at the moment of time that the A3 Southbound is stationary or slow moving, particularly given the need for ambulances to access The Royal Surrey County Hospital. I do not believe either that local schools or medical facilities would be able to cope with the resulting influx of numbers.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/385  **Respondent:** Hilary Sewter 10724897  **Agent:**

I object to MM41 Land at Garlicks Arch, Send Marsh, Policy A43 because:-

- An increase from 400 to 550 homes is excessive.
- There were 7,000 objections to the previous LOWER number, which have been ignored.
- Green Belt should be honoured. It is being ignored or the rules 'bent'.
• Overdevelopment will result in an increase in demand for water which is not viable and cannot be sustained.
• The proposed area is a necessary and essential flood plain.
• The increase in vehicles will block roads which already subject to becoming gridlocked.
• There simply are not enough school places and medical practices to support additional population.

I object to MM27 MM41 MM42 and MM48 Transport Strategy because:-

Currently, heavy traffic from the A3 already heads to Woking through Send and even small roadworks cause major traffic jams, particularly at rush hour. This will be exacerbated when the proposed changes to the A3 improvements take place. With the extra industrial and housing developments in the areas mentioned above, Send will regularly become gridlocked.

To all concerned with Local Plan

RE: Guildford Local Plan: Strategy and Sites - Main Modifications 2018

I write to inform you of my objections as follows:

MM41 - Policy Number A43 Land at Garlicks Arch, Send Marsh.

1. The area is GREEN BELT with woodland, part of which is ANCIENT WOODLAND.
2. The number of houses scheduled to be built is excessive for the area.
3. The extra vehicles on the road as a result of increased housing will produce more polluting exhaust fumes.
4. Schools and medical facilities available now will be unable to cope with the extra demand.
5. Fewer trees, if any left at all, will increase the risk of flooding in the area. Laying tarmac and concrete will also cause rain water run-off, again increasing the risk of flooding.

I am writing to OBJECT to the local plan Main Modifications as outlined below:
I OBJECT to MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years

- An increase of 37% in the number of houses proposed is excessive
- 7000 objections to the previous lower number have been ignored
- It is Green Belt containing ancient woodland
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

I OBJECT to MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/4590  Respondent: K. Croxford 10729185  Agent:

- MM41 – Garlicks Arch (policy A43)

The scale of proposed development is too excessive

Latest ONS estimates have down-graded the level of new homes needed in the Guildford borough, so this proposal cannot be justified

The land itself is GREEN BELT, with no apparent ‘special conditions’ to exempt it

The land contains ancient woodland, which should be preserved.

A key purpose of retaining GREEN BELT is to prevent urban sprawl, and development here would compromise this,

The site itself has been subject to flooding in the past, and this should render the site unsuitable for development

The extra traffic generated would be unacceptable for existing infrastructure,

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

Having closed the primary school in Ripley, there is no tangible capacity for schooling

Send Villages Medical Centre, which seems to be already running at full capacity
I OBJECT to this development and the proposed modification

Attached documents:

Comment: MM41 - LPMM18/4671  Respondent: K. Croxford 10729185  Agent:

MM27 / MM41 / MM42 / MM48 – Transport Strategy

Regarding road traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley)

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’)

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane)

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane)

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, any further developments will create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages

The modifications are simply too much for the villages of Send and Burnt common, that already suffer from increased traffic and congestion / pollution

Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’

ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan. Send residents have repeatedly been voicing their concerns in previous feedback, but these have been largely ignored

It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking

Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising.

A loss of more countryside/Green Belt/nature/openness would exacerbate this
Abandoning the new A3 slip-road (policy A43a) would save a great deal of money which could be better spent on other services for existing residents, who already pay substantial levels of Council Tax (such measures could include traffic-calming, road repairs and noise reduction).

Local residents and Parish Councils feel they are now being ‘punished’ for simply voicing their concerns over the years – concerns which ONS and other boroughs seem to be taking heed of – except, it would seem, Guildford Borough Council.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/3817  **Respondent:** Richard Croxford 10729281  **Agent:**

**MM41 – Garlicks Arch (policy A43)**

The scale of proposed development is massively excessive.

Recent ONS estimates have down-graded the level of new homes needed in the Guildford borough, so this proposal cannot be rationally justified.

The land itself is GREEN BELT, and there are no apparent ‘special conditions’ to exempt it.

The land contains ancient woodland, which should be preserved. Many trees carry TPOs (preservation orders).

One key purpose of retaining GREEN BELT is to prevent urban sprawl, and development here would compromise this, essentially linking Ripley to Send/Burnt Common.

The site itself has been subject to flooding in the past, and this should render the site unsuitable for development.

The extra traffic generated would be unacceptable for existing infrastructure, which is already bursting at the seams.

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further.

Having closed the primary school in Ripley, there is no tangible capacity for schooling.

It is already far too difficult to get appointments at the Send Villages Medical Centre, which seems to be already running at full capacity.

Therefore I OBJECT to this development and the proposed modification.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/3828  **Respondent:** Richard Croxford 10729281  **Agent:**

**MM27 / MM41 / MM42 / MM48 – Transport Strategy**
The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

In summary, the modifications are simply too much for the village of Send and Burnt common, that already suffer from increased traffic and congestion / pollution.

- Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’.

- ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan.

- Send residents have repeatedly been voicing their concerns in previous feedback, but these have been largely ignored.

- It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

- Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising. A loss of more countryside/Green Belt would exacerbate this.

- Abandoning the new A3 slip-road (policy A43a) would save money which could be better spent on other services for existing residents, who pay high levels of Council Tax.

(such measures could include traffic-calming, road repairs and noise reduction).

Many residents feel they are now being ‘punished’ for simply voicing their concerns over the years.

The Wisley airfield could perhaps be re-considered for some light industrial development, if demand can be proven, given its greater proximity to the M25/A3.
It is also better suited to having an appropriate traveller pitch allocation (instead of Winds Rush A44 – practically opposite the cemetery!!) as part of a mixed development

**Comment:** MM41 - LPMM18/6064  **Respondent:** Julia Osborn 10729537  **Agent:**

I presented at the Examination in July 2018 in my personal capacity as a resident on invitation/request of Save Send Action Group (SSAG). I am also a Parish Councillor of Send Parish Council. Views expressed are my own.

I am writing to OBJECT to the proposed main modifications for the Parish of Send, Send Marsh and Burnt Common on the grounds that the proposals do not constitute ‘sustainable development’ for the Parish and on these grounds:

I Object to MM41 Land at Garlicks Arch, Policy A43.
I Object to MM42 Land at Burnt Common, Policy A 58.
I Object to MM44 Land at Alderton's Farm, Policy A63.
I Object to MM9 Policy P2 GreenBelt.
I Object to MM14/ MM15, Policy E2.

**Background**

My representation to the Examination in July 2018 centred on soundness of the plan in terms of its ‘sustainability’ and that in accordance with paragraph 17 of the NPPF a core planning principle is to focus development in locations which are or can be made sustainable.

I made a number of points in relation to how the evidence base of the submission plan does not support Send being a sustainable location for development.

In particular, and to contextualise I summarise the following points:-

1) Anomalies within the Settlement Hierarchy Document (2014) have resulted in Send, Send Marsh and Burnt Common being classified a ‘large village’. For example the ‘fuel Garage’ at Burnt Common has been used as a justification to classify Send Marsh and Burnt Common as a ‘large’ village. Whereas the settlement would otherwise have been ranked as a Medium village in terms of the sustainability rankings of the document.

2) The sustainability ‘scorings’/ functional rankings in the Settlement Hierarchy Document (2014) are too simplistic and therefore over inflates the sustainability of Send. I gave the example of public transport and bus service provision and how Send Marsh and Burnt Common at been given a score of 4, (the highest ranking) and that the Urban area of Guildford was given the same score of 4.

3) Even if Send was a large village by the documents own definition “large villages are unsuitable for substantial growth (but capable of accommodating an extension” ).

4) In response to the Inspectors initial Q4, the Council have not provided an upper limit on the amount development for each village; and for Send village this could result in up to or in excess of 1000 dwellings being built in/around Send (if no constraint is applied to prevent sites from previous versions of the plan being reinstated).

**Main Modifications**
All of the points above raise fundamental questions around the “sustainability” of Send for the level of development proposed and at the time of my speaking at the Examination Hearings in July 2018, the level of development proposed for the Parish was:–

400 dwellings at Gallicks Arch (site A43)
60 dwellings at Clockbarn Nursery (A42)
40 dwellings Land at Winds Ridge and Send Hill (A44).

A total of 500 dwellings to be built in/around Send, Send Marsh and Burnt Common.

MM41 / MM44

The Main Modifications now propose to increase the number of dwellings.

MM41 will increase by 150 dwellings at Garlicks Arch (policy A43) from 400 to 550 dwellings and MM44 has re-introduce a site (included in 2014 edition of the Plan) in Send Marsh, called Aldertons Farm, to deliver a further 120 dwellings (policy A63). This brings the Total number of dwellings proposed for Send, Send Marsh and Burnt Common now to a total of 770 Dwellings.

As noted by Tibbalds consultants in their submission to this consultation on behalf of Send Parish Council, the Parish of Send will account for 56% of proposed supply in villages (based on table MM2).

This level of development is not supported by the evidence base of the plan. The sequential hierarchy within the sustainability appraisal (SA) places Send, Send Marsh and Burnt Common at the bottom of the hierarchy at Tier 10.

According to the evidence base of the Plan Tier 10 is considered the least sustainable location for development.

Comment: MM41 - LPMM18/4014  Respondent:  F. Newton 10729985  Agent:

I object to MM41 Land at Garlicks Arch, Send (policy A43)
I object to any number of dwellings let alone the increase numbers from 400 to 550. There are no special circumstances to develop the land including the Governments flawed guess at housing need or money as was the case with the last two planning application on the site 14/P/00219 and 16/P00783 for just 9 and 25 houses. The land is green belt and should remain so out of public heritage and longterm interest. The site is in the "SPA" zone. There is insufficient infrastructure to support any development. There are no local amenities other than one petrol station to support any development.

There are no nearby schools with spaces or many spaces in any distant schools to support development. The development would bring possibly over 1000 extra cars into an area already traffic saturated. There will be an increase in pollution from the extra stationary traffic which will cause health issues. The site is at the limits for emergency services to attend quickly so lives will be put at risk. There is only one local medical centre which is at full capacity at present. There is ancient woodland and protected trees on the site. These will be put in harm. Any development in this area that is inappropriate and would be detrimental of Send Village and Guildford as a borough.

I object to MM41(0a) to the main access being off A247Clandon Road.
The A247 is already very dangerous when trying to pull out onto or even off it more cars will make it near impossible. We feel we will end up being house bound along with many of our neighbours. The road is extremely dangerous to cross on foot as there are no crossing places or even footpaths on part of it more traffic will add to this danger. The traffic survey must be flawed as the A3 cannot take the extra traffic southbound as it is often stationary into Guildford and the A3 is backed up from the M25 to Burncommon daily so any extra cars will add to this congestion and pollution. The roads to Ripley and Send are at capacity with commuter traffic.
1 object to MM41(0b) to the through road from the B2215 Portsmouth Road and the A247 to provide an alternative route that relieves pressure on Send Marsh roundabout. This cut through will destroy the pleasant country aspect enjoyed by many residents. The huge increase in traffic will produce excessive noise and air pollution. If Send Barns (Burntcommon) roundabout is under pressure don't build 550 new homes nearby. The increased road usage is likely to cause accidents if not fatalities. There will be a loss or damage to established trees and ancient woodland.

1 object to MM41(0c) to the Permeability for pedestrians and cyclists into the development from the B2215. Giving better access to a death trap is not acceptable. There are no close amenities for pedestrians to walk too so better access is pretty pointless.

I am in FAVOUR of to MM41(0d) Necessary and proportionate contribution towards an off-site walking and cycle network to the village centre of Send, the Burntcommon Warehouse site and Clandon railway station.

Asking for a contribution to fix the problems Guildford Borough Council is creating for itself by supporting this development is sensible. The contribution should also consider work to improve and refurbish the pavement/cycle way to Guilford Town Centre. The contributions should consider the need for a number of light controlled crossing places to safely get to Send. There are no adequate cycle lanes so major road works and moving of pavements will be necessary. Access to the warehouse will require lights at Burntcommon roundabout and a fair amount of extra pavement and a whole new cycle way which should be extended to the one in disrepair along the A3. It is just over a mile to Clandon and the speed limit will need to be reduced and a number of light controlled crossing places need to be installed on the A247. Street lighting is also essential. A survey into road widening for a cycle path undertaken as the pavements are too narrow to accept pedestrians and cycles and there are not footpaths on both sides of the road so some compulsory purchases for land will need to be made to make the route safe enough so not to endanger lives.

Attached documents:

Comment: MM41 - LPMM18/4015  Respondent: F. Newton 10729985  Agent: 

I object to MM41(0e) Necessary and proportionate contribution towards mitigation schemes to address the otherwise adverse material impacts on communities and the environment, including Send, Ripley and West Clandon

Guildford Borough Council are not acting in the best interests of the public acknowledging there will be adverse material impacts on communities and then believing collecting contributions is better than looking after this very community in the first place. There is no amount of contributions that can fix the environmental damage this development will cause in the short or long term. Can Guildford Borough Council expect to collect a contribution proportionate enough to help the impact on hospitals, emergency services or that is proportionate to cover the loss of a life because they will be further stretched beyond coping. No amount of money to the council will bring back a life. How will Guildford Borough Council be able to collect a proportionate contribution to build new schools or extend old ones prior to the 100's of new children moving into these new properties.

I object to MM41(0f) Increase landscaping buffer/strategic planting etc

No amount of planting or landscaping will hide the A3 noise and air pollution from these new houses or these houses and their extra cars noise from the or surrounding roads. There is not enough room for 550 dwellings and the trees needed to hide them. Who will continue to take care of this extra landscaping, buffers and strategic planting when the developer departs and who pays as it sounds very expensive.

Comment: MM41 - LPMM18/4214  Respondent: Joan Bagnall 10731361  Agent: 

1583 of 2575
MM41 Land at Garlick's Arch, Send Marsh, Policy A43

A further increase of the number of houses to be built here is excessive. When your letter states that the Local Plan sets out "protecting and enhancing our natural environment, improving leisure and visitor facilities" and "addressing transport and infrastructure needs".

This area is Green Belt with ancient woodland and contrary to the above statement. For health reasons my husband and I walk two miles or more each day around the Parish and increasingly find that the noise from the volume of traffic using the Portsmouth Road, Send Barns Lane and Send Marsh Road make it almost impossible to have an uninterrupted conversation and that the levels of vehicle emissions are now making this pastime unpleasant and unhealthy. The increased volume from further housing at Garlick's Arch will only make this worse and insufficient planning to address transport and infrastructure needs has been given to address the extra traffic in the area.

Attached documents:

Comment: MM41 - LPMM18/1461  Respondent: Leslie Bowerman 10732193  Agent:

2) MM41. Land at Garlicks Arch, Send Marsh, Policy A43.

This appears to be a ‘punishment’ instance where the original grossly excessive number of 400 homes in a totally unsuitable location appears to have been increased to 550 because thousands of local residents have had the nerve to object strongly.

The impact of 550 households on traffic around Send and Send Marsh, not to mention Burnt Common itself, will be devastating. The area already suffers long hold-ups, especially during peak and holiday times. An extra 800 or so cars will clog surrounding over-busy roads and lanes for miles around. The resulting increase in traffic will also increase the noise and air pollution from traffic which is already audible from at least a mile away, depending on the wind direction.

Some 550 new houses will grossly affect the nature of what is presently a pleasant rural village. Ancient woodland, especially in the Green Belt, should be given utmost protection as it has already hugely diminished. Brown-field sites are available elsewhere. The site is unsuitable anyway, being subject to flooding and contaminated with lead shot.

School facilities are already inadequate, not least due to the unconscionable closure of Ripley First School. Medical facilities are already over-stretched. To join up Send, Send Marsh and Ripley, which this would do, would be a case of unnecessary over-development.

No direct evidence has been produced for the 400 new houses, let alone 550, the number of which would be greatly out of keeping with the area.

Attached documents:

Comment: MM41 - LPMM18/1467  Respondent: Leslie Bowerman 10732193  Agent:

5) Objection applying generally to MM27, MM41, MM42 & MM48. Transport Strategy,

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons when considered with nearby Gosden Hill and Wisley/Ockham are not sufficiently dealt with by the A3 changes and the Clandon slip-roads. The over-all effect of the total extra traffic on Send Barns Lane and Send Road does not appear to have been addressed,
bearing in mind that thousands of extra cars and trade vehicles, combined with HGVs will be going to and from Woking every day, causing increased noise, pollution, delays and tail-backs.

Attached documents:

**Comment:** MM41 - LPMM18/1082  **Respondent:** Ruth Hunter 10733409  **Agent:**

**OBJECT to MM41 and MM42 and MM9 and MM27 and MM48**

I strongly object to main modifications to above policies.

The increase in the amount of new houses (MM41) is preposterous. It is too much for the village and will create insurmountable problems in destroying natural habitats, Flora and fauna; the traffic congestion will block roads and access for residents and emergency services; there will be flooding and the infrastructure and facilities of Ripley and Send stretched to breaking point. This is an irresponsible plan which should not go ahead.

Re MM42, there is no need for so much industrial warehousing when Slyfield is not running at capacity. It is too much for our villages and goes against everything in MM9.

The proposed changes to A3 at Burnt Common has not been properly assessed and will cause chaos on our roads and risk safety of many resident children and vulnerable elderly.

Please re think these modifications and stop this unnecessary development.

Attached documents:

**Comment:** MM41 - LPMM18/4730  **Respondent:** Debbie Leane 10742753  **Agent:**

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The increase from 400 to 550 homes (an incredible 37% increase) is far too much for this area. This will not only lead to both Send and Ripley villages joining up but will undoubtedly cause over development. Hundreds more cars will only further exacerbate the traffic problems and dangers we already face around this area, blocking up more roads and causing more traffic chaos. The local infrastructure will not be able to cope with such a huge increase in demand, particularly with a local school having recently been closed and with an already overstretched medical centre. I also object to the fact that this area is also green belt and contains ancient woodland that we must preserve for our future generation.

Attached documents:

**Comment:** MM41 - LPMM18/4740  **Respondent:** Debbie Leane 10742753  **Agent:**

MM27 MM41 MM42 and MM48 Transport strategy

I object to the A3 changes and the Clandon slip roads as the GBC has not carried out a proper assessment of the traffic implications on Send Barnes Lane and Send Road. These changes will lead to thousands more cars making their way
through Send to get into Woking town centre. There are serious implications for such an enormous increase in traffic on pollution levels, noise, traffic jams etc. This has not been carefully assessed.

Attached documents:

**Comment:** MM41 - LPMM18/3121  **Respondent:** Nicola Jones 10743105  **Agent:**

MM41 – 37% increase in the housing proposal at Garlick’s Arch is excessive and the local infrastructure in terms of schools, medical facilities and roads will be unable to cope. The development impacts on ancient woodland and is on green belt, the loss of which will blur the boundaries of Send, Send Marsh and Ripley. Approximately 800 additional cars will block up already over congested roads.

MM44 + MM41 + development on other sites already proposed a Tannery Lane and Send Hill will increase the housing capacity in Send by 770, a 41% rise. This is unacceptable and is completely out of keeping with the character of the villages, particularly, as evidenced by previous objections, it is so clearly against the wishes of the people whose community this is.

MM27, MM41, MM42, MM48 – taken together as the transport strategy. The implications of the increase in traffic from nearly doubling the housing in the village, other local development plans such as Wisley and Gosden Farm, plus the proposed changes to the A3 junction at Burnt Common have not been adequately addressed by Guildford Borough Council or any other responsible agency. Thousands of extra vehicles will be heading through Send on the A247 every day. The road is already over congested with long queues at peak hours. As a resident of Send Barns Lane (A247) I am extremely concerned for my health and that of my children. I, and two of my children are asthmatic and I am very worried about the increase in levels of nitrogen dioxide and other pollutants and particulates which would be inevitable with additional traffic. There is also a primary school along this route and the traffic increase would have a deleterious affect on the health of the children.

Attached documents:

**Comment:** MM41 - LPMM18/2434  **Respondent:** Veronica Kean 10750337  **Agent:**

I object to MM41 Land at Garlicks Arch Send Marsh policy A43

The 7000 objections to the previous lower number of proposed housing has been ignored and the current proposal of an increase to 550 houses is outrageous.

The current traffic congestion is already at breaking point and increased housing will cause further grid lock and misery to local residents.

The strain on the Doctors surgery will be further increased.

The land floods frequently and building on this site could have environmental consequences to areas hitherto unaffected.

It is green belt land with ancient woodland that will have devastating consequence to local wild life.

I object to MM43 Land at Burnt common, London Road, Send, Policy A58

There is no need to increase the industrial storage when Slyfield has unused capacity.
Impact to traffic congestion in narrow surrounding roads will cause gridlock.

I object to MM44 land at Alderton’s farm, Send Marsh Road, Policy A63

This plan had already been deleted from an earlier draft because of all the objections and yet has been reintroduced.

It is Green Belt Land

Increased traffic and pressure on the Send crossroads will have a detrimental impact on the lives of residents with increased noise, nitrogen oxide pollution, delays and gridlock.

The combined impact of all these proposals and modifications is too much development for one village.

---

Comment: MM41 - LPMM18/57  Respondent: Jo Williams 10750593  Agent:

Dear Sir/Madam

I am writing with the following strong objections to the local plan:

MM41 – Land at Garlicks Arch, Send Marsh, Policy A43

The initial proposal to build 400 homes at Garlicks Arch was a ridiculous proposal and received 7000 objections. The previous objections to this have been ignored. To have increased this to 550 homes (an increase of 37%) is overly excessive and is made in complete disregard of the previous objections. The land is in the Green Belt and contains ancient woodland, drainage is poor and the land is subject to frequent flooding, it is also contaminated with lead shot. Development here would join up the villages of Ripley and Send, there would be no distinction between the two villages constituting over development. Perhaps most significantly, the surrounding infrastructure cannot cope – roads around the village are snarled up with traffic with increasing pollution levels, the increased volume of traffic, (assuming the majority of households have two cars), is unmanageable and from a health standpoint it increases risk. The doctor’s surgery is at breaking point, as verbalised by the staff at the surgery directly, local schools cannot cope, (and a local infants school in Ripley has been closed increasing the pressure on the remaining schools in the area).

Attached documents:

---

Comment: MM41 - LPMM18/62  Respondent: Jo Williams 10750593  Agent:

MM27, MM41, MM42, MM48 - Transport Strategy

The implications have not been properly assessed or addressed by the A3 changes and the Clandon slip roads. Potential significant traffic impact upon Send Barnes Lane and Send Road of traffic heading for Woking, increased noise and pollution levels, additional delays and gridlock on the roads.

Attached documents:
**Comment: MM41 - LPMM18/4003  Respondent: John Herbert 10756033  Agent:**

MM41 Garlick's Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Attached documents:**

---

**Comment: MM41 - LPMM18/3735  Respondent: Jo Murray 10756641  Agent:**

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

This is Green Belt land and a beautiful part of Send. There is no need to build on Green Belt land for any reason currently; there are no special circumstances, so this is against GBC's MM9 Green Belt Policy. The site features ancient woodland and I consider it would be a criminal act to destroy it. It is also land that floods frequently and will therefore be more expensive to build on than other sites and could cause even worse flooding throughout the village than has recently been experienced, leading to damage to other residents' properties and to our local roads.

The Inspector is ignoring thousands of previous objections to a lower number of houses at this site and an increase of nearly 40% is excessive. The two villages of Send & Ripley will become joined and this constitutes over-development. There are insufficient school places or medical facilities to cope with such a huge increase in the size of our village and local roads are already gridlocked throughout the morning and evening rush hours.

**Attached documents:**

---

**Comment: MM41 - LPMM18/149  Respondent: Mrs Lizzie George Buchhaus 10757185  Agent:**

37% increase in the number of houses proposed..unacceptable

7000 previous objections ignored

at least 800 extra cars causing congestion, pollution

school and medical facilities will be at crisis point

**Attached documents:**

---

**Comment: MM41 - LPMM18/1128  Respondent: Mr Jack Aboe 10774817  Agent:**

Increasing the number of houses will directly effect the traffic situation through Send village adversely

**Attached documents:**

---

**Comment: MM41 - LPMM18/778  Respondent: Kate Cheyne 10774881  Agent:**

**Attached documents:**

---
I am a resident in Send at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] and object to the proposed development.

My objections relates to the Main Modification to the proposed development for Send.

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

In spite of previous objections by numerous residents, this has been increased from 400 to 550 homes of which 450 to be built in the first five years. An increase of 37% in the number of houses proposed is excessive.

Approximately 7,000 objections to the previous lower number have been ignored and proposed development continues to increase in scale. My objections are on the basis of:

- This is Green Belt containing ancient woodland.
- Send and Ripley villages will be joined and this constitutes over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will cause congestion in the adjacent roads which are not designed to cope with this scale of traffic
- School and medical facilities will be strained to breaking point; to this point I have seen no plans to increase the capacity of these services

**Attached documents:**

---

**Comment: MM41 - LPMM18/783  Respondent: Kate Cheyne 10774881  Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

**Attached documents:**

---

**Comment: MM41 - LPMM18/4811  Respondent: Wendy Lodge 10775137  Agent:**

**I object to MM41 change at Garlick’s Arch because:**

It ignores all the **seven thousand previous objections** made by local people

It is beautiful permanent Green Belt and no “exceptional circumstances” exist to allow development on it.

It will cause over-development of our village and the proposed number of houses increased by 37%, from 400 to 550, is excessive.

It will join up Ripley and Send and defeat the key purpose of Green Belt.

It is subject to frequent flooding and is currently a flood zone 2 allocation.
It is contaminated by lead shot accumulated over fifty years.

It will generate excessive traffic, probably up to 1000 extra cars, that will block up the local roads of Send and Ripley.

It adds to the 45% increase in houses in Send which will overwhelm our local services and change the character of the village. The local schools and GP surgery do not have the capacity to serve this increase in population.

Attached documents:

Comment: MM41 - LPMM18/4845  Respondent: Wendy Lodge 10775137  Agent:

I object to MM27, MM41, MM42 and MM48.

Traffic has increased considerably through Send Village in the past ten years. The extra traffic that is bound to clog the A247 from the new slip roads with the A3 will expose villagers to significantly increased pollution levels. Children walking to the local school already are subjected to this. Another 700 houses with, maybe, a further 1400 cars are not going to help. I do not believe GBC has looked at this in a sufficiently robust manner.

Attached documents:

Comment: MM41 - LPMM18/304  Respondent: Prue Robinson 10776033  Agent:

Main Modifications to MM41 Land at Garlick's Arch, Send Marsh, MM42 Land at Burnt Common, London Road, Send, MM44 Land at Alderton's Farm, Send Marsh Road, MM9 Green Belt Policy and MM27, MM41, MM42 and MM48 Transport Strategy, and Other Developments.

MM41 Land at Garlick's Arch, Send Marsh, Policy A43

I object most strongly to Policy A43

These are my reasons:

There have been 7,000 objections to the previous lower number (400) and they have all been ignored. And now there appears to be an increase of 37% in the number of houses proposed (550).

This is excessive. It is an outrageous increase from 400 to 550 homes and will cause an immense over-development of our village. The doctors' surgeries will not be able to cope with the demand from the proposed number of new residents, it is already difficult to get an appointment in the week that one phones the surgery requesting one. Also local schools, one of which has recently had a forced closure will not be able to offer places for the children from these new homes.

Crucially the additional traffic that your amended plans would generate will mean at least an additional 800 cars tipping out onto the already overloaded local roads. There are already noticeable rush hours here with stationary traffic and queues that stretch from Old Woking all the way to the M25, through both Send and Ripley villages. I am sure you must be aware of this current situation. Your changed plan would cause heavy traffic for many hours each day and totally gridlock all the roads in the whole area at least twice daily, if not three times including when local scrolls finish for the day at around 3pm.

Garlick's Arch is a permanent and lovely Green Belt piece of ancient woodland that has existed since the 16th century. The loss of this unique area of woodland is unthinkable and the fact that Ripley and Send will effectively be joined into
one sprawling town utterly defeats the key purpose of Green Belt. Besides, this the area is subject to frequent flooding and has been given a 'flood zone 2' allocation. And added to this high risk of flooding there is accumulated lead shot in this particular area and it is therefore contaminated.

</tbody>
</table>
It doesn't take k e a genius to suggest t h at Schools locally are stretched!!!! GP surgeries are at breaking point!!!!!

Council tax is very expensive in the Guildford Borough!!!!!! And not a great deal of service in return so how will the people that will supposedly inhabit these new builds even be able to pay a mortgage????

CONGESTION!! Total big issue in our lovely village there really is no room for an estimated 800 extra cars on our roads!!!! I am thinking anyone making decisions at GBC on our behalf cannot live where I do.....

Please STOP ignoring the people of Send Marsh and surrounding areas!!! WE DON'T WANT OR NEED THIS OVER DEVELOPMENT OF THE PLACE WE LIVE!!!!!!

Comment: MM41 - LPMM18/240  Respondent: Moira Payne 10782241  Agent:

I would like to object to the following aspects of the local plan for the following reasons.

MM41 Land at Garlicks Arch. This is gross overdevelopment which would effectively join Ripley, Burnt Common and Send, thus destroying their individual identity.

Attached documents:

Comment: MM41 - LPMM18/261  Respondent: Moira Payne 10782241  Agent:

I would like to object to the following aspects of the local plan for the following reasons.

I object to MM41 Land at Garlicks Arch. This is gross overdevelopment which would effectively join Ripley, Burnt Common and Send, thus destroying their individual identity. This is green belt land containing ancient woodland and 550 homes would cause massive strain on infrastructure and local services.

Attached documents:

Comment: MM41 - LPMM18/5464  Respondent: Murray Dudgeon 10782689  Agent:
MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

**Comment:** MM41 - LPMM18/798  **Respondent:** Jane Baker 10784769  **Agent:**

Once more Guildford Borough Council, its Planning Committee and the Planning Inspector have completely disregarded the 33,000 objections made by local citizens to the original plan and have actually made the situation WORSE for Send.

It has also made sure that previous objections cannot be presented again, only the changes that have been made. Thus once again wiping out the entire 33,000 objections. Send now faces four new housing developments, a huge industrial warehouse complex, two new A3 slip roads and major grabbing of green belt land. Disgraceful and entirely UNDEMOCRATIC.

I therefore strongly object to the following:

MM41 Land at Garlick's Arch, Send Marsh, Policy A43

Now 550 homes.

An increase of 37% in the number of houses is excessive.

It ignores 7000 previous objections made by local people.

It is an ancient woodland that existed at the time of Elizabeth 1.

It will join up Ripley and Send defeating the purpose of the Green Belt.

It is subject to frequent flooding and is currently flood zone 2 allocation.

It will generate excessive traffic onto already busy local roads in Send and Ripley.

At least 800 cars will block adjacent roads.

School and medical facilities will be strained to breaking point.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications of the above developments plus those for nearby Gosden Hill and Wisley/Ockham have not been adequately addressed by GBC who has made no real assessment of the traffic situation as thousands of cars head down Send Barns Lane and Send Road towards Woking.

Attached documents:

**Comment:** MM41 - LPMM18/2222  **Respondent:** Norman Carpenter 10793697  **Agent:**

I OBJECT to the following propositions in the latest Guildford Local Plan 2018

MM41 Garlicks Arch
The original idea of this site was flawed and it is amazing you have re-inserted with EXTRA houses. As an ex-resident of the "Wisley Estate" (21 years I suffered the devastation of 2 floods and the effect of the proposal will guarantee further flooding. The effect of 800+ extra cars will cause further blockage to adjacent roads. The local school and medical facilities are already overloaded.
Development will put on local services. Congestion and pollution and the huge increase in population will destroy our community. I object most strongly to MM41.

Attached documents:

Comment: MM41 - LPMM18/5431  Respondent: Roger Harrison 10802177  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded

Attached documents:

Comment: MM41 - LPMM18/681  Respondent: Steve Green 10803361  Agent:

I hope you are well. I am writing to object to the modifications resulting from the Planning Inspector’s Report impacting the village of Send within Guildford Borough. Overall, the danger is that, if the proposals/modifications go ahead, Send will be transformed in such a way that its village identity will be permanently destroyed. Linked to this, there will be significantly increased congestion, pollution and resulting damage to the environment. This will impact residents both in Guildford Borough and beyond.

Specifically, I object to Main Modification 41 (Land at Garlick’s Arch, Send Marsh, Policy A43) because:

- An increase of 37% in the number of houses will destroy the village identity
- It ignores 7,000 objections already lodged
- It is Green Belt containing ancient woodland
- It will join up two separate villages (Send and Ripley) without sufficient school places with the recent closure of Ripley Primary school and no extra capacity at Send Primary school
- The site is subject to frequent flooding (a flood zone 2 area) and contamination by lead shot
- The extra cars will block up the adjacent roads and increase air pollution of carbon monoxide, nitrogen monoxide and nitrogen dioxide
- Medical facilities will be unable to cope with the increased demand

Attached documents:

Comment: MM41 - LPMM18/686  Respondent: Steve Green 10803361  Agent:

Regarding MM27, MM41, MM42 and MM48 Transport Strategy

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

Attached documents:
**Comment: MM41 - LPMM18/1178**  **Respondent:** Mr Robert Mote 10805537  **Agent:**

I object to this revised proposal.

In common with many of these Main Modifications, no notice or understanding of the previous 7000plus objections has can be seen.

In fact this MM represents an increase of 37% over the previous proposal, which in itself was excessive. The revised number of houses clearly constitutes an over-development, and is likely to result in a merging of Ripley and Send.

The impact on Green Belt will be even worse than previously documented, having an even greater impact on known ancient woodland.

Whilst the modifications stated suggest mitigations for the significant additional traffic from the permanent (residents) and temporary (construction) sources, it is impossible to believe these will be effective given the existing limitations of roads / house / etc. Therefore this excessive development will have a serious and detrimental impact on existing residents and their lives.

No mention has been made of mitigations for the increased residents on local facilities (doctors, school, etc). This suggests inadequate thought and investigations.

**Attached documents:**

MM41

I object to the proposal to build 550 houses in an area that is subject to regular flooding, Green Belt, and ancient woodland.

This assault on Send's already strained roads, together with a cavalier attitude to Green Belt which cannot be replaced, must be deterred.

Attached documents:

Comment: MM41 - LPMM18/436  Respondent: Belinda Middleton 10807745  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The number of houses proposed is excessive. It is on green belt land and the development will block the roads nearby which are already prone to significant traffic at peak times. School and medical facilities will be further strained and additional traffic will make crossing the road outside Send Primary School even more dangerous. Send Primary School is full, we do not have a Secondary School (kids are rejected from George Abbot and Hoe Valley and sent to other schools further away) and the doctors is at capacity. There is no infrastructure for these additional homes.

Attached documents:

Comment: MM41 - LPMM18/440  Respondent: Belinda Middleton 10807745  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. As noted above nearby roads are popular with cyclists and children travelling to Send Primary and Clandon CofE Schools. Increasing the traffic on these roads will be dangerous, noisy and massively increase pollution to the cyclists, runners and children as they travel to school.

Attached documents:

Comment: MM41 - LPMM18/2824  Respondent: Bernice Williams 10809377  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:
I am appalled at the revised local plan which has increased from 400 to 550 homes an increase of 37% to be built in Send when the revised forecast for Guildford has been reduced by 45% in the revised forecast for Guildford by the office of National Statistics. I am also lead to believe the inspector visited Send at the end of August during a holiday period when the schools were on holiday as were many residents, therefore he did not witness the congestion on the roads that exist between the hours of 8 to 9.30 am and 5 to 6.30 pm. It is imperative that a highways report and feasibility study is made and published before any further development is permitted. Send and Ripley are already at saturation point traffic wise. Another problem is the strain on existing schools and medical services which are at full capacity now.

Previous objections have not been considered that this land floods and pictorial evidence was provided. It is Green Belt containing an ancient woodland and the impact on the adjacent roads would be impossible.

There are no definite plans laid out and it is impossible to widen Send Road or the Clandon Road to accommodate the increase in traffic approaching or returning from the A3. These are narrow roads in many places and the traffic is already at a standstill at peak times. A full assessment must be made and published and I ask the inspector to revisit at peak times.

Objections to local plan

MM41

The figure of 550 homes is too great an amount, its such a large increase. The numbers and amount will impact badly on infrastructure of village and traffic and impact

Areas of concern for me would be (had already objected long with others and this was ignored)

The impact on the greenbelt land and nature wildlife.

The amount of traffic roads congested and getting unsafe and damaged.

School, medical facilities have not been figured in.

Attached documents:
MM27, MM41, MM42 and MM48

Traffic implication again as more cars will use my road Send road, as it is my son is learning to drive and the road is too congestion for us to even get out of. The speeding and level of traffic dangerous. The house has experienced cracking and damage due to it being roadside and volume and amount of traffic.

Will we as home owners be compensated? we have complained previously? the increase in volume of traffic in Send Road is damaging our house and its losing value and council increasing numbers and traffic this will make it worse.

Its often gridlock in Send road outside our house. If an incident on A3 nothing moves. Its impacting on our ability to work/drive and move about.

Pollution would be increased with even more traffic and we may have health issues due to this. With weight and volume of traffic the house cracking i mentioned could become unsafe made worst by the councils plans.

Attached documents:

Comment: MM41 - LPMM18/476  Respondent: Maggie Cole 10816705  Agent:

MM41 – Garlicks Arch – Policy A43

The increase in the number of proposed units is excessive.

Previous objection to the original plan are not taken into consideration.

It is a Green Belt site and should remain so.

Developing Garlicks Arch will join up Ripley and Send and its was always my understanding that GBC pledged to keep villages as separate entities.

The roads cannot cope with the increase in traffic. As a walker, I can wait over 10 minutes to cross main roads in the area at peak times and I would never want to see a child try to negotiate the roads.

Schools and medical facilities are already stretched, especially with the closure of the school in Ripley.

Attached documents:

Comment: MM41 - LPMM18/481  Respondent: Maggie Cole 10816705  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

If GBC go ahead with all the sites in the local plan the road system will come to a grinding halt. The increase in traffic will just cause more gridlock, more frustration to road users, and hence more accidents. Drivers will try to circumnavigate the problem areas down single track roads and cause endless damage and accidents will happen. Every day there will be more noise, more pollution, more delays and more gridlock.

Attached documents:
REF. MM41

LAND AT GARLICKS ARCH, SEND MARSH, POLICY A43

OBJECTIVES: Too many houses for infrastructure to cope with.
Green Belt with ancient trees.
Flooding and contamination.

REF. MM27, 41, 42 and 48

TRANSPORT STRATEGY

OBJECTIONS: There would be total gridlock at rush hours if this amount of development overall is allowed in our small village.

Attached documents:

Comment: MM41 - LPMM18/272  Respondent: Vanessa Birchall-Scott 10818241  Agent:

Specific objections:

MM41
Land at Garlicks Arch, Send Marsh.

Policy A43 Increased from 400 to 550 homes (450 to be built in the first five years), an increase of 37%.

- 7000 objections to the previous lower number already provided
- Green Belt containing ancient woodland.
- Joins Send and Ripley
- Leads to over development
- Risks flooding and contamination
- Significant increase in traffic and related congestion, especially at peak times
- School and medical facilities and even retailers and linked car parking will be unable to cope

Attached documents:

Comment: MM41 - LPMM18/277  Respondent: Vanessa Birchall-Scott 10818241  Agent:

MM27 MM41 MM42 and MM48

Transport Strategy
The traffic implications for Send of:
Garlick's Arch,
Burnt Common,
Clockbarn
Alderton's
Gosden Hill
Wisley/Ockham

are not adequately addressed by the A3 / Clandon slip road changes.

No proper assessment of the aggregate traffic impact causing increased noise, nitrogen dioxide pollution, delays and gridlock has been undertaken.

**Attached documents:**

---

**Comment: MM41 - LPMM18/2127  Respondent: D Smith 10819329  Agent:**

My Wife and I have lived in SEND for over 46 years, during which time traffic has slowly increased.

The proposed changes to the local plan will result in a very large increase in the number of cars and heavy lorries passing through the Village. The result will be an escalation in noise, delays and pollution, which will spoil the rural nature of the village and make it a less desirable place to live.

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I object to the excessive increase in the number of houses proposed for this site, which often floods.

The site is Green Belt and contains ancient woodland.

It will join up Send and Ripley which will be considered as over development.

**Attached documents:**

---

**Comment: MM41 - LPMM18/2132  Respondent: D Smith 10819329  Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

Changes to the A3 Clandon slip roads will have an impact on Send Barns Lane and Send Road as thousands more cars make for Woking. This will also have consequences for Old Woking, as the roads are very narrow with many parked cars, which large vehicles have trouble navigating.

As far as I know no detailed assessment of the impact has been made.

**Attached documents:**
**Local Plan Proposals**

I wish to object most strongly to the proposed local plan proposals because:

**MM41 land at Garlicks Arch Send Marsh Policy A43**

The proposal for an additional 550 homes outlined on the above policy, is an increase of 37% on the previous report. The land in question is currently designated Green Belt and is permanently protected by the NPPF which prevents merging of settlements. The site has a particular conservation aspect as it is covered in ancient woodland dating from the 16th century and would be endangered by the scale of these developments. The development of these sites will create a substantial increase in local traffic through Send and Ripley villages which are already very busy and congested at peak times.

**Attached documents:**

---

**Green belt Policy MM9**

The proposed over development of Send area in particular directly contradicts the claim to protect the Green Belt.

At none of the proposed development sites in Send area can it be demonstrated that there are very special circumstances to make exceptions to The Green Belt Policy.

**Attached documents:**

---

**Garlicks Arch MM41**

Despite there being over 7000 objections to this development site alone, it is now proposed to increase the size of it by over 30% to 550 dwellings and this is considered to be an outrageous abuse of planning authority powers.

Parts of the site regularly flood and although this risk may be eliminated by increasing ground levels, the problem would simply be moved to other areas, most probably putting the houses in Maple Road at further risk.

**Attached documents:**

---

**This is to object to Guildford Borough Council Local Plan. I object to MM41 Land at Garlicks Arch Send Marsh Policy A43**
Increasing 450 to 530 homes is an increase of 37% approx. It is green belt containing ancient woodland that soaks up nitrogen dioxide levels of which are already high dangerously now being a health hazard especially for children. We need more schools and doctors surgeries but you fast close schools down. There are no community [unreadable text] you will be pushing there to breaking point. It [unreadable text] and has lead shot contamination.

Attached documents:

**Comment:** MM41 - LPMM18/834  **Respondent:** D Davies 10820961  **Agent:**

**MM9 Green Belt Policy MM27 MM41 MM42 and MM48**

I think the planning committee pays no attention to the Green Belt and Public Transport. They just want houses and careless about increased noise, nitrogen dioxide and delays and gridlocks plus there are other developments coming up. We need less houses and more amenities. The plan is rubbish.

Attached documents:

**Comment:** MM41 - LPMM18/968  **Respondent:** Karen Dougherty 10822913  **Agent:**

I wish to lodge my objections as follows:

**MM41 Land at Garlicks Arch, Send Marsh,**

Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years

- An increase of 37% in the number of houses proposed is excessive.
- 7000 objections to the previous lower number have been ignored.
- It is Green Belt containing ancient woodland.
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- The site is covered in high voltage electricity pylons which it has been proven have health risks
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

Attached documents:

**Comment:** MM41 - LPMM18/973  **Respondent:** Karen Dougherty 10822913  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.
I set out my objections to the new Main Modifications to the Guildford Local Plan

**MM41 Garlicks Arch**

I strongly object to the further increase to the proposed number of houses (going up from an already excessive 400 to 550 homes). Send existing infrastructure in terms of roads, schools, shops and GP facilities will not be able to cope with a huge increase in number of households. New residents will have to travel further afield to get to Schools in Woking/Guildford adding even further pressure to traffic demand. Currently morning and evening traffic is very busy WITHOUT this increase in demand. With the increase, the risk of daily gridlock will increase substantially.

I am deeply concerned about the above modifications as well as nearby large proposed developments and combined impact on local roads. A3 Clandon slip road will only increase demand on local roads that are not just designed with a significant increase in traffic. Gridlock risk and environment impact needs to be properly assessed.

In addition to objecting individually to the above Main Modifications, I would like to raise a final objection about the excessive proposed developments within the area of Send/Burnt Common. Given the size of the Guildford Borough area, it seems that a disproportionate burden is being placed on Send compared to other Guildford Borough communities.

I would like to object, again, to the large-scale planning application of 100 acres between Ripley and Burnt Common. We purchased our home in the rural village of Send and do not want to be part it to become a large town. The current school, doctor’s surgery and surrounding roads are already at full capacity; this large-scale development is not wanted or required. A further summary of my main concerns are:
MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Increased from 400 to 550 homes of which 450 to be built in the first five years

MM42 Land at Burnt Common, London Road, Send, Policy A58

Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has been increased twice, doubling the area.
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity.
- There are no special circumstances so it also contradicts MM9.
- The Employment Land Needs Assessment showed a reduction in demand for industrial land.
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous.
- At least 800 extra cars will block up the adjacent roads which are already grid locked at peak times.

Comment: MM41 - LPMM18/919  Respondent: Kathryn Fox 10828801  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/3308  Respondent: Carey Lodge 10828961  Agent:

I object to MM41 change at Garlick’s Arch because:

It ignores all the seven thousand previous objections made by local people

It is beautiful permanent Green Belt and no “exceptional circumstances” exist to allow development on it.

It will cause over-development of our village and the proposed number of houses increased by 37%, from 400 to 550, is excessive.

It will join up Ripley and Send and defeat the key purpose of Green Belt.

It is subject to frequent flooding and is currently a flood zone 2 allocation.

It is contaminated by lead shot accumulated over fifty years.

It will generate excessive traffic, probably up to 1000 extra cars, that will block up the local roads of Send and Ripley.
It adds to the 45% increase in houses in Send which will overwhelm our local services and change the character of the village. The local schools and GP surgery do not have the capacity to serve this increase in population.

**Comment:** MM41 - LPMM18/3312  **Respondent:** Carey Lodge 10828961  **Agent:**

I object to MM27, MM41, MM42 and MM48.

Traffic has increased considerably through Send Village in the past ten years. The extra traffic that is bound to clog the A247 from the new slip roads with the A3 will expose villagers to significantly increased pollution levels. Children walking to the local school already are subjected to this. Another 700 houses with, maybe, a further 1400 cars are not going to help. I do not believe GBC has looked at this in a sufficiently robust manner.

**Comment:** MM41 - LPMM18/1633  **Respondent:** Julie Brown 10829121  **Agent:**

**MM41 Garlick’s Arch**

The original plan to build houses on green-belt land containing ancient woodland was unacceptable.

The proposed 150 increase in the number of houses just makes it worse. There are already long traffic jams in rush hour through Send village and this proposed modification will make it intolerable. In addition, there is insufficient schooling and medical facilities to support so many additional residents.

**Comment:** MM41 - LPMM18/1638  **Respondent:** Julie Brown 10829121  **Agent:**

**Transport strategy for MM27, MM41, MM42 nd MM48**

There has been no rigorous assessment of the impact of the proposed developments on traffic flows in the area. The road to Woking is already gridlocked in rush hour times. The proposed developments would lead to significantly worse traffic which would be intolerable to existing residents.

**Comment:** MM41 - LPMM18/762  **Respondent:** Kevin Nicholls 10829281  **Agent:**

I am objecting (again) to the following aspects of the GBC local plan:
MM41 - An increase from 400 to 550 homes at Garlicks Arch.

I am concerned that previous objections have been completely ignored and in light of recent flooding issues in Send and the A3 corridor, this proposal will only raise the risks of further and worse flooding for the area.

The plan does not explain the necessary infrastructure that will be put in place to cater for the rise in population and vehicles etc. I am deeply concerned about the effect this proposal will have on the already heavily congested roads around Send and Burnt Common and similarly have no confidence that the plan will deliver on its strategy of improving cycling and walking facilities. I drive along the Portsmouth Rd and A247 regularly and deem these roads are not adequate for casual cycling and are in fact unsafe.

Attached documents:

Comment: MM41 - LPMM18/764  Respondent: Kevin Nicholls 10829281  Agent:

MM27 MM41 MM42 & MM48 Transport Strategy

As highlighted in the Parish Council report, it is unclear how the traffic implications associated with development contained within the local plan, will be addressed. The proposed changes to the A3 are not adequate and a full and proper assessment needs to be carried out to examine the impact that thousands more vehicles will have around our existing village and environs.

Attached documents:

Comment: MM41 - LPMM18/3630  Respondent: AJ Cheeseman 10830753  Agent:

MM41 Land at Garlick’s Arch, Send Marsh. Policy A43

I object to the increase in homes from 400 to 550 at Garlick’s Arch because:

- It ignores all the thousands of previous objections made by local people;
- It is beautiful permanent Green Belt and no ‘exceptional circumstances’ exist;
- It will cause over-development of our village and the number of homes is excessive;
- It is exquisite ancient woodland that existed at the time of Elizabeth 1;
- It will join up Ripley and Send and defeat the purpose of the Green Belt;
- It is subject to frequent flooding and is currently a flood zone 2 allocation;
- It is contaminated by lead shot accumulated over fifty years;
- It will generate excessive traffic that will block up the local roads of Send and Ripley;
- It will create an increase in pollution which will be detrimental to the health of the villager;
- The current infrastructure re schools and medical facilities will not cope with the increase in population.

Attached documents:

Comment: MM41 - LPMM18/3644  Respondent: AJ Cheeseman 10830753  Agent:
MM27, MM41, MM42, MM48 Transport Strategy

- All the proposed developments do not take into consideration the impact of traffic on the community. There could be a further 2000+ cars and lorries going through Send creating noise and air pollution and traffic gridlock. I have lived on Send Barns Lane for the last 6 years and have noticed the traffic get increasingly worse without any new developments. The pollution is evident from the pollution deposits I find on the inside window sills, I have no idea what it is doing to my lungs.
- GBC has no transport strategy.

Attached documents:

Comment: MM41 - LPMM18/2344  Respondent: PE Whatley 10830785  Agent:

I am writing to object to the proposed plans for our area.

Objection to MM41 - Land at Garlick's Arch A43

I object to the way that the huge previous response to the proportion of houses to be built in the village overall, but primarily on this site, has been ignored and instead has been increased! The number of houses to be built have been increased by a considerable margin, with a massive influx in the first few years and no plans for better infrastructure to be in place beforehand.

I object to the way the lack of required infrastructure has been swept to one side as if it is unimportant and the only thing that matters is getting more in homes in Guildford regardless of the effects on the existing population.

550 homes here (together with other planned developments in the village) will cause our already congested area with few transport links massive traffic problems. Affordable housing is a joke as the promises of large developers to offer 'affordable housing' and new infrastructure are well-documented to be left out when it comes to the point of delivery and with no possibility of enforcement.

The doctor's surgery and schools are already choked and Ripley School’ closure means children will have to travel further to schools at a time when we are trying to cut down on unnecessary travel. This is a laughable situation.

Attached documents:

Comment: MM41 - LPMM18/2435  Respondent: Ms Katherine Gervasio 10836033  Agent:

I have lived at the above address for the last 22 years and I would like to make my objections known for the latest proposed Local Plan Modification in Send.

MM41 Land at Garlick’s Arch, Policy A43

I object to the expansion of this development from 400 to 550 houses – it is just excessive and unnecessary. There were 7000 objections to the original proposal of 400 during the consultation so how on earth can this extra amount of houses be justified or are the objections of local residents completed disregarded? This development will basically join up Ripley and Send which surely constitutes over development. The site is often flooded and there is lead shot contamination in the field. Where will the children from this development go to school? Ripley Primary has just been closed and the other primary schools in the area are oversubscribed already! As to where all these people are going to find medical help – the Doctor Surgery is at full capacity.
MM27 MM41 MM42 and MM48 Transport Strategy

I object to the inadequate changes to the A3 and Clandon slip roads proposed by Guildford Borough Council which will not accommodate the huge increase in traffic if the Garlick Arch, Burnt Common Clockbarn and Alderton's Farm developments go ahead. These developments added to the nearby Gosden Hill and Wisley/Ockham developments will augment the traffic on Send Barns Lane and Send Road as thousands more cars head to Woking every day and the damaging effect of this on pollution, noise, gridlock and delays has not been properly assessed.

I would like these objections to be noted and preferably listened to - unlike the 33,000 earlier objections sent in by me and other local residents which seem to have been completely ignored.

Attached documents:

Comment: MM41 - LPMM18/795  Respondent: J.H. Lakeman 10837665  Agent:

Once again, I feel obliged to have to object to the modifications to the Local Plan as they impact the village of SEND excessively.

I object to MM41 Land at Garlicks Arch, Send Marsh, Policy A43, it is an ancient woodland & Green Belt and an increase of over 35% in housing with the resultant traffic will practically block the surrounding roads which are already heavily overcrowded. This will almost join-up Send & Ripley, wrecking two villages and strain both medical facilities and schools. The area of the site is contaminated by lead shot and subject to frequent flooding.

Attached documents:

Comment: MM41 - LPMM18/2686  Respondent: Jacky Fenton 10839009  Agent:

Local Plan: Strategy and Sites - Main Modifications

I am writing again to object to the modifications to the Local Plan as follows:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I strongly objected previously to the housing suggestion at Garlicks Arch. Now you are suggesting even more houses from 400 to 550 an increase of 37%, this is excessive! You have totally ignored our 7000 objections to the previous lower number.

Again, I strongly **objected previously** to removing Send from the Green Belt because this area is permanently protected by the NPPF which prevents merging settlements! This area contains ancient woodland with trees from the 16\(^{th}\) Century.
Send Road is already gridlocked all day long and not just in rush hour. Another 800 cars on the road will block up all adjacent roads too.

Ours Schools and Medical Facilities are already stretched to capacity with the housing we have currently. These facilities cannot handle more population.

Garlicks Arch will join up Send and Ripley and will cause major over development and thus be subject to frequent flooding. This area is contaminated with lead shot so will pollute the areas around it.

Attached documents:

Comment: MM41 - LPMM18/2691  Respondent: Jacky Fenton 10839009  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Gosden Hill and Wisley/Ockham developments have not been adequately addressed by the A3 changes and the Clandon slip roads. You have not assessed the amount of traffic that is currently on the roads let alone the thousands more cars heading to Woking everyday causing increased noise, pollution and gridlock!

Attached documents:

Comment: MM41 - LPMM18/1153  Respondent: F.A. Howell 10839393  Agent:

Re: MM41 - Land at Garlicks Arch, Send Marsh, Policy A43

MM42 - Land at Burnt Common, London Road, Send, Policy A58

MM44 - Land at Alderton's Farm, Send Marsh Road - Policy A63

MM9 - Green Belt Policy

MM27, MM41, MM42 and MM48 - Traffic

There are unimaginable difficulties with your proposed plan for Send and Send Marsh. There is not enough infrastructure to house the proposed amount (for example)

• of cars (and the extra pollution that they will bring)
• a lot more people needing healthcare
• schooling
• our small country lanes
• and we are DEFINITELY NOT AN INDUSTRIAL AREA, why not enlarge Slyfield, which has empty space readily available?
• plan to route the A3 traffic towards Woking through Burpham.

The proposed 750 houses will more than likely mean 1500 more cars on our narrow roads. We can't move freely now when there are roadworks or an accident or breakdown, let alone move with all this extra traffic.

Try coming around to this are at 'rush' hour or when there has been an accident - it's a nightmare.
NO, NO, NO TO YOUR PLAN

Attached documents:

Comment: MM41 - LPMM18/1763  Respondent: Lawrence Harris 10839649  Agent:

I refer to GBC Local Plan Main Modifications and wish to make the following objections to proposed modifications affecting the village of Send:

MM41...Policy A43

I object to the proposed increase in the number of houses from 400 to 550 as it is excessive (37%) and takes absolutely no notice of all previous objections to this development. There appears to have been little or no consideration of points raised with respect to drainage, Green Belt infringement, traffic congestion, ground contamination, destruction of ancient woodland and the creation of ribbon development along the A3 which effectively connects Send with Ripley.

Attached documents:

Comment: MM41 - LPMM18/1768  Respondent: Lawrence Harris 10839649  Agent:

MM27, MM41, MM42 and MM48...Transport Strategy

I cannot see any evidence that a proper traffic impact assessment has been carried out to ‘prove’ the actual impact on the villages of Send and Clandon of the proposed changes to the A3 at Burnt Common. It is not acceptable to merely ‘state’ that everything will be ‘fine’ when it clearly will not as thousands more vehicles head through both villages every day!!

Attached documents:

Comment: MM41 - LPMM18/1013  Respondent: Mark Pycraft 10839937  Agent:

MM41 - Land at Garlick's Arch, Send Marsh Burnt Common and Ripley

This site is also falls foul of the National Planning Policy Framework (point 80), as detailed above (see MM44), as it would join up Ripley and Send. In terms of building, there is ancient woodland at this site; even more notable is that, like site MM44 it is often flooded, and, I have been informed, poses a serious health threat, as it is contaminated with lead shot.

Even if these valid reasons are ignored, then it seems ridiculous to have increased the proposed number of houses to be built by nearly 40% more than in previous versions of the plan.

Main access to this site is proposed to be via the A247. Everyone familiar with this road knows that it already suffers from heavy congestion throughout the day, and during the rush hours can even be brought to a standstill, with traffic backed up from the Burnt Common roundabout, all the way down to Woking. Woking itself is undergoing significant redevelopment, so there will be a further increase in traffic as a result. Factor into this the additional 770 houses proposed for the area (at Clockbarn, Winds Ridge and Garlick's Arch), and one can see how chaotic the situation will be.
This is arguably the most significant reason to object to the development of sites MM44, MM42, and MM41; Send simply does not have the infrastructure to cope with the increased traffic. It is a small area with few roads, which are narrow and twisting, and are already struggling to cope with the current level of traffic. When one also considers the difficulty driving past the school in Send, with its speed restriction layout and the volume of cars parked on the road and grass verges as parents drop off or collect their children, one not only has to consider traffic congestion, but also the safety of pedestrians, including the increased pollution. Anyone who actually lives in or around Send knows that it is simply unsuitable for further development.

I hope these concerns are given due consideration.

Attached documents:

Comment: MM41 - LPMM18/1132  Respondent: J.A. Manlow 10840321  Agent:

It has been brought to my attention that all the objections raised regarding the redevelopment of Send and surrounding areas has been rejected. This is the 4th letter I have written because, as a resident of Send Marsh since 1968, I feel very strongly that the infrastructure of this historic beautiful area will be destroyed.

MM41 - Land at Garlicks Arch. Policy A43

An increase of 37% in the number of houses proposed is excessive - 7000 objections have been ignored.

Attached documents:

Comment: MM41 - LPMM18/1137  Respondent: J.A. Manlow 10840321  Agent:

MM27 MM41 MM42 + MM48 - Transport

The impact on Send Barns Lane and Send Road as thousands more cars lead to Woking every day, causing increased noise, pollution, delays and gridlock, will be much heavier.

Attached documents:

Comment: MM41 - LPMM18/2267  Respondent: John Pyne 10840641  Agent:

RE: Objections to Guildford Borough Council (GBC) Local Plan - Consultation due to close on 23.10.2018

I am writing in response to the latest version of the Local Plan as outline in GBC-LPSS-026. As in earlier versions of the plan, the modifications presented for Send are inappropriate, excessive and will be highly detrimental to our village, our quality of life and our future. These changes will result in irreversible destruction of our village.

The local plan in its current form illustrates the continued failure of GBC to provide a plan that is fit for purpose, supported by competent data made available in the public domain, which provides for the needs of current residents, and secures the best future for them and LISTENS TO LOCAL VOICES.
MM41 LAND AT GARLICK’S ARCH, SEND MARCH, POLICY A43

- I object to GBC going against Government guidance in their proposals to build on Greenbelt land and failing to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.
- I object that this development is proposed on Green Belt Land and will destroy countryside and ancient woodland.
- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
- I object because local infrastructure will not be able to support the additional demands of new residents.
- I object to GBC’s proposal to consider and adequately address infrastructure requirements when proposing an excessive, unnecessary and disproportionate increase in housing for Send and Send Marsh.
- I object because local schools and medical facilities will not be able to support the massive increase in demands resulting from this plan.
- I object because wildlife will be displaced.
- I object because the site is subject to frequent flooding, which will only worsen with increased buildings and ground coverage.
- I object because the land is contaminated by lead shot and this will compound the problem of increased flooding as outlined in my previous objection and be detrimental to health and well-being.
- I object to GBC ignoring the 7,000 previous objections raised by local residents with regard to developing this area.
- I object to GBC increasing by 37% the number of houses in this development, which is excessive and not supported by need but demand and proposed to promote excessive and unnecessary housing development in this area to the benefit of housing developers but not residents.
- I object to this development as it will ‘join up’ Send and Ripley and local character will be destroyed by this over development.
- I object that GBC continues to stand by its discredited and unreliable estimate for future housing need and fails to adjust this downwards by considering its erroneous assumption about student population forecasts in Guildford. This would of course impact on housing need across neighbouring areas including Send.

Attached documents:

Comment: MM41 - LPMM18/2278  Respondent: John Pyne 10840641  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM41 - LPMM18/1241  Respondent: Rosemarie Haxton 10840769  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

My objections to this proposal are

- This will join up the villages of Send and Ripley, losing their identity and causing over development.
• The excessive increase in cars and numbers of residents will block already busy roads, there are no school places as the local school in Ripley has already closed and the GP surgery is already overbooked
• 37% increase in houses is excessive and previous objections to a lesser number has been ignored, the local residents are not being listened to.

Attached documents:

Comment: MM41 - LPMM18/1246  Respondent: Rosemarie Haxton 10840769  Agent:

MM27, MM41, MM42, MM48 Transport Strategy

• This will not address the excessive increase in cars causing gridlock, extensive delays, noise and nitrous dioxide pollution.

Attached documents:

Comment: MM41 - LPMM18/5840  Respondent: Yvonne Woozley 10843521  Agent:

MM41, MM42, MM44, MM9, MM27 MM48

I am writing to object to plans for our village. I have lived here for 20 years and have seen traffic increase dramatically. I have to use the A3 up to M25 J10 most weekdays and it is perfectly clear that Send cannot cope with further traffic.

Increasing industrial areas and a massive increase in housing is completely the wrong thing for a village. We have a strong village feel in both Ripley and Send and I have lived in North London as a child and saw my village merge with the next one and eventually become part of London and it destroyed the area. I don’t want to see this happen here. There are some glorious greenbelt areas and ancient woodland and so there will be far better places to build that are brownfield sites.

I have already watched the Tannery Lane industrial area increasing in size. This is already a ridiculous place for an industrial site, right by the river along a narrow country lane and to increase the size is just not thought through!

I live on Send Marsh Road and building at Alderton’s will make an already dangerous and busy road, even worse. The sharp bend is very difficult to drive around and to cross over to get to Polesden Lane and with a dramatic increase in traffic, this would be impossible.

Along with Garlick’s Arch, Clockbarn, Winds Ridge etc, it is just too much for our infrastructure to bare. I have just had to wait 2 weeks for an appointment at the doctors and increased housing will just exacerbate the problem so that it is out of control.

My children were lucky enough to get into George Abbot school, but what do you intend doing with all the new children and associated traffic that so much building would create? Closing Ripley Primary was ill-thought out if you are intent on going ahead with this building, despite objections and the traffic at the Burntcommon roundabout to get to Send Primary will be ridiculous, especially if you’re considering building new slip roads to the A3 too.

So my main concerns are traffic congestion, destruction of the green belt, no provision for increased infrastructure such as doctors with so many new homes, increase in industrial space not appropriate for a village setting, over-development, flooding and a completely ignoring all previous objections!
Please reconsider destroying our villages of Send and Ripley. They will be destroyed if even a portion of this building goes ahead along with the modifications we are not able to object against such as the traveller’s site and Clockbarn etc. Please listen to your residents and think of the future of Surrey as a beautiful place to live and not just the financial advantages. In the long run, stopping this dense build up of population will save money, as the social problems in north London now, where I grew up are immense.

Attached documents:

Comment: MM41 - LPMM18/266  Respondent: Jackie Payne 10843585  Agent:

I wish to object to the proposed serious over-development of Send.

MM41 - land at Garlicks Arch, Send Marsh, Policy A43

This land is Green Belt and also ancient woodland. The building of 550 homes on this land would have a chronic effect on the infrastructure around Send's already busy roads. There would be an additional 800 cars on the local roads from this development alone. The local schools and doctor's surgery can't cope currently, let alone if this development goes ahead. An increase from 400 - 550 houses is totally unreasonable. The infrastructure just can't cope with this level of development.

Attached documents:

Comment: MM41 - LPMM18/4349  Respondent: Rosemary Key 10844641  Agent:

MM41 Garlicks arch Send Marsh Policy A43 for the following reasons:

The infrastructure within the area will not take the increase of the number of cars that will come out of the proposed housing numbers approximately 450 initially. We live in the area and have been waiting over 4 years for the current roads that will be impacted on to have the pot holes filled, the over all management of the street lighting and general repairs to the roads. We have seen no planing to support the infill of housing in this area. The impact on the small roads will be horrendous, traffic jams, accidents and delays within the Ripley and Send areas. Roads are too small to take this volume of expected traffic.

The joining of the two villages Ripley and Send will then create one large over developed area in an identified greenbelt area. The increase in proposed houses being built will surely be over development in this sensitive area.

Many thousands of objections have already been put to the Guildford Council and I wonder where these objections are now? Have they been disregarded? We voted the public committee members into position and they need to hear the voices of the electorate

Attached documents:

Comment: MM41 - LPMM18/4365  Respondent: Rosemary Key 10844641  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
Traffic management and infrastructure has not been properly addressed by the changes at the A3 slip roads, there needs to be a proper independent traffic impact analysis on the increase of traffic, through traffic as well as local due to the proposed increase in both housing and industrial estate development. The noise, pollution, delays and problems on the roads in these small poorly managed current roading has not been addressed in any documents provided to residents.

Attached documents:

Comment: MM41 - LPMM18/4592  Respondent: James Purkiss 10844673  Agent:

I object to MM41 for the following reasons; the number of houses proposed is far too many, infrastructure including roads, schools etc. is insufficient and there are no plans to address this.

Attached documents:

Comment: MM41 - LPMM18/2563  Respondent: John Wright 10844929  Agent:

I wish my comments to be seen by the Planning Inspector

I object to the following specific modifications to the Local Plan:

Policy A43, Land at Garlicks Arch, Send Marsh (Modification MM41)

I object to modifications MM41 Land at Garlicks Arch due to the following points.

An increase of 37% in housing numbers is excessive and will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further additions to the housing numbers are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This green belt land contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it with additional housing numbers.

An extra 150 houses means easily an extra 300 cars on the local roads, which cannot be accommodated.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

The local school and medical facilities won’t be able to accommodate extra housing. It is already at maximum capacity (not helped by the feeble decision to close Ripley school).

Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the previous consultations.

Attached documents:
Comment: MM41 - LPMM18/2568  Respondent: John Wright 10844929  Agent:

I object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn’t cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.

Attached documents:

Comment: MM41 - LPMM18/373  Respondent: John Ford 10846241  Agent:

It is with extreme disappointment that I have to, yet again, protest against the over development of Send. It beggars belief that the Planning Inspectorate in collusion with GBC have increased the number of properties planned for the village (as per the refs. above).

Do the PI and GBC not recognise the damage this will do to the infrastructure of this area? At the same time I understand there will be some incursion onto Green Belt land which contradicts Green Belt Policy.

I hope that the Local Plan is reviewed to allow Send to be relieved of the developments planned and more suitable sites found.

Attached documents:

Comment: MM41 - LPMM18/3318  Respondent: Frank Drennan 10846625  Agent:

RE: Objections to Guildford Borough Council (GBC) Local Plan – Consultation due to close on 23.10.2018.

I am writing in response to the latest version of the Local Plan as outline in GBC-LPSS-026. This letter is in addition to that submitted on behalf of my wife via my email of the 18th of October. As we share the same views and objections I have maintained the same arguments, and am submitting this further letter to ensure that my objections are separately registered.

As in earlier versions of the plan, the modifications presented for Send are inappropriate, excessive and will be highly detrimental to our village, our quality of life and our future. These changes will result in irreversible destruction of our village. It is clear from the latest ONS data (as highlighted in the footnote on page 4) that the case for this level of development is weak. It is fundamental to the effective workings of our public institutions, and the trust the public has in these, that decisions are made taking proper accounts of the objective facts. My objections are not against development per se, but against this excessive level of development that is being belligerently advanced on discredited data.

The local plan in its current form illustrates the continued failure of GBC to provide a plan that is fit for purpose, supported by competent data made available in the public domain, which provides for the needs of current residents, and secures the best future for them and LISTENS TO LOCAL VOICES.

MM41 LAND AT GARLICK’S ARCH, SEND MARCH, POLICY A43
• I object to GBC going against Government guidance in their proposals to build on Greenbelt land and failing to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.
• I object that this development is proposed on Green Belt Land and will destroy countryside and ancient woodland.
• I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
• I object because local infrastructure will not be able to support the additional demands of new residents.
• I object because local schools and medical facilities will not be able to support the massive increase in demands resulting from this plan.
• I object because wildlife will be displaced.
• I object because the site is subject to frequent flood, which will only worsen with increased buildings and ground coverage.
• I object because the land is contaminated by lead shot and this will compound the problem of increased flooding as outline in my previous objection and be detrimental to health and well-being.
• I object to GBC ignoring the 7,000 previous objections raised by local residents with regard to developing this area.
• I object to GBC increasing by 37% the number of houses in this development, which is excessive and not supported by need but demand and proposed to promote excessive and unnecessary housing development in this area.
• I object to this development as it will ‘join up’ Send and Ripley and local character will be destroyed by this over development.
• I object that GBC continues to stand by its discredited and unreliable estimate for future housing need and fails to adjust this downwards by considering its erroneous assumption about student population forecasts in Guildford. This would of course impact on housing need across neighbouring areas including Send.

Attached documents:

Comment: MM41 - LPMM18/3324  Respondent: Frank Drennan 10846625  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM41 - LPMM18/4572  Respondent: Amanda McDougall 10850625  Agent:

6. The Council’s proposals rely on A3 improvements and, as these are beyond the Council’s control, the Council cannot deliver their proposals.

Attached documents:

Comment: MM41 - LPMM18/494  Respondent: Evan Parry-Morris 10853249  Agent:
2. I wish to raise the following objections to the Guildford Local Plan MM27, MM41, MM42, MM48:

Many local roads around the villages of Send, Ripley and Clandon are narrow and there are already many instances of vehicles having to mount pavements to allow large vehicles to pass. This is particularly an issue on the A247 between Burnt Common and Clandon Crossroads. The inclusion of the Garlick’s Arch proposal, particularly the industrial and warehousing elements of the plan, is certain to make the situation far worse. I object to the development proposed in the local plan, which will result in more traffic using narrow roads.

Many of the villages are suffering from severe congestion, for example the Shell roundabout at Burnt Common, and the Newark Road & Rose Lane junction in Ripley. I object to the further development which will cause further congestion in and around our villages.

The A3 and M25 already suffer from severe congestion during rush hours, in addition, Highways England have no plans to improve the A3 prior to 2020. I object to the development of these sites shown in the local plan because trunk roads would be unable to cope.

Attached documents:

---

Comment: MM41 - LPMM18/497  Respondent: Evan Parry-Morris 10853249  Agent:

3. I wish to raise the following objections to the Guildford Local Plan MM41, Policy A43:

The increase in the number of houses by 37% is excessive.

The large number of previous objections (about 7000) have been ignored.

It is green belt land containing ancient woodland.

The site is contaminated and is subject to frequent flooding.

The increase in the number of cars, perhaps in excess of 800, will block adjacent roads.

Many local health services, such as the Villages Medical Centre, Send, are being stretched already, and it’s becoming more difficult to get doctor/nurse appointments without unacceptable delays. This would become significantly worse should the draft local plan be implemented. I object to the additional stress that would be caused should the proposals be implemented.

It will join Send and Ripley and constitute over-development.

Attached documents:

---

Comment: MM41 - LPMM18/282  Respondent: Sian Holwell 10854241  Agent:

MM41 Garlicks Arch. Despite over 7,000 objections to 400 homes, the plan is now for 550. The initial plan of building 400 homes seemed excessive to say the least given the immense strain it would place on local infrastructure and the lack of plans to develop nearby roads and services. To increase the development to 550 homes seems short-sighted at best and suggests you don’t care for the views of local people or the quality of the environment that you will be creating for residents (both existing and new)
I OBJECT to the number of houses to be built at Garlicks Arch, an increase of 37% of properties will mean a great number of extra vehicles blocking all adjacent roads.

The area is well known for flooding.

Like the rest of Send any traffic problems that occur on the A3 bring the village to a halt due to the traffic being diverted through our village this also causes hold-ups in Old Woking.

Send Barns Lane already has busy traffic due to parents bringing and collecting their children each day to school.

How will the schools cope with extra pupils and our village Medical Centre cope with extra patients, they are already under a great deal of strain.

Comment: MM41 - LPMM18/2191  Respondent: Susan Mansbridge 10855297  Agent:

MM27 MM41 and MM48 Transport Strategy

I OBJECT to what appears to be a lack of common sense to how the traffic situation can be solved, the infrastructure is just not there to be able to cope.

Attached documents:

Comment: MM41 - LPMM18/2760  Respondent: Imelda Rider 10855329  Agent:

I would like to object to the Main Modifications to the Guildford Local Plan.

MM41 Garlicks Arch - I object to 550 houses in this Green Belt site. It will create considerable traffic congestion for existing and new residents, and local shops, schools and doctors are insufficient to meet increased demand. Morning and evening traffic will increased considerably, impacting journey times and the environment.

Attached documents:

Comment: MM41 - LPMM18/156  Respondent: Emma Tallick 10855553  Agent:
I would like to register my objections to the current planning for additional developments around Send Village.

In particular I would like to object to the developments MM44 and MM41.

As well as impacting on the heritage of the area around Send Marsh Green, MM44 also contradicts the Green Belt policy of MM9. This land has always been listed as green belt land and therefore other non-green belt sites should be considered before developing this green belt land. In addition, the whole area around Send is at full capacity for what the current infrastructure can support, this includes:-

Roads
Schools
Doctors
Dentists

Send Villages Medical Practice is full, takes many days if not weeks to get a Doctor's appointment. Ripley has now lost its local primary school and only has one small dentist practice. The roads around this area are heavily congested at all times and safety is becoming an issue as more and more major accidents are happening on the A3 section parallel to the Send/Ripley area as well as parking being pretty non-existent during peak times. With no local schools being able to take a large influx of new residents, this would result in yet more traffic as new residents would have to drive their children to distant schools outside of the local area.

Therefore, without substantial additional infrastructure to support the above, this area cannot support any more additional housing as shown in MM44 and MM41.

Attached documents:

Comment: MM41 - LPMM18/838  Respondent: Anna Crawford 10856673  Agent:

RE: Policy A43

I object as this large proposed increase in the number of houses is excessive.

The site is subject to flooding & the greater number of cars relating to this, will block the roads schools & medical facilities will be at breaking point. Send & Ripley will be joined up & constitutes over development.

This area is Green Belt with ancient woodland.

Attached documents:

Comment: MM41 - LPMM18/842  Respondent: Anna Crawford 10856673  Agent:

I object to Transport strategies MM27 MM41 MM42 MM48

As the traffic impact on this area with thousands more cars will increase the pollution noise & delays

Attached documents:
MM27. MM41. MM42. and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Lane and Send Road will cause horrendous noise, air pollution delays and gridlock.

We are living on Send Barns Lane and trust me it is bad enough now – it is becoming harder and harder to get out of our drive and two of my daughters have developed asthma, just walking along Send Barns Lane during rush hour makes breathing difficult now – what will it be like when you add thousands more cars into the mix?

MM41 Land at Garlicks Arch, Send Marsh. Policy A43.

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

This is an increase of 37% in the number of houses to be built and I can only assume that the Conservative Guildford Borough Council are punishing Send for throwing out the Conservative Councillors and electing Green Belt Councillors.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking.

This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

This site is contaminated by many years of Clay Pigeon Shooting and is prone to frequent flooding.

Up to a thousand cars and between 1600 to 1700 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added?

Attached documents:

---

I object to any additional houses being built and certainly not the increased number. Any number of homes would put a huge strain on our local roads which are already congested at rush hour and significantly at times when there is a problem on the A3 or M25.

Our local school in Send is full. Where are the additional children going to go? Our local surgery is running at capacity, where will the additional number of people go for an appointment?

Send is surrounded by glorious woodland as part of the green belt, woodland absorbs the pollutants from the A3 and M25.
Attached documents:

**Comment: MM41 - LPMM18/876  Respondent: Mrs C OWEN-Crane 10859073  Agent:**

Feeder roads around this area are too narrow to accommodate additional traffic, there is no additional land either side of these narrow country roads to relieve the congestion.

Attached documents:

**Comment: MM41 - LPMM18/1276  Respondent: Neil Haxton 10859265  Agent:**

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

I object to this because;

This will join up the villages of Send and Ripley, causing over development with an excessive 37% increase in houses.

Previous objections to a lesser number have been ignored

The excessive increase in cars will block already busy roads,

The excessive increase in residents will put the infrastructure under pressure, with no school places, as the local school in Ripley has already closed and the GP surgery is under strain

Attached documents:

**Comment: MM41 - LPMM18/1281  Respondent: Neil Haxton 10859265  Agent:**

**MM27, MM41, MM42, MM48 Transport Strategy**

This will not address the excessive increase in cars causing gridlock, extensive delays, noise and nitrous dioxide pollution.

Attached documents:

**Comment: MM41 - LPMM18/1102  Respondent: Mr (Mr Alec McIndoe) 10864065  Agent:**

There were apparently over 7000 objections to the previous proposal for 400 homes on this site. It appears that the Council has not only disregarded 7000 residents and voters, but have made the proposal even more objectionable by increasing the proposed development by 37.5% ! Nothing has changed since the last proposal: The site is still Green Belt, it still contains ancient woodland, it has still been used for clay pigeon shooting, and the local educational and medical
situations have not altered apart from the closure of Ripley School. The proposed development will put an unnecessary strain on the local infrastructure causing increased traffic, danger, and air and noise pollution.

Attached documents:

Comment: MM41 - LPMM18/3654  Respondent: Edwina Fassom 10865537  Agent:

MM41 Garlick's Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/380  Respondent: Christine Reeves 10866305  Agent:

MM41 - Policy A43
MM42- Policy A58
MM44 -Policy A63
MM9
MM27 MM41 MM42 MM48

I objected to the Land at Garlick's Arch Send Marsh being developed on in my last objection letter so to consider having another 37% development on the site would be outrageous considering 7000 objections were ignored previously for a fewer number of houses being built.

Businesses and employees that have been on the site for many years would loose their jobs as companies have to close or relocate. Their jobs have been their lifeline and income in some cases for their lifetime.

Over the years all the roads locally have been transformed from quiet country lanes to Grand Prix tracks and the lanes and roads infrastructure certainly couldn’t cope with extra housing, cars producing more dangerous nitrogen dioxide putting more people at health risk which they hoped to escape from by moving to the country. We certainly don’t need more people, housing or cars choking our village depleting our woodland areas and picturesque Send March green.

Roads, schools, health centres and hospitals are already overstretched.

Attached documents:

Comment: MM41 - LPMM18/4132  Respondent: Kristine Good 10866945  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer no
proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock, as already stated in previous points. This area is unable to support increased residential traffic and is unsuitable for heavy commercial traffic.

In conclusion, development of this scale in this rural village will be detrimental to the character of this living space, and impact hugely on residents, there is insufficient consideration of the enormous size of development being placed in one small area of the constituency, as opposed to spacing out development, which would ease traffic overloading, decrease the escalating problem of pollution, share the increased strain on services; education, health.

I urge the planners to take these objections into consideration and listen to the observations regarding these plans from the people who live and work in these areas and see each day how the infrastructure is completely inappropriate to support such huge development in squeezed into one small area of the borough.

Attached documents:

Comment: MM41 - LPMM18/1531  Respondent: Steve Loosley 10867105  Agent:

I am writing to object to the local plan Main Modifications as outlined below:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years

* An increase of 37% in the number of houses proposed is excessive
* 7000 objections to the previous lower number have been ignored
* It is Green Belt containing ancient woodland
* It will join up Send and Ripley and constitute over development
* The site is subject to frequent flooding and contaminated by lead shot
* At least 800 extra cars will block up the adjacent roads
* School and medical facilities will be strained to breaking point

Attached documents:

Comment: MM41 - LPMM18/1536  Respondent: Steve Loosley 10867105  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/1910  Respondent: Mr David Govey 10867873  Agent:
why must we have such a huge increase in the original number of houses? This greenbelt area is a well known area for frequent flooding and huge influx of house owners will only put more strain on already over populated area...a fact that was Stressed in the previous objection which appears to have been ignored.

Attached documents:

Comment: MM41 - LPMM18/2297  Respondent: Ron and Charmian Leach 10868193  Agent: MM27, MM41, MM42 and MM48 Transport Strategy

Opening new entry/exit slip roads off the A3 will overload Send Village, Send Barns Lane and Send Road with unacceptable levels of vehicular traffic, a lot of it HGV. The road network is unsuitable for this level of traffic and will give rise to unacceptable levels of pollution of all types. I therefore OBJECT.

Attached documents:

Comment: MM41 - LPMM18/2301  Respondent: Ron and Charmian Leach 10868193  Agent: MM41

7000 objections to the previous proposals were ignored. Green Belt, glorious woodland, rare bird life etc to be destroyed. The proposed increase of 37% houses is excessive - school & medical centre would not cope.

Attached documents:

Comment: MM41 - LPMM18/2713  Respondent: Robert Lockie 10868609  Agent: I object to the new proposals to the GBC local plan.

MM41 Garlicks Arch

1 An increase of a third in the number of houses proposed is excessive
2 7000 objections to previous lower number ignored
3 Local infrastructure strained to breaking point
4 Create gridlock on local roads, already at that point frequently
5 Further building on Green Belt
6 Unique nature of Send and Ripley as villages will be ruined

Attached documents:
Comment: MM41 - LPMM18/570  Respondent: Richard Vickery 10869345  Agent:

I write yet again as a resident of Send to object strongly to the overall plan regarding Send. Particularly that the development proposal is predominately on greenbelt land, which should not be considered. The infrastructure in this village - roads, school and healthcare - can scarcely cope at times with the number of people and cars. To increase all of these problems by building an excessive number of new houses is inexplicable to say the least.

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

This area is in the green belt, with ancient woodland, and is subject to flooding. The number of proposed homes will mean that the school and medical surgery, which are already under immense pressure, will be overwhelmed.

Attached documents:

Comment: MM41 - LPMM18/574  Respondent: Richard Vickery 10869345  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

This area suffers from very high traffic throughout the week. The surrounding villages, Ripley, Clandon, Ockham and Old Woking, are overwhelmed at times. This plan will increase the problem and make it intolerable to get anywhere by bringing more traffic through the villages, especially Send, to get on and off the A3 at Burnt Common.

Attached documents:

Comment: MM41 - LPMM18/566  Respondent: Rosalyn Vickery 10870305  Agent:

This land is green belt. It is prone to flooding. The number of cars cannot be accommodated on the existing congested roads. The school and medical centre are already oversubscribed and don't have space for expansion. The number of extra cars used to drop children off at the school will cause total chaos as there is already insufficient space for the existing numbers. There is no suitable public transport and parents have no time to walk to school when both work. The number of houses has been increased when even the previous lower number was considered excessive.

Attached documents:

Comment: MM41 - LPMM18/2599  Respondent: Lynn Durbridge 10871169  Agent:

My First objections are to : MM41,MM42,MM44,MM9, MM27.

At the public examination the figure for Guildford Borough Council housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated. [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]
The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of G.B.C consultants figures which have always been very suspicious.

My expectation is that the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.

Table S2b: Spatial Strategy: Distribution of Housing 2015 – 2034 (net number of homes) states that the net number of homes within villages is 154, this contradicts other figures and is obviously a lie?

And 2000 new homes at Wisley airfield is totally unacceptable. Not only will Send and Ripley be joined but the whole of Guildford...the whole of surrey will be connected in one sprawling mass of houses and industrial parks with barely a patch of green as far as the eye can see. Individual communities will no longer have their own identities and roads will be even more congested. Services have only received lip service, Gps and schools (and parking) that are already at bursting point have not been thought about at all.

MM27, MM41, MM42, and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill, Wisley and Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. It seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

This massive increase in traffic and associated air pollution will affect pupils of Send 1st school which will take brunt of the increased pollution as will St Beads middle school. The dropping off of children at Send 1st school is already absolute mayhem and it is only a question of time before a fatality happens. With an increase of traffic the chances of a fatality goes up exponentially.

MM41 Land at Garlicks Arch, Send Marsh, Policy A43.

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

This is an increase of 37% in the number of houses to be built and I can only assume that the Conservative Guildford Borough Council are punishing Send for throwing out the Conservative Councillors and electing Green Belt Councillors.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the objections have died down and nobody is checking.

This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

This site is contaminated by lead from many years of Clay Pigeon Shooting and is prone to frequent flooding.
Up to a thousand cars and between 1600 to 1700 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Our local Health Centre is already oversubscribed and struggling to work in overwhelming conditions.

There is no money to build any extension or employ more health staff. Again the local infrastructure will be totally overwhelmed.

You already have over 7000 objections to the earlier plans but these objections have been totally ignored and more houses etc added?

**Comment:** MM41 - LPMM18/5102  **Respondent:** Margaret Powell 10876609  **Agent:**

I wish to object to ALL the above Main Modifications 9, 27, 41, 42 & 48

Our village is big enough already - the roads get very congested & Send Primary School would not be big enough to take all the extra children especially as Ripley School is closing! It is getting increasingly difficult to get teachers - so are our children going to get any decent education

I have lived the village most of my life & over the last ten years there are now fewer places to walk & get out into the countryside! The Green Belt land & woodlands are becoming non existent.

Why build more Industrial Units - in the past they have been left empty & some now turned into living space - so why do we need more!!! Places are being vacated weekly & left into disrepair - so definitely don't need anymore!

The houses that have recently been built in the village & surrounding areas have not sold - so how are they going to sell a few hundred more! You are DESTROYING village life & going to pollute the countryside! Therefore a lot more health problems without sufficient Medical facilities available - what a NIGHTMARE!

I Strongly object to ALL the above Modifications. - so please re think your policies.

**MM41 - Land at Garlick’s Arch, Send Marsh/Burnt Common and Ripley. POLICY A43**

**I OBJECT -**

Will impact Send more that Ripley or Clandon, as residents will have to use Send Primary School and the Villages Medical Centre based in Send. Many will use Send shops. Apart from the Medical Centre, there is no space for expansions of these facilities.

On its own, new Garlick’s Arch proposals increase homes in Send by a further 8.8% in addition to the 23% of the previous plan. Together with other new additions, total impact in Send would have 16% more homes than in the previous plan, and the Burnt Common industrial area as well.
Previous concerns about traffic on Burnt Common Roundabout are further increased – roundabout already beyond capacity at busy times and there is no space to improve infrastructure. Objections to traffic issues are routinely brushed aside; traffic impacts on quality of life and air pollution. Current traffic monitoring methodology tends to average out and hide the peaks. There is too much reliance on A3 improvements which GBC cannot direct.

This would effectively join up Send and Ripley – the kind of ‘urban sprawl’ the Green Belt legislation is meant to prevent

**Comment: MM41 - LPMM18/5702  Respondent: Ben Stevens 10881217  Agent:**

Re: Guildford Local Plan: Strategy and Sites – Main Modifications 2018

I repeat my concern that the objections of local residents have not been listened to and I feel that the village of Send has been disproportionately targeted for excessive building development.

I object to MM41 - Policy A43 at Garlick’s Arch to build a huge estate of 550 homes. This is an outrageous number of new homes for our village to absorb all once and would cause disastrous over-development altering the character of our village for ever. It will become a sprawling suburb of Guildford - joining up Ripley and Send and eroding our beautiful greenbelt land. This will also increase the already bad traffic congestion and will block up the surrounding roads. As well as this, it is another area in Send that is subject to frequent flooding and is currently a flood zone 2 allocation. Removing it from greenbelt would completely destroy the beautiful ancient woodland dating back to the time of Elizabeth 1st.

**Attached documents:**

MM41: Land at Garlicks Arch

I object to this increase of 37% on the initial 400 proposal.

you received over 7000 objections to the original proposal of 400 - yet up have chosen to ignore 7000 objections and now increased the number to 550.

This constitutes blatant over-development, not just of houses and households, but cars and the requirements for medical and educational services.

Attached documents:

Comment: MM41 - LPMM18/5953  Respondent: Amanda Stevens 10882113  Agent:

Re: Guildford Local Plan: Strategy and Sites Main Modifications 2018

I object to MM41 at Garlicks Arch, Send, Policy A43. I think an additional 550 homes is far too many to build in this area and will completely change the character of the surrounding villages. There are likely to be around 800 to 900 more cars on the surrounding roads as most adults have a car each, not one car per family. I would also bring to your attention again that neighbours who have lived there for some time have assured me that the land is contaminated by lead shot accumulated over 50 years which is not suitable for family housing. In addition to all of this, as well as more erosion of our beautiful greenbelt land and joining up the villages of Ripley and Send, it will generate huge traffic congestion that will block up the surrounding roads even more so than is the case at the moment further increasing the levels of nitrogen dioxide.

Attached documents:

Comment: MM41 - LPMM18/2880  Respondent: Dave Fassom 10884993  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

Attached documents:

Comment: MM41 - LPMM18/1655  Respondent: Kerstin Browne Kaempf 10896929  Agent:

I am writing to object to the local plan Main Modifications as outlined below:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years – this has been objected before

• An increase of **37%** in the number of houses proposed is excessive
• **7000 objections to the previous lower number have been ignored**
• It is Green Belt containing ancient woodland
• It will join up Send and Ripley and constitute over development
• **The site is subject to frequent flooding and contaminated by lead shot**
• At least 800 extra cars will block up the adjacent roads and getting to work will become impossible – Guildford and Woking are both very congested already
• School and medical facilities will be strained to breaking point – Ripley primary school was closed, there is no natural secondary school for this area

**Guildford Local Plan: Strategy and Sites - Main Modifications 2018**

I object to the main modifications 2018 to the Guildford Local Plan as follows:-

**MM41 - Land at Garlicks Arch, Send Marsh, Policy A43**

This is Green Belt Land containing ancient woodland.

The increase in the number of houses proposed, from 400 to 550, will join Send and Ripley and constitutes overdevelopment.

The resulting increase in road traffic will cause further congestion and pollution in adjacent roads, adversely affecting residents and the local school. The A3 and M25 are frequently blocked now, this additional traffic will bring the whole area to a standstill more frequently. School and medical services are already over-subscribed, the waiting time for an appointment at the surgery in Send Barns Lane is already far too long.

**Attached documents:**

<table>

**Objection to MM41 Land at Garlicks Arch**

The proposed 550 homes are excessive on the proposed site. They will join up the villages of Ripley and Send, the extra cars will block the adjacent roads, the local schools and medical facilities will be unable to cope with the resulting influx...
of people and the Council seem to have chosen a site liable to frequent flooding and contaminated by lead shot. Would GBC Councillors want to live here?

Objection to MM27, MM41, MM42 NS MM48 TRANSPORT STRATEGY Can this really be called a transport strategy? This strategy will clog up all the roads around Send and Ripley, the A3 and the A247 to Woking. These roads are already loaded to capacity and almost at saturation point several times a day.

GBC have received thousands of objections to their plans. Is no one listening?

Comment: MM41 - LPMM18/5724  Respondent: Michael Mills 10900385  Agent:

MM41-Policy A43---MM42-Policy A58---MM44 Policy A63

MM9 Green Belt Policy

MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.

Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

Attached documents:

Comment: MM41 - LPMM18/2210  Respondent: Derek and Lilian Scholes 10902113  Agent:

Local Plan Modifications MM44, MM41, MM42, MM9

We strongly object to the main modifications to the Local Plan for Send. This area is not suitable for such development. There is not the infrastructure to support this, and the real need is for just a small number of AFFORDABLE houses. With regard to MM9, the Green Belt Policy, Alderton's Farm in particular cannot be "considered to be within the village" and such intrusion into the Green Belt will benefit no one but the developers.

Attached documents:

Comment: MM41 - LPMM18/2996  Respondent: M Stokes 10903265  Agent:
I cannot object strongly enough to the proposed development increase which has been added in the revised plan. I am also staggered by the way in which the GBC and the Planning Inspector have completely ignored the local residents objections and instead have increased the development within the Send and Ripley boundaries.

You are planning to put in four new housing developments totaling 770 houses this is a 45% increase some of which on Green Belt land. A huge industrial site (lord knows why, you can’t fill the empty warehouses in Guildford now!) Two Travellers sites and a new access onto the A3 slip road.

Why are you not listening to us!! The infrastructure cannot cope now let alone with the increase, which has been proposed. It can take three weeks to get an appointment to see your own doctor, the schools are over subscribed. One of which has been closed.

I object to: MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

1. Suddenly you have increased the housing number from 450 to 550, why?
2. This land is on Green Belt containing ancient woodland.
3. It will join up Send and Ripley and will constitute over development.
4. The increase in the traffic trying to access Woking, West Clandon or the M25, will become untenable. The local roads are not built for this large increase in vehicles.
5. The roads around the area are narrow lanes and often only room for one vehicle at a time and the nitrogen dioxide levels are already high in our area.

MM27 MM41 MM42 & MM48 Transport Strategy

The traffic implication for our village with all the new proposed development is untenable. GBC has not been clear in their assessment of the impact of the movement of the thousands of extra cars travelling along congested roads, the pollution levels, delays and gridlocks that will ensue. Even with the proposed A3 changes this still does not address the issues that will arise.

It would seem that GBC has decided that Send and Ripley are to be the fall guys in their planning due to our proximity to two major routes. I ask the Planning Inspector to please see some sense and consider the views of our communities. I personally have no problem with developments that reflect the need within our village but not this huge proposed over development in our area.

Attached documents:

**Comment:** MM41 - LPMM18/539  **Respondent:** Linda Freeland 10903681  **Agent:**

MM41/42/44 - Garlicks Arch, Burnt Common, Aldertons Farm. Garlicks Arch and Burnt Common have seen substantial increases for development following the inspection and Aldertons Farm has appeared from nowhere. A revised (upward) total of 789 dwellings is now proposed, yet the Office of National Statistics, based on their published housing needs data, have determined this figure should be 431. What is the justification for the additional 358 dwellings? Pressure on local infrastructure and services will be unbearable.

Attached documents:

**Comment:** MM41 - LPMM18/2239  **Respondent:** D White 10905185  **Agent:**

Guildford Local Plan OBJECTION
At a time when the Office of National Statistics has identified a drop in the need for both housing and industrial/warehousing, I am appalled that Guildford B.C. is still pursuing its on-going proposals for the destruction of the Green Belt and Send Village. It has ignored the 7000 objections for the Garlicks Arch proposal and clearly considers itself far better qualified than the residents to dictate the need for Send Villagers.

The campaign to Protect Rural England has stated that during 2017/2018 more than 5000 hectares of Green Belt have been released for development and further land is set for release. Such land is some of the most profitable and desirable for developers due to it being "shovel ready", surrounded by countryside (but not for long) and within commuting distance of towns and cities. It leaves little to the imagination that such development suggested by Guildford B.C will destroy the environment that developers prize so much in their bid to take the money and run. These comments are not emotional outpourings but simple facts.

To be more specific I OBJECT to:-

**MM41 Land at Garlicks Arch A43**

The latest amendment increases further destruction of the Green Belt by the increase of housing from 400 to 550 - 37%

I would ask where are these 1000 or so people going to be imported from?

All previous objections, which numbered some 7000, have been completely ignored. Perhaps this is an indication of what Guildford B.C. thinks of its residents.

The Green Belt ancient woodland is a target for removal by developers and I am fully aware how the bulldozers move in early and start work before complaints can be made to the local authority. **It happened in my road over a May Bank Holiday**, when some dozen mature oaks were felled. The recent Climate Change Summit recommended the increase of tree planting to combat increasing CO2 emissions. So Guildford knows better than the experts?

Send and Ripley villages will become one village created by linear development so loved by the planners in the 1950s

The development will add some 800+ vehicles to the surrounding roads which are already congested with commuter and school run vehicles and were never designed to take todays volume of traffic.

The B2215 Portsmouth Road has proven a "rat run" for vehicles attempting to queue jump the holdup on the northbound A3.

The existing infrastructure of education and medical facilities have not been considered. Ripley School has closed, St Bedes School has been demolished and incorporated into Send C of E School and George Abbot Secondary School no longer takes children from the Send area. The parking movements outside Send C of E school during drop-off and pick-up times are dangerous for both parents and other road users and the recently installed centre refuge funnels vehicles closer to the pavement.

The only doctor's surgery is near capacity judging by appointment waiting times.

**MM27 MM41 MM42 MM48 Transport Strategy.**

Guildford B.C. have produced, what they call a Transport Strategy, without addressing the wider vehicle movement problems. The Leader of Guildford B.C has already acknowledged in public that the area has significant congestion and transport problems and yet still adds his name to policies that are clearly flawed.

The traffic on the North Bound A3 backs up from the M25 junction, "rat running" takes place off the Burnt Common exit and through Ripley village. This has not been referred to in any document.

The Southbound traffic backs up from Stag Hill to the Burpham Junction exit. This has not been reffered to in any document.
None of the roads surrounding Send were designed to take large volumes of traffic. They were and still are, in effect, village streets, despite their A road classification.

Burnt Common roundabout will be gridlocked by the increase in the number of vehicles, of commuters, school run drivers and the manoeuvring of HGV vehicles visiting the proposed new industrial site at Burnt Common, and the new units in Send Business Centre.

Emotionally this is a Transport Strategy for disaster.

Attached documents:

Comment: MM41 - LPMM18/1407  Respondent: Joe Gervasio 10906145  Agent:

I object most strongly to the Transport Strategy relating to many of the modifications (MM41 MM42 and MM44 in particular). There has been no proper assessment of the impact so this is being proposed without any basis for mitigation. The impact is clearly going to be very great on the local roads and there is no proposal at all to alleviate it, never mind demonstrate that any alleviation could be adequate. Any disinterested observer can see that the local roads are already beyond capacity with traffic jams regularly in the (I remind you) Green Belt villages of Ripley and Send.

Attached documents:

Comment: MM41 - LPMM18/1410  Respondent: Joe Gervasio 10906145  Agent:

I object to the ancient woodland at Garlick’s Arch being developed upon, and moreover the huge increase of over 35% in the proposal for houses on the site MM41. Over 7000 objections were received to this proposal, and the response was, rather than respect that, to actually INCREASE the impact. This will coalesce Ripley and Send, and as such breaks the planning guidelines in the NPPF. There is completely inadequate provision for local medical facilities to cope with such an increase, and no proposal for any mitigation. This alone is enough reason – people’s health – for this to be disallowed. The local Ripley School has just been closed, and this at a time when the local authority proposes to bring 800 more families into our villages!

Attached documents:

Comment: MM41 - LPMM18/3626  Respondent: Heather Thompson 10910753  Agent:

I object to MM41 as the transport strategy relies on inadequate modelling, including the delay in J10 Highways England RIS scheme of at least two years which will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm]. There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:
Comment: MM41 - LPMM18/3658  Respondent: Heather Thompson 10910753  Agent:

I object to MM14 - Garlick's Arch, Send Marsh, Policy A43

In the revised proposals the number of houses proposed for this site has been increased from 400 to 550 houses. This is an increase of 37%, despite the fact that the council received 7,000 objections to the initial plan. This is green belt land, containing ancient woodland, which seems to mean nothing to those who wish to see this part of the borough concreted over. This development would, in effect, destroy the individual nature of the two villages, joining them into one mass and, as such, must surely be considered as over development. The addition of so many people in this area would stretch the local services beyond capacity. There is only one primary school in the area as the other, in Ripley, has been closed. Also, the doctors surgery would not be able to cope with such a significant increase in patients. The addition of 800 extra cars on our already congested roads does not bear thinking about. The road in which I live is already a rat run, used by motorists who drop off the Portsmouth road at the Send Marsh junction. We already feel that we cannot walk along our road in the mornings and evenings due to the high volume of traffic. Polesden Lane is single track along much of its length and has no footpaths. Additional traffic along here would make our lives even more stressful.

Attached documents:

Comment: MM41 - LPMM18/3666  Respondent: Heather Thompson 10910753  Agent:

I object to MM27, MM41, MM42, MM48 Transport Strategy

The cumulative impact on the traffic and pollution issues on the village, when all of the proposed developments at Garlick's Arch, Clockbarn, Alderton's Farm, Gosden Hill and Wisley and Ockham, is totally unacceptable. Our road systems are already heavily congested, especially at key points in the day. My daughter lives on Send Road where it is often difficult to enter and exit her drive because of the ceaseless flow of vehicles. Crossing the road is perilous. The pollution levels are a real cause for concern as I have a young grandchild. We already know that far too many of today's youngsters suffer from asthma, a direct result of the increasing levels of pollution. This can only be exacerbated if these proposals go ahead.

Attached documents:

Comment: MM41 - LPMM18/3302  Respondent: Peter P. Earle 10911617  Agent:

MM41  Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years, which will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm].

There is too much reliance on the A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/5600  Respondent: Isabelle Stevens 10913377  Agent:
Re: Guildford Local Plan – Main Modifications 2018

I wish to object to the modifications you have made the Guildford local plan.

I strongly object to MM4, Policy A43 at Garlick’s Arch Send Marsh to build a vast housing estate with the now increased number of 550 houses. Four hundred houses is far too many new houses for our small village to absorb. Send will become over developed and will lose its village character completely. The villages of Ripley and Send will become indistinct and our beautiful green belt land will be eroded and lost for all time. Pollution levels will increase as will congestion because there will be so much more traffic on our roads. For each house built there is likely to be two cars which ultimately means around 1100 more even if this is not immediate – it will be inevitable. Additionally, it is another area in Send that is subject to frequent flooding and has currently a flood zone 2 allocation. If you remove it from greenbelt and build on it, you will be completely destroying the beautiful ancient woodland dating back to Tudor times.

Attached documents:

Comment: MM41 - LPMM18/1703  Respondent: Stuart Ray 10915713  Agent:

MM27. MM41. MM42.and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill, Wisley and Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. It seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

This massive increase in traffic and associated air pollution will affect pupils of Send 1st school which will take brunt of the increased pollution as will St Beads middle school. The dropping off of children at Send 1st school is already absolute mayhem and it is only a question of time before a fatality happens. With an increase of traffic the chances of a fatality goes up exponentially.

Attached documents:

Comment: MM41 - LPMM18/1706  Respondent: Stuart Ray 10915713  Agent:

MM41 Land at Garlicks Arch,Send Marsh. Policy A43.

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

This is an increase of 37% in the number of houses to be built and I can only assume that the Conservative Guildford Borough Council are punishing Send for throwing out the Conservative Councillors and electing Green Belt Councillors.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the objections have died down and nobody is checking.

This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.
This site is contaminated by lead from many years of Clay Pigeon Shooting and is prone to frequent flooding. Up to a thousand cars and between 1600 to 1700 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

I am Treasurer of our Local PPG (Patients Participation Group) and confirm that our local Health Centre is already oversubscribed and working in overwhelming conditions.

There is no money to build any extension or employ more health staff. Again the local infrastructure will be totally overwhelmed.

You already have over 7000 objections to the earlier plans but these objections have been totally ignored and more houses etc added?

Attached documents:

Comment: MM41 - LPMM18/4760  Respondent: Katharine Moss 10918273  Agent:

MM41-Land at Garlicks Arch, Send Marsh – Policy A43

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years. This is an increase of 37% in the number of houses to be built when the original proposed number of houses received 7000 OBJECTIONS. This suggests a flawed consultation process! We are not being listened to!

Equally during this ongoing process there is already an ‘under the radar’ increase in housing numbers in Send. These are ongoing small ‘in-fill’ housing developments, two or three houses popping up in Send and it’s close proximity – these houses are not being taken of the target figures! We are also aware of other significant (40 and 60 houses) developments in progress in the area too! There are already too many houses in this area.

The ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking.

This over development will join Ripley to Send, and spoil the intention and foresight of our Green Belt Planners of many years ago.

The site is contaminated by many years of Clay Pigeon Shooting and is prone to frequent flooding. Up to 1000 cars and between 1600 to 1700 extra people will completely block the surrounding roads. It is almost impossible to move out of my drive onto the road if there are problems on the A3. Send regularly comes to a standstill if the A3 or M25 has a problem.

The area’s services (schools, roads, health facilities, sewage, water etc) are already at full capacity. At the public examination the figure for Guildford.B.C. housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated.

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year. Why is the requirement to build a vast majority of these houses in Send? We have a poor road system and NO train service!

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year. This latest data makes a mockery of G.B.C consultants figures which have always been very suspect.

The Inspector and GBC must seriously reduce the housing need to reflect the true figures, and notably in our already very congested village of Send.

Attached documents:
MM27. MM41. MM42. and MM48-Transport Strategy.
This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why?
The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents, trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane.

This massive increase in traffic of all sorts heading to and from Woking along Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

Attached documents:

Comment: MM41 - LPMM18/2321  Respondent: J.A. Millard 10919841  Agent:

I am writing to strongly object to a series of Main Modifications in the Guildford Local Plan.

MM41 Land at Garlicks Arch. The increase in the number of homes is excessive and ignores the numerous previous objections. It will create urban sprawl between Ripley and Send and significantly adversely impact on the green space in the local area. Local facilities (schools and medical centre) will not be able to accommodate such a large increase in population. I object to this proposal.

Attached documents:

Comment: MM41 - LPMM18/2326  Respondent: J.A. Millard 10919841  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The development of the Clandon slip roads on the A3M will cause the local roads to be completely overwhelmed. Already the traffic from Burnt Common to Woking is horrendous and this development will cause it to virtually gridlock. None of this will be to the benefit of the land inhabitants who will also suffer increased pollution. I object to this proposal.

Attached documents:
In response to the information sent to everyone by the Save Send Action Group, I find myself saying the same things as I have done two or three times previously. I do so, not as someone with a principal feeling for Send, since my road lies between Send and Ripley, and we feel that we belong more to Ripley than to Send. But the implications of poor planning are the same.

Years ago, our road's AGM invited someone from the planning department to chat. We actually heard that planning for houses comes first and that 'the infrastructure will follow'. What rubbish! Fundamental to all this is to assure us all that roads will cope. Roads don't cope at present.

I don't object to the creation of two new slip roads to the A3. Indeed, I have urged just this for years. That would surely improve traffic flow. Perhaps there should be traffic lights at the junction of Portsmouth / London Roads and the A 247. Much else of this kind of thinking is vital before houses are considered.

More questions:

1. a) Do we really need so many new houses in Send?
2. b) Has the ground at MM41 been properly studied?

Attached documents:

MM27, MM41, MM42, and MM48: When will the traffic implications be properly addressed?

Attached documents:

Guildford Local Plan: Strategy and Sites – Main Modifications

Once more I write to object to the village of Send being disproportionately targeted for building development. I do not think you are taking the views of existing residents into consideration with your plans.

I particularly object to the MM41 land at Garlick’s Arch, Send Marsh, Policy A43 where your plan is to build a huge estate of 550 homes. This would be a simply ridiculous number of new homes for our village to absorb, causing catastrophic over-development and changing the nature of our lovely village for ever. It will also further erode the beautiful green belt land, joining the villages of Ripley and Send to a degree that would make them indistinguishable. Quite apart from the development itself will be the horrendous traffic congestion which will undoubtedly result from such a development. It is certain to create a gridlock in the surrounding roads and completely spoil the environs. With 550 new homes one could reasonably expect a further 1100 more cars on the roads in this area, a network which already grinds to a halt at the moment when the A3 invariably chokes.

It is already evident that your planners have a tendency to squeeze in as many homes as possible without realistic provision for parking (my own development, barely 10 years old suffers from this and I know of others within a short distance which suffer from the same problem). With the increased traffic will come the increased noise and pollution, ruining our village life permanently. Current residents greatly value the greenbelt surrounding our village, it’s what drew
many of us here and is an increasingly rare characteristic of village life in Surrey which we seek to protect. We value the
500 year old ancient woodland and the green countryside; we want it to be there for the next generation to enjoy also.

Attached documents:

Comment: MM41 - LPMM18/3590  Respondent: Arthur Thomas 10922017  Agent:

MM41 Garlicks Arch

I objected to any development on this land when it was first proposed. Despite several thousand objections at the time,
this has completely been ignored and you now propose to INCREASE the original number of dwellings from 400 to 550.
This is an insult to those who wrote and objected and says very little for the democratic process.

My concerns are as before, that the infrastructure around Send will be unable to cope with the large influx of people to
the area, school and medical facilities will not be adequate, roads will not be able to cope with the extra traffic and which
are already crowded particularly at morning and evening peak times. This is Green Belt land, it has ancient woodland on
it and I understand it is contaminated with lead shot and is subject to flooding, it should not be built on.

Attached documents:

Comment: MM41 - LPMM18/5630  Respondent: Kathleen Grehan 10922689  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Increased from 400 to 550 houses

My objections to MM41 are the same as those for MM42 and MM44

The local plan now includes a 45% increase in the number of houses in Send. How can the infrastructure, the roads, the
public services, the medical facilities, the schools cope with such a huge increase in the population of Send? I live on
Send Road and every day I have large volumes of traffic crawling along Send Road in both directions at peak times.
Often the traffic is at a stand still for long periods of time. So the air quality along Send Road is very poor as it is full of
exhaust fumes. We can no longer expect parents to walk their children to school when they are breathing in these exhaust
gases. This can only get worse with increased development

It seems the Green Belt has lost all its protection in this area if it can be violated in such a way with no ‘special
circumstances’.

Attached documents:

Comment: MM41 - LPMM18/5635  Respondent: Kathleen Grehan 10922689  Agent:

1. MM27 MM41 MM42 and MM48 Transport Strategy
Changes in the various transport strategies will in no way solve the problem of the increased traffic that will be produced by all the planned developments. It is more likely to make the situation worse.

It seems Send is getting far more than its fair share in this plan. Why is that? We have certainly submitted plenty of objections to the Local Plan at the various stages but it seems to have no effect. I have lost all faith in the planning process. If the burden was shared out more fairly the traffic problem would be diluted.

Attached documents:

**Comment: MM41 - LPMM18/746  Respondent: Ms Victoria French 10924161  Agent:**

The number of houses is excessive and unsustainable given the local infrastructure and amenities. A development of this size will permanently damage the landscape, including ancient woodland and Green Belt. It will turn a semi-rural location, already struggling to cope with the demands of increased traffic, into a suburbia blighted by gridlock on the feeder roads. The mental and physical health of residents will be under threat from the density of the proposed development and increased pollution in terms of air quality.

Attached documents:

**Comment: MM41 - LPMM18/1951  Respondent: Ms Victoria French 10924161  Agent:**

The proposed transport strategy to support the overdevelopment of land at Garlick's Arch, Send and Clockbarn, are not only inadequate to relieve the projected increase in car journeys in these areas but will also adversely effect Clandon and Ripley.

Attached documents:

**Comment: MM41 - LPMM18/1540  Respondent: Benedict Phillips 10924193  Agent:**

I am writing to object strongly to some of the main modifications to Guildford's local plan.

I live on Send Road and will be hugely adversely affected by the massive growth in traffic on a road that is already too busy. The big increase in houses at Garlick's Arch (MM41), the doubling in size of the Burnt Common industrial estate (MM42), the Alderton's Farm housing development (MM44) and the Clandon A3 slip road (MM27, MM42, MM48) will combine to put intolerable pressure on Send Road. This will result in increased noise, delays and gridlock, not to mention the extra pollution which is a major health concern for those living on the road. In particular, the industrial estate is bound to increase HGV traffic on Send Road, which poses a major safety risk to young children. The 30mph limit is not usually adhered to and there are no speed cameras on the road or any traffic-slowing devices.

Furthermore, the Garlick's Arch housing development (MM41) is now increased by 150 houses. This is excessive and ignores the 7,000 objections to the original, smaller plans. This land is Green Belt land and ancient woodland. This will be lost while at the same time morphing Send and Ripley into one big sprawling mass of houses. Surely the whole point of the Green Belt is to stop this happening? The extra population will also put intolerable pressure on local schools and medical facilities - particularly after the council's recent decision to close Ripley Primary School in extremely dubious circumstances, which attracted negative coverage in the national press.
As far as the industrial estate at Burnt Common is concerned, the doubling of the size to 14,800 sq m seems a total insult to all those who objected to previous incarnations of the local plan. There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are no special circumstances so it goes against your own Green Belt policy (MM9). There is already a 25% increase in the Send Business Centre, while the huge new Vision Engineering factory and the fact that the old factory is being kept as a commercial property despite residents being told it would become housing, all combines to fundamentally change the nature of Send by massively increasing the amount of industrial and commercial activity.

And why has the Alderton's Farm housing development reappeared in the latest local plan? It is Green Belt with no special circumstances so again contravenes your own rule MM9. Added to the other proposed housing, it makes 770 houses added to the current 1,700 in Send. That is an unnecessarily high increase which is unfair on the people who live in Send already.

Moreover, the wording of the MM9 policy on the Green Belt seems to leave open the possibility of more 'infilling' of any land left that hasn't been developed.

It is staggering that after all the complaints, Guildford Borough Council has come back with these modifications.

**Comment:** MM41 - LPMM18/6052  **Respondent:** Paul Dench 10926689  **Agent:**

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Increased from 400 to 550 home
**MM27 MM41 MM42 and MM48 Transport Strategy**

The transport strategy will not compensate or eradicate the problem that will occur when you put so many new houses in one area rather than spreading them throughout the borough. E.g to make access north bound on the A3 is not going to solve any problems only create more as it will encourage more cars through the village from the Woking direction. To increase the number of houses by 45% in Send is a recipe for disaster unless far more though and planning is put into the infrastructure. This Local Plan does not address the problem of the already overloaded infrastructure.

**Attached documents:**

**Comment: MM41 - LPMM18/1369  Respondent:  R Ebdon 10933569  Agent:**

There have been more than 7000 objections to this proposal already, which have been totally ignored. I believe the original proposal to put 400 houses here is excessive, however you are now proposing to increase this by 37%, to 550 houses. This is utterly disproportionate for the infrastructure and services available in Send village.

The local roads will not be able to cope with 800+ additional cars and the increase in Nitrogen Dioxide levels will be dangerously high. Send is already a rat-run to Woking, with heavy traffic running through the village's narrow roads at peak times. The additional traffic will cause gridlock, undue stress to residents and road users and dangerously high Nitrogen Dioxide levels.

The school and medical centre will be totally overwhelmed by the additional demand.

The location is also green belt with ancient woodland that should be protected.

**Attached documents:**

**Comment: MM41 - LPMM18/3027  Respondent:  Alan Brockbank 10938241  Agent:**

I am writing to object to the proposed over-development of Send.

MM41 Land at Garlicks Arch Policy A43

The proposed increase of 37% in the number of houses to be built is excessive and I object.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications have not been adequately addressed

**Attached documents:**

**Comment: MM41 - LPMM18/5621  Respondent:  Peter Clifford 10939841  Agent:**
5. There are few concrete proposals for reducing congestion. Where there are any, these are outside Guildford's control such as widening the A3, and therefore there is nothing to prevent major greenbelt development taking place, irrespective of the congestion.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/299  **Respondent:** JN Boardman 10945793  **Agent:**

It is obvious that with the above policies & strategies are still reflecting directly from what has gone before; amending & increasing on the Local Planning Foot Print. These changes are shown in shaving bits off here and adding bits to there.

These amendments: -

Still disregards all technical impacts on current & future structures. Most structures sit on a deep clay base which needs peculated ground water to function as a foundation base.

Tweaking weak infrastructures, no way puts in place any future proofed infrastructures.

Increasing these capacities will greatly increase all impacts on enviroment. Not all of which is yet to be fully understood or been considered.

Concreting over "Green Belt" is just not on, now or anytime in the future. We all complain about the forests in South America being cut down, along with plastic waste; this is no different.

The impact of such large developments, will swamp Send & all surrounding areas. If Wisley was a no no; then these proposals are doubly bad.

So what part of NO, does the current dominant political power not understand?

It seems as if the first judgement, common sense (Wisley) went against the current political-monied power houses. How strange that with a new judge conforms now to their wishes. How did all this happen?

Stop faffing about! Ask the local populous "What they want to happen by holding a Local Referendum." Just like Switzerland.

**Attached documents:**

**Comment:** MM41 - LPMM18/169  **Respondent:** Ivan Szabo-Toth 10949729  **Agent:**

I would like to object to the following modifications that concern the area I live(Send Marsh):

1. MM41. Garlicks Arch. This is over-development in my opinion and is green belt land. An increase of 37% in the number of houses will block the roads in the area and create too much pressure on other local infrastructure.

**Attached documents:**
Comment: MM41 - LPMM18/170  Respondent: Ivan Szabo-Toth 10949729  Agent:

MM41: Burnt Common. There is no need to put industrial sites in this area of Green Belt especially 14,8000 sq m

Attached documents:

Comment: MM41 - LPMM18/174  Respondent: Ivan Szabo-Toth 10949729  Agent:

MM27/MM41/MM41/MM48 Transport strategy. The combined traffic increase is not currently covered by the A3 changes and clandon slip roads. The levels of pollution and traffic will be unacceptable.

Attached documents:

Comment: MM41 - LPMM18/3618  Respondent: Alison Humberstone 10952161  Agent:

MM41 Land at Garlicks Arch,Send Marsh.Policy A43.

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years, an increase of 37% in the number of houses to be built and I can only assume that the Conservative Guildford Borough Council are punishing Send for throwing out the Conservative Councillors and electing Green Belt Councillors.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking.

This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

This site is contaminated by many years of Clay Pigeon Shooting and is prone to frequent flooding.

Up to a thousand cars and between 1600 to 1700 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan not just been ignored but more houses etc added?

**MM27. MM41. MM42.and MM48 Transport Strategy**

The effect of thousands more cars has not appear to have been properly taken into account? The A3 junction wont fix the issue of masses of traffic along A roads to Woking.

The increased traffic for Send from Burnt Common Garlicks Arch,Aldertons,Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.
This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

**Attached documents:**

| Comment: MM41 - LPMM18/4490  | Respondent: Charlotte Ladd 10953249  | Agent: |
| MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded. |

**Attached documents:**

| Comment: MM41 - LPMM18/3801  | Respondent: Anita Wilkinson 10954209  | Agent: |
| MM41 – there appears to be an act of faith that the A3 will in someway accommodate the transport impact which will ensue from the overdevelopment planned, for example. for Garlicks Arch and Aldertons Farm, despite the council having no control over transport strategy. |

**Attached documents:**

| Comment: MM41 - LPMM18/1872  | Respondent: Aiden Clegg 10956833  | Agent: |
| However, the key objection which should be of concern to all of Surrey, is regarding the transport strategy. MM41 - the transport strategy modelling, which is used by your plan, is inadequate. Specifically the fact that the delay in J10 of the M25 by Highways England RIS of at least two years will impact all development that relies on this scheme. In addition the fact that there is no suitable rail infrastructure with capacity and within a suitable distance of the site means that the site is wholly dependent on car transport. This will put too much traffic onto the already overcrowded local road network and is, by definition, unsustainable and dangerous. Given the issues with J10 of the M25, this will, in effect, put a congestion “stopper” in the top of Surrey. Moreover, I do not believe that the Highways England scheme to develop J10 will have any impact on the congestion levels as the issue lies not with the A3 but with the M25 - the M3/M25 junction has a similarly improved junction and the congestion there continues to be very severe. Finally, I note that Strategic sites are to be exempt from design constraints. This will result in inappropriate developments such as that proposed on Three Farm Meadows. There is also no evidence that recent case law, such as “People over Wind” has been taken into account. For all the above reasons I am calling for the hearing to be reopened, specifically so that Traffic issues can be properly assessed and the latest Office of National Statistics can be used. I would also like to advise that I support the representation made by WAG (Wisley Action Group), which was written with advice from Richard Harwood QC. |

4. There are no guarantees regarding the improvements to the A3 which is critical to the developments.

Attached documents:

Comment: MM41 - LPMM18/3537  Respondent: Gabrielle Erhardt 10963137  Agent:

Similarly MM41 Garlick’s Arch should be retained as Green Belt in view of revised housing need rather than being expanded.

I hope that these points are taken into consideration.

Attached documents:

Comment: MM41 - LPMM18/4743  Respondent: Liam Doyle 10966977  Agent:

I object to this on the following grounds;

• This is Green Belt land
• proposed new development is excessive
• it will destroy the ancient woodland at the site
• Will further add to the existing flooding issue
• Extra cars will block up the existing busy roads
• Impact the already strained local services such as schools and medical facilities

Attached documents:

Comment: MM41 - LPMM18/4696  Respondent: Jenny Jackson 10967489  Agent:

I write to OBJECT to the updated proposals for development in the area referred to as Garlicks Arch in the current version of the Plan. The proposed increase in housing provision from 400 to 550 following massive (7000) written public objections to the former proposal, represents an increase in housing on this site by 37%.

This area falls within the Green Belt (MM9). The area identified within the development proposals is described by the Ordnance Survey as surrounded by ‘Garlicks Arch Copse’ – further described as woodland. On closer scrutiny, much of the land contains ancient woodland and will in reality serve to join the villages of Send and Ripley, neither of which require a housing estate of this magnitude.

It is also evident from this proposal that there is no plan to accommodate additional infrastructure to the area, at a time when schools are unable to accommodate children who already live within the catchment areas, and both GP provision and hospital services are working under pressure throughout the year.
The impact on local roads is unimaginable. Already in an attempt to avoid congestion in the approach from Send to Ripley and vice versa, local side roads – many of which are single track without pavements, and are already subjected to freight trucks, tankers and public transport (in addition to cars) trying to avoid Junction 10 congestion. Local residential roads become ‘rat runs’ through Pyrford, Ripley, Send and Ockham, as commuter seek short cuts between Junction 11 and Junction 9 on the M25. The addition of 800 plus vehicles should this development proceed, will place an unnecessary burden and pressure on existing commuters and residents, many of whom use them for cycling and as pedestrians.

Attached documents:

Comment: MM41 - LPMM18/3560  Respondent: Robin L. Smith 10972833  Agent:

MM41 - area at Garlick's Arch, Sendmarsh (Policy A43)

- A 37 % increase to the current housing numbers in a relatively compact area is excessive
- Over 7000 objections to the previous lower number was ignored > is Guildford a "listening" council or a "Bulldozing" council?
- Impact on Green belt with beautiful woodland
- Will make Ripley, Sendmarsh and Send one large continuous village > over development and denaturing the current land beyond recognition
- Flooding (thus the name Sendmarsh) a problem
- A bare minimum of an extra 800 cars > a very low estimate considering you need a car due to lousy public transport - with most households at 3 or 4 cars being nearer the norm
- Heavy impact on current schools (plus dropping parents dropping off congestion) and local medical services.

Attached documents:

Comment: MM41 - LPMM18/1348  Respondent: Mrs Julie Cameron 10984385  Agent:

I object to the modifications suggested at MM41 to increase the number of proposed homes at Garlicks Arch from 400 to 550, of which over 80% will be built in the next 5 years, despite objections to the original figure of 400 homes. This is in conflict with MM9 (proposed limitations to Green Belt infilling) and would connect neighbouring locations. The impact on the local infrastructure would be detrimental: the road network is already overstretched, especially at peak times, because of the river crossing and nearby A3 and M25 and an additional 1,100 vehicles (based on 2 per household, an absolute requisite for living in the area, as there is little public transport) would prove adverse to local air quality. Nearby schools and doctors' surgeries, already stretched to capacity, would reach breaking point, meaning more road use for travel to nearby schools and medical centres. It has previously been established that Garlicks Arch is an area of ancient woodland, a valuable asset in an area of increasing urbanisation. It is subject to frequent flooding and contaminated by lead shot, both factors which make it unsuitable for building.

| MM41 Garlicks Arch  
I object to this because:  
the number of houses is excessive and previous objections have been ignored to a lower number of houses.  
the area is in the green belt and is an area of ancient woodland.  
the number of extra cars from the houses will be huge, using already congested roads around the area.  
one of the local primary schools which the children living in the new houses would have gone to has been CLOSED. Where will they go to school as there will now not be enough school places. The schools are already over subscribed. |

**Attached documents:**
the medical centre is already unable to cope with existing patients. When ringing for appointments we are already told to go to the walk in centre as they can't help. This is unacceptable and will be made worse.

Attached documents:

Comment: MM41 - LPMM18/4391  Respondent: Victoria Bean 10990465  Agent:

MM27 MM41 MM42 MM48

the traffic implications on the village are huge, it would not be able to cope with thousands more cars everyday. The roads would be gridlocked, there would be increased noise and air pollution.

The village cannot cope with the huge number of proposed houses and industrial units, it will change and destroy the village environment.

Attached documents:

Comment: MM41 - LPMM18/3203  Respondent: Trevor W. Orpwood 10991873  Agent:

Amendment MM41

I object to the fact that the proposed Transport Strategy places far too much reliance on infrastructure improvements some of which are uncertain and all of which are beyond the council’s control and have no fixed timescale. There is already a 2 year delay on Highways England RIS scheme for J10 of the M25 and this has a direct effect on the development of Site A35 – TFM; Site A43– Garlicks Arch; and Site MM44 – Aldertons Farm.

Attached documents:

Comment: MM41 - LPMM18/3517  Respondent: Philip Erhardt 10992417  Agent:

1. There is too much reliance of A3 improvements which may not happen.

Attached documents:

Comment: MM41 - LPMM18/3522  Respondent: Philip Erhardt 10992417  Agent:

2. MM41 Garlicks Arch should be retained as Green Belt especially in view of revised housing need.

Comment: MM41 - LPMM18/607  Respondent: Pam Harnor 10995233  Agent:

MM41 Land at Garlick’s Arch, Send Marsh, policy A43

- An increase of 37% in the number of houses proposed is excessive
- 7000 objections to the previous lower number have been ignored
- It is Green Belt containing ancient woodland
- It will join up Send and Ripley and constitute over development
- The East Clandon Stream which runs through the site is shown as a high risk flood area by the Environment Agency and any development on the site will increase water run-off endangering properties downstream in Send Marsh which are already at risk
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point
- With Alderton’s (120), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure

Attached documents:

Comment: MM41 - LPMM18/612  Respondent: Pam Harnor 10995233  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/2451  Respondent: Peter Cormack 10995297  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/500  Respondent: Richard Baldwin 10999873  Agent:

I object to the modifications:
An increase from 400 to 550 homes is excessive. Local schools, medical facilities and roads will not cope with this volume of housing.

The land is Green Belt, contains ancient woodland, and is subject to flooding.

**Comment:** MM41 - LPMM18/504  **Respondent:** Richard Baldwin 10999873  **Agent:**

The A3 changes will not prevent a massive traffic impact on Send Barns Lane and Send Road’

**Comment:** MM41 - LPMM18/3587  **Respondent:** Greta Edwards 11001505  **Agent:**

It seems to me that there is far too much reliance on the A3 improvements which are clearly beyond the council's control and have no fixed time-scale.

**Comment:** MM41 - LPMM18/890  **Respondent:** Howard Milner 11003361  **Agent:**

I am writing to you yet again as my previous letters seem to have been ignored, I believe mine and many other valid arguments against YOUR plans have been brushed aside with no consideration to the validity of their arguments.

Having ignored previous concerns, over YOUR plans for 400 houses, YOU now want to build 550 houses on Green Belt with the loss of Ancient woodland, the land designated for this development is in a category 2 flood zone, any building on this area would undoubtedly increase run off into the East Clandon Stream which has in the past flooded properties including my own in Send Marsh. Whilst not officially designated a health risk, you would propose building under or close to Power Lines that have in the past been linked to health problems elsewhere. Again the impact on the local infrastructure has been totally ignored, Schools, Medical facilities and pressure on local roads of an increase at a conservative estimate of 1500 people and 1000 cars.

**Comment:** MM41 - LPMM18/895  **Respondent:** Howard Milner 11003361  **Agent:**
Again no proposal is made regarding the major increase in traffic to the immediate or surrounding areas, narrow roads and tight junctions in the villages of Ripley, Send, Old Woking and Clandon already prove problematic at peak times, how emergency services will be able to attend callouts at peak times is unthinkable. The tremendous increase in pollutants caused by the increase in traffic is yet another cause for concern, especially in the light of the removal of trees, hedges and grassland required to build all the homes in the immediate area, going against the environmentalists latest requests to plant more trees and create green spaces in an effort to improve air quality.

Attached documents:

Comment: MM41 - LPMM18/881  Respondent: Elizabeth Milner 11003681  Agent:

I wish to object to the recent modifications. These are my principal objections. I think Guildford Borough Council have failed to consider the residents of Send Marsh with an excessive amount of development in our area.

MM41 Land at Garlick's Arch, Send Marsh, Policy A43

The increase of 37% in the number of houses is exceedingly high. It would change the character of the village, join up Send and Ripley so that it was over-developed and make it one large conglomeration of housing. A very high number of objections to the previous lower number of 400 have been completely ignored. You intend to develop Green Belt land, which floods and is contaminated by leadshot. The local infrastructure for medical facilities and schools would be swamped by this development, as would the adjacent roads, this development would make it worse and it would be gridlocked on a daily basis. Send Barns Lane is frequently at a standstill in the mornings already.

Attached documents:

Comment: MM41 - LPMM18/886  Respondent: Elizabeth Milner 11003681  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick's Arch, Burnt Common, Clockbarn and Alderton's would not be adequately solved by the A3 changes and the Clandon slip roads. Add in the developments at Gosden Hill and Wisley/Ockham and you will have major problems in the future with traffic. I would suggest you come out to view Send Barns Lane and the roundabout by Little Waitrose at the rush hour, around 8.30 am and just imagine how the levels of noise, pollution, delays would be increased intolerably both for the existing residents and for the proposed new residents. The roads would be gridlocked.

Attached documents:

Comment: MM41 - LPMM18/808  Respondent: David Pycraft 11003969  Agent:

MM41 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley
In my objection to development at this site, I refer you to my previous observations (see MM44) regarding traffic safety and congestion along the A247, which is the planned route of access for site MM41. This is all the more pertinent when you take into consideration the pedestrian crossings along the road, including the school crossing.

I also refer you to the National Planning Policy Framework (point 80), as detailed above (see MM44), as to build extensively on this site would merge Ripley and Send villages into one. This is also another site prone to flooding. I also understand that it is contaminated with lead shot, which must raise serious issues about the health risk posed to any residents.

I am lead to believe that there were many thousands of objections previously to this site when the proposal was for 400 houses, so it is immensely distressing to know that these objections have been dismissed, and that the proposed number of houses has in fact risen to 550.

Attached documents:

Comment: MM41 - LPM18/3774  Respondent: Nick Thomas 11005473  Agent:

I have written to you on more than one previous occasion to express my dismay about GBC's plans for development in Send and the surrounding areas. Every few years the Borough Plan comes back, every time GBC says it has listened to the objections of residents, and every time the new plan contains a larger amount of the same unacceptable proposals than the previous one. I have no impression whatsoever that the Council really reads or is interested in the views of residents, but I believe the feelings of people in Send are sufficiently strong that we'll keep voicing them however long it takes.

My general objections to the massive burden of development proposed for the area have not changed and I will set them out in brief below before getting more specific about the latest round of proposed actions.

1. The analysis of ‘need’ for housing in the Borough as a whole is fundamentally flawed, based on a combination of flimsy survey evidence and the misinterpretation of this and other indicators, some of it by consultants lacking an understanding of the area; and on national-level generalisations about growth of housing demand. Previous objections by myself and others have gone into more detail on this view, and the fact of local and central government both trying to justify the policy by saying the other is insisting on it and they don't really want it and are trying to fight on the residents' side, speaks volumes.

2. Green belt legislation allows for building on designated land only in 'exceptional circumstances'. The current proposals and the national initiative behind them state clearly that the drivers of the Borough Plan and others like it are precisely the unexceptional circumstances against which the green belt is a legislative guarantee: pressure of population and demand for housing to meet it. If government has decided that the green belt legislation should be repealed in its entirety, that's a different issue: until that time, it expressly forbids what you are doing now.

3. The Plan covers housing, industrial sites and other construction of buildings in some detail, but still skates over the surface of the issue of infrastructure to support this development. Schools and medical facilities will need to follow and more thought should be given to how these can cope with demand. *Roads* on the other hand are something it's very difficult to imagine coping with the suggested levels of new build, however you choose to plan them. They are already clogged: Send residents in the last few weeks have had roadworks with temporary traffic lights in two adjacent spots on the Portsmouth Road between Ripley and the A247 roundabout, and one on Send Road, plus the simultaneous closure of Tannery Lane - these are all within half a mile of each other and have made it almost impossible to get anywhere, but they are just a tiny very local and current example of how the existing roads creak under the burden of existing traffic. The road into Guildford (crucial for all those new commuters you'll be creating) are far worse. Your proposals will add around 770 new houses to an area with about 2,000 in it at present and which already experiences these difficulties - do you honestly think sufficient roads can be built to carry the extra traffic without completely tearing up the local countryside?
Specifically, I object to the current proposals on the following grounds:

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

As per my letter of three years ago, the Garlick's Arch proposals (document 003a sections 11.36 to 11.37) will bring Send, Ripley and surrounding areas to a standstill, *even if* new roads are built cutting through more of the green belt - and these plans have been considerably enlarged since that time (550 houses instead of 400). The area also contains ancient woodland and is unsuitable for other reasons including frequent flooding.

**MM27 MM41 MM42 and MM48 / Transport Strategy**

Proposed changes to the A3 and the Clandon slip roads (document 003a, sections 11.14 to 11.34) will help to feed traffic more quickly into the local road system - what then? Jams will feed back onto the major roads and cause massive problems for both local and longer-distance motorists. GBC's assessment of possible solutions to this is extremely superficial - it's easy to write a few sentences promising infrastructure will follow but this is a real problem to which there won't be an acceptable solution: a proper amount of infrastructure to cope with this amount of development will devastate the green belt and destroy the character of the area.

Your current document suggests (Appendix 11.4 of GBC Responses to Matters, Issues and Questions reference 003b) that the increase in morning traffic on the A247 Send Road will be just 3% - after adding nearly 40% to the housing stock of the village. Heaven only knows how anyone arrived at this figure, but you don't need complex calculations to see that an estimate is out by an order of ten, as this is.

**Comment: MM41 - LPMM18/3249  Respondent: James Culmer 11007393  Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Attached documents:**

---

**Comment: MM41 - LPMM18/246  Respondent: Mrs Sandra Reeves 11008033  Agent:**

I feel that increasing the number of proposed houses is completely excessive as this amounts to an increase of 37%. I do not understand why a total of 7000 objections to this proposal have been ignored. This infrastructure of Send cannot cope with such a development with at least 800 additional cars blocking up a already busy local roads and will make it impossible to travel around the area. Already the school and health centre are straining with existing numbers and will not be able to cope with such an extreme increase in local housing.

**Attached documents:**

**Comment: MM41 - LPMM18/1589  Respondent: Russell Pascoe 11008225  Agent:**

I am writing to object to the local plan Main Modifications as outlined below:
MM41 Land at Garlicks Arch, Send Marsh, Policy A43  Increased from 400 to 550 homes of which 450 to be built in the first five years

- An increase of 37% in the number of houses proposed is excessive
- 7000 objections to the previous lower number have been ignored
- It is Green Belt containing ancient woodland
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

Attached documents:

Comment: MM41 - LPMM18/1594  Respondent: Russell Pascoe 11008225  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/1074  Respondent: Sally Baker 11009825  Agent:

I wish to register my objections to the latest Development Plans for Send by Guildford Borough Council.

MM41  Land at Garlicks Arch, Send Marsh Policy A43  This is Green Belt land and now an even greater number of houses is proposed. Send has several areas subject to flooding, this is one of them, and for us living at an even lower level the risks would be increased. I understand the site has ancient woodland and this would be sacrificed. There is insufficient infrastructure for such an increase and Send’s traffic problems would be magnified.

Attached documents:

Comment: MM41 - LPMM18/5680  Respondent: Stephen Gill 11010945  Agent:

7 MM41: The proposed Transport Strategy relies on inadequate modelling and takes no account of the delay in Highways England’s RIS scheme, which is currently two years and rising. This never ending delay will impact and make unworkable any proposed development reliant on that RIS scheme, including that proposed for the Former Wisley Airfield/Three Farms Meadows (Site A35). The Draft Plan is therefore unsound and the Examination should be reopened.

Attached documents:
Comment: MM41 - LPMM18/5681  Respondent: Stephen Gill 11010945  Agent:

8 A3 Improvements: There is too much reliance on A3 (Guildford) improvements that are beyond Guildford Borough Council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/1395  Respondent: Mrs Janet Williams 11011041  Agent:

550 homes in this area would put an unacceptable burden on the existing infrastructure. At the moment Send Road and the A3 are frequently at a standstill because of the volume of traffic. To travel south to Guildford on the A3 in the evenings can take over an hour to travel 10 miles. To get into Woking on the A247 in the mornings can take 45 minutes crawling in heavy traffic. It is sheer madness to add more traffic to any of the roads in this area.

The local doctors surgery and school are already struggling they are just not going to be able to cope with an increase in numbers. To increase the number of houses from 400 to 550 at Garlicks Arch indicates that all our previous comments have been totally ignored. The village of Send is being expected to take on far more than its fair share of developments.

Garlicks Arch development is on Green Belt and it is difficult to see why this development constitutes special circumstances when there are still many brownfield sites undeveloped in Surrey.

Attached documents:

Comment: MM41 - LPMM18/4928  Respondent: Mrs Janet Williams 11011041  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Increased from 400 to 550 homes of which 450 to be built in the first five years

If the original plan to build 400 houses was not acceptable to many so an increase to 550 houses is just an outrage and makes a mockery of the planning process. The roads in the village of Send and the surrounding area are inadequate with the present weight of traffic. There are frequently long delays getting in and out of the village to get to Woking on the A247 and to Guildford on the A3. Send Primary school, situated on the A247, necessitates heavy traffic and creates parking issues. An increase in traffic along this road will worsen the situation and make it even more dangerous for those trying to walk to school with their children. There is no evidence that the planned changes to the roads will make any difference at all. Equally the schools, doctors’ surgery, wifi/broadband will be unable to accommodate all the developments planned in the village. The increase in traffic will cause even more air pollution.

There is no justification to erode the Green Belt in this area in such a blatant and damaging way.

Attached documents:

Comment: MM41 - LPMM18/4938  Respondent: Mrs Janet Williams 11011041  Agent:
MM27 MM41 MM42 and MM48 Transport Strategy

Changes to the A3 slip road will in no way make up for the increased traffic that will be generated by all the planned developments. In fact it is far more likely to make the situation worse. What assessments have been done to predict the actual changes in traffic that will occur as the result of the planned developments?

Attached documents:

**Comment:** MM41 - LPMM18/3338  **Respondent:** Hannah Earle 11011297  **Agent:**

**MM41** Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years, which will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43 – Garlicks Arch; MM44 – Aldertons Farm].

There is too much reliance on the A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

**Comment:** MM41 - LPMM18/910  **Respondent:** Mary Warren 11011713  **Agent:**

**Proposed Housing.**

Modification MM41 Garlicks Arch

550 houses are now proposed, an increase of 150 from the previous plan. The objections to this building have been made before. Garlicks Arch is Green Belt Land with an area of ancient woodland, the ground of which is subject to flooding and contains lead shot, a potential health hazard. Building here cannot be considered 'limited infilling' as it is not within a village but rather separates Send, West Clandon and Ripley. The result of building so many houses on this land will be that the 3 villages will merge into one and become yet another sprawling housing estate.

There is no clear plan for allowing road access to these houses. The suggestion is that they will exit on to the A247. Inevitably, this exit would be very close to the A3 junction and the Burntcommon roundabout. (The plan talks about the Sendmarsh roundabout which doesn't exist. I assume they mean the Burntcommon roundabout). As it is possible that as many as 800 extra cars may be involved, this is asking for travel chaos and accidents!!

**Transport**

Modifications MM27, MM41, MM42, MM48.

As before, there appears to be no clear plan for transport links or other facilities such as schools and medical facilities, just fine words. Without such a document, the local plan is useless and will only lead to chaos and gridlock on the roads and impossible class sizes in our schools. Already, the roads around Send, Ripley and West Clandon are overloaded with enormous European sized lorries which rumble through the villages with no thought given to parked cars or pedestrians, mounting the pavements if they meet a lorry coming the other way. In addition, they emit considerable diesel fumes, risking the health of the children in the schools, at least two of which are very close to the road.

Attached documents:
Comment: MM41 - LPMM18/3372  Respondent: Geraldine Wright 11014369  Agent:

- MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm].

- There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/628  Respondent: Brenda Tulloch 11016001  Agent:

**MM41 – I object on the following grounds**

I object to the amount of houses proposed on this site – 550 houses will mean too much traffic for the area – which is already bad during rush hours – the impact for the school and doctors who could not possibly cope with all the additional people this would involve.

7000 objections on previous occasions have been ignored.

This is green belt land and when its gone it will be gone forever – this was designated green belt land many years ago and no one should have the right to alter this now.

This site is subject to frequent flooding and contamination.

Proposal for 770 houses to be built in Send with 1700 currently is just too much.

Attached documents:

Comment: MM41 - LPMM18/632  Respondent: Brenda Tulloch 11016001  Agent:

**MM27 – MM41 – MM42 – MM48 – I object on the following grounds**

Already congestion exists in Send at rush hours mainly with people travelling into Woking etc and at school drop off and pick up times. Are the proposed changes to the A3 really going to improve this – I don’t think so. This causes delays – pollution and gridlock.

Attached documents:

Comment: MM41 - LPMM18/4065  Respondent: Trevor Pound 11023489  Agent:
With respect to MM41 Land at Garlick’s Arch, Send Marsh, this is more unjustifiable seizure of Green Belt Land, which local residents have previously objected to. Despite this an increase in the level of build is now proposed! At 550 homes, this is completely out of scale with Ripley and Send villages, which it would effectively join together, with even more damage to the local environment and pressure on already stretched infrastructure as above. This would be a complete new village in itself, although, doubtless, houses will all be identical so in appearance will look more like a characterless state.

Further to my original objections to the Draft Local Plan 2016, submitted via email May/July 2016

I raise the following objections to the Main Modifications proposed.

I object to MM41 (Policy A43, Garlick’s Arch. Send Marsh/Burnt Common/Ripley).

Because the addition of a further 150 homes making 550 in total (an increase of 37% is excessive).

Because, the 2014 proposal for 430 house in Send was reduced to 185 in April 2016. In May 2016 policy A43 was added with 400 houses and Industrial units. At June 2017 we had 500 houses and 10 Traveller/Show people plots. There were 7,000 objections to the smaller development which I feel has been ignored. This number of objection must be taken into consideration!

I object because GBC have exaggerated the need for the 12,426 houses in the local plan. A population increase of 20,000 in the plan period would require just 8,000 homes based on 2.5 soles per habitat.

Because, this site is on Green belt, permanently protected by NPPF to prevent the merging of settlements ie Ripley/Send Marsh/Send. There are no exceptional circumstances to take this site out of the Green Belt. The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

Because, this site is subject to flooding and has a flood zone 2 allocation.

I object to MM41 because of the increased pressure on local facilities, Doctors, Schools etc. that 500+ homes would bring to Send.
550 new homes would generate circa 60 additional children to be schooled. Send school no capacity for these extra pupils and Ripley school has been closed. Circa 1,375 folk would require GP services, where will they be provided?

Because of the additional traffic this will create. There are circa 1,700 houses in Send. The proposed developments at Garlick’s Arch 550, Clockbarn 60, Winds Ridge 40, Plus Alderton’s Farm 120. Adds 770 new homes. An increase of 45%. This is excessive for our roads and indeed the infrastructure of our Village.

Attached documents:

Comment: MM41 - LPMM18/180  Respondent: Mike Tarrant 11032705  Agent:
I object to MM27, MM41, MM42, MM48, Transport Strategy.
Because we have no verified assessment from Guildford Borough Council of the Traffic implication these modifications will impact on Send.

Common sense tells me development on the scale proposed in Send and wider a field at Gosden Hill, Wisley and Ockham. Plus the proposed M25/A3 Junction will increase traffic in our Village and with it the problems it brings.

Attached documents:

Comment: MM41 - LPMM18/4272  Respondent: Jo Komisarczuk 11033057  Agent:
I am writing to record my huge dismay and I wish to object in the strongest terms to the following changes to the Local Plan. Send appears to be the most heavily affected area in all the entire local plan but has new requirements put on it by the latest changes referred to as the Main Modifications about which I understand are the only changes I can comment on.

MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

This land is currently farm land and has an area of ancient woodland, it is also within the greenbelt and therefore should never be built on. Especially as no evidence of exceptional need has been demonstrated.

The modification allows for 550 houses of which 450 must be built within the next five years. I understand that 7000 objections were raised about this in the previous consultation, all this work by 7000 people who live in and around the village has been ignored and we the people who live here count for nothing.

The site is constantly flooding in wet weather, and flood water even managed to get into the Gas main a few years back which caused many to be without gas for days in the winter. I understand that Lead sot is also a large issue on this area, although as I am wheelchair bound I have not proved this for myself.

The building on the site known as Garlic Arch will join Send to Ripley, as well as obliterating the hamlet of Burnt Common, which has its own identity, which has been under attack from local authority for many years. Tis joining of two villages and one hamlet can only be viewed as overdevelopment and therefore should not be allowed.

The building of all these extra houses in an area already struggling with not enough school places for the existing population plus no facilities for the local Doctors, Hospitals, Dentists etc.

Attached documents:
Comment: MM41 - LPMM18/4275  Respondent: Jo Komisarczuk 11033057  Agent:

MM27, MM41, MM42, transport strategy

Burnt Common, Send, Ripley, will all be unduly affected by the road changes at Garlick’s Arch, ClockBarn, SendHill, Send Business Centre, and nearby Gosden Hill, the changes which are frequently on/off at Wisley/Ockham have not been addressed by the plan, beyond the use of the A3 with its proposed changes and the Clandon slip roads. No survey has been done on the current flows of traffic, no proper assessment has been completed at all of the aggregate traffic increases and impact on Burnt Common Lane, Send Barns Lane and Send Road. The constant gridlock at heavy use times – morning and evening - and the increase in pollution especially Nitrogen Dioxide which is already bordering on dangerous levels. There will be many thousands of extra cars travelling through the area, increasing the already loud noise from the A3.

Attached documents:

Comment: MM41 - LPMM18/1162  Respondent: Nick Pycraft 11034817  Agent:

MM41 Land at Garlick's Arch, Send Marsh Burnt Common and Ripley

I object to development on site MM41. I am informed that there were thousands of objections (my own included) to the previous proposal of 400 houses at this site, so it is appalling that these have been ignored, as the proposed number of houses has actually increased to 550. My previously stated objections still stand. Firstly, the pressure on an already heavily used A3 would be too great, leading to severe delays, increased accident risk and potential gridlock. This applies equally if not more so to the notion that the A247 through Send could cope with this increase in traffic, as the volume of traffic travelling to and from Woking through Send often sees long queues, often coming to a standstill, throughout the village at peak commuting times.

This is also another area that serves as a barrier between villages, Send and Ripley, so I reiterate that the National Planning Policy Framework (point 80) states that one of the purposes of Green Belt land is 'to prevent neighbouring towns merging into one another'.

Attached documents:

Comment: MM41 - LPMM18/4208  Respondent: Nick Pycraft 11034817  Agent:

Ref: Objection to Planning MM41, MM42, MM44, MM9 and transport strategies

I write to object most strongly to the planning modifications to the above developments.

I object because the excess number of properties being planned will change the village out of recognition, we do not have the space and infrastructure for this number of properties.

The vast enlargement of the industrial areas will cause excessive noise, damage and danger to the younger and older residents in the village. These developments are again out of proportion to the village of Send.

The traffic changes on and off the A3 will cause major traffic congestion, mainly due to the lack of road space in Old Woking at all times and Ripley during the peak rush hour periods.

The Green Belt should be protected and not ignored.

Overall these planning applications cause a vast overdevelopment of the village and area of Send and should not be continued at the scale of the current proposals.

Attached documents:

**Comment:** MM41 - LPMM18/1738 **Respondent:** Peter Bassett 11036545  **Agent:**

MM41 - the transport strategy is reliant on inadequate modelling. This includes the delayed M25 Junction 10 scheme proposed by Highways England and the excessive reliance on A3 (Guildford) improvement both of which are outside Guildford Borough Council control and with uncertain commencement and implementation dates.

Attached documents:

**Comment:** MM41 - 10056821 **Respondent:** Brian Slade 11036705  **Agent:**

Specifically I OBJECT to the following Policies in addition to Policy 32:

I object to MM41 - Land at Garlick's Arch, Send Marsh Policy A43 because, where despite some 7000 previous objections which have been made, it is now proposed that the previously planned 400 should be increased to 550 homes of which 450 should be built in the first 5 years (given the un-availability of builders in this area due to the large construction projects such as Heathrow and the new Petrol Pipeline it is questionable whether this is remotely possible).
Based on the Government's ONS calculations this would represent an excessive burden on Send/Ripley as the figure demanded for this site alone would represent nearly 20% of GBC's total annual housing needs per annum!

This area which is permanent Green Belt with no "exceptional circumstances" contains ancient woodland dating back to Elizabeth I which GBC are proposing to destroy. It is also currently a Flood Zone 2 allocation having frequent flooding and is contaminated land with lead shot following 50 years of shooting activity. The proposed development will generate excessive traffic on roads that already get gridlocked in Send and Ripley at peak times and the over development would also join up Ripley and Send which is contrary to the key purpose of the Green Belt.

Local schools and medical facilities would be under tremendous overload with the proposed increase in population and likely to collapse - without major infrastructure improvement and development - which the Plan does not even mention or consider.

Attached documents:

---

**Comment:** MM41 - LPMM18/1694  **Respondent:** Brian Slade 11036705  **Agent:**

MM27,MM41,MM42,MM48 Transport Strategy Increased traffic density caused by the proposed addition of 770 dwellings to Send, an increase of 45%; the majorly expanded industrial and storage area: and the new sliproads to and from the A3 resulting in thousands of extra cars and lorries travelling into Woking daily via the A247 together with the serious congestion and air pollution (which is already at dangerous levels) does not seem to have had any form of formal traffic assessment undertaken by GBC otherwise they would realise that their proposed plan will result in the destruction of Send's current infrastructure and that of its surrounding areas as well as increased noise and nitrogen dioxides pollution causing damage to the health of residents as well as serious traffic delays and gridlock of local roads.

Attached documents:

---

**Comment:** MM41 - LPMM18/4802  **Respondent:** Judith Mercer 11036801  **Agent:**

MM41

The transport strategy relies on inadequate infrastructure modelling including the Highways England Junction 10 scheme delayed for at least 2 years. The impact this will have on certain development sites specified in the Plan which rely on this scheme may be severe and has not been given proper consideration in the policy. The Council is relying too much on the A3 Guildford improvements that are not under their control and that have no fixed time scale.

Attached documents:

---

**Comment:** MM41 - LPMM18/4807  **Respondent:** Judith Mercer 11036801  **Agent:**

MM41 Site 43 Garlick’s Arch- Send Marsh

I object to the policy to develop this site which is in Green Belt. No exceptional circumstances have been proven to justify removing the land from Green Belt.

Attached documents:
There is no guarantee that the houses to be built here will be more affordable if the Plan increases the numbers of homes built. All new homes built in this part of the country are very expensive. It will cause severe traffic congestion in Send and Ripley where roads are already at capacity.
The need for this development is not proven and is based on incorrect household projections. This site along with other sites marked in the Plan should be reconsidered using up to date ONS figures (Sept 2018).

Attached documents:

Comment: MM41 - LPMM18/3354  Respondent: Debra Somner Fraser 11041025  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/1749  Respondent: Beryl Sussex 11041633  Agent:

To The Planning Policy Team, Guildford Borough

I wish to object to the vastly increased plans for building in Send Village, which seem disproportionate to plans for other villages in the Borough.

MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

Previous objections have been ignored. Ancient woodland, which enhances our environment, will be destroyed.

Traffic congestion in the area will become a greater problem.

Local facilities like Schools and Medical Centre will also be severely stretched.

Attached documents:

Comment: MM41 - LPMM18/1753  Respondent: Beryl Sussex 11041633  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

All the combined developments planned will place a huge burden on the present traffic system.

Send is already used by many Woking Commuters to reach the A3.

It is already a very busy road. More traffic will lead to more delays, gridlock, noise and pollution.

Attached documents:
MM41, Garlicks Arch, Policy A43

This is an item that has been massively objected to previously - I am not sure why the council still seems to think it may be viable when there were more than 7000 objections to a lower number.

It is green belt land including ancient woodland.

I have seen the area flood frequently - that doesn't seem like an ideal housing site to me.

It will link Ripley and Send diluting the character of the separate villages and contribute to urban sprawl.

The local roads cannot sustain the increased traffic given there are already frequent delays due to traffic.

There are minimal local transport facilities (bus services have been reduced and there is no train line) to support increasing the village size.

Ripley school has recently been closed down, and Send school is already full - where are the school places for more houses/ families.

Attached documents:
MM41 - Land at Garlics Arch, Send Marsh, policy A43

I object to this on the following grounds;

- This is Green Belt land
- proposed new development is excessive
- it will destroy the ancient woodland at the site
- Will further add to the existing flooding issue
- Extra cars will block up the existing busy roads
- Impact the already strained local services such as schools and medical facilities

Attached documents:

Comment: MM41 - LPMM18/3723  Respondent: Peter McGowan 11047201  Agent:

MM41 Land at Garlick's Arch, Send Marsh, Policy A43

Approximately 7000 objections to the previous proposed number of 400 have been ignored and now 550 homes are proposed, which is an excessive 37 per cent. The land comprises Green Belt and ancient woodland. It is inappropriate for this land to be developed for these reasons and also because it is significantly polluted by lead shot and prone to frequent flooding. The modifications will have the effect of connecting Ripley and Send and therefore represent over development as well as leading to at least 800 additional cars congesting local roads. It will also place a significant strain on local infrastructure - in particular, schools and medical services - which as referred to above, is an issue that is inadequately addressed in the modifications and the overall proposals.

Comment: MM41 - LPMM18/3726  Respondent: Peter McGowan 11047201  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The proposed A3 amendments and the Clandon slip roads do not properly address the impact of traffic for Send of development proposals for Aldertons, Clockbarn, Burnt Common and Garlick's Arch in addition to Gosden Hill and Wisley/Ockham. There is no adequate analysis of the total traffic implications on Send Barns Lane and Send Road especially taking into account the fact that thousands more cars will transit the area daily, bringing about increased noise and chemical pollution as well as delays, which noticeably have increased significantly over the 18 years that I have lived in the area, at the expense of residents and the natural environment.

Other Developments

The consultation only permits commentary on the principal changes and thus denies residents the opportunity to object again to 40 houses and a travellers' site on Send Hill, 60 Houses at Clockbarn in Tannery Lane and a 25 per cent increase in the size of the Send Business Centre notwithstanding the existence of the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

As a general point, many of the amendments can only be viewed without the context of appropriate infrastructure, with mention only being made that consideration need only be given to issues, including schools. It is unreasonable and unfair
to put the amendments forward without mention of the infrastructure needed to support the original proposals, earlier modifications and these modifications.

**Comment: MM41 - LPMM18/2916  Respondent: Hazel Corstin 11047329  Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

**Comment: MM41 - LPMM18/5891  Respondent: Patrick Oven 11048481  Agent:**

Turning now to specific site objections, listed in accordance with the size of the proposals:-

MM41, Garlick's Arch, Send Marsh, Policy A43.

This site has had its proposed allocation of new houses increased by the Inspector at the Inquiry from 400 to 550. The site is prone to flooding and has for many years been used as a shoot, and thus is contaminated by lead shot. There is a large area of ancient woodland on it, mainly adjacent to Portsmouth Road, which acts as a barrier, both visually and audibly, to the A3 trunk road running parallel to Portsmouth Road. The site is in the Green Belt, so can only be developed if "exceptional circumstances" can be shown. It also separates Ripley from Send Marsh, providing at present a clear break between the villages. Development of this area would effectively turn Ripley and Send Marsh into one conurbation. Send Marsh is already largely linked to Send itself by development, the only open area being Alderton's Farm, which is also now proposed for development and will be dealt with separately. All three locations would thus become one continuous developed area. The infrastructure in the area is already at full capacity. Given that most of the houses are likely to have two cars each, up to 1000 extra cars will be disgorged onto the local roads. The Burnt Common roundabout already has traffic queuing in all directions at busy times. At 7.15 in the morning the queue from Send Barns Lane to it can attest can run from the Send crossroads to the roundabout, over a quarter of a mile. The school in Ripley has just closed, and the new one in Send is at full capacity, as is the Medical Centre in Send which serves Send, Send Marsh and Ripley and is the only one in those villages. No plans to increase any of this vital infrastructure are included in the Plan.

Attached documents:

**Comment: MM41 - LPMM18/5897  Respondent: Patrick Oven 11048481  Agent:**

MM27, MM41, MM42 and MM48 - Transport Strategy.

GBC has grossly underestimated the effect on the local roads of the proposed developments discussed above and the other developments proposed in the Plan at Clockbarn Nurseries, Send Hill and the expansion of the Send Business Centre in Tannery Lane, which are not the subject of amendments and so precluded from discussion here. At the Public Inquiry GBC indicated only a minor increase was anticipated in traffic through Send on the A247 was anticipated. That totally fails to take into account that such huge development has to bring a large increase in both car and HGV traffic, which can only use the existing roads - no new ones are proposed. The proposed 4 way slip roads at the Burnt Common Clandon slip, currently only a northbound exit and a southbound joining will inevitably lead to increased traffic through
Send. At present, traffic on the clockwise M25, bound for Woking generally leaves at junction 11. It is possible leave at junction 10 and take the A3 for a mile, leaving and going through Ripley, then Send and Old Woking. However the bottleneck that Ripley presents at busy times morning and evening at present dissuades this. Traffic turning right into the very narrow entrance to Newark Lane, heading for Pyrford and Byfleet, blocks the High Street, causing tailbacks that often stretch back to the A3 junction. GBC has completely failed to take into account that the provision of the 4 way slips at Burnt Common will also serve a new road from the proposed large development at Wisley Airfield, running parallel with the A3 and bypassing Ripley. M25 clockwise traffic intending to go to Woking will thus find it worthwhile when the M25 has it's usual morning and evening queues from Cobham Services to leave at junction 10 and take the new route to Burnt Common without any fear of hold-ups in Ripley. That traffic will however have to travel along Send Barns Lane and Send Road, already gridlocked morning and evening, adding even more congestion, noise and pollution. Ripley meanwhile, will bask in relative peace.

Send had the temerity to elect Guildford Greenbelt Group Borough Councillors in 2015. It is impossible to avoid the conclusion that this Plan is punishing the village for doing this. The proposed development, even as it stood prior to the increases provided by the amended Plan and the Inquiry, concentrated 40% of the housing development in an area with 18% of the Borough's population. We are also now intended to take a huge industrial area, the only one of its size in the Plan - all in one rural location. This Plan, taken as a whole as it must be, is utterly disproportionate and unfair to Send, Send Marsh and Burnt Common.

**Comment:** MM41 - LPMM18/4193  **Respondent:** Belinda Nicoll 11049729  **Agent:**

MM41 Land at Garlick's Arch, Send Marsh, Policy A43
This wasn't in the first local plan and there's no reason why Send need this amount of housing so one can only imagine that Send has been selected to accept more than it should due to other parts of the borough not accepting their burden. Why can it be that the following points are being ignored?

- Increased from 400 to 550 homes of which 450 to be built in the first five years
- Increase of 37% in the number of houses proposed in the modifications is excessive.
- That 7000 objections to the previous lower number have been ignored.
- It is Green Belt containing ancient woodland.
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

<td>The number of houses is excessive and previous objections have been ignored with a lower number of houses. The area is in the green belt and is an area of ancient woodland, it is protected and can not be violated as the green belt is protected. The number of extra cars from the houses will be huge, using already congested roads around the area. With weekly problems on main travel routes M25 and A3 these roads can not even cope with existing traffic. With traffic delays cars work inefficiently and pollutants are increased. Does the council want to be responsible for shortening the life of residents. Years of lack of investment in local schools, health infrastructure and a general lack of vision by the local council is why we have these issues. This needs to be addressed prior to any consideration for home building. One of the local primary schools which the children living in the new houses would have gone to has been CLOSED. Where will they go to school as there will now not be enough school places. The schools are already over subscribed. Send first school was rebuilt bigger to absorb St Bedes and its full already. Prime example as to lack of vision and planning failures. The medical centre is already unable to cope with existing patients. When ringing for appointments we are already told to go to the walk in centre as they can't help. This is unacceptable and will be made worse.</td>

This land is currently farm land and has an area of ancient woodland, it is also within the greenbelt and therefore should never be built on. Especially as no evidence of exceptional need has been demonstrated.

The modification allows for 550 houses of which 450 must be built within the next five years. I understand that 7000 objections were raised about this in the previous consultation, all this work by 7000 people who live in and around the village has been ignored and we the people who live here count for nothing.

The site is constantly flooding in wet weather, and flood water even managed to get into the Gas main a few years back which caused many to be without gas for days in the winter. I understand that Lead sot is also a large issue on this area, although as I am wheelchair bound I have not proved this for myself.

The building on the site known as Garlic Arch will join Send to Ripley, as well as obliterating the hamlet of Burnt Common, which has its own identity, which has been under attack from local authority for many years. Tis joining of two villages and one hamlet can only be viewed as overdevelopment and therefore should not be allowed.

The building of all these extra houses in an area already struggling with not enough school places for the existing population plus no facilities for the local Doctors, Hospitals, Dentists etc.

MM27, MM41, MM42, transport strategy

Burnt Common, Send, Ripley, will all be unduly affected by the road changes at Garlick’s Arch, ClockBarn, SendHill, Send Business Centre, and nearby Gosden Hill, the changes which are frequently on/off at Wisley/Ockham have not been addressed by the plan, beyond the use of the A3 with its proposed changes and the Clandon slip roads. No survey has been done on the current flows of traffic, no proper assessment has been completed at all of the aggregate traffic increases and impact on Burnt Common Lane, Send Barns Lane and Send Road. The constant gridlock at heavy use times – morning and evening - and the increase in pollution especially Nitrogen Dioxide which is already bordering on dangerous levels. There will be many thousands of extra cars travelling through the area, increasing the already loud noise from the A3.

MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

• An increase of 37% in the number of houses proposed is excessive and will create yet more cars on the road and additional pressure on school and medical facilities.
• The site will now become a disproportionate addition to a village of currently 1700 homes.

Attached documents:

Comment: MM41 - LPMM18/1036  Respondent: Vicki Groden 11070401  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

• Has an updated comprehensive assessment been made, taking into account all the sites affecting local traffic - Garlick’s Arch, Burnt Common, Clockbarn, Alderton’s, Wisley and Gosden Hill, with the changes in housing numbers, to assess the impact on Burnt Common roundabout which will be substantial, and needs assessing at peak hours when most are affected and pollution, congestion and noise will be greatest.
OBJECTION – Policies MM41, MM42 and MM44

I object to the proposed development at these sites as they are all within green belt areas. There are no reasons provided within the Main Modifications to the Local Plan that substantiates development on green belt land.

I urge the council not to consider removing the Green Belt and set in motion future development of these spaces, but to focus on the numerous unused BROWNFIELD sites that exist throughout the Borough. These would more than meet the current housing demand, once this is properly defined within the Local Plan.

Attached documents:
RE: Objection to Local plan

I am writing to object to the over development of Send village in the proposed Local plan.

My family have lived in Send for over 50 years. We, along with all residents of Send and the surrounding villages, will be negatively affected by the impacts of the development on the green space, transport system and the health and education provision.

The following specific objections relate to the following proposed developments

MM41 Garlicks Arch 550 homes

MM42 Burnt Common industrial and storage

MM44 Aldertons Farm 120 homes

1. The current proposed number of new homes is across all schemes is 770 compared the current number of 1700 homes in Send. This is a 45% increase and will massively change the nature and way of life in Send beyond all recognition and it will lose its village feel. In addition the developments that are being proposed will join Send to Send Marsh and Send Marsh to Ripley resulting in one large village removing the individual character.

2. The introduction of 770 new homes will result in an addition of up to 1500 cars on the roads of Send and Ripley. There are currently major delays and traffic queues through Send, Ripley and at all junctions at both morning and evening peak times which can extend throughout the day as soon as any road works are introduced in the local area. The addition of 1500 cars will cause the local roads to gridlock and increase the risk of accidents. This in turn will reduce the numbers of cyclists and pedestrians due to the pollution and increased risks of accidents.

The proposed Industrial and storage provision at Burnt Common will necessitate a large number of HGV vehicles passing through Send and Ripley. Even if there are proposed new roads and junctions to aid in this, without legal controls in place, companies will use the smaller roads as direct routes. In the event of problems on the main road network lorries would be diverted via the smaller roads -this is becoming and more and more frequent problem as the main road networks are becoming overwhelmed.

3. The Villages Medical centre already covers the villages of Send, Ripley, Clandon and surrounding areas and it can already take over 6 days to get an appointment to see a doctor. An increase number in excess of 2000 patients would make it impossible to get an appointment and would result is people being unable to see a doctor or having to present themselves at A&E as the only way to achieve a healthcare provision. This is totally unacceptable and would put people’s health and lives at risk.

4. The nearest secondary school is becoming increasingly oversubscribed from Guildford residents, leaving a reduced number of places for residents of Send. This is leading to a situation in a couple of year’s time when there will be no places allocated to children in Send. Provision of good quality school places to meet the current population requirements has been promised for years and is yet to be delivered. The planned increase in population will only add to this. The proposed number would require a new school to be built and established prior to any development to ensure provision was in place.

5. The necessary construction and infrastructure traffic required to construct these developments will have and major and lasting effect on the village, roads, trees and surroundings with pollution and damage to the roads. I work in Construction logistics and know fully the extent of the problems that will occur and how unless fully controlled, promises on measures to avoid impact during construction will be ignored once construction starts.
Although the proposed development in Send Hill is not included in the amendments, as residents of Orchard Way we would be negatively affected by the proposed development as follows.

- The proposed number of houses on the site is inappropriate for the size of the site.
- The increased traffic from the dwellings will overwhelm the road and the associated junctions with impact on risk of accidents and delays.
- The construction traffic to build the dwellings will cause major disruption and permanent damage to the road and environment including damage to trees and hedges from the large delivery vehicles.
- There are already major problems with the main sewer drainage from properties in Orchard Way and Send Hills which will be compounded by the introduction of 40 new dwellings.
- The area identified is Green Belt and this must be maintained for future generations.
- The number of dwellings proposed would not allow space for sufficient and realistic parking allocations for a rural housing location leading to parking in Send Hill which is already a problem and further adds to delays in traffic and accident risks.
- The inclusion of Traveller pitches will have a detrimental effect on the areas for the following reasons.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]. Where even a small number of pitch allocations have been provided it often leads to unofficial sites being set up locally and further travellers visit / locate to the area in an attempt to grow the provision and their community.

In these instances it has been seen that councils are either unwilling or unable to take enforcement action leaving it to residents groups to take action to resolve the issues.

The Send Hill cannot accommodate the transport of mobile homes.

As with all proposals within the local plan they are based on providing the best option to housing developers by providing the largest number of dwellings in one block to maximise the opportunity for their profit.

The focus and responsibility of the council must be to meet the housing need in the most sympathetic and sustainable way and ensuring the villages are not lost under new towns and all character is lost. The local plan needs to be re-drafted under these terms and opportunity for small development identified that will fit within the villages and where the village can influence the development rather than the development have a major detrimental effect on the village.

Attached documents:

Comment: MM41 - LPMM18/343  Respondent: Michael Turner 11100193  Agent:

POLICY A43: LAND AT GARLICK'S ARCH, SEND MARSH/BURNT COMMON AND RIPLEY. MM41

I object to this increase from 400 to 550 homes, which is without justification. Development on the Green Belt is contrary to Government planning policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. Removing so much green belt land from around Send Marsh is incompatible with the Government’s definition of “sustainable development”. There are no “exceptional circumstances” as required by NPPF paragraphs 79-92 to justify allocating Green Belt land for development. I also object to the loss of Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. This development would also merge the currently separate village settlements of Send and Ripley. This is contrary to the
policies for sustainable development in the NPPF which state that “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open” (NPPF paragraph 79).

This development proposal is in an unsustainable location because the site is unsuitable due to lack of access to sustainable transport. It does not benefit from a railway station within easy walking distance and bus services are poor. Residents will have few options but to be reliant on private motor vehicles. There is no adequate assessment of the effect of the traffic generated by the 800+ cars which would accompany this development. These additional vehicles would contribute adversely to the already unacceptably high pollution levels generated by the A3, while the A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The development would also place further pressure on stretched medical and school provision, while many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers.

3 Delivery Rates - MM41 and Appendix 1

The decision of the Council to increase the housing capacity at Garlick’s Arch is not contested within these representations. However, the suggestion that the site is capable of delivering 450 dwellings within the first five years of the Plan cannot be founded on a sound basis.

Whilst the Plan is assessed against the 2012 NPPF, the transitional arrangements within the revised Framework makes it clear that its policies will be a material consideration from day one of its publication and that greater due weight will be given to Local Plan policies that accord with the 2018 Framework. Accordingly, it is crucial that the Council’s purported five-year supply of ‘deliverable’ housing sites accords with the new definition. This states:

“Deliverable: To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Small sites, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.” (Our emphasis)

The Council may point to the St Modwen v SSCLG and East Riding Court of Appeal decision in supporting the inclusion of such a projection within its trajectory. This concluded that sites may be included where they have a “realistic prospect” of coming forward for development. At the time, St Modwen had argued the Council could demonstrate a supply of around 7,000 dwellings based on sites with planning permission or a resolution to grant, plus a windfall allowance, compared to the claims of East Riding Council that it could demonstrate a supply closer to 15,000 dwellings by incorporating a wider range of sites without planning permission. Nearly 5 years on from that assessment, the actual housing completions in East Riding has failed to reach the Local Plan targets and is below even the 7,000 dwelling figure proposed by St Modwen. The decision of Government to incorporate this new definition within the NPPF is a clear indication for Councils to enact a step-change in the previously overly ambitious forward projecting.

For the site at Garlick’s Arch, it is appreciated that a Statement of Common Ground (SoCG) has been signed between the promoter (Ptarmigan Land) and the Council, providing a commitment to the delivery rates stated. However, what this document does do is to confirm the number of uncertain steps that remain prior to housing completions commencing on site.
Ptarmigan Land represents a strategic promoter and whilst it deals with housebuilders, it is not one itself. As confirmed at Appendix 3 of the SoCG (dated July 2018), there are no contracts in place between Ptarmigan and a housebuilder, nor is there a prospect of this occurring until after the adoption of the Local Plan at the earliest. Though there is a suggestion of a hybrid application under a JV (or similar) agreement, the most realistic prospect would be for Ptarmigan to sell the entirety of the site, or site parcels following obtaining an outline planning permission. Either way, there will be a significant lead-in time whilst applications are worked up, permission is sought, and contracts (both S106 and commercial) are negotiated and permission granted. Once the site is in the hands of a housebuilder (or two), these will need to seek reserved matters approved and discharge pre-commencement conditions before preliminary works on site to commence. It is noted that no application has been submitted nor has a date been provided for its anticipated submission. No Screening or Scoping Opinion has been submitted, nor has the potential need and time implications for requiring an EIA been appreciated within SoCG.

We would refer to the fact that the Inspector has been presented with the NLP research on housing delivery, including the detail that lead-in7 times for sites in excess of 500 units being over five years. Further research8 demonstrates that a single sales outlet on a development will typically generate 30–40 sales per annum. Even were the site to benefit from two sales outlets as suggested, yields would not realistically exceed 80 dwellings per annum at peak times.

Accordingly, even accounting for a generous first housing completion date of Q2 2022, and allowance for two outlets from day one, the site cannot be expected to be capable of delivering more than 240 dwellings within the first five years of the Plan compared to the 450 proposed by the Council.

Comment: MM41 - LPMM18/142  Respondent: Nigel Tallick 11151617  Agent:

In particular I would like to object to the developments MM44 and MM41.

As well as impacting on the heritage of the area around Send Marsh Green, MM44 also contradicts the Green Belt policy of MM9. This land has always been listed as green belt land and therefore other non-green belt sites should be considered before developing this green belt land. In addition, the whole area around Send is at full capacity for what the current infrastructure can support, this includes:-

Roads
Schools
Doctors
Dentists

Send Villages Medical Practice is full, takes many days if not weeks to get a Doctor's appointment. Ripley has now lost is local primary school and only has one small dentist practice. The roads around this area are heavily congested at all times and safety is becoming an issue as more and more major accidents are happening on the A3 section parallel to the Send/ Ripley area as well as parking being pretty non existent during peak times. With no local schools being able to take a large influx of new residents, this would result in yet more traffic as new residents would have to drive their children to distant schools outside of the local area.
Therefore, without substantial additional infrastructure to support the above, this area cannot support any more additional housing as shown in MM44 and MM41.

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

**Comment:** MM41 - LPMM18/6020  **Respondent:** Karen Lord 11550561  **Agent:**

**MM41 Land at Garlicks Arch,Send Marsh Policy A43**

I object to the increase from 400 to 550 houses as well as the 450 are to be built in the first 5 years.
This is an increase of 37% in the number of houses to be built. This over development will effectively join Ripley to Send and destroy both villages indiuviality.

The extra thousand cars and between over 1600 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

It is such a shame for democracy that with 7000 objections to the earlier plan seem to have been ignored and more houses etc added?

MM27. MM41. MM42 and MM48 TRANSPORT STRATEGY
The increased traffic for Send from Burnt Common, Garlicks Arch, Clockbarn, Aldertons as well as Gosden Hill and Wisley Ockham is properly been addressed by the road changes of the A3 and Clandon Slip Roads.
The massive increase in traffic going to and from Woking along Send Barns Lane and Send Road will cause air pollution delays and gridlock in our village.

MM41 POLICY A43 Land at Garlicks Arch, Send Marsh

I object – There is a very severe concern that the additional houses proposed for this site, will put a further burden on the Medical Centre and Primary School where there is very little space to expand their facilities.

The increase in vehicles would undoubtedly have a great impact on the already congested road network

Attached documents:

Comment: MM41 - LPMM18/6013  Respondent: Debra Hurdle 11941665  Agent:

Again with all the new houses proposed on this site, there will be further pressure on existing services in Send and the already congested junctions at either end of Send Marsh Road to access the main roads through Send.

Attached documents:
**Comment: MM41 - LPMM18/742  Respondent: Michael Cumper 12129889  Agent:**

I object to this - This area is green belt and contains important trees. Villages should have distinct areas between them and this separates Send from Ripley. The roads north through Ripley and west toward Woking are already a nightmare at rush hour and this development will make it even worse. The infrastructure is just not in place for this. Before such developments can be considered there needs to be proof that the schools and doctors in the area are in a position to cope, which I doubt very much they are.

**Comment: MM41 - LPMM18/4753  Respondent: Katherine Pyne 15057889  Agent:**

RE: Objections to Guildford Borough Council (GBC) Local Plan – Consultation due to close on 23.10.2018.

I am writing in response to the latest version of the Local Plan as outline in GBC-LPSS-026. As in earlier versions of the plan, the modifications presented for Send are inappropriate, excessive and will be highly detrimental to our village, our quality of life and our future. These changes will result in irreversible destruction of our village.

The local plan in its current form illustrates the continued failure of GBC to provide a plan that is fit for purpose, supported by competent data made available in the public domain, which provides for the needs of current residents, and secures the best future for them and LISTENS TO LOCAL VOICES.

**MM41 LAND AT GARLICK’S ARCH, SEND MARCH, POLICY A43**

- I object to GBC going against Government guidance in their proposals to build on Greenbelt land and failing to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.

- I object that this development is proposed on Green Belt Land and will destroy countryside and ancient woodland.
• I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.

• I object to this development as it will ‘join up’ Send and Ripley and local character will be destroyed by this over development.
• I object to GBC ignoring the 7,000 previous objections raised by local residents with regard to developing this area.
• I object because the site is subject to frequent flooding, which will only worsen with increased buildings and ground coverage.
• I object because local schools and medical facilities will not be able to support the massive increase in demands resulting from this plan.
• I object because local infrastructure will not be able to support the additional demands of new residents.
• I object to GBC’s proposal to consider and adequately address infrastructure requirements when proposing an excessive, unnecessary and disproportionate increase in housing for Send and Send Marsh.
• I object because the land is contaminated by lead shot and this will compound the problem of increased flooding and will be detrimental to health and well-being.
• I object because the land is contaminated by lead shot and this will compound the problem of increased flooding and will be detrimental to health and well-being.
• I object to GBC increasing by 37% the number of houses in this development, which is excessive and not supported by need but demand and proposed to promote excessive and unnecessary housing development in this area to the benefit of housing developers but not residents.
• I object that GBC continues to stand by its discredited and unreliable estimate for future housing need and fails to adjust this downwards by considering its erroneous assumption about student population forecasts in Guildford. This would of course impact on housing need across neighbouring areas including Send.

**MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY**

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

**Attached documents:**

**Comment: MM41 - LPMM18/588  Respondent: Mr Anthony Fairbairn 15067393  Agent:**

I object to the proposal to build 550 houses at Garlick’s Arch. The impact of 550 households on traffic around Send will be devastating, it is currently subject to long jams during peak periods, increased traffic will increase noise and air pollution. 550 new homes will totally change the character of this rural village. It will be a tragedy to build on ancient woodland which is part of the green belt area - brown field sites are available elsewhere. The area is often flooded and is contaminated by lead shot. The plan does not take into account the fact that school and medical facilities already under stress and ill prepared to cope with extra pressure.

**Attached documents:**

**Comment: MM41 - LPMM18/845  Respondent: Anita Fairbairn 15067425  Agent:**

I love living in Send Marsh. It is part of Send village, and contains green fields, ancient woodland with a lovely balance of homes and open spaces. I was horrified to discover that despite having previously objected to several proposals in the Guildford Local Plan which were likely to affect the character and quality of life of Send, the latest version of the plan actually has a more negative impact on Send than before.
I object strongly to the proposal to build 550 houses at Garlick's Arch. The impact of 550 households on traffic around Send will be devastating, it is currently subject to long jams during peak periods, increased traffic will increase noise and air pollution. 550 new homes will totally change the character of this rural village. It will be a tragedy to build on ancient woodland which is part of the green belt area - brown field sites are available elsewhere. The area is liable to flooding and is contaminated by lead shot. The plan does not take into account the fact that school and medical facilities already under stress and ill prepared to cope with extra pressure.

Attached documents:

**Comment**: MM41 - LPMM18/484  **Respondent**: Ann Elms 15067585  **Agent**:

I wish to object to the recent modifications to the above plan. I think Guildford Borough Council have failed to consider the residents of Send with an excessive amount of development in our area. These are my principal objections.

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

The increase of 37% in the number of houses is ridiculously high. It would alter the character of the village, join up Send and Ripley so that it was over-developed and make it one large conglomeration of housing. A very high number of objections to the previous lower number of 400 have been completely ignored. You intend to develop Green Belt land, which floods and is contaminated by lead shot. The local infrastructure for medical facilities and schools would be swamped by this development, as would the adjacent roads. Send Barns Lane is frequently at a standstill in the mornings already. this development would make it worse and it would be gridlocked on a daily basis.

Attached documents:

**Comment**: MM41 - LPMM18/489  **Respondent**: Ann Elms 15067585  **Agent**:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick's Arch, Burnt Common, Clockbarn and Alderton's would not be adequately solved by the A3 changes and the Clandon slip roads. Add in the developments at Gosden Hill and Wisley/Ockham and you will have major problems in the future with traffic. I would suggest you come out to view Send Barns Lane and the roundabout by Little Waitrose at the rush hour, around 8.30 am and just imagine how the levels of noise, pollution, delays would be increased intolerably both for the existing residents and for the proposed new residents. The roads would be gridlocked.

Attached documents:

**Comment**: MM41 - LPMM18/324  **Respondent**: Sabine Marke-Deleau 15081281  **Agent**:

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

The increase from 400 to 550 homes of which 450 to be built in the first five years
• It is Green Belt containing ancient woodland
• An increase of 37% in the number of houses proposed is excessive
• 7000 ejections to the previous lower number have been ignored
• It will join up Send and Ripley and constitute over development
• The site is subject to frequent flooding and contaminated by lead shot
• At least 800 extra cars will block up the adjacent roads
• School and medical facilities will be strained to breaking point

Comment: MM41 - LPMM18/329  Respondent: Sabine Marke-Deleau 15081281  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words bu no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Comment: MM41 - LPMM18/119  Respondent: Gary Cable 15081569  Agent:

I was very disappointed to read about the modifications to the local plan following the consultations since the release in 2017. Not only have you not taken into account the thousands of objections we sent you by lessening the proposed sites, you have actually made the plan worse for our villages by increasing the homes and industrial land. I along with many others seriously believe the villages of Send and Ripley will be ruined over the next few years if all these plans go ahead, let alone we will no longer be living in a nice green belt area, the traffic congestion which is not brilliant at the moment will be catastrophic for the region.

Lets start on the traffic congestion, there are currently 1700 homes in Send and the MM41 and MM44 proposing another 670 new homes we are going to have nearly another 50% more cars on the road in the local area. Where are all these cars going during rush hour - Woking to commute (the A247 cannot cope presently during peak times you can queue for 30 minutes plus into Old Woking) - the A3 into London which will clog up Send Marsh Road, plus Ripley and of course the A3 -M25 junction more than it is right now.

Going back to MM41 and the proposed 550 new homes at Garlick's Arch how are local medical and school facilities going to cope - Ripley has just seen the closing of one school so how will the area cope with a nearly 50% INCREASE in residents !!!

By the time you have finished ruining the local area Guildford will sprawl into Woking and we will have no Green Belt and no wonderful local Villages where we all chose to live !!!

Comment: MM41 - LPMM18/333  Respondent: Antony Marke 15082049  Agent:
MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The increase from 400 to 550 homes of which 450 to be built in the first five years

- It is Green Belt containing ancient woodland
- An increase of 37% in the number of houses proposed is excessive
- 7000 ejections to the previous lower number have been ignored
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/3954  Respondent: Mrs Marilyn Scott 15094369  Agent:

I wish to place objections to the Local Plan

MM 41

The land for development is within the Green Belt and is a site of recognised Ancient Woodland

The site is subject to frequent flooding and is unsuitable for residential development

The Portsmouth Rd and Send Marsh Rd junction is a site of frequent accidents and congestion, at least 800 extra cars will now join this dangerous road layout at a point where traffic is at its heaviest.

In excess of 35% of additional housing is proposed from the original plan, this is excessive considering there was huge opposition to the previous plan.

Attached documents:

Comment: MM41 - LPMM18/199  Respondent: Emma Gibbs 15100385  Agent:
Not to mention all the other prospered plan such as MM44 & MM41/MM9/MM42/MM48

This was once a peaceful and picturesque little village that has slowly been eroded and destroyed by greedy and thoughtless developers.

I have lived in send for 20 years and it is sickening and sad to see it being over developed.

So I strongly object to the plans to specified above.

Attached documents:

---

Comment: MM41 - LPMM18/516  Respondent: Malcolm Holland 15102049  Agent:

MM41  I object to MM41 for many reasons but mainly

1 Schools, medical facilities and local roads will not be able to cope

2 more nitrogen dioxide pollution, delays and grid lock

Attached documents:

---

Comment: MM41 - LPMM18/521  Respondent: Malcolm Holland 15102049  Agent:

MM27/MM41/MM42 and MM48

The traffic implications for the above have not been adequately addressed and no proper assessment has taken place bearing in mind more traffic increased noise nitrogen pollution delays and gridlock

Attached documents:

---

Comment: MM41 - LPMM18/80  Respondent: Simon Crane 15104769  Agent:

I wish to object to the Council’s Main Modifications for Send in their Local Plan.

I have been a resident in Send for over 30 years. My address is:

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

My objections are as follows:

MM41 Land at Garlick’s Arch, Policy A43

You have increased the number of new homes to be built by nearly 40%. I objected to the previous plan of 400 homes, so these objections still stand:
• The huge increase in cars will cause congestion in the area. I believe most houses have 2 cars per household now, meaning an extra 1000+ cars. Air pollution will hugely increase.
• Our schools and medical practices will not cope with the extra children and patients – I already struggle booking appointments with my GP.
• This is a green belt area which is not supposed to be built on.
• This site is subject to frequent flooding, so not suitable for siting new homes.

I believe there were over 7000 objections to the originally planned lower number – these have been totally ignored.

Attached documents:

Comment: MM41 - LPMM18/84  Respondent: Simon Crane 15104769  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

• The planned changes to the A3 and Clandon slip roads are not sufficient to cope with the increased traffic that will arise from the proposed developments of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s.
• Queuing traffic for the A3 will back up into Send, again clogging the roads and increasing air pollution, plus traffic in to Woking through Send will also increase hugely.

Attached documents:

Comment: MM41 - LPMM18/3794  Respondent: Y C Smithers 15106977  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Increased from 400 to 550 homes of which 450 to be built in the first five years

The site is Green Belt containing ancient woodland, which we believe should be protected. The proposals are overdeveloped for this area and it will join up Ripley and Send and will generate two much traffic to the already oversaturated roads.

This area is prone to flooding, having been born in the village, I know this area well. The village facilities of school and medical centre are already overstretched to breaking point.

Attached documents:

Comment: MM41 - LPMM18/3811  Respondent: Y C Smithers 15106977  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for the area are devastating and as such totally overburdens traffic on local roads and also the A3, entering and leaving this enormously busy road which is regularly a car park! The new proposals don’t take into consideration the traffic impact of the additional thousands of cars, let alone increased pollution, noise and likelihood of more accidents, especially during peak times.
Other developments

This consultation does not include the chance to comment/object to the 40 houses and travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and the increase in size to the Send Business Centre despite the Wey Conservation area, these proposals are again devastating to the local roads in all of these areas, they are too narrow, often difficult to pass and have many blind spots, and the larger roads are already standing traffic during peak times, let alone at other times of the day, the small village cannot take any more development especially of the sizes proposed.

We do hope you consider our strong objections to all of the above, as not only us but our family and friends will be severely impacted. We are pensioners and are already finding the amount of traffic too much and has significantly risen in recent years, especially with commuters using our village as a cut throughs from the A3 and M25.

Attached documents:

Comment: MM41 - LPMM18/64  Respondent: Andy Williams 15107041  Agent:

Dear Sir/Madam

I am writing with the following strong objections to the local plan:

MM41 – Land at Garlicks Arch, Send Marsh, Policy A43

The initial proposal to build 400 homes at Garlicks Arch was a ridiculous proposal and received 7000 objections. The previous objections to this have been ignored. To have increased this to 550 homes (an increase of 37%) is overly excessive and is made in complete disregard of the previous objections. The land is in the Green Belt and contains ancient woodland, drainage is poor and the land is subject to frequent flooding, it is also contaminated with lead shot. Development here would join up the villages of Ripley and Send, there would be no distinction between the two villages constituting over development. Perhaps most significantly, the surrounding infrastructure cannot cope – roads around the village are snarled up with traffic with increasing pollution levels, the increased volume of traffic, (assuming the majority of households have two cars), is unmanageable and from a health standpoint it increases risk. The doctor’s surgery is at breaking point, as verbalised by the staff at the surgery directly, local schools cannot cope, (and a local infants school in Ripley has been closed increasing the pressure on the remaining schools in the area).

Attached documents:

Comment: MM41 - LPMM18/69  Respondent: Andy Williams 15107041  Agent:

MM27, MM41, MM42, MM48 - Transport Strategy

The implications have not been properly assessed or addressed by the A3 changes and the Clandon slip roads. Potential significant traffic impact upon Send Barnes Lane and Send Road of traffic heading for Woking, increased noise and pollution levels, additional delays and gridlock on the roads.

Attached documents:

Comment: MM41 - LPMM18/1320  Respondent: Mr Paul Ayers 15107777  Agent:
My objection relates to MM41. The increase in housing numbers from 400 to 550 is disproportionate and would, in addition to the other proposals for Send and Send Marsh create a significant urbanisation to an area which is only just recovering from previous development during the 1960-1980 period. The local infrastructure is just not up to supporting such numbers.

In addition is it fair to build new homes so close to the A3 with associated and now well publicised pollution issues. If Garlicks Arch is to be developed I would prefer a much lower number of units, and certainly no larger than the originally proposed 400.

Thank you for the opportunity to comment.

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

---

Comment: MM41 - LPMM18/319  Respondent: Mr Stuart Reeves 15110721  Agent:

Send is a small village and this development is completely out of proportion to the abilities of the social, road and domestic infrastructure of Send. Seven thousand residents objected to the original development yet it has now been increased by 37%. There is no mention or requirement to meet the costs of developing the local schools, medical centre,
roads and drainage. The site frequently floods and the surrounding roads are frequently heavily congested. This development will fill in the only green space between the villages of Send and Ripley and destroy the character of both villages.

<tr>
<td>The changes to the A3 will make things even worse for Send with the traffic from the above developments coming straight through the village to Woking. This will mean unacceptable pollution, which has been increasing over the years and which I find is already causing more breathing problems for me as an asthmatic living on Send Road, so what it will do to children walking to school along Send Road and Send Barnes Lane with increasing nitrogen dioxide pollution</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
exacerbated by the delays and gridlock it will cause. We are supposed to be encouraging more children to walk and this will only give parents an excuse to use their cars even more, and who could blame them.

More consideration should be given to the siting of additional housing elsewhere, as we are bearing an unacceptably large proportion of the new housing and development in the Guildford area, which should be spread more evenly through the villages etc. It appears we are getting about 50% of all development in the next 5 years, which can’t be right. For this reason I feel I have no other alternative but to object strongly to the enlarged burden which we are now being asked to bear, and it seems every time we object we are just given more development as our reward.

Attached documents:

Comment: MM41 - LPMM18/103  Respondent: none (Mr. Jeffrey Greenwood) 15140417  Agent:

I object strongly to this development on the grounds of the Parish can't support the extra burden.

Attached documents:

Comment: MM41 - LPMM18/111  Respondent: none (Mr. Jeffrey Greenwood) 15140417  Agent:

I object to this development

Attached documents:

Comment: MM41 - LPMM18/507  Respondent: Bav Majithia 15141633  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The increase from 400 to 550 homes of which 450 to be built in the first five years

• It is Green Belt containing ancient woodland
• An increase of 37% in the number of houses proposed is excessive
• 7000 ejections to the previous lower number have been ignored
• It will join up Send and Ripley and constitute over development
• The site is subject to frequent flooding and contaminated by lead shot

Comment: MM41 - LPMM18/2152  Respondent: Vincent Francois 15145057  Agent:

Re: GBC Local Plan - Amendments 2018

GBC has completely ignored all of the numerous objections it received during the last consultation. This I find insulting and very disappointing and I wish the following objections to be noted and a copy of this letter to be brought to the attention of the Government's Planning Inspectorate.

MM41 Garlick's Arch Policy A43.

I object to the increase in the proposed dwellings from 400 to 550 plus 2 travellers sites.

- How would the occupancy of these plots and the flow of equipment to and from the plots be monitored.
- HGVs would be required to move large equipment thus contributing to the existing traffic problems.
- Building on this land would result in over development with no demarcation between villages thus defeating the purpose of the Green Belt.
- This area is subject to flooding with flood zone 2 status.
- It is contaminated by lead shot arising from shooting clubs, accumulated over many years.
- It contains beautiful ancient woodland, the destruction of which would be a tragedy for the area and wild life.
- The existence of high voltage pylons across this land has been ignored. These will provide a serious Health and Safety risk to occupants of the Traveller sites when they move equipment. This area is blighted with illegal traveller intrusions. Encouraging more will open up new opportunities for them when the site is vacant. Will we be asked to clean up after them as regularly happens here?
GBC are trustees of the Green Belt but appear to be happy to eradicate this area to satisfy Government demands and quotas. They are ignoring local concerns and punishing us for raising legitimate concerns. Democracy only seems to work for this government and its cohorts when it concerns Brexit. When will you listen to us?

Attached documents:

Comment: MM41 - LPMM18/2148  Respondent: Irene Francois 15145121  Agent: Irene Francois 15145121

Re: GBC Local Plan Amendments 2018

I object to the new set of proposals for the following reasons:

MM41 Policy A43 - Garlick's Arch - The increase from 400 homes to 550 homes on this green and agricultural land, which will destroy ancient woodland and in the process removing wild life habitat, is a ludicrous and irresponsible proposal. The number equates to a total increase of 37%, which is too much of an increase for one area. The present infrastructure (hospitals, medical centres, shops, parking, schools, leisure and social care facilities) cannot sustain this increase. Plug the resultant increase in vehicle numbers will cause traffic congestion and delays resulting in total gridlock. To date, GBC has done nothing regarding the implementation of noise abatement measures on the A3 and on Clandon Road. Nor has it introduced any workable speed calming measures. Exiting either left or right from 'Woodlands' onto the Clandon Road can take up to 4 minutes as the traffic is travelling well above the speed limit. So would GBC please explain how it intends to cope with an even greater volume of vehicles.

Attached documents:

Comment: MM41 - LPMM18/2151  Respondent: Irene Francois 15145121  Agent: Irene Francois 15145121

If the addition, if two more slip-roads to and from the A3 and the A247 (Clandon Road) go ahead there will be a detrimental impact on road traffic and road safety. There is little room, as it stands, on Send Road leading to Woking for two way traffic as resident's cars are parked on either side of the road leaving a very narrow space for cars and vans to pass one another. Also Clandon Road is narrow and winding and already operating at full capacity. These roads are dangerous to pedestrians, cyclists, and for drivers exiting from side roads. I assume the council used consultants to aid them in drawing up the plan? Did they drive around Clandon, Ripley, Send and Send Marsh? I doubt it. In my profession (medical research) the definition of a "consultation" involves taking account of, as well as, listening to the views of interested parties and experts before decisions are made. Since the planning Inspector obviously concurred with the original GBC plan one can only assume that the previous consultation was merely a pretense. Certainly this plan was not viewed with objectivity. The Inspector and GBC have treated the existing residents in this area with contempt. If they had treated us with respect and listened surely some compromises would have been made? Otherwise how can thousands of valid objections be ignored? The existing infrastructure and road network cannot sustain these development proposals. If this plan is allowed to go through it will be laying the foundations for future problems on the highways, education, healthcare quality of life, and be detrimental to the local economy. Thus, I believe this revised plan is not fit for purpose.

Attached documents:

Comment: MM41 - LPMM18/2303  Respondent: E J M Symonds 15146945  Agent: Irene Francois 15145121
I am very saddened to see that once again Send is being over loaded with an increased number of houses, many on Green Belt, despite the thousands of protestations from villagers concerned about their village.

I am also aware the figures G.B.C Inspector used was 789 houses per year, whereas a later consultant said that 460 should be the appropriate growth as referred to in POLICY S2 which would make a huge difference locally.

MM41 Land at Garlick's Arch. Policy A43

This is ancient woodland [unreadable text] Green Belt. Why now the increase of 150 homes? Our school and surgery already at full capacity.

Attached documents:

Comment: MM41 - LPMM18/428  Respondent: Dr Christopher Slinn 15153569  Agent:

Garlick Arch(550), Clockbarn (60), Winds Ridge (40) make 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure - roads, school and doctors. Note the recent closure of Ripley school compounds the madness of local planning.

There are 40 villages in Surrey, the burden has not been shared proportionally.

There is a need for housing nationally, but disproportionate development in the South East, although I realise government policy is outside your remit.

This excessive development is turning a village into an urban sprawl, contrary to Green Belt Policy.

Attached documents:

Comment: MM41 - LPMM18/244  Respondent: Mrs Avril Ann Dawson 15176193  Agent:

I am concerned at the number of homes 550 homes planned to be built because the land being planned to be used is subject to frequent flooding. The new development will join up Send and Ripley and destroy two lovely villages with over development. The extra cars estimated at 800 will block up the local roads which are narrow and twisting. I live on Potters Lane and the plans to build more houses with more people coming in and out of the area in their cars will add to the difficulty in driving in Potters Lane and slow down travel in and out of the village. Currently Potters Lane can be driven down from an exit point on the A3 and it can be hard to drive down this road with cars parked at the kerbside and great care has to be taken crossing the road already so with extra traffic use the problems will get worse. The safety of villagers should be an important factor in planning new housing in the area.

Medical facilities are already well used in Send. I have to have regular check ups with a doctor and have found that for these non urgent appointments I book myself in and find the first available appointment is three to four weeks away. This is will become a bigger problem and I will have to wait longer for an appointment as use of the medical facilities increases with more people living in the area.

Attached documents:
**Comment: MM41 - LPMM18/452  Respondent: Stephen Brunskill 15177313  Agent:**

I wish to object to the revised local plan. The original plan was unfair and inappropriate for Send village and I feel particularly offended that the revised plan proposes even more development. It feels like a clumsy tactic to enable you to be seen to compromise back to the (excessive) levels proposed in the original plan. The proposed level of development puts a completely disproportionate burden on Send/Sendmarsh for the borough’s building needs.

In particular I Object to:

**MM41 Land at Garlics Arch, Send Marsh, Policy A43**

This excessive development is within greenbelt and will effectively link Send/Sendmarsh and Ripley together. The area in question, apart from containing ancient woodland also floods regularly. The clue is in the name – Sendmarsh! A development of this size will also add c800 cars to the already busy roads. The junction of Sendmarsh Road and Portsmouth road is already very difficult to exit but having the entrance to this enormous development within a few hundred yards will cause ongoing chaos on the roads.

**Attached documents:**

---

**Comment: MM41 - LPMM18/640  Respondent: John Harris 15180001  Agent:**

I would like to object to the large increase in the number of houses proposed in the Send area. Please find below my reasons for objection:

**MM41**

An increase in the number of house of 37%

Despite a large number of objection to the previous lower number this has been completely ignored.

It is green belt containing ancient woodland.

It will mean that the distinction between Send and Ripley will be lost.

The site has a know history of flooding.

A large number of extra cars will add to the already congested local roads.

With the closure of Ripley school where will all the extra children go as Send school is already full?

It is difficult to get an appointment at the Send Surgery so where will all the extra residents go for medical treatment?

**Attached documents:**

---

**Comment: MM41 - LPMM18/2855  Respondent: Paul Bedworth 15180193  Agent:**

Objection to proposed development in Send

I am writing to object in the strongest possible terms to the proposed developments at:-
1. MM41 Garlicks Arch, Send March, policy A43
2. MM42 Burnt Common, London Road, Send, policy A58
3. MM44 Send Marsh Road, policy A63

4. Taking each in turn:-

**MM41 Garlicks Arch, Send March, policy A43**

1. While strong opposition existed to the original proposal for 400 homes, 550 are now on the plan. This 37% increase is disproportionate and ignores the 7,000+ objections that have already been lodged.
2. This site contains ancient Woodland and is in the Green Belt.
3. The effect of it would be to join Ripley and Send and constitutes over development.
4. The roads are already congested particularly around rush hour: this would add a further 800+ cars.
5. There would be a likely impact on ground water run-off caused by further development with an increased risk of flooding, in an area already susceptible.
6. Local infrastructure such as schools and GP practices could not cope and would need further investment.

**Comment:** MM41 - LPMM18/1447  **Respondent:** Muriel Millar 15184993  **Agent:**

Why has Send been chosen to carry these much increased quotas? They would all mean traffic chaos through the village. Rush hour is bad enough already.

All the Modifications violate MM9 itself.

MM41 Garlicks Arch

- Excessive numbers
- Green belt
- Traffic problems

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1523  **Respondent:** Suzannah Monk 15186273  **Agent:**

I am writing to make a formal objection towards the modifications to sites and general policies towards the future of development in Send.

Where to start…

Firstly the **MM41** Land in Garlick’s Arch, Send March.
A massive increase in proposed houses despite 7000 previous objections of up to 550 homes is not justifiable. There are many brownbelt areas around the country and in fill land that should be maximised and used up completely, before green belt land is built on as we will never get this land back. The roads are already over crowded and can’t take the increased levels of traffic that has massively increased over the 20years that I have lived in Send. We will all turn up later to work or have to leave earlier, leaving less time for the things that really matter. We also need to protect our flood lands as best as possible as flooding is a natural process and the river needs to be able to flood without the risk of flooding housing further downstream.

Attached documents:

Comment: MM41 - LPMM18/1527  Respondent: Suzannah Monk 15186273  Agent:

Finally, the MM27, MM41, MM42 and MM48 Transport Strategy

Changes to the A3 do not alter the narrow winding roads that lead off of the the main Send Road. These small roads are not designed for large numbers of cars and the risk of accidents will dramatically increase with more traffic on them.

Attached documents:

Comment: MM41 - LPMM18/1423  Respondent: Carrie Wheeler 15195969  Agent:

I have been a resident of Send Marsh for over 40 years. I love where I live and have no desire to move, but if all the planned building goes ahead, it will no longer be the place I love and call home!

I would like to strongly object to the planning applications listed below for the following reasons:

MM41 -The land at Garlick's Arch Send Marsh

The proposals rather than decreasing, after the thousands of local objections, have unbelievably been increased! This will destroy local green belt land and ancient woodland. It will morph Send and Ripley into one mass development. There is also a risk to human well being constructing housing on this site, as it is prone to flooding and is also contaminated with lead shot!

The additional traffic on an already busy road system, will be impossible and the pressure on the Villagers Medical practice will be unsustainable, local schools which at present are under huge pressure due to the closure of a local school in Ripley will be beyond bursting point, all in all the infra-structure cannot cope with such a huge addition!

Attached documents:

Comment: MM41 - LPMM18/4229  Respondent: Michael Corlett 15196161  Agent:

MM41 Land at Garlicks Arch  Policy A43

Previous objections have not been considered that this land floods and pictorial evidence was provided. It is Green Belt containing an ancient woodland and the impact on the adjacent roads would be impossible.
There are no definite plans laid out and it is impossible to widen Send Road or the Clandon Road to accommodate the increase in traffic approaching or returning from the A3. These are narrow roads in many places and the traffic is already at a standstill at peak times. A full assessment must be made and published and I ask the inspector to revisit at peak times.

I would like to object to the large increase in the number of houses proposed in the Send area. Please find below my reasons for objection:

An increase in the number of houses of 37% Despite a large number of objection to the previous lower number this has been completely ignored. It is green belt containing ancient woodland. It will mean that the distinction between Send and Ripley will be lost. The site has a known history of flooding. A large number of extra cars will add to the already congested local roads. With the closure of Ripley school where will all the extra children go as Send school is already full? It is difficult to get an appointment at the Send Surgery so where will all the extra residents go for medical treatment?

The proposed developments will add to the already overcrowded roads, where journeys take far longer than necessary. Most residents now have to factor in the probability that there will be delays.
The road network is in desperate need of a major maintenance programme. In Send the surface at the traffic light intersection has completely broken up with holes appearing in all approaches. This non slip surface has broken down, wasted money, poor design. Or too much traffic?

The bridge over the A3 on the Clandon road has had the road surface pushed into the kerb resulting in large undulations that force motorists into the middle of the road.

Priority should be given to getting existing roads into a reasonable condition over the building new developments that will only increase traffic and make the matters worse. Most roads in the areas have kerb stones, and service covers dislodged and numerous potholes.

Who decides what a reasonable time is to queue on the roads into and out of Guildford and Woking getting to and from work. What is the environmental impact of thousands of cars, Lorries and busses queuing every morning and evening polluting the atmosphere, wasting fuel and residents and commuter’s time?

Attached documents:

Comment: MM41 - LPMM18/1073  Respondent: Elizabeth Howlett 15205921  Agent:  
M41 Garlick's Arch

This development has no immediate affect on where we live, but will bring additional traffic to the area. As it is a remote development I have yet to see anyone addressing the problem of supplying new infrastructure, ( mains services, schools, medical facilities, etc.), to this project and who will bear the costs. Will it fall on local taxpayers to put in the required infrastructure.

The A3/M25 interchange is already congested on and off every morning,

At least new residents will be able to access the main supermarkets up and down the A3 in Guildford, Brooklands and Cobham, but only will further increase congestion on the A3.

I confirm that I have a general objection to these proposals and specific objections to the modifications, which I do not consider as minor, MM9, MM27, MM41, MM42, MM44, and MM48

Attached documents:

Comment: MM41 - LPMM18/5775  Respondent: Mr Timothy Hewlett 15216129  Agent:  
I am to state that I strongly support the representation made to the Guildford Borough Council (GBC) by the Wisley Action Group regarding Three Farms Meadow (Which for a period of only thirty years was a working airfield).

I draw attention to the following:

The transport plan for Local Plan relies upon improvements to the Junction 10 and the A3 (Guildford) improvements which GBC cannot rely on being delivered as they are in the hands of other bodies . To rely on decisions by another body in this matter is irresponsible.

Attached documents:
Comment: MM41 - LPMM18/3178  Respondent: Barnaby Lawrence 15232513  Agent:

MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm].

- There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/3731  Respondent: Victoria Hogben 15233185  Agent:

**MM27. MM41, MM42 and MM48 Transport Strategy**

Send is a highly congested village. My own road, Potters Lane, is evidence of this; in July my parked car was written off by a council van when the driver found himself boxed in by rush hour traffic and panicked, driving in to the side of my car and then reversing in to the front of it. 'Road rage' is becoming a serious problem in Potters Lane, with almost daily conflicts; this was not the case when I moved in five years ago. My question, therefore, is why has the potential effect of thousands of extra cars in an already heavily congested area not been taken into account? Nothing has been done to address this in the most recent document.

Attached documents:

Comment: MM41 - LPMM18/1782  Respondent: Stephen John Tully 15238881  Agent:

I am writing to object most strongly to the Local Plan Modifications.

MM41. This is Greenbelt Land and would join up Send with Ripley, constituting over development. The local infrastructure cannot cope with an extra 550 homes.

Local planning should be in the hands of local people-over 7000 objections ignored-so much for conservative policy putting local issues in the locals hands.

Attached documents:

Comment: MM41 - LPMM18/1786  Respondent: Stephen John Tully 15238881  Agent:

MM27, MM41,MM42,MM48,

Transport Strategy:

The GBC assessment is non existent, the roads around Send could not cope with this extra traffic even with modifications to A3 etc.
MM41 Land at Garlick's Arch, Send Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years.

The roads and adjacent roads are congested with traffic not only in the rush hour but jurying the whole day. The area is not able to deal with the amount of cars on these roads already and with no infrastructure in place this will causes no end of problems.

This problem is not helped by the increase from the 400 homes to now 550 which is going to cause great strain on doctors and schools, which is at breaking point, as our local schools have a large waiting list and our doctors are full and we have to book appointments a month in advance, which is not idea as we become older.

This is Green Belt and contains wild life which we all need around built up areas, plus the area which you want to build on is a flood plane and gets contamination by the lead shot. As part of village life it is greatly unfair to purpose to build this area up so much that village life does not exist anymore. Shame on you.
OBJECTIONS TO THE PROPOSED MAIN MODIFICATIONS TO THE LOCAL PLAN OF GUILDFORD BOROUGH COUNCIL

I am writing to register my objections to the Main Modifications in the Guildford Borough Council Local Plan that will be forever harmful for the residents of Send by overloading the infrastructure, environment, services, and amenities, and permanently damage what remains of our surrounding countryside, and open spaces.

OBJECTIONS RELATING TO ALL PROPOSED DEVELOPMENTS (MM27, MM41, MM42, MM44, and MM48) IN THE GUILDFORD BOROUGH COUNCIL LOCAL PLAN

1. The proposed developments, referred to later in this letter, do not consider the risk of future water shortages, where there are no plans or funding to increase the provision of water storage and supply to additional households and commercial facilities proposed for the Send Parish, within the Affinity Water region.

2. All developments in the Guildford Borough Council Local Plan - referred to later in this letter - are within an area designated by the Environment Agency as “water stressed”. Without any additional means of water supply, it would be irresponsible to risk greater water scarcity in the future by adding to the demands for water from additional developments in and around Send.

3. The Main Modifications where specific objections are described below are, when combined, an unacceptable increase of concentrated housing developments to be imposed on the village of Send and the already over-used roads - without any scope for increasing capacity - and the fully subscribed local medical and schooling facilities.

2. MM41 LAND AT GARLICKS ARCH, SEND MARSH, POLICY A43

I object to the change to Policy A43 because:

• This is a huge increase on the original proposal to which I and many thousands of local residents have previously objected to as being excessive and wholly inappropriate for the area.

• This land at Garlicks Arch is in existing Green Belt with ancient woodland - providing a valuable resource for CO2 capture - that should not be destroyed by urbanisation.

• This development will create urban sprawl leading to the merging of the villages of Ripley and Send and a loss to those communities of their distinct character.

• Such development overload will increase urbanisation, leading to intolerable stresses on existing transport infrastructure and services, such as the lack of any additional capacity for the local GP Centre and the newly amalgamated Send School.

5. MM27, MM41, MM42, AND MM48, TRANSPORT STRATEGY

I object to these Strategies because:

• The various Modifications refer to “mitigation schemes to address the otherwise adverse material (and visual) impacts on communities and the environment” without declaring any conditions that would have to be met by any such “mitigation schemes”. The absence of any defined scope for “mitigation schemes” is to deny the objectors to the Transport Strategy the chance to assess and comment on the desirability of any “mitigation scheme”. The prospect of implementing “mitigation schemes” without any pre-conditions would be poor governance and unacceptable to the communities affected by this Transport Strategy.

• Guildford Borough Council have not demonstrated any assessment of the aggregated traffic impacts on Send Barnes Lane and Send Road from the proposed changes for additional slip roads to the junction of the A247 with the A3, which will substantially increase the traffic flows to and from Woking each day.

• The Transport Strategy will lead to yet more vehicle traffic being added to the minor ‘A’ road (the A247) through Send, with already high volumes of traffic, where the 'uktrafficflow' web site shows an average of nearly 14000 vehicles passing along the A247 in Send each day. This high volume already has an adverse effect
on the quality of life for the residents of Send with congestion, noise, and pollution from vehicle emissions. Such daily high traffic flow is excessive and must not be increased further by senseless and unnecessary developments.

- The loss of open spaces for additional roads will reduce the ability of the natural environment to remove pollutants such as CO\textsubscript{2} from the atmosphere.

5. **MM27, MM41, MM42, AND MM48, TRANSPORT STRATEGY**

I object to these Strategies because:

- The various Modifications refer to “mitigation schemes to address the otherwise adverse material (and visual) impacts on communities and the environment” without declaring any conditions that would have to be met by any such “mitigation schemes”. The absence of any defined scope for “mitigation schemes” is to deny the objectors to the Transport Strategy the chance to assess and comment on the desirability of any “mitigation scheme”. The prospect of implementing “mitigation schemes” without any pre-conditions would be poor governance and unacceptable to the communities affected by this Transport Strategy.

- Guildford Borough Council have not demonstrated any assessment of the aggregated traffic impacts on Send Barnes Lane and Send Road from the proposed changes for additional slip roads to the junction of the A247 with the A3, which will substantially increase the traffic flows to and from Woking each day.

- The Transport Strategy will lead to yet more vehicle traffic being added to the minor ‘A’ road (the A247) through Send, with already high volumes of traffic, where the 'uktrafficflow' web site shows an average of nearly 14000 vehicles passing along the A247 in Send each day. This high volume already has an adverse effect on the quality of life for the residents of Send with congestion, noise, and pollution from vehicle emissions. Such daily high traffic flow is excessive and must not be increased further by senseless and unnecessary developments.

- The loss of open spaces for additional roads will reduce the ability of the natural environment to remove pollutants such as CO\textsubscript{2} from the atmosphere.

1. Site Allocations:
   a) A43 Garlick’s Arch - increase of 150 homes to 550 homes
   b) A63 Aldertons Farm – new allocation of 120 homes
   c) A58 Burnt Common Strategic Employment Site – initial 100% increase of industrial space to over 14,000 sqm with the potential to increase in each 3-year period thereafter

2. Transport Strategy

3. A6 Town Centre – allocation of further retail space

4. Strategic Housing Market Assessment figures

5. A35 Former Wisley Airfield

1. Site Allocations

The allocations of sites: A43 Garlick’s Arch; A63 Aldertons Farm; and A58 Burnt Common Strategic Employment Site will have severe “in-combination” impacts upon the villages of Ripley, Send and Send Marsh. There is no escaping the fact that there is inadequate provision for any road traffic mitigation arising from an estimated 670-720 new homes, together with the inevitable large volume of traffic generated by the industrial site over the period of the Plan and beyond. To get this in proportion, the current number of houses in Ripley village is less than 700.

There does not seem to be any firm commitment to the construction of policy site A43a the A3 Burnt Common slip roads during the period of the Plan. Indeed, the financing of these slip roads appears to be in some disarray and relies upon 100% funding from the developers of site A35 Former Wisley Airfield. Ripley Parish Council continues to oppose the Burnt Common slip roads for reasons stated in earlier submissions. However, should the Garlick’s Arch development, the Burnt Common Strategic Employment Site and/or the Aldertons Farm development site all proceed to inclusion in the Local Plan, the parish council would strongly urge that traffic mitigation measures are put in place PRIOR to housing and industrial sites being constructed. Clearly provision of the new slip roads would go some way to easing local traffic congestion although it may of course be detrimental in that it will draw in additional road traffic to the Send/Burnt Common area.

Ripley Parish Council objects to the modifications of the Garlick’s Arch and Aldertons Farm sites based on the very poor provision of community infrastructure such as medical facilities, schools and community sports facilities. Ripley Primary School has recently been closed by Surrey County Council with no indication as to its future. The Villages Medical Centre is already heavily subscribed and it offers poor lead times for appointments. There is no the specific provision for such facilities within the documentation. Additionally, the car parking facilities in both Ripley and Send are at capacity and these increased numbers will only worsen an already bad situation.

With regards to Policy A43 MM41, Ripley Parish Council has grave concerns regarding the significant uplift in housing number to 550 homes, together with the “increased landscaped buffer” at the Garlick’s Arch site and its impact upon the surrounding protected ancient woodland. Quoting from AECOM statement 9.2.4 “The increased land-take needed to deliver this landscaping, in combination with the additional 150 homes, COULD FEASIBLY LEAD TO INCREASED PRESSURE ON THE ANCIENT WOODLAND WITHIN THE SITE”.

2. Transport Strategy

The Transport Strategy contained in Policy A43: MM41 (Ob) for Garlick’s Arch traffic being mitigated by the provision of an alternative link to avoid the roundabout is woefully inadequate and will simply provide two opportunities of queueing traffic instead of one. Clearly this is an entirely inappropriate solution. In addition, Ripley Parish Council seeks further clarification of Policy A43 MM41 (Oe) regarding “necessary and proportionate contribution” to “address the otherwise adverse material impacts on communities and the environment including in Send and Ripley”. This is not plain
English and the obfuscation in the documentation provided by Aecom and GBC is clearly not designed to be transparent or helpful to the residents of the borough.

**Comment:** MM41 - LPMM18/4519  **Respondent:** Hannah Green 15303457  **Agent:**

I am writing to object to the modifications resulting from the Planning Inspector’s Report impacting the village of Send within Guildford Borough. Overall, the danger is that, if the proposals / modifications go ahead, Send will be transformed in such a way that its village identity will be permanently destroyed. Linked to this, there will be significantly increased congestion, pollution and resulting damage to the environment. This will impact residents both in Guildford Borough and beyond. My objections are:

1. **Main Modification 41 (Land at Garlick’s Arch, Send Marsh, Policy A43) because:**

   Firstly, there will be an increase of 37% in the number of houses that will subsequently destroy the villages identity. It ignores 7,000 objections already lodged from the people of your borough that it is your duty to listen to. It is also a Green Belt land containing ancient woodland and that should be protected. The main modification 41 will join up two separate villages (Send and Ripley) resulting in insufficient school places due to the recent closure of Ripley Primary school and no extra capacity at Send Primary school. The site is subject to frequent flooding (a flood zone 2 area) and contamination by lead shot. With this modification the extra cars will block up the adjacent roads and increase air pollution of carbon monoxide, nitrogen monoxide and nitrogen dioxide. Lastly, the Medical facilities will be unable to cope with the increase.

2. **MM27, MM41, MM42 and MM48 Transport Strategy**

   There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

Attached documents:

**Comment:** MM41 - LPMM18/1259  **Respondent:** Eloise Haxton 15313697  **Agent:**

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

My objections are

- The villages of Send and Ripley will become joined, causing over development.
- Increase in cars and residents will cause busier roads, a need for school places that cannot be provided and an over run GP surgery
- This is an excessive increase in houses and previous objections have been ignored.

Attached documents:

**Comment:** MM41 - LPMM18/1264  **Respondent:** Eloise Haxton 15313697  **Agent:**
MM27, MM41, MM42, MM48 Transport Strategy

- No assessment has been made of the impact on Send and Ripley of the increase in cars with the resultant gridlock, delays, noise and nitrous dioxide pollution.

Attached documents:

Comment: MM41 - LPMM18/1625  Respondent: Steven Brown 15320737  Agent:

MM41 Garlick’s Arch

The original plan to build houses on green-belt land containing ancient woodland was unacceptable.

The proposed 150 increase in the number of houses just makes it worse. There are already long traffic jams in rush hour through Send village and this proposed modification will make it intolerable. In addition, there is insufficient schooling and medical facilities to support so many additional residents.

Attached documents:

Comment: MM41 - LPMM18/1630  Respondent: Steven Brown 15320737  Agent:

Transport strategy for MM27, MM41, MM42 and MM48

There has been no rigorous assessment of the impact of the proposed developments on traffic flows in the area. The road to Woking is already gridlocked in rush hour times. The proposed developments would lead to significantly worse traffic which would be intolerable to existing residents.

Attached documents:

Comment: MM41 - LPMM18/1730  Respondent: J D W Todd 15326369  Agent:

I object to many of the latest proposals involving the above

1) MM41 The increase by 37% in the number of houses is excessive and will cause severe traffic problems on adjacent roads, cause the joining of Riley and Send, and will put a strain on all local facilities both medical and schooling (Send Primary School is already at full capacity following the closure of Ripley School and medically it is already difficult latterly to get an appointment within the nationally accepted time.

4) MM27 MM41 MM42 MM48 are part of the above observations.
I am writing to OBJECT to the local plan Main Modifications as outlined below:

I OBJECT to MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years

- An increase of 37% in the number of houses proposed is excessive
- 7000 objections to the previous lower number have been ignored
- It is Green Belt containing ancient woodland
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

I OBJECT to MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Dear Sir/ Madam,

I am not often motivated to write, but I have seldom viewed such poorly thought through local plan, and now the Local Plan Public Examination.

I object to the creation of the new north and southbound slip roads to and from the A3.

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]. The major bottle neck is Send Village, which this plan will on exacerbate.

The main danger is the off slip going North at Burnt Common, this will exacerbated with more people using it.

I object to Policy A43, Land at Garlicks Arch.

- There is no proven need for additional 400 new houses on top of the 13,860 already proposed by the borough, and now they have increased that to by 37% to 550.
- The Health Surgery at send cannot cope, the local schools cannot cope.. The entire plan is ill conceived.
- It continues to ignore over 7,000 of previous objections.
• There is no proven demand for Travelling Show people plots in this location.
• There are no “exceptional circumstances” exist for removing this site from the greenbelt.
• The land is subject to frequent flooding and is currently flood Zone 2 allocation.
• It will join the villages of Send and Ripley and defeat one of the intended purposes of the greenbelt.
• The roads in send cannot cope and this will add at least 800 extra cars

Attached documents:

Comment: MM41 - LPMM18/1643  Respondent: Suzie Powell-Cullingford 15329441  Agent:

I wish to object in the strongest terms to the following main modifications to the Local Plan:

1. The increase at Garlicks Arch to 550 homes This site is protected by ancient woodland
2. The addition of the Aldertons Farm site of 120 homes
3. The increase in size of the Burnt Common Industrial site

Attached documents:

Comment: MM41 - LPMM18/4005  Respondent: Gillian Thorpe 15341441  Agent:

> Dear Sir/Madam

> We wish to object to the proposed planning development MM41 referring to the land at Garlicks Arch, Send Marsh, Policy A43 for the following reasons:-

> Send is already gridlocked in the mornings with traffic using it as a through cut from the A3 to Woking/Guildford. The main road passes the local junior school where cars are parked on both sides of the road causing congestion. Lorries and heavy good vehicles struggle to pass the school. If you agree to build 550 homes on this land, there will be at least 800 extra cars using this road and 300 children requiring schooling, as well as at least 600 people requiring medical appointments at the Villages Medical Centre! The centre already finds it difficult to provide appointments for patients. Also, over the years, GBC have found it difficult to provide secondary schooling to children living in Ripley and Send. Some children have been sent to Woking and even New Haw and Sheerwater for schooling. Any more homes built in Send will have adverse consequences.

> To avoid the congestion of cars travelling through Send, many use an alternative route via Potters Lane which is again, totally unsuitable for lorries and fast cars. Potters Lane is a death trap in the mornings and evenings. There have been numerous accidents at the A3/Potters Lane junction but unfortunately it takes a fatality before people act.

> The land at Garlicks Arch is currently green belt with ancient woodland and therefore should remain as such. GBC should be targeting brown land rather than green belt land. This green belt separates Send and Ripley villages and residents of both villages wish for the two villages to remain separate.

> To increase the proposed development by 37% is very excessive and poses a huge drain on the local infrastructure and facilities. The A3 is totally congested most mornings and evenings and also on Saturdays. The local roads are poorly maintained at the moment and with extra use, will require even more maintenance.

> I appreciate that development is required as people need houses but 550 is excessive and unmanageable in this area.
> I hope that you take note of the points raised and are able to come to a sensible decision. Please don't ignore previous objections.

**Attached documents:**

**Comment: MM41 - LPMM18/249  Respondent: Mr John Peed  15350689  Agent:**

The number of additional houses proposed is excessive and has increased again! (400 to 550) - it would appear that the previous objections have been ignored. This area is Green Belt and contains ancient woodland. The plan clearly implies over development of this area and will in effect join up Send and Ripley. The area has a history of flooding, and a high volume of extra cars will inevitably block adjacent roads. The Villages Medical Centre can only just cope with local demand so would we swamped by additional demand.

**Attached documents:**

**Comment: MM41 - LPMM18/3883  Respondent: Ron Best  15358625  Agent:**

As per your letter of 7th September, 2018, I wish to register my objections to the following main modifications to the GBC Local Plan:

**MM41 Garlicks Arch (Policy A43):** I am astonished that, despite the 7000+ objections to the earlier proposal of 400 houses, you now propose an additional 150. The local roads are already over-used, especially in the rush hour/school run', the proposal is an incursion into the Green Belt and will ensure that there is no green 'buffer zone' between Send Marsh (where I live) and the A3. If the local facilities (schools, medical centre etc) were going to be at breaking-point with 400 new houses, the effects of a further 150 will be completely unsustainable.

**Attached documents:**

**Comment: MM41 - LPMM18/3691  Respondent: John Burns  15359905  Agent:**

Garlicks Arch: the loss of ancient woodland I still maintain to illegal. These areas have been recorded since the Doomsday Book and are coveted by residents and Woodland Trust alike. The proposed site furthermore relies on matter that are out of the L.A’s control; alterations to the access to the A3. Until that infrastructure is decided / put in place there is no sense in the unnecessary destruction which the proposal for G.A hold.

**Attached documents:**

**Comment: MM41 - LPMM18/4024  Respondent: Sylvia Newton  15366721  Agent:**

I object to MM41 Land at Garlicks Arch, Send (policy A43)
I object to any number of dwellings let alone the increase numbers from 400 to 550. There are no special circumstances to
develop the land including the Governments flawed guess at housing need or money as was the case with the last two planning application on the site 14/P/00219 and 16/P00783 for just 9 and 25 houses. The land is green belt and should remain so out of public heritage and longterm interest. The site is in the "SPA" zone. There is insufficient infrastructure to support any development. There are no local amenities other than one petrol station to support any development.

There are no nearby schools with spaces or many spaces in any distant schools to support development. The development would bring possibly over 1000 extra cars into an area already traffic saturated. There will be an increase in pollution from the extra stationary traffic which will cause health issues. The site is at the limits for emergency services to attend quickly so lives will be put at risk. There is only one local medical centre which is at full capacity at present. There is ancient woodland and protected trees on the site. The development would bring possibly over 1000 extra cars into an area already traffic saturated. There will be an increase in pollution from the extra stationary traffic which will cause health issues. The site is at the limits for emergency services to attend quickly so lives will be put at risk. There is only one local medical centre which is at full capacity at present. There is ancient woodland and protected trees on the site. These will be put in harm. Any development in this area that is inappropriate and would be detrimental of Send Village and Guildford as a borough.

I object to MM41(0a) to the main access being off A247Clandon Road. The A247 is already very dangerous when trying to pull out onto or even off it more cars will make it near impossible. We feel we will end up being house bound along with many of our neighbours. The road is extremely dangerous to cross on foot as there are no crossing places or even footpaths on part of it more traffic will add to this danger. The traffic survey must be flawed as the A3 cannot take the extra traffic southbound as it is often stationary into Guildford and the A3 is backed up from the M25 to Burntcommon daily so any extra cars will add to this congestion and pollution. The roads to Ripley and Send are at capacity with commuter traffic.

I object to MM41(0b) to the through road from the B2215 Portsmouth Road and the A247 to provide an alternative route that relieves pressure on Send Marsh roundabout. This cut through will destroy the pleasant country aspect enjoyed by many residents. The huge increase in traffic will produce excessive noise and air pollution. The A247 is already very dangerous when trying to pull out onto or even off it more cars will make it near impossible. We feel we will end up being house bound along with many of our neighbours. The road is extremely dangerous to cross on foot as there are no crossing places or even footpaths on part of it more traffic will add to this danger. The traffic survey must be flawed as the A3 cannot take the extra traffic southbound as it is often stationary into Guildford and the A3 is backed up from the M25 to Burntcommon daily so any extra cars will add to this congestion and pollution. The roads to Ripley and Send are at capacity with commuter traffic.

I object to MM41(0c) to the Permeability for pedestrians and cyclists into the development from the B2215. Giving better access to a death trap is not acceptable. There are no close amenities for pedestrians to walk too so better access is pretty pointless.

I am in FAVOUR of to MM41(0d) Necessary and proportionate contribution towards an off-site walking and cycle network to the village centre of Send, the Burntcommon Warehouse site and Clandon railway station. Asking for a contribution to fix the problems Guildford Borough Council is creating for itself by supporting this development is sensible. The contribution should also consider work to improve and refurbish the pavement/cycle way to Guilford Town Centre. The contributions should consider the need for a number of light controlled crossing places to safely get to Send. There are no adequate cycle lanes so major road works and moving of pavements will be necessary. Access to the warehouse will require lights at Burntcommon roundabout and a fair amount of extra pavement and a whole new cycle way which should be extended to the one in disrepair along the A3. It is just over a mile to Clandon and the speed limit will need to be reduced and a number of light controlled crossing places need to be installed on the A247. Street lighting is also essential. A survey into road widening for a cycle path undertaken as the pavements are too narrow to accept pedestrians and cycles and there are not footpaths on both sides of the road so some compulsory purchases for land will need to be made to make the route safe enough so not to endanger lives.

I object to MM41(0e) Necessary and proportionate contribution towards mitigation schemes to address the otherwise adverse material impacts on communities and the environment, including Send, Ripley and West Clandon. Guildford Borough Council are not acting in the best interests of the public acknowledging there will be adverse material impacts on communities and then believing collecting contributions is better than looking after this very community in the first place. There is no amount of contributions that can fix the environmental damage this development will cause in the short or long term. Can Guildford Borough Council expect to collect a contribution proportionate enough to help the impact on hospitals, emergency services or that is proportionate to cover the loss of a life because they will be further stretched beyond coping. No amount of money to the council will bring back a life. How will Guildford Borough Council be able to collect a proportionate contribution to build new schools or extend old ones prior to the 100's of new children moving into these new properties.
I object to MM41(0f) Increase landscaping buffer/strategic planting etc.
No amount of planting or landscaping will hide the A3 noise and air pollution from these new houses or these houses and their extra cars noise from the or surrounding roads. There is not enough room for 550 dwellings and the trees needed to hide them. Who will continue to take care of this extra landscaping, buffers and strategic planting when the developer departs and who pays as it sounds very expensive.

Attached documents:

**Comment: MM41 - LPMM18/2472  Respondent: Alison Gee 15370593  Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

**Comment: MM41 - LPMM18/2310  Respondent: C R Woodland 15373153  Agent:**

I object to Main Modifications MM42, MM43 and MM44 to the local plan as much of the development proposed is on the Green Belt and insufficient consideration has been given to the constraints which ought to be applied with regard to infrastructure, roads and schools are at capacity already. The Main Modifications do not seem to have taken into account the closure of Ripley School, which has reduced the total number of school places in the area. With regard to roads traffic levels and pollution are already unacceptable, with nitrogen dioxide at dangerous levels and the further housing in the Main Modifications will only bring further cars and lorries to the local roads.

In particular I object to MM43, the use of land at site A43 Garlicks Arch. This is a green field site with no "exceptional circumstances" to justify ignoring all of the many previous objections. This land contains ancient woodland which must not be removed without planting replacement trees. The additional housing in MM43 will only bring further cars to the already congested local roads.

Attached documents:

**Comment: MM41 - LPMM18/5584  Respondent: Tim Poyntz 15381089  Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Comment: MM41 - LPMM18/5312  
Respondent: Roderick Hutchison 15390273  
Agent:

I raise the following objections:

1) MM41 Land at Garlicks Arch, Send Marsh, Policy A43
The increase from 400 to 500 homes is excessive – I objected to the lower total, but this has been further increased. Local schools and medical facilities, already very stretched, will be further overloaded. Yet more traffic will clog the local roads.

Attached documents:

Comment: MM41 - LPMM18/4050  
Respondent: Marian Tarrant 15391329  
Agent:

I object to MM41 (Policy A43, Garlick's Arch. Send Marsh/Burnt Common/Ripley).

Because the addition of a further 150 homes making 550 in total (an increase of 37% is excessive).

Because, the 2014 proposal for 430 house in Send was reduced to 185 in April 2016. In May 2016 policy A43 was added with 400 houses and Industrial units. At June 2017 we had 500 houses and 10 Traveller/Show people plots. There were 7,000 objections to the smaller development which I feel has been ignored. This number of objection must be taken into consideration!

I object because GBC have exaggerated the need for the 12,426 houses in the local plan. A population increase of 20,000 in the plan period would require just 8,000 homes based on 2.5 soles per habitat.

Because, this site is on Green belt, permanently protected by NPPF to prevent the merging of settlements ie Ripley/Send Marsh/Send. There are no exceptional circumstances to take this site out of the Green Belt. The site is covered in Ancient Woodlands, containing trees that have stood since the 16th Century, this area must be conserved for future generations.

Because, this site is subject to flooding and has a flood zone 2 allocation.

I object to MM41 because of the increased pressure on local facilities, Doctors, Schools etc. that 500+ homes would bring to Send.

550 new homes would generate circa 60 additional children to be schooled. Send school no capacity for these extra pupils and Ripley school has been closed. Circa 1,375 folk would require GP services, where will they be provided?

Because of the additional traffic this will create. There are circa 1,700 houses in Send. The proposed developments at Garlick’s Arch 550, Clockbarn 60, Winds Ridge 40, Plus Alderton’s Farm 120. Adds 770 new homes. An increase of 45%. This is excessive for our roads and indeed the infrastructure of our Village.

I object to MM27, MM41, MM42, MM48, Transport Strategy.

Because we have no verified assessment from Guildford Borough Council of the Traffic implication these modifications will impact on Send.

Common sense tells me development on the scale proposed in Send and wider a field at Gosden Hill, Wisley and Ockham. Plus the proposed M25/A3 Junction will increase traffic in our Village and with it the problems it brings.

Attached documents:
Comment: MM41 - LPMM18/4532  Respondent: Kirsten Collins 15398593  Agent:

MM41: I object to the huge increase in planned new homes (now 550 rather than the original 400 about I and many others objected to previously). I am especially concerned about the impact of this on local schools. Children in Send already face a real difficulty in obtaining a secondary place within sensible reach of their home. The fit will make the already busy Send road even busier.

Attached documents:

Comment: MM41 - LPMM18/2337  Respondent: Guy Whatley 15406593  Agent:

Objection to MM41 Land at Garlick's Arch A43

I previously object to Garlick's Arch and its proposal to build the 400 homes and industrial space. I object to the development which will destroy ancient woodland, and it still does not seem to be supported by any evidence of need. It will join Ripley and Send together so both villages lose their character. The modified plan now mentions 550 homes - a further increase in a development already unpopular due to thousands of previous objections.

The council often mentions 'affordable housing' in planned developments, but I am single and in my early thirties and in low-paid employment. I am unable to afford any type of housing in this area, and this plan to offer a small amount 'affordable housing' does not mean anything to people like myself.

**Comment: MM41 - LPMM18/5965  Respondent: Jennifer Slade 15429985  Agent:**

I object to MM41 - Land at Garlick’s Arch, Send Marsh Policy A43. Despite 7000 previous objections, it is now proposed that the number of homes be increased by 37% from 400 to 550, of which 450 should be built in the first 5 years. Given the level of construction planned over the next 5 years within a 20 mile radius: Heathrow, M25 Junction 10 and the Petrol Pipeline to name but a few, it is naive and unrealistic to believe that there will even be available workforce to achieve this.

Based on the Government's ONS calculations this development would represent an excessive burden on Send/Ripley, as the figure demanded for this site alone would represent nearly 20% of GBC’s total annual housing needs every year for the next 5 years.

This area, which is permanent Green Belt with no "exceptional circumstances" contains ancient woodland dating back to Elizabeth I which GBC are proposing to destroy. It is also currently a Flood Zone 2 allocation having frequent flooding and contains land contaminated with lead shot, following 50 years of shooting activity. The proposed development will generate excessive traffic in Send and Ripley, on roads that are already gridlocked at peak times. This over-development would join Ripley to Burnt Common to Send, which is contrary to the key purpose of the Green Belt.

Schools, Nurseries, Doctors, Dentists and Hospitals, which are already under extreme pressure, would be unable to cope with such a concentrated increase in population. Without major infrastructure improvement and development - which the Plan does not even mention or consider - these facilities are likely to collapse.

**Attached documents:**

---

**Comment: MM41 - LPMM18/5972  Respondent: Jennifer Slade 15429985  Agent:**

Transport Strategy: MM27 / MM41 / MM42 and MM48. GBC has not published any assessment of the increased traffic density which will be caused by the proposed addition of 770 dwellings to Send, which is an increase of 45%; the significantly expanded industrial and storage area and the new slip roads to and from the A3, which will result in thousands of extra cars and lorries traveling daily along the A247, together with the serious congestion and air pollution (which is already at dangerous levels). Any proper assessment would show that the proposed plan will result in the destruction of Ripley and Send's current infrastructure and that of its surrounding areas as well as increased noise and...
nitrogen dioxide pollution, causing damage to the health of residents and particularly children at the School on the A247 in Send, as well as serious traffic delays and gridlock of the local road network.

Attached documents:

Comment: MM41 - LPMM18/2738  Respondent: Helen Green 15433153  Agent:

I am writing to forcefully object, in the strongest possible terms, to the modifications resulting from the Planning Inspector’s Report impacting the village of Send. The danger is that, if the proposals / modifications go ahead, Send will be transformed in such a way that its village identity will be permanently destroyed. Linked to this, there will be significantly increased congestion, pollution and resulting damage to the environment. This will impact residents both in Guildford Borough and beyond.

The attitude by Guildford Borough Council is almost unbelievable after the objections they received following the last Report. There has obviously been a decision made to ‘dump’ everything onto Send, thus destroying Send as a village, in order to protect the town of Guildford. This attitude is completely unacceptable. Not only will it result in a reduction in the residents of Send’s standard of living, but will also affect the values of our properties. Are Guildford Borough Council willing to compensate us for any loss of value or saleability to our homes? I suspect not!

Specifically, I object to Main Modification 41 (Land at Garlick’s Arch, Send Marsh, Policy A43) because:

- An increase of 37% in the number of houses will destroy the village identity
- It ignores 7,000 objections already lodged
- It is Green Belt containing ancient woodland
- It will join up two separate villages (Send and Ripley) without sufficient school places with the recent closure of Ripley Primary school and no extra capacity at Send Primary school
- The site is subject to frequent flooding (a flood zone 2 area) and contamination by lead shot
- The extra cars will block up the adjacent roads and increase air pollution of carbon monoxide, nitrogen monoxide and nitrogen dioxide
- Medical facilities will be unable to cope with the increased demand

Attached documents:

Comment: MM41 - LPMM18/2743  Respondent: Helen Green 15433153  Agent:

Regarding MM27, MM41, MM42 and MM48 Transport Strategy

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock

Attached documents:

Comment: MM41 - LPMM18/2049  Respondent: Mrs Kay Webb 15433473  Agent:
I object to the increase in housing from 400 to 550. This land is Green Belt and ancient woodland and therefore should not be built on. The development of this land will mean that there is no longer a natural village boundary and separation between Send and Ripley. Our schools and medical centre will not be able to cope with the huge increase in population, and the increase in traffic by over 800 cars on our already congested roads from just this one site, let alone all the other sites proposed for Send and surrounding areas, will be horrendous and cause traffic gridlock. An increase of between 1600 and 1700 extra people will completely overwhelm all the local amenities and facilities including sewage and water etc. The schools and medical centre are already full to capacity

Attached documents:

Comment: MM41 - LPMM18/2371  Respondent: David A Sprigings 15438049  Agent:

My objections to certain specific modifications proposed are as follows:

**MM41**

1. I object to site allocation A43 Garlick's Arch as it is totally wrong to increase the number of planned homes by 150 or 37.5% which is completely excessive at 86% of the total plan increase of 174 from 12426 to 12600 for the whole borough.

2. I object to the increase of 150 homes at site allocation A43 Garlick's Arch as it is Green Belt including ancient woodland and is contrary to the Green Belt limited infilling policy being totally inappropriate to the scale of the locality and would have an adverse impact on the character of the countryside and the local environment. Ref. Policy P2 under clause 4.3.26 on page 54. There are no special circumstances to justify this.

3. I object to this increase of 150 homes on a site which is subject to flooding.

4. The increase from 400 to 550 homes will add considerably to the amount of cars in the area increasing traffic congestion and making existing parking problems in both Send and Ripley even worse.

5. I object to this increase of 150 homes as the extra cars will add further to the potential harm from pollution and accident risk to pupils at Send Primary School and parents and staff, and also patients and staff at the Medical Centre as well as residents and businesses.

6. I object to this increase of 150 homes as it will put even more pressure on local infrastructure including the school and Medical Centre

7. I object to the addition of 150 homes which will further increase the residential link between Send and Ripley, the over development involved moving the locality closer to ribbon development and further harming the countryside and local environment.

8. I object to the increase of 150 homes with the continued inclusion of 6 Travelling Showpeople plots which is contrary to the borough's policy of 6 such plots being only appropriate to development sites with 1500-1999 new homes.

Attached documents:

Comment: MM41 - LPMM18/2377  Respondent: David A Sprigings 15438049  Agent:

MM27 MM40 MM41 MM42 MM48 Transport Strategy
The transport strategy in the Send/Send Marsh/Burntcommon/Ripley area does not look as though it will help deal with traffic congestion in the area but more likely to make it worse.

The timing is such that the developments in the area are front end loaded, mostly in the first 5 years of the plan, whilst major road improvements are mostly scheduled to not be completed until later years.

The road developments appear anyway to be designed to bring yet more traffic through these villages including to and from Woking which will increase pollution, delays and gridlock. To build many of the proposed new homes in advance of road improvements will only make matters worse.

The potential future all movements junction of the A3 with the A3100 London Road, the B2215 London Road and the A247 Clndon Road for the provision of land for a connector road to the B2215 London Road/A247 Clndon Road in MM35 Gosden Hill Farm under Transport Strategy (2) and Opportunities (6) sounds like a recipe for yet more traffic to be drawn through Burntcommon/Send Marsh/Send/Ripley making things even worse so although a plan for the future I object to it now.

Attached documents:

Comment: MM41 - LPMM18/5264  Respondent: Linda Daniell 15440161  Agent: 

I object to MM41. The increase in housing would put stress on the infrastructure of this area. The newly built school in Send is already not fit for purpose in the long term and could not support more pupils.

The medical facilities are currently over stretched and in particular, the A and E departments of our local hospitals would be unable to cope with more demand.

Additionally, our roads are already blocked and unable to manage more traffic.

Attached documents:

Comment: MM41 - LPMM18/2232  Respondent: C Knaggs 15443265  Agent: 

I protest most strongly.

Attached documents:

Comment: MM41 - LPMM18/114  Respondent: Peter Hoar 15446561  Agent: 

I am writing to object to the ludicrous proposal to completely ruin Send and the surrounding areas with an enormous building programme.

MM41.
Garlicks Arch is not only a Green Belt area but an ancient woodland. Its destruction would show the Council has absolutely no concern for the environment. It would cause enormous problems at the junction with Send Marsh Road already impossible at peak travel times.

Attached documents:

Comment: MM41 - LPMM18/93  Respondent: Mrs Eileen Barr 15446689  Agent:

I object to this massive development on Green Belt land containing ancient woodland. Adjacent roads cannot cope with the resulting additional traffic. Ripley Primary School has closed and Send School is already full. It is already difficult to get an appointment at the nearest medical centre. This development is not sustainable.

Attached documents:

Comment: MM41 - LPMM18/5509  Respondent: Edward Bates 15448385  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/3471  Respondent: John Ridson 15448801  Agent:

I wish to make the following objections:

MM41 Garlicks Arch: I object in the strongest possible terms to these proposals, as this woodland is an extremely valuable local landscape feature, forming the backdrop in local views and walks, including views from our house and garden. All summer we have watched a family of buzzards flying above the woodland. We objected to the previous proposal for this area, and now it's even worse with many more houses. Any development here will also lead to increased run off and potential flooding downstream - i.e. where we live. As well as being beautiful, we understand it is also Green Belt and contains some ancient woodland, and therefore completely unsuitable for development. And the development would also add to the local traffic congestion.

Attached documents:

Comment: MM41 - LPMM18/4098  Respondent: Ruth Brothwell 15448897  Agent:

My previous objection related in particular to the loss of Green Belt land. I now notice that you have ignored this and increased the number of intended houses.
• I object most strongly to the removal of green belt in this area.
• Despite assurances there is no doubt that this build will hugely increase the number of cars trying to enter the area on to the Portsmouth Road and the Clandon Road. This will cause heavy congestion - too much for the villages.
• Our schools and doctor's surgeries are already full - 3 weeks to gain an appointment locally!! This extra burden without sufficient infrastructure additions is too much for the locality to bear.
• The proposed site is used currently for shooting and is therefore contaminated by the lead shot which results from this sport.
• I do not believe that an increase of 37% over the original and objected to element can be justified.
• Transport - the proposed A3 changes and Clandon Road changes do not provide adequate support for those that would be incurred through this development suggestion. No assessment has been advised to us as loyal council tax payers regarding it. Roads towards London and Woking are very heavy every day already. This situation can only add journey time, increased pollution and gridlock within the villages environments.

Attached documents:

Comment: MM41 - LPMM18/5474  Respondent: Margaret Ashmore 15449409  Agent:

Good morning GBC Planning, I have read all your Modifications 2018 and i am very disappointed that you have not listened to any objections that the villages have put forward, in fact I would go as far as to say that [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

He has increased housing on Garlicks Arch which was already over planned (MM41). Burnt Common again an increase in Industrial units which is not needed, we have enough unites unoccupied, would`nt it be better to fill the empty units first,

but then of course you have also moved out at least three units at Burnt Common WHY??? was this in preparation for you to build.??

Attached documents:

Comment: MM41 - LPMM18/5478  Respondent: Margaret Ashmore 15449409  Agent:

Nobody has yet come up with plans for roads and other transport needs MM27,MM41, MM42, MM48. You as a Council know how important it is to get this done IF your plans are to go ahead. At present the current roads cannot take any extra traffic, all roads into and out of the Villages will be complete gridlock. Please think very carefully what you want to destroy, such as Green Belt, Village Life, and the History of this area.

Attached documents:

Comment: MM41 - LPMM18/4736  Respondent: Marion Marshall 15451841  Agent:

MM41. Transport strategy relies too much on inadequate modelling, including the delay to the M25 JlO/RHS scheme. This will impact on proposal in the north of the borough, especially Three Farms Meadow.
Too much reliance is put on alterations to the A3 near Guildford, all of which are outside of GBC's control.

Attached documents:

Comment: MM41 - LPMM18/467  Respondent: Janet Tarbet 15454529  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The increase from 400 to 550 homes of which 450 to be built in the first five years

- It is Green Belt containing ancient woodland
- An increase of 37% in the number of houses proposed is excessive
- 7000 ejections to the previous lower number have been ignored
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

Attached documents:

Comment: MM41 - LPMM18/472  Respondent: Janet Tarbet 15454529  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/5794  Respondent: Donna Collinson 15460737  Agent:

MM41 Should Garlick’s Arch be retained as Green Belt in view of revised housing need, rather than expanded?

Attached documents:

Comment: MM41 - LPMM18/5709  Respondent: Paul Smith 15461793  Agent:

There is too much reliance on A3 improvements and they are beyond the council’s control
Comment: MM41 - LPMM18/4727  Respondent: Toby Marshall 15464161  Agent:

MM41.

Transport strategy relies too much on inadequate modelling, including the delay to the M25 J10/RHS scheme. This will impact on proposal in the north of the borough, especially Three Farms Meadow.

Too much reliance is put on alterations to the A3 near Guildford, all of which are outside of GBC's control.

Comment: MM41 - LPMM18/4136  Respondent: Pauline East 15468705  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43.

Increased from 400 to 550 homes.

I'm dismayed to find that despite over 7000 objections previously to this development this was ignored and the number of houses has been increased to 550. This is over development in what is Green Belt and will undoubtably result in major increases in traffic on the surrounding roads and cause an overburden on our schools and medical facilities which are already under strain.

Attached documents:

Comment: MM41 - LPMM18/4140  Respondent: Pauline East 15468705  Agent:

MM27, MM41, MM42 & MM48 Transport Strategy.

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons plus of course Gosden Hill and Wisley/Ockham are major and not adequately addressed with the proposed A3 changes etc.
It will feel result in thousands more cars daily using Send Barns Lane and Send Road going to/from Woking etc past schools, medical centre and shops with major delays and gridlocks, noise and air pollution all to an intolerable and unacceptable level for our village.

**Attached documents:**

**Comment:** MM41 - LPMM18/4174  **Respondent:** Zoe Kollov 15468833  **Agent:**

I object to MM41 policy A43 change at Garlicks Arch because;

- I do not see any exceptional circumstances that should force the erosion of green belt land
- It will remove the 'green belt' between Ripley and Send that is necessary for the survival of our native species such as Hedgehogs
- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- A further 550 homes will put further pressure on local services, which are currently at breaking point; transportation, hospitals, education etc.
- There is no proven requirement for travelling show people plots
- It will spoil the current beauty and openness of the area, which is what attracted my family and I in the first place.

**Attached documents:**

**Comment:** MM41 - LPMM18/4181  **Respondent:** Zoe Kollov 15468833  **Agent:**

I object to MM27, MM41, MM42 and MM48 Transport Strategy because;

- The traffic implications for Send as a result of proposed changes at Garlicks Arch, Burnt Common, Clockbarn and Alderton's added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC has performed no proper assessment of the resulting aggregate traffic and the way that this will build up to every working day causing pollution, delays gridlock and noise.

I object to the proposal to inset Send Business park from the green belt because;

- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- It is an areas of outstanding beauty and is quite rightly protected as green belt that would be completely destroyed by this change
- There is no exceptional circumstance why the current green belt allocation should be changed for this purpose

I object to policy A42 change at Cockbarn in tannery lane because:

- I believe it should not take place in the first place, however a further increase in the number of homes is proposed which make the situation even worse
- The traffic in this area is getting worse and especially at the A247 junction
- Green belt land is protected in law and I see no reason that it should be built on.

**Attached documents:**

**Comment:** MM41 - LPMM18/225  **Respondent:** Nicholas Brown 15468993  **Agent:**

I wish to register my strong objection to the latest modifications made by the Council to the local plan.

Specifically:

MM41 Policy A43

Despite 7000 objections a proposed 37% increase in the number of houses at Garlicks Arch is excessive.

We are faced with a continuous built up area joining Send and Ripley much of it Green Belt and some containing ancient woodland.

The increase in traffic will put a severe strain on already busy roads and increase pressure on infrastructure such as schools and local medical facilities.

**Attached documents:**

**Comment:** MM41 - LPMM18/230  **Respondent:** Nicholas Brown 15468993  **Agent:**

MM27, MM41, MM42 & MM48

It appears that GBC has not carried out a proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road of building at Garlick's Arch, Burnt Common, Clockbarn and Alderton's. This transport strategy will witness a huge increase in traffic which will add to an already inadequate road system and will see an increase in noise, pollution, delays and gridlock. This is a very worrying prospect.

Send seems to have been singled out for a disproportionate increase in development when compared with neighbouring villages.

I hope that these objections are seriously taken into account.

**Attached documents:**

**Comment:** MM41 - LPMM18/1002  **Respondent:** Lorraine Ozanne 15472833  **Agent:**

**Objection to MM41, MM42, MM44, MM9 and associated Transport strategies**

I'm writing to formally object to the above Main Modifications on the following grounds:
- The excessive number of houses proposed
- Over development of Send and Ripley
- Excessive new industrial allocation of land
- Additional traffic causing major congestion of local roads and resultant safety concerns for pedestrians
- Green Belt land should be protected

Attached documents:

Comment: MM41 - LPMM18/369  Respondent: M.M.L Prosser 15477089  Agent:

What an extraordinary amount of building planned for Send Village; it would certainly stop being a village and turn into a town. However it would still only have one road going through which means traffic would be [unreadable text], and non-stop.

If you could build a flyover to Woking - great! [unreadable text] those extra people [unreadable text] doctor's surgery and one chemist and no extra school isn't feasible.

I do think a permanent gipsy site would be preferable to them parking, [unreadable text] ever they like and [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

Please have a rethink

Attached documents:

Comment: MM41 - LPMM18/5882  Respondent: Margaret Bennett 15478273  Agent:

2. There is no attempt in the Plan to address the fundamental issue of Guildford’s traffic problem. There is too much reliance on A3 improvements which are outside the council’s control.

Attached documents:

Comment: MM41 - LPMM18/1558  Respondent: Jill Murphy 15502433  Agent:

MM41 Land at Garlicks Arch, Send Marsh. Policy A43.

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

This is an increase of 37% in the number of houses to be built and I can only assume that the Conservative Guildford Borough Council are punishing Send for throwing out the Conservative Councillors and electing Green Belt Councillors.
Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking.

This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

This site is contaminated by many years of Clay Pigeon Shooting and is prone to frequent flooding,

Up to a thousand cars and between 1600 to 1700 extra people will completely block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added ?

MM27. MM41. MM42.and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account ?

The increased traffic for Send from Burnt Common Garlicks Arch,Aldertons,Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

Attached documents:

Comment: MM41 - LPMM18/4183  Respondent: Richard Golding 15509057  Agent:

MM41 LAND AT GARLICK’S ARCH POLICY A43

I OBJECT TO THE POLICY MM41 Land at Garlick’s Arch:

The initial proposal is totally incorrect This land is GREEN BELT it contains two areas of ancient woodland 50% of the site is subject to flooding and is recognised locally as a FLOOD PLANE , it carries a flood zone 2 allocation any work carried out to reduce the area flooded would increase the likely hood of flooding in Send Marsh, the Environment Agency undertook work a few years ago in Send Marsh to reduce the risk, but any work on Garlick’s Arch could neutralise the good work done. But then to totally ignore the thousands of objections to the development and propose an increase in the development to 550 property's is putting an unfair share of development on Send.

If the proposed development of 550 houses and travelling peoples’ plots were built where will their surface water go, will it just be spirited away, it will certainly not soak into the ground under such a density of buildings.

The proposal for 550 homes totally ignores the thousands of previous objections made by local people. This amount of development has no doubt been based upon the fictitious figures in POLICY S2 of a requirement of 789 property's per year. A respected consultant Barton Willmore feels the correct figure should be 431 and in data released in September by the Office of National Statistics suggest a figure of 460 homes per year would be an appropriate growth in Guildford approx. 50 % of Guildford Borough Plans.
The ancient woodland on the site has protection under the NPPF section 118 even if one locates a development of this size adjacent to the woods it cannot fail to damage it. I do realise the policy does allow exception for thing of national importance, but this certainly fails to meet that standard. A UK wide state of nature survey undertaken in 2016 shows worrying trends, so Surrey Wildlife Trust landscape manager Mile Waite undertook a state of nature survey in Surrey and this showed that Surrey's flora and fauna appears to befairing particularly badly with losses far higher than the national level – 12% compared nationally 2%. Of a total of 404 priority species of national conservation concern almost 31% are locally extinct in Surrey while 37% are threatened or in worrying decline leaving 32% considered stable or recovering. The proposed development will not improve the situation it would have a negative effect.

This amount of development will join Send to Ripley and amounts to over development. This will also incur around another 1000 cars on the local roads with all the problems that will bring.

This proposal in addition to the other developments proposed will create an urban corridor the A3 which is completely against the whole principal of the GREEN BELT which was enacted to stop urban sprawl, it would also go against the government’s claim that the GREEN BELT is safe in their hands.

Attached documents:

Comment: MM41 - LPMM18/4188  Respondent: Richard Golding 15509057  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

Guildford Borough council has given no thought to the traffic implications of all this excess development proposed for the local area. The local roads are already approaching grid lock the A3 really suffers in peak period, the proposed changes to the Clandon slip roads will only make the A3 worse, I suppose traffic lights will be used to reduce the flow on to the A3 with even more problems in Send.

Attached documents:

Comment: MM41 - LPMM18/4443  Respondent: Hazel Thompson 15571745  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Increased from 400 to 550 homes of which 450 to be built in the first five years

The site is Green Belt containing ancient woodland, which we believe should be protected. The proposals are overdeveloped for this area and it will join up Ripley and Send and will generate two much traffic to the already oversaturated roads.

This area is prone to flooding, having been born in the village, I know this area well. The village facilities of school and medical centre are already overstretched to breaking point.

Attached documents:

Comment: MM41 - LPMM18/4448  Respondent: Hazel Thompson 15571745  Agent:
I have already discussed concerns about the local infrastructure and in particular in the additional traffic to surrounding roads. The proposed changes are not adequately addressed by the A3 and Clandon slip roads. There is great concern about local roads. There is no evidence of robust structured assessment of local roads, in particular Sendmarsh Lane, Send Barns Lane and Send Road as traffic moves towards Woking.

**Comment:** MM41 - LPMM18/2496  **Respondent:** S Bennell 15571937  **Agent:**

**MM41 Garlick’s Arch** should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Comment:** MM41 - LPMM18/5485  **Respondent:** Susan Palmer 15572641  **Agent:**

**MM41 Garlick’s Arch** should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Comment:** MM41 - LPMM18/3322  **Respondent:** Ann Murray 15574497  **Agent:**

**I object to Proposal MM41**

Despite 7000 objections to this proposal an increase of 37% in the number of homes if proposed. This is Green Belt land and an ancient woodland. The joining up of Send and Ripley will constitute over development. This site floods and is contaminated by lead shot. The increase in the number of cars will cause traffic problems on the local roads. There do not appear to be any plans to build more schools or medical facilities in the village to cope with this large increase in population.

**Comment:** MM41 - LPMM18/929  **Respondent:** Mr Peter Killingley 15575617  **Agent:**

The number of homes for this site seems to vary at every consultation - increasing without real justification or understanding of what the impact will be on Send. The roads surrounding this area are busy and congested at the best of times - all it takes is one delay on the A3 and the surrounding roads are flooded with extra cars, leading to massive delays. The local schools are already full, and one recently closed, increasing pressure on the area.
Comment: MM41 - LPMM18/4171  Respondent: Karsten Kollov 15582817  Agent:

I object to MM27, MM41, MM42 and MM48 Transport Strategy because;

- The traffic implications for Send as a result of proposed changes at Garlicks Arch, Burnt Common, Clockbarn and Alderton's added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC has performed no proper assessment of the resulting aggregate traffic and the way that this will build up to every working day causing pollution, delays gridlock and noise.

Attached documents:

Comment: MM41 - LPMM18/4173  Respondent: Karsten Kollov 15582817  Agent:

I object to MM41 policy A43 change at Garlicks Arch because;

- I do not see any exceptional circumstances that should force the erosion of green belt land
- It will remove the 'green belt' between Ripley and Send that is necessary for the survival of our native species such as Hedgehogs
- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- A further 550 homes will put further pressure on local services, which are currently at breaking point; transportation, hospitals, education etc.
- There is no proven requirement for travelling show people plots
- It will spoil the current beauty and openness of the area, which is what attracted my family and I in the first place.

Attached documents:

Comment: MM41 - LPMM18/1963  Respondent: Mr Malcolm Murray 15583553  Agent:

I object to the proposals to develop land at Garlicks Arch.

The proposed site is mostly below road level and it would be extremely difficult to build suitable sound defences for the residents.

It is greenbelt land which floods regularly

There are insufficient infrastructure available now that the local school at Ripley has been closed together with an already overstretched doctors practice which has to cover Ripley & Send.

Attached documents:
MM41 Land at Garlicks Arch, Send Marsh (Policy A43)
I entirely object to the increase from 400 to 550 houses, of which 450 are to be built in the first 5 years. Our village school, medical centre, and dentist are already overflowing; it has become noticeably harder to make an appointment at the Villages Medical Centre in the last few years, and traffic in the village is regularly completely gridlocked. What does GBC think that 1600 to 1700 extra people will do to what is already a huge problem? Clearly, no thought has been put in to this whatsoever, nor has any consultation been listened to; over 7000 objections to the earlier plan have been treated with utter contempt by you.

Attached documents:

---

MM27. MM41. MM42 and MM48 Transport Strategy
Send is a highly congested village. My own road, Potters Lane, is evidence of this; in July my parked car was written off by a council van when the driver found himself boxed in by rush hour traffic and panicked, driving in to the side of my car and then reversing in to the front of it. 'Road rage' is becoming a serious problem in Potters Lane, with almost daily conflicts; this was not the case when I moved in five years ago. My question, therefore, is why has the potential effect of thousands of extra cars in an already heavily congested area not been taken into account? Nothing has been done to address this in the most recent document.

Attached documents:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

---

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:
I object to the proposed large scale development at Garlic Arch site. Numerous brownfield sites already exist within the borough without the need for further erosion of Surrey’s unique green belt assets. The Local Plan offers no justifiable reasons for any Green Belt exception for the Garlicks Arch site.

I object strongly to the proposed destruction of the woodland area at Garlic Arch. The Local Plan offers no justifiable reasons for any Green Belt exception for the Garlicks Arch site and in particular the proposed wholesale destruction of valuable ancient mature woodland. If new homes are to be built on the site, the woodland area must be removed entirely from any proposed development and preserved for future generations.

I object strongly to the unjustified increase in proposed number of new houses at Garlicks Arch (MM41) on the Ripley/Send borders. Despite numerous objections to the original proposals for 400 new homes, the revised Local Plan ignores these and seeks to increase the proposals to 550 new homes. No adequate justification has been offered for this proposed 37% increase.

I object to the proposed development timelines for the Garlicks Arch (MM41) sites. The revised Local Plan proposed 550 new homes at Garlic Arch, some 450 of which are to be built in the first five years. The speed of this rollout at one site within the borough is excessive and does not allow adequate time for the expansion of the required local support services and facilities.

I object to the inevitable increase in traffic that would result from the Garlicks Arch development proposals. The local road infrastructure is already at bursting point, particularly at school run and commuting times. The proposed large scale development of the site will inevitably bring a substantial increase in traffic on already congested roads, leading to further erosion of greenbelt land for required new relief roads.

I object to the increased industrial sites at Garlic Arch (site A43). Existing brownfield sites within the borough are already far better suited to these industrial developments without the need to destroy additional Green Belt land.

I object to the proposed development of increased number of homes at the Garlicks Arch (because, as outlined in previous objections, both these areas are strategic for the natural absorption of local rainwater runoff. Additional homes over and above the previously stated limit of 400 homes will only further exacerbate the water runoff problems and further increase the flood risk.

Attached documents:

Comment: MM41 - LPMM18/3669  Respondent: John Thompson 15591585  Agent:

I object to MM41 as the transport strategy relies on inadequate modelling, including the delay in J10 Highways England RIS scheme of at least two years which will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm]. There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/3677  Respondent: John Thompson 15591585  Agent:

I object to MM14 - Garlick’s Arch, Send Marsh, Policy A43

In the revised proposals the number of houses proposed for this site has been increased from 400 to 550 houses. This is an increase of 37%, despite the fact that the council received 7,000 objections to the initial plan. This is green belt land,
containing ancient woodland, which seems to mean nothing to those who wish to see this part of the borough concreted over. This development would, in effect, destroy the individual nature of the two villages, joining them into one mass and, as such, must surely be considered as over development. The addition of so many people in this area would stretch the local services beyond capacity. There is only one primary school in the area as the other, in Ripley, has been closed. Also, the doctors surgery would not be able to cope with such a significant increase in patients. The addition of 800 extra cars on our already congested roads does not bear thinking about. The road in which I live is already a rat run, used by motorists who drop off the Portsmouth road at the Send Marsh junction. We already feel that we cannot walk along our road in the mornings and evenings due to the high volume of traffic. Polesden Lane is single track along much of its length and has no footpaths. Additional traffic along here would make our lives even more stressful.

Comment: MM41 - LPMM18/3684  
**Respondent:** John Thompson 15591585  
**Agent:**

I object to MM27, MM41, MM42, MM48 Transport Strategy

The cumulative impact on the traffic and pollution issues on the village, when all of the proposed developments at Garlick's Arch, Clockbarn, Alderton's Farm, Gosden Hill and Wisley and Ockham, is totally unacceptable. Our road systems are already heavily congested, especially at key points in the day. My daughter lives on Send Road where it is often difficult to enter and exit her drive because of the ceaseless flow of vehicles. Crossing the road is perilous. The pollution levels are a real cause for concern as I have a young grandchild. We already know that far too many of today's youngsters suffer from asthma, a direct result of the increasing levels of pollution. This can only be exacerbated if these proposals go ahead.

Attached documents:

Comment: MM41 - LPMM18/4025  
**Respondent:** Mr Martin Billard 15601857  
**Agent:**

I formally object to: MM41 Land at Garlicks Arch, Send (policy A43)

**Garlick's Arch**

I object to MM41(1) To the increase numbers from 400 to 550.

It seems criminal that Guildford Borough Council are prepared to allocated this site by underhandedly moving a settlement boundary and taking land out of greenbelt. This is a breach of its own policies it has protected for years.

It seems criminal to have Public Consultations where there was an overwhelming “common sense” “objection” and then just ignore public comment. Not only is GBC acting in the worst interests of its constituents it is also acting in the worst possible interest for its own and our future.

The whole planning system is flawed and corrupt for this development is to be considered.

The Governments survey into projected growth in population and housing has been proven wrong and GBC should address this prior to opening up greenbelt for development.

The Governments track record for housing is appalling and this is just another mistake that GBC are corrupt enough to go along with as it will generate a massive income for them.
GBC and Surrey County Council can’t cope at present with its excessive traffic, road repairs, lack of school places, refuse collection problems, environment issues, increase in crime, burdens on stretched health services and this site by virtue of its numbers and location will add dramatically to all of these issues.

4 years ago, GBC refused application 14/P/00219 to build 25 houses due to no special circumstances to build on greenbelt. This is still the case more money and a flawed survey are not special circumstances.

2 years ago, GBC refused application 16/P/00783 to build 9 houses due to no special circumstances to build on greenbelt. This is still the case more money and a flawed survey are not special circumstances.

The land is greenbelt and should remain so as there are no special circumstances to change this.

The land is green belt and should remain so out of public interest.

The site is in the “SPA” zone (which GBC will be happy to take money to brush over) and then charge dog walkers to use “their” empty countryside car parks.

GBC are changing the wording in the Local Plan so to brush off Natural England which is corrupt.

There’s significantly insufficient infrastructure “none to be exact” to support any development.

There are not sufficient nearby schools. This will lead to school overcrowding and more traffic going into Guildford and Woking. Ripley school has recently closed thanks GBC!

The only local medical centre is already at full capacity and doctors are short in numbers.

The site is at the limits for the emergency services to attend quickly and the increase in local traffic will put local lives at even more risk.

There will be a massive increase pollution from the extra stationary traffic which will cause health issues.

There is ancient woodland and protected trees on the site which are in danger or could be lost forever.

The site is subject to frequent flooding, it is low lying and the soil structure means this cannot be avoided.

An establish and active local sporting ground will be lost.

There are no local shops or amenities other than one petrol station,

Due to the lack of amenities all the new residents will be using cars for every activity, work, schools, play even the nearest pubs are over a mile away causing traffic havoc and excessive pollution.

Any development in this area would be totally inappropriate and would be detrimental of Send Marsh and Burntcommon as a village.

A development of this scale will be out of keeping and over development once you consider building back from the A3, road infrastructure and avoidance of building under electricity power cables.

Thousands of people have already objected to the development of this site for less units.

If the proposal goes ahead people living next to the A3 will be subject to terrible noise and air pollution and any noise cancelling measures put in will have an adverse effect on houses further out from the A3.

The traffic survey done by MK planning and transport says there will be an additional 24 cars per hour at peak times for just 50 dwellings that’s 120 per hour for all 550 proposed dwellings. Perhaps members of the Planning Department and Council should be bothered enough to visit the area at peak times and figure out how another 120 cars will filter out onto the A247 or Portsmouth Road. It can take over 5 minutes now. They will soon realise that any increase in traffic will have
a serious burden on all local residents in cars, on foot or on a bicycle. This increased traffic will spill over into Guildford and Woking town centres as well as local country roads. If members do bother to visit they will also see that the road surface of the bridge going over the A3 is worn out and it was replaced not long ago proving the traffic flow is at capacity. Any increase in traffic will make crossing the A247 by foot a higher risk than it is already and I challenge members of GBC to try this at 8am.

This development will cause a genuine risk to life for anyone living near it or on it due to the extra traffic.

There is an insufficient need for affordable housing at the scale that the Local Plan will require at 40%.

The route to public rail transport is down a fast, narrow road with no lighting, or even a footpath on both sides nor crossing points so lives will be put at risk.

I object to MM41(0a) to the main access being off A247 Clandon Road.

It is already difficult and dangerous trying to pull out onto the Clandon Road by car at present let alone with traffic from 550 new houses with probably over 1000 more cars leaving or returning each day. GBC own report states 24 cars per 50 dwellings at peak times that’s 120 for the whole development in just one hour.

The A247 through Clandon to the A246 is very narrow and twisty with a number of blind accesses including from the railway station, the school and the 2 pubs let alone quite a few private houses the extra traffic will no doubt cause many more accidents if not deaths.

The road is extremely dangerous to cross on foot at present let alone with more traffic as there are no crossing points.

The A3 is often backed up from Burpham at this junction this site will only add to this.

The A3 is backed up from the M25 to Ripley every day and this site will only add to this.

Send Barns Lane and Send Road cannot take any more traffic without seriously putting children accessing schools at risk on death outside their schools and Send Park.

Cycling on local roads is already dangerous without increased traffic from 550 new houses.

I object to MM41(0b) to the through road from the B2215 Portsmouth Road and the A247.

There is no such thing a Send Marsh roundabout. GBC should learn its own geography before proposing 550 new homes on it.

The route will not relieve pressure on the roundabout but the 1000s of extra cars will add to it.

If it is acknowledged there is pressure on the nearby roundabout don’t build 550 new houses nearby.

The increased road usage is likely to cause incidents, accidents if not fatalities.

There will be a loss or damage to established trees and ancient woodland.

It will isolate further the proposed new development from the existing village.

This will be a cut through and cause harm to people who bought their properties to enjoy their current view and peaceful country lane feel.

The huge increase in traffic will produce noise pollution detrimental to existing residents.

The huge increase in traffic will produce air pollution harmful to all resident.

Refuge collection will be more difficult and dangerous.
It will cause traffic havoc at both ends of the roads.

It is a pathetic idea.

I object to MM41(0c) to the Permeability for pedestrians and cyclists into the development etc

The word “Permeability” does not really make sense in this instance.

There are no close amenities for pedestrians to walk too, if the development goes ahead the extra traffic will make local roads and pavements too dangerous, busy, noisy, unpleasant and toxic to walk down or cross just for pleasure.

However, it is dressed up, 1000s of more cars will put cyclists and pedestrians lives at risk especially children’s lives.

I am in FAVOUR of to MM41(0d) Necessary and proportionate contribution towards an off-site walking and cycle network to the village centre of Send, the Burntcommon Warehouse site and Clandon railway station.

Asking for a contribution to fix the existing problems GBC has ignored seems like a good idea.

Any improvement to local infrastructure will be welcome.

Any contributions must be safeguarded and actually spent on these improvements prior to the development’s commencement.

Proportionate must cover the risk to life from the lack of safe light controlled, crossing places to safely get to Send which should include two at Burntcommon roundabout, one outside the school and one opposite the park at least. This will obviously have the adverse effect of backing up the quite often already stationary traffic even further and with the increased traffic from the development it will cause grid lock, extra air pollution and noise pollution and an increased risk of death as drivers jump lights to try and speed up their journey. There are no adequate cycle lanes so major road works and moving of pavements will be necessary but the improvement will be highly regarded by all except by motorists or whoever is footing the bill.

Access to the warehouse will require lights at Burntcommon roundabout, this will obviously have the adverse effect of backing up the quite often already stationary traffic even further and with the increased traffic from the development it will cause grid lock, extra air pollution and noise pollution and an increased risk of death as drivers jump lights at a blind spot unless a compulsory purchase is made of some front gardens to build new pavements at a correct position for a crossing. The extra pavement and cycle way are relatively straight forward.

The walk to Clandon station is just over a mile away and is down a fast, busy narrow road with narrow footpaths and in need of a number of necessary crossings points due to the lack of footpaths and the A3 junction. The road speed limit will need to be reduced which will add to local traffic problems. There will need to be at least two light controlled crossings which will cause traffic problems and or 500m of pavement on private land. The road is too narrow for a cycle path and the footpaths are not on both sides the whole distance and are too narrow to share with bikes so cyclists will still be put at risk from the extra 100’s of cars or pedestrian at risk from bikes on the footpath.

I object to MM41(0e) Necessary and proportionate contribution towards mitigation schemes to address the otherwise adverse material impacts on communities and the environment ...

There are no details about any proposed mitigation schemes so how can you gauge what is proportionate.

Are Guildford Borough Council just trying to collect more money from the development and then do nothing.

Guildford Borough Council are not acting in the best interests of its constituents acknowledging there will be adverse material impacts on communities and then believing collecting contributions is better than looking after this very community in the first place, especially when they overwhelmingly used common sense and objected to this development of the countryside.
Guildford Borough Council are not acting in the best interests of its constituents acknowledging there will be an adverse impact to the environment from this development which they are not only backing they are trying to make it bigger so the impact is greater. There is no amount of contributions that can fix the environmental damage this development will cause.

I am surprised Guildford Borough Council only acknowledges this impact is as far reaching to include Send, West Clandon and Ripley. The impact will be far greater reaching when the 100’s of extra cars block up Guildford for the school run, work commute and shopping trips, when the A3 is log jammed everyday it isn’t now. Then there is the impact on hospitals, emergency services and schools who are already begging for more money and help. Then there is the impact on lives when people die or are injured on the ever, busier roads or from pollution Money cannot by back a life.

I object to MM41(0f) Increase landscaping buffer/strategic planting etc

The best place to set back the development is Burnt Common Lane and the Portsmouth Road as there will be issues building closer to the A3 as it is greenbelt, there is inadequate infrastructure and a health risk to name just a few.

No amount of planting or landscaping will hide the A3 noise pollution from these new houses or these houses and their extra cars noise from the or surrounding roads.

Landscaping will have no effect on the air pollution on a low-lying site next to one of the busiest roads in Surrey.

There is not enough room for 550 dwellings and the trees needed to hide them.

Who will continue to take care of this extra landscaping, buffers and strategic planting when the developer departs and who pays as it sounds expensive.

I object to MM41(0d) to the wording Necessary and proportionate contribution towards an off-site walking and cycle network to the village centre of Send, the Burntcommon Warehouse site and Clandon railway station.

This is just a cash collection for GBC.

There are already footpaths and a cycle lane in place to Send and Ripley.

Access to the warehouse site should be provided by the warehouse owner or developers if that goes ahead for redevelopment. Access is adequate now and has been for years.

Clandon railway station is over a mile away and not many people walk there now so it is doubtful many will in the future as train prices increase and the service is so slow.

The exiting footpaths are narrow with not enough room for cyclists and pedestrians without risk.

The council don’t maintain existing paths properly now so nothing will change.

Cyclists will be in more danger from the increased traffic on the narrow Clandon Road.

Collecting a contribution to fix a problem GBC are making themselves seems idiotic.

I object to MM41(0e) to the wording Necessary and proportionate contribution towards mitigation schemes etc

This is just another cash collection for GBC

There are no details about any proposed mitigation schemes.

The council acknowledges there will be adverse material impacts on communities but wants to collect cash rather than look after the very communities that objected to this development of the countryside.

The council acknowledges there will be an adverse impact to the environment which money can’t fix yet it is willing to take the contributions anyway.
The council acknowledges this impact is far reaching to include Send, West Clandon and Ripley. The impact will be far greater reaching than that when queues on all roads into Guildford and Woking cause havoc. The A3 will be the new rural car park.

I object to MM41(0f) Increase landscaping buffer etc

This paragraph does not really make sense.

If it is acknowledged there is a need to set back any development from the A3 and try to screen the A3 from the houses there is obviously an issue with building in this location.

Landscaping will have no effect on the air pollution on a low-lying site next to one of the busiest roads in Surrey.

It is doubtful that any form of strategic buffer will eliminate noise pollution from the A3 or the development itself to neighbouring properties.

There are not enough significant additional measures to mitigate the visual impact of a development of 550 new dwellings other than do not build them.

Who would take care of this pretty landscape and planting when the developer departs with its profit and who pays.

Comment: MM41 - LPMM18/4512  Respondent: Ann Watkins 15603361  Agent:

MM41. Land at Garlicks Arch. Send Marsh Policy A43.

I objected to the original proposal and now note the amount of homes has Risen from 400 to 550. Surely, this over development, as local services and roads are already at breaking point.

Attached documents:

Comment: MM41 - LPMM18/4516  Respondent: Ann Watkins 15603361  Agent:

None of these proposals will help an already chaotic traffic problem.

Attached documents:

Comment: MM41 - LPMM18/2806  Respondent: Penelope Gillmore 15607553  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:
Comment: MM41 - LPMM18/5108  Respondent: Elizabeth Maycock 15611361  Agent:

MM41 The Local Plan Transport Strategy relies on inadequate modelling. The delay to the J10 Highways England RIS scheme (of at least two years) will have a knock-on effect on all development that relies on this scheme [e.g. Site A35 - Three Farms Meadows; MM41 site A43 - Garlicks Arch; MM44 - Aldertons Farm].

There is too much reliance on A3 (Guildford) improvements that are beyond the council's control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/4652  Respondent: Jackie van Heesewijk 15640897  Agent:

MM41, Land at Garlick's Arch, Send Marsh, Policy A43

I absolutely object to the increase of homes at the Garlick's Arch site. I objected to the homes originally, and now even more so, given the increase from 400 to 550 homes. I feel that the increase of approximately 36% is far too great - the roads are already clogged most of the day and it's difficult to get an appointment at the doctor's. Closing the local school in Ripley was the most ridiculous thing to do and will place an even greater pressure on the village. It's very sad that the 7000 or so objections that were previously made have been ignored.

The site in question is ancient woodland and Green Belt land. It has been used as a legal clay shoot for over twenty years so the land is contaminated with lead shot. It is also subject to frequent flooding.

I feel that the proposed increase of homes constitutes over development and will join up the separate villages of Send and Ripley, which have been known hamlets since the Doomsday Book. The two parishes should remain distinct villages to preserve this ancient special rural area but the proposed development will merge them.

The increase in traffic and people has not been considered in the present infrastructure of the villages, the roads are already so busy. One incident on the A3, M25 or any other major road in the area quickly results in gridlock in the village. That is now, not taking account an increase of approximately 800 extra vehicles caused by the extra housing. And what about schooling, now that our local school has been closed (don't start me on that topic). Our wonderful but underfunded medical centre is already stretched to breaking point.

Attached documents:

Comment: MM41 - LPMM18/4661  Respondent: Jackie van Heesewijk 15640897  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications of the increased developments at Garlick's Arch, Burnt Common, Clockbarn and Alderton's have not been properly thought through. The proposed changes to the A3 and Clandon slip roads will not address the problems created by the extra traffic on top of the usual rush hour Woking commuter traffic congestion, causing increased noise, nitrogen dioxide pollution delays and gridlock.

Attached documents:
POLICY A43: LAND AT GARLICK’S ARCH, SEND MARSH/BURNT COMMON AND RIPLEY. MM41

I object to this increase from 400 to 550 homes, which is without justification. Development on the Green Belt is contrary to Government planning policy which attaches “great importance” to the “openness” and “permanence” of Green Belt. Removing so much green belt land from around Send Marsh is incompatible with the Government’s definition of “sustainable development”. There are no “exceptional circumstances” as required by NPPF paragraphs 79-92 to justify allocating Green Belt land for development. I also object to the increased threat to the loss of Ancient Woodland that surrounds the site on two sides and runs centrally through the site, which includes over 80 ancient oak trees that existed in the year 1600. This development would also merge the currently separate village settlements of Send and Ripley. This is contrary to the policies for sustainable development in the NPPF which state that “The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open” (NPPF paragraph 79).

This development proposal is in an unsustainable location because the site is unsuitable due to lack of access to sustainable transport. It does not benefit from a railway station within easy walking distance and bus services are poor. Residents will have few options but to be reliant on private motor vehicles. There is no adequate assessment of the effect of the traffic generated by the 800+ cars which would accompany this development. These additional vehicles would contribute adversely to the already unacceptably high pollution levels generated by the A3, while the A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion. The development would also place further pressure on stretched medical and school provision, while many of the utilities in the Ripley and Send area are at, or very close to capacity, such as the electrical network and sewers.

Attached documents:

Policy A39: Land near Horsley railway station, Ockham Road North, East Horsley
Policy A43: Land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley
Policy A58: Land around Burnt Common warehouse, London Road, Send

It was previously advised that these sites are adjacent to ancient woodland. The policies should ensure that any direct or indirect impacts on these sites are avoided or mitigated. It is noted that policy a43 has an increase of proposed housing developments from 400 to 500 dwellings. Policy 58 also has an increase in land use proposed.

Attached documents:

Lack of Adequate Transport Infrastructure to support the plan in general but in particular to the three large Strategic Sites (Blackwell Farm, Gosden Hill and Wisley airfield) would all result in additional traffic using the A3, which is already at breaking point (e.g. the A3 regularly jams and results in substantial traffic flows through the town centre and residential urban area – the M25 / A3 improvements will only make matters worse). Such large-scale development sites should therefore not be included in the Local Plan until a substantial capacity increase to the existing transport infrastructure, notably the A3 through Guildford, is agreed. (Policy ID1) Also it is essential to resolve town centre traffic issues before implementing housing and population growth in the town.
I ask therefore that the Local Plan Examination be re-opened, in order to consider the consequences of the revised population forecasts.

I object in the strongest possible terms to this proposal for a number of reasons. I do not understand why the previous thousands of objections have been ignored and instead the proposal is to INCREASE the size of the development.

The roads in the area simply cannot cope with the increased traffic flow, it is already at breaking point at some times of the day. I know that local schools and medical centres are all full at the moment, so this development will have a huge detrimental effect on those services.

Attached documents:

Comment: MM41 - LPMM18/217  Respondent: Laura Frankland 17178113  Agent:

As relatively new resident to Send having moved from West Byfleet due to over development, I wish to strongly object to the following:

MM41 Land at Garlicks Arch, Send Marsh

This development will increase the local housing and traffic considerably and excessively. It is Green Belt land which should be protected and preserved and will join Ripley and Send and constitute over development putting a strain on local facilities.

Attached documents:

Comment: MM41 - LPMM18/3490  Respondent: Madeleine Davis 17205121  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I strongly object to the plan to build 550 homes on this land.

The increased number of houses from the original plan is excessive and it would appear that the objections to the previous lower number have been ignored.

This area is in the Green Belt and has ancient woodland.

The two pretty individual villages of Send and Ripley will be joined up to make one large urban area. Village life for the inhabitants will be badly affected.

One of only two primary schools in the area has closed this year. Where is it suggested that the influx of children moving into Ripley will be schooled?

The traffic at the junctions of Send Marsh Road and Send Barns Lane is horrendous at peak times. I suggest someone from the Planning Department should come and experience this.

Attached documents:

Comment: MM41 - LPMM18/458  Respondent: Dorothy Ann Sprigings 17205249  Agent:
MM41 Land at Garlicks Arch, Send Marsh, Policy A43: I object to this modification increasing the number of homes from 400 to 550. This 37% increase

- is far too great
- will overwhelm Primary School provision
- will put great strain on GP services
- mean hundreds of extra cars will make adjacent roads very congested
- contributes to joining up Send and Ripley, meaning over development.

Attached documents:

Comment: MM41 - LPMM18/1041  Respondent: Ian William Groden 17206177  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

• The proposed increase in units (some 37%) is excessive for this site- in seeming disregard for the number of objections raised about the original proposed size of this development.
• Oa and Ob (should that read “Burnt Common Roundabout”? under Transport Strategy seem welcome but, together with Oe, clearly acknowledge the adverse material impact of the site. Substantially increased road vehicle numbers will result from this development – now further increased. The enhancement of a through road would not, however, reduce the number of vehicles using Burnt Common Roundabout, Send Barns Lane etc specifically due to movement to local schooling/ shops and the route to Woking for jobs and leisure or shopping.
• The ability of schools and medical facilities to cope with the now increased housing is also of deep concern.
• It represents yet more disproportionate development of sites in Send and in the vicinity of Send.

Attached documents:

Comment: MM41 - LPMM18/1045  Respondent: Ian William Groden 17206177  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

• I would respectfully suggest that, although individual site allocations may in the outcome be judged by the Council to be without severe impact in the Strategic Road Network, my concern throughout has been for the traffic implications, primarily for Burnt Common Roundabout itself, as well as its converging roads including the road through Send, from the combination of extremely large developments at Wisley, Gosden Hill, Garlick’s Arch, commercial development at Burnt Common and the new north-facing sliproads.
• All will individually lead to new or changed traffic patterns with substantially increased volumes, congestion, noise, and fumes but the combined impact at Burnt Common roundabout merits your utmost confidence that it works without extreme consequences, particularly with the increases at Garlick’s Arch (MM41) and the commercial development at MM42.
• I have mentioned that the increased Garlick’s Arch will still create traffic via the roundabout to Send and Woking.
• In addition, even if the link road through Garlick’s Arch proves sufficient to divert southbound and eastbound traffic( from the Wisley development and Newark Lane), increased numbers from the Wisley development could choose to turn right at the Burnt Common roundabout and take a route to Woking and beyond, which is less
tortuous than via Newark Lane. Importantly, traffic coming off the M25 and A3 North could also choose this route (particularly heavy vehicles?). In the same way the Gosden Hill development could lead to larger numbers heading to Woking from the south on the A3.

- The very fact that Guildford’s development figures could now include numbers to make up for Woking’s housing needs surely suggests there will be related increased movement that way.
- The vehicle figures could be in thousands through this small roundabout which will be the crunch point.
- I note that the statistics in response to the Inspector’s query 11.37 re the road through Send are shown in terms of annual average daily traffic and annual average weekday traffic.
- Have GBC projected all the above possible movements, including of course the additions at MM41, MM42 and MM44, to reflect scenarios of future peak hour travel, at Burnt Common roundabout and its feeder roads? It is at these times that the most impact will be felt by the most people in terms of queuing and emissions and local inconvenience and it is this which requires the most attention.

Comment: MM41 - LPMM18/4584  Respondent: Jenna Crombie 17206209  Agent:

MM41 Land at Garlick’s Arch (Send and Lovelace) intended development of 400 homes increased to 550.

Attached documents:

Comment: MM41 - LPMM18/2645  Respondent: Mrs S. Almeida 17246593  Agent:

MM41 Garlicks Arch Sendmarsh, Policy A43.

I hereby object strongly to the above as I live on Sendmarsh Road. Traffic at peak times are already gridlocked due to increased traffic over the years any accident that may occur on the A3/M25 already causes traffic to jam up our small surrounding roads. An increase of 37% in the houses proposed is excessive as every household now has at least three cars with children still living at home.

Garlicks Arch is green belt containing ancient woodland.

The site is subject to flooding and contaminated by lead shot.

Schools and medical facilities will be strained to breaking point as it is one cannot get a doctors appointment as they are too busy!!

Please take note. Do not ignore this objection.

Thank you.

Attached documents:

Comment: MM41 - LPMM18/2951  Respondent: Andrew Bedworth 17288513  Agent:
Objection to proposed development in Send

MM41 Garlicks Arch, Send March, policy A43

1. Local infrastructure such as schools and GP practices could not cope and would need further investment.
2. Strong opposition existed to the original proposal for 400 homes, but 550 are now on the plan. This 37\% increase is disproportionate and ignores the 7,000+ objections that have already been lodged.
3. This site contains ancient Woodland and is in the Green Belt.
4. The effect of it would be to join Ripley and Send and constitutes over development.
5. The roads are already congested particularly around rush hour: this would add a further 800+ cars.
6. There would be a likely impact on ground water run-off caused by further development with an increased risk of flooding, in an area already susceptible.

Attached documents:

Comment: MM41 - LPMM18/2425  Respondent: Robyn Cormack 17296321  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

Comment: MM41 - LPMM18/1316  Respondent: Mrs Lynda Turner 17301473  Agent:

I object to the increase in the number of proposed dwellings on green belt. The development would be isolated from the villages, bounded on all sides by busy roads. There is no infrastructure to support a huge increase in population

Attached documents:

Comment: MM41 - LPMM18/1317  Respondent: Mrs Lynda Turner 17301473  Agent:

The characters of the villages would be ruined. Air and noise pollution which is already unacceptable and would be hugely increased.

Attached documents:

Comment: MM41 - LPMM18/1647  Respondent: Shirley Bowerman 17308417  Agent:

MM41. Land at Garlicks Arch, Send Marsh, Policy A43.
This appears to be a ‘punishment’ instance where the original grossly excessive number of 400 homes in a totally unsuitable location appears to have been increased to 550 because thousands of local residents have had the nerve to object strongly.

The impact of 550 households on traffic around Send and Send Marsh, not to mention Burnt Common itself, will be devastating. The area already suffers long hold-ups, especially during peak-times and holiday periods. An extra 800 or so cars will clog surrounding over-busy roads and lanes for miles around. The resulting increase in traffic will also increase the noise and air pollution from traffic which is already audible from at least a mile away, depending on the wind direction.

Some 550 new houses will grossly affect the nature of what is presently a pleasant rural village. Ancient woodland, especially in the Green Belt, should be given utmost protection as it has already hugely diminished. Brown-field sites are available elsewhere. The site is unsuitable anyway, being subject to flooding and contaminated with lead shot.

School facilities are already inadequate, not least due to the unconscionable closure of Ripley First School. Medical facilities are already over-stretched. To join up Send, Send Marsh and Ripley, which this would do, would be a case of unnecessary over-development.

No direct evidence has been produced for the 400 new houses, let alone 550, the number of which would be greatly out of keeping with the area.

**Attached documents:**

**Comment: MM41 - LPMM18/1651  Respondent: Shirley Bowerman 17308417  Agent:**

Objection applying generally to MM27, MM41, MM42 & MM48. Transport Strategy,

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons when considered with nearby Gosden Hill and Wisley/Ockham are not sufficiently dealt with by the A3 changes and the Clandon slip-roads. The over-all effect of the total extra traffic on Send Barns Lane and Send Road does not appear to have been addressed, bearing in mind that thousands of extra cars and trade vehicles, combined with HGVs will be going to and from Woking every day, causing increased noise, pollution, delays and tail-backs.

**Attached documents:**

**Comment: MM41 - LPMM18/46  Respondent: Mrs Neeley Jackson 17316257  Agent:**

I am devastated at the proposed amount of houses planned here, as a lay person even i can see that there are no school or medical facilities that will support this development. Is there a proposal to address this? i imagine i already know the answer will be no. How on earth has Ripley primary school closed, Send is now full to capacity. Never mind the places for secondary school, Send already falls into a no mans land for high school places. The amount of extra cars this development will produce is unacceptable, Send Barns lane is already busy in the morning, parking around the school is ridiculous i walk my children to school and am concerned at the amount of nitrogen dioxide level at present never mind if this traffic were to get worse.

My main objections are

No infrastructure to support development (school and health)
environment impact on health
excessive amount of houses planned

Attached documents:

**Comment: MM41 - LPMM18/48  Respondent: Mrs Neeley Jackson 17316257  Agent:**

My objections for this development are the same as MM41
The number of houses is excessive
No infrastructure school or health. Send is no mans land for high schools, only one primary school for an increase of houses by 45% It just do not make any sense.
health - higher levels of vehicles = higher levels of Nitrogen Dioxide = more illness= more strain on health
its green belt land, as MM41 it contradicts MM9

Attached documents:

**Comment: MM41 - LPMM18/4432  Respondent: David Banham 17321089  Agent:**

MM41 Land at Garlick’s Arch, Send Marsh, policy A43
- This is an increase of 37% in the number of houses proposed and is excessive
- 7000 objections to the previous lower number have been ignored and I am still waiting for any response to my previous objections.
- It is Green Belt containing ancient woodland.
- It will join up Send and Ripley and constitute over development.
- The site is subject to frequent flooding and contaminated by lead shot. Send MARSH is appropriately named.
- At least 800 extra cars will block up the adjacent roads, the majority of which will all be on the road within the same 2 hour period in the day.
- School and medical facilities will be strained to breaking point. With the closure of Ripley First School, the other local schools are already at or close to capacity with no plant to expand further in sufficient time.
- With Alderton’s (120), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure and constitutes rapid expansion that is out of line with any normalised growth in population or demand.
- There is no mention of using any of the local trades within the Send area to develop these properties thus not helping the area or cultivating pride in the local area at all.
MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick's Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, predominantly at peak times, causing increased noise, nitrogen dioxide pollution, delays and gridlock. Should you not think this is a problem I would invite you to recreate a commute from Send during rush hour times. I would not feel comfortable cycling with my children on the local roads should the proposed developments go ahead as the narrow roads, currently with no special provisions or lanes for cycling, will become too busy and dangerous to consider risking the lives of my children.

MM41 – the transport strategy is entirely unreliable. There is a great dependence on A3 improvements around Guildford itself that are outwith the Council’s control – and I would venture so speculative given the financial position that these too must be disregarded. The assumptions round the J10 improvements are similarly speculative and have already since the enquiry been delayed by at least 5 years, wholesale changes are being debated and it is even possible the project will be shelved and a ‘smart motorway’ scheme implemented instead. No plan can be sound when it is based on such imponderables. The concept of new slip roads on the A3 at Burnt Oak will never get off the ground! Burnt Oak slips have been proposed before when they were rejected by the Highways authorities - the feeder roads cannot stand the extra traffic and the A3 cannot stand extra intersections for safety reasons.

This again is the Green Belt and is ancient woodland which is prone to flooding and is contaminated land.

The Increase in the number if houses from 400 to 550 with 450 to be built in the first five years, represents a 37% increase and is excessive.

Send and Ripley are separate villages each with their own entity, this over-development will join the two villages together. We do not want to be the village of Send, Send Marsh and Ripley with all the tribulations of one parish council etc.
At the moment there is one medical centre for the villages of Send, Send Marsh, Ripley and Clandon the strain on the doctors and medical facilities will cause immeasurable problems.

Strangely enough Surrey County Council and the Diocese have taken the measure of closing Ripley Primary School, Toad Hall is closing at Christmas and Ripley Pre School is also likely to close at the end of the academic year. Where is the school for the primary age children in this development? Send and Clandon Schools are already at straining point.

Again no thought has been given to the pressure of roughly an additional 800 cars on our roads causing additional pollution and putting pressure on other roads in the area.

Attached documents:

Comment: MM41 - LPMM18/1113  Respondent: Gail Wicks 17328641  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

Guildford Borough Council want to implement changes to the A3 with a slip road south at Burnt Common/Clandon. This does not take into account the massive impact on Send Barns Lane and Send Road as thousands more cars and lorries etc head to Woking every day from the added nearby sites including Wisley and Gosden Hill.. This will mean increased pollution, noise, delays and gridlock on these already busy roads. The rush hour will be intolerable as it is now when there is a problem on the A3 or M25.

Attached documents:

Comment: MM41 - LPMM18/3969  Respondent: Andrew Hollis 17329025  Agent:

MM41 Garlicks Arch

I object to the building of 550 homes and two traveller sites on the above land. The land gets flooded and is contaminated. The additional traffic this will cause will be an unbearable burden on the surrounding roads. Ripley school has already closed and the two nearest ie Clandon and Send are at bursting point. There is only one doctors surgery serving the three villages which again is always very busy.

Attached documents:

Comment: MM41 - LPMM18/3974  Respondent: Andrew Hollis 17329025  Agent:

MM27,MM41,MM42 and MM48 Transport Strategy

Most traffic will use the existing roads, which already in the rush hour when there is a problem with the A3 or M25 or where there are road works, causes huge hold ups this will be a continuous traffic jam if the new developments go ahead

S2 Revision of Housing Need
The Statistics office states that Guildford can achieve its housing need with 460 houses per year, and the consultancy firm, Barton Willmore states that growth can be achieved with 431 houses per year. Yet Guildford Borough Council and the Inspectorate are intending to plan for 789 houses per year. This figure must be looked at again and reduced in line with the latest growth figures.

---

**Comment: MM41 - LPMM18/3473  Respondent: Freya Risdon 17344865  Agent:**

I wish to make the following objections:

**MM41 Garlicks Arch:** I object in the strongest possible terms to these proposals, as this woodland is an extremely valuable local landscape feature, forming the backdrop in local views and walks, including views from our house and garden. All summer we have watched a family of buzzards flying above the woodland. We objected to the previous proposal for this area, and now it's even worse with many more houses. Any development here will also lead to increased run off and potential flooding downstream - i.e. where we live. As well as being beautiful, we understand it is also Green Belt and contains some ancient woodland, and therefore completely unsuitable for development. And the development would also add to the local traffic congestion.

Re: Guildford Local Plan: Strategy and Sites – Main Modifications 2018

I am very concerned that the objections of local residents have not been listened to and I’m worried that the traffic and pollution implications of your proposals are completely unacceptable.

I object to MM41 - Policy A43 at Garlick’s Arch to build a large housing estate with what now appears to be 550 houses. This is an greater number of new houses for our village to acquire than before causing over-development and changing the character of our village for ever. This will join up the villages of Ripley and Send and erode our beautiful greenbelt land. It will increase pollution levels as there will be so much more traffic on our roads blocking them up. As well as this, it is another area in Send that is subject to frequent flooding and has currently a flood zone 2 allocation. Removing it from greenbelt and building on it would completely destroy the beautiful ancient woodland dating back to Tudor times.

Attached documents:

Comment: MM41 - LPMM18/5791  Respondent: Simon Runton 17381761  Agent:

Other notable concerns are the reliance on the Highways project to develop the M25/ A3 junction at Wisley, as the GBC local plan seems to base key evidence on a project over which it has no control. Also, the proposal that MM23 appears to water down the need for sustainable links on foot and by bike. If the council are serious about delivering a better and safer borough, then these need a great deal more work.

I also support the representation made by Wisley Action Group which was written with advice from Richard Harwood QC

MM41 Garlicks Arch

My objection to this development is that 400 houses, latterly increased to 550 houses, is unsustainable and the infrastructure around Send will be unable to cope with the large influx of people to the area. School and medical facilities will not be adequate, roads will not be able to cope with the extra traffic which are already crowded particularly at morning and evening peak times. This is Green Belt land, it has ancient woodland on it and I understand it is contaminated with lead shot and is subject to flooding. It should not be built on.

Attached documents:

**Comment:** MM41 - LPMM18/4409  **Respondent:** Sally Novell 17413025  **Agent:**

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:

**Comment:** MM41 - LPMM18/3126  **Respondent:** Katherine Pound 17413729  **Agent:**

My name is Katherine Pound and I live at [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] and have lived in Send Marsh/Send all my life.

I am emailing in response to the consultation in respect of Guildford Local Plan and object to the disproportionate development now planned for the village of Send. I understand that the number of proposed houses will increase the number of houses in Send by some 45%. This is a ridiculous percentage increase, which I understand is completely out of scale to the increases being asked of other villages.

Specifically:

I OBJECT TO MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

The proposal to now build 550 homes on this site next to the A3 is simply excessive and ignores all the thousands of previous objections made by local residents, which need to be listened to, which were to much LOWER levels of development. The increase in number of suggested homes is very unwelcome and would be very excessive over-development, destroying the villages of Send and Ripley as the two become joined. This is Green Belt land that has been specially designated to prevent building under all circumstances.
In particular I OBJECT as it is stupidity to build on a flood zone (putting existing homes as well as new homes at risk) and an atrocity to destroy historic ancient woodland that has existed since the time of Elizabeth 1 when the oak and woodland are symbols of Surrey.

I do not think the local infrastructure is well placed to accommodate such a number of new houses in terms of the resulting increase in traffic, the increased pressure put on schools and the doctors’ surgery particularly when other developments proposed for Send are taken into account, which go significantly further than the modifications in this consultation.

I am unconvinced that there is a requirement for new houses being built on this scale – with the uncertainty of Brexit in particular and the reduced numbers already being seen of people wanting to come this country, I don’t think now is the right time to commit to the ongoing building on this scale.

Attached documents:

---

**Comment:** MM41 - LPMM18/3131  **Respondent:** Katherine Pound 17413729  **Agent:**

I OBJECT TO MM27, MM41, MM42 and MM48 Transport Strategy

As alluded to above, traffic in the area of Send is already at dangerous levels for the environment and health of individuals, most notably at peak time when it's often already at gridlock. It is ridiculous to consider adding thousands more cars to this chaos, which would result in significant noise and nitrogen dioxide pollution, which increases significantly with queuing traffic. This will significantly impact the time it takes me and other local residents to travel to work or school, which is not productive for the local economy, our well-being or the environment.

Attached documents:

---

**Comment:** MM41 - LPMM18/5077  **Respondent:** Paul Good 17417217  **Agent:**

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

This area has now allotted an increased number of new homes from 400 to 550 homes of which 450 to be built in the first five years

The reasons being- An increase of 37% in the number of houses proposed which is excessive.

In the previous consultation approx 7000 objections to the previous lower number have been ignored. This is Green Belt containing ancient woodland. Building this large number of homes here will join up Send and Ripley and constitute over development, losing the important village description of these two ancient villages.

in addition the site is known to be subject to frequent flooding and contaminated by lead shot.

At least 800 extra cars will block up the adjacent roads which are regularly gridlocked from over density of traffic already using these routes. School and medical facilities will be strained to breaking point, especially as Ripley Primary has been closed and secondary schools are bursting at the seams, with Christ College and Kings College being ranked as the lowest in Surrey, and therefore in a poor place to accommodate additional pupils.

Attached documents:
MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock, as already stated in previous points. This area is unable to support increased residential traffic and is unsuitable for heavy commercial traffic.

In conclusion, development of this scale in this rural village will be detrimental to the character of this living space, and impact hugely on residents, there is insufficient consideration of the enormous size of development being placed in one small area of the constituency, as opposed to spacing out development, which would ease traffic overloading, decrease the escalating problem of pollution, share the increased strain on services; education, health.

I urge the planners to take these objections in to consideration and listen to the observations regarding these plans from the people who live and work in these areas and see each day how the infrastructure is completely inappropriate to support such huge development in squeezed into one small area of the borough.

Attached documents:

---

Comment: MM41 - LPMM18/1471  Respondent: Claire Attard 17417633  Agent:

With regard to the rest of the modifications there are several points which are not acceptable.

MM41 - the transport strategy modelling, which is used by your plan, is inadequate. Specifically the fact that the delay in J10 of the M25 by Highways England RIS of at least two years will impact all development that relies on this scheme.

Attached documents:

---

Comment: MM41 - LPMM18/4246  Respondent: Valerie Golding 17422881  Agent:

MM41 LAND AT GARLICK’S ARCH POLICY A43

I OBJECT TO THE POLICY MM41 Land at Garlick’s Arch:

This land is GREEN BELT and it contains two areas of ancient woodland. To consider any form of development is wrong, but to propose to build 550 property should be resisted at all cost it is a 37% increase in the original proposal. Part of the area of the land is subject to flooding, the proposed development will also increase the vehicles on Send’s Roads by a minimum of a 1000. The Ancient woodland has protection under the NPPF section 118, unless the development is of national importance which this certainly is not. Even if the development does not require the removal of the wood. A development of that size will have a major impact. A recent report on the state of wildlife in the UK shows worrying trends, where as a local survey in Surrey shows that it is faring particularly badly. With the closure of Ripley school any large development would put Sends’ schools at breaking point and put excessive pressure on the medical centre. It would certainly go against the government’s claim that the GREEN BELT is safe in their hands.

MM27 MM41 MM42 and MM48 Transport Strategy
The amount of development proposed will bring major traffic problems to the area. Most properties have a minimum of two cars, so the developments proposed would add another 1540 cars to the roads of Send. This excludes the development proposed for the surrounding area.

Attached documents:

**Comment:** MM41 - LPMM18/2528  **Respondent:** Simon Wright 17423681  **Agent:**

I object to the following specific modifications to the Local Plan:

Policy A43, Land at Garlicks Arch, Send Marsh (Modification MM41)

I object to modifications MM41 Land at Garlicks Arch due to the following points.

An increase of 37% in housing numbers is excessive and will result in urban sprawl and the neighbouring villages merging into one another. It constitutes over development. These further additions to the housing numbers are not required.

It is an unsustainable location. It will undoubtedly cause traffic chaos on the minor surrounding roads. The A3, M25 and the roads through the villages of Ripley, Send and Clandon already suffer from congestion, anyone who lives in these areas will confirm that this is the case. Substantially more vehicle movements will result in even more congestion and greater pollution. Residents and the environment will suffer as a result.

This green belt land contains ancient woodland dating back to the 16th century, which should be preserved. There is no good reason to tamper with it with additional housing numbers.

An extra 150 houses means easily an extra 300 cars on the local roads, which cannot be accommodated.

This site is identified as being in a Flood Zone 2 and regularly floods during winter months.

This site contains land which is heavily contaminated by many years of shooting with lead shot.

The local school and medical facilities won’t be able to accommodate extra housing. It is already at maximum capacity (not helped by the feeble decision to close Ripley school).

Above all, the latest changes to this site have completely ignored the thousands of previous comments from residents (who know the area best of all) during the previous consultations.

Attached documents:

**Comment:** MM41 - LPMM18/2533  **Respondent:** Simon Wright 17423681  **Agent:**

I object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn’t cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.
Comment: MM41 - LPMM18/4087  Respondent: Reverend Ruth Broithwell 17424705  Agent:

MM41

My previous objection related in particular to the loss of Green Belt land. I now notice that you have ignored this and increased the number of intended houses.

- I object most strongly to the removal of green belt in this area.
- Despite assurances there is no doubt that this build will hugely increase the number of cars trying to enter the area on to the Portsmouth Road and the Clandon Road. This will cause heavy congestion - too much for the villages.
- Our schools and doctor's surgeries are already full - 3 weeks to gain an appointment locally!! This extra burden without sufficient infrastructure additions is too much for the locality to bear.
- The proposed site is used currently for shooting and is therefore contaminated by the lead shot which results from this sport.
- I do not believe that an increase of 37% over the original and objected to element can be justified.
- Transport - the proposed A3 changes and Clandon Road changes do not provide adequate support for those that would be incurred through this development suggestion. No assessment has been advised to us as loyal council tax payers regarding it. Roads towards London and Woking are very heavy every day already. This situation can only add journey time, increased pollution and gridlock within the villages environments.

Comment: MM41 - LPMM18/2617  Respondent: Gregory Webb 17424801  Agent:

I must object in the strongest possible terms to the latest version of Guildford Borough Council’s Local Plan

MM41 Land at Garlicks Arch

The increase in size of this development by 37%, which was too large in the last draft of the Local Plan, is just simply too much to absorb for the village of Send and in particular the residents of Burnt Common.

- Local infrastructure will not be able to cope with the c.800 extra cars present in the area following the construction of 550 extra homes
- Our schools and medical facilities will be broken by this development
- The character of the area will be completely changed by developing on this Green Belt land, for which no local resident has advocated
- This development will link up the villages of Send and Ripley removing their special identities, which can only represent over development in this part of the Borough

In addition, I understand the area is prone to flooding, contaminated by lead shot and part of the area constitutes ancient woodland. There cannot be many more inappropriate sites for a development. I believe the Council, in proposing this development, is failing its citizens in an egregious way that would leave a lasting legacy of failure.

Attached documents:
MM27, MM41, MM42 and MM48 Transport Strategy

The proposed Garlicks Arch, Alderton’s Farm, Clock Barn and Winds Ridge developments mean that 770 houses are proposed to be added to the current stock of 1700 currently in Send – an increase of 45%. This in itself is excessive and disproportionate in the context of Send’s size within the Borough. Send needs to be treated fairly and it currently seems as though the village is being singled out for development by the plan.

However, the huge increase in traffic that these developments, the industrial developments that are proposed in Send and the large developments at Gosden Hill and potentially Wisley/Ockham are not adequately addressed by the modifications referenced above.

A full assessment of the changes resulting from the proposed access on and off the A3 from Clandon Road has not been completed. **At present** residents of Clandon Road may wait more than 5 minutes to leave their drives during commuting periods. Would I ever be able to leave for work if these developments proceeded? The scale of development proposed in Send and Burnt Common, the limited capacity of local roads and the proposed introduction of new access to the A3 will be catastrophic for the local area and the Borough as a whole.

I most strongly urge the Council to rethink the Local Plan, stand up to central government if the planning policies for England are not appropriate for Guildford, and to provide a just and reasonable outcome for its citizens.

---

Comment: MM41 - LPMM18/4707  Respondent: Darren Moss 17426593  Agent:

**MM41-Land at Garlicks Arch, Send Marsh – Policy A43**

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years. This is a significant increase of 37% in the number of houses to be built when the original proposed number of houses received 7000 OBJECTIONS. This suggests a flawed consultation process! We are not being listened to at all!

Equally during this ongoing process there is already an ‘under the radar’ increase in housing numbers in Send. These are ongoing small ‘in-fill’ housing developments, two or three houses popping up in Send and it’s close proximity – these houses are not being taken of the target figures! We are also aware of other significant (40 and 60 houses) developments in progress in the area too! There are already too many houses in this area.

The ancient woodland that has stood for hundreds of years will be ruined once and for all. This over development will join Ripley to Send, and spoil the intention and foresight of our Green Belt Planners of many years ago.

This site is contaminated by many years of Clay Pigeon Shooting and is prone to frequent flooding. Up to a 1000 cars and between 1600 to 1700 extra people may will completely block the surrounding roads. It is almost impossible to move out of my drive onto the road if there are problems on the A3. Send regularly comes to a standstill if the A3 or M25 has a problem.

The area’s services (schools, roads, health facilities, sewage, water etc) are already at full capacity. At the public examination the figure for Guildford.B.C. housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated.

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year. Why is the requirement to build a vast majority of these houses in Send? We have a poor road system and NO train service!

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.
This latest data makes a mockery of G.B.C consultants figures which have always been very suspect. The Inspector and GBC must seriously reduce the housing need to reflect the true figures, and notably in our already very congested village of Send.

**MM27. MM41. MM42. and MM48-Transport Strategy.**

This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents, trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane.

This massive increase in traffic of all sorts heading to and from Woking along. Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

**Agent:**

MM41 – Policy A43 – Land at Garlicks Arch, Send Marsh/Burnt Common and Ripley – the increase of around 37% in housing provision for these sites is totally unacceptable, excessive and would lead to the amalgamation of the small Green Belt villages of Send and Ripley to the detriment of the character of the local area, furthermore at least one of the proposed sites is liable to flood and it should be noted that the owner of the land, a local farmer, ceased cultivating the fields as they flooded frequently. He was also unable to use the fields for grazing or livestock for the same reason and eventually let the fields as a game bird/clay pigeon shoot, resulting in the ground being contaminated with lead shot – a totally unsuitable environment for residential family development. As mentioned previously the additional traffic created would have a severe detrimental impact on the local road network, healthcare facilities, shops and schools.

Objections to proposal planning.

SEND

As a Send resident for 23 years I find the present proposals quite incredible as the amenities in this area could not cope with them.

MM41

I object to this increase in houses to 550 as already it can take me 10-15 minutes to get out of Sage Drive during rush hours & this will lead to more traffic. I also dont believe that the local schools or medical centre would be able to sustain this increase.
Comment: MM41 - LPMM18/5996  Respondent: Anya Williamson 17434689  Agent:

I write to object to the following development plans currently under consultation:

MM41 Land at Garlick’s Arch, Send Marsh, Policy A43: I object to the Policy A43 change for the following reasons: - No ‘exceptional circumstances’ exist to justify this use of Green Belt land - The number of houses proposed has actually been increased, ignoring the thousands of previous objections already made by local residents - The site is ancient woodland from the time of Queen Elizabeth 1 and cannot be replaced - The development would effectively join up the villages of Send and Ripley, defeating the very purpose of Green Belt land - It is currently a Zone 2 Flood area and development will make matters considerably worse - It will generate massive amounts of additional traffic that the local road network simply cannot cope with

Comment: MM41 - LPMM18/1164  Respondent: Steve Nicoll 17434785  Agent:

Having previously objected to the Local Plan I would also like to record my further objection to the main modifications particularly those that adversely affect Send/ Ripley and the surrounding areas. What I find quite frankly astonishing, is the complete contempt and disregard shown towards the residents of Send and Ripley. The additional properties and the addition of an on/off ramp from the A3 at Burnt Common would have a such an adverse effect on the quality of life of existing residents that to completley ignore our views is quite frankly shocking and it will be us that will have to suffer the long-term adverse consequences for years to come.

It is quite frankly astonishing that between the Planning Inspector and Guildford Borough Council, you have both demonstrated a complete disregard for the views from the Send residents who have raised their concerns and have attempted to engage in the process then to be simply ignored is shocking.

How can it be satisfactory that any local authority could contemplate increasing the population of a village by 45% and think that will not have an adverse effect on the quality of life of the existing and new residents that will all have to share the services that were already stretched. Quite frankly the road infrastructure is strained and adding another 700+ homes and related traffic, will just grind the village to a halt, just imagine the level of carbon monoxide and sulphur dioxide the residents of Send will be subjected to.

My objections to the relevant Main Modifications are;

1.MM41 Land at Garlicks Arch, Send Marsh, Policy A43
This wasn’t in the first local plan and there’s no reason why Send need this amount of housing so one can only imagine that Send has been selected to accept more than it should due to other parts of the borough not accepting their burden. Why can it be that the following points are being ignored?

•Increased from 400 to 550 homes of which 450 to be built in the first five years
•Increase of 37% in the number of houses proposed in the modifications is excessive.
•That 7000 objections to the previous lower number have been ignored.
•It is Green Belt containing ancient woodland.
•It will join up Send and Ripley and constitute over development
•The site is subject to frequent flooding and contaminated by lead shot
• At least 800 extra cars will block up the adjacent roads
• School and medical facilities will be strained to breaking point

Attached documents:

Comment: MM41 - LPMM18/1169  Respondent: Steve Nicoll 17434785  Agent:

5. MM27 MM41 MM42 and MM48 Transport Strategy
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Land at Garlick’s Arch, Send Marsh Burnt Common
The Main Modifications seek to increase the provision of the above site from 400 dwellings to 550 dwellings over the plan period. The updated trajectory seeks to increase provision in 2020/2021 from 50 dwellings to 65, 2021/2022 from 50 to 85 and a further 100 dwellings in 2024/2025. As far as we have been able to establish, there is no evidence before this Examination to demonstrate that this additional capacity can be achieved and the delivery rates proposed are realistic.

Allocation A43 states that the main vehicular access to the site allocation will be provided on the A247 frontage. We note that the proposed allocation of site A43 does not itself interface with the A247 but that in any event there are only limited opportunities for this access to be formed (given the presence of the existing dwellings to the east of the A247). However the issue of access into this site is compounded by the intention for significant highways improvement works to be undertaken at the A3 in this area. The boundary of the Garlick’s Arch allocation (A43) is generally contiguous with the land to be allocated (under allocation A43a) for new north facing slip roads to/from A3 at Send Marsh/Burnt Common. The Local Plan allocation A43a describes these works as “New northbound onslip to the A3 trunk road from A247 Clandon Road and a new southbound offslip from the A3 trunk road to A247 Clandon Road.” Given that the main access into allocation A43 is to be from the A247 (and the limited opportunities to achieve this), we consider that this will be reliant upon the timings of the highways works in this area.

In our submission, it must be that the main vehicular access into the Garlick’s Arch allocation is intrinsically linked to the works to be undertaken to provide the northbound slip from the A247 onto the A3 under allocation A43a. The significance of this is that Appendix C to the emerging Local Plan states that these works are to be undertaken between
2021 and 2027. Despite the phasing of this works, the Main Modifications expect that housing will be phased at Garlick’s Arch as follows: 65 dwellings in 2020/21; 85 dwellings in 2021/22; 150 in 2022/23; 150 in 2023/24; and 100 in 2024/25. On that basis, the housing trajectory envisages that a significant number (more than 10%) of all the dwellings at Garlick’s Arch will be completed before the works under allocation A43a have even commenced.

Whilst we understand that the promoters of the Garlick’s Arch scheme may be able to achieve a secondary access from the B2215 alongside the site’s northern boundary, we expect that the phasing of the slip onto the A3 from the A247 is likely to restrict the delivery of housing at this site, particularly given that this is to be the key vehicular access.

On the basis of the comments set out above, we consider that GBC has been overly optimistic about delivery rates at this site. The act of increasing its capacity will fail to resolve the Inspector’s concerns about delivery rates early in Plan period.

MM41 Transport strategy in the Local Plan relies on inadequate modelling. The delay of at least two years to the J10 Highways England RIS scheme will have a knock-on effect on all development that relies on this scheme (e.g. Site A35 - Three Farms Meadows; MM41 site A43-Garlicks Arch; MM44-Aldertons Farm).

There is too much reliance on A3 (Guildford) improvements that are beyond the council's control and have no fixed timescale.

Comments on MM for the Guildford Local Plan

I would like to make the following comments on your plans for the proposed sites:--:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I Object to the proposal to increase the number of homes on this site from 400 to 550.

Anyone who has actually visited the site will see how unsuitable it is.

I object to the number of homes being increased by 37%. With an average of 2 people per house and often as we all are realistically aware this means 2 cars. This also will mean a possible 1000 plus residents who will all require access to roads and amenities – medical facilities, schools, leisure!

The overwhelming and compelling evidence was strongly presented by various groups at the Council meeting. They stated very clearly how unsuitable the site was and the council’s representatives had few answers to these comments. We fail to understand how the Inspector has concluded that the site should be increased, and not scrapped is astonishing especially with all the evidence presented to him, unless of course this was his directive from the Council all along, regardless of evidence.
It is likely this will add over 750 additional cars to the traffic in the surrounding area. Access to both Guildford and Woking would add to the already present traffic jams at Send Dip and the Burnt Common Roundabout. Send Road is already the main access road between Woking and the M25 carrying heavy goods vehicles and articulated trucks. The road through Ripley is often already gridlocked at commuter times when traffic is heading to the A3 and some traffic wishes to turn out of or into Newark Lane!

There is nothing in the Local Plan about additional road infrastructure so the current small roads we currently have which are over-crowded already will simply not be able to cope. If the other proposed sites all go forward then these roads will simply gridlock making life a misery for everyone concerned. There is a serious safety angle to this problem as cars bunch and speed limits are broken to enable to get from A to B on time. The situation will be far worse during weekdays. The additional traffic which will result from the excessive building programme in Send will make the situation far worse and in all probability result in gridlock at this point as well as Newark Lane.

With the additional houses there will inevitably be families requiring schools for their children. There will be only one primary school for the villages of Send and Ripley since the recent closure of Ripley School. Secondary provision is also very restrictive, George Abbot is the nearest secondary school and for many years the children of Send and Ripley do not get into the school due to it being over-subscribed. The next nearest school is the Howard of Effingham and Hoe Valley which also currently do not take children from the villages. The secondary school of preference to the Council appears to be in Sheerwater because there is no alternative secondary school provision for the children currently living in Send and Ripley.

There are no plans to build any new schools, surgeries, dentists or amenities.

More houses will mean the current amenities will be over stretched and unable to cope.

I fail to understand these plans.

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

Comment: MM41 - LPMM18/2786  Respondent: B Lockie 17604577  Agent:

MM41 Land at Garlick’s Arch, Send Marsh, Policy A43

- 7000 objections to the previous number of houses has been ignored
- This is in Green Belt that contains ancient woodland.
- The proposed increase of 37% is far too much, within an area that is frequently congested, further adding to the already overloaded infrastructure.
- Send, Burnt Common and Ripley are distinct areas and this will join up these areas making the villages’ area more like an urban sprawl.
- This site can be frequently flooded with a culvert that takes water from the Surrey Hills in wet weather. With building on this site, particularly in such high numbers, where is the water to go? Flood prevention works undertaken 10 years ago to protect houses in Send Marsh are falling apart and disintegrating anyway but regardless of this, surely with such a high density of housing proposed, there would again be a risk to flooding to land and has already landed in our garden on occasions, new houses on this site would be even more at risk and how much lead shot in on the land?
- The Portsmouth Road and Send Road are the only main roads in the areas and these are often congested. Our other ‘roads’ are one track lanes. Building so many houses would mean at least 800-1000 more cars to block local roads. Even ideas of building another junction to the A3 would not alleviate traffic on local roads, and even more so when the A3 is gridlocked (which has happened several times in the past few weeks.)
- Already the schools and doctors are overcrowded with no spaces for more patients/children plus the parking for these is difficult at the moment and would be impossible for in excessive of another 2000 people (based on 4 people per household).
- Public transport is not great and does not run after 7.30pm in the evening so people need cars.

Attached documents:
MM27, MM41, MM42, MM48 Transport Strategy

- Not only are there implication for Send from the proposed developments at Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s but there are also knock-on effects with the proposals for Gosden Farm: the proposed Wisley/Ockham A3 and Clandon slip roads changes have not been properly assessed with thousands more vehicles crowding the areas and impacting on Send roads as well as traffic heading to Woking. Noise will increase along with pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/5554  Respondent: Talullah Scotland 17633313  Agent:

- MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm].
- There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:

Comment: MM41 - LPMM18/5835  Respondent: Thakeham Homes (Sir or Madam) 17976417  Agent: RPS Planning & Development (Mr Cameron Austin-Fell BA)

MM41 – Site A43 Garlicks Arch

Given that the purpose of finding additional allocations is to provide more certainty of delivery in the early years of the plan, increased delivery at Garlick’s Arch should not be taken as a given without proper justification. Additional housing on a large existing site does not meet the purpose of this exercise and therefore any additional development at Garlick’s Arch should be additional to the 550 additional dwelling allocations requested by the Inspector.

Secondly, in proposing this additional housing in addition to site A63 (Land West of Alderton’s Farm, Send Marsh Road, Send) the Council are effectively proposing that they will deliver 570 homes (100 homes at Garlick’s Arch at year 6) across 2 sites within a single village in the first 5 years of the plan. This appears unrealistic whilst avoiding market saturation and fails to consider the capacity of existing community infrastructure to which the Sustainability Appraisal states that ‘higher growth at Send/Marsh may be considered problematic on the basis that this area is already set to receive a considerable amount of housing’ but concludes this with ‘however it is again difficult to assign any particular weight to this consideration.’ (page 60)

Furthermore, both sites (A43 and A63) are at least partially dependant on the development of the A3 of which delivery timescales are uncertain. The new slip roads to the A3 at Burnt Common are immediately adjacent to site A43 and yet page 72 of the Sustainability Appraisal considers only the larger sites at Clandon Golf, Liddington Hall and Aaron’s Hill. Site A43 is a large site relied upon for the early delivery of homes and is reliant on upgrades to the A3. Alone and cumulatively with site A63 the site will have a significant impact on traffic congestion on the A3, which is not duly considered within the Council’s evidence base. The provision of community and transport infrastructure can cause significant delays to development to which the Council have given no weight. The delivery of these sites is therefore
uncertain and they cannot be relied upon to accommodate the Council’s shortfall in the early years of the plan. Their inclusion would therefore make the Plan undeliverable and therefore unsound.

In addition, no reference is made to the additional SANG requirement needed to accommodate the additional homes proposed at site A43. In addition to the requirement to protect the Thames Basin Heath Special Protection Area, the development of both this site and site A63 will impact on the Papercourt SSSI which lies within 400m of the sites. Particularly if the SANG capacity above is not provided for these developments could place additional pressure on the most significant habitat that is in close proximity to any of the omission sites. Evidence should therefore be provided to demonstrate that the site is capable of accommodating this additional area of SANG in order that the sites development does not harm the SSSI and to demonstrate accordance with emerging Policy P5 (Thames Basin Heaths Special Protection Area).

**Comment:** MM41 - LPMM18/3  **Respondent:** Mr Paul Broughton 20364545  **Agent:**

I find it deplorable that despite all of the objections to the development of Garlicks Arch you have seen fit to increase this from 400 to 550 homes. There is not enough infrastructure to support this level of development - roads, doctors, schools etc. Your desire to turn Ripley, Send Marsh, Send and Burnt Common into 1 village is destroying this part of the borough. You are doing away with the reason why people want to live here. The destruction of this age of woodland, and the biodiversity this supports is unwarranted. The fact you can take land out of green belt and then build on it may be legal but is immoral.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/49  **Respondent:** Mr James Jackson 20511297  **Agent:**

This proposal is excessive, it is devastating as it is green belt containing ancient woodland.

Excessive amount of vehicles, where will they all go?

no school and medical facilities, Send is almost full, how short sited to close a primary school in Ripley

**Attached documents:**

---
I hereby reject the development proposals of the GBC as detailed in the "High Noon for Send" action newsletter dated 25.9.18. I am also writing on behalf of my grandmothers address. My name is Christopher James Barlow, This address is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/ Data Protection Act 2018]

Send is primarily a green belt area and should be treated as such. Send Marsh also contains ANCIENT WOODLAND which must not be developed upon. I do not appreciate the GBC’s attitude in handling this matter.

I also object to MM27, MM41, MM42, M48 due to the traffic implications that are going to several impact Send barns lane and send road. The noise and pollution will be unacceptable.

I object to MM41 land at Garlicks Arch, Send Marsh. policy A43.

This is a massive increase on proposed houses. 7000 people have already objected to this. There is ancient woodland that will be destroyed.

I would like to object to proposed changes in my village, Send. The reference numbers are MM41, MM42, MM44, MM9, MM27, MM41, MM42 and MM48.

The proposed developments will constitute over development and the road infrastructure will not cope. The traffic around Send and Ripley is bad already. Much of the developments will be on Green Belt land.
Comment: MM41 - LPMM18/124  Respondent: Mrs Nicola Carol Brown 20546209  Agent:

I am writing to object to modifications proposed to the local plan following the Inspector's report.

MM41 Policy A43

I find it extraordinary that, notwithstanding the 7000 odd objections previously made, this modification proposes an increase in housing allocation. The objections I have already made still apply and with even greater urgency in view of this proposed increase. Specifically I object to:

- the affect on Green Belt and the ancient woodland;
- inappropriate and excessive development affecting the nature of the villages of Send and Ripley causing great pressure on the roads and services such as schools and GP surgeries. Send and Ripley will effectively become conjoined;
- flooding problems at the site, which will further exacerbate flooding problems to surrounding areas;
- the increase in traffic will have a negative impact on the already busy local roads.

Attached documents:

Comment: MM41 - LPMM18/129  Respondent: Mrs Nicola Carol Brown 20546209  Agent:

MM37, MM41, MM42 and MM48

I am extremely concerned about the traffic implications arising from the proposed developments and it is hard to see that proposed changes to the A3 and Clandon slip roads would help. The huge increase to road use with resultant queues and pollution is of grave concern.

Attached documents:

Comment: MM41 - LPMM18/355  Respondent: Mrs Suzanne Loggia 20550209  Agent:

I am writing to strongly object to the MM41 and MM42 proposed building plans.

Firstly it is an excessive amount of homes your proposing to build and this area does not have the correct infrastructure to cope with these properties; i.e we have just lost Ripley 1st School and surrounding other schools are completely full, Doctors and medical facilities are strained already. Traffic and pollution is already horrendous in this area and we are often gridlocked if an accident should arise on the A3.

The Green Belt contains ancient woodland which I feel should be protected!

The site frequently floods and I believe to be contaminated by lead shot. The land also contains electricity pylons and there is a clear association between living close to power lines and an increased risk of cancer. International studies have shown that children living within 50 meters of power lines have an increased risk of developing acute Leukemia!

Attached documents:
Comment: MM41 - LPMM18/158  Respondent: Miss P McAleese 20554817  Agent:

I object to Policy A43. Land at Garlicks Arch.

- There is no proven need for additional 400 new houses on top of the 13,860 already proposed by the borough, and now they have increased that to by 37% to 550.
- The Health Surgery at Send cannot cope, the local schools cannot cope. The entire plan is ill conceived.
- It continues to ignore over 7,000 of previous objections.
- There is no proven demand for Travelling Show people plots in this location.
- There are no “exceptional circumstances” exist for removing this site from the greenbelt.
- The land is subject to frequent flooding and is currently flood Zone 2 allocation.
- It will join the villages of Send and Ripley and defeat one of the intended purposes of the greenbelt.
- The roads in Send cannot cope and this will add at least 800 extra cars.

Comment: MM41 - LPMM18/165  Respondent: Matthew Woods 20560225  Agent:

I am writing to strongly object to the plans for the local area around Send and Ripley. I live in Send and have done for the past 5 years. I also am hoping to move house, staying within the villages. I am disgusted by the suggestions for the local area and feel as though it would destroy the environment both in around both Send and Ripley.

First, I would like to object to the planning on Garliks Arch. (Reference number MM41) This is Green Belt land which contains ancient woodland. We should be doing all we can to preserve and protect our environment and not destroying what's left of it. Regardless of the fact that it is Green Belt land, the extra volume of traffic that this would produce is ridiculous. Even with the impending and expected expansion of the M25/A3 junction, with all the 'suggested' developments in and around the local area, the roads would not be able to cope with the extra traffic. I am also most disappointed that over 7000 objections have been ignored. People's opinions are extremely important, especially if they live in the local area. I feel extremely let down by Guildford Borough Council with regards to this development.

Comment: MM41 - LPMM18/294  Respondent: Linda Boardman 20579745  Agent:

It is obvious that with the above policies & strategies are still reflecting directly from what has gone before; amending & increasing on the Local Planning Foot Print. These changes are shown in shaving bits off here and adding bits to there.
These amendments:

Still disregards all technical impacts on current & future structures. Most structures sit on a deep clay base which needs peculated ground water to function as a foundation base.

Tweaking weak infrastructures, no way puts in place any future proofed infrastructures.

Increasing these capacities will greatly increase all impacts on enviroment. Not all of which is yet to be fully understood or been considered.

Concreting over "Green Belt" is just not on, now or anytime in the future. We all complain about the forests in South America being cut down, along with plastic waste; this is no different.

The impact of such large developments, will swamp Send & all surrounding areas. If Wisley was a no no; then these proposals are doubly bad.

So what part of NO, does the current dominant political power not understand?

It seems as if the first judgement, common sense (Wisley) went against the current political-monied power houses. How strange that with a new judge conforms now to their wishes. How did all this happen?

Stop faffing about! Ask the local populous "What they want to happen by holding a Local Referendum." Just like Switzerland.

Comment: MM41 - LPMM18/361  Respondent: Donna Carley 20583841  Agent:

Object to the following:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

The increase from 400 to 550 homes of which 450 to be built in the first five years

- It is Green Belt containing ancient woodland
- An increase of 37% in the number of houses proposed is excessive
- 7000 ejections to the previous lower number have been ignored
- It will join up Send and Ripley and constitute over development
- The site is subject to frequent flooding and contaminated by lead shot
- At least 800 extra cars will block up the adjacent roads
- School and medical facilities will be strained to breaking point

Attached documents:

Comment: MM41 - LPMM18/365  Respondent: Donna Carley 20583841  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/408  Respondent: Mrs Lesley Peed 20589281  Agent:

MM41 This is Green Belt land containing ancient woodland. Its destruction is irretrievable and it will not be there for future generations to enjoy. Ripley and Send are, and always have been two distinct villages with their individual character. This development will join them together. The infrastructure of the villages in terms of school and medical facilities will not cope with the planned 550 homes and an extra around 800 cars will clog already congested roads. The traffic impact on Send of the planned developments for Clockbarn in Tannery Lane, Garlick’s Arch, Burnt Common and Alderton’s Farm would be completely unacceptable. Local roads are already choked with traffic and the ensuing pollution levels and delays. These concerns have not been adequately addressed.

Attached documents:

Comment: MM41 - LPMM18/423  Respondent: Mr Alex Beames 20602977  Agent:

The increase from the present number of dwellings is far in excess of that which is reasonable. It will seriously detract from the character of the area and will unreasonably increase traffic. The area is Green Belt and contains ancient woodlands, will most likely fill the present 'gap' between Send and Ripley, thus making them impossible to differentiate. The existing social infrastructure, doctors, schools, shops and so forth will not be able to cope with such an increase in demand. I am surprised that a figure above 100 dwellings has even been suggested for this site due to the absolute knowledge that all new properties are not adequately served by public transport and the absolute reliance on personal vehicles as a form of transportation.

Attached documents:

Comment: MM41 - LPMM18/584  Respondent: Mrs Kathy Mylet 20610209  Agent:

An increase of nearly 40% in the proposed number of houses is ridiculous.

Garlicks Arch contains ancient woodland and is classed as Green Belt. This development would lead to Ripley and Send being overdeveloped. The knock on effect would be an increase of approximately 1000 cars on the local roads, insufficient doctors at the local Medical Centre and now that Ripley School has closed, not enough places at Send Primary School for the additional children that would want to go there.

Attached documents:
I wish to register my objections to the increased number of houses proposed to be built on this site.

In spite of my earlier objections regarding housing adjacent to a six lane highway, you now see fit to increase further those persons who shall be effected by the known dangers to children’s health from noxious fumes.

Attached documents:

---

I would like to object to the large increase in the number of houses proposed in the Send area. Please find below my reasons for objection:

**MM41**

An increase in the number of houses of 37%

Despite a large number of objection to the previous lower number this has been completely ignored.

It is green belt containing ancient woodland.

It will mean that the distinction between Send and Ripley will be lost.

The site has a know history of flooding.

A large number of extra cars will add to the already congested local roads.

With the closure of Ripley school where will all the extra children go as Send school is already full?

It is difficult to get an appointment at the Send Surgery so where will all the extra residents go for medical treatment?

Attached documents:

---

I am writing to comment on and object to the modifications to the local plan as follows.

**MM41**

An excessive increase in the number of houses in the area is unsustainable with local resources and despite previous objections, this is still being considered. It will lead to the villages of Send and Ripley having their own identities and will become merged. One of the attractions is the woodland, and the effect of the removal of some of this may lead to localised flooding. In addition to this, the already overloaded roads in the area will become even more gridlocked at peak times. The schools and doctors surgery are already at capacity and the increase in restricted road blockages will be caused by the transportation of children to and from school.

Attached documents:
This strategy, although considering the access onto the A3, does not consider the impact on local roads. As it is, these roads are already heavily congested and leads to poor air quality for residents. The slips roads may well be an improvement, but it is not offset by the proposed changes listed elsewhere.

These roads are not policed for speed and residents are already subjected to high noise levels through speeding traffic and high speed motorcycles. The congestion may also lead to an increase in accidents and a further slowing down to the response time of emergency vehicles.

Attached documents:

With regards to the proposed plans, I am writing to oppose these on the following grounds.

The local amenities will not accommodate this increase in housing as well as the impact on local traffic. This will lead to gridlock on local roads as well as an increased risk of flooding by the loss of woodland. There would also be no real distinction between the villages of Send and Ripley, causing a loss of identity.

Attached documents:

The planned road strategy, which allows for more and safer access onto the A3, will only serve to cause more congestion on local roads which are already overloaded at peak times. As these roads are rarely policed, this already leads to speeding and pollution to local residents.

Attached documents:

Please see below my objections to the main modifications:

An increase of 37% in the number of houses proposed is excessive

7000 objections to the previous lower number have been ignored
It is Green Belt containing ancient woodland

It will join up Send and Ripley and constitute over development

The site is subject to frequent flooding and contaminated by lead shot

The East Clandon Stream which runs through the site is shown as a high-risk flood area by the Environment Agency and any development on the site will increase water run-off endangering properties downstream in Send Marsh which are already at risk

At least 800 extra cars will block up the adjacent roads

School and medical facilities will be strained to breaking-point

With Alderton’s (120), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure

Attached documents:

Comment: MM41 - LPMM18/675  Respondent: Stephen Harnor 20624417  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM41 - LPMM18/696  Respondent: Alastair Graham 20625825  Agent:

I wish to strongly object to the following excessive developments which are planned for Send:

**MM41 Garlicks Arch**

The building of 400 new houses at Garlick’s Arch, Send March, is an unacceptable intrusion on Green Belt land and yet you are now proposing to increase the number of houses to 550 which makes the Green Belt invasion even worse. This will effectively join up Send and Ripley which comprises over-development resulting in urban sprawl and a massive increase in cars on already over-stretched roads in the neighbourhood, particularly the Portsmouth Road through Ripley to the A3

Attached documents:

Comment: MM41 - LPMM18/700  Respondent: The Clandon Society (Eric Palmer) 20626273  Agent:
The Clandon Society is the Residents’ Association of the villages of East and West Clandon.

The Association is restricting its comments in this consultation to matters which could directly affect our residents.

The Association is very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Association expressed its concerns in the strongest terms, pointing out the inadequacies of the road. The major modifications now proposed to the Plan will bring additional pressure on this road.

The Association welcomes the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 (MM48) and the amount of development proposed in the area nearby. (MM41, MM42, MM44, MM35.) However, residents are of the view that the provision of £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the likely traffic.

Residents do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available, if indeed it is technically feasible.

We believe that in a few years time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs when traffic diverts because of congestion on the A3. This was pointed out in detail in previous submissions by the Association, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint but this is not a unique problem viz. the widening of the Boxgrove Road bridge. It is already the intention to build a station next to the Merrow Lane bridge.

The £1million funding could with advantage be used to make the A247 safer.

Why do we believe that traffic will increase significantly?

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic. (MM42).
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247. (MM41).
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh. (MM44).
4. The development of 1800 houses at Gosden Hill. (MM35).
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. (A43a). The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247-potentially an easier route than any existing.
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic- presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.
Problems with the West Clandon section of the A247

The Association reiterates its belief that the A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 S-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump
4. The site lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and in places the narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

Comment: MM41 - LPMM18/726  Respondent: Christina Reeves 20634753  Agent:

This e-mail is to show my objection to the Main Modifications to planning in and around Send. I accept that some new homes need to be built but without new roads and supporting infrastructure the modified quantities will cause gridlock in Send.

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

This is Green Belt land which has old woodland on it. There would be loss of habitat for wildlife. In effect Send and Ripley will join up and constitutes over development.

This site can and does flood.

To increase the proposed number of dwellings by 37% is excessive. Previously 7000 objections were provided against this development, these have been ignored!

The local schools and medical practice will not cope with the extra demand. The roads will not cope with the extra vehicles.

Attached documents:

Comment: MM41 - LPMM18/731  Respondent: Christina Reeves 20634753  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
The traffic implications for the above proposed developments added to nearby Gosden Hill, Wisley and Ockham have not been properly addressed by the A3 changes and the Clandon slip roads. Guildford Borough Council offer no proper assessment of the combined traffic on Send Barns Lane and Send Road when hundreds more cars use the roads every day, causing more pollution, noise, delays and gridlock.

Attached documents:

---

**Comment:** MM41 - LPMM18/748  **Respondent:** Mr. David Minnett 20636033  **Agent:**

A 37% increase in the proposed number of houses for this development. Guildford Borough Council must listen to the local residents. 7000 residents previously objected to this proposal and have now have been ignored as this increased proposal is the table again. The Green Belt must be protected vigorously by GBC [on behalf of it's residents who they are meant to represent](#). More traffic and more strain on the local infrastructure. This is not what the local residents want.

Attached documents:

---

**Comment:** MM41 - LPMM18/758  **Respondent:** Emanuele Loggia 20638273  **Agent:**

I strongly object to the following proposed planning Sites:

- MM41
- MM42
- MM44

Regarding MM41; proposed 550 homes is ridiculous! There are huge electric pylons in the fields! 100’s of studies worldwide have shown that living next to high voltage power lines and other parts of the power transmission network increases your risk of cancer and other health risks. I believe that the fields are contaminated with lead shot as there are regular shooting meets! This land is green belt with ancient woodland and feel strongly that this land should be kept this way. This land frequently floods and with noise pollution from the A3. This morning 15/10/2018 we experienced heavy rain fall in the night which caused major disruptions on the A3 in both directions and the surrounding Ripley, Send, Clandon and roads into Guildford were grid locked! We do not have infrastructure to cope with more cars, housing, schools, and medical facilities.

Attached documents:

---

**Comment:** MM41 - LPMM18/787  **Respondent:** Elissia Loggia 20638529  **Agent:**

I am writing to strongly object to:

- MM41
- MM42
Firstly, regarding MM41 plans to build 550 new homes at Garlicks Arch. I believe these ignoble proposals will destroy the place I have grown up and lived in for 18 years. The proposed site is Green Belt land which is visible from my bedroom window. Not only would building homes here ruin the tranquil setting associated with my quaint village that attracts many dog walkers, it would also ruin the environment and array of wildlife which resides there. At least an additional 800 cars would congest Send and Ripley’s roads and farm roads - which are already in a horrific state, but that's another issue! Furthermore resulting in an alarming amount of additional pollution accumulating which would be harrowing on the environment. The A3 runs adjacent to the proposed area, there is already enough pollution in this area as it is! Moreover, not only would these ridiculous proposals impact the environment and wildlife but also put potential residents in danger. The land has multiple pylons running through it, meaning residents would likely be bombarded with dangerous EMFs (electrical magnetic fields/a form of radiation) which have indicted in numerous medical studies to increase the risk of several kinds of cancer and other diseases. I cannot comprehend why you would want to risk the good health of a community for the sake of an investment opportunity that would overpopulate my village and strain the educational and medical facilities which are already at breaking point.

I firmly suggest you re-evaluate these fatuous proposals.

Attached documents:
We require any future development proposals to include an 8m wide minimum, undeveloped buffer zone (measured from bank top) on both sides of the river. Bank top is defined as the point at which the bank meets the level of the surrounding land. We welcome Policy MM29, and support the incorporation of paragraphs 4.6.48a and 4.6.48b into the plan.

We do however recommend that Policy A43 recognises the main river as a constraint at the site, and acknowledges the importance of providing a suitable buffer to it through any development proposals. This could be included in bullet point (4) of “other infrastructure”: Green corridors and linkages to habitats outside of the site, and significant regard to the river and the ancient woodland within the site. Alternatively, the protection and enhancement of the river corridor could be included as a suggested opportunity at the site.

**Final comments**

Once again, thank you for contacting us. Our comments are based on our available records and the information submitted to us.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/810  **Respondent:** Clive Sewter 20642081  **Agent:**

**I object to MM41 Land at Garlicks Arch, Send Marsh, Policy A43 because:**-

*An increase from 400 to 550 homes is excessive.*

*There were 7,000 objections to the previous LOWER number, which have been ignored.*

*Green Belt should be honoured. It is being ignored or the rules ‘bent’.*

*Overdevelopment will result in an increase in demand for water which is not viable and cannot be sustained.*

*The proposed area is a necessary and essential flood plain.*

*The increase in vehicles will block roads which already subject to becoming gridlocked.*

*There simply are not enough school places and medical practices to support additional population.*

**Attached documents:**

---

**Comment:** MM41 - LPMM18/814  **Respondent:** Clive Sewter 20642081  **Agent:**

**I object to MM27 MM41 MM42 and MM48 Transport Strategy because:**-

Currently, heavy traffic from the A3 already heads up to Woking through Send and even small roadworks cause major traffic jams, particularly at rush hour. This will be exacerbated when the proposed changes to the A3 improvements take place. With the extra industrial and housing developments in the areas mentioned above, Send will become regularly gridlocked.

**Attached documents:**
Comment: MM41 - LPMM18/821  Respondent: A.A.D Andrews 20642561  Agent:

This is an objection to Guildford Borough Council Local Plan

I object to MM41 Land at Garlicks Arch Send Marsh Policy A43

Increasing 400 to 530 homes is an increase of 37%. It is Green Belt containing ancient woodland that [unreadable text] up nitrogen dioxide levels of which are already dangerous - being a health hazard, especially for children. We need more schools and doctor surgeries, but you just close schools down. There are no community services. You will be pushing there to breaking point. It floods and has lead shot contamination.

Attached documents:

Comment: MM41 - LPMM18/826  Respondent: A.A.D Andrews 20642561  Agent:

MM9 Green Belt Policy, MM27, MM41, MM42 and MM48 Transport Policy - I object

I think the planning committee pays no attention to Green Belt and public transport they just want [unreadable text] increased noise, nitrogen dioxide pollution, delays and gridlock plus there are other developments coming up. We need less houses and more amenities. These plans are rubbish.

Comment: MM41 - LPMM18/849  Respondent: Send Parish Council (Send Parish Council) 20644225  Agent: Tibbalds Planning and Urban Design (Richard Crutchley)

Representations from Send Parish Council (ID: 15667489)

Background

Send Parish Council has made representations throughout the Local Plan process and appeared at the Examination in July 2018. This involvement has largely focused on the allocations made for housing and employment purposes within the parish of Send.

Send Parish Council wish to make further representations in response to the Main Modifications, which propose a number of changes to the plan that have an impact on Send parish. These changes are:
• an increase in the number of homes on the Garlick’s Arch allocation from 400 to 550 (MM41);
• the addition of policy requirements to mitigate the effect of development at Garlick’s Arch (MM41);
• an increase in the minimum size of the industrial allocation at Burnt Common warehouse, London Road (MM42);
• the allocation of the land west of Alderton’s Farm, Send Marsh Road, for 120 homes (MM44).

Context

Housing Projections, September 2016
Much of Send Parish Council’s concerns and representations over the duration of the Local Plan’s preparation have centred on the level of development proposed in the parish as a relative proportion both of that across the borough and in relation to other parishes in Guildford. Send Parish Council have consistently questioned the reasons why Send has been thought of as a suitable location for development, given its lowly position in the hierarchy of suitable sites for development, surrounded by green belt. The Examination explored this further and, based upon the evidence available at the close of the Examination, it seems apparent from the Main Modifications that the distribution of housing sites across the borough, including the sites at Send, remain appropriate in the view of the Inspector.

ONS projections

The release of the Office for National Statistics (ONS) projections in September 2018, following the close of the Examination, has thrown many of the assumptions about household growth (and therefore need) into question across many local authorities.

Particularly, in the case of Guildford Borough, the ONS figures predict that Guildford would have an additional 4,662 households by the end of the plan period, compared to the previous forecast of 7,717 new households. Guildford could now expect to have around 5,500 fewer households at the end of the plan period that was predicted by the data that formed the basis of the debate at the Examination.

The decrease in the number of homes required within Guildford has serious implications for the distribution of housing land and for the housing strategy more generally. As Send parish is expected to take a particularly high proportion of homes for a rural village, the Parish Council believes that the lower expectation of household growth provides an opportunity to think again about the sites that are essential and which should be amended or removed to in order to maintain the character of the settlements within the parish.

This changed context provides an underlying reason to challenge the changes proposed for Send parish through the Main Modifications.

Further, in light of the changed context in respect of housing requirements, some elements of the new text – for instance those parts of para 4.1.10 in MM2 referring to ‘step changes in housing requirement’ already seem out of date.

Main Modification 41

In light of the changed housing requirements discussed above, the Parish Council is of the view that the allocation at Garlick’s Arch is no longer required. It is recognised, however, that the Main Modification relates only to the increase in residential units at the site, and the Parish Council object to this on the same basis. Increased numbers of housing also brings greater pressure on roads and other infrastructure and village services, particularly schools and health services. It is still not clear in the plan how this will be addressed.

The Parish Council welcomes the acknowledgement, in the addition of wording at MM41, of the argument that Garlick’s Arch is poorly related as a site to both the existing built form of the villages and the services provided by Send. The proposed wording begins to address this by seeking clarity over the provision of transport infrastructure at this site.

Whilst criteria (a) to (c) are fairly clear, (d) and (e) are not. There is no question in the Parish Council’s view, that non-vehicular connections to the village (as well as Burnt Common and Clandon) are necessary if any strides are to be taken towards sustainability and integration. The inclusion of ‘proportionate’ implies that necessary mitigation may not be provided in full by the developer, which raises the prospect of full mitigation not being achieved; indeed the risk that no mitigation occurs because of the absence of all of the funding required to achieve it is a distinct possibility. The Parish Council is concerned at the lack of certainty presented in the plan regarding this and would seek further clarification. It is noted that Appendix C contains no modifications in respect of this.

Criteria (e) is vague. The wording is open to interpretation. It is not clear which ‘otherwise adverse material impacts on communities and the environment’ the plan has in mind and therefore provides no certainty to the developer or the community, and no basis for the Council to assess the extent of contribution (necessary and proportionate or not) that may be required.
[As ‘villages inset from the green belt’, Send and Send Marsh are at the bottom of the spatial hierarchy, defined as Tier 10 within the Sustainability Appraisal. This tier provides 5% of the overall supply, but the Garlick’s Arch site accounts for around 2% of Guildford’s supply. Send parish accounts for 56% of proposed development supply in villages (based on the table at MM2).]

Comment: MM41 - LPMM18/852  Respondent: Send Parish Council (Send Parish Council) 20644225  Agent: Tibbalds Planning and Urban Design (Richard Crutchley)

Traffic implications of additional development introduced by the Main Modifications

At present the Parish Council is working with Surrey Police, Surrey County Council Highways and the local school and medical centre on Send Barns Lane to develop options to deal with the significant highway problems (speeding, volume, parking, pedestrian / cyclist safety) in the village. The A247 is presently a very busy road and this should be considered before local plan allocations are brought forward.

Send Parish are unclear on the cumulative traffic implications of the concentrations of development being proposed by MM41, MM42 and MM44. It is noted that the landowner at Garlick Arch considers that there are benefits to be had from the slip roads in terms of the impact upon the A247, particularly in respect of southbound movements. It is not clear where this southbound traffic is redistributed to. The benefits to Ripley are evident as traffic is redirected to the Burnt Common junction; the benefits to Send seem intuitively less apparent.

Additional housing at Garlick’s Arch (MM41) and a new site at Alderton’s Farm (MM44) cause further concern. It is not clear whether the impacts of an open ended industrial allocation at Burnt Common (MM42) have been factored into this traffic assessment, or indeed whether other smaller housing allocations and the traffic expected of the expanded Strategic Industrial Location at Tannery Lane within Send have been modelled. Notwithstanding some new references to transport strategy at Garlick’s Arch and Burnt Common warehouse, the absence of alternatives to the car bring into question the overall strategy and approach to the parish.

The Sustainability Appraisal raises this directly; it recommends that clarification be made regarding the risk of severe traffic congestion in Send (para 10.4.6) without really explaining how this fear arises (beyond the extent of development proposed) and without a clear indication of where the recommendation has been actioned within the plan or the plan-making process.

Work must be undertaken to determine the additional cumulative highway impacts of all the development in the parish (on all roads infrastructure), having regard to the overuse of the existing road infrastructure.

Attached documents:

Comment: MM41 - LPMM18/923  Respondent: Duncan Speight 20654049  Agent:

I am writing to you to object to the planning inspectors report relating to the development of Send Village and the surrounding area, in particular MM41, MM42, MM44 and the related impact on the Green belt covered under MM9 and the transport strategy that impacts the above sites and site MM27.

Upon reading the outputs from the latest report it would appear that rather than listening to and addressing local residents’ concerns raised in the previous consultation periods you have just ignored those and continued to drive the plans.
forwards. In addition, GBC has significantly increasing the sizes of the Garlicks Arch development, doubled the industrial and storage development in Burnt Common and reinstated the Alderton’s Farm development which was previously deleted due to previous objections.

I would also seriously question that accuracy of the Public Examination figures (Policy S2) for Guildford Borough Housing, recommending 789 houses are built each per year. Reviewing the Barton Wilmore figures (suggesting 431 houses a year) and the ONS population forecasts suggesting the development of 460 houses a year across the borough. These well-respected authors reports suggest the need for new houses in this specific part of GBC has been significantly overinflated

The plans GBC lays out in the report do not support the policy for the protection of the Green Belt. Furthermore, the subjective test proposed puts the Green Belt at considerable risk and negates Green Belt protection. This means any land on the edge of the village could be picked off for future development. This point is clearly of serious concern to local residents

Send Village and the surrounding area already suffers from significant traffic congestion. Traffic on the local roads is gridlocked in busy periods. It is clear from the plans that the suggested remedies do not adequately address the significant increases in traffic we will see if these developments are allowed to go ahead. In particular, Send Barns Lane, Send Road and Broadmead Road will not cope with the increased traffic heading in and out of Woking every day. Not only will the increases in traffic cause significant delays but will also impact residents with increased noise and nitrogen dioxide pollution levels.

As the people that live and experience the local area every day we are well positioned to provide an accurate point of view on the impact developments of this size will undoubtedly have on the area. On that basis I hope you give this issue the time and attention it deserves.

Attached documents:

Comment: MM41 - LPMM18/964  Respondent: Mr Tom Holwell 20658625  Agent:

MM41 Garlicks Arch. Why is the plan for 500 homes when over 7,000 objections were received for just 400 homes. The local infrastructure and the lack of plans to develop nearby roads and services can not sustain 400 homes let alone 550. It is quite apparent that you don't care for the views of local people or the quality of the environment that you will be creating for residents (both existing and new)

Attached documents:

Comment: MM41 - LPMM18/978  Respondent: Carmen Niblett 20658817  Agent:

I would like to very strongly object to the following Planning Applications.

MM41 Land at Garlicks Arch  Policy A43..... the 7000 objections to the previous 400 houses have been ignored and now the proposal is even higher 550, this is totally unacceptable.

This is Green Belt that contains ancient woodland and also if the existing school and medical facilities are only just sufficient to the current existing local needs how will they cope with the extra residents. The road are extremely busy at key hours and can barely cope with the current traffic.

Attached documents:
Comment: MM41 - LPMM18/983  Respondent: Carmen Niblett 20658817  Agent:

MM27 MM41 MM42 MM48  Transport Strategy

The traffic implications for Send of the extra traffic generated by Garlick's Arch, Burnt Common, Clockbarn and Alderton's will have a totally detrimental effect in the area which already is over used by traffic from A3 and Clandon and Woking commuters.

GBC is offering solutions on paper but for the last 20 years of people and car growth in that area has been ignored by GBC.

I have lived in the Send area for 35 years and I can categorically confirm that nothing has changed in that time, except for the replacement of the bridge at the end of Send Road, which now permits higher number of articulated lorries to travel along the Send Road to Ripley, the A3 and Clandon (as the old bridge couldn't cope before with the weight or width of these lorries).

This increase traffic through Send put children, vulnerable people and adults at risk of accidents when crossing the road to either go to school or to the shops or for a walk.

The traffic on the Send Barns Lane and Send Road are usually at a stand still, especially at key times, when children are walking to school. Air pollution is a terrible danger to our children and we should be minimising this risk instead of adding thousands of more cars to our roads.

I would request that you supply details that show you are being fair and reasonable to all village councils in the Guildford Borough in a form that shows existing number of houses in that area and the number of new applications (as a total number of houses) and express this as a percentage %.

This would then show that the GBC are being fair across the whole county. Instead it will show that GBC are being totally unfair and overburdening SEND village with their insistence in putting all their "eggs" in SEND's basket.

Attached documents:

Comment: MM41 - LPMM18/990  Respondent: Mrs E.E. Wheatley 20659073  Agent:

I object strongly to MM41 - Policy A43

A) The increase in the number of houses is excessive

B) Previous objections ignored.

C) Ancient Woodland on Green Belt Land should not be destroyed.

D) Traffic congestion will be a problem especially considering Highways plans for M25 junction 10. Do different departments confer or even communicate?

E) Facilities like medical provision and education will be insufficient. Again re education, the closure of Ripley School does not make sense if these plans go ahead.

F) Send and Ripley must survive as villages and not become a suburb of Guildford.

- There has been significant objection in the past to any development but these 7000 objections have not been accommodated, and so it is not appropriate to then propose further additional development

- The space between Ripley and Send will disappear, essentially turning two small villages into a small single town and constitute overdevelopment

- This is a floodzone with lead contamination and not appropriate for development

- As per my objection to A63, above, the infrastructure is not sufficient to support the additional households. The roads already suffer significant congestion, there is extremely limited opportunity to alleviate these pressures, and any further development will make living and working/commuting in the area unviable on a day to day basis

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1096  **Respondent:** Marc Lippiett 20664481  **Agent:**

**MM27, MM41, MM42, MM48 - Transport Strategy**

- Traffic congestion is a significant issue in the area (Send, Ripley and Woking) and there are currently significant delays caused every day on the way to school and work. The current plans do not provided clarity on how these critical issues will be avoided.

- Supposing that the traffic congestion issue can be mitigated in an acceptable way, there will be no avoiding the noise and air pollution and associated impact on the quality of life for local residents

**Attached documents:**

**Comment:** MM41 - LPMM18/1266  **Respondent:** Alstair Haxton 20676417  **Agent:**

The following are my objections to the proposals for development around Send and Send Marsh

**MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

The villages of Send and Ripley will no longer be separate, due to this proposed over development.

The 37% increase in houses is excessive and previous objections to a lesser number have been ignored, The increase in cars will block already busy roads, there are no school places as the local school in Ripley has already closed, and the GP surgery is already under excessive strain

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1271  **Respondent:** Alstair Haxton 20676417  **Agent:**

**MM27, MM41, MM42, MM48 Transport Strategy**
The excessive increase in cars with resulting extensive delays, gridlock, noise and nitrous dioxide pollution have not been properly assessed.

Attached documents:

Comment: MM41 - LPMM18/1698  Respondent: Mr Alan Sussex 20687457  Agent:

To The Planning Policy Team, Guildford Borough Council,

As a resident of Send, I object to the excessive increases proposed since the last public examination.

I list below my detailed objections.

MM41 Land at Garlicks Arch, Policy A43

The Proposed 37% increase in the number of houses to be built is excessive and will further increase all the complexities on local infrastructures.

The land required will destroy more of the magnificent woodland.

Attached documents:

Comment: MM41 - LPMM18/2631  Respondent: Mrs Molly Ness 20687489  Agent:

MM41. An increase to 550 (from 400 - why?) houses on land at Garlicks Arch, which is GREEN BELT woodland is over development. Contravenes MM9.

The site is prone to frequent flooding (the last few winters is testament to that fact) and school and medical facilities will be strained to breaking point (Ripley Junior School has closed - how clever was that??)

Attached documents:

Comment: MM41 - LPMM18/2398  Respondent: Mrs Eleanor Ayers 20688481  Agent:

MM41

An increase in the number of new homes from 400 to 550 is excessive. It is Green belt and ancient woodland. The local roads cannot cope with more cars. The houses will be next to the A3:and subject to air pollution. This over development is very unfair on one small village.

Attached documents:
Comment: MM41 - LPMM18/1351  Respondent: Alicia Pigram 20689441  Agent:

I OBJECT to MM41, the building of 550 homes at Garlicks Arch. Having previously objected to the lower number of 400 homes, which have been ignored. Increasing the number of homes to 550 will increase traffic in the local community, blocking up adjacent roads with at least an extra 800 cars. Local schools and medical facilities will be put under extreme pressure with the large increase in population that come with 550 new homes. Garlicks Arch is also a green belt site with ancient woodland that we would never be able to get back.

Attached documents:

Comment: MM41 - LPMM18/1374  Respondent: Mrs Alison Warne 20689665  Agent:

From a transport perspective, Send will never be able to cope with the increased traffic of 400 homes, let alone 550. There are limited crossing points of the River Wey and Wey navigation, which means that Send is a bottleneck, especially as it is used as a cut-through of traffic from the A3 to Woking. When there is any problem on the A3, the Portsmouth Road and Send Road get gridlocked. Additional housing of this scale will make the situation intolerable. I note that the plan is to build 450 of these homes in the first 5 years, so it will not be possible to make any traffic infrastructure changes in that time.

It is undemocratic that 700 objections to previous consultations have been ignored. The new proposals are even worse! The 37% increase is completely unreasonable, and constitutes over development.

We have suffered from flooding in the period that I have lived in Send Marsh, and the development will hinder the ability of existing drainage to absorb rainfall if the land at Garlicks Arch is developed.

Attached documents:

Comment: MM41 - LPMM18/1383  Respondent: Mrs Christine Mote 20689729  Agent:

Yet again the people of Send and Ripley are being ignored. Who wants to live next to the A3 in a field subject to flooding and excessive noise. What infrastructure will be put in place to cope with the extra traffic and increased number of residents requiring local facilities such as doctors surgeries and schools. Why target green belt when there are more suitable brown belt sites available. Send will no longer be a village, merely an extension of Guildford where any proposed development has been kept to a minimum.

Attached documents:

Comment: MM41 - LPMM18/3034  Respondent: Mr Martin Threakall 20689761  Agent:

MM41 Land at Garlick's Arch, Send Marsh, Policy A43

I object to this amendment I feel that the increase of 150 homes (37%) on top of the previously allocated 400 on this site is beyond excessive. The site already drew a significant number of objections to a smaller development, and this fact seems to have been ignored in increasing the allocation. The development will effectively connect Ripley and Send, overdeveloping the area. I am extremely concerned about the
level of additional traffic that will result on the local roads. Other infrastructure such as schools and medical facilities will also be unable to cope with this additional load.

Finally, it is quite appalling that the development is on Green Belt land and will destroy ancient woodland.

**MM27, MM41, MM42 and MM48 Transport Policy**

I object to these; I do not believe that the traffic implications for the various Send sites (Garlick's Arch, Burnt Common, Clockbarn and Alderton's) are adequately addressed by the A3 changes and local slip roads. There will be a very significant increase in traffic along Send Barns Lane and Send Road with thousands of additional cars likely to use these daily to go to and from Woking, a route that is already often blocked with traffic jams.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1451  **Respondent:** Lauren Stafford 20690977  **Agent:**  

**MM41, Policy A43**

- Excessive % increase in the number of proposed houses
- How can you ignore 700 previous objections?
- It’s green belt land
- Huge risk of flooding
- 800 extra cars is inconceivable and will cause so much more pollution in Send – right where my children will go school
- Ridiculous amount of pressure on local school and doctors. And Ripley school has also just been closed!

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1455  **Respondent:** Lauren Stafford 20690977  **Agent:**  

**MM27, MM41, MM42 and MM48**

- Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads. The increase in noise, pollution, delays and gridlock as cars drive through to Woking would be terrible. How you can let that happen past a PRIMARY SCHOOL?

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1490  **Respondent:** Mrs Corinne Singleton 20692385  **Agent:**  

I object to the proposed plan and would like it explained why you have decided to increase the number of proposed homes from 400 to 550 - an increase of 37%? Clearly, you have decided to totally ignore the 7000 objections already submitted to the earlier proposal of 400 new homes!

The proposal completing ignores the fact that you would be building on ancient woodland and in the green belt.
This will mean that Send and Ripley will be joined up and means that the area will be over developed.

This site is also prone to flooding and is contaminated by lead shot, clearly not the area to build new homes on.

Clearly, you have not taken into account the impact these proposals would have on the local roads which are already extremely busy. I hope that you would also be building a new medical centre and school to serve and support the plans, although somehow I doubt it!

Attached documents:

Comment: MM41 - LPMM18/3260  Respondent: Ms. (Ms Maria Schirmer) 20698529  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy.

The roads in and around Send, Send Marsh, Ripley, Burnt Common etc are already running at capacity. They will not cope with the addition of what potentially would be hundreds if not thousands more cars; never mind the hugely negative impact on the environment; has this been considered?

This massive increase in traffic of all types of vehicles, not just cars, heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise and air pollution. Furthermore delays and gridlock are going to be worse than they already are.

Attached documents:

Comment: MM41 - LPMM18/3262  Respondent: Ms. (Ms Maria Schirmer) 20698529  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43.

I very strongly object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

Whilst I understand the need for more housing, this is a huge increase of 37.5% in the number of houses to be built. The infrastructure is not coping as it is and it will totally collapse with this increase. Until the current infrastructure has been assessed and improved to cope with its existing needs, then the addition of that number of additional houses is simply senseless and preposterous. Building this vast number of houses will result in the villages of Ripley and Send being joined in fact over development

Furthermore, that precious ancient woodland (which should be protected not developed) cannot ever be replaced once gone. The environmental impact on wildlife (some protected species) cannot be reversed once the damage is done. What future environment are we building for our children?

I find it incomprehensible that the previous objections (I gather over 7000) to the earlier plan appear to have been totally ignored and if anything it seems that we are actually being punished for our objections, what with the threat of even more houses etc to be built than were in the original plans?

Attached documents:
**Comment:** MM41 - LPMM18/5935  **Respondent:** Dirk Mercer 20699553  **Agent:**

**MM41**

The transport strategy relies on inadequate infrastructure modelling including the Highways England Junction 10 scheme delayed for at least 2 years. The impact this will have on certain development sites specified in the Plan which rely on this scheme may be severe and has not been given proper consideration in the policy.

The Council is relying too much on the A3 Guildford improvements that are not under their control and that have no fixed time scale.

**MM41 Site 43 Garlick’s Arch - Send Marsh**

I object to the policy to develop this site which is in Green Belt. No exceptional circumstances have been proven to justify removing the land from Green Belt.

There is no guarantee that the houses to be built here will be more affordable if the Plan increases the numbers of homes built. All new homes built in this part of the country are very expensive.

It will cause severe traffic congestion in Send and Ripley where roads are already at capacity.

The need for this development is not proven and is based on incorrect household projections. This site along with other sites marked in the Plan should be reconsidered using up to date ONS figures (Sept 2018).

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1721  **Respondent:** Richard Duddy 20700801  **Agent:**

How are these proposals going to improve the already crowded roads and reduce the current high pollution levels, because certainly your transport strategy MM27, MM41, MM42 & MM48 does not deal with these issues.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1801  **Respondent:** Dr R S Mackinnon 20701633  **Agent:**

**MM41 Garlick’s Arch** should be retained as Green Belt in view of the revised housing need, rather than expanded.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2382  **Respondent:** Mrs Audrey Carpenter 20702561  **Agent:**

RE: GUILDFORD LOCAL PLAN PUBLIC EXAMINATION

**MM41 LAND AT GARLICKS ARCH, POL A43**

We are writing to object to the above proposed extensive development taking place in Send Village.
There were over 7000 objections to the previous 400 homes due to be built. Why have these been ignored?

Site is unsuitable due to flooding & contamination.

Our schools and medical facilities are already overstretched. Has anybody taken into consideration the effect of road congestion?

The main road through Send is already struggling to cope with the traffic flow at peak times.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/2386  **Respondent:** Mrs Audrey Carpenter 20702561  **Agent:**

**MM27 MM41 MM42 MM48 TRANSPORT STRATEGY**

Has a proper assessment of the traffic impact on Send Barns Lane, Send Road been made as thousands of new cars head to Woking every day. Again causing increased noise, air pollution and delays.

I hope the above points will be seriously taken into consideration.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1874  **Respondent:** J A Aldridge 20703521  **Agent:**

**Guildford Local Plan: Strategy and Sites - Main Modifications 2018**

I object to the Main Modifications 2018 to the Guildford Local Plan as follows:-

**MM41 - Land at Garlicks Arch, Send Marsh, Policy A43**

This is Green Belt Land containing ancient woodland.

The increase in the number of houses proposed, from 400 to 550, will join Send and Ripley and constitutes overdevelopment.

The resulting increase in the road traffic will cause further congestion and pollution in adjacent roads, adversely affecting residents and the local school. The A3 and M25 are frequently blocked now, this additional traffic will bring the whole area to a standstill more frequently. School and medical services are already over-subscribed, the waiting time for an appointment at the surgery in Send Barns Lane is already far too long.

**Attached documents:**

---

**Comment:** MM41 - LPMM18/1881  **Respondent:** J A Aldridge 20703521  **Agent:**

**MM27, MM41, MM42 and MM48 Transport Strategy**
The proposed changes in the A3 and Clandon slip roads do not adequately address the impact of thousands more cars travelling along the Portsmouth Road, Send Barns Lane and Send Road past a school and through residential areas, with resulting noise, delays and gridlock and more severe pollution. The infrequent bus services in the area will do nothing to reduce the number of car use.

**Attached documents:**

**Comment:** MM41 - LPMM18/6063   **Respondent:** Houston Morris Architects (Conrad James) 20703873   **Agent:**

### 1.0 BACKGROUND

Guildford Borough Council are currently consulting on “The Proposed Submission Local Plan: strategy and sites – Main modifications”. The plan sets out the vision for Guildford borough and the Council’s approach to development up to 2034. This includes modifications to the Green Belt, one of which is to remove a large part of the village of Ripley from the Green Belt, below. (See Appendix I)

We have identified an opportunity to provide additional housing for Ripley, however this would involve extending the area proposed to be removed from the Green Belt into the proposed site.

We would like the consultation to consider enlarging the area to be removed from the Green Belt as shown in this document.

### 2.0 RIPLEY

Ripley is a small village in Surrey, England, with a population of a little over 2,000 and two schools. The village has existed since Norman times. It is located close to the A3.

### 3.0 SITE LOCATION

Our site is located just to the northeast of Ripley, between Portsmouth Road and the A3. Part of the site is within the Ripley Conservation Area (red dashed line in the plan below) To the North of the site are the Ripley Gates and Ripley Lodge, and a garage. A stream runs through the site.

This site is part of Ockham Park.

Ockham Park is an estate, containing a historic house and grounds, fields and woodland. In 1976 the A3 was constructed, which left a small part of Ockham Park cut off from the rest of the estate. This part contains two fields and some woodland. Being disconnected from the rest of the Ockham estate by the A3 resulted in forming an undesirable, unproductive strip of land, difficult to access and hence difficult to manage and maintain. Although part of this land is designated as Ancient Woodland, the reality is very poor quality low grade shrubland. Most of the proposed site is covered in thick brambles. Any proposed scheme would take into account any healthy old trees.

### 4.0 PROPOSAL

Ripley is essentially a linear village which has developed principally along Ripley High Street. Our proposal is for a development of high quality sustainable housing to continue the linear development of the village.

Please note the proposals are at an indicative stage only, to give an idea of the kind of scheme, the density and the number of houses which may be possible to build in principle.

for figures and appendix see attachment

**Attached documents:**  
- [Houston Morris Rep 3.pdf](#) (148 KB)  
- [Houston Morris Rep 6.pdf](#) (297 KB)  
- [Houston Morris Rep 2.pdf](#) (147 KB)
Comment: MM41 - LPMM18/6007  Respondent: Mrs Jennifer Grove 20704385  Agent:

There is too much reliance on A3 improvements and they are beyond the council’s control. The Gosden Farm site should not even be considered without a proper A3 northbound access. Putting all the traffic through Burpham to access the A3 northbound is absolutely ludicrous. Look at the congestion now.

Attached documents:

Comment: MM41 - LPMM18/1923  Respondent: Nigel Blake 20704577  Agent:

You have increased the number of houses from 400 to 550 (an over 37% increase) which suggests that the density of the development will be very high, therefore not a desirable place to live and the extra strain on local roads, infrastructure such as schools and medical services will be excessive. It is very difficult to get an appointment with a GP at the Villages medical center now. I am concerned that if these services are not expanded in line with the size of proposed developments, chaos will ensue. Rush hour traffic getting onto the A3 south bound and north bound through the middle of Ripley or the very dangerous junction at the bottom of potters lane will grid lock the local roads.

Attached documents:

Comment: MM41 - LPMM18/4926  Respondent: Miss Karen Murray 20704993  Agent:

Objection to MM41 Land at Garlicks Arch, Send Marsh, Policy A43

Objector: Karen Murray, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

As a resident of Send Marsh, I object to the proposed housing development at Garlicks Arch for the following reasons:

- The enormous development, which has increased in size since the last consultation, is too big for the village. There are too many houses planned and the number is not proportionate to the nature and scale of the site (as per MM10/Policy P3: Countryside).

- The wishes of the local residents in the area is not being heard or considered, why else would the number of houses planned for the site continue to increase on each consultation? Why have the previous objections been ignored?

- Garlicks Arch is considered Green Belt and contains ancient woodland - why are you building on it. As part of the other elements in the local plan, protection of Green belt is important and this should be considered ‘inappropriate development’ (as per MM9/Policy P2: Green Belt)
- A development of this size, at this location should also be considered 'over development'. It will change the settlement boundaries of Send by joining up with Ripley. The settlement boundaries must be protected and keep both Ripley and Send as individual villages.

- There are insufficient plans for infrastructure improvement or considerations in relation to this development apart from broadband/connectivity. The roads through Send and Ripley cannot cope with the increased traffic that this development and the numerous other developments that are proposed for the area will bring. The roads cannot cope with the peak traffic as it is.

- The school and medical facilities in Send (and Ripley because the development is so large), will be pushed to breaking point. The closure of Ripley First School has already put pressure on other primary/first/infant schools, along with an increased traffic impact as residents can no longer walk their children to school. The secondary school issue is well established in the area already with insufficient places for children of the area. Where will the children go to school?

Comment: MM41 - LPMM18/1953  Respondent: Mr Peter Gilby 20705089  Agent:

Objection to MM41

This is development on Green Belt. It will greatly increase traffic on already congested roads through Send. The doctors surgery is already struggling to cope with existing numbers of patients, and both the surgery the school will become overcrowded if the proposed number of new homes is built.

Attached documents:

Comment: MM41 - LPMM18/1960  Respondent: kenneth harrington 20705153  Agent:

The 550 proposed houses look like an excessive amount of development to place on green belt land and the effects on local roads will cause overloading and gridlock even with the proposed alternative route to the A3. This will cause strain on local schools, doctors and infrastructure not to mention the increased pollution from additional cars. Located so close to the A3 will mean these houses will be exposed to high levels of traffic noise & pollution from the A3.

Attached documents:

Comment: MM41 - LPMM18/5828  Respondent: Dr Richard Bowles 20708353  Agent:

There is too much reliance on A3 improvements and they are beyond the council’s control

RE: Objections to Guildford Borough Council (GBC) Local Plan - Consultation due to close on 23.10.2018.

I am writing in response to the latest version of the Local Plan as outlined in GBC-LPSS-026. As in earlier versions of the plan, the modifications presented for Send are inappropriate, excessive and will be highly detrimental to our village, our quality of life and our future. These changes will result in irreversible destruction of our village.

The local plan in its current form illustrates the continued failure of GBC to provide a plan that is fit for purpose, supported by competent data made available in the public domain, which provides for the needs of current residents, and secures the best future for them and LISTENS TO LOCAL VOICES.

MM41 LAND AT GARLICK'S ARCH, SEND MARCH, POLICY A43

- I object to GBC going against Government guidance in their proposals to build on Greenbelt land and failing to provide 'exceptional circumstances' to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.
- I object that this development is proposed on Green Belt Land and will destroy countryside and ancient woodland.
- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
- I object because local infrastructure will not be able to support the additional demands of new residents.
- I object to GBC's proposal to consider and address infrastructure requirements when proposing an excessive, unnecessary and disproportionate increase in housing for Send and Send Marsh.
- I object because local schools and medical facilities will not be able to support the massive increase in demands resulting from this plan.
- I object because wildlife will be displaced.
- I object because the site is subject to frequent flooding, which will only worsen with increased buildings and ground coverage.
- I object because the land is contaminated by lead shot and this will compound the problem of increased flooding as outlined in my previous objection and be detrimental to health and well-being.
- I object to GBC ignoring the 7,000 previous objections raised by local residents with regard to developing this area.
- I object to GBC increasing by 37% the number of houses in this development, which is excessive and not supported by need but demand and proposed to promote excessive and unnecessary housing development in this area to the benefit of housing developers but not residents.
- I object to this development as it will 'join up' Send and Ripley and local character will be destroyed by this over development.
- I object that GBC continues to stand by its discredited and unreliable estimate for future housing need and fails to adjust this downwards by considering its erroneous assumption about student population forecasts in Guildford. This would of course impact on housing need across neighbouring areas including Send.

Attached documents:

Comment: MM41 - LPMM18/2112  Respondent: Zach Drennan 20708481  Agent: MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:
Comment: MM41 - LPMM18/2135  Respondent: Val Houghton 20710529  Agent:

MM41

I object to this new proposal to increase the number of homes on the Garlicks Arch site from 400 to 500 for the same reason that applied to the original application, i.e. this is an attack on Green Belt land, it will have a negative affect on local wildlife, local fauna & destroy an ancient woodland. It will also add to local traffic problems, local school & medical facilities.

Attached documents:

Comment: MM41 - LPMM18/2179  Respondent: Barry Konkle 20712385  Agent:

RE: OBJECTIONS TO THE LOCAL PLAN.

MM41 Land at Garlicks Arch. Send Marsh. Policy A43

I object to the increased number of homes, from 400 to 550, this is Green Belt land, with flooding being a problem and the volume of the extra traffic which may amount to two cars per household, putting great strain on the local roads. Also the school and the Doctors Surgery are already full at present time.

Attached documents:

Comment: MM41 - LPMM18/2183  Respondent: Barry Konkle 20712385  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

I object. To GBC offering fine words, but no real assessment of the traffic impact in Send Barns Lane, Send Road. Vehicles heading to Woking and vehicle from Woking making their way Send and Ripley to gain access to the A3 both North and South bound.

Attached documents:

Comment: MM41 - LPMM18/2225  Respondent: Alan A. White 20720737  Agent:

Guildford Local Plan OBJECTION

At a time when the Office of National Statistics has identified a drop in the need for both housing and industrial/warehousing, I am appalled that Guildford B.C. is still pursuing its on-going proposals for the destruction of the Green Belt and Send Village. It has ignored the 7000 objections for the Garlicks Arch proposal and clearly considers itself far better qualified than the residents to dictate the need for Send Villagers.

The campaign to Protect Rural England has stated that during 2017/2018 more than 5000 hectares of Green Belt have been released for development and further land is set for release. Such land is some of the most profitable and desirable for developers due to it being "shovel ready", surrounded by countryside (but not for long) and within commuting
distance of towns and cities. It leaves little to the imagination that such development suggested by Guildford B.C will destroy the enviroment that developers prize so much in their bid to take the money and run. These comments are not emotional outpourings but simple facts.

To be more specific I OBJECT to:-

**MM41 Land at Garlicks Arch A43**

The latest amendment increases further destruction of the Green Belt by the increase of housing from 400 to 550 - 37%

I would ask where are these 1000 or so people going to be imported from?

All previous objections, which numbered some 7000, have been completely ignored. Perhaps this is an indication of what Guildford B.C. thinks of its residents.

The Green Belt ancient woodland is a target for removal by developers and I am fully aware how the bulldozers move in early and start work before complaints can be made to the local authority. **It happened in my road over a May Bank Holiday**, when some dozen mature oaks were felled. The recent Climate Change Summit recommended the increase of tree planting to combat increasing CO2 emissions. So Guildford knows better than the experts?

Send and Ripley villages will become one village created by linear development so loved by the planners in the 1950s

The development will add some 800+ vehicles to the surrounding roads which are already congested with commuter and school run vehicles and were never designed to take todays volume of traffic.

The B2215 Portsmouth Road has proven a "rat run" for vehicles attempting to queue jump the holdup on the northbound A3.

The existing infrastructure of education and medical facilities have not been considered. Ripley School has closed, St Bedes School has been demolished and incorporated into Send C of E School and George Abbot Secondary School no longer takes children from the Send area. The parking movements outside Send C of E school during drop-off and pick-up times are dangerous for both parents and other road users and the recently installed centre refuge funnels vehicles closer to the pavement.

The only doctor's surgery is near capacity judging by appointment waiting times.

**Attached documents:**

**Comment:** MM41 - LPM18/2229  **Respondent:** Alan A. White 20720737  **Agent:**

**MM27 MM41 MM42 MM48 Transport Strategy.**

Guildford B.C. have produced, what they call a Transport Strategy, without addressing the wider vehicle movement problems. The Leader of Guildford B.C has already acknowledged in public that the area has significant congestion and transport problems and yet still adds his name to policies that are clearly flawed.

The traffic on the North Bound A3 backs up from the M25 junction, "rat running" takes place off the Burnt Common exit and through Ripley village. This has not been referred to in any document.

The Southbound traffic backs up from Stag Hill to the Burpham Junction exit. This has not been referred to in any document.
None of the roads surrounding Send were designed to take large volumes of traffic. They were and still are, in effect, village streets, despite their A road classification.

Burnt Common roundabout will be gridlocked by the increase in the number of vehicles, of commuters, school run drivers and the manoeuvring of HGV vehicles visiting the proposed new industrial site at Burnt Common, and the new units in Send Business Centre.

Emotionally this is a Transport Strategy for disaster.

RE: Objections to Guildford Borough Council (GBC) Local Plan - Consultation due to close on 23.10.2018

I am writing in response to the latest version of the Local Plan as outline in GBC-LPSS-026. As in earlier versions of the plan, the modifications presented for Send are inappropriate, excessive and will be highly detrimental to our village, our quality of life and our future. These changes will result in irreversible destruction of our village.

The local plan in its current form illustrates the continued failure of GBC to provide a plan that is fit for purpose, supported by competent data made available in the public domain, which provides for the needs of current residents, and secures the best future for them and LISTENS TO LOCAL VOICES.

MM41 LAND AT GARLICK'S ARCH, SEND MARCH, POLICY A43

- I object to GBC going against Government guidance in their proposals to build on Greenbelt land and failing to provide 'exceptional circumstances' to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.
- I object that this development is proposed on Green Belt Land and will destroy countryside and ancient woodland.
- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
- I object because local infrastructure will not be able to support the additional demands of new residents.
- I object to GBC’S proposal to consider and adequately address infrastructure requirements when proposing an excessive, unnecessary and disproportionate increase in housing for Send and Send Marsh.
• I object because local schools and medical facilities will not be able to support the massive increase in demands resulting from this plan.
• I object because wildlife will be displaced.
• I object because the site is subject to frequent flooding, which will only worsen with increased buildings and ground coverage.
• I object because the land is contaminated by lead shot and this will compound the problem of increased flooding as outlined in my previous objection and be detrimental to health and well-being.
• I object to GBC ignoring the 7,000 previous objections raised by local residents with regard to developing this area.
• I object to GBC increasing by 37% the number of houses in this development, which is excessive and not supported by need but demand and proposed to promote excessive and unnecessary housing development in this area to the benefit of housing developers but not residents.
• I object to this development as it will 'join up' Send and Ripley and local character will be destroyed by this over development.
• I object that GBC continues to stand by its discredited and unreliable estimate for future housing need and fails to adjust this downwards by considering its erroneous assumption about student population forecasts in Guildford. This would of course impact on housing need across neighbouring areas including Send.

REF - MM41, MM42, MM44, MM9, MM27, MM41, MM42 and MM48

I "object" in the strongest possible terms to the proposed developments on the above mentioned REF's for many and [unreadable text] reasons that have been waived before many thousands of [unreadable text] in the form of protest letters and emails that now seem to have been ignored.

At least 2 of the above mentioned sites are on Green Belt Land. What is the point of a Green Belt if you chose to ignore it.

The original purpose of the Green Belt was to prevent unrestricted development on and around the main road and rail amenities around London and at the large towns and cities. A very considerable policy of which until now it has been largely successful. This policy has seen to be abandoned by these proposals. Ripley state school is to be closed so where are all these new children supposed to go to school.

Send in particular seems to be singled out for such contained action. Why is this; is it because the Ripley, [unreadable text], East + West-Horsley they have had the courage to stand up to the bully boy tactics of GBC planning. Led by the inspiring leadership of Sue Parker and others in the 'Green Belt Group' these people are standing up to the G.B.C planning jugganaughts made up of "TORY + LIB-DEM [Response has been redacted due to statements being considered
defamatory, derogatory, inflammatory or offensive in nature] this unholy alliance of [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] characters seem to have no feelings for local concerns, but are hell-bent on making money and getting revenge on people who have the courage to stand up to them. I ask you to think again and reject these [unreadable text] proposals.

PS Is Send being so certainly [unreadable text] because Sue Porter is a Send Borough Councillor and Green Belt group leader and founder!!

Comment: MM41 - LPMM18/2347  Respondent: Sarah Stalley 20727361  Agent:

Policy A43 Re: MM41

LAND AT GARLICKS ARCH SEND MARSH

I have lived in Send for 47 years, I enjoy living here. Firstly none of us wish to be joined by our pretty village onto Ripley's pretty rural village. It seems to me that planners, councils, and builders are the only ones rubbing their hands with glee at the prospect of wealth ignoring safety and pleasure of local villagers who enjoy the rural surroundings +amenities it has to offer plus local shops post office etc.

1st More properties more industrial vehicles to clog narrow lanes more cars the narrow lanes + roads were not meant for heavy vehicles thus putting strain + danger to all of us who enjoy the narrow lanes to walk down it is part of the enjoyment of rural natural life and villagers in Send not to mention the elderly and disabled who sometimes have to cope with the ever increasing traffic through our village sometimes their only transport around the village are mobility aids in mobility scooters wheelchairs and also for blind + partially sighted who only rely on sticks or white canes or a guide dogs.

The council should sit up read all those letters and comments constructively, there are brownfield sites available to build on use those instead build a new village with amenities and leave community villages alone.

2nd The previous greenbelt should not on any account be built on, trees on this site are ancient woodland, woodland with trees are necessary to our daily lives, trees absorb Carbon Dioxide hence Send at the moment has a low level. Destroying Green Belt Land should not be carried out. Families and children and people of Send should not be ignored.

3rd Send Community has things we all need and cherish. We have a good school, an excellent medical centre, village hall, churches, play areas several amenities including a tennis court. All are within walking distance for most people.

All this will change and not for the better unnecessary industrial works and homes built will destroy the beauty of our village and rural life as we know it.

Attached documents:

Comment: MM41 - LPMM18/2351  Respondent: Jonathan Wilson 20729505  Agent:

I've recently received a letter from Save Send Action Group regarding multiple developmental plans in the Send area which will have a huge impact on the local community as well as environmentally and ethically.
I understand the need for more housing. However, I feel that not enough consideration has been taken with regards to the existing residents. Send is a small village which has drawn and kept its inhabitants due to its size, location and greenbelt land giving its occupants rest bite from city living.

Whilst I agree that some housing is necessary the 550 proposed new homes without any existing infrastructure to support an increased population in the area is a mistake.

A further area for concern is the introduction of two new traveller sites to the community. This in my view is abhorrent. As we have seen in other local areas and inevitably costs the council and the local community time, money and resources all of which could be avoided. Send is a quiet village drawing home owners seeking a certain standard of living and they have paid handsomely for the privilege. You as a council can offer me no guarantees that my current standard of living will not be interrupted by your actions which are not supported by the local community.

I hope you take on board the view of our and not just the contractors.

I object to the Main Modifications

I object to: MM41 Land at Garlicks Arch, Send Marsh, Policy A43

- The increase in the number of houses from 400 to 550
- There is no provision for an increase to the current medical facilities and schooling
- An increase in excess of 37% in the number of houses is excessive.
- All previous objections to the lower number of houses has just been blatantly ignored
- This will join up Ripley and Send and is a massive over development
- This area is a flood plain and prone to flooding on a regular basis
- There is lead contaminating the ground in this area
- This is a green belt area containing an ancient woodland which will be lost
- There will be an unacceptable increase in the number of cars at a minimum at least an extra 800 cars. This will increase traffic problems and not help with them.

I object to: MM27, MM41, MM42 and MM48 Transport Strategy

- The impact of traffic for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Gosden Hill and Wisley/Ockham will not be adequately addressed by the A3 changes and the Clandon slip roads
- There has been no effective traffic impact assessment

Attached documents:

**Comment: MM41 - LPMM18/2613  Respondent: Kris Nasta 20762433  Agent:**

I object to the fact that the proposed Transport Strategy places far too much reliance on infrastructure improvements some of which are uncertain and all of which are beyond the council’s control and have no fixed timescale. There is already a 2 year delay on Highways England RIS scheme for J10 of the M25 and this has a direct effect on the development of Site A35 – TFM; Site A43 – Garlicks Arch; and Site MM44 – Aldertons Farm.

**Attached documents:**
I am writing to object to the modifications resulting from the Planning Inspector’s Report impacting the village of Send within Guildford Borough. Overall, the danger is that, if the proposals / modifications go ahead, Send will be transformed in such a way that its village identity will be permanently destroyed. Linked to this, there will be significantly increased congestion, pollution and resulting damage to the environment. This will impact residents both in Guildford Borough and beyond. My objections are:

Main Modification 41 (Land at Garlick’s Arch, Send Marsh, Policy A43) because:

- An increase of 37% in the number of houses will destroy the village identity
- It ignores 7,000 objections already lodged
- It is Green Belt containing ancient woodland and that should be protected.
- It will join up two separate villages (Send and Ripley) without sufficient school places with the recent closure of Ripley Primary school and no extra capacity at Send Primary school
- The site is subject to frequent flooding (a flood zone 2 area) and contamination by lead shot
- The extra cars will block up the adjacent roads and increase air pollution of carbon monoxide, nitrogen monoxide and nitrogen dioxide
- Medical facilities will be unable to cope with the increased demand

Attached documents:

---

My initial objection is to: MM41, MM42, MM44, MM9, MM27.

MM27. MM41. MM42 and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlick’s Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.
MM41 Land at Garlicks Arch, Send Marsh. Policy A43.
I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.
This is an increase of 37% in the number of houses to be built.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking. This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

Up to a thousand cars and between 1600 to 1700 extra people will block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added?

Attached documents:

Comment: MM41 - LPMM18/2941  Respondent: Sheila Brown 20770401  Agent: 

I submit herewith my comments on the above

My name is Mrs Sheila Brown and my address is [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act...]

1812 of 2575
2018] and I am writing to object to the proposed number of houses that the GBC want to build in Send which seems totally over the top for a village of this size. I have written several times over the past few years giving the same reasons ie Send is a village that does not want to be a suburb of Guildford and does not have the infrastructure in place to accept even a tenth of the proposed buildings because there is no sign that any improvements to roads, schools and health provision within the village to make this possible have even been considered.

So what am I objecting to this time round?

1. **MM41 Land at Garlicks Arch, Send Marsh, Policy A43**

550 homes will mean at least 800 extra cars on the roads, with families going to places of work, to schools, to nearby towns to shop. With a very minimal bus service, car travel will be the only way. And 550 will mean at least 1000 extra children trying to fit into already overcrowded schools, not forgetting that the only Primary school in Ripley has already closed! And where are the prospective house buyers coming from? Or are they all to be small houses for rent, with occupants coming from a wide area?

The site has been deemed as unsuitable for housing as it is liable to flooding and is contaminated by lead shot and is still Green Belt Land so how does that make the proposed house building viable?

Attached documents:

---

**Comment:** MM41 - LPMM18/2979  **Respondent:** William Pyne 20773697  **Agent:**

**MM41 Land at Garlick’s Arch, Policy A43**

I wish to object to the proposed increase in houses planned for this site. The number of houses planned for the Send area is grossly excessive when related to the current population of the village. I understand that some 7,000 objections were raised to the previous number of 400 houses, but these objections have been ignored. The subsequent increase seems not to be in the spirit of prudent planning, but sheer vindictiveness. Retribution is not the function of a Planning Department. This, as you know, is Green Belt land and large-scale development on such land is totally inappropriate.

As a resident of Send for over 30 years, I notice that increasingly roads such as the A247, which serves this site, are more and more frequently subject to traffic jams, caused by sheer weight of traffic, exacerbated by the many road works and temporary traffic lights that have become a feature of life in this area. Instances of this include the rebuilding of bridges on Newark Lane, the rebuilding of Cart Bridge on the A247, the current water mains work on Portsmouth Road Ripley. All of these have caused heavy tailbacks which all affect the A247 through Send. Adding so many houses at Garlick’s Arch will make this even worse.

All this housing will inevitably give rise to greater demand of the Villages Medical Centre, which is already extremely busy and it is difficult enough now to get appointments. In the same way, Send Primary School will be unable to cope with the extra children which are always a feature of new housing developments.

**MM27 MM41 MM42 AND MM48 Transport Strategy**
Any plans involving developments in this area must take into consideration the huge developments now taking place in Woking, which will act as a magnet for vehicle traffic both to and from all surrounding areas. Residents of the new houses will inevitably want to take advantage of the new shopping and employment opportunities in Woking. Projects like Victoria Square and the St Dunstan's tower block, already well advanced, will generate traffic both into Woking and out to the Surrey countryside, and the A247 through Send towards Newlands Corner, and Dorking etc. This can only lead to greater traffic congestion.

I am a resident of Send Marsh and object to the following Main Modifications to the local area.

MM41 - Land at Garlicks Arch, Send Marsh, policy A43

I object to this on the following grounds;

This is Green Belt land

proposed new development is excessive

it will destroy the ancient woodland at the site

Will further add to the existing flooding issue

Extra cars will block up the existing busy roads

Impact the already strained local services such as schools and medical facilities

Attached documents:

MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm].

There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Attached documents:
2. There is too much reliance on A3 improvements and they are beyond the council’s control

**Comment:** MM41 - LPMM18/3403  **Respondent:** Brian & Helene Pavey 20789921  **Agent:**

We are raising objections to the local plan for Send. MM41:

The proposed building of 550 homes in this site an increase of 37% since last proposal despite 7000 objections to the lower number. These objections have been ignored. The area is subject to flooding and already a bottleneck for traffic in the mornings and evenings. Our local facilities will be overstretched if this plan was to go ahead at present they are at their maximum for the village.

MM27 MM41 MM42 MM48.: this proposal will impact negatively on the traffic within our village. We already have gridlocked roads when there is a problem on the A3, we have speeding cars, thundering lorries and traffic build ups. This village needs less traffic coming through it not more. In Potters Lane where we live it is a speed run for cars accessing the A3, with weekly aggressive road rage witnessed by us the residents. We do not need anymore traffic damaging our roads and putting lives at risk.

Attached documents:

**Comment:** MM41 - LPMM18/3411  **Respondent:** Sally Anderson 20790081  **Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

Attached documents:

**Comment:** MM41 - LPMM18/3429  **Respondent:** Paul Kenny 20790305  **Agent:**

MM41 Land at Garlicks Arch, Send Marsh, Policy A43 Increased from 400 to 550 homes of which 450 to be built in the first five years
• An increase of 37% in the number of houses proposed is excessive
• The previous 7000 objections to the previous lower number have been ignored
• It is Green Belt!!!!
• It will join up Send and Ripley and constitute over development.
• The site is subject to frequent flooding and contaminated by lead shot
• At least 800 extra cars will block up the adjacent roads at a time when traffic is already awful.
• School and medical facilities will be strained to breaking point, again at a time when these services are already stretched.

Comment: MM41 - LPMM18/3441  Respondent: Emma Munro 20790625  Agent:

RE: Objection to Local plan

I am writing to object to the over development of Send village in the proposed Local plan.

Our family have lived in Send for over 50 years. We, along with all residents of Send and the surrounding villages, will be negatively affected by the impacts of the development on the green space, transport system and the health and education provision.

The following specific objections relate to the following proposed developments

MM41 Garlicks Arch 550 homes

MM42 Burnt Common industrial and storage

MM44 Aldertons Farm 120 homes

1. The current proposed number of new homes is across all schemes is 770 compared the current number of 1700 homes in Send. This is a 45% increase and will massively change the nature and way of life in Send beyond all recognition and
it will lose its village feel. In addition the developments that are being proposed will join Send to Send Marsh and Send Marsh to Ripley resulting in one large village removing the individual character.

2. The introduction of 770 new homes will result in an addition of up to 1500 cars on the roads of Send and Ripley. There are currently major delays and traffic queues through Send, Ripley and at all junctions at both morning and evening peak times which can extend throughout the day as soon as any road works are introduced in the local area. The addition of 1500 cars will cause the local roads to gridlock and increase the risk of accidents. This in turn will reduce the numbers of cyclists and pedestrians due to the pollution and increased risks of accidents.

The proposed Industrial and storage provision at Burnt Common will necessitate a large number of HGV vehicles passing through Send and Ripley. Even if there are proposed new roads and junctions to aid in this, without legal controls in place, companies will use the smaller roads as direct routes. In the event of problems on the main road network lorries would be diverted via the smaller roads -this is becoming and more and more frequent problem as the main road networks are becoming overwhelmed.

3. The Villages Medical centre already covers the villages of Send, Ripley, Clandon and surrounding areas and it can already take over 6 days to get an appointment to see a doctor. An increase number in excess of 2000 patients would make it impossible to get an appointment and would result is people being unable to see a doctor or having to present themselves at A&E as the only way to achieve a healthcare provision. This is totally unacceptable and would put people’s health and lives at risk.

4. The nearest secondary school is becoming increasingly oversubscribed from Guildford residents, leaving a reduced number of places for residents of Send. This is leading to a situation in a couple of year’s time when there will be no places allocated to children in Send. Provision of good quality school places to meet the current population requirements has been promised for years and is yet to be delivered. The planned increase in population will only add to this. The proposed number would require a new school to be built and established prior to any development to ensure provision was in place.

5. The necessary construction and infrastructure traffic required to construct these developments will have and major and lasting effect on the village, roads, trees and surroundings with pollution and damage to the roads. Even if promises on measures to avoid impact during construction are made they will be ignored once construction starts.

Although the proposed development in Send Hill is not included in the amendments, as residents of Orchard Way we would be negatively affected by the proposed development as follows.

• The proposed number of houses on the site is inappropriate for the size of the site.

• The increased traffic from the dwellings will overwhelm the road and the associated junctions with impact on risk of accidents and delays

• The construction traffic to build the dwellings will cause major disruption and permanent damage to the road and environment including damage to trees and hedges from the large delivery vehicles.

• There are already major problems with the main sewer drainage from properties in Orchard Way and Send Hills which will be compounded by the introduction of 40 new dwellings.

• The area identified is Green Belt and this must be maintained for future generations.

• The number of dwellings proposed would not allow space for sufficient and realistic parking allocations for a rural housing location leading to parking in Send Hill which is already a problem and further adds to delays in traffic and accident risks.

• The inclusion of Traveller pitches will have a detrimental effect on the areas for the following reasons.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]
The Send Hill cannot accommodate the transport of mobiles homes.

As with all proposals within the local plan they are based on providing the best option to housing developers by providing the largest number of dwellings in one block to maximise the opportunity for their profit.

The focus and responsibility of the council must be to meet the housing need in the most sympathetic and sustainable way and ensuring the villages are not lost under new towns and all character is lost. The local plan needs to be re-drafted under these terms and opportunity for small development identified that will fit within the villages and where the village can influence the development rather than the development have a major detrimental effect on the village.

Comment: MM41 - LPMM18/3524  Respondent: Clive Stafford 20793121  Agent:

MM41, Policy A43

- I strongly wish to object to this application.
- The current area is already at breaking point, with excessive traffic and pressure on local amenities.
- The noise and disturbance to residents is going to be unbearable.
- Adjoining and nearby properties will be overlooked.
- Additional properties result in considerable noise levels.
- The percentage increase of proposed new houses is excessive.
- It is important to consider both cumulative impact and escalation of impact if this proposal was to go ahead.
- Huge number of previous objections, surely the current residence opinion to preserve the local area is important?
- Flood risks, water table will be pushed up due to natural soak aways being removed.
- This land is classified as Green Belt.
- Local amenities have been taken away, there is no provision for additional/larger local amenities.
- Pollution levels will rise dramatically. And the proposed thoroughfare is past a primary school. This is a Health & Safety risk.

Attached documents:

Comment: MM41 - LPMM18/3547  Respondent: Clive Stafford 20793121  Agent:

MM27, MM41, MM42 and MM48

- I strongly wish to object to this application.
- As with the critical points I have raised above, the traffic implications are not adequately addressed. The area is already over subscribed, and by putting this proposal forward, just highlights the lack of consideration and research conducted. You Are diverting and huge percentage increase of traffic, past a Primary School?

Attached documents:

Comment: MM41 - LPMM18/3540  Respondent: Colin Carmichael 20793185  Agent:

MM41: transport strategy relies on inadequate modelling and including the delay in Junction 10 Highways England RIS of at least two years will impact the developments that rely on this scheme (e.g. A35 Wisley Airfield, A43 Garlick’s Arch and A63 Alderton’s Farm)

Attached documents:

Comment: MM41 - LPMM18/3612  Respondent: Sharon Cork 20794337  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Attached documents:
Comment: MM41 - LPMM18/3634  Respondent: Richard and Nicola Slynn 20794657  Agent:

1. There are few concrete proposals for reducing congestion. Where there are any, these are outside Guildford's control, like widening the A3, and therefore there is nothing really to prevent the major greenbelt development taking place irrespective of the congestion.

Attached documents:

Comment: MM41 - LPMM18/3696  Respondent: Colin Cross 20795169  Agent:

2. MM41 policies place too much emphasis on the A3 and other primary route improvements that are outside GBCs sphere of control. There is also too little traffic modelling to back up the chosen preferences and not enough planned to overcome the Guildford A3 and gyratory jams.

9. MM41/ Garlicks Arch (550 homes) represents a massive overdevelopment of this site and ignores the existing ancient woodland, potential wide scale flooding and traffic congestion.

Attached documents:

Comment: MM41 - LPMM18/3745  Respondent: Anthony Thompson 20796225  Agent:

MM41 I object because there has been inadequate traffic modelling to prove how the excessive housing development outside the town can be accommodated. There is no prospect of the infrastructure coping

Attached documents:

Comment: MM41 - LPMM18/3758  Respondent: Andrew and Miriam Gilkerson 20796417  Agent:

Whilst I commend many resident focused initiatives of GBC, the ongoing development plans for the area in which we live would be clearly detrimental.

The village of Send simply could not cope with the increased development planned. Already we experience significant daily traffic jams due to the link between Send and Woking and routes to the A3 / M25. We live in Burnt Common with children attending the local Send CoE Primary School. Just that short route is incredibly busy.

Specifically, it seems the objections previously made because of increased traffic, demand on the only primary school, demand on the single medical centre and a disregard of Green Belt have been ignored. Instead the number of homes at Garlicks Arch (MM41) has further increased.

In addition there is no clear rationale / demand for more industrial space at Burnt Common (MM42). This plan has doubled in size when To Let signs at Slyfield and elsewhere suggests there is little need. This is in addition to 25% increase of similar purpose land at Send Business Centre.
Comment: MM41 - LPMM18/3864  Respondent: Sue Algeo 20797473  Agent:

MM41 Garlick's Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Comment: MM41 - LPMM18/3921  Respondent: Gai Palmer 20797985  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Comment: MM41 - LPMM18/3935  Respondent: Christopher Fuller 20801953  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Comment: MM41 - LPMM18/3966  Respondent: Roger Griffiths 20802049  Agent:

MM41 Garlick’s Arch should be retained as Green Belt in view of the revised housing need, rather than expanded.

Comment: MM41 - LPMM18/3977  Respondent: Catherine Louise McGowan 20802593  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

About 7000 objections from local residents have been ignored from the original proposal of 400 homes to be built. The modified proposal is now for 550 homes to be built and this increase of 37% is excessive when you consider the modified proposal is within a designated Green Belt area. Development would result in the “joining up” of the villages of Ripley and Send. As Ripley School is to close, where would 550 school places be found for children? Existing medical facilities and local roads, some of which are single lane once cars park on them, would not adequately support another 550 households (with car/s) in this area. Also, this area is prone to flooding, making the modified proposal unsuitable.
MM27 MM41 MM42 and MM48 Transport Strategy

The implications of the extra traffic through Send Barns Lane and Send Road have not been adequately addressed. At present, during peak times, these roads do not adequately support the volume of traffic.

Comment: MM41 - LPMM18/3981  
Respondent: Catherine Louise McGowan 20802593  
Agent: 

Comment: MM41 - LPMM18/4031  
Respondent: Mr Anthony Allen 20804897  
Agent: 

MM41 - the transport strategy modelling, which is used by your plan, is inadequate. Specifically the fact that the delay in J10 of the M25 by Highways England RIS of at least two years will impact all development that relies on this scheme.

Comment: MM41 - LPMM18/4036  
Respondent: TSG Consulting (Mr Mark Watson) 20805057  
Agent: 

- MM41 – Transport strategy relies on inadequate modelling including the delay in J10 Highways England RIS scheme of at least two years will impact all development that relies on this scheme [e.g. Site A35 – TFM; MM41 site A43– Garlicks Arch; MM44 – Aldertons Farm].
- There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

Comment: MM41 - LPMM18/4149  
Respondent: Nicolas and Judith Ware 20808161  
Agent: 

MM41 – Garlicks Arch (policy A43)

The scale of proposed development is massively excessive

Recent ONS estimates have down-graded the level of new homes needed in the Guildford borough, so this proposal cannot be rationally justified

The land itself is GREEN BELT, and there are no apparent ‘special conditions’ to exempt it

The land contains ancient woodland, which should be preserved. Many trees carry TPOs (preservation orders)
One key purpose of retaining GREEN BELT is to prevent urban sprawl, and development here would compromise this, essentially linking Ripley to Send/Burnt Common.

The site itself has been subject to flooding in the past, and this should render the site unsuitable for development.

The extra traffic generated would be unacceptable for existing infrastructure, which is already bursting at the seams.

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further.

Having closed the primary school in Ripley, there is no tangible capacity for schooling.

It is already far too difficult to get appointments at the Send Villages Medical Centre, which seems to be already running at full capacity.

Therefore I OBJECT to this development and the proposed modification.

Attached documents:

Comment: MM41 - LPMM18/4157  Respondent: Nicolas and Judith Ware 20808161  Agent:

**MM27 / MM41 / MM42 / MM48 – Transport Strategy**

The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

MM41 – Far too much reliance has been placed on transport improvements over which the Council has no control. Additionally, the delay in the proposed Highways England improvements to the M25 J10, means that the Council cannot sensibly develop a plan that relies so heavily upon the scheme which again is outside its control.

Attached documents:

Comment: MM41 - LPMM18/4544  Respondent: Peter Mew 20825313  Agent:

I object to the plans to build more houses in the Send area of Guildford, Nowhere have I seen plans to increase the local infrastructure to cope with several thousand additional residents. No additional GP surgerys No additional Schools, in fact schools are being closed No additional police No additional Public Transport No additional parking spaces in and around local shopping areas No additional Hospital Places at thr Royal Surrey to cope with additional residents in the wider area (tens of thousands) Addressing the specific Garlick’s Arch development, I have seen no plans to cope with the extra runoff of ground water caused by several acres of additional concrete. the contours of the land, as it is at the moment, would see all this additional water, flood across the Old Portsmouth Road.

Attached documents:

Comment: MM41 - LPMM18/4776  Respondent: Nicole Smith 20832001  Agent:

I write to voice my objection to the proposed building of 550 new homes on land at Garlicks Arch, Send Marsh. My family and I moved here over 30 years ago because it was a quiet village with easy access to countryside. The building of this number of new homes would have a detrimental effect on the village with regard to increased traffic. The traffic jams in the area during rush hours are bad enough now but will be horrendous if the number of cars from these new homes increase on our roads.

The local school is situated on a busy main road, and the number of parents trying to park at drop off and picking up times is a nightmare anyway. These parents already park half way across pavements, block other residential driveways and park in the local surgery so that patients find it difficult to park there at drop off/up time. So any increase in traffic from new homes on this main route from Woking onto the A3 would no doubt cause even more of a nuisance than it already is. And none of this is helped by the closure of Ripley school this summer. The local GP surgery is already under strain, without the possible addition of 800 to 1000 new residents in the area. Would people want to buy houses right next to the A3? Surely traffic fumes and noise would be detrimental to the health of families living there? Thus adding to the strain on the NHS.
Lastly, this area is green belt land, and part of it contains ancient woodland. Once it has been built on it can never be recovered. It will be lost forever to future generations.

Attached documents:

Comment: MM41 - LPMM18/4863  Respondent: Anna-Louise Clough 20833537  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43 on the grounds,

- Over 7000 objections to previous lower number of homes to be built has been ignored, this is not listening to the voter and tax payer in the area, of which we are many.
- Ancient Woodland cannot be replaced, there have already been unscrupulous activities by land owners in the area, removing Woodland for which they have been find for. The Council cannot replicated the same behavior.
- Development will joinSend and Ripley, qualifying as over development.
- Water is already flooding roads in Ripley and Send, as well as private dwellings. Further building and removal of Woodland will increase flooding in the area.
- Infrastructure is not in place to manage the increase of vehicles coming with an increase in home, roads are narrow lanes in the area, not capable of increased volume of traffic. Increased traffic will result in an increasing of idling vehicles, resulting in air pollution for this Green Belt area.
- There is no local School to support additional families now that Ripley School has been run down to such a point it closed.

MM41 Land at Garlicks Arch, Send Marsh, Policy A43

I Object to the proposal to increase the number of homes on this site from 400 to 550. If anyone were to actually visit the site will see how unsuitable it is.

I object to the number of homes being increased by 37%. With an average of 2 people per house, any number of children, this will mean a possible 1000 plus residents. All these people will require access to the roads and amenities such as schools and medical facilities.
Overwhelming and compelling evidence was presented by various groups at the Council meeting and it was clearly stated how unsuitable this site was. The council’s representatives had few answers to what was said, so the conclusion from the Inspector that the site should be increased not scrapped is very surprising and dis-heartening.

Estimations would be that this is likely to add over 750 additional cars to the traffic in the surrounding area. Access to both Guildford and Woking would add to the massive traffic jams already present at Send Dip and the Burnt Common Roundabout. Send Road is already the main access road between Woking and the M25 carrying heavy goods vehicles and articulated trucks. There is often already a gridlock situation especially at 8am and 5pm, further up in Ripley itself where cars want to turn in and out of Newark lane wanting to get to the A3 and M25 via the access points at either end of the Portsmouth Road.

There is nothing in the Local Plan about additional road infrastructure so the current small roads we currently have which are over-crowded already will simply not be able to cope. If the other proposed sites all go forward then these roads will simply gridlock making life a misery for everyone concerned. There is a serious safety angle to this problem as cars bunch and speed limits are broken to enable to get from A to B on time. The situation will be far worse during weekdays. The additional traffic which will result from the excessive building programme in Send will make the situation far worse.

With the number of additional houses proposed by the plan and the subsequent amendments we are allowed to comment on in this objection, there will inevitably be families requiring schools for their children. There is only now one primary school for the villages of Send and Ripley. Provision for more Primary School places has not been made even with the recent building and upgrade of the school in Send. George Abbot is the nearest secondary school, and for many years the children of Send and Ripley do not get into this school; due to it being over-subscribed. The next nearest school is the Howard of Effingham which currently does not regularly take children from the villages. The same applies to the New Hoe Valley School, and so subsequently primary and secondary school places are also limited requiring exhaustive and time consuming processes for Council and residents, to get places is the closest school to the homes already existing!

There are no plans to build any new schools, surgeries, dentists or amenities.

More houses of this number will obviously mean the current amenities will be over stretched and unable to cope and no plans have been made.

In my opinion this is an irresponsible and ill-conceived site to choose.

Attached documents:

**Comment:** MM41 - LPMM18/4918  **Respondent:** Nicholas Brown 20834593  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry. There are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

Comment: MM41 - LPMM18/4948  Respondent: C Davies 20835105  Agent:

MM41
The transport strategy relies on inadequate modelling. The Junction 10/A3 scheme delays from Highways England would impact all the schemes that are due to rely on it. Notably these include A35 - Three Farms Meadows, A43 Garlick's Arch and the newly introduced site of Aldertons Farm in Send. This has been put in via the back door after previously being discounted and would have a huge impact on the surrounding area.

Improvements to the A3 are under the control of Highways England and not GBC and there are no fixed plans for timescales and therefore cannot be relied upon for this Plan

Attached documents:

Comment: MM41 - LPMM18/4988  Respondent: Alison Johnson 20836225  Agent:

Objection to development on Site MM41 at Garlicks Arch, Send Marsh, Policy A43

I wish to draw to attention my continued objection to this plan on the grounds that this is a development that is totally out of character to the village and which has totally ignored the previous 7000 objects that have been put forward to the council in previous consultations. The number of houses have increased by 37% and it has been proved that this is an excessive amount and not in line with predicted needs. I was amazed to read in the local paper that this also includes a provision for the local Borough of Woking as well! Building on the Green Belt and destroying an area of ancient woodland is an irreversible decision that can be avoided by first building on brownfield sites that are available within the borough. Joining up the villages of Ripley and Send will destroy the idea of Guildford being surrounded by individual villages and constitute over development. This area often becomes gridlocked when there are even minor incidents on the A 3 or M25 and the addition of over 800 cars will make this situation worse. Even if improvements are made to the A3 and M25, once the cars get onto the small country lanes in the area problems will arise. Already schools and medical facilities as well as parking in the village are strained and this will only exasperate the situation.

Attached documents:

Comment: MM41 - LPMM18/5112  Respondent: Richard Smith 20841889  Agent:

MM41 – Land at Garlicks Arch, Sendmarsh, Policy A43

- This land is presently designated as Green Belt and contains ancient woodland. Once developed, that is gone forever and an essential part of the boundaries between the villages of Send and Ripley will have been removed.

- Once developed, it will significantly increase the number of vehicles using village roads to an intolerable level. Together with the proposed developments to the North and South of Ripley and Send and the proposed development at Alderton’s Farm (MM44), the junction between Sendmarsh Road and the Portsmouth Road will become a major traffic problem as envisaged in MM41 (0e). There is no amount of mitigation that is going to resolve the “adverse material impacts on communities and the environment”. The existing communities and the local environment will simply be destroyed.

- With the closure of the local primary school in Ripley, the limited size of Send First School and the distance to other schools, there will be a considerable increase in the number of parents forced to drive to take their children to school. The idea that they will be able to walk or cycle to these schools is laughable.
• There are presently sufficient medical facilities for the existing population of Send and Ripley but no more. There would need to be a major investment in medical facilities to cope with both the aging local population and the proposed additional homes to be built, which does not appear to have been provided for in the proposal to increase the number of homes from 400 to 550.

• An increase in the number of houses proposed of 37% is clearly excessive and represents an attempt to meet unproven targets for the number of new homes required. There is not currently a local demand for these homes, which are being imposed on the local residents of these villages.

• The site is prone to flooding and therefore the additional homes will simply concrete and tarmac over the natural water run-off and create problems elsewhere as is so often the case when low lying sites are developed in this manner.

Attached documents:

Comment: MM41 - LPMM18/5118  Respondent: Richard Smith 20841889  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

• I strongly object to the proposed transport strategy, which contains fine words but no solution to the traffic chaos that will result as a consequence of the proposed developments at Garlicks Arch, Burnt Common, Clockbarn and Alderton’s Farm together with Wisley/Ockham and Gosden Hill.

• The existing M25 junction is unable to cope with current demands and needs to be redeveloped just to satisfy this demand. The proposed redevelopment will resolve the existing problem only and is very unlikely to be sufficient to meet the demands created by the proposed developments listed above in aggregate.

• The A3 already backs up to the Clandon slip roads during the rush hour due to the lack of a ring road or other credible alternative for traffic travelling through Guildford. The Portsmouth Road passing through the historic and beautiful village of Ripley is already a nightmare to join or cross during the rush hour due both to the number of cars using the old A3 through Ripley as a work around for the congestion on the A3 backing up from the M25 and the number of cars using the village roads to provide a link between Woking and Guildford already. The proposals will simply make these problems worse by adding more traffic than the proposed Transport Strategy will solve.

• The significant increase in traffic will impact greatly on Send Barns Lane, Send Road, Ripley High Street, causing considerable delays, excessive pollution and gridlock. The suggested improvements will condemn the local population and many other travellers to months, if not years, of misery while they are being implemented, all to meet a demand which appears to be the invention of local politicians seeking to increase their fiefdom and unsustainable Government policies on immigration.

MM9 Green Belt Policy
MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.

Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

**Re: Guildford Local Plan: Strategy and Sites – Main Modifications 2018**

I am very concerned that the character of the village where I live is going to be drastically altered by the Guildford Local Plan as you are going to increase the size of the village by around 45%. I realise that we should be building more houses for people so that one day people like myself will be able to live in this area. However, one of the reasons I like living here is because it is surrounded by greenbelt land and is a lovely place to live. Adding so many houses to a Village like Send seems like it won’t be a village any more – just one massive estate.

Not only that – each of the 770 houses which are built will probably mean 1,540 extra cars as most families have at least two cars - more if teenagers like me live at home. They allowed for one car each plus 4 visitors for the entire development which was completely unrealistic and poorly thought out even if it meant they could squeeze another house onto the plot.

I object to MM41 - Policy A43 at Garlick’s Arch to build a large housing estate with what now appears to be 550 houses. This is an greater number of new houses for our village to acquire than before causing over-development and changing the character of our village for ever. This will join up the villages of Ripley and Send and erode our beautiful greenbelt land. It will increase pollution levels as there will be so much more traffic on our roads blocking them up.

Attached documents:

**Comment:** MM41 - LPMM18/5787  **Respondent:** Ptarmigan Land 20855201  **Agent:** Iceni Projects Ltd (Stuart Mills)

**MM41 – Policy A43**

2.8 We strongly support the proposed modification to increase the estimated capacity of the Land at Garlick’s Arch from 400 to 550 dwellings. In the context of a significant need to maximise the delivery of homes in the early years following adoption of the Plan, this site represents a key opportunity to boost supply at a suitable and sustainable location for growth. The ability of the site to accommodate approximately 550 dwellings has been demonstrated by the detailed evidence provided by Ptarmigan Land in its previous representations and throughout the Examination process, including the masterplan and vision documents, which have been informed by a range of initial technical assessment work.

2.9 The Statement of Common Ground between Guildford Borough Council and Ptarmigan Land dated 3rd July 2018 (document reference GBC-LPSS-SoCG-007) highlights that the original capacity of 400 dwellings was based on a very cautious assumption regarding site densities and a previous masterplan which assumed the inclusion of approximately 7,000 sqm of employment floorspace within the allocation. In light of the latest policy requirements, it is agreed between Guildford Borough Council and Ptarmigan Land that the site is capable of accommodating 550 dwellings whilst still delivering the 6 travelling showpeople plots, as well as sufficient land for access, landscaping/ open space and other relevant requirements, including protecting areas of existing woodland (including ancient woodland).
2.10 The site is not subject to any significant constraints that would prevent prompt delivery of all the 550 dwellings by 2024/25, with approximately 450 anticipated to be completed within the first 5 years following adoption of the Plan. The need to increase the supply of housing in the early years of the Plan was a key issue raised at the Examination Hearing Sessions, in order to seek to meet the identified OAN in those years and thus avoid further significant deterioration in market affordability and improve the early delivery of affordable housing. The additional 150 dwellings on the land at Garlick’s Arch will thus provide a welcome and significant boost to the supply of housing in this regard.

2.11 With regard to the proposed additional ‘Transport Strategy’ text within Policy A43, we note that paragraph (0a) refers to the main vehicular access being provided “on the A247 frontage”. However, the boundary of the site identified in the policy does not extend to the A247 frontage, with this land included within allocation A43a, identified for delivery of the new slip roads onto the A3. This land is also within the control of our client and thus the main access from the A247 can be readily delivered, however in order to clarify this point, we recommend altering the wording of this section of the policy to read:

“Main vehicular access to the site allocation provided from the A247.”

2.12 In relation to the proposed additional text at part (0f) of the policy, we support the reference to an enhanced landscape buffer to the A3 and the inclusion of appropriate landscape impact mitigation measures as necessary. However, we consider that the use of the phrase “significant additional measures” may be misleading, as the technical work undertaken to date (as summarised at the Examination Hearing Sessions) by Ptarmigan’s consultant team indicates that the site can be appropriately developed without resulting in unduly harmful landscape impacts. As such, we suggest that it would help to clarify this requirement by amending the text to read “necessary additional measures…” We consider that this slightly amended wording would have the same effect of requiring a future applicant to appropriately mitigate any landscape impacts as necessary, but would not unduly suggest that a development proposal would inevitably have a significant harmful impact.

CONCLUSIONS

3.1 We have set out above, on behalf of our client, our comments on the proposed Main Modifications as set out by Guildford Borough Council in the documents published in September 2018. These build upon our previous representations and matters discussed at the Examination Hearing Sessions.

3.2 We broadly support the draft Local Plan and in particular we strongly support the intention to allocate the land at Garlick’s Arch (at Policy A43) for residential development.

3.3 We trust our comments will be taken into account as the Local Plan is finalised, and look forward to receiving further updates on the progress of the Plan in due course.

Comment: MM41 - LPMM18/5829  Respondent: Anthony Jacques 20856577  Agent:

- There is too much reliance on A3 improvements which are beyond the council's control.

Attached documents:

Comment: MM41 - LPMM18/5959  Respondent: Steven Grove 20859009  Agent:
Housing numbers are too high and should be reset in accordance with the latest ONS figures. This would allow less Green Belt grab for development, and with development of brownfield sites, allow Green Belt site(s) to be removed from the Local Plan altogether.

The Local Plan does not show that “exceptional circumstances” have been fully considered and that grounds for Green Belt development are flawed and inadequate.

With the above points requiring to be fully reconsidered, I believe the Local Plan should not be approved by the Inspector as it is “not sound” in the the above matters. It therefore requires to be re-examined in depth by the Inspector before it can be approved.

Comment: MM41 - LPMM18/5957  Respondent: Helen Court 20859137  Agent:

MM41 Garlicks Arch, Send Marsh A43

The initial proposal for 400 houses was an awful idea that would put huge strain on the village and it is shocking that this has been increased to 550 homes – this is an increase of 37% and is excessive and extremely unfair and proportionately high compared to other villages in the area.

Once again previous objections to this plan – apparently over 7000 of them, have been ignored. Do we as the people who live here not have a say in this at all?

As with Aldertons – this is a Green Belt area of land that stretches from Send to Ripley and would literally join up the two villages – does this not count as over development?

As a general for both of these sites and also the proposed developmentMM42 at Burnt Common (A58) will cause excessive congestion on our road network which is already at breaking point. The condition of the roads is dreadful, potholes that are never fixed effectively, only ever patched up. The congestion in both villages is horrendous if ever there are issues on the A3 or M25 and the current plans to alleviate the traffic situation proposed is not going to make a difference.

The village medical centre cannot cope with the current levels of residents – adding 600+ houses would require a huge increase in the capacity at the Villages medical centre. The recent closure of Ripley Primary school has left Send Primary School full – where do you propose to send all of the new children to schools? We also have a huge issue getting our children into good secondary schools – they are all over subscribed. Are there plans to build new schools?

I strongly object to all of these plans for Send – they are disproportionate over the whole of the Guildford area – how is it fair to our village? I understand that every area needs to accept a certain level of building work but I do not understand why Send/Send Marsh has been designated as one area to take the brunt of this building work.

Comment: MM42 - LPMM18/2887   Respondent: Mr Brian East 8559745   Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58.

Increased from 7000 to a minimum of 14800 sq.m of industrial and storage.

Why having been deleted from the 2014 plan has this been increased twice, doubling the area when there is unused capacity at the Slyfield site.

Where is the demand anyway for industrial land, there are no special circumstances for this so it also contradicts policy MM9.

We already have a 25% increase making a much bigger concentration in Send than any other village with no proven demand.

Again this would impact on the environment and traffic on our already busy roads.

Attached documents:

Comment: MM42 - LPMM18/2891   Respondent: Mr Brian East 8559745   Agent:

MM27, MM41, MM42 & MM48 Transport Strategy.

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons plus of course Gosden Hill and Wisley/Ockham are major and not adequately addressed with the proposed A3 changes etc.

It will I feel result in thousands more cars daily using Send Barns Lane and Send Road going to/from Woking etc past schools, medical centre and shops with major delays and gridlocks, noise and air pollution all to an intolerable and unacceptable level for our village.

Attached documents:

Comment: MM42 - LPMM18/2988   Respondent: Chris Brown 8561057   Agent:

I object at the proposal now to double the original area proposed especially in view of the increased capacity at the Send Business Centre and the spare capacity at Slyfield. This will also generate additional traffic consisting of vans and larger vehicles which will all travel through the narrow and already busy roads of Send and Ripley. This will add to further congestion and noise and air pollution.

It will bring safety concerns for local residents and pedestrians in the village who will be using the local recreation ground and need to cross the road.
It will be better to centralise and develop Slyfield Industrial Estate where there is already existing infrastructure and spare capacity.

Attached documents:

**Comment:** MM42 - LPMM18/2993  **Respondent:** Chris Brown 8561057  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes. Currently buses run one an hour to Woking and so people are forced to use cars.

Attached documents:

**Comment:** MM42 - LPMM18/6031  **Respondent:** C Sheard 8562561  **Agent:**

**MM42 Land at Burnt Common**

This proposal has increased from 7000 to 14800 sq m of industrial and storage facilities – this has been increased twice, having been previously deleted from the 2014 plan. It has now doubled the area. It is by far the largest new industrial allocation in any village. There is unused industrial capacity at Slyfield and the Send Business Centre so there is no need to site development land in the Green Belt. The Employment Land Needs Assessment showed a reduction in demand for industrial land, and this allocation is on top of a 25% increase proposed at Send Business Centre. There is more concentration of industrial units in Send than in any other village. The narrow village roads will not cope and this will affect air quality adversely.

Attached documents:

**Comment:** MM42 - LPMM18/554  **Respondent:** Mr David Gianotti 8565153  **Agent:**

**MM42**

- Surely there can be no justification for another industrial site in the Green Belt when Slyfield has spare capacity;
- The traffic at peak times on narrow surrounding roads will come to a stand still; and
- Nitrogen dioxide levels in our area are already considered dangerous.

Attached documents:
Comment: MM42 - LPMM18/558  Respondent: Mr David Gianotti 8565153  Agent:

MM27 MM41 MM42 and MM48

- Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads; and
- No proper assessment of the traffic impact with thousands more cars in the area every day adding to increased pollution, noise, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/1256  Respondent: Mr David W Lazenby 8566049  Agent:

1. Items MM41, MM42, MM44, and MM9 and MM48

I OBJECT to the great concentration of development in and around the village of Send. It is neither sensible nor equitable to propose such enormous overloading of one village, when many could share any possible load.

1. Item MM42

The possible development of industrial Land at Burnt Common has apparently been in or out of planning policy for some time. There does not seem to have been justification for more than doubling the land usage here, when there is space available in other areas, including Slyfield and elsewhere around Guildford.

I OBJECT to the overdevelopment at Burnt Common.

Attached documents:

Comment: MM42 - LPMM18/2169  Respondent: G Mansbridge 8571137  Agent:

REF. MM42

LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

OBJECTIONS: No need for a huge industrial site in a small village.

Pollution increase

Road congestion.

REF. MM27, 41, 42 and 48

TRANSPORT STRATEGY

OBJECTIONS: There would be total gridlock at rush hours if this amount of development overall is allowed in our small village.

Attached documents:
MAIN MODIFICATION MM42 Land at Burnt Common, London Road Policy A58

I object to an increase from 7000 to 14,000 sq metres of industrial and storage land, an area which has been increased twice since 2014. This is now very substantially larger than in the earlier draft. When asked by the Inspector during the Examination what it was needed for, the Council were unable to provide a coherent reply. The Inspector then said that the Council could not take Green Belt land for speculative purposes. The Council’s response appears to be not merely to take it but increase its size, showing zero respect for the views of the Inspector. They have also shown zero respect for the residents of Send and Send Marsh/Burnt Common who pointed out that there is no need for new industrial sites on Green Belt land in Send when Slyfied has unused capacity. Added to the 25% proposed increase in the size of Send Business Centre it puts a massively higher concentration of new industrial/warehouse land in Send than in any other village in the whole of the borough. This is notwithstanding the fact that the Employment Land Needs Assessment showed a reduction in demand for such facilities and in any event the Burnt Common site is poorly located for high employment use.

Attached documents:

In addition to all this the land at Burnt Common, the only link between Send Marsh and Send (MM42) Policy A58 has been increased from 7,000 sq. metres of Industrial Development and Storage to a minimum of 14,800 sq. metres. Did we, the local residents, do something terrible to deserve this level of victimisation? Furthermore we hear that Woking is predicting a shortfall of development piling more pressure on Send/Send Marsh as one of their neighbouring villages when Guildford Borough Council has sufficient Brown Field sites to include in the first five years of the Local Plan and not pander to the developers who of course want to maximise profits and build on our Green Belt!

A58 - Land around Burnt Common warehouse
A63 - Land at Aldertons Farm

in the revised draft local plan.
I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. There remains considerable uncertainty in the number of houses needed in the Borough. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further. This view is now confirmed by the recent Office for National Statistics (ONS) prediction that the number of homes needed in the Borough in the plan period is 4662 – a substantial reduction compared to the earlier forecast of 7717. To increase the number of sites – i.e. the addition of site A63 - and to increase the development at other sites is perverse to say the least and simply ignores ONS figures and the wishes of most of the residents to keep the area semirural.

2. With the revised ONS forecast, the requisite number of homes can be met from brownfield sites – as noted by Councillor Susan Park. Continuing with the increased number will result in unnecessary loss of the Greenbelt. This is a tragedy and contradicts policy MM9 as 'special circumstances' necessary for reclassification have not been established.

3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area. In particular this could provide the starting link in connecting Guildford to the M25. The Greenbelt policy was originally introduced to counteract urban spread and has worked well for many years and there does not appear to be any reason to abandon it at this time as once the space has gone it will never be recovered.

4. These developments place a disproportionate burden on the north east of the Borough.

5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours when additional congestion at the junctions in the vicinity of the A3 is likely.

6. With specific reference to site A63, there is currently less than 100 homes with a frontage on Send Marsh Road, adding 120 homes at this site with access from Send Marsh Road will inevitably increase the traffic and during peak hours is likely to cause serious congestion at both ends of the road and Send Marsh Green.

7. Other infrastructure.
   The Garlick's Arch, Clockburn and Winds Ridge sites are estimated to result in an increase demand of 45% on the infrastructure in that area. Is there adequate power, drainage and sewage provision for industrial development? And are there sufficient school, medical and similar provisions for domestic expansion?

8. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society. It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.
   If, despite their adverse impact, the sites continue to be included in the plan, provision should be made for strict control of noise and light pollution emanating from the sites – particularly at night time.

9. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. Examples are Garlick's Arch in particular contains ancient woodlands and even the Aldertons site contains a large mixed hedge. It seems perverse that planning permissions have been refused because of the impact on individual trees whilst the wholesale destruction of woods and hedges seems inevitable if these sites are included.
   It seems difficult to reconcile these two extreme positions.
   If, despite their adverse impact, the sites continue to be included in the plan, preservation orders should be placed on appropriate trees as a minimum requirement.

**Attached documents:**

**Comment:** MM42 - LPMM18/2246  **Respondent:** Leslie Brown 8586017  **Agent:**
I object and am amazed at the proposal now to double the original area proposed especially in view of the increased capacity at the Send Business Centre and the spare capacity at Slyfield. This will also generate additional traffic consisting of vans and larger vehicles.

Attached documents:

Comment: MM42 - LPMM18/2251  Respondent: Leslie Brown 8586017  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC seem to be intent on joining Send to Ripley and changing them from villages into towns. I am also unclear as to who all this additional housing is for, because there is no industrial development which requires more people to live in the area and the type of housing proposed is not low cost housing which would be affordable to most. Furthermore no mention has been made of the number of people the Council is seeking to provide accommodation for.

Attached documents:

Comment: MM42 - LPMM18/3493  Respondent: Trans Lease Services (Mrs Lisa Scott) 8586625  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

The increase from 7000 to a minimum of 14,800 sq m of industrial and storage is excessive

• Since being deleted from the 2014 plan this has been increased twice, doubling the area
• It is by far the largest new industrial allocation in any village in the borough
• There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.
• The Employment Land Needs Assessment showed a reduction in demand for industrial land.
• This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.
• Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerously high.

Attached documents:

Comment: MM42 - LPMM18/1552  Respondent: Michael R. Murphy 8589953  Agent:

MM42. Land at Burnt Common, London road Send Policy A58.
As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.

This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

MM27. MM41. MM42. and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

Attached documents:

**Comment**: MM42 - LPMM18/2262  **Respondent**: Mr Michael J Harris 8590209  **Agent**:

**MM42 Land at Burntcommon, London Road, Send, Policy A58**

This site, once again, is Green Belt land! The proposed industrial and storage area has now been increased by more than double the original plans, and is by far the largest amount of new industrial allocation in any of this borough's villages.

Slyfield already has unused capacity and therefore there is no need to use this Green Belt area for new industry or storage. Once again, there are no special circumstances and Policy MM9 is also contravened.

There is a reduction in demand for industrial land, as shown in the Employment Land Needs Assessment.

There is also the problem of much increased commercial traffic in surrounding roads, there being no proposal for a direct access either to or from the A3 for this site. This means that the Burntcommon Roundabout on the A247/B2215 crossroads (the only means of access to and exit from this site!) will be further gummed up with traffic than it is at present, and will lead to gridlock at peak times, together with another increase in nitrogen dioxide levels, which are already dangerous.

Attached documents:
Objections to modification MM43

I object to the plan to build a large industrial site at Burnt Common. Where is the evidence that so much industrial space is required in a small village, especially on Green Belt land? Surrounding roads will be unable to cope with the resulting, probably heavy traffic. This proposal was removed from a previous plan, so I object strongly to its re-introduction at twice the size.

There is empty industrial space all over the Borough. Send already has new industrial development in progress and there is no indication that major works to the A3 will be done before this is intended or that even if done it will alleviate the resulting traffic problems in the village or in Ripley. There does not seem to be any other village with such a huge new industrial development planned. This is unreasonable.

Attached documents:

MM42 – Burnt Common (policy A58)

I do not agree with the labelling of this site as being ‘strategically’ important It is GREEN BELT land, and I oppose the re-drawing of GREEN BELT lines simply to suit this proposal.

There are no apparent ‘special circumstances’ to warrant insetting this site from the GREEN BELT Other sites in the borough have unused capacity, and other ‘brownfield sites’ should firstly be fully considered and identified.

We have already witnessed increased commercial development (Send Business Centre, Vision Engineering) in the village.

There is no apparent or proven demand for extra industrial land in the village.

The road infrastructure is unsuitable, as the road accessing the site is in disrepair (cracks regularly) and cannot cope with existing traffic, let alone more vehicles leaving the site would have to cross onto the north-bound A3 slip road, which is fast-moving and has been the scene of many accidents in the recent past, some fatal.

The likely increase in traffic and noise would be inappropriate for a site bordering on residential areas on the roundabout.

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further.

The proposal to create a 4-way junction off the nearby A3 (policy A43a) is a waste of money and would only increase traffic noise and pollution through the villages.

WE object to this development and the proposed modification.

Attached documents:

MM27 / MM41 / MM42 / MM48 – Transport Strategy
The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’)

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (i.e. lanes) and clogging up the villages.

In summary, the modifications are simply too much for the village of Send and Burnt common, that already suffer from increased traffic and congestion / pollution.

Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’.

ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan.

It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising. A loss of more countryside/Green Belt would exacerbate this.

Abandoning the new A3 slip-road (policy A43a) would save money which could be better spent on other services for existing residents, who pay high levels of Council Tax.

(such measures could include traffic-calming, road repairs and noise reduction)

**Attached documents:**
MM42 As with MM41, the Council has persisted in ignoring local protest and again that this is greenbelt land. Evidence in the local area is that retail and office/light industrial space is in excess, with vacant premises and others being converted into residential flats. This aside, greenbelt land cannot be developed without exceptional circumstances, of which there is no evidence presented in the plan.

Attached documents:

Comment: MM42 - LPMM18/1602  Respondent: Mr Richard D Jarvis 8599201  Agent:

As with Policy A43, more information on the combined effect of proposals on traffic is required.

Comment: MM42 - LPMM18/2949  Respondent: Roger Newland 8600929  Agent:

MM42 - Land at Burnt Common London Road

This development adds to the strip development along the A3 which I believe will in time eventually lead to the break down of the Green Belt. Access for HGV's to the A3 is a major issue. It is not proven why a industrial development has to be provided in the Green Belt or whether there is demand for such a development given the large underdeveloped facilities held by GBC in the Slyfield and West Guildford areas. There is no special circumstances to develop this green belt site and therefore the proposal conflicts with Government and Council planning policy.

Attached documents:

Comment: MM42 - LPMM18/2139  Respondent: Susan Greenman 8606081  Agent:

MM42 - Land at Burnt Common, London Road, Send, Policy A58

I object again to the proposed increase from 7,000 to 14,800 sq.m of industrial and storage facilities.

This proposal was deleted from the 2014 plan and has since been increased twice which doubles this area. It will be the largest new industrial site of any village in the borough.

Why put a new industrial site in Send when the current Slyfield Industrial Estate has unused capacity. There are no special circumstances so it also contradicts MM9.

The Employment Land Needs Assessment showed a reduction in demand for industrial land. Send Business Centre is being increased by 25% which is enough industrial land for Send.

The narrow roads in the area will be unable to cope with the increase in traffic from this proposal and the pollution associated with the extra traffic.

Attached documents:
MM27, MM41, MM42 and MM48 - Transport Strategy

The traffic implications on Send from the proposed plans for Garlick's Arch, Burnt Common, Clockbarn and Aldertons added to nearby Gosden Hill and Wisley/Ockham are not being taken into account re the changes to the A3 and Clandon slip roads.

The impact from these developments on Send Barns Lane and Send Road will be huge. The roads in Send are already totally congested particularly during rush hour in the morning and evening. Send Road is now one of the main roads from Woking to the M25. Also from Guildford to Woking.

The increase in traffic will cause more chaos, noise, nitrogen dioxide pollution, gridlock and hazards.

Potters Lane, Send has now become a "Rat Run" in the morning and evening. Traffic starts at 5am and when there are problems on the northbound A3 (which is frequently) the traffic diverts down Potters Lane. This lane is in its name a "LANE" not a major road. It is narrow and has many bends some of which are blind and very dangerous. I have encountered huge lorries and it is only a question of time before there is a major accident and fatality. The Police I believe want this Lane shut off from the A3 due to the many accidents when drivers think it is the Ripley exit slip road. In fact there is now traffic using Potters Lane constantly all day long and throughout the night - often by taxi drivers.

I have written many times to the appropriate Councils and authorities on this specific problem - to no avail. We just have to wait for the accidents.

The increase in noise and pollution for the local residents in the Lane, is now a serious problem.

**Comment:** MM42 - LPMM18/902  **Respondent:** West Clandon Parish Council (John Stone) 8609217  **Agent:**

**Guildford Submission Local Plan: Strategy and Sites - Main Modifications**

Thank you for the opportunity to respond to the consultation on the above.

West Clandon Parish Council has very grave concerns about many of the proposed main modifications within the proposed plan and the subsequent impact on increased traffic problems on The Street, West Clandon (A247) which is already totally inappropriate to be classed as an A road and experiences many difficulties.

The road does not have the capacity to carry the expected increase in traffic. Problems already include:

1. The sharp bend at the Lime Grove junction with The Street (A247) where traffic routinely exceeds the 30mph limit.
2. The dangerous junction with the approach road to Clandon Station where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump.
3. The site lines for the exit of the Onslow Arms car park.
4. The narrowness of the road near Summers.
5. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement.
6. The sharp bend near Clandon Regis.
7. The narrowness of the road at the Bull’s Head Public House.
8. The speed of traffic past Clandon Junior School and in places the narrow footpath for children walking to school.
9. The sharp bend with poor sight lines in either direction at the Church.
10. The lack of a continuous footpath through the length of the village
11. The speed of traffic
12. The classification as an A-road without it having the capability of an A-road.

Our concerns also include the following:

Policy S2 MM2
We believe the OAN included in the Plan may be overstated. We note the latest ONS household projections and current uncertainties over the methodology to be used in the calculation of the OAN. These issues must be fully explored and outstanding issues resolved before the housing need is finalised if we are to have any confidence in the figure adopted.

We also object to any unmet need for housing in the Woking area being added to the Guildford Plan when the review of the Woking Plan provides an alternative mechanism for correcting any shortfall within the Woking area.

Guildford has been obliged to introduce additional green belt sites in the early years of the plan. Should these prove to be unnecessary, Green Belt will have been damaged without good reason.

There will be greatly increased traffic flow because of the following modifications:

1. MM41. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247.
2. MM35 The development of 1800 houses at Gosden Hill.
3. MM44 The development of 120 houses (new site) at Alderton’s Farm, Send Marsh.
4. MM42 The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic.
5. A43a The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247. We object to the proposed opening of the Burnt Common Rds as this will direct additional traffic along an unsuitable road. In any event this should not be considered until the A3 widening is completed.

As an alternative to access to the A3 at Burnt Common further consideration should be given to South facing slip roads at Ockham Park which will have less negative impact on unsuitable local roads.

In any event Policy ID2 (MM27) generally gives insufficient assurance that developments will not be allowed before the A3 widening scheme is committed in that it appears to allow a series of incremental developments each in itself unlikely to make an already difficult situation much worse. Cumulatively we are concerned that the severe impacts envisaged will occur by stealth.

We are pleased to see allowance made for environmental and traffic mitigation measures on the A247 through Clandon. Funding for this scheme is specifically linked in the Plan to MM41 Garlicks Arch and MM42 Burnt Common. Other schemes likely to have an impact on the A247 include MM35 (Gosden Hill) and A35 (Wisley Airfield) which do not have such a condition at present. This should be rectified in the final plan.

We note however, that while it may be possible to implement measures which have a positive impact on traffic speed and vehicle/pedestrian safety there is no easy solution to the problems of increased traffic volume that the above developments will produce. The development of Park Lane/Merrow Lane as an alternative route to the A3 and the improvement of the Railway Bridge at Merrow Park remain the only long-term solution and provision for a future scheme should be included in the Plan.

Attached documents:

Comment: MM42 - LPMM18/1061    Respondent: Allan Howlett 8656417    Agent:
Transport strategy MM27, MM41, MM42, MM48

The proposed developments will add to the already overcrowded roads, where journeys take far longer than necessary. Most residents now have to factor in the probability that there will be delays.

The road network is in desperate need of a major maintenance programme. In Send the surface at the traffic light intersection has completely broken up with holes appearing in all approaches. This non slip surface has broken down, wasted money, poor design. Or too much traffic?

The bridge over the A3 on the Clandon road has had the road surface pushed into the kerb resulting in large undulations that force motorists into the middle of the road.

Priority should be given to getting existing roads into a reasonable condition over the building new developments that will only increase traffic and make the matters worse. Most roads in the areas have kerb stones, and service covers dislodged and numerous potholes.

Who decides what a reasonable time is to queue on the roads into and out of Guildford and Woking getting to and from work. What is the environmental impact of thousands of cars, Lorries and busses queuing every morning and evening polluting the atmosphere, wasting fuel and residents and commuter’s time?

**Attached documents:**
Comment: MM42 - LPMM18/770  Respondent: Shaun Cheyne 8775169  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

This has been increased from 7000 to a minimum of 14,800 sq m of industrial and storage. Since being deleted from the 2014 plan this has been increased twice, doubling the area. It makes a mockery of the ‘consultations’ with residents as we’ve not only been ignored but the numbers have been escalated.

It is by far the largest new industrial allocation in any village in the borough

There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity.

There are no special circumstances so it also contradicts MM9.

The Employment Land Needs Assessment showed a reduction in demand for industrial sites.

Narrow surrounding roads will be gridlocked.

Comment: MM42 - LPMM18/775  Respondent: Shaun Cheyne 8775169  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Comment: MM42 - LPMM18/446  Respondent: Janet Manktelow 8793025  Agent:

MM42

The industrial development proposed at London Road at Burnt Common has increased dramatically. With no improvements proposed to the roads in the area this will be dangerous in the extreme.

The business and industrial increases proposed for Send ensure that there will be a bigger increase in our village than any other village in the Borough. This seems disproportionate and unfair.
Comment: MM42 - LPMM18/450  Respondent: Janet Manktelow 8793025  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic changes for this village are hideous. The situation of the 4 way junction will pile on the traffic nightmares for local people. No changes are planned to relieve congestion in the surrounding villages which already suffer congestion every day. The current A3 is blocked every morning and evening. Adding a four way junction will do nothing to relieve this situation. Any slight accident blocks within minutes and takes hours to clear.

Attached documents:

Comment: MM42 - LPMM18/1382  Respondent: Mr Paul Tubman 8794529  Agent:

This latest increase in proposed size of this industrial estate makes this more than double the size of what was originally proposed. This is far larger than any other industrial allocated area in any other village in the borough, and further underlines the merging of the Guildford conurbation with Send. This development together with the increased size of the Burnt Common development (MM42) and the proposed development at Gosden Hill Farm (Policy A25) will result in Send & Send Marsh / Burnt Common becoming part of the extended Guildford conurbation. This will change the local character of the area and goes directly against Policy D1 (6) in MM23 which states 'All new development will be designed to reflect the distinct local character of the area and will respond and reinforce locally distinct patterns of development.'

This proposed increase in development size also goes against policy MM9 that states 'inappropriate development will not be permitted unless very special circumstances can be demonstrated.' No such special circumstances have been demonstrated here, particularly when Slyfield Industrial Estate has unused capacity.

The Employment Lands Needs Assessment shows a reduced demand for industrial land in the area which begs the question why is this increase being proposed?

I object to this amendment.

Attached documents:

Comment: MM42 - LPMM18/950  Respondent: Wellesley Theodore Wallace 8803841  Agent:

Policy A43 : Land at Garlick’s Arch (MM 41)(MM 42)(MM 48)

The allocation for homes should not be increased from 400 to 550; even 400 homes is excessive. The additional allocation fails to pay proper regard to paragraph 154 of the NPPF and to ID3(1), (2)(c) and (7).

Requirement (Oe) under "Transport Strategy" recognises "the otherwise adverse material impacts on communities and the environment including in … West Clandon", This clearly refers to traffic on the A247. The Response of Surrey County Council ("SCC") to the 2014 Draft Plan included "the A247 is a very heavily trafficked A class road and carries a very heavy proportion of HGVs". This is significant coming from the Highway Authority. The current level of traffic including HGVs has certainly not lessened since 2014.
The additional traffic resulting from 150 more homes on Site 43 can only accentuate the "adverse material impacts", particularly in view of the commercial and goods traffic generated under Policy 58 which specifically refers to "storage and distribution". It is inescapable that a material proportion of the additional traffic will travel south along the A247, if only to avoid the junction of the A3 with the M25 and the M25 itself.

The Assessment by MK of Transport Impacts at para 2.3 forecast that the additional housing at Garlick’s Arch would result in 24 additional movements in the AM peak hour and an additional 25 in the PM peak hour and stated, "Additional mitigation may be required on the local road network where the impact will be at its highest." The forecast of only 24 or 25 additional movements at the peak hours generated by 150 additional homes seems remarkably low.

Requirement (Od) specifies a "contribution towards an off-site walking and cycle network to the village centre of Send, the Burnt Common Warehouse site and Clandon railway station".

Traffic management and environmental improvement on the A247 are also covered at Infrastructure Project LRN 26 to be delivered by SCC with the likely cost of £1m to be developer funded. There is no detail of what traffic management or mitigation is envisaged. It is not clear whether separate cycle lanes would be required in each direction or whether cycle lanes would be shared with pedestrians. It is difficult to see what traffic management or mitigation is practicable or indeed possible, particularly on Clandon Road and The Street.

The A247 is clearly not wide enough to accommodate even one cycle lane and road widening would involve extensive compulsory purchases, since, apart from the field between the bridge over the A3 and Green Lane, there is housing on both sides of the road. It would also involve felling many fine trees which contribute greatly to the character of West Clandon all of which is in the Green Belt. Most of the A247 only has a footpath on one side of the road, often quite narrow. When walking from the A43 site to the station it is necessary to cross the A247 four times.

The requirements at (Od) and (Oe) are devoid of any effect because the are in practice incapable of being met and therefore they do not comply with ID3(1), (2)(c) and (7).

Paragraph 154 of the NPPF states that Local Plans should be realistic. It includes the following, "Only policies that provide a clear indication of how a decision maker should react to a development proposal should be included in the plan". Policy A43 does not meet this requirement. ID3(10) is not sufficient.

The Statement of Common Ground dated 3 July 2018 signed on behalf of the Council and the developers during the public examination states at paragraph 10 that Site 43 "can be accessed by sustainable modes of transport including a well-established pedestrian network that incorporates pedestrian crossings on key desire lines" and bus routes 462/463 which follow routes incorporating Clandon Station. In fact there are no crossings at all between Site 43 and Clandon Station; further, since 1 September 2018 there have been no Sunday buses and during the week there are only seven buses daily arriving at the station from Burnt Common, the earliest being at 0759 and the last at 1857, and only five buses daily passing the station towards Burnt Common, the earliest being at 1005 and the last being at 1740; these buses are at intervals of at least two hours. SCC observed in 2014 that there was "a very limited bus route" along the A247. Although the September 2018 version of the Local Plan lists under "Opportunities" at (3) "improve bus frequency", any improvement would have to be dramatic to merit the description "sustainable mode of transport".

Policy A58 – Land around Burnt Common Warehouse (MM42) (MM48)

The allocation for either or a mix of light industrial, general industrial and storage and distribution should not be increased to a minimum of 14,800 sq m. The goods traffic generated would add to the adverse material impact on the A247 in Send and West Clandon.

The Transport Strategy Requirements at (Ob) and (Oc) fail to pay proper regard to ID3(1), (2)(c) and (7).The Requirements are too imprecise and either impossible to meet or impracticable and are therefore devoid of effect. Off-site walking and cycle networks under (Ob) could only be via the Burnt Common roundabout; it is impossible to see how this could be achieved safely at the roundabout; further, on the stretch of the A247 between the roundabout and the bridge over the A3 there is no scope for a cycle path and the only footpath is on the Ripley side of the road.

Policy A58 does not meet the requirements of paragraph 154 of the NPPF which includes the word "clear" twice.
Comment: MM42 - LPMM18/4952  Respondent: Brian Yeomans 8804833  Agent:

MM2 - policy S2. The examination should be re-opened because the housing figures should be revised in the light of the new ONS forecasts of population and households. The stated housing requirement is not a sound basis for the Local Plan or justification for such an extensive loss of Green Belt land

Attached documents:

Comment: MM42 - LPMM18/6100  Respondent: Alena Thomas 8805633  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

The latest proposals have more than doubled the size of this already drastic development of industrial and storage space, and there is nothing like it proposed in any other village in Guildford Borough. Why is everything dumped on Send? Brownfield sites are available for this building, and the Slyfield estate could more easily bear much of the burden - 'though less profitably for developers if that is your only consideration. The proposal therefore contradicts MM9 green belt provision.

Send Business Centre provides places for work and is also growing at present - that's fine although Tannery Lane is narrow and already busy, but surely this means Send has already taken a share of the proposed industrial development, the need for which has not by the way been proven any more than has the demand for residential building.

MM27 MM41 MM42 and MM48 / Transport Strategy

Proposed changes to the A3 and the Clandon slip roads (document 003a, sections 11.14 to 11.34) will help to feed traffic more quickly into the local road system - what then? Jams will feed back onto the major roads and cause massive problems for both local and longer-distance motorists. Remember my remarks in the beginning of the letter, yes, it was me standing in traffic trying to get on time to RSH for work.

GBC's assessment of possible solutions to this is extremely superficial - it's easy to write a few sentences promising infrastructure will follow but this is a real problem to which there won't be an acceptable solution: a proper amount of infrastructure to cope with this amount of development will devastate the green belt and destroy the character of the area. Will make the life of existing and new residents miserable, extend commute time and pollute the air.

Your current document suggests (Appendix 11.4 of GBC Responses to Matters, Issues and Questions reference 003b) that the increase in morning traffic on the A247 Send Road will be just 3% - after adding nearly 40% to the housing stock of the village. The estimate is out by an order of ten and as far as I am concerned is just plain falsification.

Attached documents:

Comment: MM42 - LPMM18/5208  Respondent: Celia Howard 8817121  Agent:
I write to object to the local plan for Send

I feel for all the sites in this area no consideration appears to have been given to the congestion on local roads, school places/parking and the medical centre where it's difficult to get an appointment and this is now (looking further afield the parking and appointments at the Royal Surrey are also hard to come by)

I think the council should think carefully before wiping out the green belt and turning another Surrey village into suburbia a corridor from Guildford to Woking

We need to keep the small pockets of countryside for the wildlife and our health benefits instead of increasing the pollution in the village

Attached documents:

I also object to the Burnt Common development of land [Reference MM42] Public opinion is well documented yet the council has the audacity to think it has the right to increase the industrial storage space to around 14,800 sq mtrs. Building here makes no sense as Slyfield has capacity and space for extra storage units and two major roads linking the network to Woking and the A3

Attached documents:

I object to the increase in the minimum floor space at Burntcommon Warehouse. Slyfield industrial site, which is nearby, has unused capacity which should be utilised first before even considering using Burntcommon

The need for more industrial sites in the Green Belt is unjustified and with an additional increase at Send Business Centre this will mean Send has more Industrial space than any other village.

Send is in danger of being overdeveloped and will lose its Village identity. The main road to Woking through Send is already congested and I am concerned about the level of commercial traffic that will be moving to and from this proposed site.
Toxic levels of nitrogen dioxide are already dangerous in our area without the addition of all the extra vehicle congestion that will occur from this site. It is not acceptable to allow this proposed site when there is no proven demand for this sort of development.

**MM27 MM41 MM42 and MM48 Transport Strategy**

Implications to traffic increasing to thousands more cars using our local roads and causing complete chaos, gridlock and air pollution have not been addressed. I therefore object and wish for more effort to be used to sort this major problem out.

Attached documents:

---

**Comment: MM42 - LPMM18/421  Respondent: Mr Howard Turner 8819457  Agent:**

I object to the huge increase in industrial/light industrial/storage and distribution floorspace, on the grounds of inappropriate impact on the already over-stretched transport network. The A3 and associated highways just cannot cope with the increased volume of traffic that this Syfield type development would impose.

Attached documents:

---

**Comment: MM42 - LPMM18/4970  Respondent: Lynn Yeo 8839521  Agent:**

I object to MM41, MM42, MM44, MM9, MM27, POLICY S2.

At the public examination, the figure for Guildford Borough housing need used by the inspector was 789 per year. This figure was obtained by Guildford Borough Council (GBC) Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated. The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year. In addition, using data from the Office of National Statistics population forecasts, suggests that the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of GBC consultants figures which have always been very suspect. I believe the number of houses per year to be unreasonably high, and that the actual figure should be revised downwards for more responsible and reasonable levels of development.

Attached documents:

---

**Comment: MM42 - LPMM18/4976  Respondent: Lynn Yeo 8839521  Agent:**

I object to MM27, MM41, MM42 and MM48 Transport Strategy.

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful way addressed by the Road changes of the A3 and Clandon Slip Roads. This
massive increase in traffic heading to and from Woking along Send Barns Road and Send Road, which are single lane roads, will cause horrendous noise, air pollution delays and gridlock. I live just off Send Road on Wharf Lane and find the road is already congested during rush hours. Additional development to the scale described in the plan would undoubtedly result in significant increased congestion, air and noise pollution and very real decrease in quality of life for Send’s residents.

Attached documents:

Comment: MM42 - LPMM18/4979  Respondent: Lynn Yeo 8839521  Agent:

I object to MM42 Land at Burnt Common, London Road, Send Policy A58.

As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land, why has Send been picked on again to have the largest industrial allocation in any village in the Borough? This is a further increase of 25% making it a huge increase in Send, bigger than any other village. There is no need for new industrial sites when Slyfield is has unused capacity. There are no special circumstances so it contradicts MM9. There is no need to put Industrial premises on precious Green Belt. This site has, since being deleted from 2014 plans, been increased twice from 7,000 sqm, which was already too much to an even more absurd minimum of 14,800 sqm.

Narrow surrounding roads will be affected by heavy traffic for the site, increasing already dangerously high nitrogen dioxide levels.

Attached documents:

Comment: MM42 - LPMM18/5175  Respondent: David Burnett 8839553  Agent:

MM42 Land at Burnt Common

I object to the modifications. Now that the site has increased from 7000 to 14800 sq m of industrial and storage – this has been increased twice, having been previously deleted from the 2014 plan. It has now doubled the area. It is by far the largest new industrial allocation in any village. There is unused industrial capacity at Slyfield so there is no need to site development land in the Green Belt. It would be far better to concentrate attention on improvements to Slyfield Industrial Estate. The Employment Land Needs Assessment showed a reduction in demand for industrial land, and this allocation is on top of a 25% increase at Send Business Centre. When this is complete there would be a bigger concentration of industrial units in Send than in any other village. The narrow village roads will not cope and this will affect air quality adversely.

Attached documents:

Comment: MM42 - LPMM18/185  Respondent: Mr Charles Gibson 8853025  Agent:

MM42 Land at Burnt Common, Policy A58

• The proposed increase from 7000 to 14800 sq metres of industrial units and storage is grossly excessive and wholly unnecessary given that Slyfield in Guildford has unused capacity. There is no proven demand.
• There are no special circumstances so MM9 is contradicted.
• The site is within the Green Belt
• The Employment Land Needs Assessment showed a reduction in demand for industrial land
• On top of the 25% increase at Send Business Centre there will be a far greater concentration of industrial/storage units in Send than in any other village in the Borough.
• Undue pressure will be placed on local roads and particularly Send Barns Lane and Send Road

Attached documents:

**Comment:** MM42 - LPMM18/190  **Respondent:** Mr Charles Gibson 8853025  **Agent:**

**MM27, MM41, MM42 and MM48 Transport Strategy**

• The traffic implications for Send and Send Marsh as a result of the above modifications are not addressed by the A3 changes and the proposed Clandon slip roads. Indeed the traffic on Send Barns Lane and Send Road will suffer an increase not merely on account of the proposed new housing but also as a result of traffic and particularly commercial traffic using these new slip roads to access Woking rather than at present accessing Woking via Guildford
• No proper assessment has been made by the Council to any od the proposed development yet alone the modifications. Increased noise and pollution will add to the inevitable delays and gridlock on local roads

Attached documents:

**Comment:** MM42 - LPMM18/1008  **Respondent:** Desmond McCann 8854785  **Agent:**

**MM42 land at Burnt Common London Road, Send Policy A58**

I object to this proposal. Once again this development is wrong headed - not because the site should remain undeveloped but because it is the wrong kind of development.

• A huge new industrial site is not needed and certainly not here as it will suck more traffic into the village, once again putting strain on roads and services.
• I understand the requirement for more industrial space is far from proven. I think the current space is currently unlet and that there is still capacity at Slyfield.
• This space would provide land for social housing or starter homes if good noise barriers were built along side the A3 and could also possibly provide for the traveller site, which if properly screened would be far more accessible and less intrusive than destroying Send Hill, which is too narrow for caravans and which opens out on to one of the few open green spaces in the village.

Attached documents:

**Comment:** MM42 - LPMM18/2286  **Respondent:** P A Clarke 8875361  **Agent:**

MM42 I OBJECT to the proposed increase in the size of the industrial development on the land at Burnt Common, London Road. The size of the area has been more than doubled from 7,000 sq m to a minimum of 14,800 sq m when the
Demand for industrial land is falling. There is no need to build industrial units here in the Green Belt when there are still empty brownfield industrial sites in the borough at Slyfield. The impact of additional car and HGV traffic generated by this scheme will place an additional burden on the already overcrowded local roads; the Burnt Common Roundabout at the junction of the B2215 and A247 being difficult enough to navigate now in the rush hour without any additional traffic.

Attached documents:

**Comment:** MM42 - LPMM18/2124  **Respondent:** John Telfer 8880385  **Agent:**

MM42 Land at Burnt Common, London Road A58

This proposal was deleted from 2014 plan but it is by far the largest industrial scheme in any village in the borough and it is totally unnecessary because it contradicts MM9 further there is space capacity at Slyfield Business Centre, therefore the proven demand exists and contradicts the findings of the Employment Land Needs Assessment. The Local roads are clearly inadequate for heavy articulated lorries where as the roads at Slyfield are already in place.

Attached documents:

**Comment:** MM42 - LPMM18/2390  **Respondent:** Marianne Pascoe 8896961  **Agent:**

MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand

Comment: MM42 - LPMM18/2650   Respondent: Andrew Russell 8920353   Agent: 

MM27, MM41, MM42 and MM48

As a resident in Send Marsh I use the car every day for travel to and from work and it is preposterous that no proper assessment as to the aggregate traffic impact on Send Barns Lane and Send Marsh Road will be affected. The pace of development in Woking and the proposed scale of new residential development in Guildford and more specifically Garlicks Arch (MM41) and potentially Aldertons Farm (MM44) will have a major impact on the roads in the immediate area, a situation which has got steadily worse during the last five to ten years.

Whilst I accept that there has been population growth Surrey and particularly West Surrey, is a popular place to live and the traffic implications for Send Marsh are worrying. The A3 is gridlocked on a regular basis, particularly during school term time and it often takes me over an hour to reach the office which via the A3 is only some 5.5 miles distant.

The proposed development is 550 houses at Garlicks Arch, 60 units at Clockbarn, 40 units at Winds Ridge adds over 770 houses to the 1,700 currently in Send, an increase of some 45% which is simply too much for the current infrastructure to accommodate.

I find it abhorrent that Guildford Borough Council are proposing to set aside such an astronomical number in the North-West part of the Borough when there are far more appropriate sites for development closer to Guildford Town Centre where there are adequate transport nodes, particularly following the recent consent on appeal for the redevelopment of Guildford mainline railway station.

MM42 - Land at Burnt Common Road, Send:

The original proposal of 7,000 sq metres has now been doubled to some 14,800 sq metres, a phenomenal amount of industrial property that I would question is neccessary. As an active commercial property agent dealing with amongst other issues Industrial and Warehouse property. There are far more appropriate Industrial locations in Guildford, more specifically Slyfield which is owned by Guildford Borough Council where there is a significant amount of unused capacity.

The Employment Land Needs Assessment demonstrated a reduction in demand for Industrial Land, not an increase in demand. Guildford has never been a major distribution hub and given the amount of available Industrial/Warehouse property on the market at the present time, I question the need for such a significant increase in industrial floor-space which will only increase vehicle movement and more specifically the movement of large Commercial vehicles.

Attached documents:
**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

**Attached documents:**

---

**Comment: MM42 - LPMM18/3900  Respondent: Claire Bridges 8923905  Agent:**

**MM42 Land at Burnt Common, London Road Send, Policy A58**

I object at the proposal now to double the original area proposed especially in view of the increased capacity at the Send Business Centre and the spare capacity at Slyfield. This will also generate additional traffic consisting of vans and larger vehicles which will all travel through the narrow and already busy roads of Send and Ripley. This will add to further congestion and noise and air pollution.

It will bring safety concerns for local residents and pedestrians in the village who will be using the local recreation ground and need to cross the road.

It will be better to centralise and develop Slyfield Industrial Estate where there is already existing infrastructure and spare capacity.

**Attached documents:**

---

**Comment: MM42 - LPMM18/4430  Respondent: Annie Cross 8926529  Agent:**

**MM42 - Burnt Common**

Shortly after the GBC Public Inquiry, this proposed employment site was doubled from 7,000 sq m to 14,000+ sq m. This site could provide an employment area, but proportionate to the character of the surrounding area as it is Greenbelt land. Public transport is poor at this site and car usage is inevitable.

**Attached documents:**

---

**Comment: MM42 - LPMM18/4767  Respondent: Dan Moss 9039553  Agent:**

**MM27. MM41. MM42.and MM48-Transport Strategy.**

This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why? The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents, trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane.

This massive increase in traffic of all sorts heading to and from Woking along. Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

**Attached documents:**

---

**Comment: MM42 - LPMM18/4614  Respondent: Victoria Sandu 9042049  Agent:**

**Change MM42**

I object to this change for the following reasons:

- The increase in proposed size of this industrial estate makes this more than double the size of that originally proposed. This is far larger than any other industrial area in any other village in Guildford Borough, and further suggests to the merging of the Guildford conurbation with Send / Send Marsh. This development together with the increased size of the Burnt Common development (MM42) and the proposed development at Gosden Hill Farm (Policy A25) will result in Send becoming part of the extended Guildford conurbation along the A3. This will change the local character of the area and goes directly against Policy D1 (6) in MM23 which states 'All new development will be designed to reflect the distinct local character of the area and will respond and reinforce locally distinct patterns of development.' Clearly this change does not.

- The proposed increase in development size goes against policy MM9 that states 'inappropriate development will not be permitted unless VERY SPECIAL CIRCUMSTANCES can be demonstrated.' No such special circumstances have
been demonstrated, and is particularly surprising when Slyfield Industrial Estate has unused capacity, and the Employment Lands Needs Assessment showed a reduced demand for industrial land in the area.

Attached documents:

Comment: MM42 - LPMM18/397  Respondent: Shelagh Smith 10540161  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I strongly object to the increase from 7000 to a minimum of 14,800 sq m of industrial and storage.

This takes Green Belt land and is at odds with your Green Belt Policy – MM9. There simply isn’t the infrastructure to accommodate the increased and heavy traffic load; e.g. potholes continually form, frequent traffic jams are now the norm in the area and parking at facilities such as at the Villages Surgery, the Shell/Waitrose Garage, and Send and Ripley village centres is impossible at certain and frequent times. In addition, there is capacity for further industrial and storage use at Slyfield.

Attached documents:

Comment: MM42 - LPMM18/402  Respondent: Shelagh Smith 10540161  Agent:

MM27, MM41, MM42, MM48 Transport Strategy

I strongly object to even more traffic resulting from your intentions in the plan modifications. As above, the increased pollution and the resulting gridlocked roads in the immediate area are already evident. The A3 and local A Roads are already at breaking point and this has a continuous overflow impact on surrounding village and the nearby narrow B roads. Your assessment for your proposed transport strategy is unrealistic and inadequate.

Attached documents:

Comment: MM42 - LPMM18/2933  Respondent: Sarah Wright 10543937  Agent:

Policy A58 Land at Burnt Common (Modification MM42)

I object to modifications MM42 Land at Burnt Common due to the following points:

There is no requirement for new (and certainly not increased) industrial or warehouse space as there is ample availability at Slyfield and Guildford Industrial estates, developing in this way is pure stupidity and is just building for the sake of it.

Additionally, this site is in the Green Belt, there are no exceptional circumstances to justify development here.

This proposal completely contradicts the statement MM9 makes.

According to the latest Employment Land Needs Assessment there is a reduction in demand for industrial land in the whole borough. Everywhere you look around the borough there are empty industrial buildings! Again…pure stupidity.
Generally transport evidence for this policy is incomplete and unreliable. What would happen in reality would be serious accidents, major traffic jams twice a day and therefore excessive pollution.

Any extra traffic would cause traffic chaos in the local area with its small roads, adding commercial vehicles to this would be completely unsustainable.

After this site was deleted from the 2014 Local Plan due to massive objections, it has now been re introduced and doubled in size, farcical, especially on top of a 25% increase in size of Send Business Centre. This results in an excessive concentration in this village than any other in the borough. And there’s no requirement for it!

Attached documents:

Comment: MM42 - LPMM18/2938  Respondent: Sarah Wright 10543937  Agent:

Object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn’t cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.

Attached documents:

Comment: MM42 - LPMM18/314  Respondent: Mrs Janet Govey 10544353  Agent:

For planning for this area has at least doubled in size since the original 2014 plan

It will be the largest industrial allocation any village in the area if it goes through

Why do we need to put industrial areas on greenbelt when Sly Field is sitting there on used

Assessments have shown that there is a reduction in demand for industrial land so why not use greyland

Send already has a 25% increase of the business centre this makes it even bigger

The infrastructure of the area will not cope and the roads will be gridlocked there will be contamination and pollution in the air

Attached documents:

Comment: MM42 - LPMM18/358  Respondent: Mrs Janet Govey 10544353  Agent:
MM42 policy A58

The industrial storage area has doubled in size since it was originally deleted in 2014 it is by far the largest industrial area in the borough huge concentration and send, the land assessment shows that there is a reduction in demand for industrial land. Why do we have a new industrial estate in send when we have Slyfield Which is used and has the capacity.

Attached documents:

Comment: MM42 - LPMM18/2606  Respondent: Ian Cameron 10562049  Agent:

I am objecting to your modification development reference MM42 at Burnt Common, London Road, Send, Policy A58.

On the following grounds:
There seems something questionable about your preference for this development now, after it was cancelled earlier.
In general I don't like to see Green Belt being eroded bit by bit, but specially here - for no good reason.
This is actually still a piece of genuine Green Belt, and I do not think you have justified the " very special" circumstances required for using it at all, and particularly for something as urban as an industrial estate.
Your proposed increase in capacity is just adding insult to injury.

Also, the long-term effect will be: with it being in a triangle and adjoining with land occupied by Ewbank Auction house at the tip of the triangle, eventually, from the tip, along the A3, there will be only about 500yds of Green Belt to the borders of Burpham, as extended by Gosden Hill development.
Therefore, in less that 10 years, what was mostly Green Belt will be one (not quite but almost) huge urban sprawl from Guildford to Ripley.

I am objecting to all your modification developments reference MM41, MM42 and MM44, Policies A43, A58, and A63 - taken as a whole.
These are huge changes in relation to the size of the village.
Their impact will be devastating. Thinking about the inevitable traffic chaos alone fills me with gloom.

You have gone over the top in targeting Send, like as if you have a vendetta.

Comment: MM42 - LPMM18/2194  Respondent: John Creasey 10563457  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I object to the amount of land planned for industrial and storage use and would make this the largest industrial allocation in any village in the borough. This will be on previous green belt land, which is completely unnecessary when Slyfield has unused capacity.

The increase in from 7,000 to a minimum of 148000 sq.m is out of proportion to the size of the village.

<tbody>
<tr>
<td>I object to this proposal because the site is not suitable for the size of development envisaged. Burnt Common and the surrounding area already has more traffic than the roads can cope with at times. A further 14800 sq.m. of industrial and storage space would not only greatly increase the local traffic of private vehicles but also large commercial vehicles for</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
which local roads were not designed. This will only lead to more congestion and danger on local roads. There are other more suitable brown fill sites in Surrey which should be utilised before encroaching on the Green Belt.

Attached documents:

Comment: MM42 - LPMM18/215  Respondent: Clare McCann 10677665  Agent:

MM42 land at Burnt Common London Road, Send Policy A58

Once again this development is wrong headed - not because the site should remain undeveloped but because it is the wrong kind of development.

- A huge new industrial site is not needed and certainly not here as it will suck more traffic into the village, once again putting strain on roads and services.
- I understand the requirement for more industrial space is far from proven. I think the current space is currently unlet and that there is still capacity at Slyfield.
- This space would provide land for social housing or starter homes if good noise barriers were built along side the A3 and could also possibly provide for the traveller site, which if properly screened would be far more accessible and less intrusive than destroying Send Hill, which is too narrow for caravans and which opens out on to one of the few open green spaces in the village.

Attached documents:

Comment: MM42 - LPMM18/5001  Respondent: Ben Gamble 10701537  Agent:

I make the following comments in regard to the modifications to the Local Plan:

Sites A43 Garlick’s Arch; A63 Aldertons Farm; and A58 Burnt Common Strategic Employment Site will have significant combined impacts upon the villages of Ripley, Send and Send Marsh. The development of these sites will increase the traffic on already over crowded and busy roads in these villages.

It is extremely concerning that there does not seem to be any firm commitment to the construction of policy site A43a the A3 Burnt Common slip roads during the period of the Plan. It is vital that this is constructed prior to developing the above sites.

The development of these site do not provide enough community infrastructure Ripley Primary School has recently been closed by Surrey County Council. The Villages Medical Centre is already heavily subscribed.

Attached documents:

Comment: MM42 - LPMM18/1120  Respondent: Alison Drennan 10717985  Agent:

MM42 LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58
• I object to the proposal that an industrial unit be developed in this area, and the failure to demonstrate need or benefit.
• I object to GBC proposing this development in the face of the Employment Land Needs assessment showing a reduction in demand for industrial land. It is not desired nor justifiable.
• I object to GBC proposing building this site, without demonstrating special circumstances and contradicting
• I object to GBC proposing the development of industrial sites in the Green Belt where there is unused capacity in Slyfield.
• I object that this proposal, coupled with 25% increase at Send Business Centre means there is a much bigger concentration of such land use with no proven demand, and is both disproportionate and unfair when comparing Send with other villages.

Attached documents:

Comment: MM42 - LPMM18/1125  Respondent: Alison Drennan 10717985  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM42 - LPMM18/705  Respondent: Zareena Linney 10718625  Agent:

MM42

Increase on this industrial site means more lorries which are cracking and damaging our houses down Send Road. The road congestion from large heavy and often speeding and weight is bad and damaging houses.
The speed is not monitored well. Health and safety risks. Roads are not of a high standard.
Pollution concerns how will this be monitored and controlled?
Nitrogen dioxide levels are too high. could impact on health and nature would need to be checked.

Attached documents:

Comment: MM42 - LPMM18/709  Respondent: Zareena Linney 10718625  Agent:

MM27, MM41MM42 and MM48

Traffic implication again as more cars will use my road Send road, as it is my son is learning to drive and the road is too congestion for us to even get out of. The speeding and level of traffic dangerous. The house has experienced cracking and damage due to it being roadside and volume and amount of traffic.
Will we as home owners be compensated? we have complained previously? the increase in volume of traffic in Send Road is damaging our house and its losing value and council increasing numbers and traffic this will make it worse.

Its often gridlock in Send road outside our house. If an incident on A3 nothing moves. Its impacting on our ability to work/drive and move about.

Pollution would be increased with even more traffic and we may have health issues due to this. With weight and volume of traffic the house cracking i mentioned could become unsafe made worst by the councils plans.

Attached documents:

Comment: MM42 - LPMM18/5068  Respondent: Stewart Fenton 10719297   Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I object to this development. There is no proven special circumstances for any new industrial and storage development in the Green Belt. Slyfield Industrial Estate already has spare capacity and The Employment Land Needs Assessment showed a reduction in demand for industrial land. This means that the previous plan for 7000 sq m was not justified and now there is a proposed increase to a minimum of 14,800 sq m.

MM27 MM41 MM42 and MM48 Transport Strategy

I object to the changes to the A3 junction. They will encourage more traffic from the A3 to divert through Send in order to gain access to and from Woking and beyond. This will cause more traffic problems on Send Barns Lane and Send Road, which are already subject to heavy congestion on a daily basis, particularly during rush hours. This will be in addition to the extra traffic that will result from the increased development in and around the immediate area.

Attached documents:

Comment: MM42 - LPMM18/722  Respondent: Linda Holland 10719553   Agent:

MM27/MM41/MM42 and MM48

The traffic implications for the above have not been adequately addressed and no proper assessment has taken place bearing in mind more traffic increased noise nitrogen pollution delays and gridlock

Attached documents:

Comment: MM42 - LPMM18/2214  Respondent: Y Beraud 10721089   Agent:

I object to the recent proposed plan for MM42 Land at Burnt Common London Road Send Policy A58, since being deleted from the 2014 plan this has been increased twice doubling the area. IT IS BY FAR THE LARGEST NEW INDUSTRIAL ALLOCATION IN ANY VILLAGE IN THE BOROUGH. There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are No special circumstances so it contradicts MM9. The employment land needs Assessment showed a reduction in demand for industrial land. This, on top of a 25% increase at
Send Business Centre is making a much bigger concentration in Send than any other village with No proven demand. NITROGEN DIOXIDE levels are already dangerously high. Surrounding roads will continue to be gridlocked, as is the current situation.

Attached documents:

Comment: MM42 - LPMM18/2219  Respondent: Y Beraud 10721089  Agent:

I object to G.B.C MM27, MM41, MM42 AND MM48 TRANSPORT STRATEGY

Traffic implications for Send Garlick's Arch, Burnt Common, Clockbarn and Alderton's Farm added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. G.B.C offer fine words but NO proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased Noise, Nitrogen pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/1143  Respondent: L Beraud 10721121  Agent:

I object to the recent proposed plan for MM42 Land at Burnt Common London Road Send Policy A58, Since being deleted from the 2014 plan this has been increased twice doubling the area. MM42 Land at Burnt Common Policy A58 This was I believe deleted form the 2014 plan yet now it has been increased twice and therefore doubling the area please explain how can this be allowed

I would like to be informed as to why unused capacity of the industrial land at Slyfield is not being used first before this application in Send

Attached documents:

Comment: MM42 - LPMM18/2054  Respondent: Judith Pound 10723553  Agent:

Land at Burnt Common Road MM42 - I am marginally more sympathetic to increased industrial land if it genuinely creates local employment so that the village doesn't become purely a dormitory for, in particular, London, but only if such development is necessary. As this again uses Green Belt land, I do not see where the necessity comes in, when there is unused capacity at the existing Slyfield site. Such a proposal would surely therefore breach MM9.

Attached documents:

Comment: MM42 - LPMM18/386  Respondent: Hilary Sewter 10724897  Agent:

I object to MM42 Land at Burnt Common, London Road, Send, Policy A58 because:-

• This development has been increased twice and is now DOUBLE the original 2014 Plan. That plan was deleted.
• No other village in the Borough comes close to this amount of new industrial allocation.
• Slyfield has unused capacity for this type of development.
• This policy contravenes Green Belt legislation MM9.
• In the current political climate the Employment Lands Need Assessment indicated a reduction in demand for industrial land. This, together with the 25% increase in Send Business Centre, means an unreasonably large amount of industrial land in Send. Bigger than in any other village.
• The type of vehicles that would serve these industrial sites are unsuited to the existing Roads, some of which are country lanes with no passing places.

Attached documents:

Comment: MM42 - LPMM18/391  Respondent: Hilary Sewter 10724897  Agent:

I object to MM27 MM41 MM42 and MM48 Transport Strategy because:-

Currently, heavy traffic from the A3 already heads to Woking through Send and even small roadworks cause major traffic jams, particularly at rush hour. This will be exacerbated when the proposed changes to the A3 improvements take place. With the extra industrial and housing developments in the areas mentioned above, Send will regularly become gridlocked.

Attached documents:
Comment: MM42 - LPMM18/1991  Respondent: Gill Love 10728993  Agent:

I OBJECT to MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous

Attached documents:

- **MM42 – Burnt Common (policy A58)**

I do not agree with the labelling of this site as being ‘strategically’ important

It is GREEN BELT land, and I oppose the re-drawing of GREEN BELT lines simply to suit this proposal

There are no ‘special circumstances’ to warrant insetting this site from the GREEN BELT

Other sites in the borough have unused capacity

Other ‘brownfield sites’ should firstly be fully considered and identified

We have already witnessed commercial development (Send Business Centre, Vision Engineering) in the village

There is no proven demand for extra industrial land in the village

The road infrastructure is unsuitable, as the road accessing the site is in disrepair Vehicles leaving the site would have to cross onto the north-bound A3 slip road, which has been the scene of many accidents in the recent past, some fatal.

The likely increase in traffic and noise would be inappropriate for the site
Levels of pollution (such as nitrogen dioxide) are already increasing

The proposal to create a 4-way junction off the nearby A3 (policy A43a) is a waste of money and would only increase traffic noise and pollution through the locality

*I OBJECT to this development and the proposed modification*

Attached documents:

**Comment:** MM42 - LPMM18/4675  **Respondent:** K. Croxford 10729185  **Agent:**

**MM27 / MM41 / MM42 / MM48 – Transport Strategy**

Regarding road traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley)

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’)

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane)

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane)

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, any further developments will create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages

The modifications are simply too much for the villages of Send and Burnt common, that already suffer from increased traffic and congestion / pollution

Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’

ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan. Send residents have repeatedly been voicing their concerns in previous feedback, but these have been largely ignored

It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking

Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising.
A loss of more countryside/Green Belt/nature/openness would exacerbate this

Abandoning the new A3 slip-road (policy A43a) would save a great deal of money which could be better spent on other services for existing residents, who already pay substantial levels of Council Tax (such measures could include traffic-calmimg, road repairs and noise reduction)

Local residents and Parish Councils feel they are now being ‘punished’ for simply voicing their concerns over the years – concerns which ONS and other boroughs seem to be taking heed of – except, it would seem, Guildford Borough Council

Attached documents:

Comment: MM42 - LPMM18/3822  Respondent: Richard Croxford 10729281  Agent:

MM42 – Burnt Common (policy A58)

This was originally proposed to be a modest development, was then increased (to a minimum figure), and has now expanded hugely to a minimum of 14,800 square feet

I do not agree with the labelling of this site as being ‘strategically’ important

It is GREEN BELT land, and I oppose the re-drawing of GREEN BELT lines simply to suit this proposal

There are no apparent ‘special circumstances’ to warrant insetting this site from the GREEN BELT

Other sites in the borough have unused capacity, and other ‘brownfield sites’ should firstly be fully considered and identified

We have already witnessed increased commercial development (Send Business Centre, Vision Engineering) in the village

There is no apparent or proven demand for extra industrial land in the village

The road infrastructure is unsuitable, as the road accessing the site is in disrepair (cracks regularly) and cannot cope with existing traffic, let alone more

Vehicles leaving the site would have to cross onto the north-bound A3 slip road, which is fast-moving and has been the scene of many accidents in the recent past, some fatal.

The likely increase in traffic and noise would be inappropriate for a site bordering on residential areas on the roundabout

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

The proposal to create a 4-way junction off the nearby A3 (policy A43a) is a waste of money and would only increase traffic noise and pollution through the villages

Therefore I OBJECT to this development and the proposed modification

Attached documents:

Comment: MM42 - LPMM18/3829  Respondent: Richard Croxford 10729281  Agent:
The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

In summary, the modifications are simply too much for the village of Send and Burnt common, that already suffer from increased traffic and congestion / pollution.

- Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’

- ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan.

- Send residents have repeatedly been voicing their concerns in previous feedback, but these have been largely ignored.

- It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

- Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising. A loss of more countryside/Green Belt would exacerbate this.

- Abandoning the new A3 slip-road (policy A43a) would save money which could be better spent on other services for existing residents, who pay high levels of Council Tax (such measures could include traffic-calming, road repairs and noise reduction).

Many residents feel they are now being ‘punished’ for simply voicing their concerns over the years.

The Wisley airfield could perhaps be re-considered for some light industrial development, if demand can be proven, given its greater proximity to the M25/A3.
It is also better suited to having an appropriate traveller pitch allocation (instead of Winds Rush A44 – practically opposite the cemetery!!) as part of a mixed development

**MM42 Land at Burnt Common, London Road, Send Policy A58**

There is no need to put new industrial sites in this Green Belt land when Slyfield site still has unused land for this purpose.

**Attached documents:**

**Comment:** MM42 - LPMM18/1463  **Respondent:** Leslie Bowerman 10732193  **Agent:**

3) MM42. Land at Burnt Common, London Road, Send. Policy A58.

I strongly object to this as the area concerned has been increased from 7,000sqm to a minimum of 14,800sqm. Is this serious or is it a mistake? If this is a minimum, how will it be enforced if too few applications are made. And presumably without a maximum, the sky is the limit.

Since being deleted from the 2014 plan this has been increased twice, at least doubling the size, making it the largest new industrial allocation in any village in the area and with no evidence of need being produced. This sounds very much like another ‘punitive’ instance.

In any event there is absolutely no need to place new industrial sites in the Green Belt, especially when there is available space at Slyfield. There are no special circumstances so it would appear to be contrary to MM9. Indeed, the Employment Land Needs Assessment showed a reduction in demand for industrial land.

This proposal is additional to the 25% enlargement at the so-called ‘Send Business Centre’ in which case there will be a larger concentration in Send than any other village and, crucially, no evidence of demand. What is going on? Narrow, winding single-lane lanes around the Business Centre will lead to frequent gridlock. Nitrogen dioxide levels are already dangerous.

**Attached documents:**

**Comment:** MM42 - LPMM18/1468  **Respondent:** Leslie Bowerman 10732193  **Agent:**

5) Objection applying generally to MM27, MM41, MM42 & MM48. Transport Strategy,

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons when considered with nearby Gosden Hill and Wisley/Ockham are not sufficiently dealt with by the A3 changes and the Clandon slip-roads. The over-all effect of the total extra traffic on Send Barns Lane and Send Road does not appear to have been addressed,
bearing in mind that thousands of extra cars and trade vehicles, combined with HGVs will be going to and from Woking every day, causing increased noise, pollution, delays and tail-backs.

Attached documents:

**Comment: MM42 - LPMM18/1083  ** **Respondent: Ruth Hunter 10773409  ** **Agent:**

**OBJECT to MM41 and MM42 and MM9 and MM27 and MM48**

I strongly object to main modifications to above policies.

The increase in the amount of new houses (MM41) is preposterous. It is too much for the village and will create insurmountable problems in destroying natural habitats, Flora and fauna; the traffic congestion will block roads and access for residents and emergency services; there will be flooding and the infrastructure and facilities of Ripley and Send stretched to breaking point. This is an irresponsible plan which should not go ahead.

Re MM42, there is no need for so much industrial warehousing when Slyfield is not running at capacity. It is too much for our villages and goes against everything in MM9.

The proposed changes to A3 at Burnt Common has not been properly assessed and will cause chaos on our roads and risk safety of many resident children and vulnerable elderly.

Please re think these modifications and stop this unnecessary development.

**Attached documents:**

**Comment: MM42 - LPMM18/4731  ** **Respondent: Debbie Leane 10742753  ** **Agent:**

**MM42 Land at Burnt Common, London Road, Send, Policy A58**

I strongly object to the increase from 7000 to a minimum of 14,800 sq m of industrial and storage. This would be the largest new industrial site in any village within the Guildford borough. More importantly, there is no need for such a new industrial site when Slyfield in Guildford currently has empty sites and units. In fact, if you look at the Employment Land Needs Assessment, it showed demand for industrial land has decreased. Such a huge allocation will only add to the traffic problems we currently have along our narrow surrounding roads. These roads already become gridlocked during rush hour. The high rise in traffic will further increase the already dangerous levels of atmospheric nitrogen dioxide levels within the village.

**Attached documents:**

**Comment: MM42 - LPMM18/4732  ** **Respondent: Debbie Leane 10742753  ** **Agent:**

**MM42 Land at Burnt Common, London Road, Send, Policy A58**

I strongly object to the increase from 7000 to a minimum of 14,800 sq m of industrial and storage. This would be the
largest new industrial site in any village within the Guildford borough. More importantly, there is no need for such a new industrial site when Slyfield in Guildford currently has empty sites and units. In fact, if you look at the Employment Land Needs Assessment, it showed demand for industrial land has decreased. Such a huge allocation will only add to the traffic problems we currently have along our narrow surrounding roads. These roads already become gridlocked during rush hour. The high rise in traffic will further increase the already dangerous levels of atmospheric nitrogen dioxide levels within the village.

Attached documents:

Comment: MM42 - LPMM18/4741  Respondent: Debbie Leane 10742753  Agent:

MM27 MM41 MM42 and MM48 Transport strategy

I object to the A3 changes and the Clandon slip roads as the GBC has not carried out a proper assessment of the traffic implications on Send Barnes Lane and Send Road. These changes will lead to thousands more cars making their way through Send to get into Woking town centre. There are serious implications for such an enormous increase in traffic on pollution levels, noise, traffic jams etc. This has not been carefully assessed.

Attached documents:

Comment: MM42 - LPMM18/3122  Respondent: Nicola Jones 10743105  Agent:

MM42 – the increase in the industrial site in a Green Belt area is unsuitable for a rural village and is unnecessary because there is additional capacity in the existing industrial site at Slyfield. The proposal will alter the rural character of Send and is disproportionate. No other rural village in the borough is being asked to accept the alteration of its character in this manner. There are no special circumstances which would justify using a Green Belt site for this purpose.

MM27, MM41, MM42, MM48 – taken together as the transport strategy. The implications of the increase in traffic from nearly doubling the housing in the village, other local development plans such as Wisley and Gosden Farm, plus the proposed changes to the A3 junction at Burnt Common have not been adequately addressed by Guildford Borough Council or any other responsible agency. Thousands of extra vehicles will be heading through Send on the A247 every day. The road is already over congested with long queues at peak hours. As a resident of Send Barns Lane (A247) I am extremely concerned for my health and that of my children. I, and two of my children are asthmatic and I am very worried about the increase in levels of nitrogen dioxide and other pollutants and particulates which would be inevitable with additional traffic. There is also a primary school along this route and the traffic increase would have a deleterious affect on the health of the children.

Comment: MM42 - LPMM18/58  Respondent: Jo Williams 10750593  Agent:

MM42 – Land at Burnt Common, London Road, Send, Policy A58

This was deleted from the plan in 2014, presumably there was recognition at the time that there was, and still is, insufficient demand for industrial sites. The Employment Land Needs Assessment showed a reduction in demand for
industrial land. With industrial units till empty in the Borough it is ludicrous to propose increasing the initial proposal of 7000 to 14,800 square meters of industrial sites and storage, indeed the original proposal of 7000 sq m is not required – Slyfield has unused capacity for example and there are no special circumstances which contradict MM9. The village is already significantly under strain from the thunderous HGVs that pass through our roads, these are already gridlocked and pollution levels are already dangerously high.

Attached documents:

Comment: MM42 - LPMM18/3736  Respondent: Jo Murray  10756641  Agent: 

MM42 Land at Burnt Common, London Road, Send, Policy A58

This land was previously deleted from the 2014 Plan following thousands of objections but the proposed development has now been more than doubled in size. No other village in the borough has been allocated such a large industrial allocation and no need for such a massive industrial allocation has been proven at all, never mind on our Green Belt. In fact, the most recent Employment Land Needs Assessment showed a reduction in demand for industrial land. There is unused capacity at nearby Slyfield. Yet again, there are no special circumstances so this is against GBC's MM9 Green Belt Policy.

Attached documents:

Comment: MM42 - LPMM18/147  Respondent: Mrs Lizzie George Buchhaus  10757185  Agent: 

There is capacity at slyfield and green belt should not have further industrial building on the green belt

increased nitrogen dioxide levels health risks contradicts mm9

unnecessary increase in send of industrial units greater than other villages with no proven demand

Attached documents:

Comment: MM42 - LPMM18/779  Respondent: Kate Cheyne  10774881  Agent: 

MM42 Land at Burnt Common, London Road, Send, Policy A58

This has been increased from 7000 to a minimum of 14,800 sq m of industrial and storage. Since being deleted from the 2014 plan this has been increased twice, doubling the area. It makes a mockery of the ‘consultations’ with residents as we’ve not only been ignored but the numbers have been escalated.

It is by far the largest new industrial allocation in any village in the borough

There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity.

There are no special circumstances so it also contradicts MM9.
The Employment Land Needs Assessment showed a reduction in demand for industrial sites.

Narrow surrounding roads will be gridlocked.

Attached documents:

Comment: MM42 - LPMM18/784  Respondent: Kate Cheyne 10774881  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick's Arch, Burnt Common, Clockbarn and Alderton's added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/4839  Respondent: Wendy Lodge 10775137  Agent:

I object to MM42 Burnt Common, London Road

It was deleted from the 2014 draft because of all the objections made previously, yet GBC have more than doubled the area proposed for industrial/storage, from 7000 to 14,800 m²

Send is a village, separated from Ripley and Send Marsh by narrow but important areas of green belt and will lose all character if these are built over.

There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

The impact on small surrounding roads will just exacerbate problems caused by increased car numbers, through traffic from new A3 junctions and school runs.

Attached documents:

Comment: MM42 - LPMM18/4850  Respondent: Wendy Lodge 10775137  Agent:

I object to MM27, MM41, MM42 and MM48.

Traffic has increased considerably through Send Village in the past ten years. The extra traffic that is bound to clog the A247 from the new slip roads with the A3 will expose villagers to significantly increased pollution levels. Children walking to the local school already are subjected to this. Another 700 houses with, maybe, a further 1400 cars are not going to help. I do not believe GBC has looked at this in a sufficiently robust manner.

Attached documents:
**Comment: MM42 - LPMM18/305  Respondent: Prue Robinson 10776033  Agent:**

**MM42 Land at Burnt Common, London Road, Policy A58**

*I object most strongly to Policy A58*

These are my reasons:

This proposal has now grown from 7000 sq m to a minimum of 14,800 sq m of industrial and storage. This policy A58 was in fact deleted from the 2014 draft because of the number of objections and it is staggering not only that it has been re-instated but there is this horrendous doubling of area.

The industrial and warehouse areas at Slyfield and Guildford have empty sites and industrial units so your immense over allocation at Send, in a Green Belt area is incomprehensible to me. It is by far the largest new industrial allocation in any village in the borough. There are no special circumstances so it contradicts MM9 in fact the 'Employment Land Needs Assessment' showed a reduction in demand for industrial land. This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village.

The impact on the narrow surrounding roads, already crowded with tail backs in rush hour periods would most certainly become gridlocked. Creating one mass of clogged roads in the entire area with over development will completely defeat the purpose of the Green Belt.

*Attached documents:*

---

**Comment: MM42 - LPMM18/310  Respondent: Prue Robinson 10776033  Agent:**

**MM27, MM14, MM42 AND MM48 Transport Strategy**

*I object most strongly to The Transport Strategy*

These are my reasons:

The traffic implications for Send of developments at Garlick's Arch, Burnt Common, Clock Barn and Alderton's Farm, added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads.

GBC appear not to have carried proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road. It would be anticipated that thousands more cars will head to Woking every day. Imagine the increased noise levels, nitrogen dioxide pollution, horrendous delays and total gridlock!

*Attached documents:*

---

**Comment: MM42 - LPMM18/241  Respondent: Moira Payne 10782241  Agent:**

MM42 Burnt Common industrial. There is no genuine established need for this development in the green belt which together with other proposals would destroy the nature of the rural area.
**Comment:** MM42 - LPMM18/262  **Respondent:** Moira Payne 10782241  **Agent:**

I object to MM42 Burnt Common industrial. There is no genuine established need for this development in the green belt which together with other proposals would destroy the nature of the rural area. The narrow surrounding roads are not capable of supporting the extra traffic.

**Attached documents:**

**Comment:** MM42 - LPMM18/799  **Respondent:** Jane Baker 10784769  **Agent:**

MM42 Land at Burnt Common, London Road, Policy A58

Now a NEW allocation more than doubling the original 7000 sq m. of industrial warehousing to 14,800 sq ft

I object to policy A58 at Burnt Common because:

It was DELETED from the first draft because of all the previous objections and should therefore NOT have been reintroduced.

There is no need to build an industrial development on Green Belt when sites still exist at Slyfield.

It is by far the largest new industrial allocation in any village in the borough.

The impact on already busy roads will cause gridlock, especially when the A3 is blocked and traffic tries to get down the slip road and through Ripley and Send

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications of the above developments plus those for nearby Gosden Hill and Wisley/Ockham have not been adequately addressed by GBC who has made no real assessment of the traffic situation as thousands of cars head down Send Barns Lane and Send Road towards Woking.

**Attached documents:**

**Comment:** MM42 - LPMM18/370  **Respondent:** Timothy Goodman 10790145  **Agent:**

I object to your proposal for industrial planning allocation for this site.

There is no proven need for more industrial space, and the consequent increase in HGV traffic will be imposed upon the already narrow roads of Ripley, Send, and Clandon.

There appears to be no allowance for the associated transport infrastructure in your plan.
I would however approve of the site being used for affordable housing, which surely should be one of the council’s priorities, or if necessary as an alternative travellers site.

Comment: MM42 - LPMM18/5507  
Respondent: Guildford Greenbelt Group (Susan Parker) 10799425  
Agent:

MM42 Land at Burnt Common

Increased from 7000 to 14800 sq m of industrial and storage – this has been increased twice, having been previously deleted from the 2014 plan. It has now doubled the area. It is by far the largest new industrial allocation in any village. There is unused industrial capacity at Slyfield so there is no need to site development land in the Green Belt. The Employment Land Needs Assessment showed a reduction in demand for industrial land, and this allocation is on top of a 25% increase at Send Business Centre. There is more concentration of industrial units in Send than in any other village. The narrow village roads will not cope and this will affect air quality adversely.

Attached documents:

Comment: MM42 - LPMM18/53  
Respondent: Shai Sinai 10799489  
Agent:

MM42 London rd;

I did not object to the initial smaller planned development of this land. However since 2014 the proposed development has doubled in size after previously being deleted. There is absolutely no need for a development of this size when Slyfield has unused capacity and Send Business Centre is being expanded. The Employment Land Needs Assessment showed a reduction in the need for industrial land. Once again a development not needed adding to congestion and pollution destroying our communities. Send is being disproportionately targeted for over development whilst contradicting MM9. I strongly object to MM42

Attached documents:

Comment: MM42 - LPMM18/682  
Respondent: Steve Green 10803361  
Agent:
I object to MM42 (Land at Burnt Common, London Road, Send A58) because:

- It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan.
- With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East.
- The concentration in Send is more severe than any other part of the Guildford Borough. This seems unfair.
- The industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity.
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send – and in the Green Belt.
- Once again, the impact on congestion will be significant as will Nitrogen dioxide levels causing potential damage to health.

Attached documents:

**Comment:** MM42 - LPMM18/687  **Respondent:** Steve Green 10803361  **Agent:**

Regarding MM27, MM41, MM42 and MM48 Transport Strategy

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

Attached documents:

**Comment:** MM42 - LPMM18/1179  **Respondent:** Mr Robert Mote 10805537  **Agent:**

I object to this revised proposal.

In common with many of these Main Modifications, no notice or understanding of the previous 7000plus objections has can be seen.

The indecision of this plan, being removed from the 2014 Plan, subsequently reintroduced and increased twice, suggests a complete lack of clear planning justification - it rather seems like arbitrary decisions have been made. The current plan for a minimum of 14,800 SqM is excessive and when coupled with MM41 will add unsustainable pressure on roads and facilities.

The increase in road traffic alone will add significant risk to existing residents health due to increase NOx levels, already at high levels.

The choice of this site is a complete denial of both the need to preserve valuable Green Belt and the availability of existing industrial site development opportunities, for example Slyfield.

No special circumstances exist to justify this MM and it seems to be in contradiction to MM9. Infact the Employment Land Needs Assessment showed a reduced demand for industrial land.

Attached documents:

MM42 Land at Burnt Common, London Road, Send, Policy A58

The increase from 7000 to a minimum of 14,800 sq m of industrial and storage is excessive and there is no need for this level of industrial sites in the area when I understand that Slyfield has unused capacity. Nearby roads cannot cope with an increase in large and heavy vehicles. The area is popular with cyclists and there are two primary schools, an increase in such large vehicles would be very dangerous on the roads.

Attached documents:

Comment: MM42 - LPMM18/441  Respondent: Belinda Middleton 10807745  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. As noted above nearby roads are popular with cyclists and children travelling to Send Primary and Clandon CoE Schools. Increasing the traffic on these roads will be dangerous, noisy and massively increase pollution to the cyclists, runners and children as they travel to school.

Attached documents:
MM42 Burnt Common. Policy A58
This site is not required as there is unused capacity at Slyfield and this is Green Belt. This contradicts MM9. Again this would generate more unsustainable traffic.

There are no definite plans laid out and it is impossible to widen Send Road or the Clandon Road to accommodate the increase in traffic approaching or returning from the A3. These are narrow roads in many places and the traffic is already at a standstill at peak times. A full assessment must be made and published and I ask the inspector to revisit at peak times.

Attached documents:

Comment: MM42 - LPMM18/1285  Respondent: Jeff Waine 10816481  Agent: MM42
Increase on this industrial site means more lorries which are cracking and damaging our houses down Send Road. The road congestion from large heavy and often speeding and weight is bad and damaging houses. The speed is not monitored well. Health and safety risks. Roads are not of a high standard. Pollution concerns how will this be monitored and controlled? Nitrogen dioxide levels are too high. Could impact on health and nature would need to be checked. The site at Slyfield still runs under used.

Attached documents:

Comment: MM42 - LPMM18/1289  Respondent: Jeff Waine 10816481  Agent: MM27, MM41MM42 and MM48
Traffic implication again as more cars will use my road Send road, as it is my son is learning to drive and the road is too congestion for us to even get out of. The speeding and level of traffic dangerous. The house has experienced cracking and damage due to it being roadside and volume and amount of traffic.

Will we as home owners be compensated? we have complained previously? the increase in volume of traffic in Send Road is damaging our house and its losing value and council increasing numbers and traffic this will make it worse. Its often gridlock in Send road outside our house. If an incident on A3 nothing moves. Its impacting on our ability to work/drive and move about.

Pollution would be increased with even more traffic and we may have health issues due to this. With weight and volume of traffic the house cracking i mentioned could become unsafe made worst by the councils plans.

Attached documents:

Comment: MM42 - LPMM18/477  Respondent: Maggie Cole 10816705  Agent: 1887 of 2575
MM42 – Burnt Common – Policy A58

This plan has now doubled the area for development of industrial units.

Why can they not be put at Slyfield where there is unused capacity.

Send Business Centre has already been increased, why do we need more in this area.

Narrow roads that already suffer gridlock, will be impassable.

Ripley was given a bypass years ago for a reason, the roads are too narrow for modern lorries.

Air quality will suffer from increased traffic on M25/A3 and local roads

**Attached documents:**

**Comment:** MM42 - LPMM18/482  **Respondent:** Maggie Cole 10816705  **Agent:**

MM27, MM41, MM42 and MM48 Transport Strategy

If GBC go ahead with all the sites in the local plan the road system will come to a grinding halt. The increase in traffic will just cause more gridlock, more frustration to road users, and hence more accidents. Drivers will try to circumnavigate the problem areas down single track roads and cause endless damage and accidents will happen. Every day there will be more noise, more pollution, more delays and more gridlock.

**Attached documents:**

**REF. MM42**

LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

OBJECTIONS: No need for a huge industrial site in a small village.

Pollution increase.

Road congestion

**REF. MM27, 41, 42 and 48**

TRANSPORT STRATEGY

OBJECTIONS: There would be total gridlock at rush hours if this amount of development overall is allowed in our small village.

**Attached documents:**
MM42

Land at Burnt Common, London Road.

Policy A58 Increased from 7000 to a minimum of 14,800 sqm of industrial and storage

- Since being taken out of the 2014 plan, this has now been increased twice, doubling the area.
- It would be the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity.
- Special circumstances to warrant this don’t exist and so contradict MM9.
- The Employment Land Needs Assessment showed a reduction in demand for industrial land.
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village and as noted, with no proven demand.
- Narrow surrounding roads will not be able to cope with related increase in air pollution.

Attached documents:

MM27 MM41 MM42 and MM48

Transport Strategy

The traffic implications for Send of:

Garlick's Arch,
Burnt Common,
Clockbarn
Alderton's
Gosden Hill
Wisley/Ockham

are not adequately addressed by the A3 / Clandon slip road changes.

No proper assessment of the aggregate traffic impact causing increased noise, nitrogen dioxide pollution, delays and gridlock has been undertaken.

Attached documents:

MM42 Land at Burnt Common, London Road, Send Policy A58
I Object to the industrial allocation doubling. Why? When Slyfield has spare capacity do we need new industrial sites in the Green Belt. The surrounding roads, which are very narrow, will become gridlocked. Pollution, already dangerously high, will be greatly increased.

Attached documents:

**Comment:** MM42 - LPMM18/2133  **Respondent:** D Smith 10819329  **Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

Changes to the A3 Clandon slip roads will have an impact on Send Barns Lane and Send Road as thousands more cars make for Woking. This will also have consequences for Old Woking, as the roads are very narrow with many parked cars, which large vehicles have trouble navigating.

As far as I know no detailed assessment of the impact has been made.

Attached documents:

**Comment:** MM42 - LPMM18/819  **Respondent:** MP Parrott 10819425  **Agent:**

MM42 land at Burnt Common, London Road, Send, Policy A58

The proposed increase for industrial development from 7000 sqm to 14,800sqm of industrial and storage is not required. As demonstrated by the latest Employment Needs Assessment 2015 (ELNA) which shows a reduction of 80% in required employment floor space from the previous draft. If there is a need why can't this be provided on the Slyfield or other industrial estates in the borough which have been unused capacity.

The above proposal is in addition to the 25% increase at the Send Business Centre, making a far greater concentration of industrial space than any other village.

Attached documents:

**Comment:** MM42 - LPMM18/5667  **Respondent:** Susan Cooper 10819489  **Agent:**

I object to the proposed amendments to the 2017 draft local plan for the following reasons:-

I believe the Planning Inspector has misrepresented the residents of Send and Send Marsh.

The 2017 plan already contained proposals to develop more housing than the original concept and over 30,000 objections were made to this. The amendments now under consideration allow for further increase in housing numbers in an area where the Infrastructure is already struggling to cope.

I object to the proposed increase in industrial / commercial development at Burnt Common. MM42
There was never any justification or sensible reason to consider such development in the proposed area although it is now proposed to double the original plan.

There is no need to put industrial development on green belt land, especially whilst Slyfield has unused capacity and such development would put further strain on the narrow road system and further increase Nitrogen Dioxide levels, which are already dangerous.

Attached documents:

Comment: MM42 - LPMM18/830  Respondent: D Davies 10820961  Agent:

MM42 Land at Burnt Common Road Send Policy A58 - I object

This has been doubled since being deleted from 2014 plan making the largest allocation of industrial [unreadable text] in the borough putting this on green belt land is ludicrus when Slyfield has unused capacity. Employment land needs assessment showed a reduction in demand so why do we need this. It is a health hazard. Increasing pollution. This is on top of a 25% increase at Send Business could make a bigger concentration in Send than any other village with no proven demand.

Attached documents:

Comment: MM42 - LPMM18/835  Respondent: D Davies 10820961  Agent:

MM9 Green Belt Policy MM27 MM41 MM42 and MM48

I think the planning committee pays no attention to the Green Belt and Public Transport. They just want houses and careless about increased noise, nitrogen dioxide and delays and gridlocks plus there are other developments coming up. We need less houses and more amenaties. The plan is rubbish.

Attached documents:

Comment: MM42 - LPMM18/969  Respondent: Karen Dougherty 10822913  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/2718  Respondent: David Rider 10826209  Agent:

MM42 Burnt Common

I strongly object to the doubling of the area of this industrial site. It is deeply concerning that the GBC plan is resorting to new industrial sites on Green Belt land, where there is space to expand existing sites elsewhere in the Borough on non-Green Belt land, e.g Slyfield. Again, the impact on local roads will be huge and will put a huge burden on the area.

Attached documents:

Comment: MM42 - LPMM18/2722  Respondent: David Rider 10826209  Agent:

MM27 / MM 41/ MM42 & MM48 traffic impact

I am deeply concerned about the above modifications as well as nearby large proposed developments and combined impact on local roads. A3 Clandon slip road will only increase demand on local roads that are not just designed with a significant increase in traffic. Gridlock risk and environment impact needs to be properly assessed.

Attached documents:

Comment: MM42 - LPMM18/920  Respondent: Kathryn Fox 10828801  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.
I object to MM42, Burnt Common, London Road

It was deleted from the 2014 draft because of all the objections made previously, yet GBC have more than doubled the area proposed for industrial/storage, from 7000 to 14,800 m$^2$.

Send is a village, separated from Ripley and Send Marsh by narrow but important areas of green belt and will lose all character if these are built over.

There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford still have empty sites and industrial units.

The impact on small surrounding roads will just exacerbate problems caused by increased car numbers, through traffic from new A3 junctions and school runs.

I object to MM27, MM41, MM42 and MM48.

Traffic has increased considerably through Send Village in the past ten years. The extra traffic that is bound to clog the A247 from the new slip roads with the A3 will expose villagers to significantly increased pollution levels. Children walking to the local school already are subjected to this. Another 700 houses with, maybe, a further 1400 cars are not going to help. I do not believe GBC has looked at this in a sufficiently robust manner.

MM42 Land at Burnt Common

This represents more than doubling of the industrial and storage space. This is a huge amount for one village, is much bigger than any other village in the borough and is not supported by demand for industrial land. The road infrastructure is insufficient for the traffic volumes that will result.
Transport strategy for MM27, MM41, MM42 nd MM48

There has been no rigorous assessment of the impact of the proposed developments on traffic flows in the area. The road to Woking is already gridlocked in rush hour times. The proposed developments would lead to significantly worse traffic which would be intolerable to existing residents.

Attached documents:

Comment: MM42 - LPMM18/765  Respondent: Kevin Nicholls 10829281  Agent:

MM27 MM41 MM42 & MM48 Transport Strategy

As highlighted in the Parish Council report, it is unclear how the traffic implications associated with development contained within the local plan, will be addressed. The proposed changes to the A3 are not adequate and a full and proper assessment needs to be carried out to examine the impact that thousands more vehicles will have around our existing village and environs.

Attached documents:

Comment: MM42 - LPMM18/767  Respondent: Kevin Nicholls 10829281  Agent:

MM42 Land at Burnt Common, London Road, Send Policy A58

There has been no explanation for the large increase in the proposed industrial site, which represents the largest new industrial allocation in any village in the borough; in addition to the proposed disproportionate housing developments???

This is in spite of the fact the original proposal was removed from the 2014 plan and a better alternative to use unused capacity at Slyfield has previously been suggested and ignored???

Sir, these proposals and others in the area represent a 45% increase in housing in our area. I find this truly disturbing. The council has offered fine words but no substance to its claims of ‘enhancing and improving the greenbelt’, ‘improving our cycling and walkways’ and has clearly NOT answered its critics around how local infrastructure will cope with the demands placed upon it by an explosion in population?

I hope the council will see sense and adopt a common sense approach to meet local housing and business needs.

Attached documents:

Comment: MM42 - LPMM18/3631  Respondent: AJ Cheeseman 10830753  Agent:

MM42 Land at Burnt Common, London Road, Policy A58

I object to the doubling of industrial and storage space from 7000 to minimum of 14800 sq m at Burnt Common because:
- It was deleted from the 2014 draft because of all the objections made previously and now for some reason it is back in the plan with a massive increase in scale;
- The word ‘minimum’ is a change from the previous ‘maximum’ in the 2016 plan and since that time there has been a decline in demand for industrial land;
- There is no need to build industrial or warehouse development in the middle of the Green Belt when Slyfield and Guildford have empty sites and industrial units – use them first;
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not a huge over allocation of 10 hectares at Send in the Green Belt;
- The impact on small surrounding roads will create traffic gridlock and extra air and noise pollution from heavy goods vehicles.

Attached documents:

Comment: MM42 - LPMM18/2345  Respondent: PE Whatley 10830785  Agent:

Objection to MM42 Land at Burnt Common A58

This development was previously removed from the local plan, and I object to its re-insertion at a massively increased size. All industrial sites require more and bigger vehicles to access them. The access through Ripley is poor and already very congested especially at rush hour, and couple this with the increased traffic of the many many new homes planned for the area and this seems to be a step too far for Send.

Send already has new industrial developments and these are not at capacity. Slyfield and other Borough sites have empty space too. Where is the justification for 14800 sqm of industrial space? This will cause chaos, pollution and gridlock for all the village and its residents. Roads, public transport, drainage, power and other facilities are already fairly poor and this will increase the burden considerably.

Attached documents:

Comment: MM42 - LPMM18/2436  Respondent: Ms Katherine Gervasio 10836033  Agent:

MM42 at Burnt Common, London Road, Send Policy A58

I object to this proposed industrial and storage development. It was DROPPED from the draft but now has not only been reinstated but expanded! There is no evidence that an industrial allocation this large is actually needed in any village in the borough, let alone Send and, along with the 25% increased development at Send Business Centre it makes this a bigger concentration than any other village with no proven demand. I object to this inclusion of a Green Belt site because Slyfield has unused capacity. Therefore there are no special circumstances in this case to use Green Belt land – Slyfield is the obvious choice.

Attached documents:

Comment: MM42 - LPMM18/2441  Respondent: Ms Katherine Gervasio 10836033  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
I object to the inadequate changes to the A3 and Clandon slip roads proposed by Guildford Borough Council which will not accommodate the huge increase in traffic if the Garlick Arch, Burnt Common Clockbarn and Alderton’s Farm developments go ahead. These developments added to the nearby Gosden Hill and Wisley/Ockham developments will augment the traffic on Send Barns Lane and Send Road as thousands more cars head to Woking every day and the damaging effect of this on pollution, noise, gridlock and delays has not been properly assessed.

I would like these objections to be noted and preferably listened to - unlike the 33,000 earlier objections sent in by me and other local residents which seem to have been completely ignored.

Attached documents:

Comment: MM42 - LPMM18/797  Respondent: J.H. Lakeman 10837665  Agent:

I object to MM42 Land at Burnt Common, London Road, Send, Policy A58. This doubles the area deleted from the 2014 Plan and it is by far the largest industrial area projected for any of the Borough Villages! When Slyfield has unused capacity and as there are no special circumstances, it contradicts MM9. The Employment Land Needs Assessment showed a reduction in demand for Industrial Land and any increase in Large Lorry traffic would saturate the local narrow roads.

I & my family have [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] and all of that time your planners have made concerted efforts to spoil the green & pleasant village feel that we chose to live in, isn’t it time you showed a little empathy with the pleas that you disregard?

Attached documents:

Comment: MM42 - LPMM18/2687  Respondent: Jacky Fenton 10839009  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

Again since my last objection this has increased from 7000 to a minimum of 14,800sqm of industrial usage and storage. You deleted it from the 2014 plan but since has returned and increased twice doubling the area! Why are you suggesting to build the largest new industrial allocation in any village, in the borough, when The Employment Land Needs Assessment showed a reduction in demand for industrial land? Send Business Centre already has a proposed 25% increase this makes the concentration in Send much larger than any other village with and no proven demand.

Slyfield Industrial Estate in Guildford has unused capacity so why propose another site? There are no special circumstances so it contradicts MM9.

We have very narrow surrounding roads which will be gridlocked and with the amount of traffic we currently have to endure our Nitrogen Dioxide levels are already dangerous.

Attached documents:

Comment: MM42 - LPMM18/2692  Respondent: Jacky Fenton 10839009  Agent:
MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Gosden Hill and Wisley/Ockham developments have not been adequately addressed by the A3 changes and the Clandon slip roads. You have not assessed the amount of traffic that is currently on the roads let alone the thousands more cars heading to Woking everyday causing increased noise, pollution and gridlock!

Attached documents:

Comment: MM42 - LPMM18/1154  Respondent: F.A. Howell 10839393  Agent:

Re: MM41 - Land at Garlick’s Arch, Send Marsh, Policy A43

MM42 - Land at Burnt Common, London Road, Send, Policy A58

MM44 - Land at Alderton’s Farm, Send Marsh Road - Policy A63

MM9 - Green Belt Policy

MM27, MM41, MM42 and MM48 - Traffic

There are unimaginable difficulties with your proposed plan for Send and Send Marsh. There is not enough infrastructure to house the proposed amount (for example)

- of cars (and the extra pollution that they will bring)
- a lot more people needing healthcare
- schooling
- our small country lanes
- and we are DEFINITELY NOT AN INDUSTRIAL AREA, why not enlarge Slyfield, which has empty space readily available?
- plan to route the A3 traffic towards Woking through Burpham.

The proposed 750 houses will more than likely mean 1500 more cars on our narrow roads. We can't move freely now when there are roadworks or an accident or breakdown, let alone move with all this extra traffic.

Try coming around to this area at ‘rush’ hour or when there has been an accident - it’s a nightmare.

NO, NO, NO TO YOUR PLAN

Attached documents:

Comment: MM42 - LPMM18/1764  Respondent: Lawrence Harris 10839649  Agent:

MM42....Policy A58

This area was deleted from the 2014 Plan and seems to have entered later plans ‘by the back door’ despite many previous objections. I would question whether there is a need for additional industrial sites on Green Belt land such as this when designated sites such as Slyfield have unused capacity. I note that a 25% increase at Send Business Centre has been
‘approved ‘ in the previous incarnation of the plan despite all objections and the latest proposal means that there will be a bigger concentration of industrial sites in Send than any other village with no proven demand for such facilities.

Attached documents:

Comment: MM42 - LPMM18/1769  Respondent: Lawrence Harris 10839649  Agent: 

MM27, MM41, MM42 and MM48...Transport Strategy

I cannot see any evidence that a proper traffic impact assessment has been carried out to ‘prove’ the actual impact on the villages of Send and Clandon of the proposed changes to the A3 at Burnt Common. It is not acceptable to merely ‘state’ that everything will be ‘fine’ when it clearly will not as thousands more vehicles head through both villages every day!!

Attached documents:

Comment: MM42 - LPMM18/1012  Respondent: Mark Pycraft 10839937  Agent: 

MM42 - Land around Burnt Common warehouse, London Road, Send

MM42 is another site which qualifies as 'inappropriate development', so I refer you once again to Policy P2, MM9, Policy Paragraph (1), as detailed above under my comments for MM44. However, as I fear that this will be ignored, I would also implore you to consider that there is a large area of the already existing industrial site at Slyfield that should be utilised instead of building anew at MM42.

I have also noticed that the proposed area at MM42 has now more than doubled in size compared to previous versions of the plan; this at a time when the Employment Needs Assessment actually showed that there is much less demand for industrial sites than there was previously, thus making the development of this site much harder to justify.

Attached documents:

Comment: MM42 - LPMM18/1133  Respondent: J.A. Manlow 10840321  Agent: 

MM42 - Land at Burnt Common, London Road, Send, Policy A58

Why put new industrial sites in the Green Belt when Slyfield has unused capacity.

Attached documents:

Comment: MM42 - LPMM18/1138  Respondent: J.A. Manlow 10840321  Agent: 

MM27 MM41 MM42 + MM48 - Transport
The impact on Send Barns Lane and Send Road as thousands more cars lead to Woking every day, causing increased noise, pollution, delays and gridlock, will be much heavier.

Attached documents:

Comment: MM42 - LPMM18/2270  Respondent: John Pyne 10840641  Agent:

MM42 LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

- I object to the proposal that an industrial unit be developed in this area, and the failure to demonstrate need or benefit.
- I object to GBC proposing this development in the face of the Employment Land Needs Assessment showing a reduction in demand for industrial land. It is not desired nor justifiable.
- I object to GBC proposing building this site, without demonstrating special circumstances and contradicting MM9.
- I object to GBC proposing the development of industrial sites in the Green Belt where there is unused capacity at Slyfield.
- I object that this proposal, coupled with 25% increased at Send Business Centre means there is a much bigger concentration of such land use with no proven demand, and is both disproportionate and unfair when comparing Send with other villages.

Attached documents:

Comment: MM42 - LPMM18/2280  Respondent: John Pyne 10840641  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM42 - LPMM18/1242  Respondent: Rosemarie Haxton 10840769  Agent:

MM42 Land at Burnt Common, Policy A58

My objections to this proposal are:

- There is already unused industrial sites at Slyfield, the Employment Land Needs Assessment show the need for this type of land has reduced and a 25% increase at Send Business Centre negate the need for this type of development.
- It is on Green Belt land
- With Send Business Centre increase, it makes unnecessary concentrated increase in Send village which is not proposed in any other village.
- Increase in traffic will block already busy roads
MM42, MM41, MM42, MM48 Transport Strategy

- This will not address the excessive increase in cars causing gridlock, extensive delays, noise and nitrous dioxide pollution.

Attached documents:

Comment: MM42 - LPMM18/1247  Respondent: Rosemarie Haxton 10840769  Agent:

MM27, MM41, MM42, MM48 Transport Strategy

I am writing to object to plans for our village. I have lived here for 20 years and have seen traffic increase dramatically. I have to use the A3 up to M25 J10 most weekdays and it is perfectly clear that Send cannot cope with further traffic.

Increasing industrial areas and a massive increase in housing is completely the wrong thing for a village. We have a strong village feel in both Ripley and Send and I have lived in North London as a child and saw my village merge with the next one and eventually become part of London and it destroyed the area. I don’t want to see this happen here. There are some glorious greenbelt areas and ancient woodland and so there will be far better places to build that are brownfield sites.

I have already watched the Tannery Lane industrial area increasing in size. This is already a ridiculous place for an industrial site, right by the river along a narrow country lane and to increase the size is just not thought through!

I live on Send Marsh Road and building at Alderton’s will make an already dangerous and busy road, even worse. The sharp bend is very difficult to drive around and to cross over to get to Polesden Lane and with a dramatic increase in traffic, this would be impossible.

Along with Garlick’s Arch, Clockbarn, Winds Ridge etc, it is just too much for our infrastructure to bare. I have just had to wait 2 weeks for an appointment at the doctors and increased housing will just exacerbate the problem so that it is out of control.

My children were lucky enough to get into George Abbot school, but what do you intend doing with all the new children and associated traffic that so much building would create? Closing Ripley Primary was ill-thought out if you are intent on going ahead with this building, despite objections and the traffic at the Burntcommon roundabout to get to Send Primary will be ridiculous, especially if you’re considering building new slip roads to the A3 too.

So my main concerns are traffic congestion, destruction of the green belt, no provision for increased infrastructure such as doctors with so many new homes, increase in industrial space not appropriate for a village setting, over-development, flooding and a completely ignoring all previous objections!

Please reconsider destroying our villages of Send and Ripley. They will be destroyed if even a portion of this building goes ahead along with the modifications we are not able to object against such as the traveller’s site and Clockbarn etc. Please listen to your residents and think of the future of Surrey as a beautiful place to live and not just the financial advantages. In the long run, stopping this dense build up of population will save money, as the social problems in north London now, where I grew up are immense.

Comment: MM42 - LPMM18/5841  Respondent: Yvonne Woozley 10843521  Agent:

MM41, MM42, MM44, MM9, MM27 MM48

In the long run, stopping this dense build up of population will save money, as the social problems in north London now, where I grew up are immense.
There is no clear need to have new industrial sites in the Green Belt. Slyfield has unused capacity. Narrow surrounding roads will be choked with traffic and pollution. The Employment Land Needs Assessment showed a reduction in demand for industrial land.

We have already had a significant increase in the industrial area within the above named areas. Again this is a small village environment yet it has had more than double the area than any other area has had put upon them. This again impacts on the sensitive, greenbelt area and we are all aware of the used SLYFIELD site that could be more utilised. As there are no special circumstances this seems more of a directive rather than a thoughtful, sensitive understanding of the environment being impacted upon.

Again the significant increase in traffic through small lanes, still unprepared from our last two winters of damage, will again cause more damage which the current council has been remiss in their duties to repair for current residents and through traffic a proposal to increase this through traffic and increase the local traffic on these roads needs to be seriously looked at.

When London is looking at reducing CO2 levels in their environment we are looking at increasing this through the significant increase of traffic, lorries and associated traffic in an area little set up to accommodate or support this increase.

Traffic management and infrastructure has not been properly addressed by the changes at the A3 slip roads, there needs to be a proper independent traffic impact analysis on the increase of traffic, through traffic as well as local due to the proposed increase in both housing and industrial estate development. The noise, pollution, delays and problems on the roads in these small poorly managed current roading has not been addressed in any documents provided to residents.

| Comment: MM42 - LPMM18/374 | Respondent: John Ford 10846241 | Agent: |
It is with extreme disappointment that I have to, yet again, protest against the over development of Send. It beggars belief that the Planning Inspectorate in collusion with GBC have increased the number of properties planned for the village (as per the refs. above).

Do the PI and GBC not recognise the damage this will do to the infrastructure of this area? At the same time I understand there will be some incursion onto Green Belt land which contradicts Green Belt Policy.

I hope that the Local Plan is reviewed to allow Send to be relieved of the developments planned and more suitable sites found.

Attached documents:

Comment: MM42 - LPMM18/3319  Respondent: Frank Drennan 10846625  Agent:

MM42 LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

- I object to the proposal that an industrial unit be developed in this area, and the failure to demonstrate need or benefit.
- I object to GBC proposing this development in the face of the Employment Land Needs assessment showing a reduction in demand for industrial land. It is not desired nor justifiable.
- I object to GBC proposing building this site, without demonstrating special circumstances and contradicting MM9.
- I object to GBC proposing the development of industrial sites in the Green Belt where there is unused capacity in Slyfield.
- I object that this proposal, coupled with 25% increase at Send Business Centre means there is a much bigger concentration of such land use with no proven demand, and is both disproportionate and unfair when comparing Send with other villages.

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM42 - LPMM18/495  Respondent: Evan Parry-Morris 10853249  Agent:

2. I wish to raise the following objections to the Guildford Local Plan MM27, MM41, MM42, MM48:

Many local roads around the villages of Send, Ripley and Clandon are narrow and there are already many instances of vehicles having to mount pavements to allow large vehicles to pass. This is particularly an issue on the A247 between
Burnt Common and Clandon Crossroads. The inclusion of the Garlick’s Arch proposal, particularly the industrial and warehousing elements of the plan, is certain to make the situation far worse. I object to the development proposed in the local plan, which will result in more traffic using narrow roads.

Many of the villages are suffering from severe congestion, for example the Shell roundabout at Burnt Common, and the Newark Road & Rose Lane junction in Ripley. I object to the further development which will cause further congestion in and around our villages.

The A3 and M25 already suffer from severe congestion during rush hours, in addition, Highways England have no plans to improve the A3 prior to 2020. I object to the development of these sites shown in the local plan because trunk roads would be unable to cope.

Attached documents:

Comment: MM42 - LPMM18/498  Respondent: Evan Parry-Morris 10853249  Agent:

4. I wish to raise the following objections to the Guildford Local Plan MM42, Policy A58:

There is no need for a new industrial development on green belt land, especially as Slyfield has unused capacity.

The minimum 14.800 sq m of industrial and storage areas is by far the largest industrial allocation in the borough, and is far too big for the area.

It would be expected that local roads would be gridlocked, with resultant dangerous pollution.

Attached documents:

Comment: MM42 - LPMM18/283  Respondent: Sian Holwell 10854241  Agent:

MM42 Burnt Common. Why is there a need for further industrial and storage sites in the area when there is unused capacity at Slyfield Green, a purpose built industrial estate away from houses and where expansion should be focused. It should be noted that Send has already increased its business centre by 25% with no proven demand.

Attached documents:

Comment: MM42 - LPMM18/871  Respondent: Mrs C OWEN-Crane 10859073  Agent:

I object to the increase in industrial and storage area. There is already brown field land that is already underused without increasing traffic within a small village setting.

Attached documents:

Comment: MM42 - LPMM18/1277  Respondent: Neil Haxton 10859265  Agent:

MM42 Land at Burnt Common, Policy A58

I object to this because;

It is on Green Belt land and makes unnecessary concentrated increase of industrial development in Send village which is not proposed in any other village.

There is already unused industrial sites at Slyfield, the Employment Land Needs Assessment show there is less need for this type of land, and an increase in Send Business Centre show there is no demand for it.

Increase in traffic will block already busy roads

Attached documents:

Comment: MM42 - LPMM18/1282  Respondent: Neil Haxton 10859265  Agent:

MM27, MM41, MM42, MM48 Transport Strategy

This will not address the excessive increase in cars causing gridlock, extensive delays, noise and nitrous dioxide pollution.

Attached documents:

Comment: MM42 - LPMM18/1103  Respondent: Mr (Mr Alec McIndoe) 10864065  Agent:

This proposal is, and always has been, inappropriate for the area. Send, Send Marsh and Ripley are rural villages each with their own unique aspects. The siting of a massive industrial site at Burnt Common will inevitably change the character of the villages - for the worse. I understand that there is spare capacity at Slyfield Green. Similarly, there are numerous "brown" sites within Surrey which could be used if there is a demand for this kind of development which is questionable. The infrastructure is not, I believe, capable of coping with the stresses which would be put on it, were this
proposal to go ahead. The quality of life of the existing residents would be hugely affected by the increase in heavy duty traffic. Also, it seems that the original proposal has been doubled since the original proposal was deleted from the 2014 plan. WHY?

Attached documents:

Comment: MM42 - LPMM18/381  Respondent: Christine Reeves 10866305  Agent:

MM41 - Policy A43
MM42 - Policy A58
MM44 - Policy A63
MM9
MM27 MM41 MM42 MM48

I objected to the Land at Garlicks Arch Send Marsh being developed on in my last objection letter so to consider having another 37% development on the site would be outrageous considering 7000 objections were ignored previously for a fewer number of houses being built.

Businesses and employees that have been on the site for many years would lose their jobs as companies have to close or relocate. Their jobs have been their lifeline and income in some cases for their lifetime.

Over the years all the roads locally have been transformed from quiet country lanes to Grand Prix tracks and the lanes and roads infrastructure certainly couldn’t cope with extra housing, cars producing more dangerous nitrogen dioxide putting more people at health risk which they hoped to escape from by moving to the country. We certainly don’t need more people, housing or cars choking our village depleting our woodland areas and picturesque Send March green.

Roads, schools, health centres and hospitals are already overstretched.

Comment: MM42 - LPMM18/4128  Respondent: Kristine Good 10866945  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

Since being deleted from the 2014 plan this has been increased twice, doubling the area despite objections to its inclusion originally.

It is by far the largest new industrial allocation in any village in the borough.

There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity.

There are no special circumstances so it also contradicts MM9. The Employment Land Needs Assessment showed a reduction in demand for industrial land.
This is in addition to the 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.

The road though Send to Woking is narrow, residential with tight bends towards Old Woking. This road has seen several serious accidents, and is gridlocked regularly from Broadmeads through Send towards Burnt Common several times a month with current usage.

Nitrogen dioxide levels are already dangerous in what is a highly residential area, recent press coverage implied that maintaining air quality for its constituents was very important to Surrey County Council and local councils. *Guildford Borough Council Air Quality Strategy – 2017 v10/Surrey County Council Air Quality Strategy (2016)*

**Attached documents:**

---

**Comment:** MM42 - LPMM18/4133  **Respondent:** Kristine Good 10866945  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock, as already stated in previous points. This area is unable to support increased residential traffic and is unsuitable for heavy commercial traffic.

In conclusion, development of this scale in this rural village will be detrimental to the character of this living space, and impact hugely on residents, there is **insufficient consideration of the enormous size of development being placed in one small area of the constituency**, as opposed to spacing out development, which would ease traffic overloading, decrease the escalating problem of pollution, share the increased strain on services; education, health.

I urge the planners to take these objections in to consideration and listen to the observations regarding these plans from the people who live and work in these areas and see each day how the infrastructure is completely inappropriate to support such huge development in squeezed into one small area of the borough.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/1913  Respondent: David Govey 10867873  Agent:

this is a huge increase industrial allocation for a village of this size. well it must be almost twice the size of the previous application. The adjacent A3 has only one way access to the area and used As a diversion which means surrounding roads will be gridlocked even more than they are now. Nitrogen dioxide levels are already dangerously high.

Attached documents:

Comment: MM42 - LPMM18/2300  Respondent: Ron and Charmian Leach 10868193  Agent:

MM42

The proposed increase in industrial and storage is not warranted. The narrow roads are getting gridlocked. Send already has the biggest concentration of industrial buildings than any other village and no proven need.

Attached documents:

Comment: MM42 - LPMM18/2714  Respondent: Robert Lockie 10868609  Agent:

MM42 Burnt Common

1 Since deleted from the 2014 plan this has been increased doubling the area

2 It is by far the largest industrial allocation in any village in the borough

3 No need to put industrial sites in Green Belt when Slyfield has unused capacity. There are no special circumstances so it contradicts MM9

4 The Employment Land Needs Assessment showed a reduction in demand for industrial land

5 This on top of a 25% increase at Send Business Centre making a much bigger concentration in Send than any other village with no proven demand
6 Narrow local lanes and roads will be gridlocked

Comment: MM42 - LPMM18/571  Respondent: Richard Vickery 10869345  Agent:  

MM42 Land at Burnt Common, London Road, Send Policy A58

There is no need for and industrial site in Send at all, let alone in a green belt area, as the Slyfield site is not full and money spent there would remove the necessity for this type of development.

Comment: MM42 - LPMM18/575  Respondent: Richard Vickery 10869345  Agent:  

MM27 MM41 MM42 and MM48 Transport Strategy

This area suffers from very high traffic throughout the week. The surrounding villages, Ripley, Clandon, Ockham and Old Woking, are overwhelmed at times. This plan will increase the problem and make it intolerable to get anywhere by bringing more traffic through the villages, especially Send, to get on and off the A3 at Burnt Common.

Comment: MM42 - LPMM18/568  Respondent: Rosalyn Vickery 10870305  Agent:  

There is no necessity for an additional industrial site in Send. Space is still available at Slyfield and this is green belt land.

Comment: MM42 - LPMM18/2601  Respondent: Lynn Durbridge 10871169  Agent:  

My First objections are to: MM41,MM42,MM44,MM9, MM27.

At the public examination the figure for Guildford Borough Council housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated. (This is illegal, by law you have to show how you have arrived at such figures. ... To this end Police involvement may be necessary as fraud may have taken place.)

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.
The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of G.B.C consultants figures which have always been very suspicious.

My expectation is that the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.

**Table S2b: Spatial Strategy: Distribution of Housing 2015 – 2034 (net number of homes) states that the net number of homes within villages is 154, this contradicts other figures and is obviously a lie?**

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

And 2000 new homes at Wisley airfield is totally unacceptable. Not only will Send and Ripley be joined but the whole of Guildford...the whole of surrey will be connected in one sprawling mass of houses and industrial parks with barely a patch of green as far as the eye can see. Individual communities will no longer have their own identities and roads will be even more congested. Services have only received lip service, Gps and schools (and parking) that are already at bursting point have not been thought about at all.

**MM27, MM41, MM42 and MM48 Transport Strategy.**

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill, Wisley and Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. It seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

This massive increase in traffic and associated air pollution will affect pupils of Send 1st school which will take brunt of the increased pollution as will St Beads middle school. The dropping off of children at Send 1st school is already absolute mayhem and it is only a question of time before a fatality happens. With an increase of traffic the chances of a fatality goes up exponentially.

**MM42, Land at Burnt Common, London road Send Policy A58.**

As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.

This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

Attached documents:
Comment: MM42 - LPMM18/3390  Respondent: Rob Stevens 10873313  Agent:

MM27. MM41. MM42 and MM48 Transport Strategy

The effect of thousands more cars has not appear to have been properly taken into account? The A3 junction wont fix the issue of masses of traffic along A roads to Woking.

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

Comment: MM42 - LPMM18/3395  Respondent: Rob Stevens 10873313  Agent:

MM42. Land at Burnt Common, London road Send Policy A58.

There is no need for new industrial sites when Slyfield is has unused capacity There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.

This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

You dont seem to think fo the greenbelt being protected and available for future generations - you just want to take advantage and use it now.

As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

Attached documents:

Comment: MM42 - LPMM18/5103  Respondent: Margaret Powell 10876609  Agent:

I wish to object to ALL the above Main Modifications 9, 27, 41, 42 & 48

Our village is big enough already - the roads get very congested & Send Primary School would not be big enough to take all the extra children especially as Ripley School is closing! It is getting increasingly difficult to get teachers - so are our children going to get any decent education
I have lived the village most of my life & over the last ten years there are now fewer places to walk & get out into the countryside! The Green Belt land & woodlands are becoming non existent.

Why build more Industrial Units - in the past they have been left empty & some now turned into living space - so why do we need more !!! Places are being vacated weekly & left into disrepair- so definitely don't need anymore!

The houses that have recently been built in the village & surrounding areas have not sold - so how are they going to sell a few hundred more! You are DESTROYING village life & going to pollute the countryside! Therefore a lot more health problems without sufficient Medical facilities available - what a NIGHTMARE!

I Strongly object to ALL the above Modifications. - so please re think your policies.

Attached documents:

Comment: MM42 - LPMM18/1568  Respondent: Michael Hurdle 10876993  Agent:

MM42 – Land around Burnt Common Warehouse, London Road, Send POLICY A 58

I OBJECT -

This would introduce substantial burden of heavy goods vehicles to area, starting with Burnt Common Roundabout, already beyond capacity at busy times and with no space to improve infrastructure.

Traffic will go through unsuitable choked road through Send, Old Woking and through Clandon – narrow roads with no opportunities for infrastructure improvement. There is too much reliance on A3 improvements which GBC cannot direct.

The ELNA shows reduced demand for industrial land, and there is already unused capacity at Slyfield.

Heavy vehicles will cause air pollutions – there is already increased nitrogen dioxide levels at points along the A247 (determined by EarthSense [http://www.bbc.co.uk/news/science-environment-42566393 ])

Attached documents:

Comment: MM42 - LPMM18/5908  Respondent: Phil Beddoes 10878529  Agent:

The recently published ONS figures significantly revise downwards the predicted housing noted in GBC. This revision must be reflected in the Local Plan. The failure to do so would likely result in a judicial review and a significant delay in the plans approval. The reduction predicted by the ONS provides an opportunity to remove one or more of the numerous sites in Send

MM42

The unclear and uncertain minimum floor space of this development puts a Blight on the area. It also means that there will be difficulties matching highway needs to traffic flows and routes. Much of the wording is unclear and ambiguous....what does 'otherwise adverse material impacts....' actually mean?

I am writing with real concern for the Send community and village. It does appear to many in the village that the disproportionate amount of both housing and commercial development in our community is as a result of politicians directing officers to load it on a non Conservative area. I am not of that view. I think each development in our village has
been considered separately by officers using all appropriate technical tools and guidance.....but then no due regard to the overall impact on Send has been undertaken or commented upon. I fear that officers and politicians have put in place plans which will see a village devastated by over development resulting in the urbanisation of what is a lovely Surrey village. It will also be a village of unaffordable affordable homes which will not meet our housing need especially for our young people.

This is a sad time for us all in Send

I fear like the many thousand comments made previously on this matter that the words above will be read and forgotten within seconds. I guess that is what today's local government is about.

Yours with a sad heart

Traffic Implications

MM27, MM41, MM42 and MM44.

The effect of greatly increased traffic on Send Barns Lane and Send Road is not fully understated by GBC. It seems there's a feeling that "it will be alright on the night". Well it won't be so until GBC commit to a proper study of the matter which will be made public and up to debate.

Attached documents:

Comment: MM42 - LPMM18/5703  Respondent: Ben Stevens 10881217  Agent:

I object to MM42 - Policy A58 at Burnt Common. This is the largest new industrial allocation in any village in the borough. It makes no sense that an industrial development is required when there are empty sites and industrial units at Slyfield and in Guildford. In addition, it contradicts MM9 as it is a Greenbelt site because as far as I am aware, there are no special circumstances.

Attached documents:

Comment: MM42 - LPMM18/3286  Respondent: Christine Brockbank 10881921  Agent:

MM42: land at Burnt Common

An increase FROM 7000 TO over double the size at 14,800 sq. metres of industrial and storage facilities.

I object to this increase. It was deleted from the 2014 plan- but is now doubled in size.
As there is a reduction in demand for industrial land (Land Needs Assessment) it appears to be perverse and suspect to propose such a large and unnecessary development.

Attached documents:

Comment: MM42 - LPMM18/5954  Respondent: Amanda Stevens 10882113  Agent:

I object to MM42 at Burnt Common - Policy A58, . It seems to have been re-instated and the area has been doubled making it the largest new industrial allocation anywhere in Surrey. This despite Slyfield and Guildford having empty sites and the Employment Land Needs Assessment which showed a reduction in demand for industrial land. Again, the repercussions of all that extra traffic will cause complete gridlock in the mornings. These roads are usually heavily congested and Nitrogen dioxide levels are already at dangerous levels.

Attached documents:

Comment: MM42 - LPMM18/3446  Respondent: Jim Browne 10893921  Agent:

MM41-Policy A43---MM42-Policy A58---MM44 Policy A63

MM9 Green Belt Policy

MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.

Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

**Attached documents:**
Local Plan Modifications MM44, MM41, MM42, MM9

We strongly object to the main modifications to the Local Plan for Send. This area is not suitable for such development. There is not the infrastructure to support this, and the real need is for just a small number of AFFORDABLE houses. With regard to MM9, the Green Belt Policy, Alderton's Farm in particular cannot be "considered to be within the village" and such intrusion into the Green Belt will benefit no one but the developers.

Attached documents:

Comment: MM42 - LPMM18/2997  Respondent: M Stokes 10903265  Agent:

I object to: MM42 Land at Burnt Common, London Road, Send, Policy A58

1. To the increase from 7000 to a minimum of 14,800 sq. m. This is the largest new industrial allocation in any village in the borough and on Green belt! Why when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.

2. There is no proven demand for this increase and the Employment Land Needs are showing a decline in demand for industrial land.

MM27 MM41 MM42 & MM48 Transport Strategy

The traffic implication for our village with all the new proposed development is untenable. GBC has not been clear in their assessment of the impact of the movement of the thousands of extra cars travelling along congested roads, the pollution levels, delays and gridlocks that will ensue. Even with the proposed A3 changes this still does not address the issues that will arise.

It would seem that GBC has decided that Send and Ripley are to be the fall guys in their planning due to our proximity to two major routes. I ask the Planning Inspector to please see some sense and consider the views of our communities. I personally have no problem with developments that reflect the need within our village but not this huge proposed over development in our area.

Comment: MM42 - LPMM18/540  Respondent: Linda Freeland 10903681  Agent:

MM41/42/44 - Garlicks Arch, Burnt Common, Aldertons Farm. Garlicks Arch and Burnt Common have seen substantial increases for development following the inspection and Aldertons Farm has appeared from nowhere. A revised (upwards) total of 789 dwellings is now proposed, yet the Office of National Statistics, based on their published housing needs data, have determined this figure should be 431. What is the justification for the additional 358 dwellings? Pressure on local infrastructure and services will be unbearable.

Comment: MM42 - LPMM18/2240  Respondent: D White 10905185  Agent:

MM42 Land at Burnt Common Policy A58

The majority of this land was, historically, Fogwills plant nursery and has never been industrial.

There is no requirement to create an industrial/warehousing use when Slyfield Estate has spare capacity.

There are no "special circumstances" especially when the Employment Land Needs Assessment shows a reduced requirement for industrial land as does the Office of National Statistics. **This therefore contradicts Policy MM9.**

The proposed expansion of this site to a minimum of 14,800sq.metres is in addition to the 25% increase at Send Business Centre and, yet again, the Employment Land Needs Assessment shows a reduced requirement.

The North Bound slip road of the A3 already takes "rat running" traffic which conflicts with the North and South bound traffic at the Burnt Common roundabout, most of which is attempting to access the A3 through Ripley village. Heavy Goods Vehicle movements in this immediate area will create nightmare congestion on, not only the A3, A247 Clandon Road and A247 Send Road. The local road network is not designed for such a volume of HGV traffic.

MM27 MM41 MM42 MM48 Transport Strategy.

Guildford B.C. have produced, what they call a Transport Strategy, without addressing the wider vehicle movement problems. The Leader of Guildford B.C has already acknowledged in public that the area has significant congestion and transport problems and yet still adds his name to policies that are clearly flawed.

The traffic on the North Bound A3 backs up from the M25 junction, "rat running" takes place off the Burnt Common exit and through Ripley village. This has not been referred to in any document.

The Southbound traffic backs up from Stag Hill to the Burpham Junction exit. This has not been reffered to in any document.

None of the roads surrounding Send were designed to take large volumes of traffic. They were and still are, in effect, village streets, despite their A road classification.

Burnt Common roundabout will be gridlocked by the increase in the number of vehicles, of commuters, school run drivers and the manoeuvring of HGV vehicles visiting the proposed new industrial site at Burnt Common, and the new units in Send Business Centre.

Emotionally this is a Transport Strategy for disaster.

**Attached documents:**

Comment: MM42 - LPMM18/1408  Respondent: Joe Gervasio 10906145  Agent:

I am writing to comment on the Main Modifications (MM) to the Guildford Local Plan.

I am a local resident and have lived in the village for over 30 years.

I object most strongly to the Transport Strategy relating to many of the modifications (MM41 MM42 and MM44 in particular). There has been no proper assessment of the impact so this is being proposed without any basis for mitigation. The impact is clearly going to be very great on the local roads and there is no proposal at all to alleviate it, never mind demonstrate that any alleviation could be adequate. Any disinterested observer can see that the local roads are already beyond capacity with traffic jams regularly in the (I remind you) **Green Belt** villages of Ripley and Send.
Comment: MM42 - LPMM18/1413  
Respondent: Joe Gervasio 10906145  
Agent:

I object to the scale of the enlargement of the Industrial land at Burnt Common MM42. This proposal is now TWICE THE SIZE of the original proposal which was rejected in 2014! There is no requirement or special circumstances for industrial sites in the Green Belt, no demand for it locally, and there is already spare industrial capacity in the existing industrial area at Slyfield. This increase again has not been contextually consulted upon, and it runs counter to the Employment Land Needs Assessment that actually shows a reduction in demand for industrial land!

Comment: MM42 - LPMM18/3659  
Respondent: Heather Thompson 10910753  
Agent:

I object to MM42 - Land at Burnt Common, London Road, Send, Policy A58

I find it unfathomable how this site can have been deleted from the original plan and then increased twice, doubling its size from the initial proposal of 7000 square feet to 14,800 square feet. This is totally unnecessary when Slyfield has unused capacity. As such, it means taking green belt land when an already developed area is available. This is in addition to the 25% increase at Send Business Centre. These proposal constitutes the largest new industrial allocation in any village in the borough. There are no special circumstances and, therefore, this also contravenes MM9. To say that this is unfair is an understatement. In addition to this, the Employment Land Need Assessment showed a reductions in demand, not an increase, making such development unnecessary. Once again, I return to the issue of road congestion and, inevitably accompanying this, increased pollution. Nitrogen dioxide levels in the area are already dangerous. This traffic will have a knock on effect to the surrounding areas, which, once again, will impact negatively on our lives.

Comment: MM42 - LPMM18/3670  
Respondent: Heather Thompson 10910753  
Agent:

I object to MM27, MM41, MM42, MM48 Transport Strategy

The cumulative impact on the traffic and pollution issues on the village, when all of the proposed developments at Garlick's Arch, Clockbarn, Alderton's Farm, Gosden Hill and Wisley and Ockham, is totally unacceptable. Our road systems are already heavily congested, especially at key points in the day. My daughter lives on Send Road where it is often difficult to enter and exit her drive because of the ceaseless flow of vehicles. Crossing the road is perilous. The pollution levels are a real cause for concern as I have a young grandchild. We already know that far too many of today's youngsters suffer from asthma, a direct result of the increasing levels of pollution. This can only be exacerbated if these proposals go ahead.
**Comment:** MM42 - LPMM18/5601  **Respondent:** Isabelle Stevens 10913377  **Agent:**

I object to Policy A58 at Burnt Common. It is not clear why an industrial development is required when there are empty sites and industrial units at Slyfield and in Guildford.

**Attached documents:**

**Comment:** MM42 - LPMM18/1704  **Respondent:** Stuart Ray 10915713  **Agent:**

MM27. MM41. MM42.and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill, Wisley and Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. It seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

This massive increase in traffic and associated air pollution will affect pupils of Send 1st school which will take brunt of the increased pollution as will St Beads middle school. The dropping off of children at Send 1st school is already absolute mayhem and it is only a question of time before a fatality happens. With an increase of traffic the chances of a fatality goes up exponentially.

**Attached documents:**

**Comment:** MM42 - LPMM18/1707  **Respondent:** Stuart Ray 10915713  **Agent:**

MM42. Land at Burnt Common,London road Send Policy A58.

As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity. There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.

This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

**Attached documents:**
Comment: MM42 - LPMM18/4761  Respondent: Katharine Moss 10918273  Agent:

MM42-Land at Burnt Common, London Road, Send, Policy A58

The Employment Lands Needs Assessment showed a reduction in demand for Industrial Land.

This plan was deleted in 2014 plans, however this has subsequently been increased TWICE from 7000 to a MINIMUM of 14,800sqm! Therefore why is Send been given this HUGE increase when there is NO NEED and it will make Send the village with the largest industrial allocation of any village in the borough! WHY when Slyfield which is sufficiently close by has unused capacity!

There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9. There is no need to put Industrial premises in our precious GREEN BELT. Surrounding roads will be further gridlocked causing an increase in already high Nitrogen Dioxide levels!

Attached documents:

Comment: MM42 - LPMM18/4769  Respondent: Katharine Moss 10918273  Agent:

MM27. MM41. MM42. and MM48-Transport Strategy.

This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents, trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane.

This massive increase in traffic of all sorts heading to and from Woking along Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

Attached documents:

Comment: MM42 - LPMM18/2322  Respondent: J.A. Millard 10919841  Agent:

MM42 Land at Burnt Common

The increase in the size of industrial and storage area is completely unjustified. This proposal was previously deleted from the plan in 2014 but has re-appeared for no good reason. This development will ruin Green Belt land and significantly add to the pollution already generated by the M25 and A3M motorways. The Employment Land Needs Assessment showed there is actually a reduction in demand for industrial land and it is also known that Slyfield has capacity. The increased Send Business Centre will [unreadable text] fulfill demand. I object to this proposal.

Attached documents:
MM27, MM41, MM42 and MM48 Transport Strategy

The development of the Clandon slip roads on the A3M will cause the local roads to be completely overwhelmed. Already the traffic from Burnt Common to Woking is horrendous and this development will cause it to virtually gridlock. None of this will be to the benefit of the land inhabitants who will also suffer increased pollution. I object to this proposal.

Attached documents:

Comment: MM42 - LPMM18/579  Respondent: Sebastian Forbes 10920865  Agent:

1. c) Industrial and storage (MM42): Has the spare capacity of Slyfield been properly considered?

MM27, MM41, MM42, and MM48: When will the traffic implications be properly addressed?

Attached documents:

Comment: MM42 - LPMM18/4846  Respondent: Mark Stevens 10920961  Agent:

I object to MM42 Policy A58 at Burnt Common. I can see no necessity for an industrial development here when there are empty sites and empty units at Slyfield and nearby Guildford. You are not making the most of the established brown field sites already in the area. This development was removed from the 2014 plan and is now being presented in a vastly increased form. It contradicts MM9 and there are no special circumstances to endorse it. It is also by far the biggest new industrial allocation to any village in the borough and yet the Employment Land Needs Assessment showed a reduction in demand for industrial land. A village which struggles with existing traffic levels does not need the addition of further commercial vehicles.

I need hardly add that these are not the full extent of developments you are trying to push through in the immediate area. There remains plans for housing in Send Hill (and a Traveller’s site), houses at Clockbarn in Tannery Lane and a significant increase in the size of the Send Business Centre, within the Wey Conservation area.

Any of these significant developments would represent a heavy concentration on one village. They are unreasonable, unpractical and should be abandoned forthwith.

Attached documents:

Comment: MM42 - LPMM18/3591  Respondent: Arthur Thomas 10922017  Agent:
MM42 Land at Burnt Common

The proposals for industrial use is the largest allocation in any village in the borough. There is already a Business Centre at Tannery Lane Send. There is no demand and therefore no need to allocate land on Green Belt for industrial use at this location when more appropriate land is available at Slyfield. The local roads are inadequate for heavy traffic and industrial vehicles will add to the pollution.

Attached documents:

Comment: MM42 - LPMM18/5631  Respondent: Kathleen Grehan 10922689  Agent:

1. MM42 Land at Burnt Common, London Road, Send, Policy A58

Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

See all my objections above. This will also increase the heavy industrial traffic thus increase the diesel fumes and damage to the road surfaces.

Attached documents:

Comment: MM42 - LPMM18/5639  Respondent: Kathleen Grehan 10922689  Agent:

1. MM27 MM41 MM42 and MM48 Transport Strategy

Changes in the various transport strategies will in no way solve the problem of the increased traffic that will be produced by all the planned developments. It is more likely to make the situation worse.

It seems Send is getting far more than its fair share in this plan. Why is that? We have certainly submitted plenty of objections to the Local Plan at the various stages but it seems to have no effect. I have lost all faith in the planning process. If the burden was shared out more fairly the traffic problem would be diluted.

Attached documents:

Comment: MM42 - LPMM18/1952  Respondent: Ms Victoria French 10924161  Agent:

(0c) What exactly are these mitigation schemes, who will maintain them and how will the reversal of 'adverse material impacts on communities and the environments' be measured? Will the contribution increase proportionately if more of the site (3) is developed? How will this be enforced, and, over such a long period of time, how can residents be sure they will actually get anything very much in return for potentially excessive expansion of this site?

Attached documents:
I am writing to object strongly to some of the main modifications to Guildford's local plan.

I live on Send Road and will be hugely adversely affected by the massive growth in traffic on a road that is already too busy. The big increase in houses at Garlick's Arch (MM41), the doubling in size of the Burnt Common industrial estate (MM42), the Alderton's Farm housing development (MM44) and the Clandon A3 slip road (MM27, MM42, MM48) will combine to put intolerable pressure on Send Road. This will result in increased noise, delays and gridlock, not to mention the extra pollution which is a major health concern for those living on the road. In particular, the industrial estate is bound to increase HGV traffic on Send Road, which poses a major safety risk to young children. The 30mph limit is not usually adhered to and there are no speed cameras on the road or any traffic-slowing devices.

Furthermore, the Garlick's Arch housing development (MM41) is now increased by 150 houses. This is excessive and ignores the 7,000 objections to the original, smaller plans. This land is Green Belt land and ancient woodland. This will be lost while at the same time morphing Send and Ripley into one big sprawling mass of houses. Surely the whole point of the Green Belt is to stop this happening? The extra population will also put intolerable pressure on local schools and medical facilities - particularly after the council's recent decision to close Ripley Primary School in extremely dubious circumstances, which attracted negative coverage in the national press.

As far as the industrial estate at Burnt Common is concerned, the doubling of the size to 14,800 sq m seems a total insult to all those who objected to previous incarnations of the local plan. There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are no special circumstances so it goes against your own Green Belt policy (MM9). There is already a 25% increase in the Send Business Centre, while the huge new Vision Engineering factory and the fact that the old factory is being kept as a commercial property despite residents being told it would become housing, all combines to fundamentally change the nature of Send by massively increasing the amount of industrial and commercial activity.

And why has the Alderton's Farm housing development reappeared in the latest local plan? It is Green Belt with no special circumstances so again contravenes your own rule MM9. Added to the other proposed housing, it makes 770 houses added to the current 1,700 in Send. That is an unnecessarily high increase which is unfair on the people who live in Send already.

Moreover, the wording of the MM9 policy on the Green Belt seems to leave open the possibility of more 'infilling' of any land left that hasn't been developed.

It is staggering that after all the complaints, Guildford Borough Council has come back with these modifications.

Attached documents:
MM42 Land at Burnt Common, London Road, Send, Policy A58

Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

MM27 MM41 MM42 and MM48 Transport Strategy

The transport strategy will not compensate or eradicate the problem that will occur when you put so many new houses in one area rather than spreading them throughout the borough. E.g to make access north bound on the A3 is not going to solve any problems only create more as it will encourage more cars through the village from the Woking direction. To increase the number of houses by 45% in Send is a recipe for disaster unless far more thorough and planning is put into the infrastructure. This Local Plan does not address the problem of the already overloaded infrastructure.

Attached documents:

Comment: MM42 - LPMM18/1372  Respondent: R Ebdon 10933569  Agent:

This proposal was deleted from the 2014 plan but you have now reintroduced it and doubled the area impacted. This is an unnecessary industrial development in the green belt because Slyfield has unused capacity. There are no special circumstances and so it contradicts MM9. Send will have much higher concentration of business and industrial development compared to other villages in the borough, as there is also a 25% increase in Send Business Centre. However, there is no proven demand for this. The impact on surrounding roads, which are already gridlocked at peak times, will be unbearable for the local community.

Attached documents:

Comment: MM42 - LPMM18/3028  Respondent: Alan Brockbank 10938241  Agent:

MM42 Land at Burnt Common Policy A58

This proposed large industrial site makes very little sense when access to the north-bound A3 will involve heavy vehicles having to travel through already congested Ripley. Why not use the existing nearby site of Slyfield? At the other end of the village near me we already have an industrial unit increasing in size. I've lost count of the numbers of trucks and lorries that sat navs bring down Tannery Lane.

I understand that there are no special circumstances so it also contradicts MM9. I object.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications have not been adequately addressed

Attached documents:

Comment: MM42 - LPMM18/300  Respondent: JN Boardman 10945793  Agent:

It is obvious that with the above policies & strategies are still reflecting directly from what has gone before; amending & increasing on the Local Planning Foot Print. These changes are shown in shaving bits off here and adding bits to there.

These amendments: -

Still disregards all technical impacts on current & future structures. Most structures sit on a deep clay base which needs peculated ground water to function as a foundation base.

Tweaking weak infrastructures, no way puts in place any future proofed infrastructures.

Increasing these capacities will greatly increase all impacts on enviroment. Not all of which is yet to be fully understood or been considered.

Concretting over "Green Belt" is just not on, now or anytime in the future. We all complain about the forests in South America being cut down, along with plastic waste; this is no different.

The impact of such large developments, will swamp Send & all surrounding areas. If Wisley was a no no; then these proposals are doubly bad.

So what part of NO, does the current dominant political power not understand?

It seems as if the first judgement, common sense (Wisley) went against the current political-monied power houses. How strange that with a new judge conforms now to their wishes. How did all this happen?

Stop faffing about! Ask the local populous "What they want to happen by holding a Local Referendum." Just like Switzerland.

Attached documents:

Comment: MM42 - LPMM18/3599  Respondent: Alison Humberstone 10952161  Agent:

My initial objection is to: MM41,MM42,MM44,MM9, MM27.

POLICY S2.

The housing number predictions have been shown to be incorrect so this is all starting from an incorrect basis. The latest data makes a mockery of G.B.C consultants figures.

At the public examination the figure for Guildford.B.C. housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated.

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

I trust the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.
Comment: MM42 - LPMM18/3619  Respondent: Alison Humberstone 10952161  Agent:

MM42. Land at Burnt Common, London road Send Policy A58.

There is no need for new industrial sites when Slyfield is has unused capacity. There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.

This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

You dont seem to think fo the greenbelt being protected and available for future generations - you just want to take advantage and use it now.

As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

Attached documents:

Comment: MM42 - LPMM18/1027  Respondent: Christopher Hunter 10957441  Agent:

I object. There is insufficient demand for such large amount of industrial space.

slyfield has enough space.

there are no special circumstances and this goes against Green Belt Policy

Attached documents:

Comment: MM42 - LPMM18/4677  Respondent: Liam Doyle 10966977  Agent:

MM42 - Land at Burnt Common, London Road, Send, policy A58

I object to this on the following grounds:

• No need for new industrial site when extra capacity at Slyfield is not used
• Area has doubled from previous expansion proposals
• Will result in already busy narrow local roads being further gridlocked
I further OBJECT to these proposals. This part of the Plan increases the originally proposed 7000, to a minimum of 14,800 square meters of land to be used for industrial and storage. I would remind Councillors, that they actually withdrew and thereby deleted it from the 2014 plan – the effect is to more than double the area originally proposed. This is now by far the largest new industrial allocation in any village in the borough and is completely unnecessary as Slyfield currently has under-utilised capacity. Furthermore, there are NO special circumstances to warrant placing units such as these into Green Belt land. Work underpinning the Employment Land Needs Assessment actually showed a reduction in demand for industrial land. When added to increased capacity of 25% at Send Business Centre, means there is a much bigger concentration of industrial capacity in Send than in any other village - with no proven demand. Councillors spent happy times sitting in gridlocked traffic within short term memory when viewing the proposals at the former Wisley Airfield – the increases in traffic attempting to use already gridlocked roads if approval is given to this proposal is inconceivable and will serve to push the council into a situation whereby they actually increase health risks to road users and residents by increasing levels of existing and proven nitrogen dioxide toxicity.

Once again, this breaches MM9 – without justification. To attempt to introduce such changes introduces a test on which no one can reasonably understand as it is purely subjective. The effect would leave the Council open to criticism that such a subjective test is put in place in order to achieve the aims of the Council without respecting the views of local people or indeed experts. If breaches to the Green Belt are permitted (even where proven unnecessary), this sets a dangerous precedent for future developments.

Attached documents:
**Comment:** MM42 - LPMM18/3573  **Respondent:** Robin L. Smith 10972833  **Agent:**

**MM27, MM42, MM42 and MM48 Transport Strategy**

The implications upon traffic that MM41 (Policy A43), MM42 (Policy A58), MM44 (A63) will bring are not addressed to any worthwhile depth outline at a high-level by the A3 changes, the Clandon slip roads. GBC offers up find sounding words but no serious "meat" with regards to full assessments to serious increase in traffic with impact on Send Barnes and Send Road with an increase of several thousands of cars acerbating the current, existing traffic problems.

More houses will be hit by traffic pollution, noise, delays and gridlock.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/1356  **Respondent:** Mrs Julie Cameron 10984385  **Agent:**

I object to the revised proposal to increase land for industrial use and storage at Burnt Common. I understand that there has been no proven demand for such an increase, but had there been, Burnt Common would be an unsuitable location, in a semi-rural location where people are living. There is already capacity elsewhere in the Borough, such as Slyfield Industrial site. The road infrastructure in the area is already stretched to capacity because of the location near the A3 and M25 and the river crossing in Send. Anyone who has tried to leave Send on a weekday morning will be aware of the build up of traffic at the Burnt Common roundabout (where Little Waitrose is located) as traffic thunders at speed down the sliproad from the A3 and residents from Send, Ripley and locations further afield such as Old Woking, and Kingfield accumulates at the roundabout. The road structure through Send is stretched to the limit at such times and to increase this would further reduce air quality in an area where our children are being educated.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/2539  **Respondent:** Ian Pigram 10987745  **Agent:**

Having been deleted from the 2014 plan, MM42 has now doubled in size. With no special circumstances, this conflicts with MM9. Slyfield has alternative space and should be the focus of industrial land use. Send Business Centre has also increased in size. MM42 would result in an inconsiderate concentration of business land in Send, to a level greater than in any other village. The unimaginable increase in traffic and nitrogen dioxide levels would make it difficult for residents to use the road infrastructure and lead to ill health.

The transport strategy (MM27, MM41, MM42 and MM48), especially the A3 Clandon Road slip roads, inadequately addresses the health and transport implications for traffic due to the proposed developments at Garlick's Arch, Burnt Common, Clockbarn and Alderton's, together with Gosden Hill, Ockham and Wisley. A3 slip roads to and from London would attract traffic from Woking and further afield, to the detriment of village life and health.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/4384  **Respondent:** Victoria Bean 10990465  **Agent:**

MM42 Burnt Common
I object to this because:

there is no need for more industrial space when existing areas of this are unused.

the surrounding roads will not be able to cope with the increased traffic.

MM44 Alderton's Farm

I object to this because:

it is greenbelt land.

this has already been deleted from a previous draft and now put back in.

these houses are unnecessary as there are hundreds of other proposed houses in the area, far too many for the village to cope with.

the narrow roads in the area will not be able to cope with the huge amount of increased traffic.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/4392  **Respondent:** Victoria Bean 10990465  **Agent:**

MM27 MM41 MM42 MM48

the traffic implications on the village are huge, it would not be able to cope with thousands more cars everyday. The roads would be gridlocked, there would be increased noise and air pollution.

The village cannot cope with the huge number of proposed houses and industrial units, it will change and destroy the village environment.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/608  **Respondent:** Pam Harnor 10995233  **Agent:**

MM42 Land at Burnt Common, London Road, Send, Policy A58

- Since being deleted from the 2014 plan this has been increased twice, doubling the area

- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9

- The Employment Land Needs Assessment showed a reduction in demand for industrial land

- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand

- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Why build industrial and storage facilities on Green Belt. What is the justification?
There is a reduction in the demand for industrial land, and Slyfield has spare capacity.

The A3 changes will not prevent a massive traffic impact on Send Barns Lane and Send Road.’

Yet again previous concerns have not been addressed but completely ignored, YOU now wish to more than double the original proposed industrial development, again on Green Belt land whilst empty space and units exist on other sites within the borough. The congestion that this development would bring to the narrow roads through the local villages is unimaginable, large articulated lorries are already creating problems and having difficulties negotiating locally, causing holdups and delays as well damage to both the roads and footpaths.
Comment: MM42 - LPMM18/896  Respondent: Howard Milner 11003361  Agent: MM27 MM41 MM42 and MM48

Again no proposal is made regarding the major increase in traffic to the immediate or surrounding areas, narrow roads and tight junctions in the villages of Ripley, Send, Old Woking and Clandon already prove problematic at peak times, how emergency services will be able to attend callouts at peak times is unthinkable. The tremendous increase in pollutants caused by the increase in traffic is yet another cause for concern, especially in the light of the removal of trees, hedges and grassland required to build all the homes in the immediate area, going against the environmentalists latest requests to plant more trees and create green spaces in an effort to improve air quality.

Comment: MM42 - LPMM18/882  Respondent: Elizabeth Milner 11003681  Agent: MM42 Land at Burnt Common, London Road, Send, Policy A58

I cannot understand why this industrial and storage development is back in the plan after having been deleted from the 2014 plan. It would make life intolerable for residents, as well as poisoning them with dangerous levels of nitrogen dioxide. Please take this out of the plan and see sense. It is far too large an industrial development for any village in the borough and there is absolutely no need for it when there is unused space at Slyfield. I understand the Employment Land Needs Assessment showed a reduction in demand for industrial land so it is incomprehensible to develop this site, especially with this being on top of a 25% increase in Send Business Centre. Again, you would be gridlocking surrounding roads, especially the roundabout by the present Shell garage/Little Waitrose roundabout at Send Barns Lane.

Comment: MM42 - LPMM18/887  Respondent: Elizabeth Milner 11003681  Agent: MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick's Arch, Burnt Common, Clockbarn and Alderton's would not be adequately solved by the A3 changes and the Clandon slip roads. Add in the developments at Gosden Hill and Wisley/Ockham and you will have major problems in the future with traffic. I would suggest you come out to view Send Barns Lane and the roundabout by Little Waitrose at the rush hour, around 8.30 am and just imagine how the levels of noise, pollution, delays would be increased intolerably both for the existing residents and for the proposed new residents. The roads would be gridlocked.
Comment: MM42 - LPMM18/809  
Respondent: David Pycraft 11003969  
Agent: MM42 Land around Burnt Common warehouse, London Road, Send

My first objection to development on this site is that the plan has been revised to increase development, from 7000 to 14,800 square metres. This makes no sense in light of the Employment Land Needs Assessment's conclusion that there the demand for industrial space is actually decreasing.

Another factor is the huge increase in traffic which would arise from this site. Access is through a narrow lane on a small but very busy roundabout (Burnt Common). Once again, there would be an unacceptable increase in the level of congestion around this area should it be developed.

These reasons qualify the site as 'inappropriate development' under Policy P2, MM9, Policy Paragraph (1). As with site MM44, there are no 'very special circumstances' to justify the development.

If the Council are determined to provide more industrial space in and around Guildford, then I would urge them to take a close look at Slyfield, where I understand there is a large amount of land which is currently available for industrial purposes.

The Local Plan for these sites in and around Send is wholly inappropriate. It fails to acknowledge that not only is much of the land unsuitable for development, but that the area simply does not have the infrastructure to cope. The roads are already at full capacity; the increase in traffic should these developments occur will lead to significantly higher levels danger for drivers and pedestrians, and of pollution for locals and the surrounding countryside. Furthermore, Send school and The Villages surgery are also already running at maximum capacity, and will be simply unable to cope with such a huge expansion of the local population. Finally, the Local Plan violates the tenets of Green Belt policy. For these reasons I implore you to reconsider the Plan.

Comment: MM42 - LPMM18/3775  
Respondent: Nick Thomas 11005473  
Agent: MM42 Land at Burnt Common, London Road, Send, Policy A58

The latest proposals have more than doubled the size of this already drastic development of industrial and storage space, and there is nothing like it proposed in any other village in Guildford Borough. Why is everything dumped on Send? Brownfield sites are available for this building, and the Slyfield estate could more easily bear much of the burden - 'though less profitably for developers if that is your only consideration. The proposal therefore contradicts MM9 green belt provision.

My business is now based in Send Business Centre, which is also growing at present - that's fine although Tannery Lane is narrow and already busy, but surely this means Send has already taken a share of the proposed industrial development, the need for which has not by the way been proven any more than has the demand for residential building.

MM27 MM41 MM42 and MM48 / Transport Strategy

Proposed changes to the A3 and the Clandon slip roads (document 003a, sections 11.14 to 11.34) will help to feed traffic more quickly into the local road system - what then? Jams will feed back onto the major roads and cause massive problems for both local and longer-distance motorists. GBC's assessment of possible solutions to this is extremely superficial - it's easy to write a few sentences promising infrastructure will follow but this is a real problem to which there won't be an acceptable solution: a proper amount of infrastructure to cope with this amount of development will devastate the green belt and destroy the character of the area.
Your current document suggests (Appendix 11.4 of GBC Responses to Matters, Issues and Questions reference 003b) that the increase in morning traffic on the A247 Send Road will be just 3% - after adding nearly 40% to the housing stock of the village. Heaven only knows how anyone arrived at this figure, but you don't need complex calculations to see that an estimate is out by an order of ten, as this is.

**Attached documents:**

**Comment: MM42 - LPMM18/247  Respondent: Mrs Sandra Reeves 11008033  Agent:**

I object to this proposal which would be the largest new industrial allocation in any village in the borough. It will lead to the narrow local surrounding roads becoming gridlocked with nitrogen dioxide levels already at a dangerous level. There is no need for such an industrial site on Green Belt land when there is already unused space on the Slyfield site. There are also no special circumstances so it also contradicts MM9.

**Attached documents:**

**Comment: MM42 - LPMM18/1590  Respondent: Russell Pascoe 11008225  Agent:**

MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous

**Attached documents:**

**Comment: MM42 - LPMM18/1595  Respondent: Russell Pascoe 11008225  Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

**Attached documents:**
MM42  Land at Burnt Common, Send Policy A58  This is an enormous increase for a village such as Send and I understand that there are sites available at Slyfield which surely should be filled first before any proposal for Send is considered.

MM27 MM42 MM48 Transport Strategy  These proposals are all quite out of proportion for Send. Anybody forced to travel at rush hours on these local roads will know all too well the delays are already totally unreasonable.

Attached documents:

Comment: MM42 - LPMM18/4929  Respondent: Mrs Janet Williams 11011041  Agent:

1. MM42 Land at Burnt Common, London Road, Send, Policy A58

*Increased from 7000 to a minimum of 14,800 sq m of industrial and storage*

Again the roads in and around the village will be unable to cope with this development. Industrial traffic tends to be heavier than domestic so not only will it cause jams, create more air pollution but it is also likely to damage the roads and the underlying, aged sewage pipes.

Why is Send being targeted with such a huge allocation of industrial development compared with all other villages in the borough when the Employment Land Needs Assessment showed a reduction in demand?

To add insult to injury this development is once again on Green Belt when there are absolutely no ‘special circumstances’ to develop new industrial sites when brownfield sites exist in the borough.

Attached documents:

Comment: MM42 - LPMM18/4941  Respondent: Mrs Janet Williams 11011041  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

Changes to the A3 slip road will in no way make up for the increased traffic that will be generated by all the planned developments. In fact it is far more likely to make the situation worse. What assessments have been done to predict the actual changes in traffic that will occur as the result of the planned developments?

Attached documents:

Comment: MM42 - LPMM18/908  Respondent: Mary Warren 11011713  Agent:

Transport

Modifications MM27, MM41, MM42, MM48.
As before, there appears to be no clear plan for transport links or other facilities such as schools and medical facilities, just fine words. Without such a document, the local plan is useless and will only lead to chaos and gridlock on the roads and impossible class sizes in our schools. Already, the roads around Send, Ripley and West Clandon are overloaded with enormous European sized lorries which rumble through the villages with no thought given to parked cars or pedestrians, mounting the pavements if they meet a lorry coming the other way. In addition, they emit considerable diesel fumes, risking the health of the children in the schools, at least two of which are very close to the road.

**Attached documents:**

**Comment:** MM42 - LPMM18/633  **Respondent:** Brenda Tulloch 11016001  **Agent:**

MM27 – MM41 – MM42 – MM48 – I object on the following grounds

Already congestion exists in Send at rush hours mainly with people travelling into Woking etc and at school drop off and pick up times. Are the proposed changes to the A3 really going to improve this – I don’t think so. This causes delays – pollution and gridlock.

**Attached documents:**

**Comment:** MM42 - LPMM18/635  **Respondent:** Brenda Tulloch 11016001  **Agent:**

MM42 – I object on the following grounds

This proposal has doubled in size from previously.

There is no need to put this on green belt as there is sufficient space at Slyfields

Narrow surrounding roads will be gridlocked and cause even more pollution.

**Attached documents:**

**Comment:** MM42 - LPMM18/4067  **Respondent:** Trevor Pound 11023489  **Agent:**

With respect to MM42, I am receptive to ideas that support local employment although how much modern, automated warehouses would do this is open to question. Again, however, I am concerned that Green Belt land is targeted for this purpose. I am sure that if the council did an audit of local industrial property, it would find plenty of unused sites, not least at Slyfield. This proposal met stiff opposition in the past and I am troubled that this should be blatantly ignored with the council now coming forward with a much larger development of 14.8k sq m.

**Attached documents:**

Attached documents:

Comment: MM42 - LPMM18/177  Respondent: Mike Tarrant 11032705  Agent:

I object to MM42 (Policy A58, Burnt Common. Warehousing and Industrial units).

Because, of the increase from 7,000sq m. to 14,800sq m. of industrial and storage use. Which is not required. Employment Lands Needs Assessment (ELNA) 2015 shows an 80% reduction from the previous ELNA carried out by GBC in 2013 for employment space.

I object because Industrial and Warehousing sites and units are still available at Slyfield and in Guildford. So surely expanding existing Brown field industrial areas is better than creating a new one on Green Belt Land. Which contradicts MM9!

I question why the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, was withdrawn from the Local Plan?

Because, heavy traffic would be attracted from the M25, A3 and the A247, which is not suitable for commercial traffic. The A247 passes the entrances to Send school and the Villages Medical Centre. The additional traffic will increase dangerous Nitrogen Dioxide levels.

Because of the additional traffic this will create. There are circa 1,700 houses in Send. The proposed developments at Garlick’s Arch 550, Clockbarn 60, Winds Ridge 40, Plus Alderton’s Farm 120. Adds 770 new homes. An increase of 45%. This is excessive for our roads and indeed the infrastructure of our Village.
Comment: MM42 - LPMM18/181  Respondent: Mike Tarrant 11032705  Agent:

I object to MM27, MM41, MM42, MM48, Transport Strategy.

Because we have no verified assessment from Guildford Borough Council of the Traffic implication these modifications will impact on Send.

Common sense tells me development on the scale proposed in Send and wider a field at Gosden Hill, Wisley and Ockham. Plus the proposed M25/A3 Junction will increase traffic in our Village and with it the problems it brings.

Attached documents:

Comment: MM42 - LPMM18/4273  Respondent: Jo Komisarczuk 11033057  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

This land was originally removed from the 2014 plan, since removal it has been re-added twice firstly to 700 sq m but now to a minimum of 14,800 sq m.

This land is also Green Belt and no exceptional circumstances have been offered for the use of this land in this way, which contradicts the policy MM9.

There is no need for industrial sites within Green Belt land, especially as Slyfield Estate has plenty of unused but available, it seems to be rather strange to claim a need for extra new industrial space on a site that requires it to show a need for exceptional circumstances as it is currently in the green Belt and should be left.

The employment land needs assessment shows a reduction in demand for industrial sites, so why the need for this site. I see that this change is on top of the 25% increase in the Send business centre. The London road the A3 prior to the Ripley Bypass, is a two lane road, all other roads are small narrow lanes, how can large/heavy trucks travel here on country lanes? Nitrogen dioxide levels in this area are already dangerous to health.

Attached documents:

Comment: MM42 - LPMM18/4276  Respondent: Jo Komisarczuk 11033057  Agent:

MM27, MM41, MM42, transport strategy

Burnt Common, Send, Ripley, will all be unduly affected by the road changes at Garlick’s Arch, ClockBarn, SendHill, Send Business Centre, and nearby Gosden Hill, the changes which are frequently on/off at Wisley/Ockham have not been addressed by the plan, beyond the use of the A3 with its proposed changes and the Clandon slip roads. No survey has been done on the current flows of traffic, no proper assessment has been completed at all of the aggregate traffic increases and impact on Burnt Common Lane, Send Barns Lane and Send Road. The constant gridlock at heavy use times – morning and evening - and the increase in pollution especially Nitrogen Dioxide which is already bordering on dangerous...
levels. There will be many thousands of extra cars travelling through the area, increasing the already loud noise from the A3.

Attached documents:

**Comment:** MM42 - LPMM18/1163  **Respondent:** Nick Pycraft 11034817  **Agent:**

**MM42 Land around Burnt Common warehouse, London Road, Send**

I object to development on site MM42. This is another site where the proposed development has been increased, from 7000 to 14,800 square metres. This industrial space is unnecessary, as the Employment Land Needs Assessment concluded that there is much less demand for industrial land. In any case, I understand that Slyfield actually has a large area which would be much more suitable.

Once again, any development would lead to an unsustainable level of increased traffic in the area, with the ensuring problems which I have previously described. For all these reasons, this is another site which should be dismissed under Policy P2, MM9, Policy Paragraph (1) as being `inappropriate development', with no `very special circumstances' to justify proceeding further.

To conclude, I object to the Local Plan, as it clearly fails to recognise that there is insufficient infrastructure in and around Send and Send Marsh to cope with an increase in both traffic and population. Not only are the roads unable to take more vehicles, but The Villages Surgery and the school are also already under severe pressure, and as such cannot be expected to cope with an increased population. There is also the very real danger of an increased risk of accidents around the school. Much of the land proposed for development is also prone to frequent flooding. These are clearly valid objections in the eyes of those who know the area.

Attached documents:

**Comment:** MM42 - LPMM18/4209  **Respondent:** Nick Pycraft 11034817  **Agent:**

There is also the very real danger of an increased risk of accidents around the school. Much of the land proposed for development is also prone to frequent flooding. These are clearly valid objections in the eyes of those who know the area.
I write to object most strongly to the planning modifications to the above developments.

I object because the excess number of properties being planned will change the village out of recognition, we do not have the space and infrastructure for this number of properties.

The vast enlargement of the industrial areas will cause excessive noise, damage and danger to the younger and older residents in the village. These developments are again out of proportion to the village of Send.

The traffic changes on and off the A3 will cause major traffic congestion, mainly due to the lack of road space in Old Woking at all times and Ripley during the peak rush hour periods.

The Green Belt should be protected and not ignored.

Overall these planning applications cause a vast overdevelopment of the village and area of Send and should not be continued at the scale of the current proposals.

I object to MM42 - Land at Burnt Common, London Road Policy A58 which was deleted from the 2014 draft due to all the objections because there is no proven demand now or in the future for additional industrial capacity. It would therefore appear that GBC is presuming that a new A3 junction will be built sometime in the future at Send and justify this excessive industrial development within a Green Belt residential/rural area. Slyfield and Guildford still have empty sites and industrial units and the 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole of Guildford Borough - not the excessive allocation of 10 hectares in Send alone within the Green Belt which will cause major traffic gridlock in the surrounding roads and join up existing villages - again defeating the Green Belt. It is also noted that the word "maximum" in the 2016 Plan has, very significantly, been changed to "minimum". Existing roads necessary to service such a development do not have anywhere near the capacity to accommodate such a demand. This is totally unacceptable and smacks of an attempt at sleight of hand and dishonesty by GBC to confuse residents.

I object to M442 Land at Alderton's Farm, Send Marsh Road Policy A63 because this has increased the proposed housing from 45 to 60 homes on a road with very restricted access being effectively single lane in places and an already congested
and dangerous road junction with the A247 - despite thousands of previous objections by Send residents. This is also an area prone to serious surface water flooding which can only get worse.

Attached documents:

Comment: MM42 - LPMM18/1695  Respondent: Brian Slade 11036705  Agent:

MM27,MM41,MM42,MM48 Transport Strategy Increased traffic density caused by the proposed addition of 770 dwellings to Send, an increase of 45%; the majorly expanded industrial and storage area; and the new sliproads to and from the A3 resulting in thousands of extra cars and lorries travelling into Woking daily via the A247 together with the serious congestion and air pollution (which is already at dangerous levels) does not seem to have had any form of formal traffic assessment undertaken by GBC otherwise they would realise that their proposed plan will result in the destruction of Send's current infrastructure and that of its surrounding areas as well as increased noise and nitrogen dioxide pollution causing damage to the health of residents as well as serious traffic delays and gridlock of local roads.

Attached documents:

Comment: MM42 - LPMM18/1750  Respondent: Beryl Sussex 11041633  Agent:

MM42 Land at Burnt Common, London Rd., Send, Policy A58

Green Belt Land in Send, should not be used when there is capacity at Slyfield for Industrial Units

With a further increase of 25% at Send Business Centre also planned that seems excessive for a village such as Send.

Attached documents:

Comment: MM42 - LPMM18/1755  Respondent: Beryl Sussex 11041633  Agent:

MM27,MM41,MM42 and MM48 Transport Strategy

All the combined developments planned will place a huge burden on the present traffic system.

Send is already used by many Woking Commuters to reach the A3.

It is already a very busy road. More traffic will lead to more delays, gridlock, noise and pollution

Attached documents:

Comment: MM42 - LPMM18/4961  Respondent: Sam Thompson 11042433  Agent:
MM42, Burnt Common, Policy A58

This item was deleted from the Local Plan in 2014 after mass objections but now comes back again bigger than ever?!?!

Why? There is no justified local need with plenty of capacity at Slyfield industrial estate.

The Employment Land Needs Assessments showed a reduction in demand for industrial land – do the local council pay any attention to what is actually needed?

Narrow local roads cannot accommodate large industrial vehicles and lorries.

Attached documents:

Comment: MM42 - LPMM18/4966    Respondent: Sam Thompson 11042433    Agent:

MM27, MM41, MM42 and MM48, Transport Strategy

The local roads are narrow, already over congested and badly maintained. Send Marsh Road, Polesdon Lane and Newark Lane are busy commuting roads that constantly have pot holes that are not repaired. There is frequent gridlock and also no real public transport options as an alternative. The local area cannot sustain thousands more cars transiting in the area that would be the result of 770 more houses in the area.

The proposed changes to the A3 and Clandon slip roads do nothing to address these issues.

Attached documents:

Comment: MM42 - LPMM18/3100    Respondent: Gesh Doyle 11046017    Agent:

MM42 - Land at Burnt Common, London Road, Send, policy A58

I object to this on the following grounds;

- Area has doubled from previous expansion proposals
- No need for new industrial site when extra capacity at Slyfield is not used
- Will result in already busy narrow local roads being further gridlocked

Attached documents:

Comment: MM42 - LPMM18/3721    Respondent: Peter McGowan 11047201    Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The proposed A3 amendments and the Clandon slip roads do not properly address the impact of traffic for Send of development proposals for Aldertons, Clockbarn, Burnt Common and Garlick's Arch in addition to Gosden Hill and Wisley/Ockham. There is no adequate analysis of the total traffic implications on Send Barns Lane and Send Road.
especially taking into account the fact that thousands more cars will transit the area daily, bringing about increased noise and chemical pollution as well as delays, which noticeably have increased significantly over the 18 years that I have lived in the area, at the expense of residents and the natural environment.

**Other Developments**

The consultation only permits commentary on the principal changes and thus denies residents the opportunity to object again to 40 houses and a travellers' site on Send Hill, 60 Houses at Clockbarn in Tannery Lane and a 25 per cent increase in the size of the Send Business Centre notwithstanding the existence of the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

As a general point, many of the amendments can only be viewed without the context of appropriate infrastructure, with mention only being made that consideration need only be given to issues, including schools. It is unreasonable and unfair to put the amendments forward without mention of the infrastructure needed to support the original proposals, earlier modifications and these modifications.

**Attached documents:**

**Comment:** MM42 - LPMM18/3727  **Respondent:** Peter McGowan 11047201  **Agent:**

**MM42 Land at Burnt Common, London Road, Send, Policy A58**

This proposal was deleted from the 2014 plan and subsequently has increased twice and has doubled in size from 700 sq m to 14,800 sq m of industrial storage. This is unreasonable and unjustifiable given the the Employment Land Needs Assessment indicated a reduction in demand for industrial land. There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are no special circumstances, and so it contradicts MM9, referred to above. This represents the largest industrial apportionment in any village in the borough and is on top of a 25 per cent increase at Send Business Centre, with no demonstrable demand. The modifications will place significant stress on neighbouring roads and will increase traffic congestion dramatically and increase nitrogen dioxide levels which are already dangerous.

**Attached documents:**

**Comment:** MM42 - LPMM18/5892  **Respondent:** Patrick Oven 11048481  **Agent:**

MM42, Burnt Common, London Road Send.

This existing small industrial/warehousing are was included for further development in the first draft of the plan then deleted, with proposed warehousing to go to Garlick's Arch, then reintroduced in the latest iteration of the Plan. It is now proposed that the original 7,000 sq m of additional industrial development should be a MINIMUM of 14,000 sq m. There is no demonstrated need for this industrial allocation, and certainly not at this site. It is the only industrial site proposed in the Plan and is wholly disproportionate for one village to take this amount of development. The Employment Needs Land Allocation 2015 showed an 80% reduction in need for employment floor space. There is a large industrial estate within the Borough, at Slyfield, which has both unused capacity as well as scope for expansion to the east, on poor quality land and avoiding the nature reserve to the south. No attempt has been made to explain why a rural location should take this development, rather than the existing site. The Slyfield site is within half a mile at one end from the A3, to which it could be joined directly by a spur road into it so avoiding the need for HGVs to leave or join the A3 via the A320 and the Stoke junction as at present. This would greatly relieve congestion on the A320, the main Guildford to Woking road. In short,
this proposal is utterly ill-founded at the Send location, when an existing industrial site is equally close to the A3 trunk road.

Attached documents:

Comment: MM42 - LPMM18/5898  Respondent: Patrick Oven 11048481  Agent:

MM27, MM41, MM42 and MM48 - Transport Strategy.

GBC has grossly underestimated the effect on the local roads of the proposed developments discussed above and the other developments proposed in the Plan at Clockbarn Nurseries, Send Hill and the expansion of the Send Business Centre in Tannery Lane, which are not the subject of amendments and so precluded from discussion here. At the Public Inquiry GBC indicated only a minor increase was anticipated in traffic through Send on the A247 was anticipated. That totally fails to take into account that such huge development has to bring a large increase in both car and HGV traffic, which can only use the existing roads - no new ones are proposed. The proposed 4 way slip roads at the Burnt Common Clandon slip, currently only a northbound exit and a southbound joining will inevitably lead to increased traffic through Send. At present, traffic on the clockwise M25, bound for Woking generally leaves at junction 11. It is possible leave at junction 10 and take the A3 for a mile, leaving and going through Ripley, then Send and Old Woking. However the bottleneck that Ripley presents at busy times morning and evening at present dissuades this. Traffic turning right into the very narrow entrance to Newark Lane, heading for Pyrford and Byfleet, blocks the High Street, causing tailbacks that often stretch back to the A3 junction. GBC has completely failed to take into account that the provision of the 4 way slips at Burnt Common will also serve a new road from the proposed large development at Wisley Airfield, running parallel with the A3 and bypassing Ripley. M25 clockwise traffic intending to go to Woking will thus find it worthwhile when the M25 has it's usual morning and evening queues from Cobham Services to leave at junction 10 and take the new route to Burnt Common without any fear of hold-ups in Ripley. That traffic will however have to travel along Send Barns Lane and Send Road, already gridlocked morning and evening, adding even more congestion, noise and pollution. Ripley meanwhile, will bask in relative peace.

Send had the temerity to elect Guildford Greenbelt Group Borough Councillors in 2015. It is impossible to avoid the conclusion that this Plan is punishing the village for doing this. The proposed development, even as it stood prior to the increases provided by the amended Plan and the Inquiry, concentrated 40% of the housing development in an area with 18% of the Borough's population. We are also now intended to take a huge industrial area, the only one of its size in the Plan - all in one rural location. This Plan, taken as a whole as it must be, is utterly disproportionate and unfair to Send, Send Marsh and Burnt Common.

Attached documents:

Comment: MM42 - LPMM18/4194  Respondent: Belinda Nicoll 11049729  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy AS8

- Increased from 7000 sq m to a minimum of 14,800 sq m of industrial and storage
- Since being deleted from the 2014 plan this has been increased twice, doubling the area.
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.
- The Employment Land Needs Assessment showed a reduction in demand for industrial land.
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other
village with no proven demand.
  * Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous.

Attached documents:

Comment: MM42 - LPMM18/4199  Respondent: Belinda Nicoll 11049729  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clock barn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/4626  Respondent: Roger Bean 11051713  Agent:

MM42 Burnt Common

I object to this because:
there is no need for more industrial space when existing areas of this are unused.
the surrounding roads will not be able to cope with the increased traffic.

Most local industrial units have closed and converted to residential due to a lack of demand and support from local council for startups enterprises. Businesses have moved away, companies relocated to boroughs with incentives hence why we have industrial units to let locally, why do we need more?

Attached documents:

Comment: MM42 - LPMM18/4636  Respondent: Roger Bean 11051713  Agent:

MM27 MM41 MM42 MM48

the traffic implications on the village are huge, it would not be able to cope with thousands more cars everyday. The roads would be gridlocked, there would be increased noise and air pollution. Council and highways can not cope with current traffic and wear and tear on roads, potholes, broken kerbs, street lights not working.

Attached documents:

Comment: MM42 - LPMM18/6001  Respondent: Peter Komisarczuk 11061185  Agent:
MM42 Land at Burnt Common, London Road, Send, Policy A58

This land was originally removed from the 2014 plan, since removal it has been re-added twice firstly to 700 sq m but now to a minimum of 14,800 sq m.

This land is also Green Belt and no exceptional circumstances have been offered for the use of this land in this way, which contradicts the policy MM9.

There is no need for industrial sites within Green Belt land, especially as Slyfield Estate has plenty of unused but available, it seems to be rather strange to claim a need for extra new industrial space on a site that requires it to show a need for exceptional circumstances as it is currently in the green Belt and should be left.

The employment land needs assessment shows a reduction in demand for industrial sites, so why the need for this site. I see that this change is on top of the 25% increase in the Send business centre. The London road the A3 prior to the Ripley Bypass, is a two lane road, all other roads are small narrow lanes, how can large/heavy trucks travel here on country lanes? Nitrogen dioxide levels in this area are already dangerous to health.

Comment: MM42 - LPMM18/3782  Respondent: Ewbank's Auctioneers 11061345  Agent: DMH Stallard (Ms Katie Lamb)

Guildford Local Plan Main Modifications Consultation On behalf of Ewbank's Auctioneers LLP
Main Modification 42 and Policy A58

DMH Stallard act on behalf of Ewbank’s Auctioneers LLP (“Ewbank’s”) in relation to the Guildford Local Plan Main Modifications Consultation and land at Ewbank’s, London Road, Send.

Ewbank’s have been represented throughout the Local Plan process, including participation in the Local Plan Examination, these representations should be read alongside previous submissions.

Ewbank’s are an existing local employer with a warehouse and auction room at London Road, Send. Ewbank’s are highly successful, having significantly grown since 1992 when they acquired their current premises, however, there is a pressing need to expand or find alternative suitable premises; however, like most other commercial sites, it is restricted by its Green Belt location. The site, which is defined as a previously developed site, is located to the south of Send Marsh, accessed via London Road but adjacent to the A3. It is located within the Green Belt but is well contained by significant treed boundaries; there are some views into the site from the A3, but these are limited and dominated by the existing warehouse. The land was previously used as a plant nursery and much of the site is characterised by scrub land, parking and overgrown hardstanding / hardcore. The site is directly south of land allocated under policy A58, amended through Main Modification (MM) 42. It was previously included in the initial Regulation 19 Pre-Submission Local Plan as a wider site allocation (Policy 13 – see plan and policy attached).

The Council are currently consulting on a range of Main Modifications to the Local Plan, which acknowledges a need for additional employment floorspace in response to issues raised at the Local Plan Examination. Ewbank’s representations, contained within this letter are confined to MM42 – Policy A58 – Land around Burnt Common warehouse, London Road, Send.

The NPPF requires Local Plans to be tested against tests of ‘soundness’, in particular these tests require that Local Plans meet an areas objectively assessed needs, as a minimum. We submit that MM42 and Policy A58 fails to provide for the objectively assessed employment needs of the Borough, as identified through the Council’s own evidence base and as discussed at the Local Plan Examination.
During the Local Plan Examination, the Council submitted evidence (GBC-LPSS-015) stating that the industrial land requirements were between 16,650sqm and 18,450sqm, this supports the previous submissions made on behalf of Ewbank’s (and others) prior to, and during, the Local Plan Examination. This evidence goes into further detail taking into account losses and site allocations, however, in its conclusion it fails to set out the industrial floorspace requirements; based on the figures provided within the document, it can be calculated that there is a need for an additional 12,913sqm – 14,713sqm of industrial floor space (revised needs taking account of gains, plus local plan allocations). MM42 (policy A58) seeks to allocate a further 7,800sqm of floor space on land already identified around Burnt Common warehouse, this is an increase of more than 110% on just a single site. However, the expansion of provision on land around Burnt Common warehouse still falls significantly short of the remaining need for industrial floorspace (by approximately 5,113sqm - 6,913sqm). The NPPF requires that Local Plans provide for full objectively assessed needs (paragraphs 20 and 35), however, the Local Plan on its own evidence base, does not meet the full objectively assessed employment needs. Our concerns are further compounded by the provision of these needs on a single allocation of land, within single ownership, which is likely to result in artificially slow or no delivery, as was the case with the Local Plan 2003 where only 20% of allocated employment sites were ever released. As such, MM42 and the Local Plan fails to be positively prepared and therefore fails the tests of soundness.

Paragraph 80 of the NPPF requires that planning policies should help create the conditions in which businesses can invest, expand and adapt. Significant weight should be placed on the need to support economic growth and productivity, taking into account both local business needs and wider opportunities for development. The approach taken should allow each area to build on its strengths, counter any weaknesses and address the challenges of the future.

Furthermore paragraph 81 requires that planning policies:

a) set out a clear economic vision and strategy which positively and proactively encourages sustainable economic growth, having regard to Local Industrial Strategies and other local policies for economic development and regeneration;

b) set criteria, or identify strategic sites, for local and inward investment to match the strategy and to meet anticipated needs over the plan period;

c) seek to address potential barriers to investment, such as inadequate infrastructure, services or housing, or a poor environment; and

d) be flexible enough to accommodate needs not anticipated in the plan, allow for new and flexible working practices (such as live-work accommodation), and to enable a rapid response to changes in economic circumstances.

At the heart of the NPPF is the presumption in favour of sustainable development, which requires that policies must help build a strong, responsive and competitive economy in accordance with the above paragraphs. We submit that the Local Plan, through policy A58 and MM42 fails to accord with paragraphs 80 and 81 and the presumption in favour of sustainable development, as it seeks to allocate a site in single ownership for industrial employment use, on land around Burnt Common warehouse (London Road, Send). This allows for no market competition, choice or any flexibility to respond to the needs of a changing market.

MM42 suggests that it is likely that a future assessment of employment need will result in an increase in industrial employment land requirements, suggesting that this could all be delivered on land currently identified in policy A58. However, MM42 already increases the amount of floorspace on the site by over 1100% (from 7,000sqm to 14,800sqm) and it is therefore questionable whether the site could accommodate additional floorspace to meet future needs as suggested. There is therefore significant concern that MM42 and policy A58 cannot adapt to the changing needs of the market, as required by the NPPF.

Additionally, by allocating a single site in single ownership, the market is constrained and can be manipulated to ensure high values / rents and it is likely that the landowner or developer will restrict the amount of floorspace coming forwards to maximise financial returns. The NPPG is silent on this matter insofar as it relates to employment land, however, it does acknowledge that housing site allocations must allow for choice and competition in the market (Paragraph: 037 Reference ID: 3-037-20180913) and there it should follow that the same applies to employment land allocations. The NPPF, at paragraph 11, also requires that plans are sufficiently flexible to adapt to rapid change, the allocation of land around
Burnt Common warehouse, in single ownership, is unlikely to offer sufficient flexibility as there can be no market competition and no choice for future occupiers, simply put, there will be no choice but to accept the accommodation provided by the landowner.

Land at Ewbank’s was included in earlier iterations of the Local Plan. In 2016, the Council consulted on an initial version of the Regulation 19 Pre-Submission Local Plan. This included land at Ewbank’s as part of Policy 13, which identified land around Burnt Common warehouse (as set out in the submission version Local Plan) and land at Ewbank’s to meet the Boroughs employment needs (see the Council’s Proposals Map, attached). At this stage, the Council must have accepted that a larger site was necessary and acceptable and that this amounted to exceptional circumstances requiring its release from the Green Belt (as such, our representations do not go into detail on the appropriateness of removing the site from the Green Belt).

The land at Ewbank’s and Burnt Common Warehouse formed part of parcel ‘B13’, assessed within the Green Belt and Countryside Study (GBCS). The GBCS concluded that the whole of area B13 provided opportunities to accommodate development without significantly compromising the purposes of the Green Belt and is identified as a Potential Development Area (PDA). Additionally, land around Burnt Common warehouse, including Ewbank’s Auctioneers (referred to as the ‘triangle site’) was assessed as LAA Ref. 152. The GBCS along with the LAA site assessment and pressing need for employment floorspace has been acknowledged as providing the exceptional circumstances required to justify the release of land in relation to policy A58 for development. As the land at Ewbank’s Auctioneers was included in the same site area and assessment, it must follow that there are exceptional circumstances justifying release of land at Ewbank’s not only to meet the objectively assessed employment needs of the Borough, which the Plan currently fails to meet, but will also ensure competition, choice and deliverability. We submit that in order to make the Plan sound, land at Ewbank’s, directly south of the site should be allocated for additional employment floorspace, this could be achieved through further modification to Policy A58 by extending the extent of the allocation as previously identified in earlier iterations of the Local Plan, and as shown on our plan, attached.

Furthermore, it has also come to our attention that the Council have excluded land at Ewbank’s from the latest LAA. The various LAA’s do not include plans of site 152, however the Council have advised that previous iterations of the LAA and its associated assessment in the GBCS (as set out above) incorporated land around Burnt Common warehouse and Ewbank’s, but that the latest LAA revision reduces the site area to just the land around Burnt Common warehouse to follow the current site allocation boundary. Whilst we can appreciate separation of the sites for the purposes of site assessment (the Council are within their rights to assess the sites individually), the Council’s approach to the assessment of land at Ewbank’s is wholly unsound as they have simply removed it from the LAA altogether, notwithstanding the continued promotion of the site through the Local Plan process. The LAA is evidence base, it is required to include all sites promoted to the Council (unless they do not meet the site size threshold), it is not for the Council to exclude sites if they deem them to be unsuitable or should they not allocate those sites. Therefore, if the Council considered it necessary to separate the sites by land ownership, they should have re-assessed both sites individually, instead the Council have retained the site assessment for land around Burnt Common warehouse (site 152) and then excluded land at Ewbank’s from the LAA. The LAA is therefore unsound and fails to give consideration to all sites available to the Council for consideration, it therefore follows that the Local Plan is unsound as it is not based on proportionate evidence. The Council through MM42, have failed to give proper consideration to all available sites, particularly the land at Ewbank’s, which the Council have previously considered suitable for site allocation.

The Sustainability Appraisal (SA) Addendum, submitted with the Main Modifications is also unsound as it fails entirely to give any consideration to the implications of increasing the employment floorspace on a site in single ownership and fails to give any consideration to the alternative solutions, such as the allocation of additional land at Ewbank’s (or other appropriate sites). MM42 cannot therefore be sound as it is not based in proportionate evidence, fails to consider the alternatives and as we have set out, is not the most appropriate strategy.

It is acknowledged that the original SA highlights the infrastructure requirements resulting from strategic housing and employment growth at Send Marsh. Policy A43a of the Local Plan provides for a new slip road from the A3 to serve this growth. The implementation of this policy will provide a significant improvement to the accessibility of the area, which will include the land at Ewbank’s. As such, the land could be included in the allocation of A58, benefiting from allocated infrastructure improvements, whilst other sites could require additional new infrastructure and highways improvements.
In conclusion, we submit that the Local Plan, through policy A58 and associated main modifications (MM42) fails to meet the tests of soundness. The Plan fails to identify sufficient land to deliver against the objectively assessed employment needs of the Borough. Additionally, through allocating all industrial employment floorspace on a site in single ownership, there is likely to be artificial constraining of the market through purposeful under delivery to ensure maximum financial returns, additionally there will be no choice in the market for future occupiers which can lead to poor standards of design.

In order to make the Plan sound, we submit that at least one additional site allocation should be identified. This would provide for the objectively assessed needs of the Borough, as a minimum, as required by the NPPF, as well as providing market flexibility and competition to ensure a constant and deliverable supply of employment floorspace as well as improved design and choice for future occupier. It would allow for improved delivery across both sites and would ensure there was no artificial constraining of the market. Land at Ewbank’s has been included in previous iterations of the Local Plan in association with land identified through policy A58 (which demonstrates an acceptance of its removal from the Green Belt) and it could be included within Policy A58 and MM42 in order to ensure the soundness of the Plan.

Should the Examination be reopened to deal with any of the issues raised within our submissions, we would wish to participate in the Hearing Sessions.

Comment: MM42 - LPMM18/1033  Respondent: Vicki Groden 11070401  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

- The doubling to the present proposed size creates, I believe, the largest new industrial site, by far, in any village in the borough and is a heavy imposition on this village and this location and its roads.
- I understand Slyfield has unused capacity, therefore it is hard to accept the need for building on Green Belt.
- Does not the Employment Land Needs Assessment show a reduction in demand for industrial land?
- The disturbance of heavy vehicle movement and emissions on the local residents is of great concern

Attached documents:

Comment: MM42 - LPMM18/5396  Respondent: Anthony Maine 11070977  Agent:

OBJECTION – Policies MM41, MM42 and MM44

I object to the proposed development at these sites as they are all within green belt areas. There are no reasons provided within the Main Modifications to the Local Plan that substantiates development on green belt land.

I urge the council not to consider removing the Green Belt and set in motion future development of these spaces, but to focus on the numerous unused BROWNFIELD sites that exist throughout the Borough. These would more than meet the current housing demand, once this is properly defined within the Local Plan.

Attached documents:
Comment: MM42 - LPMM18/4997  Respondent: David Williamson 11077025  Agent:

MM42 Land at Burnt Common, London Road, Policy A58:

I object to the Policy A58 change for the following reasons:

- It was deleted from the 2014 draft as a direct result of the huge number of objections made previously
- The parameters of allocation of land for industrial or warehousing use has increased twice, doubling the proposed area
- Slyfield and Guildford still have empty sites and units. There is no need for this development in the middle of Green Belt land
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole borough. An allocation of 10+ hectares just at Send in Green Belt land is utterly unnecessary
- The increase in heavy traffic would cause gridlock on local roads, and an increase in air pollution and danger to local residents and children

Comment: MM42 - LPMM18/3344  Respondent: Neil Munro 11097409  Agent:

RE: Objection to Local plan

I am writing to object to the over development of Send village in the proposed Local plan.

My family have lived in Send for over 50 years. We, along with all residents of Send and the surrounding villages, will be negatively affected by the impacts of the development on the green space, transport system and the health and education provision.

The following specific objections relate to the following proposed developments

MM41 Garlicks Arch 550 homes

MM42 Burnt Common industrial and storage

MM44 Aldertons Farm 120 homes

1. The current proposed number of new homes is across all schemes is 770 compared the current number of 1700 homes in Send. This is a 45% increase and will massively change the nature and way of life in Send beyond all recognition and it will lose its village feel. In addition the developments that are being proposed will join Send to Send Marsh and Send Marsh to Ripley resulting in one large village removing the individual character.

2. The introduction of 770 new homes will result in an addition of up to 1500 cars on the roads of Send and Ripley. There are currently major delays and traffic queues through Send, Ripley and at all junctions at both morning and evening peak times which can extend throughout the day as soon as any road works are introduced in the local area. The addition of 1500 cars will cause the local roads to gridlock and increase the risk of accidents. This in turn will reduce the numbers of cyclists and pedestrians due to the pollution and increased risks of accidents.
The proposed Industrial and storage provision at Burnt Common will necessitate a large number of HGV vehicles passing through Send and Ripley. Even if there are proposed new roads and junctions to aid in this, without legal controls in place, companies will use the smaller roads as direct routes. In the event of problems on the main road network lorries would be diverted via the smaller roads -this is becoming and more and more frequent problem as the main road networks are becoming overwhelmed.

3. The Villages Medical centre already covers the villages of Send, Ripley, Clandon and surrounding areas and it can already take over 6 days to get an appointment to see a doctor. An increase number in excess of 2000 patients would make it impossible to get an appointment and would result is people being unable to see a doctor or having to present themselves at A&E as the only way to achieve a healthcare provision. This is totally unacceptable and would put people’s health and lives at risk.

4. The nearest secondary school is becoming increasingly oversubscribed from Guildford residents, leaving a reduced number of places for residents of Send. This is leading to a situation in a couple of year’s time when there will be no places allocated to children in Send. Provision of good quality school places to meet the current population requirements has been promised for years and is yet to be delivered. The planned increase in population will only add to this. The proposed number would require a new school to be built and established prior to any development to ensure provision was in place.

5. The necessary construction and infrastructure traffic required to construct these developments will have and major and lasting effect on the village, roads, trees and surroundings with pollution and damage to the roads. I work in Construction logistics and know fully the extent of the problems that will occur and how unless fully controlled, promises on measures to avoid impact during construction will be ignored once construction starts.

Although the proposed development in Send Hill is not included in the amendments, as residents of Orchard Way we would be negatively affected by the proposed development as follows.

• The proposed number of houses on the site is inappropriate for the size of the site.

• The increased traffic from the dwellings will overwhelm the road and the associated Junctions with impact on risk of accidents and delays

• The construction traffic to build the dwellings will cause major disruption and permanent damage to the road and environment including damage to trees and hedges from the large delivery vehicles.

• There are already major problems with the main sewer drainage from properties in Orchard Way and Send Hills which will be compounded by the introduction of 40 new dwellings.

• The area identified is Green Belt and this must be maintained for future generations.

• The number of dwellings proposed would not allow space for sufficient and realistic parking allocations for a rural housing location leading to parking in Send Hill which is already a problem and further adds to delays in traffic and accident risks.

• The inclusion of Traveller pitches will have a detrimental effect on the areas for the following reasons.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]. Where even a small number of pitch allocations have been provided it often leads to unofficial sites being set up locally and further travellers visit / locate to the area in an attempt to grow the provision and their community.

The Send Hill cannot accommodate the transport of mobiles homes.

As with all proposals within the local plan they are based on providing the best option to housing developers by providing the largest number of dwellings in one block to maximise the opportunity for their profit.
The focus and responsibility of the council must be to meet the housing need in the most sympathetic and sustainable way and ensuring the villages are not lost under new towns and all character is lost. The local plan needs to be re-drafted under these terms and opportunity for small development identified that will fit within the villages and where the village can influence the development rather than the development have a major detrimental effect on the village.

Attached documents:

**Comment: MM42 - LPMM18/344  Respondent: Michael Turner 11100193  Agent:**

**POLICY A58: LAND AROUND BURNT COMMON WAREHOUSE, LONDON ROAD, SEND. MM42**

I object to this proposed increase from 7000 to a minimum of 14,800 sq m of industrial and storage. This is the largest industrial allocation in any village within Guildford borough. Removing so much Green Belt land from around Send Marsh is incompatible with the Government’s definition of “sustainable development”. The proposals are contrary to government policy on sustainable development because there is unused land at Slyfield industrial estate, and there are no “exceptional circumstances” as required by NPPF paragraphs 79-92 to justify allocating Green Belt land for this development. Furthermore, there is no adequate assessment of the effect of the additional traffic which would be generated by this development, and which would contribute adversely to the already unacceptably high pollution levels generated by the A3.

Attached documents:

**Comment: MM42 - LPMM18/4296  Respondent: David Avery 11164225  Agent:**

**MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage**

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration inSend than any other village with no proven demand
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous

Attached documents:

**Comment: MM42 - LPMM18/4301  Respondent: David Avery 11164225  Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine
words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/6021  Respondent: Karen Lord 11550561  Agent:

MM42 Land at Burnt Common, London Road, Send  Policy A58
The Employment Lands Needs Assessment showed a reduction in demand for Industrial Land but Send will have largest industrial allocation in any village in the Guildford Borough.
This is a further increase of 25% making it a huge increase in Send, bigger than any other village.
There is no need for new industrial sites when Slyfield is has unused capacity There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.
There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.
This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

MM27. MM41. MM42 and MM48 TRANSPORT STRATEGY
The increased traffic for Send from Burnt Common, Garlicks Arch, Clockbarn, Aldertons as well as Gosden Hill and Wisley Ockham is properly been addressed by the road changes of the A3 and Clandon Slip Roads.
The massive increase in traffic going to and from Woking along Send Barns Lane and Send Road will cause air pollution delays and gridlock in our village.

Attached documents:

Comment: MM42 - LPMM18/6011  Respondent: Debra Hurdle 11941665  Agent:

MM42 POLICY A58 Land around Burnt Common Warehouse, London Road
I object – There is a concern about the increase in the minimum floor space at Burnt Common Warehouse making the industrial allocation ‘open-ended’ on this site.
The access and exiting of the site at the London Road and A3 slip road junction is already very dangerous and further vehicles coming on and off the site would increase the problem.
There is also a very busy main road through Send, very congested at peak times and the additional large HGVs are very likely to cause further problems on this road.

Attached documents:

Comment: MM42 - LPMM18/743  Respondent: Michael Cumper 12129889  Agent:

I object to this - This was deleted from a plan a few years ago and it should remain deleted. There is no need for this industrial area when Slyfield has capacity for expansion. This is green belt and there are no special circumstances to
argue that the green belt should be encroached upon here. Given the employment land needs assessment showed a reception in demand for industrial land how can the reaction to that be to increase the supply?

Attached documents:

Comment: MM42 - LPMM18/4755  
Respondent: Katherine Pyne 15057889  
Agent:

MM42 LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

• I object to the proposal that an industrial unit be developed in this area, and the failure to demonstrate need or benefit.
• I object to GBC proposing this development in the face of the Employment Land Needs assessment showing a reduction in demand for industrial land. It is not desired nor justifiable.
• I object to GBC proposing building this site, without demonstrating special circumstances and contradicting
• I object to GBC proposing the development of industrial sites in the Green Belt where there is unused capacity in Slyfield.
• I object that this proposal, coupled with 25% increase at Send Business Centre means there is a much bigger concentration of such land use with no proven demand, and is both disproportionate and unfair when comparing Send with other villages.

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM42 - LPMM18/589  
Respondent: Mr Anthony Fairbairn 15067393  
Agent:

I object to this proposal because it will be built on green belt land, it is unnecessary as there is spare capacity for industrial sites at Slyfield. More industrial sites within Send village will change its character and result in increased traffic and pollution.

Attached documents:

Comment: MM42 - LPMM18/485  
Respondent: Ann Elms 15067585  
Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I live very near to this proposed development and I cannot understand why this industrial and storage development is back in the plan, after having been deleted from the 2014 plan. It is far too large an industrial development for any village in the borough and there is absolutely no need for it when there is unused space at Slyfield. I understand the Employment Land Needs Assessment showed a reduction in demand for industrial land so it is incomprehensible to develop this site, especially with this being on top of a 25% increase in Send Business Centre. Again, you would be gridlocking surrounding roads, especially the roundabout by the present Shell garage/Little Waitrose roundabout at Send Barns Lane.
It would make life intolerable for residents, as well as poisoning them with dangerous levels of nitrogen dioxide. Please take this out of the plan and see sense.

Attached documents:

Comment: MM42 - LPMM18/490  
Respondent: Ann Elms 15067585  
Agent: MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick’s Arch, Burnt Common, Clockbarn and Alderton's would not be adequately solved by the A3 changes and the Clandon slip roads. Add in the developments at Gosden Hill and Wisley/Ockham and you will have major problems in the future with traffic. I would suggest you come out to view Send Barns Lane and the roundabout by Little Waitrose at the rush hour, around 8.30 am and just imagine how the levels of noise, pollution, delays would be increased intolerably both for the existing residents and for the proposed new residents. The roads would be gridlocked.

Comment: MM42 - LPMM18/325  
Respondent: Sabine Marke-Deleau 15081281  
Agent: MM42 Land at Burnt Common, London Road, Send, Policy A58

The increase from 7000 to a minimum of 14,800 sq m of industrial and storage is excessive

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.
- The Employment Land Needs Assessment showed a reduction in demand for industrial land.
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerously high.

Respondent: Sabine Marke-Deleau 15081281  
Agent: MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Add to this some industrial traffic for the MM42 modification why not just pollute all the locals in Send and Ripley over the next few years.

Talking about the MM42 modification - why is this Burnt Common Green Belt land even being considered for Industrial use when there is still capacity in Slyfield where nobody has to be affected. On top of this I understand the Employment Land Needs Assessment showed a reduction in demand for industrial land - where is the justification for ruining Green Belt land!!

Not to mention all the other prospered plan such as MM44 & MM41/MM9/MM42/MM48
This was once a peaceful and picturesque little village that has slowly been eroded and destroyed by greedy and thoughtless developers.

I have lived in Send for 20 years and it is sickening and sad to see it being over developed.

So I strongly object to the plans to specified above.

Attached documents:

Comment: MM42 - LPMM18/3955  Respondent: Mrs Marilyn Scott 15094369  Agent: MM42

This site was deleted from the 2014 plan as unsuitable – it has now returned double the size.

Slyfield has unused capacity we do not need another industrial site in the area, there is no demand for new industrial land, in fact the needs assessment shows a reduction in need for this kind of land.

Narrow surrounding roads cannot cope with the amount of traffic generated.

Nitrogen dioxide levels are already recording as dangerous here because of the A3.

Attached documents:

Comment: MM42 - LPMM18/201  Respondent: Emma Gibbs 15100385  Agent: MM42

Comment: MM42 - LPMM18/517  Respondent: Malcolm Holland 15102049  Agent: MM42

I object to MM42 for many reasons but mainly.

1. This is on top of a 25% increase at Send Business Centre making a much bigger concentration in Send than any other village in Guildford with no proven demand.

2. The overall infrastructure will not cope and more nitrogen dioxide pollution.

Attached documents:
Comment: MM42 - LPMM18/522  Respondent: Malcolm Holland 15102049  Agent:

MM27/MM41/MM42 and MM48

The traffic implications for the above have not been adequately addressed and no proper assessment has taken place bearing in mind more traffic increased noise nitrogen pollution delays and gridlock

Attached documents:

Comment: MM42 - LPMM18/81  Respondent: Simon Crane 15104769  Agent:

MM42 Land at Burnt Common, Policy A58

- This was deleted from the 2014 plan and yet now you have more than doubled the planned industrial and storage space.
- This will be the largest new industrial allocation to any village in the borough.
- The Employment Land Needs Assessment showed there has been a reduction in demand for industrial land, not an increase, so none should be needed.
- As mentioned above, surrounding roads will have increased congestion and air quality will worsen.
- Why are we building on green belt land when there are other areas available that are more suitable (eg Slyfield)? I believe it also contradicts MM9, as there are no special circumstances.
- You are already increasing the Send Business Centre considerably.

Attached documents:

Comment: MM42 - LPMM18/85  Respondent: Simon Crane 15104769  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

- The planned changes to the A3 and Clandon slip roads are not sufficient to cope with the increased traffic that will arise from the proposed developments of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s.
- Queuing traffic for the A3 will back up into Send, again clogging the roads and increasing air pollution, plus traffic in to Woking through Send will also increase hugely.

Attached documents:

Comment: MM42 - LPMM18/3797  Respondent: Y C Smithers 15106977  Agent:

MM41 Land at Garlicks Arch, Send Marsh, Policy A43
Increased from 400 to 550 homes of which 450 to be built in the first five years

The site is Green Belt containing ancient woodland, which we believe should be protected. The proposals are overdeveloped for this area and it will join up Ripley and Send and will generate two much traffic to the already oversaturated roads.

This area is prone to flooding, having been born in the village, I know this area well. The village facilities of school and medical centre are already overstretched to breaking point.

Attached documents:

Comment: MM42 - LPMM18/3812  Respondent: Y C Smithers 15106977  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for the area are devastating and as such totally overburdens traffic on local roads and also the A3, entering and leaving this enormously busy road which is regularly a car park! The new proposals don’t take into consideration the traffic impact of the additional thousands of cars, let alone increased pollution, noise and likelihood of more accidents, especially during peak times.

Other developments

This consultation does not include the chance to comment/object to the 40 houses and travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and the increase in size to the Send Business Centre despite the Wey Conservation area, these proposals are again devastating to the local roads in all of these areas, they are too narrow, often difficult to pass and have many blind spots, and the larger roads are already standing traffic during peak times, let alone at other times of the day, the small village cannot take any more development especially of the sizes proposed.

We do hope you consider our strong objections to all of the above, as not only us but our family and friends will be severely impacted. We are pensioners and are already finding the amount of traffic too much and has significantly risen in recent years, especially with commuters using our village as a cut throughs from the A3 and M25.

Attached documents:

Comment: MM42 - LPMM18/65  Respondent: Andy Williams 15107041  Agent:

MM42 – Land at Burnt Common, London Road, Send, Policy A58

This was deleted from the plan in 2014, presumably there was recognition at the time that there was, and still is, insufficient demand for industrial sites. The Employment Land Needs Assessment showed a reduction in demand for industrial land. With industrial units till empty in the Borough it is ludicrous to propose increasing the initial proposal of 7000 to 14,800 square meters of industrial sites and storage, indeed the original proposal of 7000 sq m is not required – Slyfield has unused capacity for example and there are no special circumstances which contradict MM9. The village is already significantly under strain from the thunderous HGVs that pass through our roads, these are already gridlocked and pollution levels are already dangerously high.

**Comment:** MM42 - LPMM18/4047  **Respondent:** Jo Wright 15114017  **Agent:**

**MM27 MM41 MM42 MM48 Transport Strategy**

I object to the planned A3 junction changes at Burnt Common due to the effect on the surrounding villages.

I object to the amount of additional cars that will be on the road causing further risk to our children as they travel to and from school.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/1790  **Respondent:** Mrs Katherine Mutton 15115201  **Agent:**

I object to this proposal. There is no research that supports the need for such a large increase in industrial and storage space. There is already a large increase at Send Business Centre and coupled with this it makes an unjustified amount of development.

The Employment Land Needs Assessment shows a reduction in the demand for industrial land locally.

The impact of business vehicles will make local roads impassable at certain times of the day.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/135  **Respondent:** Roger Mutton 15131425  **Agent:**

MM42 Policy A58 This was deleted from the plan in 2014 -- now re-introduced and doubled.
I object to it being brought back and especially as it is by far the biggest industrial allocation in any village in the borough.

There is no need to put new industrial capacity in the Green Belt when Slyfield has unused capacity. There are no special circumstances so it also contradicts policy MM9.

Furthermore the Employment Land Needs Assessment shows a reduction in demand for industrial land. This proposal makes for a much bigger concentration in Send than any other village, demonstrated by an increase of 25% in Send Business Centre already in place, and all with no proven demand. Narrow surrounding roads will become congested if not gridlocked raising Nitrogen Dioxide (NO2) levels already at a dangerous level will increase to detriment of Public Health.

In general terms a complete lack of care and concern for public health, both mental and physical, is demonstrated by this Not Fit For Purpose Plan.

Attached documents:

Comment: MM42 - LPMM18/138  Respondent: Roger Mutton 15131425  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy has not been properly assessed with regard the new proposed A3 and Clandon intersections, which will only encourage more vehicles to head into Woking every day increasing noise, NO2, delays and worse still past a new Junior school and Primary School right beside the main A road through the village.

Attached documents:

Comment: MM42 - LPMM18/162  Respondent: Samuel Holwell 15131969  Agent:

MM42 Burnt Common. There is absolutely no need for further industrial and storage sites in the area. Not only is there unused capacity at Slyfield Green, an area where expansion should be focused, but Send itself has already increased its business centre by 25% with no proven demand. The lack of demand perhaps suggests the council may be shifting to a communist view of things, in which it will subsequently “create” business artificially. Such a transition would not be shocking and consistent with other policy as it has already shown it does not care for local peoples’ views, a key socialist regime characteristic.

Attached documents:

Comment: MM42 - LPMM18/2480  Respondent: Sylvia Pyne 15138433  Agent:

MM42 Land at Burnt Common, London Road, Send Policy A58

The objection I have to this policy is that the increase from 7000 to a minimum of 14,800 sq m of industrial storage is the vast increase on what is Green Belt and when there is capacity at Slyfield. This is not special circumstances so contradicts MM9. We seem to be unfairly treated, especially as Send Business Centre is being increased 25%. Send seems to be expected to accommodate far more industrial area than any other village and it will gridlock the roads and make pollution levels far exceed what is reasonable for a Green Belt village which is supposed to be part of the lungs of London.
MM27 MM41 MM42 and MM48 Transport Strategy

The changes to the A3 will make things even worse for Send with the traffic from the above developments coming straight through the village to Woking. This will mean unacceptable pollution, which has been increasing over the years and which I find is already causing more breathing problems for me as an asthmatic living on Send Road, so what it will do to children walking to school along Send Road and Send Barnes Lane with increasing nitrogen dioxide pollution exacerbated by the delays and gridlock it will cause. We are supposed to be encouraging more children to walk and this will only give parents an excuse to use their cars even more, and who could blame them.

More consideration should be given to the siting of additional housing elsewhere, as we are bearing an unacceptably large proportion of the new housing and development in the Guildford area, which should be spread more evenly through the villages etc. It appears we are getting about 50% of all development in the next 5 years, which can’t be right. For this reason I feel I have no other alternative but to object strongly to the enlarged burden which we are now being asked to bear, and it seems every time we object we are just given more development as our reward.

Comment: MM42 - LPMM18/107  Respondent: none (Mr. Jeffrey Greenwood) 15140417  Agent:

I object to this development

Comment: MM42 - LPMM18/508  Respondent: Bav Majithia 15141633  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

The increase from 7000 to a minimum of 14,800 sq m of industrial and storage is excessive

• Since being deleted from the 2014 plan this has been increased twice, doubling the area
• It is by far the largest new industrial allocation in any village in the borough
• There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.
• The Employment Land Needs Assessment showed a reduction in demand for industrial land.
• This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.
• Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerously high.

Attached documents:
MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/4784  Respondent: Paulina Adair 15142977  Agent:

I object to MM42 - there is no evidence to support the demand for industrial land in the area and further more on the land which is a part of the Green Belt!

I object to MM27, MM41, MM42, MM48 - there is no way to introduce the amount of traffic you are proposing into the area!

Attached documents:

Comment: MM42 - LPMM18/2153  Respondent: Vincent Francois 15145057  Agent:

MM42 Policy 58

I object to the number of homes (12,426) to be delivered by GBC over a 20 year period

- The infrastructure is not in place to support this number of homes.
- It would put unimaginable pressure on road capacity, schools, doctors’ surgeries, hospitals, and police. This proposal would mean an increase in population of 41% which is totally unacceptable as the existing local road systems are already unsafe and not fit for purpose.
- Cycling along the narrow and winding roads or walking on the pavements is already hazardous. I do wonder if any councillor has tried walking or riding along the present roads. To widen the roads in the designated areas would mean knocking down existing homes.

Attached documents:

Comment: MM42 - LPMM18/2154  Respondent: Vincent Francois 15145057  Agent:

New Policy A58: Industrial Space around Burnt Common

I object to GBC's proposal to build 14,000sq.m. employment space (light industrial/storage, warehousing) on virgin Green Belt around Send/Send Marsh/Burnt Common

- This construction would remove vast areas of Green Belt open space /50% increase
• The policy seeks to increase the area of land to be extracted from the Green Belt for a **minimum** of 14,000sq.m of ‘employment floorspace’
• The word **minimum** used leaves the door open for future development
• There would be a very severe and adverse environmental impact not only on the two villages, but throughout the whole surrounding area, overdeveloping the local rural communities and creating major traffic problems with its subsequent noise and air pollution. We chose to live in this area to minimise our exposure to these sources of pollution. I am truly saddened by the effects this will have on the young generation growing up here.

Instead of spreading the load to cause minimum disruption, it would appear that GBC seems to be biased against this area as it has decided to dump ~40% of its plan in one spot putting great strain on the existing facilities and residents. We are at the extreme end of the Borough and from our standpoint the councillors have decided on a solution that disrupts, overpowers and annoys its existing residents. By disregarding the numerous objections sent to GBC it is demonstrating the bully tactics of government representatives. If this is how democracy should work.

**Attached documents:**

**Comment:** MM42 - LPMM18/2149  **Respondent:** Irene Francois 15145121  **Agent:**

**MM42 Policy 58 - Industrial Space on Land around Burnt Common, London Road.** This new policy seeks to increase the area of Green Belt land to be sacrificed for additional light industry and warehousing. GBC now proposes a **minimum** of 14,000 sq m of employment floor space. This amounts to a 50% increase which is totally unacceptable. The additional traffic, including HGVs, will impact greatly on the road network, including the very busy A3. Furthermore, the roads around Send, Ripley, Clandon and Burnt Common are narrow and winding. Congestion will result in an increase in air pollution that includes toxic carbon monoxide, carbon dioxide, nitrogen dioxide and particulates. It has been recognised, at last, by the Government that when HGVs and cars are in idling mode there will be a two-fold increase in the levels of pollutants. Also heavy traffic near schools and bus stops has been shown to have a detrimental effect on children's health.

**Attached documents:**

**Comment:** MM42 - LPMM18/2304  **Respondent:** E J M Symonds 15146945  **Agent:**

**MM42 Land at Burnt Common. Policy A58**

Why do we as a Village need a large industrial site! Guildford only 10 mins. away and our local roads are ill equipped to deal with massive delivery lorries.

**Attached documents:**

**Comment:** MM42 - LPMM18/429  **Respondent:** Dr Christopher Slinn 15153569  **Agent:**

There is no need to destroy the Green Belt whilst Slyfield has unused capacity.

The economy is bound to turn down after Brexit.

**Attached documents:**
Comment: MM42 - LPMM18/245  Respondent: Mrs Avril Ann Dawson 15176193  Agent:

This allocation for industrial and storage has been increased to 14,800 and there is no need to put this new industrial site in the Greenbelt. Already the number of homes with For Sale signs outside in the Burnt Common area has increased. I counted 4 For Sale signs visible from the main road after the Ripley - A3 roundabout. People do not want to live in a village with plans for such a large increase in land allocated to industrial land and storage. The plans state this is on top of the 25% at Send Business Centre and so this becomes too much for our current road infrastructure. Slyfield Business and Industrial area has unused capacity. There are no special circumstances and so this new plan contradicts MM9.

Comment: MM42 - LPMM18/453  Respondent: Stephen Brunskill 15177313  Agent:

MM42 Land at Burnt Common, London road, Send, Policy A58

This is a completely inappropriate proposal. There has been no evidence produced anywhere supporting a demand for such a large industrial site being built in the greenbelt. Slyfield has unused capacity and actively wants further development there. The narrow local roads are not designed for the influx of large articulated lorries that this development will bring. The A3 at this point is called the Ripley bypass, with these developments there will be the real need for an additional Ripley bypass as hundreds of lorries and cars use Portsmouth Road and Ripley to access the A3.

Comment: MM42 - LPMM18/641  Respondent: John Harris 15180001  Agent:

MM42

Having already been deleted from the 2014 plan this has increased twice doubling the size of the area.

The size of this industrial development is far to large for a smell village.

Why not put in Slyfield which has unused capacity rather than in green belt.

Where is the demand for this industrial development?

Already gridlocked local roads will become unuseable.

Comment: MM42 - LPMM18/2856  Respondent: Paul Bedworth 15180193  Agent:
MM42 Burnt Common, London Road, Send, policy A58

1. The increase from 7000sq m to a minimum of 14,800sq m of industrial / storage would make this the largest industrial site allocation in the borough, and has happened despite its deletion from the 2014 plan. It is therefore illogical that this has been tabled.
2. Slyfield has unused space: it is therefore unnecessary to build on Green Belt.
3. There has been a reduction in demand for industrial land as per the Employment Land Needs Assessment.
4. No special circumstances exist and therefore this contradicts MM9.
5. This is on top of the 25% increase in the Send Business Centre making the burden on Send village disproportionate to that of any other village.
6. It will add to the instances of gridlock and boost already dangerously high nitrogen oxide levels.

Attached documents:

Comment: MM42 - LPMM18/1448  Respondent: Muriel Millar 15184993  Agent:

MM42 Burnt Common

Green Belt
Traffic problems
Unnecessary

Attached documents:

Comment: MM42 - LPMM18/1524  Respondent: Suzannah Monk 15186273  Agent:

Secondly MM42 Land at Burnt Common.

Why build on Greenbelt when you can utilise unused industrial space at Slyfield. It’s really not that far away. Heavy goods vehicles will further block up the roads which are already chaos at rush hour. Therefore MAXIMISE the space we already have locally first. Use marketing strategies to make people aware of the space available already.

Thirdly, MM42 Land at Alderton’s Farm, Send March

Yet more houses to be built in Send March, yet more houses on green belt land. How many do you think the little village can take! This makes for a 45% increase in the total number of houses in Send. The local schools, hospitals and roads will not be able to handle it.

Attached documents:

Comment: MM42 - LPMM18/1528  Respondent: Suzannah Monk 15186273  Agent:

Finally, the MM27, MM41, MM42 and MM48 Transport Strategy
Changes to the A3 do not alter the narrow winding roads that lead off of the main Send Road. These small roads are not designed for large numbers of cars and the risk of accidents will dramatically increase with more traffic on them.

Attached documents:

**Comment:** MM42 - LPMM18/1425  **Respondent:** Carrie Wheeler 15195969  **Agent:**

MM42 Land at Burnt Common Policy A58

The suggested industrial and storage site has been doubled in size which makes it the largest planned industrial site in the borough! WHY!

Slyfield Green is an up and running, successful industrial area, which at present is not running at full capacity, surely it would be more sensible to use the vacant space there, than clog up the roads around Burnt Common, Send and Ripley, with heavy haulage lorries and vans, which will cause major wear and tear on our local roads, and damage the health of the residents with their noxious fumes.

Attached documents:

**Comment:** MM42 - LPMM18/4230  **Respondent:** Michael Corlett 15196161  **Agent:**

MM42 Burnt Common, Policy A58

This site is not required as there is unused capacity at Slyfield and this is Green Belt. This contradicts MM9. Again this would generate more unsustainable traffic.

Attached documents:

**Comment:** MM42 - LPMM18/4236  **Respondent:** Michael Corlett 15196161  **Agent:**

There are no definite plans laid out and it is impossible to widen Send Road or the Clandon Road to accommodate the increase in traffic approaching or returning from the A3. These are narrow roads in many places and the traffic is already at a standstill at peak times. A full assessment must be made and published and I ask the inspector to revisit at peak times.

Attached documents:

**Comment:** MM42 - LPMM18/656  **Respondent:** Louise Harris 15197345  **Agent:**

MM42
Having already been deleted from the 2014 plan this has increased twice doubling the size of the area.

The size of this industrial development is far to large for a smell village.

Why not put in Slyfield which has unused capacity rather than in green belt.

Where is the demand for this industrial development?

Already gridlocked local roads will become unusable.

**Attached documents:**

**Comment: MM42 - LPMM18/1069  Respondent: Elizabeth Howlett 15205921  Agent:**

Transport strategy MM27, MM41, MM42, MM48

The proposed developments will add to the already overcrowded roads, where journeys take far longer than necessary. Most residents now have to factor in the probability that there will be delays.

The road network is in desperate need of a major maintenance programme. In Send the surface at the traffic light intersection has completely broken up with holes appearing in all approaches. This non slip surface has broken down, wasted money, poor design. Or too much traffic?

The bridge over the A3 on the Clandon road has had the road surface pushed into the kerb resulting in large undulations that force motorists into the middle of the road.

Priority should be given to getting existing roads into a reasonable condition over the building new developments that will only increase traffic and make the matters worse. Most roads in the areas have kerb stones, and service covers dislodged and numerous potholes.

Who decides what a reasonable time is to queue on the roads into and out of Guildford and Woking getting to and from work. What is the environmental impact of thousands of cars, Lorries and busses queuing every morning and evening polluting the atmosphere, wasting fuel and residents and commuter’s time?

**Attached documents:**

**Comment: MM42 - LPMM18/1783  Respondent: Stephen John Tully 15238881  Agent:**

MM42. This industrial development is not needed, it's in the Greenbelt and there are no special circumstances.

**Attached documents:**

**Comment: MM42 - LPMM18/1787  Respondent: Stephen John Tully 15238881  Agent:**

MM27, MM41, MM42, MM48,
Transport Strategy:

The GBC assessment is non existent, the roads around Send could not cope with this extra traffic even with modifications to A3 etc.

Comment: MM42 - LPMM18/4884  Respondent: Christine Relf 15241313  Agent:

MM42 Land at Burnt Common, Send, Policy A58  Enlarged from 7000 to a minimum 14,800 sq of industrial and Storage

being deleted from the 2014 plan this has been increased twice, doubling the area. This is by far the largest new industrial allocation in any village in the borough. There is no need to put new industrial sites in Green Belt when there is industrial buildings empty on the Slyfield estate. Why cant these empty buildings be used first before trying to build more than what is really required in this area.

Industrial building's will cause gridlocked roads and causing even more damage to the state of our very bad roads.

OBJECTIONS TO THE PROPOSED MAIN MODIFICATIONS TO THE LOCAL PLAN OF GUILDFORD BOROUGH COUNCIL

I am writing to register my objections to the Main Modifications in the Guildford Borough Council Local Plan that will be forever harmful for the residents of Send by overloading the infrastructure, environment, services, and amenities, and permanently damage what remains of our surrounding countryside, and open spaces.
OBJECTIONS RELATING TO ALL PROPOSED DEVELOPMENTS (MM27, MM41, MM42, MM44, and MM48) IN THE GUILDFORD BOROUGH COUNCIL LOCAL PLAN

1. The proposed developments, referred to later in this letter, do not consider the risk of future water shortages, where there are no plans or funding to increase the provision of water storage and supply to additional households and commercial facilities proposed for the Send Parish, within the Affinity Water region.

2. All developments in the Guildford Borough Council Local Plan - referred to later in this letter - are within an area designated by the Environment Agency as “water stressed”. Without any additional means of water supply, it would be irresponsible to risk greater water scarcity in the future by adding to the demands for water from additional developments in and around Send.

3. The Main Modifications where specific objections are described below are, when combined, an unacceptable increase of concentrated housing developments to be imposed on the village of Send and the already over-used roads - without any scope for increasing capacity - and the fully subscribed local medical and schooling facilities.

3. MM42 LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

I object to the changes to Policy A58 because:

- The “minimal” allocation of 14,800 sq. m. of industrial and storage space is open-ended and exposes the land to unknown future development encroachment, where such a proposed allocation already breaches the law which is meant to prevent local authorities allowing building on Green Belt, unless special circumstances exist.
  - No special circumstances exist to encroach upon this area of Green Belt and remove it forever, as the ‘2017 Land Needs Assessment’ shows a reduction of 3.9 hectares of industrial land being required for the whole of Guildford Borough.
  - The proposed allocation of over 10 hectares of industrial land at this location is contrary to the needs reduction of 3.9 hectares, mentioned above.
  - There is no justifiable case for creating more industrial units in Send when Guildford, including the dedicated commercial area at Slyfield, have vacant sites.
  - This allocation of industrial and storage space would be in addition to the 25% increase at Send Business Centre, giving a much greater concentration of such developments in Send, way beyond that in any other village in the Borough, without any proven demand.
  - Such speculative developments as this will permanently damage the surrounding area and cannot be justified or supported by any rationale showing a benefit for local communities.
  - It disregards the overwhelming number of previous objections from local residents which should not be ignored.
  - The land at this location is Green Belt and must be retained to prevent increasing urbanisation and to preserve the natural habitat of ancient woodland and allow biodiversity to function alongside built-up environments.
  - The area has high levels of existing vehicle movements along the A3, A247 and B2215 routes, with already dangerous levels of pollution from motor vehicles and any reduction in green spaces nearby reduces the opportunities for atmospheric CO\textsubscript{2} capture.
  - It would be immoral to inflict additional levels of pollution on the local population by additional industrial capacity and associated vehicle movements.

5. MM27, MM41, MM42, AND MM48, TRANSPORT STRATEGY

I object to these Strategies because:
o The various Modifications refer to “mitigation schemes to address the otherwise adverse material (and visual) impacts on communities and the environment” without declaring any conditions that would have to be met by any such “mitigation schemes”. The absence of any defined scope for “mitigation schemes” is to deny the objectors to the Transport Strategy the chance to assess and comment on the desirability of any “mitigation scheme”. The prospect of implementing “mitigation schemes” without any pre-conditions would be poor governance and unacceptable to the communities affected by this Transport Strategy.

o Guildford Borough Council have not demonstrated any assessment of the aggregated traffic impacts on Send Barnes Lane and Send Road from the proposed changes for additional slip roads to the junction of the A247 with the A3, which will substantially increase the traffic flows to and from Woking each day.

o The Transport Strategy will lead to yet more vehicle traffic being added to the minor ‘A’ road (the A247) through Send, with already high volumes of traffic, where the 'uktrafficflow' web site shows an average of nearly 14000 vehicles passing along the A247 in Send each day. This high volume already has an adverse effect on the quality of life for the residents of Send with congestion, noise, and pollution from vehicle emissions. Such daily high traffic flow is excessive and must not be increased further by senseless and unnecessary developments.

o The loss of open spaces for additional roads will reduce the ability of the natural environment to remove pollutants such as CO₂ from the atmosphere.

Attached documents:

Comment: MM42 - LPMM18/864  Respondent: Mr Brian Middlemiss 15257953  Agent:

MM42 To further increase industrial development as to be the largest allocation in any of the villages in the borough. This I object to.

Attached documents:

Comment: MM42 - LPMM18/868  Respondent: Mr Brian Middlemiss 15257953  Agent:

MM27,MM41,MM42 and MM48  Transport strategy for the whole area. There appears to be no proper assessment of the combined traffic impact on the Send Road and Send Barnes Lane with potentially thousands of extra cars passing through the village daily. What would Mr Hammond think of this? It is bad enough at present trying to get to Woking or Guildford. This I object to.

Attached documents:

Comment: MM42 - LPMM18/2061  Respondent: Mr Trevor Deacon 15274369  Agent:

As there no special circumstances as MM( there should not be a development on Green Belt

The local single track roads are already used as a rat run because of excessive traffic build up at the Clandon Road roundabout and this will result in heavy lorry's trying to use the same narrow road
Why is an industrial area needed when there is capacity at Slyfield?

Together with the proposed increase in the Send Business Centre this would turn a domestic area village into a major industrial area.

The Employment Land Needs Assessment shows a reduction in demand for industrial land and to include this doubled land area will therefore create a requirement rather that fill a need.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/2091  **Respondent:** Mrs Dalis Deacon 15277281  **Agent:**

Local roads are already used as rat runs with lorries added these would become totally blocked.

Local main roads cannot cope with the existing traffic load.

There is no need now for industrial area in the locality. Slyfield has space.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/4261  **Respondent:** Ripley Parish Council (Jim Morris) 15278369  **Agent:**

**RIPLEY PARISH COUNCIL RESPONSE TO GUILDFORD BOROUGH COUNCIL SUBMISSION LOCAL PLAN: STRATEGY & SITES - MAIN MODIFICATIONS**

Ripley Parish Council continues to have major reservations regarding many aspects of the Guildford Borough Council (GBC) Local Plan, all of which have been previously submitted and still stand.

However, the council wishes to make further objections and contributions to the proposed main modifications namely:

1. **Site Allocations:**
   a) A43 Garlick’s Arch - increase of 150 homes to 550 homes
   b) A63 Aldertons Farm – new allocation of 120 homes
   c) A58 Burnt Common Strategic Employment Site – initial 100% increase of industrial space to over 14,000 sqm with the potential to increase in each 3-year period thereafter

2. **Transport Strategy**

3. **A6 Town Centre – allocation of further retail space**

4. **Strategic Housing Market Assessment figures**

5. **A35 Former Wisley Airfield**

6. **Insetting Boundaries for Ripley Village.**
1. Site Allocations

The allocations of sites: A43 Garlick’s Arch; A63 Aldertons Farm; and A58 Burnt Common Strategic Employment Site will have severe “in-combination” impacts upon the villages of Ripley, Send and Send Marsh. There is no escaping the fact that there is inadequate provision for any road traffic mitigation arising from an estimated 670-720 new homes, together with the inevitable large volume of traffic generated by the industrial site over the period of the Plan and beyond. To get this in proportion, the current number of houses in Ripley village is less than 700.

There does not seem to be any firm commitment to the construction of policy site A43a the A3 Burnt Common slip roads during the period of the Plan. Indeed, the financing of these slip roads appears to be in some disarray and relies upon 100% funding from the developers of site A35 Former Wisley Airfield. Ripley Parish Council continues to oppose the Burnt Common slip roads for reasons stated in earlier submissions. However, should the Garlick’s Arch development, the Burnt Common Strategic Employment Site and/or the Aldertons Farm development site all proceed to inclusion in the Local Plan, the parish council would strongly urge that traffic mitigation measures are put in place PRIOR to housing and industrial sites being constructed. Clearly provision of the new slip roads would go some way to easing local traffic congestion although it may of course be detrimental in that it will draw in additional road traffic to the Send/Burnt Common area.

Ripley Parish Council objects to the modifications of the Garlick’s Arch and Aldertons Farm sites based on the very poor provision of community infrastructure such as medical facilities, schools and community sports facilities. Ripley Primary School has recently been closed by Surrey County Council with no indication as to its future. The Villages Medical Centre is already heavily subscribed and it offers poor lead times for appointments. There is no the specific provision for such facilities within the documentation. Additionally, the car parking facilities in both Ripley and Send are at capacity and these increased numbers will only worsen an already bad situation.

Ripley Parish Council has grave concerns regarding the open-ended size and nature of the proposed Policy A58 Burnt Common Strategic Employment Site. This site has already more than doubled in size from 7000 sqm to 14800 sqm with the modifications to the Plan, with further potential for substantial increase in size. According to MM42 3 the Employment Land Needs Assessment will be updated every 3 years and “this site would be able to provide a larger amount (of floorspace) either within or after the Plan period”. The supposition that many employees of the industrial site will be living at Garlick’s Arch is ridiculous. Therefore, we discount the assertion that pedestrians and cyclists will be the main modes of transport to and from the Burnt Common site. There is no mention either of the significant amount of traffic generated by visitors and shoppers to this site. The parish council draws comparisons to the current Slyfield industrial site which generates significant amounts of traffic on a daily basis. There is also the potential for a large Waste Management site at the Burnt Common location, very quietly hidden in earlier documentation of the Local Plan. The addition of HGVs and waste vehicles will put unprecedented strain on the local road network, causing significant harm to the existing communities of Ripley and Send as well as West Clandon.

Comment: MM42 - LPMM18/4520  Respondent: Hannah Green 15303457  Agent:

2. MM42 (Land at Burnt Common, London Road, Send A58) because;

It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan. With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East. The concentration in Send is more severe than any other part of the Guildford Borough. This seems unfair to increase this any more. Furthermore the industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity, thus the need for MM42 seems unnecessary. The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send – and in the Green Belt. Once again, the impact on congestion will be significant as will Nitrogen dioxide levels causing potential damage to health.
5. MM27, MM41, MM42 and MM48 Transport Strategy

There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

Attached documents:

Comment: MM27, MM41, MM42 and MM48 Transport Strategy

My objections are;

• There is already unused industrial sites at Slyfield, a need for this type of land has reduced and an increase at Send Business Centre mean this type of development is unnecessary and has not been proposed in any other village.
• It is on Green Belt land and the increase in traffic will block already busy roads.

Attached documents:

Comment: MM27, MM41, MM42 and MM48 Transport Strategy

No assessment has been made of the impact on Send and Ripley of the increase in cars with the resultant gridlock, delays, noise and nitrous dioxide pollution.

Attached documents:

Comment: MM42 Land at Burnt Common

This represents more than doubling of the industrial and storage space. This is a huge amount for one village, and much bigger than any other village in the borough and is not supported by demand for industrial land. The road infrastructure is insufficient for the traffic volumes that will result.

Attached documents:

Comment: MM42 Land at Burnt Common

My objections are;

• There is already unused industrial sites at Slyfield, a need for this type of land has reduced and an increase at Send Business Centre mean this type of development is unnecessary and has not been proposed in any other village.
• It is on Green Belt land and the increase in traffic will block already busy roads.

Attached documents:
Transport strategy for MM27, MM41, MM42 and MM48

There has been no rigorous assessment of the impact of the proposed developments on traffic flows in the area. The road to Woking is already gridlocked in rush hour times. The proposed developments would lead to significantly worse traffic which would be intolerable to existing residents.

Attached documents:

Comment: MM42 - LPMM18/1725  Respondent: J D W Todd 15326369  Agent:

2) MM42 An Excessive increase in area compared to previous proposals for which no need can be made (Slyfield has unused capacity) and an increase of 25% proposed for Send Business Centre just makes this even more excessive all this despite a reduction in demand shown by the Land Needs Assessment

4) MM27 MM41 MM42 MM48 are part of the above observations.

Attached documents:

Comment: MM42 - LPMM18/2020  Respondent: R.A. Love 15328865  Agent:

I OBJECT to MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

• Since being deleted from the 2014 plan this has been increased twice, doubling the area
• It is by far the largest new industrial allocation in any village in the borough
• There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
• The Employment Land Needs Assessment showed a reduction in demand for industrial land
• This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
• Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous

I OBJECT to MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:
### Comment: MM42 - LPMM18/75  **Respondent:** Robin Hurst 15329345  **Agent:**

**I object to Land at Burnt Common London Road, policy A58**

- The exit heading North from the A3 is one of the most dangerous exists, and you want to intentionally put more heavy goods traffic through it.
- They have double the allocation to 14,800 sq m and there is still lots of unused capacity at Slyfield?
- The impact on the surrounding roads will be immense and cause traffic gridlock.
- Nitrogen Dioxide levels are already at dangerous levels.
- It was deleted from the 2014 draft because of the amount of objections made.
- The word “minimum” is changed to the previous maximum in the 2016 plan.
- There is no need to build more industrial or warehouse development in the middle of the greenbelt when Slyfield and Guildford still have empty sites.

**Attached documents:**

### Comment: MM42 - LPMM18/1645  **Respondent:** Suzie Powell-Cullingford 15329441  **Agent:**

I wish to object in the strongest terms to the following main modifications to the Local Plan:

1. The increase at Garlicks Arch to 550 homes This site is protected by ancient woodland
2. The addition of the Aldertons Farm site of 120 homes
3. The increase in size of the Burnt Common Industrial site

**Attached documents:**

### Comment: MM42 - LPMM18/4211  **Respondent:** Gillian Thorpe 15341441  **Agent:**

In addition the proposal of MM42 at Burnt Common (Policy A58) to increase 7000 to a minimum of 14,800 sq m of industrial and storage use will add more congestion to the surrounding roads, villages and especially the A3. Nitrogen dioxide levels are already dangerous in areas and these developments will only make it more unhealthy.

**Attached documents:**

### Comment: MM42 - LPMM18/252  **Respondent:** Mr John Peed 15350689  **Agent:**

MM42 - Why has this proposal, despite being deleted from the 2014 plan increased twice, effectively doubling the area?

This is by far the largest new industrial allocation in any village in the borough and so is totally unjustified.

Why is yet more Green Belt being sacrificed when Slyfield has unused capacity?

The above proposal is in addition to the 25% capacity at Send Business Centre - why is the rural nature of Send being systematically destroyed?
Narrow surrounding roads will inevitably be gridlocked with heavy trucks and machinery, adding to the already dangerous levels of nitrogen dioxide from diesel vehicles.

Attached documents:

**Comment:** MM42 - LPMM18/3884  **Respondent:** Ron Best 15358625  **Agent:**

**MM42 London Road, Burnt Common (Policy A58):** This proposal worsens the situation by reinstating and extending a development which was removed at an earlier stage when objections established that it was unfeasible. I am alarmed at the doubling of space for industrial units, especially as this is described as 'a minimum'. We all know what that means: 14,800 sq. m. is but a start! My understanding is that there are established industrial areas within the Borough (including the Tannery which is within our village, where a 25% increase in units is planned) and Slyfield in Guildford which could absorb this growth without committing another greenfield site. The increased traffic to and from the site will further add to the jams which are already characteristic of our village at certain times of the day.

Attached documents:

**Comment:** MM42 - LPMM18/2311  **Respondent:** C R Woodland 15373153  **Agent:**

I object to MM42 (Policy A58) at Burnt Common which is now a new allocation for a minimum of 14,800 sq m of industrial or storage. The previous figure of 7,000 sq m looked like a mistake and the word should have been 'maximum', as in the 2016 plan. There is no justification for this size of industrial estate in Send or any other village in Guildford Borough. There are no special circumstances and it also contradicts Green Belt Policy MM9. Slyfield and Guildford have empty units and the site at Burnt Common is totally unsuitable for a large industrial estate.

Attached documents:

**Comment:** MM42 - LPMM18/5314  **Respondent:** Roderick Hutchison 15390273  **Agent:**

3) MM42 Land at Burnt Common, London Road, Send Policy A58

This will add significant volumes of HGV traffic on local roads which are already struggling to cope. I can’t see the need for additional industrial development locally in Send.

Attached documents:

**Comment:** MM42 - LPMM18/4061  **Respondent:** Marian Tarrant 15391329  **Agent:**

I object to MM42 (Policy A58, Burnt Common. Warehousing and Industrial units).
Because, of the increase from 7,000sq m. to 14,800sq m. of industrial and storage use. Which is not required. Employment Lands Needs Assessment (ELNA) 2015 shows an 80% reduction from the previous ELNA carried out by GBC in 2013 for employment space.

I object because Industrial and Warehousing sites and units are still available at Slyfield and in Guildford. So surely expanding existing Brown field industrial areas is better than creating a new one on Green Belt Land. Which contradicts MM9!

I question why the Cassidy Slyfield Ltd. North Slyfield site, allocated in 2014 By Guildford Council for Industrial and Warehouse use, was withdrawn from the Local Plan?

Because, heavy traffic would be attracted from the M25, A3 and the A247, which is not suitable for commercial traffic. The A247 passes the entrances to Send school and the Villages Medical Centre. The additional traffic will increase dangerous Nitrogen Dioxide levels.

Because of the additional traffic this will create. There are circa 1,700 houses in Send. The proposed developments at Garlick’s Arch 550, Clockbarn 60, Winds Ridge 40, Plus Alderton’s Farm 120. Adds 770 new homes. An increase of 45%. This is excessive for our roads and indeed the infrastructure of our Village.

**I object to MM27, MM41, MM42, MM48, Transport Strategy.**

Because we have no verified assessment from Guildford Borough Council of the Traffic implication these modifications will impact on Send.

Common sense tells me development on the scale proposed in Send and wider a field at Gosden Hill, Wisley and Ockham. Plus the proposed M25/A3 Junction will increase traffic in our Village and with it the problems it brings.

**Attached documents:**

**Comment:** MM42 - LPMM18/2338  **Respondent:** Guy Whatley 15406593  **Agent:**

**Objection to MM42 Land at Burnt Common A58**

I object to the prospect of massive industrial space in Send which will mean vastly increased traffic on my daily commute to Cobham and in general. Traffic is very bad in the village and on many surrounding roads at most times of the day. Pollution from traffic fumes has been known to affect the health of the vulnerable, but there are no plans in place to add better roads or transport, so all coming and going would be on the already busy roads. With no other options, even the smallest of incidents already causes traffic chaos in Send.

Seeing as there is already some industrial development going on in Send, and empty industrial space here and throughout the Borough, where is the requirement for such a large industrial development? This seems to be a much larger and disproportionate development for such a small village where there is already some industrial development taking place.

**Attached documents:**

**Comment:** MM42 - LPMM18/5966  **Respondent:** Jennifer Slade 15429985  **Agent:**

**I object to MM42 - Land at Burnt Common, London Road, Send Policy A58.** This was deleted from the 2014 draft plan due to the number of objections showing that there was no proven demand now or in the future for additional
industrial capacity in this area. The draft plans stated a **MAXIMUM** of 7000 square meters of Industrial and Storage but now proposes a **MINIMUM** of 14,800 square meters. Does GBC presume that building a new A3 junction at Send justifies an industrial development of this increased size within a Green Belt residential / rural area when the industrial site at Slyfield still has empty units? The 2017 Employment Land Need Assessment showed a reduction in demand to 3.9 hectares for the whole of Guildford Borough - not the excessive allocation of 10 hectares within the Green Belt at Send alone. This would be by far the largest new industrial allocation in any village in the Borough. A new industrial site in the Ripley / Send area would cause an increase in commercial vehicle traffic through these villages to the A3, M25, M3 and M4 - contradicting MM9 and defeating the purpose of the Green Belt - on a road network which was never designed for Commercial traffic.

**Attached documents:**

**Comment: MM42 - LPMM18/2739  Respondent: Helen Green 15433153  Agent:**

**I object to MM42 (Land at Burnt Common, London Road, Send A58) because:**

- It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan
- With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East.
- The concentration in Send is more severe than any other part of the Guildford Borough. This seems unfair
- The industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity
- The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send – and in the Green Belt
- Once again, the impact on congestion will be significant as will Nitrogen dioxide levels causing potential damage to health

**Attached documents:**

**Comment: MM42 - LPMM18/2744  Respondent: Helen Green 15433153  Agent:**

**Regarding MM27, MM41, MM42 and MM48 Transport Strategy**

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock

**Attached documents:**

**Comment: MM42 - LPMM18/2056  Respondent: Mrs Kay Webb 15433473  Agent:**

I object to the increase in the minimum floor space at Burntcommon Warehouse. There is no justified need for more industrial sites in the Green Belt, and with an additional increase at Send Business Centre this will mean Send has more industrial space than any other village - with the possibility of even more industrial development on this site in the future as there is no precise allocation limit. The nearby site of Slyfield has unused capacity which should be utilised instead.
If these sites go ahead, Send will be overdeveloped and will lose its Village identity.

I am also concerned about the level of commercial traffic that will be moving to and from this proposed site, as the main road to Woking through Send is already congested. Nitrogen dioxide levels in our area are dangerous already without the addition of all the extra vehicles from all the proposed sites. Surely it is not acceptable to allow this proposed site, which will inflict more pollution and congestion misery on us, when there is no proven demand for this sort of development.

Attached documents:

Comment: MM42 - LPMM18/2372  Respondent: David A Sprigings 15438049  Agent:

MM42

9. I object to site allocation A58 Land around Burnt Common warehouse, London Road, Send as there is no justification for changing the required industrial/warehousing space (B1c, B2 & B8) from a minimum of 7000 sq mts in the 2017 plan to a minimum of 14800 sq mt at A58 Burnt Common in the 2018 plan when the TOTAL requirement for Industrial Land (B1c, B2 & B8) ha in the 2018 plan is unchanged from the range of 3.7 to 4.1 ha in the 2017 plan (Policy S2: Planning for the borough - our spatial development strategy, point (1) page 30 and Policy E1: Meeting employment needs, table under point (1) page 71). This is a reduction of some 20% from the Total requirement for such industrial land in the 2016 plan so it is totally unnecessary to more than double the proposer area at Burntcommon, especially when Slyfield is much more suitable.

10. This is a far bigger increase in industrial allocation than in any other village in the borough and is totally excessive.

11. Slyfield, which I believe has unused capacity, is much more suitable for this sort of industrial/warehousing space and should be used instead of Burntcommon.

12. It is wrong and unnecessary to put such an industrial site in a Green Belt area when Slyfield is a much better alternative.

13. Adding this industrial development to the proposed residential developments in the area will add even more to traffic congestion as well as pollution and accident risk.

Comment: MM42 - LPMM18/2378  Respondent: David A Sprigings 15438049  Agent:

MM27 MM40 MM41 MM42 MM48 Transport Strategy

The transport strategy in the Send/Send Marsh/Burntcommon/Ripley area does not look as though it will help deal with traffic congestion in the area but more likely to make it worse.

The timing is such that the developments in the area are front end loaded, mostly in the first 5 years of the plan, whilst major road improvements are mostly scheduled to not be completed until later years.

The road developments appear anyway to be designed to bring yet more traffic through these villages including to and from Woking which will increase pollution, delays and gridlock. To build many of the proposed new homes in advance of road improvements will only make matters worse.
The potential future all movements junction of the A3 with the A3100 London Road, the B2215 London Road and the A247 Clandon Road for the provision of land for a connector road to the B2215 London Road/A247 Clandon Road in MM35 Gosden Hill Farm under Transport Strategy (2) and Opportunities (6) sounds like a recipe for yet more traffic to be drawn through Burntcommon/Send Marsh/Send/Ripley making things even worse so although a plan for the future I object to it now.

Attached documents:

**Comment:** MM42 - LPMM18/5265  **Respondent:** Linda Daniell 15440161  **Agent:**

MM42

Increased capacity for this site is unreasonable and unnecessary. Slyfield has unused capacity. We already have an increase at Send Business Park.

Attached documents:

**Comment:** MM42 - LPMM18/2233  **Respondent:** C Knaggs 15443265  **Agent:**

I protest most strongly.

Medical facilities, roads cannot cope, noise, dirt, dust, bus service cannot cope. Area being ruined.

Attached documents:

**Comment:** MM42 - LPMM18/115  **Respondent:** Peter Hoar 15446561  **Agent:**

MM42

Will cause a huge increase in traffic to an area already gridlocked in the rush hour. Air pollution will be significantly increased. There is little demand and no special circumstances and so contradicts MM9.

Attached documents:

**Comment:** MM42 - LPMM18/94  **Respondent:** Mrs Eileen Barr 15446689  **Agent:**

I object to these proposals as local roads become choked with traffic now. This land is in the Green Belt but if such development is needed there is capacity at Slyfield.

Attached documents:
Comment: MM42 - LPMM18/5513  Respondent: Edward Bates 15448385  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM42 - LPMM18/4102  Respondent: Ruth Brothwell 15448897  Agent:

MM42

My previous objection related in particular to the loss of Green Belt land. I now notice that you have ignored this and doubled the intended development size.

- I object most strongly to the removal of green belt in this area
- There are no special circumstances for this development so it contradicts MM9
- There is no proven demand stated for this increase given the current increase in the Send Business Centre that has already taken place.
- The increase in traffic from such a site - given that it is successfully leased and not left empty - will cause additional problems to roads which are already very congested locally.
- Transport strategy - the proposed A3 changes and Clandon Road changes do not provide adequate support for the changes that would be incurred through this development suggestion. No assessment has been advised to us as loyal council tax payers regarding it. Roads towards London and Woking are very heavy every day already as I know from commuting. This situation can only add journey time, increased pollution and gridlock within the villages environments.

Attached documents:

Comment: MM42 - LPMM18/5475  Respondent: Margaret Ashmore 15449409  Agent:

(MM42) Aldertons farm Send Marsh Road why has this now been included well after the Inspectors report, this was very sneaky and under the radar, there is no reason for this to be on the plan. As with all your planning you are determined to destroy THE GREEN BELT which is so very important for nature, which I might add has not even been considered, why not?? According to your policy (MM9) you said you would unhold The Green Belt, so what is the idea of now building so many houses (which are NOT necessary) and industrial units which again are not needed.

Attached documents:

Comment: MM42 - LPMM18/5479  Respondent: Margaret Ashmore 15449409  Agent:

Nobody has yet come up with plans for roads and other transport needs MM27,MM41, MM42, MM48. You as a Council know how important it is to get this done IF your plans are to go ahead. At present the current roads cannot take any extra traffic, all roads into and out of the Villages will be complete gridlock. Please think very carefully what you want to destroy, such as Green Belt, Village Life, and the History of this area.
Comment: MM42 - LPMM18/468  Respondent: Janet Tarbet 15454529  Agent: 

**MM42 Land at Burnt Common, London Road, Send, Policy A58**

The increase from 7000 to a minimum of 14,800 sq m of industrial and storage is excessive

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.
- The Employment Land Needs Assessment showed a reduction in demand for industrial land.
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerously high.

Attached documents:

---

Comment: MM42 - LPMM18/473  Respondent: Janet Tarbet 15454529  Agent: 

**MM27, MM41, MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

---

Comment: MM42 - LPMM18/4137  Respondent: Pauline East 15468705  Agent: 

**MM42 Land at Burnt Common, London Road, Send, Policy A58.**

Increased from 7000 to a minimum of 14800 sq.m of industrial and storage.

Why having been deleted from the 2014 plan has this been increased twice, doubling the area when there is unused capacity at the Slyfield site.

Where is the demand anyway for industrial land, there are no special circumstances for this so it also contradicts policy MM9.

We already have a 25% increase making a much bigger concentration in Send
than any other village with no proven demand. Again this would impact on the environment and traffic on our already busy roads.

**Attached documents:**

---

**Comment: MM42 - LPMM18/4141  Respondent:  Pauline East 15468705  Agent:**

MM27, MM41, MM42 & MM48 Transport Strategy.

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons plus of course Gosden Hill and Wisley/Ockham are major and not adequately addressed with the proposed A3 changes etc.

It will I feel result in thousands more cars daily using Send Barns Lane and Send Road going to/from Woking etc past schools, medical centre and shops with major delays and gridlocks, noise and air pollution all to an intolerable and unacceptable level for our village.

**Attached documents:**

---

**Comment: MM42 - LPMM18/4179  Respondent:  Zoe Kollov 15468833  Agent:**

I object to MM27, MM41, MM42 and MM48 Transport Strategy because;

- The traffic implications for Send as a result of proposed changes at Garlicks Arch, Burnt Common, Clockbarn and Aldertons added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC has performed no proper assessment of the resulting aggregate traffic and the way that this will build up to every working day causing pollution, delays gridlock and noise.

I object to the proposal to inset Send Business park from the green belt because;

- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- It is an areas of outstanding beauty and is quite rightly protected as green belt that would be completely destroyed by this change
- there is no exceptional circumstance why the current green belt allocation should be changed for this purpose

I object to policy A42 change at Cockbarn in tannery lane because:

- I believe it should not take place in the first place, however a further increase in the number of homes is proposed which make the situation even worse
- The traffic in this area is getting worse and especially at the A247 junction
- Green belt land is protected in law and I see no reason that it should be built on.

**Attached documents:**

[Comment: MM42 - LPMM18/4182  Respondent: Zoe Kollov 15468833  Agent:]

**I object to MM42, Policy A58 at Burnt common because:**

- It was deleted from the 2014 draft because of all of the previous objections so I cannot understand why it has now been included again
- Industrial and warehousing could not be further from the idea of protected greenbelt land, Slyfield would be the obvious choice for such purposes as it already have the infrastructure and a grouping of similar businesses. This is not a good reason to irrevocably damage our Green Belt.
- I would like to leave my house in the future to my children and I want it to be surrounded by Green Belt land as it is now including all the nature that encompasses
- The word 'minimum' is a change from the previous 'maximum' in the 2016 plan and since that point there has been a decline in the demand for such industrial land
- The 2017 Employment land Need assessment shows a reduction in demand to 3.9 hectares, rather than the massively inflated 10 hectares in send on the green belt
- It will join up existing villages and defeat the purpose of the Green Belt

**Attached documents:**

[Comment: MM42 - LPMM18/226  Respondent: Nicholas Brown 15468993  Agent:]

MM42 Policy A58

Despite the Employment Lands Needs Assessment showing a reduction in demand for industrial land the proposal more than doubles the industrial allocation for the land at Burnt Common.

There are more appropriate brown field sites that should be utilised such as Slyfield which has unused capacity. This proposal clearly contradicts policy MM9.

Again how are we meant to deal with the increase in traffic when local roads get gridlocked especially at rush hour?

**Attached documents:**

[Comment: MM42 - LPMM18/231  Respondent: Nicholas Brown 15468993  Agent:]

MM27, MM41, MM42 & MM48
It appears that GBC has not carried out a proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road of building at Garlick's Arch, Burnt Common, Clockburn and Alderton's. This transport strategy will witness a huge increase in traffic which will add to an already inadequate road system and will see an increase in noise, pollution, delays and gridlock. This is a very worrying prospect.

Send seems to have been singled out for a disproportionate increase in development when compared with neighbouring villages.

I hope that these objections are seriously taken into account.

Attached documents:

**Comment: MM42 - LPMM18/1003  Respondent: Lorraine Ozanne 15472833  Agent:**

**Objection to MM41, MM42, MM44, MM9 and associated Transport strategies**

I'm writing to formally object to the above Main Modifications on the following grounds:

- The excessive number of houses proposed
- Over development of Send and Ripley
- Excessive new industrial allocation of land
- Additional traffic causing major congestion of local roads and resultant safety concerns for pedestrians
- Green Belt land should be protected

Attached documents:

**Comment: MM42 - LPMM18/289  Respondent: M.M.L Prosser 15477089  Agent:**

What an extraordinary amount of building planned for Send Village; it would certainly stop being a village and turn into a town. However it would still only have one road going through which means traffic would be [unreadable text], and non-stop.

If you could build a flyover to Woking - great! [unreadable text] those extra people [unreadable text] doctor's surgery and one chemist and no extra school isn't feasible.

I do think a permanent gipsy site would be preferable to them parking, [unreadable text] ever they like and [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

Please have a rethink

Attached documents:
MM42. Land at Burnt Common, London road Send Policy A58.

As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT, except if as a Council Cabinet you want to punish Send.

This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m. MM27, MM41, MM42, and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on Send Barns Road and I despair at how their lives will be affected.

---

MM42 LAND AT BURNT COMMON LONDON ROAD POLICY A58

I OBJECT TO THE POLICY MM42 Land at Burnt Common because: Since this site was deleted from the 2014 Local Plan due to objections yet put back into the 2016 Plan this current proposal looks too increase the development above the 7,000 square meters of warehouse or industrial units proposed in the 2016 Local Plan. To a Minimum of 14800 square meters. Which must rate it as the highest proposed industrial development in any village in the borough. There is currently no requirement for more industrial units in Green Belt locations. Guildford and Slyfield currently have empty sites and there is a decline in the demand for such sites, the 2017 employment land need assessment shows a reduction in demand to 3.9 hectares for the whole borough, yet the council are proposing to destroy 10 hectares of Sends GREEN BELT for unnecessary units Totally ignoring 25% increase in the current Send Business Centre putting even more pressure on the local roads and adding to the development along the A3 corridor totally against the GREEN BELT policy. No doubt this will help with create very high levels of Nitrogen DIOXIDE.

There are serious implications to this suggestion. The roads around are already busy and congested as Send is used by many as a through-fare to Woking. Nitrogen dioxide levels are already far too high. Why is there a need for a new industrial site in an inappropriate location when there is already spare unused capacity elsewhere - eg at Slyfield?

Attached documents:

Comment: MM42 - LPMM18/4168  Respondent: Karsten Kollov 15582817  Agent:

I object to MM42, Policy A58 at Burnt common because;

- It was deleted from the 2014 draft because of all of the previous objections so I cannot understand why it has now been included again

- Industrial and warehousing could not be further from the idea of protected greenbelt land, Slyfield would be the obvious choice for such purposes as it already have the infrastructure and a grouping of similar businesses. This is not a good reason to irrevocably damage our Green Belt.

- I would like to leave my house in the future to my children and I want it to be surrounded by Green Belt land as it is now including all the nature that encompasses

- The word 'minimum' is a change from the previous 'maximum' in the 2016 plan and since that point there has been a decline in the demand for such industrial land

- The 2017 Employment land Need assessment shows a reduction in demand to 3.9 hectares, rather than the massively inflated 10 hectares in send on the green belt

- It will join up existing villages and defeat the purpose of the Green Belt

Comment: MM42 - LPMM18/4175  Respondent: Karsten Kollov 15582817  Agent:

I object to MM41 policy A43 change at Garlicks Arch because;
- I do not see any exceptional circumstances that should force the erosion of green belt land
- It will remove the 'green belt' between Ripley and Send that is necessary for the survival of our native species such as Hedgehogs
- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- A further 550 homes will put further pressure on local services, which are currently at breaking point; transportation, hospitals, education etc.
- There is no proven requirement for travelling show people plots
- It will spoil the current beauty and openness of the area, which is what attracted my family and I in the first place.

Attached documents:

---

Comment: MM42 - LPMM18/3732  Respondent: Oliver Hogben 15588033  Agent:

**MM27. MM41. MM42 and MM48 Transport Strategy**

Send is a highly congested village. My own road, Potters Lane, is evidence of this; in July my parked car was written off by a council van when the driver found himself boxed in by rush hour traffic and panicked, driving in to the side of my car and then reversing in to the front of it. 'Road rage' is becoming a serious problem in Potters Lane, with almost daily conflicts; this was not the case when I moved in five years ago. My question, therefore, is why has the potential effect of thousands of extra cars in an already heavily congested area not been taken into account? Nothing has been done to address this in the most recent document.

Attached documents:

---

Comment: MM42 - LPMM18/3678  Respondent: John Thompson 15591585  Agent:

I object to MM42 - Land at Burnt Common, London Road, Send, Policy A58

I find it unfathomable how this site can have been deleted from the original plan and then increased twice, doubling its size from the initial proposal of 7000 square feet to 14,800 square feet. This is totally unnecessary when Slyfield has unused capacity. As such, it means taking green belt land when an already developed area is available. This is in addition to the 25% increase at Send Business Centre. These proposal constitutes the largest new industrial allocation in any village in the borough. There are no special circumstances and, therefore, this also contravenes MM9. To say that this is unfair is an understatement. In addition to this, the Employment Land Need Assessment showed a reductions in demand, not an increase, making such development unnecessary. Once again, I return to the issue of road congestion and, inevitably accompanying this, increased pollution. Nitrogen dioxide levels in the area are already dangerous. This traffic will have a knock on effect to the surrounding areas, which, once again, will impact negatively on our lives.

Attached documents:

---

Comment: MM42 - LPMM18/3688  Respondent: John Thompson 15591585  Agent:
I object to MM27, MM41, MM42, MM48 Transport Strategy

The cumulative impact on the traffic and pollution issues on the village, when all of the proposed developments at Garlick's Arch, Clockbarn, Alderton's Farm, Gosden Hill and Wisley and Ockham, is totally unacceptable. Our road systems are already heavily congested, especially at key points in the day. My daughter lives on Send Road where it is often difficult to enter and exit her drive because of the ceaseless flow of vehicles. Crossing the road is perilous. The pollution levels are a real cause for concern as I have a young grandchild. We already know that far too many of today's youngsters suffer from asthma, a direct result of the increasing levels of pollution. This can only be exacerbated if these proposals go ahead.

Attached documents:

Comment: MM42 - LPMM18/4513  Respondent: Ann Watkins 15603361  Agent:

MM42. Burnt Common. Send Policy A58.

Why so much extra industrial development in a village? This surely means even more traffic - large lorries and vans, besides noise. Surely a village should hope to have some peace and quiet.

Attached documents:

Comment: MM42 - LPMM18/4517  Respondent: Ann Watkins 15603361  Agent:

None of these proposals will help an already chaotic traffic problem.

Attached documents:

Comment: MM42 - LPMM18/4653  Respondent: Jackie van Heesewijk 15640897  Agent:

MM42, Land at Burnt Common, London Road, Send. Policy A58.

I object to the increase proposed, from 7000 to a minimum of 14,800 sq m of industrial and storage. I am disappointed that this has been increased twice, since being deleted from the original 2014 plan. It is by far the largest new industrial allocation in any village in the borough, so why here? There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are no special circumstances to allow this on Green Belt land, so it contradicts policy MM9. Apparently the Employment Land Needs Assessment showed a reduction in demand for industrial land, so why is this even proposed? This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send, with no proven demand, than any other village. Why can't the industrial space, if really required, be split with other villages, rather than concentrated here? Again, the increase in traffic will be unsustainable, it really doesn't take much for the narrow village roads to get gridlocked. The levels of pollution will increase to intolerable levels.

Attached documents:
**Comment: MM42 - LPMM18/4662  Respondent: Jackie van Heesewijk 15640897  Agent:**

**MM27, MM41, MM42 and MM48 Transport Strategy**

The traffic implications of the increased developments at Garlick's Arch, Burnt Common, Clockbarn and Alderton's have not been properly thought through. The proposed changes to the A3 and Clandon slip roads will not address the problems created by the extra traffic on top of the usual rush hour Woking commuter traffic congestion, causing increased noise, nitrogen dioxide pollution delays and gridlock.

**Attached documents:**

---

**Comment: MM42 - LPMM18/3378  Respondent: Frances Turner 15657057  Agent:**

**POLICY A58: LAND AROUND BURNT COMMON WAREHOUSE, LONDON ROAD, SEND. MM42**

I object to this proposed increase from 7000 to a minimum of 14,800 sq m of industrial and storage. This is the largest industrial allocation in any village within Guildford borough. Removing so much Green Belt land from around Send Marsh is incompatible with the Government's definition of “sustainable development”. The proposals are contrary to government policy on sustainable development because there is unused land at Slyfield industrial estate, and there are no “exceptional circumstances” as required by NPPF paragraphs 79-92 to justify allocating Green Belt land for this development. Furthermore, there is no adequate assessment of the effect of the additional traffic which would be generated by this development, and which would contribute adversely to the already unacceptably high pollution levels generated by the A3.

**Attached documents:**

---

**Comment: MM42 - LPMM18/3561  Respondent: Natural England (Marc Turner) 15661921  Agent:**

**Policy A39: Land near Horsley railway station, Ockham Road North, East Horsley**
**Policy A43: Land at Garlick’s Arch, Send Marsh/ Burnt Common and Ripley**
**Policy A58: Land around Burnt Common warehouse, London Road, Send**

It was previously advised that these sites are adjacent to ancient woodland. The policies should ensure that any direct or indirect impacts on these sites are avoided or mitigated. It is noted that policy a43 has an increase of proposed housing developments from 400 to 500 dwellings. Policy 58 also has an increase in land use proposed.

**Attached documents:**

---

**Comment: MM42 - LPMM18/4514  Respondent: WYG (Andrew Wells) 16155233  Agent:**

**POLICY A58 (BURNT COMMON NURSERIES) OF GUILDFORD BOROUGH COUNCIL’S PROPOSED MAIN MODIFICATIONS TO THE SUBMISSION LOCAL PLAN 2017**
1 INTRODUCTION

1.1 RGP is appointed by the Newship Group to provide transport and highway consultancy services for the Burnt Common Nurseries site at Burnt Common, Send. The site is located within the administrative boundaries of Guildford Borough Council (GBC) and the site is included as Policy A58 of the Submission Local Plan 2017.

1.2 Following conclusion of the Examination in Public (EiP) hearing sessions in July 2018, GBC are now proposing modifications to the plan, as set out in the Schedule of Proposed Main Modifications to the Submission Local plan (2017) document. With respect to Policy A58, the proposed modification of Policy A58 increases the developable floor area at the site from 7,000 sq m to 14,800 sq m, and also specifies a Transport Strategy associated with the site. The Transport Strategy is not included in the current Submission version. The proposed modified version of Policy A58 states:

“The site is allocated for a minimum of 14,800 sq m of either or a mix of light industrial (B1c), general industrial (B2) and storage and distribution (B8) over the Plan period with the potential for further industrial floorspace to meet future borough needs, as identified through subsequent updates to the Employment Land Needs Assessment (ELNA).”

Transport strategy
i) Permeability for pedestrians and cyclists into and from the development.

ii) Necessary and proportionate contribution towards an off site walking and cycle network between the village centre of Send, the Burnt Common Warehouse site and Clandon railway station.

iii) Necessary and proportionate contribution towards mitigation schemes to address the otherwise adverse material impacts on communities and the environment, including in Send, West Clandon and Ripley.

iv) Increased landscaped buffer/strategic planting with frontage development set back from the A3 with significant additional measures to mitigate the visual impact of development in this location.”

1.3 Further assessments of the proposed modified version of Policy A58 have now been undertaken by RGP in terms of its deliverability in light of the assessments carried out to date and in the context of the latest position with regard to existing and planned transport infrastructure improvements. In summary, RGP conclude that the proposed modified version of Policy A58 is fully deliverable in transport terms, either with or without the identified wider improvements to the A3 / M25 strategic road network.

2 BACKGROUND

2.1 RGP has worked with the Newship Group since 2015, providing transport and highway advice pertaining to the promotion and bringing forward the site allocation for future development. RGP has produced three previous Technical Notes in relation to the site, the second of which (WHYG/16/3206/TN02) was submitted as part of GBC’s Summer 2017 consultation on the Local Plan during June and July last year.

2.2 TN02 focussed on the deliverability of the site including the points of access and the potential impact of traffic generated by 7,000sqm of B1c/B2/B8 at local junctions in Send, including a series of junction capacity assessment in two future scenarios in 2022. The junctions assessed were:

i) B2215 London Road / A247 Send Barns Lane / B2215 Portsmouth Road / A247 Clandon Road – Roundabout Junction (‘Junctions 8’ assessment);

ii) Send Hill / A247 Send Road / Send Marsh Road / A247 Send Barns Lane Signal Controlled Crossroads Junction (LinSig assessment); and

iii) Ripley By-Pass (A3 southbound on-slip road) / A247 Clandon Road Priority junction (‘Junctions 8’ assessment).

2.3 The conclusion of the modelling exercise (using Junctions 8 and LinSig modelling software) was that the development proposals would have a negligible impact on the existing junctions in 2022 compared with the baseline position.
2.4 Further junction modelling exercises have now been undertaken based on the proposed modification of Policy A58 (14,800 sq m of commercial floor space) and the associated increases in traffic generation compared to the previously assessed 7,000 sq m. This assessment also included an uplifted baseline assessment year of 2023.

2.5 The findings of this further junction modelling assessments show that the traffic associated with 14,800 sq m would continue to have a negligible impact on the existing junctions compared to the 2023 baseline position and the junctions would continue to operate within their theoretical capacity limits.

2.6 As was concluded from RGP’s TN02 report from 2017 (based on 7,000 sq m), the Burnt Common Roundabout (east of the site) was identified to be subject to the greatest impact from the proposals. Therefore, the previously identified scheme to increase capacity at the roundabout by amending the kerbline on A247 Send Barns Lane to achieve a dedicated lane for left-turning vehicles has again been assessed in capacity terms for the ‘With Development’ scenario based on 14,800 sq m of floor area. The findings of this assessment show that these improvements would provide a delay saving to drivers of over 20 seconds on this arm and would reduce maximum levels of queuing on the arm by 6 vehicles. Again, the scheme would deliver a material improvement to the overall operation of the roundabout when compared to the baseline 2023 scenario.

2.7 The transport infrastructure requirements of Policy A58 from the Schedule of Proposed Main Modifications to the Submission Local plan (2017) document do not specifically relate to vehicular impacts at local, or wider, sections of the transport network. Notwithstanding this, should it be required, the funding and implementation of such improvements to the Burnt Common Roundabout (secured through Section 106 / 278 Agreements as appropriate) could form part of a future planning application at the Burnt Common Nurseries site. These improvements would be proportionate and cost-effective. They are fully deliverable within public highway land with little, or no, delay. Appropriate contributions could also be provided as part of any planning approval to deliver the various transport improvements as set out in the proposed wording of Policy A58.

2.8 The findings of any associated Transport Assessment accompanying a future planning application would thoroughly assess the relative transport impacts and would identify appropriate mitigation as necessary.

3 LOCAL TRANSPORT INFRASTRUCTURE

3.1 During the Local Plan preparation period there has been considerable discussion relating to two new north-facing slip roads onto the A3 at Burnt Common referred to in the GBC Submission Local Plan as Policy A43a. The Former Wisley Airfield is included within the GBC Submission Local Plan 2017 as Policy A35 and the slip roads are noted in point 4 of the infrastructure requirements for this Policy. No alterations to this are proposed within the Main Modifications document.

3.2 The Wisley Airfield scheme promoted by the developer, Wisley Property Investments Ltd, proposed a 2,068 home settlement along with a range of community facilities and a new primary and secondary school. The outline planning application was refused by GBC in April 2016 and was the subject of a planning appeal in Autumn 2017. The Appeal was dismissed in June 2018.

3.3 In a Statement produced by Guildford Borough Council published on Friday 15th June 2018, the Council states that the Inspector’s decision does not affect the proposal to retain the Wisley Airfield site as an allocation in the Submission Local Plan as the points which the Inspector has raised (primarily harm to the Green Belt) are assessed differently during the preparation of a Local Plan to those during a planning application/appeal. Additionally, GBC appended the position statement released by Highways England and Wisley Property Investments Ltd on 11th June 2018 to their statement which stated that Highways England was ready to withdraw its formal objection to the scheme, therefore the previous concerns expressed by the Inspector and Secretary of State on the grounds of highway safety are capable of being resolved.

3.4 As set out in the Statement of Common Ground (July 2018) between Guildford Borough Council and the promoter of site allocation A43 (Garlick’s Arch) and A58 (the subject site at Burnt Common) an interim transport mitigation scheme could be implemented in Ripley which ensures that the residual cumulative impacts of Allocations A58 and A43 is not severe in the period prior to the completion of the A3 new slip roads (and the Highways England M25 J10/A3 scheme).
3.5 Notwithstanding the above, the proposed A3 north facing slip roads are not considered necessary to facilitate the allocation and future development of the Burnt Common Nurseries site (Policy A58), including the proposed modification to 14,800 sq m. Despite the Wisley Airfield decision and matters relating to the delivery of the strategic transport improvements at the A3 / M25, RGP is keen to highlight that the Burnt Common Nurseries site (Policy A58), including the proposed modification to 14,800 sq m, can operate within the remit of the existing highway network.

3.6 Moreover, cost-effective improvements to the Burnt Common Roundabout have been identified which would deliver an overall improvement to the operation of the roundabout. Alternatively, or alongside this, appropriate contributions for transport improvements could be made as part of a future planning consent, as identified in the Transport Strategy of the proposed Main Modifications document.

**Sustainable Transport**

3.7 The Schedule of Proposed Main Modifications to the Submission Local plan (2017) document includes a transport strategy for Policy A58, which focusses on accessibility by non-car modes. This includes matters relating to the permeability of the site itself, as well as on the wider transport network, including between the village of Send, the subject Burnt Common Warehouse site and Clandon railway station.

3.8 With reference to this identified transport strategy, as detailed within RGP’s TN02 document (July 2017) RGP have already undertaken assessments in terms of the accessibility of this site for all users, full details of which would be provided as part of a Transport Assessment to accompany a future planning application. As well as ensuring that appropriate access for vehicular users can be provided, RGP have identified an appropriate pedestrian / cyclist access strategy into / out of the site from London Road.

3.9 In addition to the above, a number of wider sustainable transport improvements have already been identified by RGP for London Road, including the provision of a new 3-metre wide shared cycleway / footway adjacent to the site on the southern side of London Road. Also identified are improvements such as the widening of existing sections of cycleway / footway at the Burnt Common roundabout. These measures could be included within a package of Section 278 works associated with the planning application, or through appropriate contributions as per the identified transport strategy.

3.10 Further contributions would also be provided towards bus services and improvements to non-car accessibility to the centre of Send and Clandon rail station as part of other planned developments locally. These improvements would also be beneficial to users of the Burnt Common Nurseries site.

**4 SUMMARY AND CONCLUSIONS**

4.1 In summary, this note concludes the following:

i) Suitable vehicular access could be achieved to the site as well as delivering sustainable infrastructure improvements for all users of the site;

ii) The site could deliver the proposed modification to 14,800 sq m of floor space, without having a severe impact on the local highway network. Full assessments and associated mitigation would be detailed within a Transport Assessment accompanying a future planning application;

iii) Improvements to the Burnt Common roundabout could be implemented as part of the Burnt Common Nurseries scheme and would have an overall net benefit to the operation of this roundabout;

iv) The Burnt Common Nurseries scheme (Policy A58), including the proposed modification to 14,800 sq m, could be delivered either with, or without, the planned new Burnt Common slip roads at the A3 (Policy A43a); and

v) The scheme would deliver all of the necessary transport improvements as identified in the proposed transport strategy for Policy A58. These improvements could be delivered through S278 works as part of the scheme, or through financial contributions as appropriate.

--------------------------------------------------------------------------------------------------------------------------------------------------
We are writing on behalf of our clients, Burnt Common Nurseries Ltd, to support the allocation in the emerging Guildford Local Plan of the land known as Burnt Common Nurseries, London Road, Send.

**Introduction**

We support the proposed Main Modification of the Plan to allocate the site for a minimum of 14,800sqm of floorspace falling within Use Classes B1(c), B2 and B8 to meet identified needs (Policy A58).

At the Examination in Public into Guildford’s emerging Local Plan an updated Employment Land Needs Assessment (ELNA) was circulated. This demonstrated that since the ELNA was published in 2017 an increased need for industrial land and floorspace would be required over the Plan period. An increased need of between 2.18ha. and 2.58ha. was identified due to losses of floorspace falling within Use Classes B1a, B1b, B1c, B2 & B8 that had taken place since the ELNA was published. To meet the revised need, the Local Planning Authority proposed an increase in the allocation at Burnt Common Nurseries due to the required space being readily available and deliverable at the site and its compliance with other key sustainability criteria, including its flexibility to come forward early in the Plan period without requiring the construction of significant infrastructure upfront.

As a result, the Local Planning Authority has proposed to increase the allocation at Burnt Common Nurseries to 14,800sqm floorspace to be provided within the Plan period to meet the identified need, with additional land being brought forward if required, as identified through an update to the ELNA.

Since the Examination in Public where the units were identified as vacant, two of the units have since been let and occupied and an offer has been received for the third and final unit.

The allocation of the site as set out in the Main Modifications to the Plan represents the expansion of an existing lawful industrial site that can be delivered early in the Plan period. As described in the enclosed statement from RGP (highways consultants), the development is not reliant on the provision of new sliproads onto and off the A3 at Burnt Common to mitigate the transport impacts. Local highway mitigation would be provided, which is found to have an overall net benefit to the operation of the Burnt Common roundabout.

We write to affirm our assessment that the proposed development would provide choice and competition in the market for employment land, meet an identified need at an early stage within the Plan period and provide flexibility to meet a higher need for industrial floorspace (Use Class B1, B2, B8), should the need arise, as identified through updates to the ELNA.

All of the above would be met on a site previously used for commercial development in a location that is attractive to the market, due to its proximity and accessibility to the strategic road network, Guildford and Woking. The development of the site would have a minimal impact on the environment and appropriate mitigation can be provided to minimise the landscape/ visual impact, whilst providing opportunities for employment creation close to existing urban areas.

**Highways and transport**

Further junction modelling assessments show that the traffic associated with 14,800sqm would continue to have a negligible impact on the existing junctions compared to the 2023 baseline position and the junctions would continue to operate within their theoretical capacity limits.

Development of the site would not have a severe impact on the highway network and, in combination with other allocations in the emerging Local Plan, can contribute to the improvement of existing sustainable modes of transport.

The (London Rd/ Send Barns Lane/ Clandon Road) junction can be upgraded to mitigate for the transport impacts of the development, including the provision of a left-turn lane from London Road to Send Barns Lane.

In addition, in the period prior to the completion of the A3 new slip roads (and the Highways England M25 J10/ A3 scheme), an interim transport mitigation scheme can be implemented which ensures that the residual cumulative impacts of Allocations A58 (Burnt Common Nurseries) and A43 (Garlick’s Arch) are not severe. This is set out in an agreed Statement of Common Ground (July 2018), prepared for the Guildford Local Plan Examination in Public.
Choice and competition of sites

Regarding choice and competition, St. Modwen has recently implemented phase 5 (the final phase) of the planning permission for Use Class B1, B2 and B8 floorspace at Henley Business Park. This provides a large amount of modern, flexible commercial floorspace to the market. The site is less accessible to the strategic road network than the Burnt Common Nurseries site, however St. Modwen has already had interest in some of the units and an offer made on two units.

The emerging Plan also identifies eleven existing strategic employment estates throughout the Borough. These vary in size from 1.6ha. (Cathedral Hill Industrial Estate) to 38ha. (Slyfield Industrial Estate) and location (i.e. within the urban area of Guildford, on the edge of the town and in the rural area). These provide a range of size, type and location of employment floorspace, which provides a wide choice and facilitates competition in the local market.

Development of the Burnt Common Nurseries site would also increase choice in the area by location. The site provides a convenient location for the villages in the north of the Borough and an alternative to Merrow Lane and Slyfield industrial estate. This demonstrably increases choice and competition.

The employment development at Burnt Common Nurseries would be constructed in phases, with each phase comprising a range of flexible unit sizes. A number of smaller units would be provided, acting as incubator units. As a result, a number of units would come forward at the same time, increasing the amount, type and size of units available to the market.

The new units are likely to better meet the needs of a number of occupiers from within the local area (Guildford, Waverley and Woking), than their current accommodation. As incentives are offered to prospective occupiers of the new units, this would increase choice and competition at the time the units are brought to the market and any move from within the property market area will free up space currently occupied for others wishing to move into the area, thereby maintaining that choice and competition in the market.

Conclusion

We support the Main Modification allocation of the Burnt Common Nurseries site for a minimum of 14,800sqm of B1, B2 and B8 floorspace at an early stage in the Plan period, with additional floorspace being brought to the market by other strategic sites later in the Plan period.

The landowner remains committed to developing the site in accordance with the allocation, which would serve to increase choice and competition in the Borough. The impact on the local area would be negligible and contained. As identified by RGP, there would not be a severe impact on the local highway network and improvements to the Burnt Common roundabout could be implemented that would have an overall net benefit to the operation of this roundabout.

Please do not hesitate to contact me should you require any further information.

Attached documents:

Comment: MM42 - LPMM18/3476  Respondent: Colin Sweby 17159393  Agent:

MM42; Burnt Common, Policy A58

The proposed increase in industrial units etc is excessive, given the location of the site and the capacity at Send Business Centre. Also the Slyfield complex has capacity and has been specifically developed for this type of development.

The site lies in Green Belt, so the proposals contradict MM9.

The proposed development will have environmental consequences, note comments in respect of MM41; Garlicks Arch, above, with regard to noise environmental contamination and the Water Framework Directive.
Comment: MM42 - LPMM18/1479  Respondent: Mr (Mr Mark Gurdon) 17161889  Agent:

This proposal is for an absurd amount of industrial and storage space given that there is so much surplus space in the area which is unoccupied, specifically Slyfield.

The roads in the area already cope with huge amount of lorries and large commercial vehicles, so many of which end up parked on the access road to this site. This will increase traffic flow to unsustainable levels.

Why do we need to put industrial sites in the Green Belt? Totally unnecessary in my view.

Attached documents:

Comment: MM42 - LPMM18/218  Respondent: Laura Frankland 17178113  Agent:

MM42 Land at Burnt Common, London Road, Send

This development seems to me unnecessary considering there is unused capacity at Slyfield. It is again Green Belt land and would put unnecessary strain on the local roads

MM9 Green Belt policy and  MM27 MM42 MM48 Transport Strategy

The Green Belt should be protected and preserved for future generations. Wild life and walkers alike need our greenbelt areas and over development of our villages devastating the rurality of the area. I do not wish to live in a town, choked by increased volume of traffic with reduced places to enjoy nature, peace and a walk with my family and dogs.

Attached documents:

Comment: MM42 - LPMM18/3491  Respondent: Madeleine Davis 17205121  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I strongly object to the increase to 14,800 sq metres of industrial and storage

This was deleted from the 2014 plan, but has now been reinstated at twice the size.

There is no need whatever for additional industrial allocation in this area. There are unused sites at Slyfield and unused office space in Guildford which could be put to good use, IF required.

This would also add to the gridlocking of the already busy roads in the area.

Attached documents:
Comment: MM42 - LPMM18/459  Respondent: Dorothy Ann Sprigings 17205249  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I object to the more than doubling of the area for industrial and storage use to a minimum of 14,800 sq. m.

- Slyfield has unused capacity so there is no need to put industrial use on the Green Belt when no special circumstances exist, so that Policy MM9 is contradicted.

- This village is being asked to accommodate the largest, by a long way, new industrial allocation in any village in the borough, with no proven demand.

- Local roads are unsuited to an increase in heavy traffic.

- Pollution levels are already high and will be increased.

Attached documents:

Comment: MM42 - LPMM18/1042  Respondent: Ian William Groden 17206177  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

- I believe this site was previously deleted from the 2014 plan but has been subsequently reintroduced, this time doubling to a large area, with the potential for further Industrial floorspace in the future if required.

- The Transport Strategy recognises the likely adverse material impact on the community and environment in Send, West Clandon and Ripley. The mitigation schemes will not alter the fact that larger numbers of heavy vehicles will now be using Burnt Common roundabout and surrounding roads with impact on local communities and infrastructure.

- It is, I understand, by far the largest new industrial allocation in any village in the borough and I cannot see special circumstances for it in the green belt, particularly as Slyfield has unused capacity.

- Does the Employment Land Needs Assessment show a reduction in demand for industrial land? If so, why this development here with such an increase?

Attached documents:

Comment: MM42 - LPMM18/1046  Respondent: Ian William Groden 17206177  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

- I would respectfully suggest that, although individual site allocations may in the outcome be judged by the Council to be without severe impact in the Strategic Road Network, my concern throughout has been for the traffic implications, primarily for Burnt Common Roundabout itself, as well as its converging roads including the road through Send, from the combination of extremely large developments at Wisley, Gosden Hill, Garlick’s Arch, commercial development at Burnt Common and the new north-facing sliproads.

- All will individually lead to new or changed traffic patterns with substantially increased volumes, congestion, noise, and fumes but the combined impact at Burnt Common roundabout merits your utmost confidence that it works without extreme consequences, particularly with the increases at Garlick’s Arch (MM41) and the commercial development at MM42.

- I have mentioned that the increased Garlick’s Arch will still create traffic via the roundabout to Send and Woking.
In addition, even if the link road through Garlick’s Arch proves sufficient to divert southbound and eastbound traffic (from the Wisley development and Newark Lane), increased numbers from the Wisley development could choose to turn right at the Burnt Common roundabout and take a route to Woking and beyond, which is less tortuous than via Newark Lane. Importantly, traffic coming off the M25 and A3 North could also choose this route (particularly heavy vehicles?). In the same way the Gosden Hill development could lead to larger numbers heading to Woking from the south on the A3.

The very fact that Guildford’s development figures could now include numbers to make up for Woking’s housing needs surely suggests there will be related increased movement that way.

The vehicle figures could be in thousands through this small roundabout which will be the crunch point.

I note that the statistics in response to the Inspector’s query 11.37 re the road through Send are shown in terms of annual average daily traffic and annual average weekday traffic.

Have GBC projected all the above possible movements, including of course the additions at MM41, MM42 and MM44, to reflect scenarios of future peak hour travel, at Burnt Common roundabout and its feeder roads? It is at these times that the most impact will be felt by the most people in terms of queuing and emissions and local inconvenience and it is this which requires the most attention.

Attached documents:

Comment: MM42 - LPMM18/4583  Respondent: Jenna Crombie 17206209  Agent:

I am writing to record my objection to the latest draft of Guildford Borough Council’s Local Plan.

I have responded previously to an older version of the plan (unique ID number [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]) highlighting my concerns about the disproportionately high levels of development intended in and around Send and Send Marsh.

On reading the revised plan, I am extremely concerned and disappointed to note that it now shows an increase rather than decrease in intended development in the areas in and around Send.

Specific concerns relate to:
MM42 with the intended site allocation increased from a minimum of 7,000 sq m up to 14,800sq m for industrial use.

Attached documents:

Comment: MM42 - LPMM18/2646  Respondent: Mrs S. Almeida 17246593  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I hereby object to the above as there is no need for another industrial estate in a rural area, with surrounding roads that cannot with any more traffic heavy vehicle which will bring more nitrogen dioxide levels which are already dangerous.

Slyfield industrial estate has unused capacity.

Attached documents:
Comment: MM42 - LPMM18/2953  Respondent: Andrew Bedworth 17288513  Agent:

42 Burnt Common, London Road, Send, policy A58

1. Slyfield has unused space: it is therefore unnecessary to build on Green Belt.
2. There has been a reduction in demand for industrial land as per the Employment Land Needs Assessment.
3. No special circumstances exist and therefore this contradicts MM9.
4. This is on top of the 25% increase in the Send Business Centre making the burden on Send village disproportionate to that of any other village.
5. It will add to the instances of gridlock and boost already dangerously high nitrogen oxide levels. The increase from 7000sq m to a minimum of 14,800sq m of industrial / storage would make this the largest industrial site allocation in the borough, and has happened despite its deletion from the 2014 plan. It is therefore illogical that this has been tabled.

The proposed wider development in Send Marsh has no consideration for the impact on the village of the overall planning proposals, which would see dwelling numbers increase by around 45%+.

Attached documents:

Comment: MM42 - LPMM18/1318  Respondent: Mrs Lynda Turner 17301473  Agent:

I strongly object to the massive increase in industrial, storage and distribution floor space. It is inappropriate for the overstretched transport network. The A3 and other local roads would not cope with the huge increase in heavy traffic.

Attached documents:

Comment: MM42 - LPMM18/1648  Respondent: Shirley Bowerman 17308417  Agent:

MM42. Land at Burnt Common, London Road, Send. Policy A58.

I strongly object to this as the area concerned has been increased from 7,000sqm to a minimum of 14,800sqm. Is this serious or is it a mistake? If this is a minimum, how will it be enforced if too few applications are made. And presumably without a maximum, the sky is the limit.

Since being deleted from the 2014 plan this has been increased twice, at least doubling the area, making it the largest new industrial allocation in any village in the area and with no evidence of need being produced. This sounds very much like another ‘punitive’ instance.

In any event there is absolutely no need to place new industrial sites in the Green Belt when there is available space at Slyfield. There are no special circumstances so it would appear to be contrary to MM9. Indeed, the Employment Land Needs Assessment showed a reduction in demand for industrial land.

This proposal is additional to the 25% enlargement at the ‘Send Business Centre’, in which case there will be a larger concentration in Send than any other village and crucially no evidence of demand. What is going on? Narrow, winding single-lane lanes around the Business Centre will lead to frequent gridlock. Nitrogen dioxide levels are already dangerous.

Attached documents:

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons when considered with nearby Gosden Hill and Wisley/Ockham are not sufficiently dealt with by the A3 changes and the Clandon slip-roads. The over-all effect of the total extra traffic on Send Barns Lane and Send Road does not appear to have been addressed, bearing in mind that thousands of extra cars and trade vehicles, combined with HGVs will be going to and from Woking every day, causing increased noise, pollution, delays and tail-backs.

Attached documents:

This is unnecessary, there is brownfield land within the borough which can take this huge development. Why development on green belt land when there is already brownfield at Slyfield. This contradicts MM9

Send seems to be at the forefront of all the developments, being attacked from all angles, increase at Tannery Lane, Increase at Burnt common, where is the proven demand for such a unit? The roads cannot cope with the heavy loads, Send Barns Lane has been eroded by the large vehicles already. As i have said previously as a resident with small school age children i am concerned about the nitrogen dioxide levels. there is a reason we moved out of london.

Attached documents:

- Since being deleted from the 2014 plan this has been increased twice, doubling the area.
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
- Traffic on arrow surrounding roads will significantly increase especially during peak times when the majority of vehicles will be using the roads leading to gridlocked. Additionally nitrogen dioxide levels are already dangerous and the additional disproportionate pollution form a large increase in vehicles in rush hour traffic will only degrade the air quality further.
- With many local trades in the area, they could be used to assist and in turn put something back into the local area but the plans make no mention of this and will likely contract out the work to a large national or multi-national developer who has little to no interest in the quality of the work or the local area.

**Attached documents:**

**Comment:** MM42 - LPMM18/4441  **Respondent:** David Banham 17321089  **Agent:**

**ML27, MM41, MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, predominantly at peak times, causing increased noise, nitrogen dioxide pollution, delays and gridlock. Should you not think this is a problem I would invite you to recreate a commute from Send during rush hour times. I would not feel comfortable cycling with my children on the local roads should the proposed developments go ahead as the narrow roads, currently with no special provisions or lanes for cycling, will become too busy and dangerous to consider risking the lives of my children.

**Attached documents:**

**Comment:** MM42 - LPMM18/1110  **Respondent:** Gail Wicks 17328641  **Agent:**

**MM42 Land at Burnt Common, London Road, Send, Policy No. A 58**

This policy was taken out of the 2014 plan and has since been re-inserted and the area has been increased twice from 7000 sq metres to 14,800 sq metres.

Slyfield has unused capacity so there is no need to have a new industrial site on the Green Belt. It also contradicts MM9 because there are no special circumstances.

Send Business Centre in Tannery Lane is being increased by 25% yet the Employment Land Needs Assessment showed a reduction in demand for industrial land. This is a huge concentration in Send with no proven demand.

Also yet again the narrow surrounding roads with be gridlocked and the pollution, which is already high, will be increased.

**Attached documents:**

**Comment:** MM42 - LPMM18/1114  **Respondent:** Gail Wicks 17328641  **Agent:**

**MM27, MM41, MM42 and MM48 Transport Strategy**

Guildford Borough Council want to implement changes to the A3 with a slip road south at Burnt Common/Clandon. This does not take into account the massive impact on Send Barns Lane and Send Road as thousands more cars and lorries etc
head to Woking every day from the added nearby sites including Wisley and Gosden Hill. This will mean increased pollution, noise, delays and gridlock on these already busy roads. The rush hour will be intolerable as it is now when there is a problem on the A3 or M25.

Attached documents:

Comment: MM42 - LPMM18/3970  Respondent: Andrew Hollis 17329025  Agent:

MM42 Burnt Common Industrial Site.

The increase in this site from 7000 sq metres to 14800 sq metres is intolerable. There is unused space at Slyfield so why does Send have to have a massive industrial site in the village. The traffic from cars, lorries etc will be impractical on the present road system. The Send Business Centre has increased by 25% and there is a new Marina in Tannery Lane, Send.

Attached documents:

Comment: MM42 - LPMM18/3975  Respondent: Andrew Hollis 17329025  Agent:

MM27,MM41,MM42 and MM48 Transport Strategy

Most traffic will use the existing roads, which already in the rush hour when there is a problem with the A3 or M25 or where there are road works, causes huge hold ups this will be a continuous traffic jam if the new developments go ahead

S2 Revision of Housing Need

The Statistics office states that Guildford can achieve its housing need with 460 houses per year. and the consultancy firm, Barton Willmore states that growth can be achieved with 431 houses per year. Yet Guildford Borough Council and the Inspectorate are intending to plan for 789 houses per year. This figure must be looked at again and reduced in line with the latest growth figures.

Attached documents:

Comment: MM42 - LPMM18/2289  Respondent: T Hodkinson 17370209  Agent:

MM42/Policy A58 Land at Burnt Common

This modification is an absolute catastrophe. It's impact cannot be overstated. The traffic noise and pollution will transform the enviroment of Send.

I OBJECT to the new allocation of a further 7800 sq m of Industrial or warehousing space on this site.

This is a massive over allocation of land in the Green Belt for B1c, B2 and B8 usage.

Attached documents:
Comment: MM42 - LPMM18/2292  Respondent: T Hodkinson 17370209  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

Opening new entry/exit slip roads off the A3 will overload Send Village, Send Barns Lane and Send Road with unacceptable levels of vehicular traffic, a lot of it HGV. The road network is unsuitable for this level of traffic and will give rise to unacceptable levels of pollution of all types. I therefore OBJECT.

Attached documents:

Comment: MM42 - LPMM18/4791  Respondent: Nicola Banham 17380161  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

- Since being deleted from the 2014 plan this has been increased twice, doubling the area.
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
- Traffic on our surrounding roads will significantly increase especially during peak times when the majority of vehicles will be using the roads leading to gridlocked. Additionally nitrogen dioxide levels are already dangerous and the additional disproportionate pollution form a large increase in vehicles in rush hour traffic will only degrade the air quality further.
- With may local trades in the area, they could be used to assist and in turn put something back into the local area but the plans makes no mention of this and will likely contract out the work to a large national or multi national developer who has little to no interest in the quality of the work or the local area.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, predominantly at peak times, causing increased noise, nitrogen dioxide pollution, delays and gridlock. Should you not think this is a problem I would invite you to recreate a commute from Send during rush hour times. I would not feel comfortable cycling with my children on the local roads should the proposed developments go ahead as the narrow roads, currently with no special provisions or lanes for cycling, will become too busy and dangerous to consider risking the lives of my children

Comment: MM42 - LPMM18/5706  Respondent: Madeleine Stevens 17381601  Agent:
I object to MM42 - Policy A58 at Burnt Common. I do not see why an industrial development is required when there are empty sites and industrial units at Slyfield and in Guildford especially when the Employment Land Needs Assessment showed a reduction in demand for industrial land. This is on top of the increase in Send.

Attached documents:

**Comment:** MM42 - LPMM18/5816  **Respondent:** Stuart Adair 17400641  **Agent:**

MM42 Land at Burnt Common, London Road, Send, Policy A58

Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has subsequently been increased twice, with double the area now proposed. This is not acceptable.
- This is by far the largest new industrial allocation in any village in the borough.
- There is no need to put new industrial sites in the Green Belt, whilst Slyfield has unused capacity.
- There are no special circumstances so it also contradicts MM9.
- The Employment Land Needs Assessment showed a reduction in demand for industrial land.
- There is no proven demand it has to be here and this is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village.
- The roads are not built for large vehicles, the current A roads through send is too narrow for two lorries to pass at normal speed or mounting the curb to go onto the footpath adjacent to the road.
- Nitrogen dioxide levels are already dangerous.

Attached documents:

**Comment:** MM42 - LPMM18/5825  **Respondent:** Stuart Adair 17400641  **Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick's Arch, Burnt Common, Clockbarn and Alderton's added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. Guildford Borough Council offer no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

**Comment:** MM42 - LPMM18/4144  **Respondent:** Jill Thomas 17408225  **Agent:**

MM42 Land at Burnt Common

The proposals for industrial use is the largest allocation in any village in the borough. There is already a Business Centre at Tannery Lane Send. There is no demand and therefore no need to allocate land on Green Belt for industrial use at this location when more appropriate land is available at Slyfield. The local roads are inadequate for heavy traffic and industrial vehicles will add to the pollution.
I OBJECT TO MM42 Land at Burnt Common, London Road, Send, Policy A58

This has already been objected to and removed from the 2014 Local Plan, and nothing has since changed to justify this building in the middle of the Green Belt, not least when there are vacant sites at Slyfield and Guildford industrial parks. There are no special circumstances so this is in contradiction to MM9.

In particular the 2017 Employment Land Need Assessment shows the demand for industrial land in the borough is only 3.9 hectares, so it is beyond ridiculous to suggest creating over 10 hectares in the middle of Send, especially in the Green Belt, which will cause gridlock in small surrounding roads. It is further incredibly deceptive to AGAIN change the wording of this policy from what was a maximum of 7,000 sq m to minimum of 7,000 sq m and then to a minimum of 14,800 sq m, more than doubling the initial proposal. There is no need for such an increase in scale here when Send Business Centre is already seeing a 25% increase. What evidence is there of demand for this?

I OBJECT TO MM27, MM41, MM42 and MM48 Transport Strategy

As alluded to above, traffic in the area of Send is already at dangerous levels for the environment and health of individuals, most notably at peak time when it's often already at gridlock. It is ridiculous to consider adding thousands more cars to this chaos, which would result in significant noise and nitrogen dioxide pollution, which increases significantly with queuing traffic. This will significantly impact the time it takes me and other local residents to travel to work or school, which is not productive for the local economy, our well-being or the environment.

MM42 Land at Burnt Common, London Road, Send, Policy A58

Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

Since being deleted from the 2014 plan this has been increased twice, doubling the area despite objections to its inclusion originally.

It is by far the largest new industrial allocation in any village in the borough.

There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity.
There are no special circumstances so it also contradicts MM9. The Employment Land Needs Assessment showed a reduction in demand for industrial land.

This is in addition to the 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.

The road though Send to Woking is narrow, residential with tight bends towards Old Woking. This road has seen several serious accidents, and is gridlocked regularly from Broadmeads through Send towards Burnt Common several times a month with current usage.

Nitrogen dioxide levels are already dangerous in what is a highly residential area, recent press coverage implied that maintaining air quality for its constituents was very important to Surrey County Council and local councils. *Guildford Borough Council Air Quality Strategy – 2017* /Surrey County Council Air Quality Strategy (2016)

**Attached documents:**

**Comment:** MM42 - LPMM18/5085  **Respondent:** Paul Good 17417217  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock, as already stated in previous points. This area is unable to support increased residential traffic and is unsuitable for heavy commercial traffic.

In conclusion, development of this scale in this rural village will be detrimental to the character of this living space, and impact hugely on residents, there is **insufficient consideration of the enormous size of development being placed in one small area of the constituency**, as opposed to spacing out development, which would ease traffic overloading, decrease the escalating problem of pollution, share the increased strain on services; education, health.

I urge the planners to take these objections in to consideration and listen to the observations regarding these plans from the people who live and work in these areas and see each day how the infrastructure is completely inappropriate to support such huge development in squeezed into one small area of the borough.

**Attached documents:**

**Comment:** MM42 - LPMM18/4247  **Respondent:** Valerie Golding 17422881  **Agent:**

**MM42 LAND AT BURNT COMMON LONDON ROAD POLICY A58**

**I OBJECT TO THE POLICY MM42 Land at Burnt Common because:** this site is located within the green belt yet the council are proposing to double their last proposal, the site was deleted from the 2014 Local Plan due to objections yet put back into the 2016 Plan this current proposal looks too increase the development to 14800 square metres of warehouse or industrial units over 50% more than that proposed in the 2016 Local Plan. There is currently no requirement for more industrial units. Guildford and Slyfield currently have empty sites and there is a decline in the demand for such sites, the 2017 employment land need assessment shows a reduction in demand to 3.9 hectares for the whole borough, yet the council are proposing to destroy 10 hectares of Sends GREEN BELT for unnecessary units putting even more
pressure on the local roads and adding to the development along the A3 corridor totally against the GREEN BELT policy.

**MM27 MM41 MM42 and MM48 Transport Strategy**

The amount of development proposed will bring major traffic problems to the area most properties have a minimum of two cars so the developments proposed would add another 1540 cars to the roads of Send. This excludes the development proposed for the surrounding area.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/2529  **Respondent:** Simon Wright 17423681  **Agent:**

Policy A58 Land at Burnt Common (Modification MM42)

I object to modifications MM42 Land at Burnt Common due to the following points:

There is no requirement for new (and certainly not increased) industrial or warehouse space as there is ample availability at Slyfield and Guildford Industrial estates, developing in this way is pure stupidity and is just building for the sake of it.

Additionally, this site is in the Green Belt, there are no exceptional circumstances to justify development here.

This proposal completely contradicts the statement MM9 makes.

According to the latest Employment Land Needs Assessment there is a reduction in demand for industrial land in the whole borough. Everywhere you look around the borough there are empty industrial buildings! Again…pure stupidity.

Generally transport evidence for this policy is incomplete and unreliable. What would happen in reality would be serious accidents, major traffic jams twice a day and therefore excessive pollution.

Any extra traffic would cause traffic chaos in the local area with its small roads, adding commercial vehicles to this would be completely unsustainable.

After this site was deleted from the 2014 Local Plan due to massive objections, it has now been re introduced and doubled in size, farcical, especially on top of a 25% increase in size of Send Business Centre. This results in an excessive concentration in this village than any other in the borough. And there’s no requirement for it!

**Attached documents:**

---

**Comment:** MM42 - LPMM18/2534  **Respondent:** Simon Wright 17423681  **Agent:**

I object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn’t cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.

**Attached documents:**

---
The proposed increase from 7000 to a minimum of 14,800 sq m of industrial and storage space is completely illogical because:

- There is no need to put new industrial sites in the Green Belt when there is unused capacity at Slyfield
- The Employment Land Needs Assessment showed a reduction in the demand for industrial land
- There are no special circumstances, so there is a contradiction with MM9

Additionally this development would place yet another significant load on the infrastructure within Send on top of the proposed 25% increase at Send Business Centre and every other residential development proposed. Send roads will be gridlocked, pollution levels will increase and become higher than the dangerous levels already recorded.

Attached documents:

The proposed Garlicks Arch, Alderton’s Farm, Clock Barn and Winds Ridge developments mean that 770 houses are proposed to be added to the current stock of 1700 currently in Send – an increase of 45%. This in itself is excessive and disproportionate in the context of Send’s size within the Borough. Send needs to be treated fairly and it currently seems as though the village is being singled out for development by the plan.

However, the huge increase in traffic that these developments, the industrial developments that are proposed in Send and the large developments at Gosden Hill and potentially Wisley/Ockham are not adequately addressed by the modifications referenced above.

A full assessment of the changes resulting from the proposed access on and off the A3 from Clandon Road has not been completed. At present residents of Clandon Road may wait more than 5 minutes to leave their drives during commuting periods. Would I ever be able to leave for work if these developments proceeded? The scale of development proposed in Send and Burnt Common, the limited capacity of local roads and the proposed introduction of new access to the A3 will be catastrophic for the local area and the Borough as a whole.

I most strongly urge the Council to rethink the Local Plan, stand up to central government if the planning policies for England are not appropriate for Guidford, and to provide a just and reasonable outcome for its citizens.

Attached documents:

The Employment Lands Needs Assessment showed a reduction in demand for Industrial Land.
This plan was deleted in 2014 plans, however this has subsequently been increased TWICE from 7000 to a MINIMUM of 14,800sqm! Therefore why is Send been given this HUGE increase when there is NO NEED and it will make Send the village with the largest industrial allocation of any village in the borough! WHY when Slyfield which is sufficiently close by and is this not being increased – it has unused capacity!

There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9. There is no need to put Industrial premises in our precious GREEN BELT. Surrounding roads will be further gridlocked causing an increase in already high Nitrogen Dioxide levels!

**MM27, MM41, MM42, and MM48 - Transport Strategy.**

This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents, trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane. I have witnessed this personally and it continues to get worse and this over development of Send will only exacerbate this.

This massive increase in traffic rat running to and from Woking along Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

**Attached documents:**
MM42 Land at Burnt Common, London Road, Policy A58: I object to the Policy A58 change for the following reasons: - It was deleted from the 2014 draft as a direct result of the huge number of objections made previously - The parameters of allocation of land for industrial or warehousing use has increased twice, doubling the proposed area - Slyfield and Guildford still have empty sites and units. There is no need for this development in the middle of Green Belt land - The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for the whole borough. An allocation of 10+ hectares just at Send in Green Belt land is utterly unnecessary - The increase in heavy traffic would cause gridlock on local roads, and an increase in air pollution and danger to local residents and children

Attached documents:

2. MM42 Land at Burnt Common, London Road, Send, Policy A58
• Increased from 7000 sq m to a minimum of 14,800 sq m of industrial and storage
• Since being deleted from the 2014 plan this has been increased twice, doubling the area.
• It is by far the largest new industrial allocation in any village in the borough
• There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9.
• The Employment Land Needs Assessment showed a reduction in demand for industrial land.
• This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand.
• Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous.

Attached documents:

5. MM27 MM41 MM42 and MM48 Transport Strategy
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockharn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

MM42 Land at Burnt Common, London Road Send, Policy A58

I object at the proposal now to double the original area proposed especially in view of the increased capacity at the Send Business Centre and the spare capacity at Slyfield in Guildford. This will also generate additional traffic consisting of vans and larger vehicles which will all travel through the narrow and as stated earlier the already busy and congested roads of Send and Ripley. This will add to further congestion and noise and air pollution.
It seems to make far more common sense which people fail to use to centralise and develop Slyfield Industrial Estate where there is already the existing infrastructure and also spare capacity.

Common sense appears to be missing once again in the council with the failure to use what is already there to be used and developed.

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

**Attached documents:**

---

**Comment: MM42 - LPMM18/2787  Respondent: B Lockie 17604577  Agent:**

**MM42 Land at Burnt Common, London Road, Send, Policy A58**

- This proposal was deleted from the 2014 plan. Not only is it reinstated but has now increased from 7000 sq m to 14,800 sq m.
- The speed and frequency of traffic coming off the A3 would make this very dangerous
- With the congestion on local road a problem anyway, along with any extra housing, this would further magnify the problem
- No other village in the borough has been allocated such a vast increase in industrial sites
- There is no conceivable need to put this proposed industrial site on Greenbelt land when Slyfied has unused room to increase its capacity and the better road structure to accommodate it.
- There seem to be no special circumstances to contradict MM9
- The ELNA showed a reduction in demand for industrial land not more need
- Send Business Centre is proposing a 25% increase: this plus the proposed industrial unit at Burnt Common would make a concentration in Send that is much higher than other villages with no proof that the demand for this is needed.
- The Portsmouth Road, Send Road and the very short distance of London Road are the only main roads in the area and these are often congested. Our other ‘roads’ are largely one track lanes. The use of this site for industrial use would mean blocking local roads. Even ideas of building another junction to the A3 would not alleviate traffic on local roads, particularly when the A3 is gridlocked (which has happened several times in the past few weeks.)
- Pollution from this extra heavy goods lorries would further increase the already high nitrogen dioxide levels.

**Attached documents:**

---

**Comment: MM42 - LPMM18/2792  Respondent: B Lockie 17604577  Agent:**
**MM27, MM41, MM42, MM48 Transport Strategy**

- Not only are there implications for Send from the proposed developments at Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s but there are also knock-on effects with the proposals for Gosden Farm: the proposed Wisley/Ockham A3 and Clandon slip roads changes have not been properly assessed with thousands more vehicles crowding the areas and impacting on Send roads as well as traffic heading to Woking. Noise will increase along with pollution, delays and gridlock.

MM42 - LPMM18/105  Respondent: Chris Smith 20545313  Agent:

I would like to object to proposed changes in my village, Send. The reference numbers are MM41, MM42, MM44, MM9, MM27, MM41, MM42 and MM48. The proposed developments will constitute over development and the road infrastructure will not cope. The traffic around Send and Ripley is bad already. Much of the developments will be on Green Belt land.

Comment: MM42 - LPMM18/125  Respondent: Mrs Nicola Carol Brown 20546209  Agent:

MM42 Policy A58

I object to the increase in industrial and storage allocation. This is by far the largest new industrial allocation in any village in the borough and, indeed, is totally unnecessary in view of unused capacity at Slyfield. Moreover, the Employment Land Needs Assessment showed a reduction in demand for industrial land. This modification contradicts MM9 as there are no special circumstances to site this here in the Green Belt. Again, this would further exacerbate traffic problems to the surrounding roads.

Comment: MM42 - LPMM18/130  Respondent: Mrs Nicola Carol Brown 20546209  Agent:

MM37, MM41, MM42 and MM48

I am extremely concerned about the traffic implications arising from the proposed developments and it is hard to see that proposed changes to the A3 and Clandon slip roads would help. The huge increase to road use with resultant queues and pollution is of grave concern.

Comment: MM42 - LPMM18/356  Respondent: Mrs Suzanne Loggia 20550209  Agent:

As for MM42 at Burnt Common; do we really need more industrial sites in the green belt? when Slyfield has unused units and capacity!
I object to Land at Burnt Common London Road, policy A58

- The exit heading North from the A3 is one of the most dangerous exists, and you want to intentionally put more heavy goods traffic through it.
- They have double the allocation to 14,800 sq m and there is still lots of unused capacity at Slyfield?
- The impact on the surrounding roads will be immense and cause traffic gridlock.
- Nitrogen Dioxide levels are already at dangerous levels.
- It was deleted from the 2014 draft because of the amount of objections made.
- The word “minimum” is changed to the previous maximum in the 2016 plan.
- There is no need to build more industrial or warehouse development in the middle of the greenbelt when Slyfield and Guildford still have empty sites.

Attached documents:

---

Sadly, it does not end here. I would also like to object to the development of land on the Burnt Common site (Reference number MM42). The public opinions are well documented, yet the council has the audacity and believes it holds the right to increase the industrial and storage space to around 14,800 sqm. Building here makes no sense and contradicts MM9. Slyfield has the capacity and space for extra storage units, as well as having two major road networks linking it to Woking and the A3. Not only is the development not needed for this site but the Employment Land Needs Assessment has shown a reduction in the demand for industrial land.

Attached documents:

---

Not to mention all the other prospered plan such as MM44 & MM41/MM9/MM42/MM48

This was once a peaceful and picturesque little village that has slowly been eroded and destroyed by greedy and thoughtless developers

I have lived in send for 20 years and it is sickening and sad to see it being over developed

So I strongly object to the plans to specified above

Attached documents:

---

2019 of 2575
MM42 Land at Burnt Common, London Road, Send

This development seems to me unnecessary considering there is unused capacity at Slyfield. It is again Green Belt land and would put unnecessary strain on the local roads

Attached documents:

Comment: MM42 - LPMM18/238  Respondent: Miss E Frankland 20569633  Agent:

MM9 Green Belt policy and MM27 MM42 MM48 Transport Strategy

The Green Belt should be protected and preserved for future generations. Wild life and walkers alike need our greenbelt areas and over development of our villages devastating the rurality of the area. I do not wish to live in a town, choked by increased volume of traffic with reduced places to enjoy nature, peace and a walk with my family and dogs.

Comment: MM42 - LPMM18/295  Respondent: Linda Boardman 20579745  Agent:

It is obvious that with the above policies & strategies are still reflecting directly from what has gone before; amending & increasing on the Local Planning Foot Print. These changes are shown in shaving bits off here and adding bits to there.

These amendments: -

Still disregards all technical impacts on current & future structures. Most structures sit on a deep clay base which needs speculated ground water to function as a foundation base.

Tweaking weak infrastructures, no way puts in place any future proofed infrastructures.

Increasing these capacities will greatly increase all impacts on enviroment. Not all of which is yet to be fully understood or been considered.

Concreting over "Green Belt" is just not on, now or anytime in the future. We all complain about the forests in South America being cut down, along with plastic waste; this is no different.

The impact of such large developments, will swamp Send & all surrounding areas. If Wisley was a no no; then these proposals are doubly bad.

So what part of NO, does the current dominant political power not understand?

It seems as if the first judgement, common sense (Wisley) went against the current political-monied power houses. How strange that with a new judge conforms now to their wishes. How did all this happen?

Stop faffing about! Ask the local populous "What they want to happen by holding a Local Referendum." Just like Switzerland.

**MM27, MM41, MM42 and MM48 Transport Strategy**
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/405  Respondent: Mrs Lesley Peed 20589281  Agent:

MM42 Putting further industrial sites in the Green Belt contradicts MM9. As a resident of Send, I am very concerned by the proposal to put a minimum of 14,800 sq m of industrial and storage facilities and Burnt Common. Slyfield has unused capacity and the Employment Land Needs Assessment shows a reduction in demand for industrial land. This proposal would be on top of the 25% increase in Send Business Centre, giving Send a much larger concentration of industrial square footage than any other village. There is no proven demand for this.

Attached documents:

Comment: MM42 - LPMM18/424  Respondent: Mr Alex Beames 20602977  Agent:

I would propose that the already high Nitrogen dioxide levels will exceed permitted levels should this development take place. There is little to no consideration for anyone not able-bodied enough to walk or cycle in terms of transport and again displays a lack of thought in terms of how people will get to work there, let alone the further additional goods vehicle traffic through the villages of Ripley, Send and West Clandon. The A247 is only just wide enough for 2 cars to pass each other through parts of East Clandon, yet sees articulated vehicles regularly, surely you cannot be suggesting you wish to increase this? There is a major safety concern when the only way to pass is to mount a footpath and wait. East Clandon does not need it's road widening, there are parts that you couldn't even if you wanted to. What it needs is sensible planning when it comes to new traffic generation, this is not it.

Attached documents:

Comment: MM42 - LPMM18/585  Respondent: Mrs Kathy Mylet 20610209  Agent:

Narrow surrounding roads will become gridlocked leading to an increase in Nitrogen dioxide levels which are already very high. This site is by far the biggest new industrial site in any village in the borough. Slyfield has unused capacity so should be used first. Combined with the 25% increase at Send Business Centre means that Send will have a much bigger industrial concentration than any other village in the borough.

Attached documents:

Comment: MM42 - LPMM18/644  Respondent: Jane Harris 20622881  Agent:
MM42

Having already been deleted from the 2014 plan this has increased twice doubling the size of the area.

The size of this industrial development is far to large for a small village.

Why not put in Slyfield which has unused capacity rather than in green belt.

Where is the demand for this industrial development?

Already gridlocked local roads will become unuseable.

Attached documents:

Comment: MM42 - LPMM18/647  Respondent: Cam Pulham 20622913  Agent:

The doubling of the proposed industrial development at Burnt Common is yet to be a proven need especially as it is in a green belt area. We already have Slyfield, which has unused areas past the existing car dealerships that could be used as a better option. It would seem that the advertising for industrial units has shown that there is still current spare capacity. There is already a disproportionate level of commercial traffic in the Send Area due to the development at the Send Business centre which in itself is proposed to be expanded.

The access roads in the area are already restrictive in terms of width and would suffer with any further development.

Attached documents:

Comment: MM42 - LPMM18/652  Respondent: Cam Pulham 20622913  Agent:

MM27, MM41, MM42 and MM48

This strategy, although considering the access onto the A3, does not consider the impact on local roads. As it is, these roads are already heavily congested and leads to poor air quality for residents. The slips roads may well be an improvement, but it is not offset by the proposed changes listed elsewhere.

These roads are not policed for speed and residents are already subjected to high noise levels through speeding traffic and high speed motorcycles. The congestion may also lead to an increase in accidents and a further slowing down to the response time of emergency vehicles.

Attached documents:

Comment: MM42 - LPMM18/659  Respondent: Elsa Pulham 20623329  Agent:

MM42
Sly field has sufficient capacity to absorb this in an already commercial area and should be used instead of in a rural area where the roads will suffer. This is especially true of the Send Business Centre where the local roads are already overused and unsuitable.

Attached documents:

Comment: MM42 - LPMM18/664  Respondent: Elsa Pulham 20623329  Agent:

MM27, MM41, MM42, MM48

The planned road strategy, which allows for more and safer access onto the A3, will only serve to cause more congestion on local roads which are already overloaded at peak times. As these roads are rarely policed, this already leads to speeding and pollution to local residents.

Attached documents:

Comment: MM42 - LPMM18/671  Respondent: Stephen Harnor 20624417  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

Since being deleted from the 2014 plan this has been increased twice, doubling the area

It is by far the largest new industrial allocation in any village in the borough

There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9

The Employment Land Needs Assessment showed a reduction in demand for industrial land

This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand

Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous

Attached documents:

Comment: MM42 - LPMM18/676  Respondent: Stephen Harnor 20624417  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.
Comment: MM42 - LPMM18/692  
**Respondent:** Mr and Mrs Joyce 20625505  
**Agent:**

To the planning decision makers

Really!!!!

There is truly no need to increase industrial/storage facilities in our local vicinity.

In and around Surrey there so many units standing empty many of those more closely located nearer to transport links for workers employed by such companies that would likely inhabit such facilities.

**Attached documents:**

Comment: MM42 - LPMM18/697  
**Respondent:** Alastair Graham 20625825  
**Agent:**

**MM42 Burnt Common**

The proposal to increase the land at Burnt Common, London Road, Send from 7,000 to 14,800 sq.m. of industrial and storage space is an excessively large burden of industrial space for the village of Send to have to bear. There is no evidence of the need to such a large area of industrial space in Send, and if the UK leaves the EU as a result of Brexit, demand for industrial space is actually likely to fall very significantly due to the reduction in the UK’s exports to Britain’s largest market, the EU. Therefore the allocation of even 7,000 sq ft of industrial space to Send should be reduced, not increased to 14,800 sq.ft. The village does not need additional employment opportunities, it also does not need the increase in pollution from heavy goods vehicles, it does not need increased traffic congestion.

**Attached documents:**

Comment: MM42 - LPMM18/701  
**Respondent:** The Clandon Society (Eric Palmer) 20626273  
**Agent:**

The Clandon Society is the Residents’ Association of the villages of East and West Clandon.

The Association is restricting its comments in this consultation to matters which could directly affect our residents.

The Association is very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Association expressed its concerns in the strongest terms, pointing out the inadequacies of the road. The major modifications now proposed to the Plan will bring additional pressure on this road.

The Association welcomes the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 (MM48) and the amount of development proposed in the area nearby. (MM41. MM42. MM44. MM35.) However, residents are of the view that the provision of £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the likely traffic.

**Attached documents:**
Residents do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available, if indeed it is technically feasible.

We believe that in a few years time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs when traffic diverts because of congestion on the A3. This was pointed out in detail in previous submissions by the Association, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint but this is not a unique problem viz. the widening of the Boxgrove Road bridge. It is already the intention to build a station next to the Merrow Lane bridge.

The £1 million funding could with advantage be used to make the A247 safer.

**Why do we believe that traffic will increase significantly?**

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic. (MM42).
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247. (MM41).
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh. (MM44).
4. The development of 1800 houses at Gosden Hill. (MM35).
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. (A43a). The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247-potentially an easier route than any existing.
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic- presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

**Problems with the West Clandon section of the A247**

The Association reiterates its belief that the A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 S-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump
4. The site lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and in places the narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

Attached documents:

**Comment: MM42 - LPMM18/727  Respondent: Christina Reeves 20634753  Agent:**

MM42 Land at Burnt Common, London Road, Send, Policy A58

This plan has been increased twice since 2014.

This is the largest industrial development in any village in the borough. Slyfield has empty units – why not use these instead?

The roads around Burnt Common are narrow and extra vehicles will cause gridlock, plus lots of extra pollution (it’s already at a dangerous level).

There is not enough parking around the garage (mini Waitrose) as it is.

Attached documents:

**Comment: MM42 - LPMM18/732  Respondent: Christina Reeves 20634753  Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for the above proposed developments added to nearby Gosden Hill, Wisley and Ockham have not been properly addressed by the A3 changes and the Clandon slip roads. Guildford Borough Council offer no proper assessment of the combined traffic on Send Barns Lane and Send Road when hundreds more cars use the roads every day, causing more pollution, noise, delays and gridlock.

Attached documents:

**Comment: MM42 - LPMM18/740  Respondent: Mr. David Minnett 20636033  Agent:**

MM42

The intended plan for a minimum 14,800 sq m of industrial and storage sites, again on Green Belt land in Send is unfounded and scandalous. Deleted from the 2014 plan, this is now over double its previous size and is unnecessary as demand for industrial land locally is proven to be in decline. The road network to feed this plan is currently inadequate and will necessitate future road widening. The residents of Send do not want this.
Regarding MM42; proposed 14800 sq m of industrial and storage; there is no need for this ugly planning! Slyfield has unused capacity and various assessments showed a reduction in demand for industrial land. May i stress again narrow surrounding roads will be grid locked and nitrogen dioxide levels increasing to dangerous levels!

Secondly I object to the MM42 plans to place an industrial and travelers site on the land. We already have a nearby industrial site; Slyfield which still has unused capacity. Why would you waste time building an unnecessary industrial site, which would only increase the pollution in the area as explained above and contradict the MM9 Green Belt policy.

I did not object to the initial smaller planned development of this land. However since 2014 the proposed development has doubled in size after previously being deleted. There is absolutely no need for a development of this size when Slyfield has unused capacity and Send Business Centre is being expanded. The Employment Land Needs Assessment showed a reduction in the need for industrial land. Once again a development not needed adding to congestion and pollution destroying our communities. Send is being disproportionately targeted for over development whilst contradicting MM9. I strongly object to MM42

I object to MM42 Land at Burnt Common, London Road, Send, Policy A58 because:-

*Previous objections meant this proposal was deleted from an earlier draft. It was only Re-inserted in time for the public examination in July.

*This is Green Belt contradicting Policy MM9.
*The roads in and out of this area, especially Send Cross Roads, already jam up readily.

*The proposed additional homes at Garlicks Arch, Clockbarn and Winds Ridge total 650. Together with these proposed additional 120 homes, that is 770 more homes in this small village. NO WAY CAN OUR EXISTING INFRASTRUCTURE SUSTAIN SUCH AN INCREASE.

Attached documents:

**Comment:** MM42 - LPMM18/815  **Respondent:** Clive Sewter 20642081  **Agent:**

I object to MM27 MM41 MM42 and MM48 Transport Strategy because:-

Currently, heavy traffic from the A3 already heads up to Woking through Send and even small roadworks cause major traffic jams, particularly at rush hour. This will be exacerbated when the proposed changes to the A3 improvements take place. With the extra industrial and housing developments in the areas mentioned above, Send will become regularly gridlocked.

Attached documents:
Main Modification 42

The Parish Council objects to the increase in the minimum floorspace at Burnt Common warehouse. The Parish Council is concerned about the open-endedness of the industrial allocation at Burnt Common. The allocation is insufficiently precise, and the consequences to the settlements and their infrastructure cannot be measured. Further, the uncertainty about the quantity of development makes good place-making, and consideration of complementary land uses, more difficult.

Particular concern relates to the ingress and egress of commercial and other traffic from the site. The existing junction of Portsmouth Road with the A3 slip road is presently extremely dangerous, even with limited traffic movement. A complete redesign of this junction should be made a specific requirement if you are minded to include the site.

The Parish Council welcomes the acknowledgement, in the addition of wording at MM42, of the argument that Burnt Common warehouse is poorly related as a site to both the existing built form of Send and the services provided by it. The proposed wording begins to address this by seeking clarity over the provision of transport infrastructure at this site.

Whilst criteria (a) is fairly clear, (b) and (c) are not. There is no question in the Parish Council’s view, that non-vehicular connections to the village, Garlick’s Arch* and Clandon are necessary if any strides are to be taken towards sustainability and integration. The inclusion of ‘proportionate’ implies that necessary mitigation may not be provided in full by the developer, which raises the prospect of full mitigation not being achieved; indeed the risk that no mitigation occurs because of the absence of all of the funding required to achieve it is a distinct possibility. The Parish Council is concerned at the lack of certainty presented in the plan regarding this and would seek further clarification. It is noted that Appendix C contains no modifications in respect of this.

Criteria (c) is vague. The wording is open to interpretation. It is not clear which ‘otherwise adverse material impacts on communities and the environment’ the plan has in mind and therefore provides no certainty to the developer or the community, and no basis for the Council to assess the extent of contribution (necessary and proportionate or not) that may be required.

*Criteria (0b) should include reference to links to Garlick’s Arch and not Burnt Common warehouse. This would be consistent with MM41, reflecting the need for links between Garlick’s Arch and Burnt Common warehouse.

Attached documents:

Comment: MM42 - LPMM18/853  Respondent: Send Parish Council (Send Parish Council) 20644225  Agent: Tibbalds Planning and Urban Design (Richard Crutchley)

Traffic implications of additional development introduced by the Main Modifications

At present the Parish Council is working with Surrey Police, Surrey County Council Highways and the local school and medical centre on Send Barns Lane to develop options to deal with the significant highway problems (speeding, volume, parking, pedestrian / cyclist safety) in the village. The A247 is presently a very busy road and this should be considered before local plan allocations are brought forward.

Send Parish are unclear on the cumulative traffic implications of the concentrations of development being proposed by MM41, MM42 and MM44. It is noted that the landowner at Garlick Arch considers that there are benefits to be had from the slip roads in terms of the impact upon the A247, particularly in respect of southbound movements. It is not clear where this southbound traffic is redistributed to. The benefits to Ripley are evident as traffic is redirected to the Burnt Common junction; the benefits to Send seem intuitively less apparent.

Additional housing at Garlick’s Arch (MM41) and a new site at Alderton’s Farm (MM44) cause further concern. It is not clear whether the impacts of an open ended industrial allocation at Burnt Common (MM42) have been factored into this
traffic assessment, or indeed whether other smaller housing allocations and the traffic expected of the expanded Strategic Industrial Location at Tannery Lane within Send have been modelled. Notwithstanding some new references to transport strategy at Garlick’s Arch and Burnt Common warehouse, the absence of alternatives to the car bring into question the overall strategy and approach to the parish.

The Sustainability Appraisal raises this directly; it recommends that clarification be made regarding the risk of severe traffic congestion in Send (para 10.4.6) without really explaining how this fear arises (beyond the extent of development proposed) and without a clear indication of where the recommendation has been actioned within the plan or the plan-making process.

Work must be undertaken to determine the additional cumulative highway impacts of all the development in the parish (on all roads infrastructure), having regard to the overuse of the existing road infrastructure.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/924  **Respondent:** Duncan Speight 20654049  **Agent:**

I am writing to you to object to the planning inspectors report relating to the development of Send Village and the surrounding area, in particular MM41, MM42, MM44 and the related impact on the Green belt covered under MM9 and the transport strategy that impacts the above sites and site MM27.

Upon reading the outputs from the latest report it would appear that rather than listening to and addressing local residents’ concerns raised in the previous consultation periods you have just ignored those and continued to drive the plans forwards. In addition, GBC has significantly increasing the sizes of the Garlicks Arch development, doubled the industrial and storage development in Burnt Common and reinstated the Alderton’s Farm development which was previously deleted due to previous objections.

I would also seriously question that accuracy of the Public Examination figures (Policy S2) for Guildford Borough Housing, recommending 789 houses are built each per year. Reviewing the Barton Wilmore figures (suggesting 431 houses a year) and the ONS population forecasts suggesting the development of 460 houses a year across the borough. These well-respected authors reports suggest the need for new houses in this specific part of GBC has been significantly overinflated

The plans GBC lays out in the report do not support the policy for the protection of the Green Belt. Furthermore, the subjective test proposed puts the Green Belt at considerable risk and negates Green Belt protection. This means any land on the edge of the village could be picked off for future development. This point is clearly of serious concern to local residents

Send Village and the surrounding area already suffers from significant traffic congestion. Traffic on the local roads is gridlocked in busy periods. It is clear from the plans that the suggested remedies do not adequately address the significant increases in traffic we will see if these developments are allowed to go ahead. In particular, Send Barns Lane, Send Road and Broadmead Road will not cope with the increased traffic heading in and out of Woking every day. Not only will the increases in traffic cause significant delays but will also impact residents with increased noise and nitrogen dioxide pollution levels.

As the people that live and experience the local area every day we are well positioned to provide an accurate point of view on the impact developments of this size will undoubtedly have on the area. On that basis I hope you give this issue the time and attention it deserves.

**Attached documents:**
Comment: MM42 - LPMM18/965  Respondent: Mr Tom Holwell 20658625  Agent:

MM42 Burnt Common. Why is there a need for further industrial and storage sites in the area when there is unused capacity at Slyfield Green, a purpose built industrial estate away from houses and where expansion should be focused. It should be noted that Send has already increased its business centre by 25% with no proven demand.

Attached documents:

Comment: MM42 - LPMM18/980  Respondent: Carmen Niblett 20658817  Agent:

MM42 Land at Burnt Common Policy A58 This was I believe deleted form the 2014 plan yet now it has been increased twice and therefore has doubled the area.

Please explain how this increase can be allowed

I would like to be informed as to why "unused capacity of the industrial land at Slyfield is not being used in the first instance and only when that is fulfilled, Send can be considered".

Attached documents:

Comment: MM42 - LPMM18/984  Respondent: Carmen Niblett 20658817  Agent:

MM27 MM41 MM42 MM48 Transport Strategy

The traffic implications for Send of the extra traffic generated by Garlick's Arch, Burnt Common, Clockbarn and Alderton's will have a totally detrimental effect in the area which already is over used by traffic from A3 and Clandon and Woking commuters.

GBC is offering solutions on paper but for the last 20 years of people and car growth in that area has been ignored by GBC.

I have lived in the Send area for 35 years and I can categorically confirm that nothing has changed in that time, except for the replacement of the bridge at the end of Send Road, which now permits higher number of articulated lorries to travel along the Send Road to Ripley, the A3 and Clandon (as the old bridge couldn't cope before with the weight or width of these lorries).

This increase traffic through Send put children, vulnerable people and adults at risk of accidents when crossing the road to either go to school or to the shops or for a walk.

The traffic on the Send Barns Lane and Send Road are usually at a stand still, especially at key times, when children are walking to school. Air pollution is a terrible danger to our children and we should be minimising this risk instead of adding thousands of more cars to our roads.

I would request that you supply details that show you are being fair and reasonable to all village councils in the Guildford Borough in a form that shows existing number of houses in that area and the number of new applications (as a total number of houses) and express this as a percentage %.

This would then show that the GBC are being fair across the whole county. Instead it will show that GBC are being totally unfair and overburdening SEND village with their insistence in putting all their "eggs" in SEND's basket.
Comment: MM42 - LPMM18/991  Respondent: Mrs E.E. Wheatley 20659073  Agent:

MM42 Policy A58 Objections

A) No need for further industrial development space already available at Slyfields. Why use Green Belt Land?
B) Contradiction of MM9 with no special circumstances sited.
C) Road capacity will not cope and air pollution will be a dangerous hazard.

Comment: MM42 - LPMM18/996  Respondent: Mrs E.E. Wheatley 20659073  Agent:

Objections.
A) Traffic implications are horrendous
B) No assessment apparently of the impact locally of gridlock, delay, noise, air pollution and general anger and frustration of local residents. Do we get any consideration from [unreadable text]

Comment: MM42 - LPMM18/1049  Respondent: Theresa Gianotti 20663393  Agent:

MM42

- There can be no justification for another industrial site in the Green Belt when Slyfield has spare capacity;
- The traffic at peak times on narrow surrounding roads will come to a standstill; and
- Nitrogen dioxide levels in our area are already dangerous.

Comment: MM42 - LPMM18/1053  Respondent: Theresa Gianotti 20663393  Agent:

MM27 MM41 MM42 and MM48
• Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads; and
• No proper assessment of the traffic impact with thousands more cars in the area every day adding to increased pollution, noise, delays and gridlock.

Attached documents:

Comment: MM42 - LPMM18/1094  Respondent: Marc Lippiett 20664481  Agent:

Objection to MM42 (land at Burnt Common, policy A58)

- The proposed size of the industrial estate is disproportionate to the size of the village and would have significant negative impact on the Green Belt (and there are no special circumstances that support this, especially as there is capacity at Slyfield)
- The increased traffic in the area would exceed the capacity of the infrastructure and further compound existing traffic congestion in all directions

Attached documents:

Comment: MM42 - LPMM18/1097  Respondent: Marc Lippiett 20664481  Agent:

MM27, MM41, MM42, MM48 - Transport Strategy

- Traffic congestion is a significant issue in the area (Send, Ripley and Woking) and there are currently significant delays caused every day on the way to school and work. The current plans do not provided clarity on how these critical issues will be avoided.
- Supposing that the traffic congestion issue can be mitigated in an acceptable way, there will be no avoiding the noise and air pollution and associated impact on the quality of life for local residents

Attached documents:

Comment: MM42 - LPMM18/1267  Respondent: Alstair Haxton 20676417  Agent:

MM42 Land at Burnt Common, Policy A58

The Employment Land Needs Assessment show the need for industrial land has reduced, as shown by unused industrial sites at Slyfield, and combined with a 25% increase at Send Business Centre, it makes this type of development unnecessary. With Send Business Centre it makes a concentrated increase in Send village which is not proposed in any other village and causes an excessive increase in traffic.

It is also on Green Belt land

Attached documents:
MM27, MM41, MM42, MM48 Transport Strategy

The excessive increase in cars with resulting extensive delays, gridlock, noise and nitrous dioxide pollution have not been properly assessed.

Attached documents:

Comment: MM42 - LPMM18/1699  Respondent: Mr Alan Sussex 20687457  Agent:

MM42 Land at Burnt Common London Rd, Send Policy A58

The area of land proposed for this development has been increase twice since the 2014 plan.

Any further increase is outrageous within the Green Belt, when there is unused land at Slyfield.

Attached documents:

Comment: MM42 - LPMM18/2630  Respondent: Mrs Molly Ness 20687489  Agent:

MM42. An industrial site on GREEN BELT - what idiot thought of that one? It would the biggest industrial allocation in any village in the borough (where the ELNA showed there is a reduction in demand for industrial land). It also contravenes MM9

Attached documents:

Comment: MM42 - LPMM18/2399  Respondent: Mrs Eleanor Ayers 20688481  Agent:

MM42

This industrial area has been doubled even though there is unused capacity at Slyfield. It will cause airpollution and road congestion.

Attached documents:

Comment: MM42 - LPMM18/1358  Respondent: Alicia Pigram 20689441  Agent:

I OBJECT to MM42, the proposal for 14,800 sq m of industrial and storage space to land at Burnt Common, London Road. This has now doubled in size after the original 7000 sq m proposal was deleted from the 2014 plan. With Slyfield
having unused capacity, there is no need to lose green belt land to new industrial sites. This also contradicts the MM9 Green Belt Policy as there are no special circumstances. The increase in traffic on surrounding roads will cause gridlocks and increases in nitrogen dioxide levels, having a detrimental effect on the health of the local community.

Attached documents:

**Comment:** MM42 - LPMM18/1375  **Respondent:** Mrs Alison Warne 20689665  **Agent:**

Despite all the previous objections to the last version of the plan, the Council have now proposed doubling the size of this development, and say there is scope for a larger amount of floorspace if needed.

Slyfield has spare capacity which should be used instead of this development.

Such extensive development will have a negative visual impact on the area.

The area of Send and Ripley cannot cope with the additional commercial/HGV traffic that will be brought to the area. It already becomes gridlocked whenever there is the slightest problem on the A3.

There are no special circumstances which merit the contravention of the Green Belt Policy MM9.

Attached documents:

**Comment:** MM42 - LPMM18/1384  **Respondent:** Mrs Christine Mote 20689729  **Agent:**

Why choose this site when there is currently unused capacity at Slyfield. The current road layout is inadequate for such an increase and from an economic perspective is this proposed site even viable. It's on the edge of a small village surrounded by green belt and clearly contradicts MM9 as there are no special circumstances to indicate the need for such a large commercial site.

Attached documents:

**Comment:** MM42 - LPMM18/3035  **Respondent:** Mr Martin Threakall 20689761  **Agent:**

MM42 Land at Burnt Common, Send, Policy A58

I object to this increase from 7000 to a minimum of 14,800 sq m of industrial and storage space.

This is by far the largest new industrial allocation in the borough, and is being built on to Green Belt land. Again this is appalling given there is unused capacity at other sites like Slyfield. I can see no special circumstances for this, suggesting it is against MM9. From a commercial stand point it is confusing at best; this modification is on top of the 25% increase at Send Business Centre, meaning there is a significant concentration of increased industrial space in the village of Send, and yet it is unclear where the demand for this will come. I see "To Let" signs daily outside of the commercial/industrial space in Send and it seems this increase in capacity will just add to the problem.

MM27, MM41, MM42 and MM48 Transport Policy
I object to these; I do not believe that the traffic implications for the various Send sites (Garlick's Arch, Burnt Common, Clockbarn and Alderton's) are adequately addressed by the A3 changes and local slip roads. There will be a very significant increase in traffic along Send Barns Lane and Send Road with thousands of additional cars likely to use these daily to go to and from Woking, a route that is already often blocked with traffic jams.

Attached documents:

Comment: MM42 - LPMM18/1452  Respondent: Lauren Stafford 20690977  Agent:

**MM42, Policy A58**

- Increased amount of Industry and storage – again – traffic will be a nightmare on those tiny roads

Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads. The increase in noise, pollution, delays and gridlock as cars drive through to Woking would be terrible. How can you let that happen past a PRIMARY SCHOOL?

Attached documents:

Comment: MM42 - LPMM18/1494  Respondent: Mrs Corinne Singleton 20692385  Agent:

I object to these plans as follows:

The proposal appears not to take into account when there is unused capacity at Slyfield. There are no special circumstances for this proposal and therefore contradicts MM9

Again it is not clear why this proposal has increased the site to be increased from the 2014 plan from 7000 to 14800 square feet?

Attached documents:

Comment: MM42 - LPMM18/3263  Respondent: Ms. (Ms Maria Schirmer) 20698529  Agent:

**MM42, Land at Burnt Common, London Road, Send Policy A58.**

There is no need for a new large industrial estate to be built (be it in Send or wherever) when Slyfield not only have unused capacity but have also said they are able and willing to expand. Any development, but especially one the size of 14,800sq m would result in an colossal increase in traffic, especially HGV's and larger vans with emissions that are already at high levels becoming even more dangerous.

There are NO SPECIAL CIRCUMSTANCES which would deem this develop necessary so it totally contradicts MM9 (also bearing in mind that the ELNA showed a reduction in need for industrial land, not an increase). Send business centre is increasing by 25%; sufficient development for a village the size of Send; we don't need more.
And again, it would appear that people who originally objected are being punished for their views as MM42 too is now marked for a development double the size of the original plans. Also why was this plan deleted from the 2014 plans and then reinstated, and in that process increased as much as it has?

Attached documents:

---

**Comment:** MM42 - LPMM18/3267  **Respondent:** Ms. (Ms Maria Schirmer) 20698529  **Agent:**

**MM27, MM41, MM42 and MM48 Transport Strategy,**

The roads in and around Send, Send Marsh, Ripley, Burnt Common etc are already running at capacity. They will not cope with the addition of what potentially would be hundreds if not thousands more cars; never mind the hugely negative impact on the environment; has this been considered?

This massive increase in traffic of all types of vehicles, not just cars, heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise and air pollution. Furthermore delays and gridlock are going to be worse than they already are.

Attached documents:

---

**Comment:** MM42 - LPMM18/1722  **Respondent:** Richard Duddy 20700801  **Agent:**

How are these proposals going to improve the already crowded roads and reduce the current high pollution levels, because certainly your transport strategy MM27, MM41, MM42 & MM48 does not deal with these issues.

Attached documents:

---

**Comment:** MM42 - LPMM18/2383  **Respondent:** Mrs Audrey Carpenter 20702561  **Agent:**

MM42 Burnt Common, Policy A58

Why do we need an industrial facility in a residential area when it could be sited on Slyfield Industrial Estate. This is on top of a 25% increase at Send Business when the Employment Land Needs Assessment showed a reduction in demand for industrial land. Again our roads will be gridlocked.

Attached documents:

---

**Comment:** MM42 - LPMM18/2387  **Respondent:** Mrs Audrey Carpenter 20702561  **Agent:**

MM27, MM41, MM42 and MM48 TRANSPORT STRATEGY
Has a proper assessment of the traffic impact on Send Barns Lane, Send Road been made as thousands of new cars head to Woking every day. Again causing increased noise, air pollution and delays. 

I hope the above points will be seriously taken into consideration.

Objection to MM42 Land around Burnt Common Warehouse, London Road, Send

Objector: [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

As a resident of Send Marsh, I object to the size of the proposed warehouse development at Burnt Common for the following reasons:

- The doubling of the size of this development is what I am objecting to. There is little evidence of the need to double the size of it given the other local business areas of the village are also increasing in size and are not fully utilised at the current time. Noted that this development is intended to be of the 'industrial' kind, however, there is also the large Slyfield development that is proposed. This could be considered over development.

- I also raise concerns about the type of traffic and vehicles that would be using the roads in the area. The small village roads are not suitable for increased numbers of heavy goods vehicles and trucks that would be linked to the industrial site proposal. The road system around Burnt Common are particularly difficult. Slow heavy vehicles meeting the fast traffic coming off the A3 would be hazardous. This needs to be considered.

Attached documents:

Comment: MM42 - LPMM18/1959  Respondent: kenneth harrington 20705153  Agent:

Why is this green belt area being targeted for industrial development? there must be enough brown field sites available like Slyfield with unused capacity.

Attached documents:

Comment: MM42 - LPMM18/2107  Respondent: Zach Drennan 20708481  Agent:

MM42 LAND AT BURNT COMMON, LONDON ROAD, SEND, POLICY A58

• I object to the proposal that an industrial unit to be developed in this area, and the failure to demonstrate need or benefit.
• I object to GBC proposing this development in the face of the Employment Land Needs Assessment showing a reduction in demand for industrial land. It is not desired nor justifiable.
• I object to GBC proposing building this site, without demonstrating special circumstances and contradicting MM9.
• I object to GBC proposing the development of industrial; sites in the Green Belt where there is unused capacity in Slyfield.
• I object that this proposal, coupled with 25% increase at Send Business Centre means there is a much bigger concentration of such land use with no proven demand, and is both disproportionate and unfair when comparing Send with other villages.

Attached documents:

Comment: MM42 - LPMM18/2113  Respondent: Zach Drennan 20708481  Agent:
MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM42 - LPMM18/2136  Respondent: Val Houghton 20710529  Agent:

MM42 The further development of this land with its restricted access will add to the local traffic problems already affecting the narrow A247. The short stretch of road from the Burnt Common roundabout to the bridge over the A3 is already almost continuous & becoming a health hazard.

Attached documents:

Comment: MM42 - LPMM18/2178  Respondent: Mary Hebberd 20712353  Agent:

I am writing to object toplannings for Send. Burnt Common is industrial and should not be housing.

Traffic is bad enough (mornings especially) through Send Road, Send Barns Lane onto A3.

We have lost 9 shops since I came to Send in 1963

Attached documents:

Comment: MM42 - LPMM18/2180  Respondent: Barry Konkle 20712385  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

I object to Industrial storage being increased from 7,000 to a minimum of 14,800 sq m. There is no need to put an industrial site on Green Belt land. While there are more empty sites at Slyfield. Yet again the local roads are not suitable for a large increase of commercial traffic. This also contradicts MM9.

Attached documents:

Comment: MM42 - LPMM18/2184  Respondent: Barry Konkle 20712385  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
I object. To GBC offering fine words, but no real assessment of the traffic impact in Send Barns Lane, Send Road. Vehicles heading to Woking and vehicle from Woking making their way Send and Ripley to gain access to the A3 both North and South bound.

Attached documents:

**Comment:** MM42 - LPMM18/2226  **Respondent:** Alan A. White 20720737  **Agent:**

**MM42 Land at Burnt Common Policy A58**

The majority of this land was, historically, Fogwills plant nursery and has never been industrial.

There is no requirement to create an industrial/warehousing use when Slyfield Estate has spare capacity.

There are no "special circumstances" especially when the Employment Land Needs Assessment shows a reduced requirement for industrial land as does the Office of National Statistics. **This therefore contradicts Policy MM9.**

The proposed expansion of this site to a minimum of 14,800sq.metres is in addition to the 25% increase at Send Business Centre and, yet again, the Employment Land Needs Assessment shows a reduced requirement.

The North Bound slip road of the A3 already takes "rat running" traffic which conflicts with the North and South bound traffic at the Burnt Common roundabout, most of which is attempting to access the A3 through Ripley village. Heavy Goods Vehicle movements in this immediate area will create nightmare congestion on, not only the A3, A247 Clndon Road and A247 Send Road. The local road network is not designed for such a volume of HGV traffic.

Attached documents:

**Comment:** MM42 - LPMM18/2230  **Respondent:** Alan A. White 20720737  **Agent:**

**MM27 MM41 MM42 MM48 Transport Strategy**.

Guildford B.C. have produced, what they call a Transport Strategy, without addressing the wider vehicle movement problems. The Leader of Guildford B.C has already acknowledged in public that the area has significant congestion and transport problems and yet still adds his name to policies that are clearly flawed.

The traffic on the North Bound A3 backs up from the M25 junction, "rat running" takes place off the Burnt Common exit and through Ripley village. This has not been referred to in any document.

The Southbound traffic backs up from Stag Hill to the Burpham Junction exit. This has not been reffered to in any document.

None of the roads surrounding Send were designed to take large volumes of traffic. They were and still are, in effect, village streets, despite their A road classification.

Burnt Common roundabout will be gridlocked by the increase in the number of vehicles, of commuters, school run drivers and the manoeuvring of HGV vehicles visiting the proposed new industrial site at Burnt Common, and the new units in Send Business Centre.

Emotionally this is a Transport Strategy for disaster.

I "object" in the strongest possible terms to the proposed developments on the above mentioned REF's for many and [unreadable text] reasons that have been waived before many thousands of [unreadable text] in the form of protest letters and emails that now seem to have been ignored.

At least 2 of the above mentioned sites are on Green Belt Land. What is the point of a Green Belt if you chose to ignore it.

The original purpose of the Green Belt was to prevent unrestricted development on and around the main road and rail amenities around London and at the large towns and cities. A very considerable policy of which until now it has been largely successful. This policy has seen to be abandoned by these proposals. Ripley state school is to be closed so where are all these new children supposed to go to school.

Send in particular seems to be singled out for such contained action. Why is this; is it because the Ripley, [unreadable text], East + West-Horsley they have had the courage to stand up to the bully boy tactics of GBC planning. Led by the inspiring leadership of Sue Parker and others in the 'Green Belt Group' these people are standing up to the G.B.C planning jugganaughts made up of "TORY + LIB-DEM [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] this unholy alliance of [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] characters seem to have no feelings for local concerns, but are hell-bent on making money and getting revenge on people who have the courage to stand up to them. I ask you to think again and reject these [unreadable text] proposals.

PS Is Send being so certainly [unreadable text] because Sue Porter is a Send Borough Councillor and Green Belt group leader and founder!!

Comment: MM42 - LPMM18/2349  Respondent: Sarah Stalley 20727361  Agent:

BURNT COMMON LONDON ROAD SEND MM42 POLICY A58

There is as far as I can see no real need whatsoever to put further industrial sites in Send.

IT HAS DOUBLED IN SIZE SINCE 2014 increased from 7000 to 14,800sqm the largest industrial allocation site in any village in the borough. The Green belt should not be seized for anything industrial or anything else especially as Slyfield has large unused capacity which could be facilitated. The infrastructure of Sends narrow lanes which makes Send rural life appealing would be clogged up with heavy goods vehicles lorries etc. Causing unnecessary anguish to Send residents + families causing huge traffic problems.

We would all like to keep our village unique + rural.

Attached documents:

Comment: MM42 - LPMM18/2354  Respondent: L Smith 20729793  Agent:

I object to: MM42 Land at Burnt Common, London Road, Send, Policy A58

• The increase in sq feet to a "minimum" of 14,800 of the industrial and storage proposal.
• This is despite this been deleted from the 2014 plan
• This is an excessive increase and is massive compared to any other village in the borough.
• Slyfield is underutilised and this proves beyond any doubt that there is no requirement to destroy a village with this development on a green belt site
• There are no "special circumstances" and thus it contradicts Policy MM9
• The Employment Land Needs Assessment has shown that there is in fact a reduction in the demand for industrial land in this area
• The roads around this area are narrow and the increase in industrial traffic would significantly raise the levels of Nitrogen Dioxide creating health problems in the area.

I object to: MM27, MM41, MM42 and MM48 Transport Strategy

• The impact of traffic for Send of Garlick's Arch, Burnt Common, Clockbarn and Alderton's added to the nearby Gosden Hill and Wisley/Ockham will not be adequately addressed by the A3 changes and the Clandon slip roads
• There has been no effective traffic impact assessment

The proposal to increase the land at Burnt Common, London Road, Send from 7,000 to 14,800 sq.m. of industrial and storage space is an excessively large burden of industrial space for the village of Send to have to bear. There is no evidence of the need to such a large area of industrial space in Send, and if the UK leaves the EU as a result of Brexit, demand for industrial space is actually likely to fall very significantly due to the reduction in the UK’s exports to Britain’s largest market, the EU. Therefore the allocation of even 7,000 sq ft of industrial space to Send should be reduced, not increased to 14,800 sq ft. The village does not need additional employment opportunities, it also does not need the increase in pollution from heavy goods vehicles, it does not need increased traffic congestion.

The proposal to increase the land at Burnt Common, London Road, Send from 7,000 to 14,800 sq.m. of industrial and storage space is an excessively large burden of industrial space for the village of Send to have to bear. The village does not need additional employment opportunities, it also does not need the increase in pollution from heavy goods vehicles, it does not need increased traffic congestion.

• It seems unfair to resurrect this idea given all the previous objections resulting in it being deleted from the 2014 plan
• With the increased uncertainty caused by Brexit there is an anticipated decline in demand for industrial land in the South East.
• The concentration in Send is more severe than any other part of the Guildford Borough. This seems unfair
• The industrial estate in Slyfield and in other parts of the borough have spare sites and excess capacity
• The 2017 Employment Land Need Assessment shows a reduction in demand to 3.9 hectares for industrial land for the whole borough not the proposed huge allocation of over 10 hectares at Send – and in the Green Belt
• Once again, the impact on congestion will be significant as will Nitrogen dioxide levels causing potential damage to health
**MM27, MM41, MM42 and MM48 Transport Strategy**

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

**Attached documents:**

---

**Comment: MM42 - LPMM18/2697  Respondent: Roger Parslow 20768001  Agent:**

My initial objection is to: MM41, MM42, MM44, MM9, MM27.

**POLICY S2.**

At the public examination the figure for Guildford, B.C. housing need used by the inspector was 789 per year. This figure was obtained by G.B.C. Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated.

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of G.B.C. consultants figures which have always been very suspect.

I trust the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.

**MM27, MM41, MM42 and MM48 Transport Strategy.**

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

**MM41 Land at Garlicks Arch, Send Marsh. Policy A43.**

I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.

This is an increase of 37% in the number of houses to be built.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking. This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

Up to a thousand cars and between 1600 to 1700 extra people will block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added?
MM42. Land at Burnt Common, London road Send Policy A58.
As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity. There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT. This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

MM44 Land at Aldertons Farm, Send Road, Policy A63.

New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY. With Garlicks Arch 550, Clockbarn 60, Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%

How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment. Again this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

MM9 GREEN BELT POLICY.
How can you say the modifications claim to protect our precious GREEN BELT except in very special circumstances? GBC make an exception for LIMITED INFILLING OUTSIDE THE IDENTIFIED SETTLEMENT BOUNDARIES WHERE IT CAN BE DEMONSTRATED THAT THE SITE SHOULD BE CONSIDERED TO BE WITHIN THE VILLAGE.

This is a catch all statement which is completely subjective causing complete uncertainty and completely negates GREEN BELT PROTECTION. Virtually any land on the then ever increasing edges of the village can be picked off by developers and is open season for speculators at the expense of villagers.

I wish the above objections to be considered and this huge imposition of housing and commercial development to be largely abandoned.

Attached documents:
MM42 Land at Burnt Common, London Road, Policy A58

I object to the doubling in size of the proposed industrial and storage development. I understand that the Employment Land Needs Assessment shows a reduction in demand for industrial land, so it is perverse to increase the provision. If, however, this development takes place and filled, the additional traffic through both Send and Ripley will cause congestion on a grand scale. In view of the fact that most goods vehicles are Diesel or petrol powered, this will increase pollution levels.

Attached documents:

Comment: MM42 - LPMM18/2985  Respondent: William Pyne 20773697  Agent:

MM27 MM41 MM42 AND MM48 Transport Strategy

Any plans involving developments in this area must take into consideration the huge developments now taking place in Woking, which will act as a magnet for vehicle traffic both to and from all surrounding areas. Residents of the new houses will inevitably want to take advantage of the new shopping and employment opportunities in Woking. Projects like Victoria Square and the St Dunstan's tower block, already well advanced, will generate traffic both into Woking and out to the Surrey countryside, and the A247 through Send towards Newwands Corner, and Dorking etc. This can only lead to greater traffic congestion.

MM42

The industrial allocation is too large for the villages

The area is green belt.

Slyfield nearby is underutilised.

Send Business Centre is also increasing, do both need to increase?

Roads will not cope with the additional industrial traffic

Attached documents:

Comment: MM42 - LPMM18/3081  Respondent: Heather Pennells 20775137  Agent:

MM27 MM41 MM42 MM48

The traffic implications on the local roads will result in excessive congestion as well as the local trunk roads
### Comment: MM42 - LPMM18/3108  **Respondent:** Harriet Doyle 20775585  **Agent:**

MM42 - Land at Burnt Common, London Road, Send, policy A58

I **object** to this on the following grounds:

- Area has doubled from previous expansion proposals
- No need for new industrial site when extra capacity at Slyfield is not used
- Will result in already busy narrow local roads being further gridlocked

### Comment: MM42 - LPMM18/3404  **Respondent:** Brian & Helene Pavey 20789921  **Agent:**

MM42: We do not need an industrial storage facility of 14,800 sq.m in the Green Belt when Slyfield is able to accommodate this through unused space., and this proposal contradicts MM9. This largest industrial site of any village within the borough will affect our small rural roads and lanes and increase traffic problems and nitrogen dioxide levels affecting the health of the village population.

MM27 MM41 MM42 MM48.: this proposal will impact negatively on the traffic within our village. We already have gridlocked roads when there is a problem on the A3, we have speeding cars, thundering lorries and traffic build ups. This village needs less traffic coming through it not more. In Potters Lane where we live it is a speed run for cars accessing the A3, with weekly aggressive road rage witnessed by us the residents. We do not need anymore traffic damaging our roads and putting lives at risk.

### Comment: MM42 - LPMM18/3412  **Respondent:** Sally Anderson 20790081  **Agent:**

MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has been increased twice, doubling the area
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous
Comment: MM42 - LPMM18/3421  Respondent: Sally Anderson 20790081  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Comment: MM42 - LPMM18/3430  Respondent: Paul Kenny 20790305  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58 Increased from 7000 to a minimum of 14,800 sq m of industrial and storage

- Since being deleted from the 2014 plan this has been increased twice, doubling the area. This is ridiculous.
- It is by far the largest new industrial allocation in any village in the borough
- There is no need to put new industrial sites in the Green Belt, when Slyfield has unused capacity. There are no special circumstances so it also contradicts MM9
- The Employment Land Needs Assessment showed a reduction in demand for industrial land
- This is on top of a 25% increase at Send Business Centre, making a much bigger concentration in Send than any other village with no proven demand
- Narrow surrounding roads will be gridlocked. Nitrogen dioxide levels are already dangerous. The roads around this area are already very busy.

Comment: MM42 - LPMM18/3435  Respondent: Paul Kenny 20790305  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.
I am writing to object to the over development of Send village in the proposed Local plan.

Our family have lived in Send for over 50 years. We, along with all residents of Send and the surrounding villages, will be negatively affected by the impacts of the development on the green space, transport system and the health and education provision.

The following specific objections relate to the following proposed developments

MM41 Garlicks Arch 550 homes

MM42 Burnt Common industrial and storage

MM44 Aldertons Farm 120 homes

1. The current proposed number of new homes is across all schemes is 770 compared the current number of 1700 homes in Send. This is a 45% increase and will massively change the nature and way of life in Send beyond all recognition and it will lose its village feel. In addition the developments that are being proposed will join Send to Send Marsh and Send Marsh to Ripley resulting in one large village removing the individual character.

2. The introduction of 770 new homes will result in an addition of up to 1500 cars on the roads of Send and Ripley. There are currently major delays and traffic queues through Send, Ripley and at all junctions at both morning and evening peak times which can extend throughout the day as soon as any road works are introduced in the local area. The addition of 1500 cars will cause the local roads to gridlock and increase the risk of accidents. This in turn will reduce the numbers of cyclists and pedestrians due to the pollution and increased risks of accidents.

The proposed Industrial and storage provision at Burnt Common will necessitate a large number of HGV vehicles passing through Send and Ripley. Even if there are proposed new roads and junctions to aid in this, without legal controls in place, companies will use the smaller roads as direct routes. In the event of problems on the main road network lorries would be diverted via the smaller roads -this is becoming and more and more frequent problem as the main road networks are becoming overwhelmed.

3. The Villages Medical centre already covers the villages of Send, Ripley , Clandon and surrounding areas and it can already take over 6 days to get an appointment to see a doctor. An increase number in excess of 2000 patients would make it impossible to get an appointment and would result is people being unable to see a doctor or having to present themselves at A&E as the only way to achieve a healthcare provision. This is totally unacceptable and would put people’s health and lives at risk.

4. The nearest secondary school is becoming increasingly oversubscribed from Guildford residents, leaving a reduced number of places for residents of Send. This is leading to a situation in a couple of year’s time when there will be no places allocated to children in Send. Provision of good quality school places to meet the current population requirements has been promised for years and is yet to be delivered. The planned increase in population will only add to this. The proposed number would require a new school to be built and established prior to any development to ensure provision was in place.

5. The necessary construction and infrastructure traffic required to construct these developments will have and major and lasting effect on the village, roads, trees and surroundings with pollution and damage to the roads. Even if promises on measures to avoid impact during construction are made they will be ignored once construction starts.
Although the proposed development in Send Hill is not included in the amendments, as residents of Orchard Way we would be negatively affected by the proposed development as follows.

- The proposed number of houses on the site is inappropriate for the size of the site.
- The increased traffic from the dwellings will overwhelm the road and the associated Junctions with impact on risk of accidents and delays.
- The construction traffic to build the dwellings will cause major disruption and permanent damage to the road and environment including damage to trees and hedges from the large delivery vehicles.
- There are already major problems with the main sewer drainage from properties in Orchard Way and Send Hills which will be compounded by the introduction of 40 new dwellings.
- The area identified is Green Belt and this must be maintained for future generations.
- The number of dwellings proposed would not allow space for sufficient and realistic parking allocations for a rural housing location leading to parking in Send Hill which is already a problem and further adds to delays in traffic and accident risks.
- The inclusion of Traveller pitches will have a detrimental effect on the areas for the following reasons.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

The Send Hill cannot accommodate the transport of mobile homes.

As with all proposals within the local plan they are based on providing the best option to housing developers by providing the largest number of dwellings in one block to maximise the opportunity for their profit.

The focus and responsibility of the council must be to meet the housing need in the most sympathetic and sustainable way and ensuring the villages are not lost under new towns and all character is lost. The local plan needs to be re-drafted under these terms and opportunity for small development identified that will fit within the villages and where the village can influence the development rather than the development have a major detrimental effect on the village.

**Comment: MM42 - LPMM18/3527  ** Respondent: Clive Stafford 20793121  ** Agent:**

MM42, Policy A58

- I strongly wish to object to this application.
- Increased amount of Industry and storage, my concerns reflect as above and below.

Attached documents:

**Comment: MM42 - LPMM18/3548  ** Respondent: Clive Stafford 20793121  ** Agent:**

MM27, MM41, MM42 and MM48

- I strongly wish to object to this application.
- As with the critical points I have raised above, the traffic implications are not adequately addressed. The area is already over subscribed, and by putting this proposal forward, just highlights the lack of consideration and research conducted. You Are diverting and huge percentage increase of traffic, past a Primary School?
10. MM42 / Burnt Common Industrial Site is hugely disproportionate for this rural area and should not have been expanded beyond its original 7500 sq m.

Please note the above objections are only the primary ones and there are many smaller ones too.

Whilst I commend many resident focused initiatives of GBC, the ongoing development plans for the area in which we live would be clearly detrimental.

The village of Send simply could not cope with the increased development planned. Already we experience significant daily traffic jams due to the link between Send and Woking and routes to the A3 / M25. We live in Burnt Common with children attending the local Send CoE Primary School. Just that short route is incredibly busy.

Specifically, it seems the objections previously made because of increased traffic, demand on the only primary school, demand on the single medical centre and a disregard of Green Belt have been ignored. Instead the number of homes at Garlicks Arch (MM41) has further increased.

In addition there is no clear rationale / demand for more industrial space at Burnt Common (MM42). This plan has doubled in size when To Let signs at Slyfield and elsewhere suggests there is little need. This is in addition to 25% increase of similar purpose land at Send Business Centre.

The Employment Land Needs Assessment showed a reduction in demand for industrial land so why has the industrial and storage required doubled since the 2014 plan? There are no special circumstances for this development on Green Belt land, it contradicts Green Belt Policy MM9. Also, there is still land at Slyfield that could be used for this purpose.
The implications of the extra traffic through Send Barns Lane and Send Road have not been adequately addressed. At present, during peak times, these roads do not adequately support the volume of traffic.

**Comment:** MM42 - LPMM18/4150  **Respondent:** Nicolas and Judith Ware 20808161  **Agent:**

**MM42 – Burnt Common (policy A58)**

This was originally proposed to be a modest development, was then increased (to a minimum figure), and has now expanded hugely to a minimum of 14,800 square feet

I do not agree with the labelling of this site as being ‘strategically’ important

It is GREEN BELT land, and I oppose the re-drawing of GREEN BELT lines simply to suit this proposal

There are no apparent ‘special circumstances’ to warrant insetting this site from the GREEN BELT

Other sites in the borough have unused capacity, and other ‘brownfield sites’ should firstly be fully considered and identified

We have already witnessed increased commercial development (Send Business Centre, Vision Engineering) in the village

There is no apparent or proven demand for extra industrial land in the village

The road infrastructure is unsuitable, as the road accessing the site is in disrepair (cracks regularly) and cannot cope with existing traffic, let alone more

Vehicles leaving the site would have to cross onto the north-bound A3 slip road, which is fast-moving and has been the scene of many accidents in the recent past, some fatal.

The likely increase in traffic and noise would be inappropriate for a site bordering on residential areas on the roundabout

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

The proposal to create a 4-way junction off the nearby A3 (policy A43a) is a waste of money and would only increase traffic noise and pollution through the villages

Therefore I OBJECT to this development and the proposed modification

**Attached documents:**
The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley)

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’)

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane)

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane)

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages

Comment: MM42 - LPMM18/4864  Respondent: Anna-Louise Clough 20833537  Agent:

MM42 Land at Burnt Common, London Road, Send, Policy A58

- There is no proven demand for this.
- Being doubled in size of area from original plan is not necessary when Slyfield has unused capacity, this will also bring more large Diesel vehicles into the area, giving air pollution.
- There is currently a reduced need for Industrial areas according to latest research.
- Increased traffic cannot be managed by the village, causing potential gridlock and accidents.

Attached documents:

Comment: MM42 - LPMM18/4873  Respondent: Anna-Louise Clough 20833537  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

- No recognised assessment has taken place for increased volume of traffic, noise and air pollution.
**Comment:** MM42 - LPMM18/4900  **Respondent:** Nicholas Brown 20834593  **Agent:**

**MM42 Land at Burnt Common, London Road Send, Policy A58**

I object at the proposal now to double the original area proposed; especially in view of the increased capacity at the Send Business Centre and the spare capacity at Slyfield Industrial Estate.

This will also generate additional traffic consisting of vans and larger vehicles which will all travel through the narrow and already busy roads of Send and Ripley. The same reasons already stated in the previous sections are the same. This area already has traffic congestions and will add to further congestion, noise and air pollution.

It will bring safety concerns for local residents and pedestrians in the village who will be using the local recreation ground and need to cross the road.

It will be better to centralise and develop Slyfield Industrial Estate where there is already existing infrastructure and spare capacity.

**Attached documents:**

---

**Comment:** MM42 - LPMM18/4919  **Respondent:** Nicholas Brown 20834593  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry. There are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

**Comment:** MM42 - LPMM18/4989  **Respondent:** Alison Johnson 20836225  **Agent:**

Objection to development on Site MM42 Land at Burnt Common, London Road, Send Policy A58

I object to the increase of land for industrial use at this site which is totally unrealistic in a village setting and will increase the traffic and nitrogen dioxide levels in the area. There are no proven demands for this development when the Slyfield site is under used and this will destroy the Green Belt.
MM42 – Land at Burnt Common, London Road, Send, Policy A58

- I strongly object to the proposed increase from 7,000 to a minimum of 14,800 sq. m of industrial and storage on this site, which was deleted from the 2014 plan because of the number of objections and has since been increased twice.
- There is no evidence that a new industrial site of the proposed size is either required or necessary (the Employment Land Needs Assessment showed a reduction in demand) and, if there was any local requirement for increased industrial and storage facilities, there is more than adequate capacity at the Slyfield industrial site.
- Once again, the land proposed for this unnecessary development is in the Green Belt whereas the Slyfield industrial estate is not. There are no special circumstances warranting an industrial site in the Green Belt and so this also contradicts MM9.
- The proposed increase in industrial and storage capacity in addition to the 25% increase at Send Business Centre will create a much larger concentration of industrial and storage facilities in Send than in any other village. Is this really appropriate for a Green Belt village?
- Once again, the concentration of traffic this will generate at both the morning and evening rush hour periods, as well as the continual flow of delivery vans in and out of the storage facilities is unimaginable, but will certainly end up in gridlock at peak periods. With the exception of the old Portsmouth Road, the rest of the infrastructure required has to be carved out of village roads!
- The resulting effect on Nitrogen Dioxide levels will be horrific and the present members of the Council will rightly be held to account for allowing this in due course.

Comment: MM42 - LPMM18/5119  Respondent: Richard Smith 20841889  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

- I strongly object to the proposed transport strategy, which contains fine words but no solution to the traffic chaos that will result as a consequence of the proposed developments at Garlicks Arch, Burnt Common, Clockbarn and Alderton’s Farm together with Wisley/Ockham and Gosden Hill.
- The existing M25 junction is unable to cope with current demands and needs to be redeveloped just to satisfy this demand. The proposed redevelopment will resolve the existing problem only and is very unlikely to be sufficient to meet the demands created by the proposed developments listed above in aggregate.
- The A3 already backs up to the Clandon slip roads during the rush hour due to the lack of a ring road or other credible alternative for traffic travelling through Guildford. The Portsmouth Road passing through the historic and beautiful village of Ripley is already a nightmare to join or cross during the rush hour due to the number of cars using the old A3 through Ripley as a work around for the congestion on the A3 backing up from the M25 and the number of cars using the village roads to provide a link between Woking and Guildford already. The proposals will simply make these problems worse by adding more traffic than the proposed Transport Strategy will solve.
- The significant increase in traffic will impact greatly on Send Barns Lane, Send Road, Ripley High Street, causing considerable delays, excessive pollution and gridlock. The suggested improvements will condemn the local population and many other travellers to months, if not years, of misery while they are being implemented,
all to meet a demand which appears to be the invention of local politicians seeking to increase their fiefdom and unsustainable Government policies on immigration.

MM43 - Hornhatch Farm, Chilworth. As set out in MM2 above the much lower projection of housing needs removes the necessity to bite into the Green Belt and the development of this site.

**Attached documents:**

---

**Comment:** MM43 - LPMM18/1946  **Respondent:** Mrs Fiona Curtis 8570273  **Agent:** Mrs Fiona Curtis

This land is currently on the edge of the AONB and is within Green Belt and outside the settlement boundary. It is critical in preventing urban sprawl from Guildford into the AONB. The differentiation between Shalford and Guildford is fragile and these fields are critical in ensuring that Shalford retains its identity and that Chilworth does the same. This is a critical incursion into very precious open space. It affects views into and out of the AONB and is not a suitable site. This land has not featured in any previous public consultation and therefore is unsuitable for inclusion at this stage

**Attached documents:**

---

**Comment:** MM43 - LPMM18/1213  **Respondent:** Burpham Neighbourhood Forum (Jim Allen) 8581505  **Agent:**

**Policy A62 /A63 /A64 new sites**

Aside from being located in the Green Belt, these policies make no mention of infrastructure requirements such as roads and sewer capacity on any site or the specific requirement to provide meaningful upgrades to the existing infrastructure.

3. **Rows A61 – A64**

We note all these sites are further releases of Green Belt land rather than finding increased capacity in urban areas. The additional capacity is akin to one year supply (672) not five (3,360).

**Attached documents:**
I am writing to comment on the Sites Summary Table – Ref A62 – 80 homes at Hornhatch Farm, Chilworth, and related Policy number A62.

I imagine that I am wasting my time protesting yet again about the inappropriate nature of further construction in Chilworth, since you have ignored previous criticisms.

However, it needs to be said again, that this planned site will add to the already heavy congestion in Chilworth village and on Christmas Hill, particularly at peak times, both in rush hours and at school start and finishing times. Already, there are long delays in driving from Chilworth to the junction at Christmas Hill, and then further delays heading on Christmas Hill towards Shalford.

Further, the amount of traffic rushing back and forward, at speeds far in excess of 30mph, from Chilworth Village past my home in Pine View Close at the Albury end of Chilworth, is ever-increasing, noisy and careless of residents’ safety. I can only imagine that 80 more homes will add around 160 more cars making repeated journeys along this road.

Your ‘Key Considerations’ in Policy A62 do not even include traffic control and congestion. At the very least you might add that. We already need a roundabout at the junction of New Road and Christmas Hill, and there must be some form of improved speed control along New Road and Dorking Road through to the eastern end of Chilworth village. However, even with these, the proposal will complete the change of our village into a suburb of Guildford, and the road through the village will become even more like a Guildford by-pass.

Attached documents:

---

Given the prospect of lower housing need, there is no need for this site to be added to the Plan, and it should remain green.

Attached documents:

---

POLICY A62: Hornhatch Farm, land adjoining New Road, Chilworth

Proposed Early Housing development of 80 new houses

This Green Belt site consists of agricultural land within the area of Shalford Parish Council and close to the boundary of Waverley District. The proposed housing site would be visible from the nationally important countryside of the Surrey Hills Area of Outstanding Natural Beauty (AONB) and an Area of Great Landscape Value (AGL V) at the Chantries. It forms part of the Tillingbourne Greensand Valley which is described in the Guildford Landscape Character Assessment (GLCA) as a valley which provides a transport corridor with the railway and the A248 running along the flood plain from East to West through the largely linear development of the village of Chilworth. The GLCA which was published in 2007 refers to "continuing traffic congestion" and the need to "retain the character of the individual settlements avoiding merging these through dense linear development along roads." Anyone familiar with Chilworth will be well aware of the congestion at Rice's Corner at the junction to the West of the village of the A248 and the B2128 from Wonersh which occurs regularly at peak traffic periods throughout the day.
An application made for 30 houses to be built at this site in 2013 was refused largely on the grounds of unsustainability. It must be pointed out that both bus and rail services to and from Chilworth offer a very limited service. Most residents of the village rely on the car for transport. Walking to the station from the new larger development proposed would take 20 minutes each morning and evening as it is located at the other end of the village, or even a longer time to Shalford station which is still further away. There is no adequate parking at Chilworth station.

Owing to the traffic bottleneck which forms at Rice's Corner and the subsequent congestion on the A248 to Guildford, many car drivers seek to use Blacksmith and Halfpenny Lanes as a quicker "rat run" route to reach the county town each morning and evening. This causes a safety concern and objection in the Chilworth community at Blacksmith Lane within the area of St Martha's PC and for residents with in the adjoining GBC Holy Trinity ward to the North. These rural single track lanes are categorised as "D" because they are so narrow and sinuous, and Halfpenny Lane is sunken for much of its length. A weight restriction applies to vehicles over 7.5 tons which is not always observed. The GCLA refers to the desirability of restricting traffic flow along sunken lanes of this type which run up to the North from the Tillingbourne Valley. It is worth noting that the North Downs Way National Trail crosses Halfpenny Lane near a particularly dangerous corner. An extract from the GCLA states "Conserve the rural roads and sunken lanes minimising small-scale incremental change such as signage, fencing or improvements to the road network which would change their character".

Going back to before 2004 the Chilworth community were assured by the Surrey County Council (SCC) that a proposal was being considered to put in a roundabout at Rice's Corner junction between the A248 and the 82128 to reduce traffic congestion and to allow priority to be given to traffic on the A248. In June 2004 the Local Committee considered this proposal from the Tyting Society but it was rejected as too expensive owing to the need to relocate a number of utility and other services at Rice's Corner. The minor road improvements made subsequently did not significantly reduce the traffic congestion problem which has increased steadily to this day. The current prospect of 80 additional new houses being built at Hornhatch Farm is daunting when one considers the car traffic that this would generate. The community will suffer if this proposal proceeds further against the united opposition of the PCs at Albury, Blackheath, St Martha's, Shalford, and Wonersh. Moreover, we have to recognise that the housing development at Cranleigh and Dunsfold, which appears to have been approved by Waverley Council, will in addition cause further major congestion problems on all the relevant A roads and force additional traffic onto minor country roads and lanes that are already unable to cope with the vehicles that seek ways around trouble spots.

It should therefore not surprise anyone if there is objection to this development proposal which seems to have been added at a late stage and has little to endorse it.

**Comment: MM43 - LPMM18/2404  Respondent: Shalford Parish Council (Nuala Livesey) 8627201  Agent:**

**M43 POLICY A62 Allocation of land at Hornhatch Farm for approximately 80 homes**

SPC opposes this allocation, because of concerns which it explains in this response. Some of these are well known to GBC, since the Council has opposed similar proposals in its responses to a planning application for 30 houses on part of the current site (13/P/00206) and to several consultations during the development of the draft Plan. Councillors have been told that the Inspector knows of all previous objections and that they should not be repeated in this consultation. However, we know that although the increase in the number of new homes is required by the Inspector, the decision about the choice of additional sites on which to build them has been made by GBC. It seems to SPC therefore that it must still be open to GBC to review its decision on the Hornhatch site, and we set out our concerns in the rest of this response.

Attached documents:
1 Loss of Green Belt land and further extension of Chilworth settlement boundary.

The Hornhatch site consists of red-rated Green Belt land, is adjacent to the AGLV and is in close proximity to the Surrey Hills AONB. It is likely that under a pending review much of the nearby AGLV, including Chinthurst Hill, will be included in an extended AONB. In addition, the Sustainability Appraisal Report Addendum (‘SARA’) notes that it is adjacent to Wonersh Common:

‘which while not designated as an SNCI is designated common land, potentially indicating a degree of biodiversity value’ (p.58).

SPC appreciates that all but one of the new Green Belt sites are red-rated, but it appears that Hornhatch is situated nearer to an AONB than are any of the other sites. At present the undeveloped farmland forms part of a visual link between the hills of the Chantries to the north and the area of Blackheath to the south. The surrounding fields and streams provide a valuable wild-life site, and are part of the undeveloped countryside which separates the villages of Shalford and Wonersh. We note that the requirements and key considerations for Hornhatch set out in Policy 62A recognise the significance of this site.

We note from SARA’s assessment of the other Green Belt sites under consideration that it is important for the remaining GB land to retain strong and defensible boundaries. Unfortunately, this does not appear to be the case with the Hornhatch site, which, once developed, would seem to invite further development over the fields surrounding it – on the grounds that future sites are ‘just outside the settlement boundary’.

A final reason for SPC’s concern about the use of these Green Belt sites relates to the predicted decline in population growth and the hope that this will prompt GBC and the Inspectorate to reconsider the targets for provision of new homes (see comment on MM2 above). Against this background, it seems particularly inappropriate to prioritise the use of Green Belt land during the first five years, with the risk that a drop in demand may make the later development of brown-field sites unattractive to developers.

2 Capacity and deliverability of site

The question of whether the site can accommodate approximately 80 homes is of course a matter for the developer and GBC’s planning team, who must be aware of the limitations of the site noted in the earlier application for residential development (P/13/ 00206). We understand that the layout of any development will have to accommodate the underground gas pipe which runs through the whole of the site (along a line parallel with the back boundary of Tillingbourne School’s playing field and then diagonally across the rest of the site). It appears that it would not be possible to build over this pipe, and in consequence an open strip of land would have to be left above the route of the pipe across the whole estate. This is obviously a technical matter for the experts, but it is a matter of concern for SPC because the lack of a defensible boundary to the adjoining Green Belt suggests that there could be a risk of the site being extended to cover any shortfall in the allotted quota of new homes.

We note that SARA (p.15) considers that the site could be delivered in full within the first five years, but to SPC the underground gas-pipe, coupled with the low-lying level of the site, the near-by streams and the apparent presence of wells on the site all combine to raise questions about its timely delivery.

3 Sustainability of site

Having assessed the site against the criteria for sustainability, SARA (p15) comments that Hornhatch ‘performs well relative to other village Green Belt sites’ under consideration’. The SPC can understand that on paper this may appear correct (the site ‘ticks the boxes’ on matters such as railway stations and GP surgeries), but we know that the reality on the ground is different.

Our principal concerns about the sustainability of an 80-home estate on this site relate to

A - pressure on limited facilities
B - volume and congestion of traffic on local roads

A Pressure on limited facilities

Facilities in Chilworth are limited to: a railway station (which we consider later in this response), a post office, a small convenience store, and two schools - the Church of England Infant School and Tillingbourne Junior School. Residents have to travel out of the village for work, for anything beyond basic shopping, to secondary schools and sixth-form colleges, and to access medical services.

SPC is not aware of any current pressure on places at the schools in Chilworth, but it is likely that the proposed development could create much greater demand.

Proximity to a GP surgery is clearly an important factor in the assessment of sustainability, and SARA notes the Wonersh practice as satisfying this requirement for the Hornhatch site. However, this surgery is already heavily used by residents from a wide catchment area, which apparently now extends as far as Cranleigh. The practice is under real pressure, and has to operate a telephone diagnosis system before offering appointments. It seems most unlikely that it would be able to take on the extra number of residents from an 80-home estate, and at present this is one of SPC’s major concerns about the proposed development.

B Volume and congestion of traffic

The proposed site lies along the A248, and its entrance and exit would be located on this road. The A248 already carries a heavy and increasing volume of traffic, resulting from:

- use by through traffic (including HGVs) as part of a route to by-pass Guildford on journeys between the A31 and A3 in the west and the A25 in the east
- growth in the volume of through traffic from the south (along the B2128 which joins the A248 at the Rice’s Corner junction), which will continue to increase with major residential developments in the Borough of Waverley
- residential developments in Chilworth – during the last few years, more than 40 new homes have been built in the village; most of these provide parking spaces for two cars, which add to traffic on A248.

This volume of traffic on the A248 results in considerable congestion at peak times:

- at the Rice’s Corner junction, where traffic on the A248 has to give way to traffic entering and leaving the B2128, with resulting tailbacks through Chilworth village
- through Shalford on Kings Road and the approach to the A281
- through the length of Chilworth village - a linear village lying along the A248 (known as New Road in Shalford Parish and as Dorking Road in St Martha Parish). New Road is particularly narrow, and congestion is increased by residents’ need to park cars on both sides of New Road, in the absence of off-road parking. Congestion is further increased in term-time by cars delivering and collecting children from the two schools in the village
- through the centre of Albury and on the approach to the A25

The proposed estate at Hornhatch would inevitably create further traffic and congestion on the A248. These days most families require parking space for at least two cars, and a conservative estimate suggests that well over 100 cars could be joining the A248 at peak times.

SPC knows from SARA (p.32) that a key point in assessing a site’s sustainability is:

ability to access key destinations – i.e. services/facilities and employment – via walking, cycling and public transport (or via short car journeys).

Public transport for residents in Chilworth consists of a limited train service and an even more limited bus service.

Trains Although Chilworth station is on the Reading-Redhill line, which provides access to destinations such as Guildford, Dorking and Gatwick:
• service from Chilworth in both directions is limited (one train an hour at peak times, dropping to one every two hours at off-peak)
• the station is at the opposite end of village from the Hornhatch site – an approximate distance of 1.2 miles (or just short of 2 km) – and on the far side of the level-crossing over A248 -which itself causes traffic delays and congestion
• the walk to the station is not attractive for pedestrians –on narrow pavements broken by side turnings from which traffic enters the main road
• cyclists have to make their way along the road between traffic and parked cars – there is no cycle path and only a few cycle racks at Chilworth station.

Shalford station is within walking and cycling distance of Hornhatch, but offers the same limited service. The journey could also be made by car, thus adding to the parking problems in Shalford.

**Buses**
A limited service between Guildford and Dorking runs along New Road: once an hour Mon-Sat; at 2-hour intervals on Sunday; last bus of every day at approx. 7.00pm. The only other buses serving Chilworth are: one a day to a secondary school in Guildford; one a day to Cranleigh and one a week to Godalming.

**This level of public transport means that present – and future – residents of Chilworth are almost entirely dependent on travel by car.**

**Mitigating Impact on the community**

The proposed development, with its resulting traffic problems and pressure on Wonersh surgery, would have an adverse effect not only on our residents but also on many people living in the neighbouring parishes of Albury, St Martha and Wonersh.

We note (SAAR p.33) that GBC has:

confidence in the ability to suitably avoid or mitigate effects …. through the development management process.

**Accordingly SPC ends this response with a list of the measures it considers would be required to mitigate the effects of the proposed development.**

The two most important requirements are:

- Traffic management scheme for Rice’s Corner junction – to include appropriate provision / priority for pedestrians and cyclists, including those using the Downs Link which crosses the Cranleigh Road c100m south of the junction
- additional provision for medical services, either at the Wonersh surgery or elsewhere in the Chilworth area

Improved facilities for pedestrians and cyclists, with aim of reducing car dependency in Chilworth - to include:

- upgraded footway and cycle path between Shalford and Rices Corner, leading to crossing on A 248 adjacent to Hornhatch site
- pedestrian and cyclist crossing point on A248 between Hornhatch and St Thomas’ church (at present there is no crossing anywhere along this road )
- consideration of new footway and cycle route through western part of Chilworth – possibly beside railway line along existing path between Hornhatch Lane and Old Manor Lane
- additional cycle racks at Chilworth and Shalford stations
- Bus shelters at nearest bus stops on New Road (both sides)
- Electric vehicle charging points for each property / roadside electric vehicle charging points for any properties without off-street parking

In addition, SPC considers that plans for the estate must include:
• A mix of housing across the whole development that is appropriate to the needs of local people i.e predominantly two and three bed properties with perhaps a small number of four bed properties
• the full 40% quota of affordable housing, providing a predominance of rented accommodation - GBC must not be persuaded to accept any payment in lieu;
• play and exercise facilities – either within the estate or in the surrounding area – if possible, to include a multi-use games area (MUGA)

Attached documents:

Comment: MM43 - LPMM18/25  Respondent: Mr Tom Brook 8678753  Agent:

In 2013 planning application 13/P/00206 regarding consideration for 30 residential dwellings on part of the same land identified in MM43/A62 in the local plan was refused as (summarised):

-Outside of any identified settlement area [ref: National Planning Policy Framework paras 87 - 89]
-encroachment into the countryside which would have a detrimental impact on the openness of the Green Belt and is against the aim of preventing urban sprawl. [ref: National Planning Policy Framework paras 79 - 80]
-30 dwellings represent a significant urban intrusion onto open and undeveloped rural land […] harmful to the rural character of the site. [ref: Policy G5(10) of Guildford Borough Local Plan 2003]
-Conflicts with the Guildford Landscape Character Assessment 2007 to retain distinct settlements of Shalford and Chilworth.

If there was concern in 2013 about 30 houses on the same north field identified in MM43/A62 it seems unreasonable for 80 homes on the same field and expanding into the adjoining to the south east.
It would be a stretch to call this land "infilling in a village" given that it is at the extremity of the village.

It is my view that identification of this land for housing in the Borough Plan is not justified and is dubious if deemed national policy "limited infilling in villages".

MM39-45
Object No need for additional sites particularly those in the green belt.

MM43
Object I object to the impact on the AONB/AGLV

Attached documents:

Comment: MM43 - LPMM18/593  Respondent: Frank Webster 8748545  Agent:
I have the following comments to make on the proposed New Policy A62; Land at Hornhatch Farm.

I believe that in order to fully meet the test of soundness the New Policy should be amended to include the following as appropriate requirements;

1. there should be an explicit requirement that the development should include resident and visitor parking at a level which will not add to the existing on-street resident parking along the congested A248 through the village.

2. that a roundabout or traffic lights should be installed at the busy and dangerous junction of the A248 and the A2128.

3. that a pedestrian crossing should be installed to allow safe access to Tillingbourne Junior School.

4. that the existing requirement for sensitive design, siting and form of the development should refer explicitly to sensitive design at the site boundaries having regard to the Green Belt location.

Comment: MM43 - LPMM18/4958  Respondent: Brian Yeomans 8804833  Agent:

MM43 - Hornhatch Farm, Chilworth. As set out in MM2 above the much lower projection of housing needs removes the necessity to bite into the Green Belt and the development of this site.

Attached documents:

Comment: MM43 - LPMM18/5832  Respondent: Wonersh Parish Council (Kevin Garvey) 8826977  Agent:

GUILDFORD BOROUGH LOCAL PLAN: PUBLIC CONSULTATION

This Council is grateful for the opportunity to submit the following observations and concerns about the proposed allocation of land at Hornhatch Farm for housing development (approximately 80 homes), as set out in Main Modification 43, Policy A62. The Council also wishes to place on record its support for the observations and concerns expressed by Shalford Parish Council and St Martha Parish Council in the latters’ submissions to you about the MM43.

While supporting the need to increase housing provision across Surrey it is imperative that this is done in a way that is sympathetic to the environment and ensures the supporting infrastructure (such as transport links, schools and health services) can cope with the additional demand. The Council considers that such development at the northern boundary of this parish will have considerable negative impact unless mitigating conditions can be agreed and implemented. The increase in traffic on congested rural roads is a particular concern, especially in view of the likely Dunsfold development. Any significant development such as Hornhatch therefore needs to be considered strategically, taking into account other proposed developments within Waverley Borough as well as in Guildford Borough. Provision of a sustainable motor vehicle traffic plan must be a prerequisite. It follows that it would be unacceptable to consider the suitability of Hornhatch Farm land for housing development in isolation.

Impact on views from AONB/AGLV

The draft policy rightly requires “sensitive design, siting and form of development that has significant regard to its location on the edge of the village and views from the AONB/AGLV”. However, we are doubtful that any design can effectively mitigate the negative impact of a substantial number of houses which will close the current open views from the Downs Link footpath and bridleway and other footpaths and views from Wonersh Parish on its northern boundary.
Loss of Greenbelt

The loss of this green belt land will inevitably change the character of the area from Rice’s Corner to the edge of the current Chilworth settlement boundary. The effect will be to urbanise this area and significantly close the gap between the villages of Chilworth, Shalford and Wonersh.

Access

Although detailed plans have not yet been developed, access to the site is likely to be onto the A248 which will be both difficult and dangerous.

Impact on traffic congestion

The combined impact of ongoing housing developments at Cranleigh and Horsham as well as potentially at Dunsfold within Waverley Borough are already having an adverse impact on traffic congestion within Wonersh Parish as more drivers use the B2128 to avoid stretches of the A281 between Cranleigh, Bramley and Shalford. In particular, which is relevant to MM43, Rice’s corner at the A248 junction already experiences severe congestion at peak periods. This adds to congestion on minor roads such as Blackheath Lane, Sampleoak Lane as drivers seek rat runs to avoid this junction. This has a particularly serious negative impact on the settlement of Blackheath. In addition drivers heading to Guildford use The Street Wonersh and Chinthurst Lane as a route to avoid Rice’s Corner.

We also note that the current railway transport infrastructure is inadequate to relieve traffic to any appreciable extent. Two railway stations are something over a kilometer away from the Hornhatch Farm site and the service on the railway line between Guildford and Gatwick is limited.

Pressure on local services

We are concerned that the local services including schools and medical surgeries will not be adequate to support the additional residents of Chilworth. This will lead to more pressure on services in our parish and beyond, adding further to the traffic congestion.

Attached documents:

Comment: MM43 - LPMM18/1903  Respondent: Jan Chapman 8832257  Agent:

The Council has previously opposed proposals for 30 homes on this site. There is no indication in the present review of what has changed sufficient that 80 homes are now acceptable at this same location.

The site is in the Green Belt and very close to the Surrey Hills AONB. It’s development would adversely affect the views of the surrounding countryside from within the AONB. Green belt sites such as this are precious and should not be released for development at an early stage of the Development Plan period when brown-field sites are available.

The Sustainability Appraisal Report Addendum states that this site ‘performs well relative to other village Green Belt sites under consideration.’ This relative position does not imply that the site is in any way sustainable and, in fact, there are many reasons why it is not.

For example:

1) there is limited public transport so future occupiers would be dependent on cars, thus increasing pressure on the already overloaded roads between Chilworth and Guildford. This in turn would further increase the risks to pedestrians and cyclists using these routes.
2) The only nearby GP practice is in Wonersh, not accessible by public transport. The practice appears to be under considerable pressure - it seems unlikely that the residents of 80 new properties could be accepted onto its list at all and certainly not without adverse affects on the service to all patients.

A60 to A 64
All these sites are Green Belt land, an easy get out rather than consideration of urban areas.

Attached documents:

Comment: MM43 - LPMM18/4431  Respondent: Annie Cross 8926529  Agent:

MM43 - Transport Strategy

This does not reflect the reality of proposed future traffic in the north eastern part of the borough.

The increase in homes in Ripley, Ockham and Wisley will triple if sites A35 and the Ripley portion of site A43 go ahead, i.e. from 1,189* (2016 figures) homes to 3,489 +/- . The send portion of the site is expected to have a further 350 dwellings. With an average 2 people per household on A35 and A43 (Ripley portion), the population would be 4,612 +/-, an increase of 184% +/-.

Both sites are in Greenbelt. Site A35 has virtually no public transport facilities and the GBC draft 2017 LP removed the requirement for a bus service to Woking town and its station, with fast trains to London Waterloo. Site A43 has poor public transport facilities. With approximately 2 cars per household, the proposed 2,100+ dwellings at site A35 and a total of 550 at Garlicks Arch, would give an extra 5,300 +/- cars.

The 'solution' of slip roads onto the A3 at Burnt Common will be catastrophic for Ripley village. Paid for by the site A35 owners, it will bring traffic from site A35, plus a proportion of the increased Royal Horticultural Society membership (targeted to increase from 1m to 1.4m in the next few years), through Ripley village to access the A3 southbound. Garlicks Arch and Burnt Common traffic will drive through Ripley Village to access the A3 northbound and M25. This 'solution' needs to be revised.

Site A58 is unlikely to employ all locals who can walk or cycle to work, but will add to the increase in cars.

Attached documents:

Comment: MM43 - LPMM18/1511  Respondent: Earl of Onslow and the Trustees of Onslow Estate 8957345
Agent: Nexus Planning (Adam Ross)

MM43 – Land at Hornhatch Farm, Chilworth
For the reasons set out in our detailed representations to MM2, the proposed allocation of this site is unjustified given the Council’s evidence in the SA Addendum 2018, and is contrary to the Council’s own spatial hierarchy / approach given its failure to allocate the deliverable, more sustainable and sequentially preferable site at Clandon Golf (as an urban extension to Guildford).

**Changes Required**

For the reasons set out in our representations to MM2, the revised spatial strategy established by MM2 (and specifically the allocation of the sites identified in MM39, 43, 44 and 45) is unjustified and unsound.

The Council must re-visit the strategy to allocate additional sites to deliver in the first five years of the Local Plan (post-adoption) and base its decisions on clear evidence (most notably the SA Addendum) and its own spatial hierarchy / approach. This will result, on the Council’s own evidence, in the identification of a different development option (and therefore a different suite of sites) to those now proposed. It will also, most importantly, result in a more sustainable distribution of development (on the Council’s own terms).

Policy A62: Hornhatch Farm, land adjoining New Road, Chilworth - Proposed Early Housing Development of 80 new homes

**Response from St Martha Parish Council:** Consultation on modifications to the new Local Plan

The Sustainability Appraisal (SA) of the Guildford Borough Local Plan (SA Report Addendum September 2018) states on Page 15: ‘Land at Hornhatch Farm (80 homes) - performs well relative to other village Green Belt sites discussed’. St Martha Parish Council, which has first-hand local knowledge of the area, wishes to put forward the following reasons as to why in its opinion this site does not perform well compared to other sites and is unsuitable for such proposed development. In particular, it would like to point out that there has been no reference to potential serious traffic problems, an easement across the site, the lack of amenities, and the full impact on the AONB has been largely overlooked.

- Hornhatch Farm site is the only site where the development would have a significant impact on views from the AONB compared to the other relative sites considered in the Sustainability Appraisal. It therefore does not ‘perform well relative to other village Green Belt sites discussed’.
- Hornhatch Farm is a 4.5 ha. area of moderate to good agricultural land on the edge of the village and surrounded by the Surrey Hills AONB and AGLV. It is clearly visible from the Chantries to the north which has striking views across the area. Under the LU5 of the Surrey Hills Management Plan (2014-2019) it is stated: *development that would spoil the setting of the AONB, by harming public views into or from the AONB, will be resisted,* and the Local Plan Policy P1: Paragraph 4.3.5 states: *development proposals within and adjacent to the*
AONB will be expected to conserve or enhance its special qualities. Developing Hornhatch Farm would have a negative impact on views across the AONB and would neither conserve nor enhance its special qualities.

- The proposed development site is currently in the Green Belt and outside the settlement area and should remain so. The National Planning Policy Framework July 2018 (NPPF) states (page 40 paragraph 133) that the Green Belt is there: to prevent urban sprawl and keep the land permanently open and to assist in safeguarding the countryside from encroachment. Once established, Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified (page 40 paragraph 136). Under paragraph 137 (a) page 41 it further states that: as much use as possible should be made of suitable brownfield sites. Further consideration should be given to the use of brownfield sites in the Borough rather than agricultural fields in the Green Belt surrounded by the AONB, even if this does mean a slightly longer delivery period. This site should also remain as an open space rather than adding to the linear development of the village of Chilworth along the road. Linear development is discouraged as it detracts from the character of individual settlements.

- Immediately next to Hornhatch Farm is the road junction of the A248 from Shalford and the B2128 from Wonersh, known as Rice’s Corner. It is a very busy junction and already causes long delays and tail backs of traffic at peak times throughout the day, including the start and finish of the school day.

- With the impending development of Dunsfold Park, the level of development at Cranleigh and surrounding areas, and more houses already being built in Chilworth itself as infilling, the pressure on this junction will be further increased considerably and the proposed development of Hornhatch Farm with 80 extra homes will only add to this. It will mean increased motor vehicle movements in the area and assuming most new homes have 2 cars or more, plus deliveries, visitors, and services, this will mean hundreds of car movements to and from this site per day.

- An earlier proposal was for the access point to be directly off New Road in the far south west corner of the site. As this access point is situated near a bend in the road and close to the junction at Rice’s Corner, entry and exiting from this site could be difficult and dangerous. It will be hard to enter and exit when there is a ‘bottle neck’ of traffic at Rice’s Corner and traffic queuing along New Road. If the access point is moved further east along New Road there is another bend, school entrance and the entrance to the Hornhatch Estate.

- The Parish Council understands an underground high-pressure gas pipeline runs north-west to south-east across the piece of land. This would provide a significant physical constraint to the development as it prevents development on an 18-metre easement across the centre of the site.

- There are green corridor linkages to wildlife habitats immediately outside the site which would greatly benefit from the land adjacent to these being left permanently open. The NPPF says that wildlife corridors should be safeguarded (paragraph 174 (a) page 50).

- One of the arguments used in the past for Hornhatch Farm to be used as a development site and considered sustainable is that Chilworth was described as having a ‘range of shops, services and amenities’ and access to ‘good bus and rail services’. In reality, Chilworth has limited shops: a post office (which is very vulnerable to closure), one small store and ladies dress shop. The bus service is restricted to hourly within the day but is non-existent in the evenings and extremely limited at weekends. The train line from Reading to Gatwick only has trains stopping each way once every hour, or every two hours. Chilworth Station has no parking facilities and the station is one mile away from Hornhatch Farm. Residents of this development would have to walk to the station to catch the occasional stopping train. In fact, most residents of the village and indeed the whole of the Tillingbourne Valley depend on the car for transport.

- Though the village has a Junior and Infant School there is difficulty getting to Secondary Schools, medical services and anything other than basic shopping apart from by car. Most people use their car to drive from the Hornhatch end of the village to the Infant School as this is also a mile away at the other end of Chilworth.

- If the area is developed for housing it would mean a change of use from agricultural fields which could make it vulnerable to surface water and run-off problems.
• It has also come to light that the Office of National Statistics (ONS) recently released figures showing that the predicted Guildford Borough housing needs will be far below the Borough Council’s proposed housing targets used when preparing the draft Local Plan. Is this development site therefore justified?

In light of these figures, this proposal should be reassessed, may be at a later date, when the picture becomes clearer and justification be given for Guildford to ‘help out’ Woking in meeting the wider housing needs.

To summarise:

**St Martha Parish Council** thinks Hornhatch Farm is an unsustainable site for the proposed development of 80 new homes on the grounds of: traffic congestion; road safety; access; sensitivity of the surrounding Surrey Hills AONB, AGLV and protected views; currently outside the settlement area and in the Green Belt; the need for it to remain as permanent open space in the Green Belt; inappropriate linear development; an easement across the land; wildlife corridors; limited public transport; lack of amenities; possible water run-off; agricultural land surrounded by the AONB being used for development rather than existing brownfield sites; can the need for these new houses be justified?

The Parish Council, like many locally, feels very strongly that this area should not be used for housing development but kept as an open space. If, however, housing development does take place St Martha Parish Council would wish to see:

• A reduction from 80 houses to a maximum of 30 as the proposed scale of development is unsustainable
• A roundabout at Rice’s Corner to ease the congestion and help the flow of traffic where a very busy ‘A’ road meets a very busy ‘B’ road
• Very careful consideration given to the access point to this site
• Houses that are sensitively designed, in keeping with the character of the area, and well screened to minimise the impact from the AONB and AGLV
• If fewer houses are built, the remaining area immediately around the development should be secured as Green Belt permanent open-space, to reduce the impact on the AONB and AGLV and give greater protection to the wildlife corridors. This would mean reducing the area being currently proposed for insetting from the Green Belt. (Map dated 20th August 2018 on page 76 of the Schedule of proposed main modifications to the Submission Local Plan (2017) refers.)
• Any development should include space for planting and growth of large native trees outside private gardens to soften the visual impact of the buildings in time.
• Emphasis on affordable rental housing to enable young people who have grown up in the area to remain in the area

**Policy A62: Land at Hornhatch Farm, adjoining New Road, Chilworth**

**MM(undefined) – OBJECTION A62-1**

Given the excess number dwellings proposed in the Local Plan (see Objection S2-1 to modification MM2), the increase in housing provision following the Planning Inspector’s examination of the Local Plan should be reversed in accordance with Objection S2-4 above. This review should include Site A62 (Land at Hornhatch Farm, adjoining New Road, Chilworth – 80 dwellings).

Attached documents:
**MM43 Land at Hornhatch Farm Chilworth**

This land is currently on the edge of the AONB and is within Green Belt and outside the settlement boundary. It is critical in preventing urban sprawl from Guildford into the AONB. There is negligible differentiation between Shalford and Guildford itself and these field are critical in ensuring that Shalford is differentiated from Chilworth. In an area as fragile as this, this is a critical incursion into very precious open space. It affects views into and out of the AONB and is not a suitable site. This land has not featured in any previous public consultation and therefore is unsuitable for inclusion at this stage.

**Attached documents:**

**2 Additional Site Allocations – MM39, MM43, MM44, MM45**

Putting aside the continued failure of the Council to identify sufficient sites for delivery within the early years of the Plan, the additional sites proposed within the Main Modifications fail to both accord with the current strategy, whilst representing less sustainable locations than alternative deliverable sites.

As an example, at Hook Farm and Hunts Farm has the potential to accommodate approximately 150 dwellings, care home, substantial green infrastructure, and additional parking and a new access to Worplesdon Primary School, alleviating existing congestion within Fairlands. This development is of a comparable size to those proposed within the Main Modifications; however, represents greater community benefit within a more sustainable location close to the Guildford urban edge. The plans accompanying these representations demonstrate the ability of this development to provide an appropriately proportioned development alongside newly formed, defensible boundaries for the Green Belt.

For clarity, the additional sites favoured by the Council comprise:

- East of Glaziers Lane, Flexford (105 homes)
- Village extensions at:
  - Urban extension at Aarons Hill, Godalming (200 homes)
  - Hornhatch Farm, Chilworth (80 homes)
  - Alderton’s Farm, Send Marsh (120 homes)

The selection process undertaken by the Council for these additional sites is highly contentious and, based on the evidence available to them at the time of making this decision is not founded on the results of the assessment before them.
As is detailed within the Council’s response “Measures to boost housing delivery in the early years in the context of an OAN figure of 630dpa + contribution to the wider HMA”, the decision to incorporate the above sites followed the Inspector’s note published on 22nd June and was made prior to the hearing session on 3rd July.

The SAA supporting the Main Modifications has since been published retrospectively to justify these decisions rather than used to help inform their allocations as the most appropriate additional sites. It is this process that helps explain the failure of the Council to demonstrate these additional sites represent sustainable development.

This results lead assessment is evident in the manipulation of the site options at each spatial tier. In particular, Tier 8 of the September 2018 SAA covers Green Belt around Guildford or Godalming/Farncombe. This is a deviation from the earlier Sustainability Appraisals (SA), which informed the decision to allocate these sites, which defined Tier 8 sites as Green Belt around Guildford only. This change in approach coincided with the decision to include Aarons Hill, Godalming as an additional allocation. This site was previously assessed as a Tier 10 site.

However, the decision to include Tier 10 sites is not opposed by Miller Developments. In fact, we have emphasised the crucial role sites in these (Tier 10) villages can play in delivering much-needed homes within the early years of the plan period. Where the Council has erred is in the inconsistent and inaccurate approach to both site assessment and site selection.

Our Hearing Statement submitted to the Examination detailed flaws within the 2017 SA. This highlighted that the Council having prioritised three sites that had been assessed as ‘less sensitive’ Green Belt sites along with a further four ‘reasonable site options’ that were within “higher sensitivity” Green Belt locations, deemed appropriate on the basis that these smaller sites that could be delivered in the first five years of the Plan. Three of these four sites now form the additional sites included at MM43-45 despite the Land Availability Assessment document concluding that they were contrary to the spatial strategy.

The SA uses only these as an example of Tier 10 sites capable of acting as a reasonable ‘variable’ from which to assess alternative strategies to the spatial strategy. This paints an inaccurate picture of how this alternative strategy could be implemented. In reality, there are other sites that are more sustainably located to the main urban centre of Guildford that can be provided in conjunction with, or as an alternative to the Council’s additional sites. The allocation of these sites would enable the Council to deliver a greater quantum of housing earlier in the Plan period. It is considered that the narrow assessment taken by the Council fails to give adequate consideration of these alternative options. These shortcomings highlight the failure of the Plan to be positively prepared or for the strategy to be truly justified.

In this context, land immediately to the south of Fairlands (comprising land at Hook Farm and Hunts Farm) has been completely overlooked as a reasonable alternative in the SA and the SAA despite it meeting the tests set out in the SA to a greater degree than any other of the Tier 10 sites.

footnotes

2 GBC-LPSS-020
3 ID/6
4 Land at Winds Ridge, ‘the Horsleys’, and land at Garlick’s Arch
5 Aldertons Farm, Land north east of Flexford, Land south of Halfway House, and Hornhatch Farm

The site lies immediately adjacent to the Fairlands settlement boundary, benefits from good road/public transport access to Guildford town centre and could be delivered in the first five years of the plan period. In addition, this proposal would alleviate a recognised local constraint by providing an alternative access and additional parking for Worplesdon Primary School. Furthermore, the Council’s Green Belt and Countryside Study Volume III states that Land Parcel H8 (incorporating land Hook Farm/Hunts Farm, which was identified as parcel H8C) provides opportunities to accommodate development without significantly compromising the purposes of the Green Belt. Parcel H8C was considered to be “surrounded by defensible boundaries” and achieved a higher sustainability rating (ranked 5th) when compared with the 41 Potential Development Areas surrounding villages.

The table included at Appendix I demonstrates how land south of Fairlands compared to the sites at Aldertons Farm, Flexford, and Hornhatch Farm, as well as alternative sites at Fairlands (H8A&B).
This contrast is reflected within the individual assessment of the sites in the 2017 SA. The table included at Appendix 2, noting that the three Fairlands sites were assessed as a whole and applying a quantitative scoring system to the traffic light assessment undertaken, demonstrates Fairlands as a more sustainable option than any of the sites being bought forward by the Council within these Main Modifications.

The September 2018 SAA recognises land at Hook Farm and Hunts Farm as less preferable to that to the west of Fairlands. This is totally at odds to the findings of the numerous assessments on sustainability undertaken by the Council and referenced above.

The rationale given for the site’s exclusion is its need for access to run across Common Land, with the legal process necessary to secure access giving rise to unforeseen delays to delivery. However, Surrey County Council (SCC) has agreed to the principle of securing an access across the common, subject to terms and pursuant to the development providing a community benefit solution in the form of an alternative access to Worplesdon Primary School. Such an alternative access is proposed as part of the development and has garnered the support from the school (see letter included at Appendix 3). Should the site benefit from an allocation with the inclusion of the primary school’s new access and parking, an expedited process can be undertaken in securing the necessary agreements to secure access over the Common Land. This is comparable to the Potential Development Areas at H8A&B, which are also reliant on access within Common Land but has not begun such negotiations with the County Council.

Paragraph 5.4.8 of the SAA excludes land west of Fairlands (though would equally apply to Hook Farm and Hunts) on the basis that a combination of one of the proposed Tier 8 sites alongside a development the size proposed for west of Fairlands (270 dwellings) would involve too great a reliance on the delivery of just two sites. The SAA goes on to immediately contradict itself by accepting that a reliance on two larger sites would equally apply to scenarios 1, 2 and 7, allowing these as potential strategies on the basis that these would align more closely to the spatial strategy. However, simply stating that the categorising of the Tier 8 sites as more closely in line to the spatial strategy than land at Fairlands is an inaccurate representation. Land at Hook Farm and Hunts Farm lies within 400m of Liddington Hall, was assessed as more sustainable within the 2017 SA, and provides the same accessibility options into major urban centres (in particular Guildford) as any of the Tier 8 sites.

The argument that an over-reliance on fewer sites increases risk also fails to paint a full picture. If fewer but larger sites are allocated, any delays to these sites would lead to a shortfall in delivery. However, equally the failure or delay in delivery of smaller sites would create a failure to meet the local housing need. What the SAA fails to recognise is the allocation of a greater number of sites increases the potential for individual sites to run into delivery problems. A greater number of sites results in the need for a greater number of planning applications, a reliance on a greater number of delivery agents and potentially a greater number of land deals, all of which increase the risk for delays to delivery within the early years of the Plan.

By contrast, Miller Developments represents a proven delivery partner, and controls the land at Hook Farm and Hunts Farm that is demonstrated as containing no absolute constraints to delivery, is in a highly sustainable location, and therefore can be delivered within the first five years of the Plan.

A further failure of the Council, which is reflected throughout its site selection process, is a failure to identify ‘exceptional circumstances’ to justify alterations to the Green Belt, as required by the NPPF (paragraph 83). The Plan makes one reference to exceptional circumstances, stating that these exist in order to promote sustainable patterns of growth.

Miller Developments supports in principle the Council’s decision to make amendments to the Green Belt in order to accommodate sustainable development. In this regard, the tiered hierarchy within the SA prioritises the use of land outside of the Green Belt but recognises that in order to meet the housing and economic needs of the Borough, development within the Green Belt will be required. However, there has been a failure of the Council to seek opportunities for essential infrastructure that can be delivered in conjunction with sustainable housing development in order to form a more robust ‘exceptional circumstances’ case.

As demonstrated throughout our representations to the Plan, land at Hook Farm and Hunts Farm would deliver access to Worplesdon Primary School from the south, removing the majority of school traffic from the village; congestion within the village is a recognised and substantial local constraint. In this regard, SCC has confirmed (Appendix 4) that provision
of a new access from the south is the only deliverable, comprehensive solution to the school traffic constraints in the village. Miller Developments has worked in conjunction with the school to design a new access and provide additional parking sufficient to alleviate existing congestion and future proof against expansion of the school in years to come.

This significant social benefit, combined with a housing development assessed by the Council as more sustainable than its competitors, represents considerably more robust ‘exceptional circumstances’ than is identified for other sites. Each of the additional proposed site allocations will provide solely a mix of housing tenures and site-specific mitigation necessary to make the proposed development acceptable in terms of its impact on the local environment.

**Comment:** MM43 - LPMM18/6076  **Respondent:** Land Owner of Hornhatch Farm 15267521  **Agent:** MADDOX (Matt Hill)

**Policy A62: land at Hornhatch Farm, Chilworth**

Our client supports the allocation of land at Hornhatch Farm for up to approximately 80 residential dwellings, under emerging Policy A62.

The land at Hornhatch Farm presents an ideal opportunity to create a sustainable new extension to the village of Chilworth. The site has the potential to deliver around 80 new homes including a policy compliant provision of affordable housing, which will be set within an attractive landscape setting and in close proximity to existing community facilities. Additionally, the development of the site will provide a significant amount of additional landscaping and open space, including play space on the site, which will subsequently provide residents of Chilworth with further access to green amenity. The deliverability and suitability of the site is shown on the accompanying Masterplan.

There is clear evidence that there are no real constraints to bringing forward an application for development on the site without delay. The site is not located within the AONB, however, it does fall within close proximity to it. Nonetheless, a number of technical studies have been undertaken, including a Landscape Visual Impact Assessment (‘LVIA’), which set out that development shown on the accompanying Masterplan would not disrupt any views to or from the AONB and would not result in the loss of woodland/parkland and would preserve the overall pattern of settlement and countryside in the wider landscape. It is therefore clear that the allocation of ‘Land at Hornhatch Farm’ (Policy A62) would contribute to the Council’s unmet housing need through the provision of up to 80 dwellings, whilst considering the environmental and other constraints within the Borough.

**Deliverability**

As set out within the National Planning Policy Framework (2018), for sites to be considered deliverable, there needs to be clear evidence that the housing completions will begin on the site within five years. As set out above, our client has instructed the preparation of a site wide Masterplan, which has been supported by a suite of technical documents that have demonstrated that there are no constraints to bringing forward an application without delay. Indeed, the Inspector will note that the site was previously assessed in the 2014 “Draft Guildford Borough Council Local Plan: Strategy and sites” as suitable for residential development within one to five years, and this is still clearly the case. To this end, a preapplication submission has been made to the Council and it is the intention for this to be followed by a planning application in early 2019. Development on site is therefore anticipated late 2019/early 2020, which demonstrates that the site has a very realistic prospect of being delivered within five years.

I trust that this letter is clear but please do not hesitate to contact me if you have any questions or queries.
I wish to respond to the following item:

Policy A62: Hornhatch Farm, land adjoining New Road, Chilworth - proposed early housing development of 80 new homes.

I object to this proposal on the following grounds:

The site is currently in the Green Belt and within the Settlement Boundary.

A high pressure gas main runs right across the site, preventing any nearby building.

The traffic problems, already severe at the site, would be greatly aggravated.

It would be detrimental to the protected views from the AONB.

Comment: MM43 - LPMM18/5796  Respondent: Donna Collinson 15460737  Agent: 

MM43 Can adding a new Green Belt site at Chilworth be justified in view of revised figures?

Comment: MM43 - LPMM18/2063  Respondent: Gillian Harrold 17151745  Agent: 

POLICY A62: Hornhatch Farm, land adjoining New Road, Chilworth

Proposed Early Housing development of 80 new houses

This Green Belt site consists of agricultural land within the area of Shalford Parish Council and close to the boundary of Waverley District. The proposed housing site would be visible from the nationally important countryside of the Surrey Hills Area of Outstanding Natural Beauty (AONB) and an Area of Great Landscape Value (AGLV) at the Chantries. It forms part of the Tillingbourne Greensand Valley which is described in the Guildford Landscape Character Assessment (GLCA) as a valley which provides a transport corridor with the railway and the A248 running along the flood plain from East to West through the largely linear development of the village of Chilworth. The GLCA which was published in 2007 refers to "continuing traffic congestion" and the need to "retain the character of the individual settlements avoiding merging these through dense linear development along roads." Anyone familiar with Childworth will be well aware of the congestion at Rice's Corner of the junction to the West of the village of Chilworth. The A248 and the B2128 from Wonersh which occurs regularly at peak traffic periods through the day.
An application made for 30 houses to be built at this site in 2013 was refused largely on the grounds of unsustainability. It must be pointed out that both bus and rail services to and from Chilworth offer a very limited service. Most residents of the village rely on the car for transport. Walking to the station from the new larger development proposed would take 20 minutes each morning and evening as it is located at the other end of the village, or even a longer time to Shalford station which is still further away. There is no adequate parking at Chilworth station.

Owing to the traffic bottleneck which forms at Rice's Corner and the subsequent congestion on the A248 to Guildford, many car drivers seek to use Blacksmith and Halfpenny Lanes as a quicker "rat run" route to reach the county town each morning and evening. This causes a safety concern and objection in the Chilworth community at Blacksmith Lane within the area of St Martha's PC and for residents within the adjoining GBC Holy Trinity ward to the North. These rural single track lanes are categorised as "D" because they are so narrow and sinuous, and Halfpenny Lane is sunken for much of its length. A weight restriction applies to vehicles over 7.5 tons which is not always observed. The GCLA refers to the desirability of restricting traffic flow along sunken lanes of this type which run up to the North from the Tillingbourne Valley. It is worth noting that the North Downs Way National Trail crosses Halfpenny Lane near a particularly dangerous corner. An extract from the GCLA states "Conserv[e] the rural roads and sunken lanes minimising small-scale incremental change such as signage, fencing or improvements to the road network which would change their character".

Going back to before 2004 the Chilworth community were assured by the Surrey County Council (SCC) that a proposal was being considered to put in a roundabout at Rice's Corner junction between the A248 and the B2128 to reduce traffic congestion and to allow priority to be given to traffic on the A248. In June 2004 the Local Committee considered this proposal from the Tyting Society but it was rejected as too expensive owing to the need to relocate a number of utility and other services at Rice's Corner. The minor road improvements made subsequently did not significantly reduce the traffic congestion problem which has increased steadily to this day. The current prospect of 80 additional new houses being built at Hornhatch Farm is daunting when one considers the car traffic that this would generate. The community will suffer if this proposal proceeds further against the united opposition of the PCs at Albury, Blackheath, St Martha's, Shalford, and Wonersh. Moreover, we have to recognise that the housing development at Cranleigh and Dunsfold, which appears to have been approved by Waverley Council, will in addition cause further major congestion problems on all the relevant A roads and force additional traffic onto minor country roads and lanes that are already unable to cope with the vehicles that seek ways around troublespots.

It should therefore not surprise anyone if there is objection to this development proposal which seems to have been added at a late stage and has little to endorse it.

**Attached documents:**

**Comment:** MM43 - LPMM18/2963  **Respondent:** Peter Dunt 17204673  **Agent:**

This comment refers to MM43 A62 - Land at Hornhatch Farm, adjoining New Road, Chilworth, where the proposal is to build 80 homes.

You will see from my address that we live very close by in Great Tangley; we have lived here for over 30 years. We travel regularly on the B2128 at all times of the day, and the volume of traffic at Rice’s Corner is already at saturation. At peak times, it can take 20 minutes to travel one mile from Rice’s Corner into Shalford. Access onto the B2128 from our lane (Great Tangley) has also become increasingly difficult over recent years.

I am sure you are also aware that Rice’s Corner is often the scene of accidents.

It is therefore my considered opinion that building 80 homes at Hornhatch Farm will make access onto New Road and the B2128 unsustainable and dangerous.

In addition, local schools and doctors surgeries are already full; what plans would there be to increase capacity?
I therefore object to the proposal.

**Comment:** MM43 - LPMM18/3211  **Respondent:** David Thorp 17243873  **Agent:**

MM43 - Hornhatch Farm, Chilworth. As set out in MM2 above the much lower projection of housing needs removes the necessity to bite into the Green Belt and the development of this site.

Attached documents:

**Comment:** MM43 - LPMM18/4985  **Respondent:** Zurich Assurance Limited 17343361  **Agent:** Barton Willmore LLP (Gary Stevens)

E. MM39, MM43, MM44 AND MM45: SITE ALLOCATIONS

28. As outlined under CTI’s response to MM2, the inclusion of these additional greenfield sites within the Green Belt, ahead of unsustainable and poor-quality existing employment sites is an unsound approach that does not conform to the tests of soundness set out in paragraph 182 of the NPPF (2012).

29. CTI therefore consider that the Council should re-evaluate its approach to the allocation of these four additional sites.

Attached documents:

**Comment:** MM43 - LPMM18/6081  **Respondent:** Linden Homes South 17461921  **Agent:** Turley (Hannah Bowler)

**Land at Hornhatch Farm, adjoining New Road, Chilworth**

The SA (2017) identifies the site as red-rated Green Belt although was not subject to any other constraints and was assessed on the basis of 80 dwellings on-site. The site scored poorly against accessibility to the District/ Local Centre, Primary School and Secondary School although scored amber against accessibility to a train station (the same as our Client’s site). In addition, the site is adjacent to the AGLV and in close proximity to the AONB alongside being identified as the ‘best and most versatile agricultural land’. We consider that there is limited commentary on why the site is appropriate compared to all reasonable alternatives within the SA (2018).

Within the Green Belt Study, the site falls within parcel E51 and was specifically identified as parcel 51B within Volume III Appendix VI. The site was identified as a potential development area although reference was made to the any development being partially constrained by the AONB.

We consider that the site does not score any higher than our Client’s site against the SA objectives and is in fact further away from the railway station in Chilworth than our Client’s site in Flexford. Furthermore the site at Chilworth is ‘red rated’ in terms of its Green Belt sensitivity when compared to our Client’s site scoring amber. No landscape evidence has been submitted demonstrate that policy P1 will not be undermined through this allocation especially given recognition with the Council’s evidence of the proximity to the site to the AGLV and AONB. There is no justification as to why the site is sequentially preferable over our Client’s site.
MM42: A62 - Land at Hornhatch Farm, adjoining New Road, Chilworth

MM42 introduces new Policy A62 relating to land at Hornhatch Farm, adjoining New Road, Chilworth. The policy proposes to allocate the site for approximately 80 homes.

As well as its location in the lowest spatial tier, demonstrating its poor sustainability credentials generally, the Chilworth site is within an AGLV and in close proximity to AONB.

LHF does not have these landscape sensitivities and has the distinct advantage of being closest to Guildford. Every option assessing LHF scores more positively than any option involving Chilworth (A62).

Proposed additional housing site A62 should not be included within the Main Modifications to the Plan, particularly at the expense of LHF.

Attached documents:

Comment: MM43 - LPMM18/5979  Respondent: Guildford College Group (Guildford College Group) 17467233
Agent: Indigo Planning Limited (Aaron Peate)

MM43: A63 - Land west of Alderton’s Farm, Send Marsh Road, Send

MM43 introduces new Policy A63 relating to land west of Alderton’s Farm, Send Marsh Road, Send. The policy proposes to allocate the site for approximately 120 homes (C3), including some self-build and custom house building plots.

As well as its location in the lowest spatial tier, demonstrating its poor sustainability credentials generally, the site utilises grade 2 agricultural land (best and most versatile). Perhaps more importantly, the provision of an additional 450 homes in five years in a village of circa 1,700 homes, represents a 30% increase. This is unlikely from a build-out perspective, due to the concerns expressed in the SA (2018) relates to saturation and indeed not desirable from sustainable growth point of view. The council confirm at 5.2.12 of the SA (2018) that it is not ideal concentrating housing at one location, to avoid geographical clusters of sites as it is proportionately more likely to saturate the local market. In fact, Box 5.2 of the SA (2018) states that no more than one site should be identified per village. The Green Belt village of Send has two sites, totalling 550 houses.

LHF does not have these agricultural land or deliverability issues and has the distinct advantage of being closest to Guildford. Every option assessing LHF scores more positively than any option involving Alderton’s Farm (A63).

Proposed additional housing site A63 should not be included within the Main Modifications to the Plan, particularly at the expense of LHF.

Attached documents:
MM43 - Policy A62: land at Hornhatch Farm, adjoining New Road, Chilworth

This site lies adjacent to the AGLV and in close proximity to the AONB. The landscape sensitivity and necessary mitigation measures are however unassessed. The Landscape Character Assessment provided by the Council considers areas at a broad scale and not individual sites therefore the landscape impact of developing the site close to these designated areas is uncertain.

In addition to this the site lies on high quality agricultural land, which whilst it is recognised that it is a small area, in combination with AONB, AGLV and Green Belt impacts suggests a limited regard by the Council towards environmental impacts. The Council have also followed this approach at Aaron’s Hill (See MM39) which also lies adjacent to an AGLV.

Conversely the site to the west of Fairlands is affected by no landscape constraints besides the Green Belt designation (as is common across all of the alternative sites) and it lies on the lowest grade (grade 4+) of agricultural land. This suggests that whilst alternative sites of less environmental quality are available insufficient weight is being given to environmental impacts.

The Sustainability Appraisal is therefore not in accordance with the NPPF2 which gives great weight to conserving and enhancing AONB’s (para 172) and requires plans to ‘allocate land with the least environmental or amenity value’ where consistent with other policies within the Framework. (para 171). Due to this the Appraisal is an unsound document and should not be given weight in the determination of additional allocations.

Attached documents:

Policy A62 –MM43

This relates to land at Hornhatch Farm in Chilworth, another site brought into the Plan to boost housing supply in the early years. The Council notes that this site adjoins the boundary with Waverley. Therefore, if this site is to come forward, it is essential that any cross boundary impacts, such as from additional traffic, are addressed within the policy. Careful consideration will also need to be given to the landscaping, given that the adjoining land in Waverley to the south is within the Green Belt and the AGLV.

Attached documents:

MM43 POLICY A62: Land at Hornhatch Farm, adjoining New Road, Chilworth

Dear sir/madam,

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]
[Details redacted], I grew up in the adjacent village of Bramley, I went to primary school at Salford infant, middle school at Tillingbourne (adjacent to horn hatch farm) and secondary at Glebelands in Cranleigh.

I grew up in [details redacted], Bramley/Shalford. most of my immediate family live in Bramley/shalford/guildford.

I spent the majority of my time in the above villages.

I feel that adding 80 homes to hornhatch farm, near Chilworth, or the village of Shalford that it comes under would have a negative effect on the surround villages.

My reasons are stated below

1. It is unsustainable taking into consideration the local amenities
2. it would increase the already strain on the A281
3. It would further dilute the village environment on the villages of Chilworth, Shalford, Bramley, Wonersh and Shamley Green with the increase of people not accustomed to living in a village.
4. The loss of precious greenbelt land in an area of nature beauty
5. The nearest supermarkets are Sainsburys, Waitrose in Godalming, Sainsburys, co op in Cranleigh, and Tesco's, Waitrose in Guildford, which would further traffic in those already heavy traffic area's.
6. Would put strain on local area's of wildlife and beauty spots which include, Chinthurst hill, St Martha's, Pewley down & Blackheath
7. would increase parish, and Guildford borough council tax for the area to residents to accommodate 80 new homes.
8. would increase strain on the local schools surrounding the area particularly Salford, Bramley and Tillingbourne schools.
9. would increase strain the nearest doctors surgery which is Wonersh surgery.
10. traditional villages are becoming more and more diluted by building on greenbelt land and traffic, the Surrey hills and surrounding area is a substantial addition to the south of England un tainted by city life, Guildford has already been overrun by commuters and some unfortunate people who have not experienced living in a small community that is a village, they have not experienced the ability to step outside there front door to be met with woodland and countryside, Chilworth and the surrounding villages are already operating at there maximum capacity whilst retaining a village community and feel, these are the qualities that draw people to the area. whilst increasing the population will unfortunately and undeniably tip it over the edge.

Attached documents:

**Comment:** MM43 - LPMM18/34  **Respondent:** Ms Anne Deacon 20453409  **Agent:**

please ensure this is not high density housing with no front gardens and no room for mature trees

Attached documents:

**Comment:** MM43 - LPMM18/44  **Respondent:** Jennifer George 20498561  **Agent:**
Whilst I am fully aware that Guildford and the surrounding area needs more housing, I feel that the proposed 80 properties will put considerable pressure on the infra structure of both, Chilworth, Shalford and Wonersh. All the extra traffic will be funnelled onto an already congested junction, which is also impacted at school drop off and collection times. This traffic will then head along the A248 or A281. The A281 is easily congested and is going to be put under even more extreme pressure with the Dunsfold development, so the extra volume of traffic that 80 properties generate will just add to the strain on an already heavily used road junction and adjoining roads. I therefore feel that this development should be rejected.

Attached documents:

Comment: MM43 - LPMM18/5764  Respondent: Mrs Patricia Allen 20596225  Agent:

Consultation on Modification MM43 to the new Local Plan

Policy A62: Hornhatch Farm, land adjoining New Road, Chilworth – proposed early housing development of 80 new homes

I wish to object to this proposal as being unsustainable for the following reasons:

- It would require very strong justification to go ahead with this proposal as recent figures from the Office of National Statistics are showing that the predicted Guildford Borough housing needs will be far below the Borough Council’s proposed housing targets used to prepare the new Local Plan
- This development would have significant impact on views from the surrounding AONB
- The site is currently in the Green Belt and outside the settlement area and should remain so to keep the land permanently open to protect the AONB/AGLV, prevent urban sprawl and further linear development, and protect the nearby wild life corridors
- Brownfield sites in the Borough should be used instead of agricultural fields in the Green Belt surrounded by the AONB, even if this means a slightly longer delivery period
- The site is near a bend and right next to the very busy road junction of the A248 and B2128 which already has traffic issues with long delays and tail backs at peak times
- This development will create a large number of extra motor vehicle movements per day and put even more pressure on the junction and New Road
- This site lacks an ideal access point for easy and safe exit and entrance particularly at peak times
- Over 40 new homes have already been built in Chilworth recently as infilling and this has meant more traffic on the A248 and reduced parking areas due to entrances to the new development sites, all of which has made it difficult to drive through the village. This development would only add to the problems.
- A gas pipeline across the land could mean significant physical constraints to the development and could reduce delivery time
- There is poor public transport due to limited train and even more limited bus services, and Chilworth train station has no parking and is just over a mile away. Shalford Station also has a limited train service and parking in Shalford is a serious problem. It makes no sense to build where the public transport is poor and people will be reliant on their cars. This is not sustainable development.
- If it does go ahead, I think the number of houses should be significantly reduced; there needs to be good screening and planting to reduce the visual impact; a round-about at Rice’s Corner would be required; there should be some rental housing included in the development as well as affordable housing

Comment: MM43 - LPMM18/1484  Respondent: Commercial Estates Group 20691297  Agent: Nexus Planning (Adam Ross)

MM43 – Land at Hornhatch Farm, Chilworth
For the reasons set out in our detailed representations to MM2, the proposed allocation of this site is unjustified given the Council’s evidence in the SA Addendum 2018, and is contrary to the Council’s own spatial hierarchy / approach given its failure to allocate the deliverable, more sustainable and sequentially preferable site at Clandon Golf (as an urban extension to Guildford).

Changes Required
For the reasons set out in our representations to MM2, the revised spatial strategy established by MM2 (and specifically the allocation of the sites identified in MM39, 43, 44 and 45) is unjustified and unsound.

The Council must re-visit the strategy to allocate additional sites to deliver in the first five years of the Local Plan (post-adoption) and base its decisions on clear evidence (most notably the SA Addendum) and its own spatial hierarchy / approach. This will result, on the Council’s own evidence, in the identification of a different development option (and therefore a different suite of sites) to those now proposed. It will also, most importantly, result in a more sustainable distribution of development (on the Council’s own terms).

Comment: MM43 - LPMM18/1719  Respondent: Stephen and Audrey Hofmeyr 20700705  Agent:

MM43 – Hornhatch Farm, Chilworth
As set out in MM2 above the much lower projection of housing needs removes the necessity to bite into the Green Belt and the development of this site.

In conclusion, our local residents’ association, the Tyting Society, will be putting in a separate response. We support that response.

Comment: MM43 - LPMM18/3600  Respondent: Patricia Allen 20794305  Agent:
Policy A62: Hornhatch Farm, land adjoining New Road, Chilworth – proposed early housing development of 80 new homes

I wish to object to this proposal as being unsustainable for the following reasons:

- Significant impact on views from the surrounding AONB
- The site is currently in the Green Belt and outside the settlement area and should remain so to keep the land permanently open to protect the AONB/AGLV, prevent urban sprawl and further linear development, and protect the nearby wild life corridors
- Brownfield sites in the Borough should be used instead of agricultural fields in the Green Belt surrounded by the AONB, even if this means a slightly longer delivery period
- The site is near a bend and right next to the busy road junction of the A248 and B2128 which already has traffic issues with long delays and tail backs at peak times
- This will create too many extra motor vehicle movements per day and put even more pressure on the junction and New Road
- This site lacks an ideal access point for easy and safe exit and entrance particularly at peak times
- Over 40 new homes have already been built in Chilworth recently and this has meant more traffic on the A248, reduced parking areas and made it difficult to drive through the village. This development would only add to the problems.
- A gas pipeline across the land could mean significant physical constraints to the development and could reduce delivery time
- There is poor public transport due to limited train and even more limited bus services, and Chilworth train station has no parking and is just over a mile away. Shalford Station also has a limited train service and parking in Shalford is becoming a problem. It makes no sense to build where the public transport is poor and people will be reliant on their cars. This is not sustainable development.
- It would require very strong justification to go ahead with this proposal as recent figures from the Office of National Statistics are showing that the predicted Guildford Borough housing needs will be far below the Borough Council’s proposed housing targets used to prepare the new Local Plan
- If it does go ahead, I think the number of houses should be significantly reduced; there needs to be good screening and planting to reduce the visual impact; a roundabout at Rice’s Corner is needed; there should be some rental housing included in the development as well as affordable housing

Comment: MM43 - LPMM18/3873  Respondent: Clare Price 20797537  Agent:

MM43 Housing at Hornhatch Farm, Chilworth - As a resident of Halfpenny Lane and a frequent visitor through and to the village, I am only too aware of the serious congestion through the village and in particular up Blacksmith and Halfpenny Lane which is a 'cut through' to Guildford and onward journeys thus avoiding Shalford and the subsequent town centre one way circuit that would have to be negotiated. The lane is quite simply chaotic and dangerous as it is. There are no speed limits. Does anyone have any idea of the speed at which cars come flying round the bends, not to mention the weekend cyclists that come flying round the bends riding far too carelessly. There is no height or width restriction on the lane, thus unsuitable lorries negotiate the lane causing mayhem. I am a horse rider and dog walker and speak from experience. I would be happy to share video evidence of the chaos that occurs. Extra housing in the village, would have serious impact on the traffic in the area, not simply from congestion but from a safety point of view and pollution.

Comment: MM43 - LPMM18/5926  Respondent: Sustainable Land Products Ltd 20858657  Agent:

1. INTRODUCTION

1.1 Sustainable Land Products Ltd (SLP) has an interest at Tangley Place Farm, Worplesdon and has promoted the site throughout the local plan process as a suitable location for residential development.

1.2 Following the inspector’s comments on the hearing sessions, the Council were required to make several amendments to the plan which were then to be consulted upon. This consultation period has now begun and is scheduled to run from 11th September 2018 to 23rd October 2018.

1.3 These representations set out the particularly pertinent changes to the plan and provides some commentary on them.

2. POLICY CONTEXT AND BACKGROUND
2.1 The Guildford Local Plan was submitted to the Planning Inspectorate in December 2017. The examination hearings took place between June and July 2018, following which the inspector provided their conclusions to the Council.

2.2 The inspector’s conclusions on the plan confirmed that the stepped approach to housing delivery was inappropriate, raised concerns over the deliverability of housing within the early years of the plan and recommended that additional sources of housing delivery be identified to address this.

2.3 SLP welcomed this finding, having expressed the same reservations over the Council’s strategy to deliver its housing requirement and maintain a healthy supply of housing in the early years of the plan in their representations to the Regulation 19 plan.

2.4 In response, the Council has proposed a number of changes, including the allocation of four new green belt sites at settlements outside of Guildford. SLP will provide their comments on these allocations in the following chapter.

2.5 This was in addition to several modifications to the plan that were required to make the plan sound. This included, but was not exclusive to, the following key measures:

- accommodating 20 per cent of Woking's unmet need (MM2);
- reducing the Gosden Hill Farm allocation by 200 to 1,800 homes (MM35);
- increasing Burnt Common industrial floor space to 14,800 square metres to meet employment land needs (MM42); and
- a new policy (S3) to deliver regeneration in Guildford town centre (MM3).

2.6 In respect of the first bullet point specifically, SLP welcomes this measure, having expressed concerns in respect of the approach to unmet need set out in the submission plan. All other modifications to the plan are not relevant to our client’s interests and, therefore, we do not wish to make any further comments.

3. COMMENTS ON THE KEY MAIN MODIFICATIONS

3.1 To be clear, the specific modifications that SLP feels should be commented on relate to the new green belt sites that have been allocated to help address the shortfall in the early years of the plan. These allocations are contained within policies A61, A62, A63 and A64 and are set out below:

- **Policy A61**: Land at Aaron's Hill, Godalming (200 dwellings);
- **Policy A62**: Land at Hornhatch Farm, adjoining New Road, Chilworth (80 dwellings);
- **Policy A63**: Land west of Alderton’s Farm, Send Marsh Road, Send (120 dwellings);
- **Policy A64**: Land between Glaziers Lane and Strawberry Farm, Flexford (105 dwellings).

3.2 The Council have also identified an already existing site (Land at Garlick’s Farm) as being able to deliver an additional 150 dwellings over the plan period. This is, presumably, the result of the removal of employment space that was originally going to be delivered alongside 400 dwellings. SLP have no comments to make on this modification.

3.3 As can be seen, the Council has sought to address the shortfall in the early years of the plan by allocating additional sites at several locations across the district. Aside from the site at White Lion Walk, High Street, Guildford (Policy A60), all of the identified sites are within the Green Belt.
3.4 Combined, the identified sites have the potential to deliver around 700 additional dwellings over the plan period.

3.5 SLP has the following concerns with the approach of the Council. These are:
• The lack of contingency sites identified alongside the additional allocations; and
• The appropriateness of the locations chosen in sustainability and green belt terms.

Insufficient contingency in the event of a housing delivery shortfall

3.6 In previous representations, SLP has highlighted the disparity between past completions within the Borough and the annual housing requirement identified in the local plan. Since the examination, the latter figure has been further increased due to the need to take on some of Woking’s unmet need.

3.7 There is clearly a challenge to raise housing completions to the level required by the local plan. The reliance on large strategic and brownfield sites within Guildford mean that there are significant question marks around the deliverability of these sites due to the need to provide infrastructure for the former (e.g. the A3 RIS) and potential viability issues with the latter.

3.8 Whilst we note the incorporation of a 20% buffer within the proposed housing target, SLP are concerned that the constraints within a significant proportion of the District i.e. Green Belt mean that any shortfall in delivery could not be easily met through speculative applications to boost housing supply.

3.9 Indeed, this has likely been one of principal reasons as to why there is such a disparity between the Council’s net completions over the past 10-12 years and their local plan target.

3.10 Paragraph 11 of the NPPF requires plans to positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. The Council clearly feel that the allocation of the above sites to be sufficient to address this shortfall; however, SLP does not feel that simply allocating more sites provides this flexibility, especially given that there will be no realistic scope to address any future housing shortfall until the Local Plan review stage due to the Green Belt constraints discussed above.

3.11 Whilst SLP is confident that the Council would seek to address any shortfall at the Local Plan review stage, the effect will have been to delay the delivery of housing that could potentially have come forward in the shorter term. This would be contrary to the NPPF’s goal to significantly boost the supply of housing (paragraph 59).

3.12 SLP, therefore, feels that it would be prudent for the Council to consider the inclusion of a set of ‘reserve’ sites that could come forward in circumstances where the ‘presumption’ was engaged (i.e. a deficient housing land supply position or poor performance against the Housing Delivery Test).

3.13 On the issues of Housing Land Supply, the adoption of the plan will not rectify the Council’s position overnight. The revised NPPF makes it explicitly clear as to what can and cannot be included as part of a Five-Year Housing Land Supply assessment. This definition is provided below:

“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major
development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years."

3.14 Unless the Council is able to provide compelling evidence that the identified sites are deliverable in the short term, it is highly debateable that they would be able to deliver any sites in the early part of the plan period. This would also mean that progress towards addressing the existing shortfall would not be met until the middle part of the plan period which is precisely what the Council are trying to avoid with these allocations.

3.15 In short, any shortfall in housing delivery over the plan period (including the early years) could not be addressed through speculative applications in sustainable locations as these are affected by Green Belt constraints. Therefore, the Council should look to allocate reserve sites (inevitably located in the Green Belt) for development that could come forward in the event of such a shortfall being identified.

3.16 Whilst land at Tangley Place Farm was previously promoted alongside the land allocated as land north of Keens Lane (Policy A22), it would not be reliant on the delivery of the latter in order to come forward for development and certainly could assist in meeting a shortfall, should one arise. Thus, were the Council minded to produce a list of ‘reserve sites’, we would strongly encourage them to include Tangley Place Farm on such a list.

Are the proposed locations the most appropriate?

3.17 SLP questions whether the locations chosen by the Council are the most appropriate in both sustainability and green belt terms.

Sustainability

3.18 The Council has included sites at Godalming, Chilworth, Send and Flexford. Godalming aside, Chilworth, Send and Flexford have limited access to facilities and services and would likely require residents to travel into Guildford or other nearby villages to meet their day-to-day needs.

3.19 This is not to say that the sites chosen are inherently unsustainable; however, given that these sites are identified as ‘tier 10’ settlements in the Council’s Sustainability Appraisal, the sequential approach would dictate that sites within the Green Belt around Guildford (‘tier 9’) should have been considered in the first instance.

3.20 Large urban extensions are planned for Guildford (Blackwell Farm and Gosden Farm) as well as an allocation of 150 dwellings at Keens Lane (adjacent to Tangley Place Farm). However, only the latter (alongside some of the brownfield sites identified in the plan) would be expected to deliver any housing in the early plan period.
3.21 Guildford, being the most sustainable location for development (as reflected in the settlement hierarchy) also has the ability to deliver homes swiftly, particularly on non-infrastructure heavy, greenfield sites (such as Tangley Place Farm).

3.22 Indeed, demand at the locations identified by the Council is likely to be weaker than it would be within Guildford given access to services, facilities and employment opportunities that are absent from the surrounding villages. The sustainability credentials of a site generally correlate positively with its market desirability and, therefore, its potential for delivery. If the ambition is to identify sites that could be delivered early in the plan period, then a review of sites within the Green Belt around Guildford should have been the first port of call.

**Green Belt**

3.23 Furthermore, it is questionable whether the proposed locations are the most appropriate in Green Belt terms. Indeed, the sustainability appraisal conveniently summarises the four identified sites (paragraph 6.6.16). This extract is included at figure 1.

[see attachment for image included here]

3.24 The SA echoes the findings of the Green Belt and Countryside Study1 which confirms that all but one (Aldertons Farm, Send Marsh Road, Send) are RED rated in terms of their Green Belt sensitivity. In short, they are proposing allocations on highly sensitive Green Belt sites that are no more sustainable than other available and deliverable sites.

3.25Whilst Tangley Place Farm also falls within an area identified as being highly sensitive in Green Belt terms (parcel J4), this is the result of the site being assessed as part of a wider ‘cell’. Indeed, it is possible for areas within identified parcels to be of limited sensitivity when compared with others. We contend that this is the case for parcel J4.

1 This assessment considered the performance of each ‘cell’ against the five purposes as set out within the NPPF 2012. These did not change following the publication of NPPF 2018. It was assumed that all sites met the fifth aim (assisting in urban regeneration) and so the assessment only assessed performance against the other four purposes.

3.26 SLP has consistently argued that Green Belt boundaries should be reviewed around the north-western edge of Guildford more generally to accommodate a mix of housing and open space uses (including SANG) and reflect physical features that are readily recognisable and likely to be permanent. It is these physical features which should have dictated the land parcels identified for the purposes of the Green Belt review, rather than arbitrary areas based on field boundaries.

3.27 The Land at Tangley Place Farm benefits from such physical/defensible features which limit its sensitivity in Green Belt terms. These features constitute:

- an existing watercourse which bisects this parcel and would form a strong boundary along its western edge;
- important ecological designations and buffer zones affect the site within its northern half and this would ensure a robust northern boundary could established; and
- existing road infrastructure to the east and south which would secure these boundaries.
3.28 The concept document previously submitted with representations also shows how the delivery of development within the southern areas of the site (i.e. those most closely related to the built-up area of Guildford) the site can still contribute to the five key purposes of the Green Belt whilst accommodating some additional development. The site would also be able to deliver SANG as part of any scheme which has the potential to bring wider ecological benefits by relieving pressure on the Thames Basin Heath SPA.

3.29 The sustainability benefits of the location would make it a much preferable site to those sites that have been identified which are also rated as being highly sensitive in Green Belt terms.

**Summary**

3.30 Given that the ambition is to deliver homes in the early period of the plan, SLP objects to the Council’s decision to allocate sites that are inherently less sustainable and on highly sensitive Green Belt land when other viable options with better prospects of delivery exist (e.g. Tangleys Place Farm).

**Conclusion**

3.31 SLP does not believe that the Council’s approach to simply identifying more sites provides sufficient flexibility to help deliver the required dwellings in the early years of the plan period. This is because the Green Belt constraints that affect almost all land within the borough mean that opportunities to address the shortfall through speculative applications are severely limited. SLP therefore objects fundamentally to the simplistic approach taken by the Council.

3.32 In order to improve this flexibility, SLP feels that the Council should incorporate a set of reserve sites, alongside those that have been identified that could come forward in the event of a shortfall in housing supply.

3.33 SLP also objects to the sites that have been identified by the Council which are less sustainable and, with the exception of Aldertons Farm, at least as (if not more) sensitive in Green Belt terms than other viable alternatives (e.g. Tangleys Place Farm).

3.34 The Council has missed an opportunity to review the Green Belt boundary in a sustainable location along the north-western edge of Guildford to accommodate a mix of housing and open space uses (including SANG) that could alleviate pressures on the Thames Basin Heath SPA and deliver housing during the early years of the plan period.

**4. LOCAL PLAN REVIEW**

4.1 Paragraph 33 of the NPPF 2018 sets out the requirement for Councils to undertake local plan reviews within five years of their adoption. This has the purpose of updating policies where changing local circumstances indicates a need to do so. This includes a specific reference to strategic housing policies which will require updating if local housing need has changed, or is expected to change, significantly.

4.2 The implications of the revisions to the standard method for Guildford’s housing need are not yet clear, although this would be applied as part of any Local Plan review.
4.3 The Council’s housing completions data are also a cause for concern given that they have been significantly below the required housing need of the plan. Furthermore, the Council’s reliance on large strategic sites to deliver much of its housing toward the middle/later stages of the plan means that there is the potential for a shortfall should there be any significant delays to one or more of these sites.

4.4 The progress of these sites and the Council’s performance against the Housing Delivery Test should be monitored closely to inform the Local Plan review. Should it be revealed that the Council is performing poorly against these and other various measures (Housing Land Supply, delivery trajectories at the key strategic sites etc.) then there will be a strong case for the allocation of further sites given that the Green Belt constraints within the Borough would essentially negate the ability for speculative development to take place in order to address any shortfall.

4.5 Land at Tangley Place Farm would be ideal for an allocation as part of such a plan review given that it would be deliverable, sustainable and allow for the creation of a long-term, robust, defensible Green Belt boundary.

5. CONCLUSION

5.1 SLP generally welcomes the findings of the inspector following the examination hearings and acknowledges some of the positive steps made by the Council in response to his concerns. However, SLP objects to the lack of flexibility within the plan moving forward in the event that a housing shortfall is identified (a scenario which is not unlikely given the disparity between completions figures and the proposed annual housing target).

5.2 Whilst the allocation of additional sites is welcomed, the choice of these sites does not appear to be particularly logical given that more sustainable and less sensitive Green Belt sites are available and, therefore, more likely to be deliverable. Land at Tangley Place Farm is one such location.

5.3 Furthermore, the Green Belt constraints placed on land within the Borough means that there is no scope to address any identified shortfall in scenarios where the ‘presumption in favour of sustainable development’ would apply (e.g. deficient housing land supply position or poor performance against the housing delivery test).

5.4 SLP would, therefore, wish to see the incorporation of a ‘reserve site’ list to provide additional flexibility to the plan. This will ensure that sites can come forward to maintain a healthy supply of homes throughout the plan period should delivery on other allocated sites be slow or fail to come forward at all. Again, land at Tangley Place Farm could fulfil such a role.

5.5 Alternatively, it will be imperative for the Council to be positive at the Local Plan review stage for example, should circumstances dictate a requirement for a higher housing target and/or in the case of under delivery over the early period of the plan. In looking to address these potential issues, the Council will need to identify additional allocations, ideally alongside reserve sites, in order to ensure that housing can come forward consistently throughout the remainder of the plan period.

**Agent:**

MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63.  
New site for 120 homes.  
Although deleted from an earlier draft because of objections it is has been reinstated! It is a Green Belt site with no special circumstances so it does contradict Green Belt Policy MM9.  
Additional traffic will just add to the overall traffic problems that Send will have with these large developments.  
When you combine this with Garlicks Arch it adds 770 homes to Send that is a 45% increase in houses and is far too much for our infrastructure, furthermore, I'm told that according to Consultants and the Office for National Statistics appropriate growth in the Guildford Borough as a whole can be achieved with 460 houses per year.  
Why are GBC not looking at Brownfield sites which I understand could meet the requirements.  

**Attached documents:**

Comment: MM44 - LPMM18/2989  
**Respondent:** Chris Brown 8561057  
**Agent:**

**MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63**  
**I object** to the proposal for 120 homes at this location which is a wholly unsuitable development in such an area and for the same reasons as the other locations in Send namely excessive pressure on local services and additional traffic on a road system which was never intended for such potential traffic volumes.  
The only way in and out of this site is through Send Marsh Road which is unsuitable to carry this amount of extra traffic generated by this many houses. Access either end, at Send Dip and Mays Corner onto Send Road is already very difficult due to the congestion through Send and Ripley and the result will be long traffic jams along Send Marsh Road.  
This is prime green belt land and there is no reason to make an exception for housing here when there are other areas outside of the greenbelt or on brownfield sites. GBC do not have any explanation as to the reason for the exception to put this land on greenbelt land for this site.  
This is not acceptable.  

**Attached documents:**
**Comment: MM44 - LPMM18/6035  Respondent: C Sheard 8562561  Agent:**

**MM44 Site at Aldertons Farm Send Marsh Road**

This new site for 120 homes was deleted from an earlier draft. It is a Green Belt site and no exceptional circumstances have been demonstrated; it is adjacent to an Ancient Monument and a collection of Listed Buildings which date back almost 600 years (of which Aldertons is one). Listed Buildings Permission is supposed to apply to their curtilage as well as the buildings themselves and whilst the site may not be in the immediate curtilage of Aldertons it is certainly within the general curtilage thereof. Moreover, considering the revised figures issued by the ONS in September 2018, this site is unnecessary and as with the Garlick’s Arch Site, local facilities will not bear the increase in population implied. I object most strongly to the re-introduction of this site, and note that there was no detailed discussion of its inclusion allowed by the Inspector during the examination of the Local Plan.

Comment: MM44 - LPMM18/5687  Respondent: Douglas French 8574369  Agent: 

MAIN MODIFICATION MM 44  Alderton’s Farm, Send March Road, Policy A63

I object to this site for 120 houses being reinstated at the Public Examination stage when it was deleted from an earlier draft because of the very cogent arguments against it made by residents. Now these arguments have been ignored again. With the addition of 550 houses at Garlick’s Arch, 60 at Clockbarn, 40 at Winds Ridge it makes a
grand total of 770 extra houses, equivalent to an increase of 45% over the 1700 currently in Send/Send Marsh. The roads and the infrastructure are totally unsuited to this level of increase and no evidence has been produced to show that the implications have been properly thought through. Building here would be detrimental to the heritage sites at Send Marsh Green, destroy a natural wildlife habitat between Send Village and Send Marsh and join them up, so damaging the natural openness of the area.

**Comment:** MM44 - LPMM18/2853  **Respondent:** Ian Reeves 8575649  **Agent:**

Individual concerns:-

1) MM44 Land at Aldertons Farm, Send Marsh Road, Policy A63.

Site for 120 homes.

Why is this in the GBC first 5 year development plan - it is Green Belt land with no special circumstances so it contradicts Policy MM9.

These fields ( now paddocks to graze horses ) absorb a great deal of moisture and act as natural drainage resulting in flooding in the lower field during the winter. Send Marsh is as the name implies a marshland and does not require being concreted over to exacerbate the problem.

My neighbour in Tuckey Grove has some form of stream running under his garage and after rain it springs up in his drive and runs down the road. There is another site 50 metres away where water bubbles up during winter months. Building 120 houses on this site could result in further water issues in adjoining houses.

Apart from the horses in these fields there is much wildlife including deer that can often been seen grazing along side them.

The additional traffic will increase pressure on the Send Cross Roads.

It will detract from the whole heritage and buildings in Send Marsh.

Development of it will incur much noise and disruption within a Surrey village being swamped with unnecessary development.

This will add to more pressure on already stressed Surgery and School facilities.

Individual concerns:-

1) MM44 Land at Aldertons Farm, Send Marsh Road, Policy A63.

Site for 120 homes.

Why is this in the GBC first 5 year development plan - it is Green Belt land with no special circumstances so it contradicts Policy MM9.

These fields ( now paddocks to graze horses ) absorb a great deal of moisture and act as natural drainage resulting in flooding in the lower field during the winter. Send Marsh is as the name implies a marshland and does not require being concreted over to exacerbate the problem.
My neighbour in Tuckey Grove has some form of stream running under his garage and after rain it springs up in his drive and runs down the road. There is another site 50 metres away where water bubbles up during winter months. Building 120 houses on this site could result in further water issues in adjoining houses.

Apart from the horses in these fields there is much wildlife including deer that can often been seen grazing along side them.

The additional traffic will increase pressure on the Send Cross Roads.

It will detract from the whole heritage and buildings in Send Marsh.

Development of it will incur much noise and disruption within a Surrey village being swamped with unnecessary development.

This will add to more pressure on already stressed Surgery and School facilities.

The new housing plan calls for increases to the Garlicks Arch area, adjacent to Send Marsh (MM41) Policy A43 from 400 to 550 homes and reintroduction of 120 homes to Aldertons Farm, Send Marsh (MM44) Policy A63. This latter area was withdrawn from an earlier plan for very good reasons. With Clock Barn (60) and Winds Ridge (40) it adds 770 houses to the 1700 currently in Send and Send Marsh villages, an increase of 45%. More importantly the Garlicks Arch and Aldertons Farm sites are set at each end of the village of Send Marsh which is taking an unrealistic 'Hit of Development', scheduled for the first five years of the plan on Green Belt Land! This is not sustainable and will put pressure on an already stressed infrastructure.

Attached documents:

Comment: MM44 - LPMM18/1585  Respondent: Mr John Sweeting 8579393  Agent:

Re: Site numbered A44 in the revised draft local plan.

I would like to object to the inclusion of this site in the draft local plan for the following reasons:

1. As 1 above.
2. There is some provision for Travellers/Showpeople in A43
3. This development will add to the disproportionate burden on the north east of the Borough.
4. There is a question as to the suitability of the land for building purposes.

Re: Sites numbered:

A25 – Gosden Hill
A35 – Former Wisley Airfield
A42 – Land at Burny Common Heath
A43 and A43a - Land at Burnt Common – known as Garlick's Arch
A58 - Land around Burnt Common warehouse
A63 - Land at Aldertons Farm

in the revised draft local plan.

I would like to object to the inclusion of these sites in the draft local plan for the following reasons:

1. There remains considerable uncertainty in the number of houses needed in the Borough. In view of the recent EU referendum vote and its impact on future immigration, the number of houses required is likely to reduce further.
   This view is now confirmed by the recent Office for National Statistics (ONS) prediction that the number of homes needed in the Borough in the plan period is 4662 – a substantial reduction compared to the earlier forecast of 7717. To increase the number of sites – i.e. the addition of site A63 - and to increase the development at other sites is perverse to say the least and simply ignores ONS figures and the wishes of most of the residents to keep the area semirural.

2. With the revised ONS forecast, the requisite number of homes can be met from brownfield sites – as noted by Councillor Susan Park. Continuing with the increased number will result in unnecessary loss of the Greenbelt. This is a tragedy and contradicts policy MM9 as 'special circumstances' necessary for reclassification have not been established.

3. Wisley/Ripley/Send/Burnt Common/Send Marsh is a semi-rural area and development on this large scale will lead to urbanisation and permanently change the nature of the area.
   In particular this could provide the starting link in connecting Guildford to the M25.
   The Greenbelt policy was originally introduced to counteract urban spread and has worked well for many years and there does not appear to be any reason to abandon it at this time as once the space has gone it will never be recovered.

4. These developments place a disproportionate burden on the north east of the Borough.

5. Traffic will increase significantly and the access and exit roads to and from the A3 are too narrow to cope with the resultant increase in traffic - particularly at peak hours when additional congestion at the junctions in the vicinity of the A3 is likely.

6. With specific reference to site A63, there is currently less than 100 homes with a frontage on Send Marsh Road, adding 120 homes at this site with access from Send Marsh Road will inevitably increase the traffic and during peak hours is likely to cause serious congestion at both ends of the road and Send Marsh Green.

7. Other infrastructure.
   The Garlick's Arch, Clockburn and Winds Ridge sites are estimated to result in an increase demand of 45% on the infrastructure in that area. Is there adequate power, drainage and sewage provision for industrial development? And are there sufficient school, medical and similar provisions for domestic expansion?

8. Light and sound pollution.
   The area enjoys fairly dark skies for its proximity to London. Any additional development will add to the light pollution unless provisions are made to ensure strict control of any additional lighting. Please consult Guildford Astronomical Society.
   It already suffers from noise pollution from the A3. Traffic noise pollution seems inevitable if development proceeds.
   If, despite their adverse impact, the sites continue to be included in the plan, provision should be made for strict control of noise and light pollution emanating from the sites – particularly at night time.

9. The sites contain a substantial number of trees many of which are quite mature and must make a significant contribution to the Borough's carbon reduction target. Examples are Garlick's Arch in particular contains ancient woodlands and even the Aldertons site contains a large mixed hedge . It seems perverse that planning permissions have been refused because of the impact on individual trees whilst the wholesale destruction of woods and hedges seems inevitable if these sites are included.
   It seems difficult to reconcile these two extreme positions.
   If, despite their adverse impact, the sites continue to be included in the plan, preservation orders should be placed on appropriate trees as a minimum requirement.

Attached documents:
Policy A62 /A63 /A64 new sites

Aside from being located in the Green Belt, these policies make no mention of infrastructure requirements such as roads and sewer capacity on any site or the specific requirement to provide meaningful upgrades to the existing infrastructure.

3. Rows A61 – A64

We note all these sites are further releases of Green Belt land rather than finding increased capacity in urban areas. The additional capacity is akin to one year supply (672) not five (3,360).

Attached documents:

Comment: MM44 - LPMM18/2247  Respondent: Leslie Brown 8586017  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

I object to the proposal for 120 homes at this location which is a wholly unsuitable development in such an area and for the same reasons as the other locations in Send namely excessive pressure on local services and additional traffic on a road system which was never intended for such potential traffic volumes.

Attached documents:

Comment: MM44 - LPMM18/3495  Respondent: Trans Lease Services (Mrs Lisa Scott) 8586625  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July.
- It is a Green Belt site with no special circumstances so it also contradicts Policy MM9.
- It will detract from the heritage buildings at Send Marsh Green.
- The additional traffic will increase pressure on the Send Crossroads.
- With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/3580  Respondent: Linda Parker-Picken 8587105  Agent:

Site MM44. The land at Alderton’s Farm was removed following the 2014 consultation. It is now suggested to add it back. It is Green Belt and flood land and those reasons for it not being built on are still valid. It also forms a green break between Send and Send Marsh.
(1) Green corridors and linkages to habitats outside of the site
These are not opportunities! The existing corridors and linkages will be reduced!

(2) Encourage connections with services and facilities in the village.
These are already at capacity. As for shops, we have recently lost both the Post Office/ General Store and Patel’s newsagents, which have both become residential accommodation. And the local hairdresser is closed.

Attached documents:

Comment: MM44 - LPMM18/1553  Respondent: Michael R. Murphy 8589953  Agent:

MM44 Land at Aldertons Farm, Send Road, Policy A63.
New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY.
With Garlicks Arch 550, Clockbarn 60, Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%
How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment.
Agin this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

Attached documents:

Comment: MM44 - LPMM18/2261  Respondent: Mr Michael J Harris 8590209  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63
I am appalled that this site, which was deleted from an earlier draft due to the many objections, has now been added in once again. Together with all the other proposals for new housing in Send, it will mean an increase of about 45% in Send housing, and will cause much additional traffic on these local roads, crossroads and T junctions. As with the Garlicks Arch site, it will put an unsustainable pressure on both local schools and our surgery. It is, as is well known by your Council, within the Green Belt, and there are no special circumstances for using it for development, thus it contravenes Policy MM9.
Part of the site is often flooded and marshy in very wet weather, and therefore most unsuitable for housing development. (See the photo that I included with my letter a few years ago in one of the original consultations). A final point is that I believe that this development would detract from the heritage buildings at Send Marsh Green.

Attached documents:
**Objections to Modification MM9 and MM44**

I object in the strongest possible way to the plans of the Council to build in the Green Belt on any site, even when (subjectively) it is determined as being on 'within the confines' of a village. Who determines this?

It is a precedent that is extremely dangerous for everyone who loves the land we live in. This specially protected land is meant to give a better quality of life to those who live in the city. The protection of Green Belt land should be seen as sacrosanct and to build on this when there are no special circumstances removes the rights of our descendants.

The Land at Alderton's Farm is one which together with other planned developments for the area is likely to increase traffic and pollution with no real advantages for the village, only the profit of the developers. Roads in this area are narrow and twisting and the introduction of several hundred cars is not going to make life pleasant for those living nearby. It also raises the possibility of unsuitable, narrow roads without footpaths being used as cut-throughs to avoid the congestion that is likely to occur at the Send crossroads and in Ripley.

**Attached documents:**

---

**Comment: MM44 - LPMM18/3933  Respondent: Allen Fencing (Mr Paul Cope) 8598433  Agent:**

**MM44 – Aldertons Farm (policy A63)**

This site proposes development for building around 120 homes, but it is GREEN BELT land No ‘special circumstances’ should apply, especially as the land has been subject to flooding and does not drain well

The likely increase in traffic would be inappropriate for a site bordering on residential areas

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

The knock-on effect, in addition to other sites, would be excessive for our village, given the revised (ie lower) ONS forecasts for housing needs

WE OBJECT to this development and the proposed modification

**Attached documents:**

---

**Comment: MM44 - LPMM18/5749  Respondent: Sarah Belton 8598561  Agent:**

**MM44** There is some justification for infill of this area as it is surrounded by housing that forms part of the village of Send, even though it is within the greenbelt area. However, the number of houses is excessive and without specific, clearly stated infrastructure requirements for a large development on land which is subject to regular minor flooding, it should not be permitted to go ahead as currently stated.

**Attached documents:**
**Comment: MM44 - LPMM18/1604  Respondent: Mr Richard D Jarvis 8599201  Agent:**

This site may not be needed given the lower forecasts for population and households. If it is pursued, then it would contribute to the growth in traffic in the Send area, and an assessment of the cumulative effect of the local growth planned is required, as commented on Policies A43 and A58.

**Attached documents:**

**Comment: MM44 - LPMM18/2948  Respondent: Roger Newland 8600929  Agent:**

With regard to the impact on Send and Ripley I would comment as follows:

**MM41 and MM44** housing on Garlic's Arch and Aldertons, Send.

The combined development at Garlic's Arch and Aldertons is disproportionate and will have the effect of nearly doubling the population of the village of Send Marsh with little or no improvements to the infrastructure, notably schools and health facilities. The proposal to add 670 homes (the total of both sites) all within the Green Belt in a five year period will change the nature of Send Marsh as a semi rural village. The impact on Send as a whole and Ripley with regard traffic will be horrendous particularly if the A3 slip roads North are provided.

It is appreciated that the borough needs smaller affordable properties but the Garlics Arch proposal is environmentally unsuitable for dense development being close to the A3 with attendant noise and air pollution and it will not lead to a sustainable environment for the new residents.

**Attached documents:**

**Comment: MM44 - LPMM18/2140  Respondent: Susan Greenman 8606081  Agent:**

**MM44 - Land at Alderton's Farm, Send Marsh Road Policy A63**

Once more I object to the plans for another 120 homes on this site.

This is Green Belt land with no special circumstances so it also contradicts Policy MM9.

Send Marsh Green is an area with traditional and heritage buildings and new homes will not enhance the enviroment. The rural location will be lost.

More cars on the surrounding roads and particularly the crossroads at Send will cause more congestion and gridlock - especially at rush hours.

With Garlick's Arch (550), Clockbarn (60), Winds Ridge (40) this development will add 770 more houses to the 1770 currently in Send an increase of 45%. This is totally unacceptable. It is almost doubling the size of Send, once a rural area and now being slowly urbanized and ruined.

<td>Object due to over development of green belt land. In combination with other developments in the Send area (esp MM42 and MM41) will lead to unacceptable increase in traffic and pollution. Infrastructure at present cannot cope with traffic heading from A3 to Woking via Old Woking at peak times. This is inappropriate development on land which is important for the character of the area and is to close to the the wildlife reserves at Papercourt lake. The case for 'very special circumstances' to develop greenbelt land as outlined in the NPPF framework has NOT been met. This land was previously consulted on and was removed from the local plan for the above reasons. Its inappropriate to keep submitting the same site - the same reasons for exclusion exist now as then and ALL previous objections should be valid again. This site is not required due to the ONS revised housing need requirements which have NOT been used to assess future needs. The fact the developer has pushed this site as one to be developed in the 1-5 year time frame does NOT qualify as special circumstances hence it should be removed as previously agreed. The Ministry for Housing, Communities and Local Government (MHCLG) emphasised that councils should prioritise brownfield sites for redevelopment and green belt land should be preserved and protected 'at all costs'. The SCC has not explored all possibilities of brownfield development and is not following the MHCLG guidance (Mar 2018). This site is the source of frequent flooding after heavy rain and is not suitable for development.</td>

This is a green belt area and the proposed 120 homes can not surely be justified. It clearly contradicts policy MM9. The additional traffic will put increased pressure on all the Send roads including the crossroad close to a school.

**Attached documents:**
MM44 - Land at Aldertons Farm - New site for 120 dwellings

- This is Green Belt, only to be developed in exceptional circumstances, which cannot be claimed in this proposal
- Car movements will increase by upwards of 250 per day
- Schools, Doctors’ Surgery and roads are already at full capacity
- Taken altogether, the number of dwellings in the village will increase by 45%, which is disproportionate, unsustainable and an unreasonable burden on existing residents

The GBC Planning Policy Team have presided over a very opaque consultation process, with missing or misleading data; withheld reports and a complete disregard for the genuine concerns of local residents that the outcome of this plan will be to destroy the fabric of the village. We all accept the need for more homes in the borough and that this will result in some inconvenience, but the sheer scale of the present proposal is excessive and completely out of all proportion to need, policy and reason.

I object to this development as it will be yet another use of Green belt land, it will destroy local habitat, & have a detrimental affect on local traffic, school & medical facilities

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

New site for 120 Homes

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July. Again, ‘consultations’ with residents have been ignored and the numbers have been escalated.

It is a Green Belt site with no special circumstances so it also contradicts policy MM9

It will detract from the heritage buildings at Send Marsh Green

The additional traffic will increase pressure on the Send Crossroads.

With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

**Attached documents:**

Comment: MM44 - LPMM18/447  
Respondent: Janet Manktelow 8793025  
Agent:

MM44
Land at Aldertons Farm, Send Marsh Road.

This proposed site for 129 houses on the land seems very strange as this site was deleted from the earlier draft following a vast amount of objection. This site is in one of the more historical parts of the village. It would detract from the surrounding heritage buildings on the nearby village green.

This site is on Green Belt land and there are again no extenuating or exceptional circumstances to permit development. Local infilling is a much better strategy.

Attached documents:

**Comment:** MM44 - LPMM18/1385  **Respondent:** Mr Paul Tubman 8794529  **Agent:**

This proposed development supposedly takes advantage of the vague definition in MM9 of 'Limited infilling' being considered 'where it can be demonstrated that the site should be considered to be within the village.' This development is outside of the boundary of the village of Send Marsh / Burnt Common and there are no special circumstances shown as to why this development should be seen as an exception to the NPPF and its policies protecting the Green Belt. As a result there is no reason to change the boundary of the village of Send Marsh to accommodate this development.

Send Marsh village has much character centred around the Village Green and several heritage buildings surrounding the green. The close proximity and size of this proposed development will change the local character of the area and will respond and reinforce locally distinct patterns of development, including landscape setting.'

Road infrastructure in the area going in all directions (Send Marsh Road towards Send and towards Portsmouth Road, and Polesden Lane) are already insufficient and unfit for current traffic levels. The addition of a further 120 homes on Send Marsh Road will create excessive problems on these roads, particularly Polesden Lane which is already a pinch-point.

The total new housing proposed for Send when including Garlick's Arch (550), Winds Ridge (40), Clockbarn (60) and Alderton's Farm adds 770 houses to the 1700 currently in Send, increasing the total development by 45%. This is an unreasonable increase and the local traffic, educational and medical infrastructures will not be able to cope.

I oppose this amendment to the Guildford Plan.

Comment: MM44 - LPMM18/4588  Respondent: Timothy Bruton 8803617  Agent:
I would like to register my opposition to the latest modifications of the Guildford Local Plan which are relevant to Send.

In particular I object to development at the site at Alderton’s Farm (MM44). This is a valuable green area which is an important part of the rural character of the village of Send and housing here would destroy this important area. In addition houses on this site would lead to further congestion at busy times of day at either end of Send Marsh Rd (B368) where it either joins the Portsmouth Rd (B2215) or the already congested A247 at May’s Corner.

I further object to the modifications as I think they will cause a dangerous increase in traffic. Neither the Alderton’s Farm site (MM44) and Garlick’s Arch (MM41) have good public transport or cycle paths and the pavements along Send Marsh
Rd are very narrow so there would be an inevitable increase in the number of car journey’s to and from these sites. The Alderton’s Farm site had previously been rejected as unsuitable.

Furthermore these additional houses would put extra pressure on the already busy medical centre and the school which is a new build and is already full.

The Office of National Statistics’ prediction is that there is a decrease in the previously anticipated number of houses needed in Guildford and this has important consequences for the proposed developments in Send. The Local Plan modification will enable increase in housing in Send over and above those in the original Local Plan proposal. These new ONS figures make it unnecessary to plan in extra housing in Send.

Attached documents:

Comment: MM44 - LPMM18/956  Respondent: Wellesley Theodore Wallace 8803841  Agent:

Policy A63 : Land west of Alderton's Farm, Send Marsh Road (MM 44)(MM48)

This land is in fact east of Alderton's Farm not west. The road runs from May's Corner, Send, where it joins the A247, to the B2215 Portsmouth Road opposite ancient woodland which is part of Site 43 and nearly opposite Kiln Road which borders Site 43.

The traffic generated by 120 homes will undoubtedly impact traffic on the A247 in Send and West Clandon as well as Ripley. There are already traffic lights at May's Corner. Far from contributing to the delivery of an integrated accessible and safe transport system, it would do the reverse.

The geographical misdescription of the location of the site indicates the lack of adequate consideration given to this allocation, Policy A63 should be deleted.

Attached documents:

Comment: MM44 - LPMM18/6101  Respondent: Alena Thomas 8805633  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

This has been reinserted into plans at the last minute. The land is green belt, and the traffic will put pressure on already struggling infrastructure.

2111 of 2575
I object to this addition of 120 houses to the plan.

The site is Green Belt with no special circumstances.

The increase in traffic will create gridlock our roads.

The levels of dangerous toxic air will increase.

Existing local services such as the schools and medical centre will not be able to cope with the additional people. They are already full to capacity.

If this went ahead, the amount of new homes being built with rise to 770, adding to the current 1700 resulting in an increase of 45% - this is far too much for our current infrastructure to cope with.

The consultancy firm Barton Willmore, have said that the correct figure for Guildford’s housing need should be 431 per year and the September data from the Office of National Statistics suggests that appropriate growth in Guildford Borough may be achieved with 460 houses a year. Why is it therefore felt that figure 789 per year figure should be used by the Inspector at the Public Examination? This is hugely over the top. Why is Send being proposed to be the main site to put all these extra, un-needed homes? We are a small Village and want to stay that way.

I agree there should be some development and understand the need for more housing, but I believe that this should be done throughout the borough using smaller developments and not concentrated in Send.

The current proposals for Send Marsh and Send are very inappropriate and will be highly damaging for the community and the area, let alone be an unnecessary erosion of the Green Belt.

These proposals have not given any solutions to the amount of traffic chaos, pollution, collapse of the local infrastructure and destruction of the green spaces in and around Send.

**Comment:** MM44 - LPMM18/4971  **Respondent:** Lynn Yeo 8839521  **Agent:**

I object to MM41, MM42, MM44, MM9, MM27, POLICY S2.

At the public examination, the figure for Guildford Borough housing need used by the inspector was 789 per year. This figure was obtained by Guildford Borough Council (GBC) Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated. The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year. In addition, using data from the Office of National Statistics population forecasts, suggests that the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of GBC consultants figures which have always been very suspect. I believe the number of houses per year to be unreasonably high, and that the actual figure should be revised downwards for more responsible and reasonable levels of development.

**Attached documents:**

**Comment:** MM44 - LPMM18/4980  **Respondent:** Lynn Yeo 8839521  **Agent:**

I object to MM44 Land at Aldertons Farm, Send Road, Policy A63.

This site for 120 homes was deleted because of objections and not reinserted until the public examination in July. I used to live on Aldertons Farm and can confirm that the surrounding fields were often flooded and waterlogged throughout the winter months.

This is a Green Belt site with no special circumstances so it contradicts policy MM9.

550 new homes at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge, means an additional 770 houses are being added to the 1,700 currently in Send, an increase of 45%! The predictable outcome is that current and future residents will face excessive traffic, pollution and poor supporting infrastructure due to the ridiculous size of the proposed development. Again this is Green Belt and with no special circumstances, it contradicts policy MM9.

• The development will detract from the heritage area of Send Marsh Green and the number of Listed buildings around it.
• Send Marsh Green (by the pillar box and the property known as Sendale) is subject to flooding during periods of heavy rainfall. As the existing storm water drains are inadequate and building on this site will only aggravate the problem.
• The development (coupled with MM41) will join up the distinct and separate villages/communities of Ripley, Send Marsh and Send to the detriment of all three.
• The increase in the number of units will put undue pressure on local roads and particularly the junction at Send Road and the existing dangerous 90 degree bend in Send Marsh Road by the Green.
• There is no provision for increased school places (and indeed further pressure on school places has resulted from the closure of Ripley Primary School) or for an increase in medical facilities which are at present fully subscribed.

Comment: MM44 - LPMM18/1009  Respondent: Desmond McCann 8854785  Agent:

MM44 land at Alderton's Farm, Send Marsh Road Policy A63

I object to this development

• This has recently been re-inserted after the previous objections were accepted..why? especially as the housing numbers have now been called into question.
• The total number of houses proposed in Send is totally out of proportion to the size of the village.

Please LISTEN to local people. Suprisingly they actually know what is good for the local community, and it is community that is vital for the sustained happiness of an area. Yes we should build some more houses in Send but in proportion. And why have all the proposals to develop brownfield sites in Guildford seemingly rejected or overlooked. A cynic might think that developers find it easier and more profitable to build on Green Belt. Time and again they build 4 (tiny) bedroom 'executive' houses because that is where the money is, when we need starter homes and affordable homes. Is Guildford supporting a Housing Association to facilitate this?

Site MM44. The land at Alderton’s Farm was removed following the 2014 consultation. It is now suggested to add it back. It is Green Belt and flood land and those reasons for it not being built on are still valid. It also forms a green break between Send and Send Marsh.
MM44 “Opportunities”
(1) Green corridors and linkages to habitats outside of the site
These are not opportunities! The existing corridors and linkages will be reduced!

(2) Encourage connections with services and facilities in the village.
These are already at capacity. As for shops, we have recently lost both the Post Office/ General Store and Patel’s
newsagents, which have both become residential accommodation. And the local hairdresser is closed.

Attached documents:

Comment: MM44 - LPMM18/2287  Respondent: P A Clarke 8875361  Agent:

MM44 I OBJECT to the use of this Green Belt area to be used for the building of 120 homes when there are no special
circumstances and it will add yet more traffic to our already overstretched roads.

In spite of many thousands of public objections raised against previous versions of the plan regarding building on the
Green Belt in such high numbers, no effort has been made to address these concerns with these modifications. In fact the
number of houses has increased and a large increase in planned industrial space has been made. If the above
modifications were to go ahead together with all the other planned housing developments planned for Send then there will
be an increase of 45% of housing in the village. The local infrastructure cannot cope, the roads will become gridlocked
and there will be increased noise and pollution. We need to keep the Green Belt sacrosanct as stated in government
policy.

MM44 Land at Aldertons Farm, Send Marsh Road A63

This proposal was previously rejected (GU/R/13751) it is presumed that rejection means what it says as there are no
exceptional circumstances it contradicts MM9 Green Belt Policy. The additional development will place further pressure
on the existing infrastructure.

In conclusion when all the proposals are totalled there will be so much additional pressure on exisiting infrastructure
which is already inadequate.

The county has already the highest density of vehicles in the country and local roads have not been upgraded since the
1920's, the A3 [unreadable text] and slip roads cannot cope with existing pressures, e.g. congestion at the A3/A31
junctions and the effect of traffic lights failure at Stoke Road roundabout. The infrastructure also includes schools, and medical facilities etc. Apparently brownfield sites have not been considered as a priority.

### Comment: MM44 - LPMM18/2652  Respondent: Andrew Russell 8920353  Agent:

**MM44 - Land at Aldertons Farm, Send Marsh:**

The allocation of Aldertons Farm for some 120 homes is in my view completely and utterly wrong. Send Marsh has a particular character and feel, not least a number of listed buildings fronting the Send Marsh Green. The development of new housing which, I understand is under option in favour of one of Britain's leading housebuilders (Barratt Homes) will detract from the period buildings fronting Send Marsh Green and more specifically is a blatant example of new development which should not happen given the Green Belt status of the current site. This is the thin end of the wedge and I find it abhorrent that the Council will countenance the development of such a site given the unique style and character of Send Marsh and the semi-rural feel that currently prevails. In short, on top of the Garlicks Arch development this will simply prove too much of a burden for the existing road network.

As referred to above this 'in-filling' outside identified Settlement boundaries is subjective and undermines Green Belt protection. It points to any land on the edge of any village potentially being picked off for Urban Development, not one or two houses potentially being built in accordance with appropriate materials reflecting the heritage of the immediate environment, but large scale development in 'Housing Estate' format which in my view is totally inappropriate for Send Marsh and will undermine and alter the character of the village forever.

The Green Belt really came to fore in 1947 under The Town & Country Planning Act when Local Authorities were allowed to include Green Belt property in the local plans. The intention was for the Green Belt to act as a buffer to protect urban sprawl. The policies being proposed by Guildford Borough Council are in direct contradiction to the original and defined objective of preventing urban expansion and the potential 'linkage' of Towns and Villages. Once Green Belt land is developed, it has gone forever.

In summary, the proposed nature of development in Send and indeed Gosden Farm in Merrow is going to fundamentally change the character of the area forever and I find it extremely concerning that this scale of development is being counternanced, the policies relating to housing in the Borough needs to be re-examined particularly in relation to MM44 and MM41.

**Attached documents:**

### Comment: MM44 - LPMM18/3854  Respondent: Claire Bridges 8923905  Agent:

**MM44 Land at Alderton's Farm, Send Marsh Road Policy A63**

I object to the proposal for 120 homes at this location which is a wholly unsuitable development in such an area and for the same reasons as the other locations in Send namely excessive pressure on local services and additional traffic on a road system which was never intended for such potential traffic volumes.

The only way in and out of this site is through Send Marsh Road which is unsuitable to carry this amount of extra traffic generated by this many houses. Access either end, at Send Dip and Mays Corner onto Send Road is already very difficult due to the congestion through Send and Ripley and the result will be long traffic jams along Send Marsh Road.
This is prime green belt land and there is no reason to make an exception for housing here when there are other areas outside of the greenbelt or on brownfield sites. GBC do not have any explanation as to the reason for the exception to put this land on greenbelt land for this site.

This is not acceptable.

Comment: MM44 - LPMM18/5991  Respondent: Patrick Sheard 8954977  Agent:

MM44 Site at Aldertons Farm Send Marsh Road

This new site for 120 homes was deleted from an earlier draft. It is a Green Belt site and no exceptional circumstances have been demonstrated; it is adjacent to an Ancient Monument and a collection of Listed Buildings which date back almost 600 years (of which Aldertons is one). Listed Buildings Permission is supposed to apply to their curtilage as well as the buildings themselves and whilst the sire may not be in the immediate curtilage of Aldertons it is certainly within the general curtilage thereof. Moreover, considering the revised figures issued by the ONS in September 2018, this site is unnecessary and as with the Garlick’s Arch Site, local facilities will not bear the increase in population implied. I object most strongly to the re-introduction of this site, and note that their was no detailed discussion of its inclusion allowed by the Inspector during the examination of the Local Plan.

Comment: MM44 - LPMM18/1513  Respondent: Earl of Onslow and the Trustees of Onslow Estate 8957345  Agent: Nexus Planning (Adam Ross)

MM44 – Land west of Alderton’s Farm, Send

For the reasons set out in our detailed representations to MM2, the proposed allocation of this site is unjustified given the Council’s evidence in the SA Addendum 2018, and is contrary to the Council’s own spatial hierarchy / approach given its failure to allocate the deliverable, more sustainable and sequentially preferable site at Clandon Golf (as an urban extension to Guildford).

Changes Required

For the reasons set out in detail in our representation to MM2, the revised spatial strategy (and specifically the allocation of the sites identified in MM39, 43, 44 and 45) is unjustified and unsound.

The Council must re-visit the strategy to allocate additional sites to deliver in the first five years of the Local Plan (post-adoption) and base its decisions on clear evidence (most notably the SA Addendum) and its own spatial hierarchy / approach. This will result, on the Council’s own evidence, in the identification of a different development option (and therefore a different suite of sites) to those now proposed. It will also, most importantly, result in a more sustainable distribution of development (on the Council’s own terms).
Comment: MM44 - LPMM18/4615  Respondent: Victoria Sandu 9042049  Agent:

Change MM44

I object to this change for the following reasons:

- This proposed development takes advantage of the vague definition in MM9 of 'Limited infilling' being considered 'where it can be demonstrated that the site should be considered to be within the village.' This development is outside of the boundary of the village of Send Marsh / Burnt Common and no special circumstances have been demonstrated as to why this development should be seen as an exception to the NPPF and its policies protecting the Green Belt. As a result there is no reason to change the boundary of the village of Send Marsh to accommodate this development.

- Send Marsh village has much character centred around the Village Green with several heritage buildings surrounding the green and local wildlife reserves such as Papercourt Lake. The large size and close proximity of this proposed development will change the local character of the area and goes directly against Policy D1 (6) in MM23 which states 'All new development will be designed to reflect the distinct local character of the area and will respond and reinforce locally distinct patterns of development, including landscape setting.'

- The proposed new development is a site which has wide spread wildlife such as hedgehogs, butterflies and birds, some of which are endangered species, particularly hedgehogs. The new development will significantly reduce this habitat and will have a detrimental effect.

- Road infrastructure in the area going in all directions (Send Marsh Road towards Send and towards Portsmouth Road, and Polesden Lane) are already inadequate for current traffic levels, with already long queues every morning. The addition of a further 120 homes on Send Marsh Road will create excessive problems on these roads, particularly Polesden Lane which is a single lane road, already used as a diversion route when there are traffic problems nearby.

- Total new housing proposed for Send when including Garlick's Arch (550), Winds Ridge (40), Clockbarn (60) and Alderton's Farm adds 770 houses to the 1700 currently in Send, increasing the total development by 45%. This is an unreasonable increase and the local traffic, educational and medical infrastructures will not be able to cope.

- The increase of 770 houses in Send will also noise levels over above the significant noise already heard from the A3 and the Portsmouth Road.

Attachment documents:

Comment: MM44 - LPMM18/143  Respondent: Jillian Tallick 10423265  Agent:

I would like to register my objections to the current planning for additional developments around Send Village.

In particular I would like to object to the developments MM44 and MM41.

As well as impacting on the heritage of the area around Send Marsh Green, MM44 also contradicts the Green Belt policy of MM9. This land has always been listed as green belt land and therefore other non-green belt sites should be considered before developing this green belt land. In addition, the whole area around Send is at full capacity for what the current infrastructure can support, this includes:-

Roads
Schools
Doctors
Dentists

Send Villages Medical Practice is full, takes many days if not weeks to get a Doctor's appointment. Ripley has now lost its local primary school and only has one small dentist practice. The roads around this area are heavily congested at all times and safety is becoming an issue as more and more major accidents are happening on the A3 section parallel to the Send/Ripley area as well as parking being pretty nonexistent during peak times. With no local schools being able to take a large influx of new residents, this would result in yet more traffic as new residents would have to drive their children to distant schools outside of the local area.
Therefore, without substantial additional infrastructure to support the above, this area cannot support any more additional housing as shown in MM44 and MM41.

Attached documents:

**Comment: MM44 - LPMM18/3501  Respondent: Rosslyn Reeves 10443169  Agent:**

I am writing to protest most strongly to the latest Draft Guildford Local Plan which has substantially increased Green Belt Development in Send and Send Marsh. I would like my comments to be seen by the Planning Inspector.

The recent Planning Inspectors report on the Guildford Local Plan was worrying as it suggests even more development in Send and Send Marsh than the previous Plan.

The new housing plan calls for increases to the Garlicks Arch (MM41) area Policy A43 from 400 to 550 homes and the reintroduction of 120 homes to Aldertons Farm, Send Marsh (MM44) Policy A63. This latter plan was withdrawn from an earlier plan for very good reasons. With development planned for Clockbarn (60) and Winds Ridge (40), it adds 770 houses to the 1700 currently in Send and Send Marsh, increasing it by 45%. More importantly the Garlicks Arch (MM41) and Aldertons Farm (MM44) sites are at either end of Send Marsh, which is taking an unrealistic hit of development which is scheduled for the first five years of the plan on Green Belt Land! This is not sustainable and will put pressure on an already stressed infrastructure.

In addition, the land at Burnt Common Policy A58 has been increased from 7000 sq metres of Industrial Development and Storage to a minimum of 14800 sq metres. Why is this taking place when land at Slyfield is available for further development of industrial development?

Land at Aldertons Farm (MM44) is Green Belt land with no special circumstances so it contradicts Policy MM9. These fields, now paddocks for grazing horses, act as natural drainage resulting in flooding in the lower field during the winter. Send Marsh is a marshland and concreting over it will exacerbate the problem. There is also wildlife flourishing on these fields e.g. deer.

There are already streams occurring in Tuckey Grove from the fields following heavy rainfall and building 120 houses will result in further water issues.

The traffic at Send Cross Roads will increase and already the roads are heavily congested at peak times. The Medical Surgery is already oversubscribed, and the local school has had to take more intake following the closure of Ripley First School.

With regard to the proposal of 550 homes being built on Garlicks Arch (MM41), there have already been 7000 objections to this which seems to have been ignored. This area is Green Belt containing ancient woodland.

Attached documents:

**Comment: MM44 - LPMM18/398  Respondent: Shelagh Smith 10540161  Agent:**

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

**I strongly object to the use of the land at Alderton’s Farm for 120 homes.** This is Green Belt land and I frequently use the public footpaths here. The wildlife is incredible, e.g. the deer that can be seen at twilight in and out of the woodland.
areas at this site. **MM44 opposes MM9 Green Belt Policy.** The new development will completely transform the tranquillity of the Send Marsh settlement.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/2934  **Respondent:** Sarah Wright 10543937  **Agent:**

**Policy A63 Land at Aldertons Farm, Send Marsh Road (Modification MM44)**

*I object to modifications MM44 Land at Aldertons due to the following points:*

This site is in the Green Belt, there are no exceptional circumstances to justify development here so it contradicts Policy MM9.

This site is located close to listed historic buildings at Send Marsh Green and any development here would be too modern, and without a doubt designed so badly that it would ruin the rural character of the whole area. I cannot think of a modern development that doesn’t stand out like a sore thumb and looks totally out of place.

The inevitable extra traffic would cause increased congestion at Send Mays Corner crossroads. Combined with the extra traffic on the Send Road due to the other increases at Garlicks Arch and Burntcommon, and the whole area would become unsustainable.

With the proposed extra numbers of houses at Garlicks Arch & Clockbarn sites it would overcome the current infrastructure.

This site was sensibly removed from an earlier version of the Local Plan, and was re introduced in July. Why?

**Attached documents:**

---

**Comment:** MM44 - LPMM18/315  **Respondent:** Mrs Janet Govey 10544353  **Agent:**

With all of the developments taking place there and extra 770 houses to the 1700 currently and send this as an increase of 45% to match for the infrastructure schools roads and medical services

With all of the developments taking place there and extra 770 houses to the 1700 currently and send this as an increase of 45% to match for the infrastructure schools roads and medical services

This site was deleted earlier because of all of the injections and now it has been reinstated why has that happened

This area is a greenbelt sign and there are no special second stances should be no building contradicts policy MM9

It will detract from the heritage buildings and send Marsh Green

There will be increased traffic which will cause great problems in an area that has already serious traffic issues particularly at Send Cross Road
MM44 policy A63

This is a new site for 120 homes and was deleted from an earlier draft because of all the objections and it has now been re-inserted why!

This is greenbelt land and should not be built on there is a Heritage site in the area and once again the increase of traffic will put great pressure on the secondary roads which are already at breaking point, there is an increase of 45% of development in the village this is far to high , 550 Garlicks Arch ,Click Barn barn, Wind ridge

Attached documents:

Comment: MM44 - LPMM18/2462  Respondent: Anne Davies 10551937  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/2607  Respondent: Ian Cameron 10562049  Agent:

I am objecting to all your modification developments reference MM41, MM42 and MM44, Policies A43, A58, and A63 - taken as a whole.
These are huge changes in relation to the size of the village.
Their impact will be devastating. Thinking about the inevitable traffic chaos alone fills me with gloom.

You have gone over the top in targeting Send, like as if you have a vendetta.

Attached documents:

Comment: MM44 - LPMM18/2195  Respondent: John Creasey 10563457  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63

I object to the number of houses proposed to be built at Alderton's Farm. Why, when this was deleted because of objections was it reinserted? Again it is Green Belt land and with many more cars particularly at Send Crossroads which is already a dangerous junction especially for pedestrians due to the number of vehicles which jump the lights. With current number of houses in Send being 1700 an increase of 45% is totally unreasonable and will spoil the character of our village.
I object to the number of houses proposed to be built at Alderton's Farm. Why, when this was deleted because of objections was it reinserted? Again it is green belt land with many more cars particularly at Send Crossroads which is already a dangerous junction especially for pedestrians due to the number of vehicles which jump the lights.

Agent:

MM44, Policy A63

I object to this development, already deleted due to the strength of objections and very belatedly re-inserted

This is Green Belt land and development would contradict policy MM9.

As with other proposed developments in Send the additional traffic it would bring to the village will be totally unacceptable especially at Send crossroads.

Agent:

MM44, Policy A63

The new Green Belt site at Send is not justified in view of the revised housing figures.

Agent:

2) Land at Alderton's Farm to have 120 homes built will be a complete turn around from previous plan. A big mistake for the beautiful heritage buildings on Green at Send Marsh. The Garlicks Arch plans to increase by 770 houses will make the road & the crossroads would be a traffic disaster.

Send Marsh Road is already queued traffic from Portsmouth Road down to Sadlers Arms Pub every working morning.

This join Ripley to Send is losing both sites as villages they will be one long area.
The fact that we have a school in Send which is full and a school in Ripley which is closed.

I medical centre, 1 useless post office between Ripley and Send & the co-op at Ripley for shopping. All this extra housing will cause havoc is this really necessary?

I feel the whole plan is stupid it seems it has not been carefully worked out!!

Attached documents:

Comment: MM44 - LPMM18/1970  Respondent: Trudi Harris 10667073  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/1144  Respondent: Mrs Jennifer McIndoe 10670529  Agent:

I object most strongly to this proposal because, if it were to go ahead, it would completely change the character of Send Marsh and cause a great deal more traffic and resulting pollution in the area. Send Marsh Road is already used as a "rat-run" and any increase in, particularly, commercial, traffic would constitute an increased danger to pedestrians and cyclists using it.

The site is Green Belt, and, as such, should be protected from this kind of unnecessary development. There is little or no demand for existing housing, let alone new housing, in the Send Marsh area.

I understand that this proposal has previously been rejected because of the objections of local residents. Nothing has changed.

Attached documents:

Comment: MM44 - LPMM18/216  Respondent: Clare McCann 10677665  Agent:

MM44 land at Alderton's Farm, Send Marsh Road Policy A63

- This has recently been re-inserted after the previous objections were accepted...why? especially as the housing numbers have now been called into question
- [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] I have recently completed a study re the development of the village of Send and it is quite clear that Send Marsh is one of the most ancient parts of the village and has had a distinct identity dating back hundreds of years but it will be forever compromised if this development goes ahead.

The total number of houses proposed in Send is 770 which is totally out of proportion to the size of the village.
Perhaps this is because Send dared to vote in independant councillors - a theory postulated by a retired CONSERVATIVE county councillor!

I am not a NIMBY and I fully accept that we need more houses but we do not have to accept more because Woking have not built enough nor do we have to accept development in the wrong places. Local people write in good faith but feel they are not listened to. Local planners do not, in my view, plan but react to what developers want - which is to make money by building on greenfield sites. If you really want to make a plan then you could and should consult parish councils and town wards as to where additional housing would make the least impact and then approach the land owners or landlords with proposals for sensitive development. How many premises in Guildford have space over shops empty or are entirely empty that could be adapted for domestic use- have you ever carried out a proper study?

Attached documents:

Comment: MM44 - LPMM18/1174  Respondent: Margaret Bruton 10683457  Agent:

I would like to register my opposition to the latest modifications of the Guildford Local Plan which are relevant to Send

The Office of National Statistics’ prediction is that there is a decrease in the previously anticipated number of houses needed in Guildford and this has important consequences for the proposed developments in Send. The Local Plan modification will enable increase in housing in Send over and above those in the original Local Plan proposal. These new ONS figures make it unnecessary to plan in extra housing in Send.

I specifically object to development at the site at Alderton’ s Farm (MM44). And is a valuable green area which is an important part of the rural character of the village of Send and housing here would destroy this important area. In addition houses on this site would lead to further congestion at busy times of day at either end of Send Marsh Rd (B368) where it either joins the Portsmouth Rd (B2215) or the already congested A247 at May’s Corner.

I further object to the modifications as I think they will cause a dangerous increase in traffic. Neither the Alderton’s Farm site (MM44) and Garlick’s Arch (MM41) have good public transport or cycle paths and the pavements along Send Marsh Rd are very narrow so there would be an inevitable increase in the number of car journey’s to and from these sites Send school is on the A247 and there are already safety concerns about parking and children crossing the road so extra traffic would increase this danger

Furthermore these additional houses would put extra pressure on the already busy medical centre and the school which is a new build and is already full.

I also object to the allocation of industrial premises Burnt Common.

To exit this site it is necessary to go South along the Old London Rd (B2215) and the to turn right along a narrow strip then right again onto the north bound slip road of the A3. This is presently very dangerous as traffic leaving the A3 have very little time to see and slow down for lorries leaving the distribution centre and crossing on to the north bound A3 slip road. Extending the site would make this an even more dangerous hazard.

Attached documents:

Comment: MM44 - LPMM18/5000  Respondent: Ben Gamble 10701537  Agent:

I make the following comments in regard to the modifications to the Local Plan:
Sites A43 Garlick’s Arch; A63 Aldertons Farm; and A58 Burnt Common Strategic Employment Site will have significant combined impacts upon the villages of Ripley, Send and Send Marsh. The development of these sites will increase the traffic on already over crowded and busy roads in these villages.

It is extremely concerning that there does not seem to be any firm commitment to the construction of policy site A43a the A3 Burnt Common slip roads during the period of the Plan. It is vital that this is constructed prior to developing the above sites.

The development of these site do not provide enough community infrastructure Ripley Primary School has recently been closed by Surrey County Council. The Villages Medical Centre is already heavily subscribed.

Attached documents:

Comment: MM44 - LPMM18/5037  Respondent: Frank Fuller 10703745  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/1121  Respondent: Alison Drennan 10717985  Agent:

MM44 LAND AT ALDERTON’S FARM, SEND MARSH ROAD, POLICY A63

• I object to the late inclusion of this site, deleted from an earlier draft due to the strength of local objections and that GBC ignore these by only re-inserting this proposal at the public examination in July.
• I object to this development as it will contradict Government guidance in their proposals to build on Greenbelt land and because GBC fail to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.
• I object that this development is proposed on Green Belt Land and will destroy countryside.
• I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
• I object because local infrastructure will not be able to support the additional demands of new residents.
• I object because wildlife will be displaced.
• I object because GBC continues to promote excessive and unnecessary housing demand, rather than allowing for open and democratic evaluation of housing need in the area.
• I object because this additional development will result in traffic and increased pressure on already over-utilised and traffic blocked roads in the village.
• I object because the proposal of adding 770 houses to our village (including 550 at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge) is disproportionate and places excessive and unachievable demand on local services roads and the infrastructure and character of our village. The addition of 770 new houses to the current population of 1700 properties would be an increase of more than 45%. This cannot be accommodated by the existing infrastructure.

MM44 Aldertons Farm A63 As this is Green Belt land it contradicts policy MM42 it therefore should be withdrawn. The existing roads would not be able to cope with the additional traffic.

I am writing to object to the latest version of the Local Plan which seems to be penalising Send with far more than its share of development, with significant volumes of housing targeted for Garlick's Arch (MM41), and Alderton's Farm (MM44). A total of 670 new houses is a staggering number for a village the size of Send.

I have lived in the area for nearly 30 years and in that time seen a vast build up in traffic levels and do not see how the local road network can sustain the resulting increase. Neither can increased traffic levels be introduced without an impact to nearby bottle necks. These include Ripley, Old Woking and, of course, Guildford itself, which cannot handle the amount of traffic it faces already, and, in the case of any incident, quickly becomes gridlocked. I am particularly concerned at the moment of time that the A3 Southbound is stationary or slow moving, particularly given the need for ambulances to access The Royal Surrey County Hospital. I do not believe either that local schools or medical facilities would be able to cope with the resulting influx of numbers.

I object to MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63 because:-

- Previous objections meant this proposal was deleted from an earlier draft. It was only Re-inserted in time for the public examination in July.
- This is Green Belt contradicting Policy MM9.
- The roads in and out of this area, especially Send Cross Roads, already jam up readily.
- The proposed additional homes at Garlick's Arch, Clockbarn and Winds Ridge total 650. Together with these proposed additional 120 homes, that is 770 more homes in this small village. NO WAY CAN OUR EXISTING INFRASTRUCTURE SUSTAIN SUCH AN INCREASE.
I OBJECT to MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63 New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
- It is a Green Belt site with no special circumstances so it also contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads
- With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/4598  Respondent: K. Croxford 10729185  Agent:

- MM44 – Aldertons Farm (policy A63)

This site is GREEN BELT land

No ‘special circumstances’ should apply, and the land has been subject to flooding and does not drain well

The likely increase in traffic would be inappropriate for a site bordering on residential areas

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

The knock-on effect, in addition to other sites, would be excessive for our village, given the revised (ie lower) ONS forecasts for housing needs

I OBJECT to this development and the proposed modification

Attached documents:

Comment: MM44 - LPMM18/3825  Respondent: Richard Croxford 10729281  Agent:

MM44 – Aldertons Farm (policy A63)

This site proposes development for building around 120 homes, but it is GREEN BELT land

No ‘special circumstances’ should apply, especially as the land has been subject to flooding and does not drain well

The likely increase in traffic would be inappropriate for a site bordering on residential areas

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

The knock-on effect, in addition to other sites, would be excessive for our village, given the revised (ie lower) ONS forecasts for housing needs

Therefore I OBJECT to this development and the proposed modification
The Main Modifications now propose to increase the number of dwellings.

MM41 will increase by 150 dwellings at Garlicks Arch (policy A43) from 400 to 550 dwellings and MM44 has re-introduce a site (included in 2014 edition of the Plan) in Send Marsh, called Aldertons Farm, to deliver a further 120 dwellings (policy A63). This brings the Total number of dwellings proposed for Send, Send Marsh and Burnt Common now to a total of 770 Dwellings.

As noted by Tibbalds consultants in their submission to this consultation on behalf of Send Parish Council, the Parish of Send will account for 56% of proposed supply in villages (based on table MM2).

This level of development is not supported by the evidence base of the plan. The sequential hierarchy within the sustainability appraisal (SA) places Send, Send Marsh and Burnt Common at the bottom of the hierarchy at Tier 10. According to the evidence base of the Plan Tier 10 is considered the least sustainable location for development.

This land is also Green Belt and in contravention of GBS's stated policy and, with the other proposed large developments will further add to the traffic congestion in the area and in particular at Send Crossroads and the junction with Portsmouth Road, especially at busy periods in the morning and evening.

This area for a proposed 120 homes was deleted from the 2014 plan and has since been increased twice, doubling the acreage involved. It was put back in until the public examination in July despite all the objections against and no evidence being produced in favour. Clearly another instance of ‘punishment’, which is not what the exercise is about.

If allowed, this development will severely detract from the heritage appeal of the beautiful Send Marsh Green which it adjoins. It will also detract from the attractiveness of the listed Aldertons Farm and its neighbouring Old Hall and constitute a raised eyesore and drainage problems to the properties on the north side of Send Marsh Road opposite this site.
The considerable resulting traffic will create serious problems at Mays Corner at the Send end of Send Marsh Road and will be a serious source of damage to the two 16th century timber-framed cottages between which Send Marsh Road makes a 90 degree bend. Traffic already sometimes backs up to Send Marsh Green on its way to the old Portsmouth Road and 120 extra homes will also make that problem very much worse. There have been a number of accidents already where the narrow road makes its 90 degree bend.

Together with Garlicks Arch (550), Clockbarn (90) and Winds Ridge (40), this site will result in 770 houses being added to the existing 1700 in Send. This is far too much for the infrastructure and will adversely affect the nature of this pleasant village to the detriment of the existing residents.

This is another Green Belt site with again no evidence of special circumstances, so it is contrary to MM9 and should be deleted.

The area of this site and its surrounds are hugely popular with walkers and cyclists which the Plan aims to encourage, but extensive development such as is proposed here will greatly discourage them.

Attached documents:

**Comment:** MM44 - LPMM18/3123  **Respondent:** Nicola Jones 10743105  **Agent:**

MM44 – I object to the reinsertion of this proposal, especially as it was dropped following previous objections. Residents should NOT have to keep wasting their time re-objecting to proposals which have already been proved unacceptable. This is a Green Belt site which acts as a separation barrier between Send and Send Marsh and there are no special circumstances which would make the use of this site for development acceptable (other than profiteering at the expense of the local community).

MM44 + MM41 + development on other sites already proposed a Tannery Lane and Send Hill will increase the housing capacity in Send by 770, a 41% rise. This is unacceptable and is completely out of keeping with the character of the villages, particularly, as evidenced by previous objections, it is so clearly against the wishes of the people whose community this is.

Attached documents:

**Comment:** MM44 - LPMM18/59  **Respondent:** Jo Williams 10750593  **Agent:**

MM44 – Land at Alderton’s Farm, Send Marsh Road, Policy A63

Yet another proposal for an unrealistic number of homes, 120 (including some self-build) on top of what’s being proposed at Garlicks Arch, Clockbarn, Winds Ridge – in total a proposal of 770 houses in addition to the 1700 currently in Send, an increase of 45% which is completely unrealistic and too much for the surrounding infrastructure. This was deleted from an earlier draft of the local plan because of all the objections and not re-inserted until the public examination in July. Again this is a Green Belt site with no special circumstances which contradicts policy MM9.

Attached documents:

**Comment:** MM44 - LPMM18/4004  **Respondent:** John Herbert 10756033  **Agent:**
MM44 The new Green Belt site at **Send** is not justified in view of the revised housing figures.

**Attached documents:**

**Comment: MM44 - LPMM18/148  Respondent: Mrs Lizzie George Buchhaus 10757185  Agent:**

Green belt site, no special circumstances, contradicts mm9
increased traffic at Send crossroads
too many houses
in one village 45%. too much for infrastructure

**Attached documents:**

**Comment: MM44 - LPMM18/1129  Respondent: Mr Jack Aboe 10774817  Agent:**

I object to this development due to major increase of road traffic and insufficient school places or medical faculties

**Attached documents:**

**Comment: MM44 - LPMM18/780  Respondent: Kate Cheyne 10774881  Agent:**

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

New site for 120 Homes

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July. Again, ‘consultations’ with residents have been ignored and the numbers have been escalated.

It is a Green Belt site with no special circumstances so it also contradicts policy MM9

It will detract from the heritage buildings at Send Marsh Green

The additional traffic will increase pressure on the Send Crossroads.

With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

**Attached documents:**

**Comment: MM44 - LPMM18/4843  Respondent: Wendy Lodge 10775137  Agent:**
I object to MM44.

This is Green Belt land and development is contrary to MM9.

This is another proposal removed from earlier plans due to massive opposition and only reappeared in this latest Local Plan Examination.

It would add a further 200 plus cars to local traffic.

It adds to the 45% increase in houses in Send which will overwhelm our local services and change the character of the village.

Attached documents:

---

Comment: MM44 - LPMM18/306  Respondent: Prue Robinson 10776033  Agent:

MM4 Land at Alderton's Farm, Send Marsh Road, Policy A63

I object most strongly to Policy A63

These are my reasons:

A new site for 120 homes, including some self build has now been added to the list of housing developments in this area. This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July.

This area is a Green Belt site with no special circumstances so it also contradicts policy MM9. What exactly are the 'exceptional circumstances' you have claimed exist? Please would you clearly define these?

The proposed site will detract from the heritage buildings at Send Marsh Green and the additional traffic will increase the pressure on the Send crossroads. With Garlick's Arch (550 houses), Clockbarn (60 houses) and Winds Ridge (40 houses) this gives a total of 770 houses added to the 1700 currently in Send. This is an increase of 45% and is far too much for our infrastructure.

Attached documents:

---

Comment: MM44 - LPMM18/264  Respondent: Moira Payne 10782241  Agent:

I object to MM44 Aldertons Farm. It is a green belt site with no special circumstances contradicting policy MM9. Additional traffic could overload the already busy Send crossroads. Together with other proposals could create 'gridlock in the village of Send.

I object to MM44 Land at Aldertons Farm, Send Marsh Road Policy A63

New site for 120 Homes including some self build

This was deleted from an earlier draft due to objections and not-reinserted until the public examination in July.

It is Green Belt with no special circumstances and so contradicts policy MM9.

Additional traffic will increase pressure on Send crossroads.

It will detract from heritage buildings at Send Marsh green.

Together with developments at Garlicks Arch, Clockbarn, and Winds Ridge, it means an additional 770 houses will be added to the 1700 currently in Send, an increase of 45%. Too much for the infrastructure.

Attached documents:

Comment: MM44 - LPMM18/2224  Respondent: Norman Carpenter 10793697  Agent:  
MM44 Land at ALDERTON'S FARM

As in the previous 2 objections the main campaign is the excess of 250+ extra cars on to in this case a narrow Sendmarsh Road and have through Sendmarsh on to SEND CROSSROADS. The latter has an [unreadable text] and [unreadable text] twice a day.

All these 770 houses planned are to be added to the existing 1700 in Send. This is far too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/5511  Respondent: Guildford Greenbelt Group (Susan Parker) 10799425  Agent:  
MM44 Site at Aldertons' Farm Send Marsh Road

This new site for 120 homes was deleted from an earlier draft. It is a Green Belt site and no exceptional circumstances have been demonstrated; it will increase traffic, detract from heritage buildings and adds still more homes to the already inflated additions for Send (an increase of 45% for the village as a whole).

Attached documents:
Comment: MM44 - LPMM18/54  Respondent: Shai Sinai 10799489  Agent:

MM44 Aldertons Farm :

This is GREEN BELT LAND and previously deleted due to objections, but once again residents are being ignored. Send Marsh is a lovely heritage site around the green and this will be ruined. Another 120 homes here along with the other proposed developments will add 770 houses increasing are village by 45% this is wholly disproportionate. Again this will increase the strain on local services to breaking point. Congestion and pollution blighting our lives. I strongly object to MM44.

Attached documents:

Comment: MM44 - LPMM18/5432  Respondent: Roger Harrison 10802177  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/683  Respondent: Steve Green 10803361  Agent:

I object to MM44 (Land at Alderton’s Farm, Send Marsh Road Policy A 63):

• It is a Green Belt site with no special circumstances so it contradicts MM9
• The additional traffic will increase pressure on Send Crossroads. Living at these cross roads, I can testify to the fact that it is very difficult to get out of our drive at rush hour as traffic is tailed back to the A3. Once again, air pollution affects our garden and environs.

Attached documents:

Comment: MM44 - LPMM18/551  Respondent: Bernard Corrigan 10805889  Agent:

MM44

I object to another attempt by GBC to include houses on a Green Belt area that would, together with MM41 put too much strain on Send's infrastructure.

Attached documents:

Comment: MM44 - LPMM18/438  Respondent: Belinda Middleton 10807745  Agent:
MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July. It is a Green Belt site with no special circumstances so it also contradicts Policy MM9. The additional traffic will increase pressure on the Send Crossroads. Send Primary School is full, we do not have a Secondary School (kids are rejected from George Abbot and Hoe Valley and sent to other schools further away) and the doctors is at capacity. There is no infrastructure for these additional homes. With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/2825  Respondent: Bernice Williams 10809377  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/527  Respondent: Mrs Penelope Corlett 10815681  Agent:

MM44. Alderton's Farm, Policy A63

This is Green Belt with no exceptional circumstances and the additional traffic it would produce would, again, put too much pressure on already congested roads at peak times.

Attached documents:

Comment: MM44 - LPMM18/478  Respondent: Maggie Cole 10816705  Agent:

MM44 Land at Aldertons Farm – policy A63

It is a green belt site with no special circumstances and will spoil the vista of the heritage buildings on Send Marsh Green. Yet more traffic in the area will cause gridlock at peak times.

With all the other development in the area, infrastructure cannot cope.

Attached documents:

Comment: MM44 - LPMM18/2157  Respondent: M Mansbridge 10817633  Agent:

REF. MM44
LAND AT ALDERTON'S FARM, SEND MARSH ROAD, POLICY A36

OBJECTIONS: Green Belt Land, and too close to lakes with protection
Wild life corridor
Flooding

---

**Comment:** MM44 - LPMM18/274  **Respondent:** Vanessa Birchall-Scott 10818241  **Agent:**

MM44
Land at Alderton's Farm, Send Marsh Road
Policy A63 - new site for 120 Homes

- This was removed from an earlier draft because of all the objections and then re-inserted after the public examination in July, for not explained reason
- It is a Green Belt site with no special circumstances and so it again contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads.
- It adds 770 houses to the 1700 currently in Send, an increase of 45%.
- This is too much for our infrastructure (roads etc as noted above)

Attached documents:

---

**Comment:** MM44 - LPMM18/2129  **Respondent:** D Smith 10819329  **Agent:**

MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63.

I Object to the 120 houses which it is proposed should be built on this Green Belt site.

The additional traffic created by this development will increase pressure on Send crossroads.

Attached documents:

---

**Comment:** MM44 - LPMM18/820  **Respondent:** MP Parrott 10819425  **Agent:**

MM44 land at Alderton's Farm, Send Marsh Road, Policy A63

The proposal for a new site for 120 homes on Green Belt Land would appear to contradict policy MM9 as there are no special circumstances.
With the additional developments proposed for Garlick's Arch (550) Clockbarn (60) Winds Ridge (40) this adds 700 additional houses to the current 1700 houses in the village a 45% increase. This will put excessive strain on the infrastructure, community, transport, roads, medical facilities, schools.

The villages of Send, Send Marsh and Burnt Common are currently not well served by public transport to the main conurbations of Guildford and Woking at the additional housing, and industrial units will therefore result in a substantial increase in local traffic, air pollution, parking problems, and increased accidents in these villages.

What impact will the additional traffic have on the surrounding roads in Send and Ripley and on the A3 which is already overcapacity at peak times in this area?

This development site will also result in loss of wildlife in this beautiful unspoilt part of Surrey with its diverse birdlife.

Have any wildlife and enviromental impact assessments been carried out on any of these sites?

What additional facilities are planned to cope with the increased demand for school places, doctors and emergency services from the increase in the pollution?

Has Guildford council given consideration to the development of brownfield sites in the borough before destroying green belt land?

Attached documents:

---

Comment: MM44 - LPMM18/5669  Respondent: Susan Cooper 10819489  Agent:

I object to the reintroduction of Aldertons Farm for 120 plus houses. MM44

This development had been previously removed from the local plan, presumably because it had been identified that the many objections raised against it had proven to be valid.

There has been no change in local circumstances and this proposed development would put immeasurable strain on the already overloaded infrastructure.

Attached documents:

---

Comment: MM44 - LPMM18/831  Respondent: D Davies 10820961  Agent:

MM44 Land at Aldertons Farm Send Marsh Policy A63 - I object

It is a Green Belt site with no special circumstances so it contradicts MM9. It will distract from the heritage building on Send Marsh Green. It will add to the congestion in the area on Saturday 6th October Guildford and Woking were gridlocked. Buses were running over an hour late [unreadable text]. The weather was bad so adding to the problems will the planning committee be there to sort out the gridlock situation I dont think so.

This is Green Belt land and development is contrary to MM9.

This is another proposal removed from earlier plans due to massive opposition and only reappeared in this latest Local Plan Examination.

It would add a further 200 plus cars to local traffic.

It adds to the 45% increase in houses in Send which will overwhelm our local services and change the character of the village.

**Attached documents:**

---

**Comment: MM44 - LPMM18/1635**  **Respondent:** Julie Brown 10829121  **Agent:**

**MM44 Alderton’s Farm**

This proposed development is on green belt land and there are no special circumstances to justify that. This development would be close to Send Marsh green with beautiful heritage buildings and would completely spoil the character of the area. We chose to live in Send because of the character of the village and its open green space. The local infrastructure cannot accommodate the cumulative effect of so much additional development.

**Attached documents:**

---

**Comment: MM44 - LPMM18/5969**  **Respondent:** Brian Robinson 10830689  **Agent:**

I must object in the strongest terms possible to the most recent Planning Proposals for the village of Send and the surrounding area. It would seem that our previous objections have been swept aside and ignored.

It appears that no consideration has been given to the existing residents of Send just to justify the proposed new Planning Requirements.

Before any new proposals are reached detailed infrastructure plans must be established, Send and the surrounding area road layout must be agreed, it is now almost grid locked every day morning and evening.

Other factors including education, medical considerations will be completely over run, despite the ruination of the Village environment and the surrounding Green Belt.

**Attached documents:**

---

**Comment: MM44 - LPMM18/3638**  **Respondent:** AJ Cheeseman 10830753  **Agent:**

**MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63**

I object to the new site for 120 homes because:
• It was deleted from an earlier draft because of all the objections;
• It is beautiful permanent Green Belt and no ‘exceptional circumstances’ exist;
• It will generate at least another 200 cars which will be too great for the narrow roads of Send Marsh and the
  traffic light crossroads at Send, plus extra pollution.

Attached documents:

Comment: MM44 - LPMM18/2346  Respondent: PE Whatley 10830785  Agent:

Objection to MM44 Land at Alderton's Farm A63

I object to the way the Green Belt is being proposed to be used for building houses when these homes seem to be far
beyond the need, and there are no special circumstances. To suggest that proposed homes should be built on Green Belt
land is totally unacceptable. I object to the potential retraction of the promises repeatedly made at elections to protect the
Green Belt. It will set a precedent for building on any area of Green Belt land that is being lost forever.

Attached documents:

Comment: MM44 - LPMM18/2437  Respondent: Ms Katherine Gervasio 10836033  Agent:

MM44 at Alderton’s Farm, Send Marsh Road Policy A63

I object to this proposed development. It was also dropped from an earlier draft because of objections and then re-
instated during the public examination in July. It is Green Belt land and has no special circumstances to warrant its
inclusion. It will detract from the heritage buildings at Send Marsh Green, the additional traffic from it will increase
congestion at Send Crossroads with the resultant pollution damage and will increase the overall housing development in
Send by 45% - far too much for the current infrastructure!

Attached documents:

Comment: MM44 - LPMM18/796  Respondent: J.H. Lakeman 10837665  Agent:

I object to MM44 Land at Aldertons Farm, Send Marsh Road Policy A63, yet again it is a Green Belt site in contradicition
of Policy MM9 and there are no special circumstances and a certain detraction from the heritage building at Send Marsh
Green. Send Crossroads will be subjected to extra traffic and when added to extra housing at Garlicks Arch, Clockbarn
and Winds Ridge, it will swamp our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/2688  Respondent: Jacky Fenton 10839009  Agent:
MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July and this is a Green Belt site with no special circumstances so it also contradicts policy MM9. The additional traffic will put even more pressure on our roads especially the Send Cross Roads and increase our Nitrogen Dioxide levels further. Our infrastructure cannot cope with all these additional houses we are a small Village!

Attached documents:

Comment: MM44 - LPMM18/1155  Respondent: F.A. Howell 10839393  Agent:

Re: MM41 - Land at Garlicks Arch, Send Marsh, Policy A43

MM42 - Land at Burnt Common, London Road, Send, Policy A58

MM44 - Land at Alderton’s Farm, Send Marsh Road - Policy A63

MM9 - Green Belt Policy

MM27, MM41, MM42 and MM48 - Traffic

There are unimaginable difficulties with your proposed plan for Send and Send Marsh. There is not enough infrastructure to house the proposed amount (for example)

- of cars (and the extra pollution that they will bring)
- a lot more people needing healthcare
- schooling
- our small country lanes
- and we are DEFINITELY NOT AN INDUSTRIAL AREA, why not enlarge Slyfield, which has empty space readily available?
- plan to route the A3 traffic towards Woking through Burpham.

The proposed 750 houses will more than likely mean 1500 more cars on our narrow roads. We can't move freely now when there are roadworks or an accident or breakdown, let alone move with all this extra traffic.

Try coming around to this are at 'rush' hour or when there has been an accident - it's a nightmare.

NO, NO, NO TO YOUR PLAN

Attached documents:

Comment: MM44 - LPMM18/1765  Respondent: Lawrence Harris 10839649  Agent:

MM44....Policy A63

This development was deleted from earlier drafts due to the number of objections and I can see no reason why it should be approved now. I therefore object to its inclusion as it clearly contradicts Policy MM9 with respect to Green Belt development as well as making the total number of 770 new houses in Send an increase of 45% over the current number of properties in the village.
I am writing to object to the Local Plan proposals for Send and Send Marsh. My objections are as follows:

**MM44 - Land west of Alderton's Farm, Send Marsh Road, Send**

This site is inappropriate for development for several reasons. Firstly, traffic filters off the A3 and down through Send Marsh via Send Marsh Road, the only road which passes the proposed site. This road is narrow, so much so that vehicles have to slow in order to give way to oncoming traffic over a bridge on a stretch of this road very near to the site. Traffic along the road is additionally slowed by a near-90-degree turn at Send Marsh Green (the site of several accidents over the years). There is a similar turn at the other end of the road on the approach to Mays Corner crossroads. All these factors already slow the traffic. Therefore, the traffic from the proposed housing at the site will only add to the traffic flow problem. This additional burden will also add to the slow, heavy commuter traffic that travels through Send, which frequently approaches gridlock.

The site in question is also unsuitable due to this particular area of land flooding easily and often, particularly during winter (the area is called Send Marsh for a reason).

For these reasons, this site should be considered to be one of inappropriate development. Policy P2, MM9, Policy Paragraph (1) states that 'inappropriate development will not be permitted unless very special circumstances can be demonstrated.' There are no such circumstances in this case.

A final objection is that this site acts as a barrier between Send Marsh and Send Village. Therefore, the proposal falls foul of the National Planning Policy Framework (point 80), which states that one of the purposes of Green Belt land is 'to prevent neighbouring towns merging into one another'.

**Comment: MM44 - LPMM18/1011  Respondent: Mark Pycraft 10839937  Agent:**

**MM44 - Land at Aldertons Farm, Send Marsh Road, Policy A63**

New site for 120 homes - including some self build. It will detract from the heritage buildings at Send Marsh Green and the additional traffic will increase pressure on the Send crossroads.

**Comment: MM44 - LPMM18/1134  Respondent: J.A. Manlow 10840321  Agent:**

**Comment: MM44 - LPMM18/2272  Respondent: John Pyne 10840641  Agent:**

**MM44 LAND AT ALDERTON'S FARM, SEND MARSH ROAD, POLICY A63**
• I object to the late inclusion of this site, deleted from an earlier draft due to the strength of local objections and that GBC ignore these by only re-inserting this proposal at the public examination in July. This late inclusion does not follow correct process or allow for legitimate consultation.

• I object to this development as it will contradict Government guidance in their proposals to build on Greenbelt land and because GBC fail to provide 'exceptional circumstances' to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.

• I object that this development is proposed on Green Belt land and will destroy countryside.

• I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.

• I object because local infrastructure will not be able to support the additional demands of new residents.

• I object because GBC continues to promote excessive and unnecessary housing demand, rather than allowing for open and democratic evaluation of housing need in the area.

• I object because this additional development will result in traffic and increased pressure on already over-utilised and traffic blocked roads in the village.

• I object because the proposal of adding 770 houses to our village (including 550 at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge) is disproportionate and places excessive and unachievable demand on local services roads and the infrastructure and character of our village. The addition of 770 new houses to the current population of 1700 properties would be an increase of more than 45%. This cannot be accommodated by the existing infrastructure.

Attached documents:

Comment: MM44 - LPMM18/1243  Respondent: Rosemarie Haxton 10840769  Agent:

MM44 Land at Alderton’s Farm, Policy A63

My objections to this proposal are;

• This is Green Belt land and there are heritage centres at Send Marsh Green which will be affected
• Increase in traffic will block already busy roads and Send crossroads
• If Garlicks Arch, Clockbarn and Winds Ridge developments were to all go ahead, this would increase the number of houses by 45% with already insufficient infrastructure, including the GP surgery, school and facilities for the current 1700 homes in Send.

Attached documents:

Comment: MM44 - LPMM18/5842  Respondent: Yvonne Woozley 10843521  Agent:

MM41, MM42, MM44, MM9, MM27 MM48

I am writing to object to plans for our village. I have lived here for 20 years and have seen traffic increase dramatically. I have to use the A3 up to M25 J10 most weekdays and it is perfectly clear that Send cannot cope with further traffic.

Increasing industrial areas and a massive increase in housing is completely the wrong thing for a village. We have a strong village feel in both Ripley and Send and I have lived in North London as a child and saw my village merge with the next one and eventually become part of London and it destroyed the area. I don’t want to see this happen here. There
are some glorious greenbelt areas and ancient woodland and so there will be far better places to build that are brownfield sites.

I have already watched the Tannery Lane industrial area increasing in size. This is already a ridiculous place for an industrial site, right by the river along a narrow country lane and to increase the size is just not thought through!

I live on Send Marsh Road and building at Alderton’s will make an already dangerous and busy road, even worse. The sharp bend is very difficult to drive around and to cross over to get to Polesden Lane and with a dramatic increase in traffic, this would be impossible.

Along with Garlick’s Arch, Clockbarn, Winds Ridge etc, it is just too much for our infrastructure to bare. I have just had to wait 2 weeks for an appointment at the doctors and increased housing will just exacerbate the problem so that it is out of control.

My children were lucky enough to get into George Abbot school, but what do you intend doing with all the new children and associated traffic that so much building would create? Closing Ripley Primary was ill-thought out if you are intent on going ahead with this building, despite objections and the traffic at the Burntcommon roundabout to get to Send Primary will be ridiculous, especially if you’re considering building new slip roads to the A3 too.

So my main concerns are traffic congestion, destruction of the green belt, no provision for increased infrastructure such as doctors with so many new homes, increase in industrial space not appropriate for a village setting, over-development, flooding and a completely ignoring all previous objections!

Please reconsider destroying our villages of Send and Ripley. They will be destroyed if even a portion of this building goes ahead along with the modifications we are not able to object against such as the traveller’s site and Clockbarn etc. Please listen to your residents and think of the future of Surrey as a beautiful place to live and not just the financial advantages. In the long run, stopping this dense build up of population will save money, as the social problems in north London now, where I grew up are immense.

Attached documents:

Comment: MM44 - LPMM18/268  Respondent: Jackie Payne 10843585   Agent: 

MM44 - land at Alderton's Farm, Send Marsh Road, Policy A63

This is Green Belt land with no special circumstances so it contradicts policy MM9. There are some beautiful heritage buildings on Send Marsh Green and such a development will detract from this pretty village. There will be increased pressure on the Send crossroads at Mays Corner. This is already very busy in the mornings with commuters and school buses.

There were many objections to this proposal when it was raised before and it was taken out of the Local Plan and then somehow re-inserted in July 2018. All previous objections have been totally ignored.

The proposed development sites for Send and Send Marsh mean in increase of 45% for our village which is far too much for the infrastructure. There will be many many more cars heading to Woking and Guildford every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM44 - LPMM18/4358  Respondent: Rosemary Key 10844641   Agent: 
MM44 Alderton's Farm, Send Marsh Road Policy A63

Why has a group of objections to this area being built on, suddenly be reinserted until a recent examination in July? This still remains a greenbelt area and as no changes have been put in place to this, it contradicts policy MM9.

The increase in housing will impact again on a poorly managed infrastructure that is currently under managed and struggling to cope with current traffic numbers and requirements.

Attached documents:

Comment: MM44 - LPMM18/4594  Respondent: James Purkiss 10844673  Agent:

I object to MM44 for the following reason; too much new housing for a little village, it will increase traffic beyond what these little roads can take, pollution is already bad enough, the green belt is not for development even if it's the council who wants to do it.

Attached documents:

Comment: MM44 - LPMM18/2565  Respondent: John Wright 10844929  Agent:

Policy A63 Land at Aldertons Farm, Send Marsh Road (Modification MM44)

I object to modifications MM44 Land at Aldertons due to the following points:

This site is in the Green Belt, there are no exceptional circumstances to justify development here so it contradicts Policy MM9.

This site is located close to listed historic buildings at Send Marsh Green and any development here would be too modern, and without a doubt designed so badly that it would ruin the rural character of the whole area. I cannot think of a modern development that doesn’t stand out like a sore thumb and looks totally out of place.

The inevitable extra traffic would cause increased congestion at Send Mays Corner crossroads. Combined with the extra traffic on the Send Road due to the other increases at Garlicks Arch and Burntcommon, and the whole area would become unsustainable.

With the proposed extra numbers of houses at Garlicks Arch & Clockbarn sites it would overcome the current infrastructure.

This site was sensibly removed from an earlier version of the Local Plan, and was re introduced in July. Why?

Attached documents:

Comment: MM44 - LPMM18/375  Respondent: John Ford 10846241  Agent:
It is with extreme disappointment that I have to, yet again, protest against the over development of Send. It beggars belief that the Planning Inspectorate in collusion with GBC have increased the number of properties planned for the village (as per the refs. above).

Do the PI and GBC not recognise the damage this will do to the infrastructure of this area? At the same time I understand there will be some incursion onto Green Belt land which contradicts Green Belt Policy.

I hope that the Local Plan is reviewed to allow Send to be relieved of the developments planned and more suitable sites found.

Attached documents:

Comment: MM44 - LPMM18/3320  Respondent: Frank Drennan 10846625  Agent:

MM44 LAND AT ALDERTON’S FARM, SEND MARSH ROAD, POLICY A63

- I object to the late inclusion of this site, deleted from an earlier draft due to the strength of local objections and that GBC ignore these by only re-inserting this proposal at the public examination in July.
- I object to this development as it will contradict Government guidance in their proposals to build on Greenbelt land and because GBC fail to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.
- I object that this development is proposed on Green Belt Land and will destroy countryside.
- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
- I object because local infrastructure will not be able to support the additional demands of new residents.
- I object because wildlife will be displaced.
- I object because GBC continues to promote excessive and unnecessary housing demand, rather than allowing for open and democratic evaluation of housing need in the area.
- I object because this additional development will result in traffic and increased pressure on already over-utilised and traffic blocked roads in the village.
- I object because the proposal of adding 770 houses to our village (including 550 at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge) is disproportionate and places excessive and unachievable demand on local services roads and the infrastructure and character of our village. The addition of 770 new houses to the current population of 1700 properties would be an increase of more than 45%. This cannot be accommodated by the existing infrastructure.

Attached documents:

Comment: MM44 - LPMM18/499  Respondent: Evan Parry-Morris 10853249  Agent:

5. I wish to raise the following objections to the Guildford Local Plan MM44, Policy A63:

This is green belt land, and there are no special circumstances for the building of 120 homes.

The resultant increase in traffic would cause issues at Send crossroads.

Attached documents:
Comment: MM44 - LPMM18/284  Respondent: Sian Holwell 10854241  Agent:

**MM44 Alderton’s Farm.** Why has this been re-added after its prior removal due to objections. The current plans include the addition of 1700 homes in Send that's an increase of 45%. We simply don't need all these new houses...have you seen how many "for sale" boards are up in the area and very few properties are being sold. The economy is grinding to a halt and building all these houses will not help.

I am of the firm opinion that the Guildford Planning Inspector clearly does not live in this area and so does not care about the mess that is being proposed for the people who live here.

Attached documents:

---

Comment: MM44 - LPMM18/2188  Respondent: Susan Mansbridge 10855297  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road Policy A6

I OBJECT to more houses being built on this very narrow village road, once again how will the villages cope with the traffic? This is a Green Belt site.

Attached documents:

---

Comment: MM44 - LPMM18/2762  Respondent: Imelda Rider 10855329  Agent:

MM44 Alderton Farm - I object to the return of this Greenbelt housing development to the Guildford Local Plan. 120 houses will put an impossible demand on Send Marsh Road and Polesden Lane - the only entry/exit roads for this site. Polesden Lane is narrow with passing places - there is no way it can cope with 120 extra households. With neighbouring proposed developments, local medical & school infrastructure will not be cope with big increase in demand

Attached documents:

---

Comment: MM44 - LPMM18/155  Respondent: Emma Tallick 10855553  Agent:

I would like to register my objections to the current planning for additional developments around Send Village.

In particular I would like to object to the developments MM44 and MM41.

As well as impacting on the heritage of the area around Send Marsh Green, MM44 also contradicts the Green Belt policy of MM9. This land has always been listed as green belt land and therefore other non-green belt sites should be considered before developing this green belt land. In addition, the whole area around Send is at full capacity for what the current infrastructure can support, this includes:-

Roads
Schools
Doctors
Dentists

Send Villages Medical Practice is full, takes many days if not weeks to get a Doctor's appointment. Ripley has now lost its local primary school and only has one small dentist practice. The roads around this area are heavily congested at all times and safety is becoming an issue as more and more major accidents are happening on the A3 section parallel to the Send/Ripley area as well as parking being pretty non-existent during peak times. With no local schools being able to take a large influx of new residents, this would result in yet more traffic as new residents would have to drive their children to distant schools outside of the local area.

Therefore, without substantial additional infrastructure to support the above, this area cannot support any more additional housing as shown in MM44 and MM41.

Attached documents:

Comment: MM44 - LPMM18/839  Respondent: Anna Crawford 10856673  Agent:

I object to Policy A63 as this Green Belt site has no exceptional circumstances & contradicts Policy MM9
An increase of 45% housing in Send is too much for the infrastructure.

Attached documents:

Comment: MM44 - LPMM18/1610  Respondent: Angela Otterson 10858977  Agent:

MM44 Land at Aldertons Farm, Send Road, Policy A63.
New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY.

With Garlicks Arch 550, Clockbarn 60, Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%

How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment.

Agin this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

Attached documents:

Comment: MM44 - LPMM18/872  Respondent: Mrs C OWEN-Crane 10859073  Agent:

I object to this site being used for 'self build' houses as there would be no control over the appearance of the houses and again there would be additional traffic and strain on our present infrastructure
Comment: MM44 - LPMM18/873  Respondent: Mrs C OWEN-Crane 10859073  Agent:

I object to the addition of self build houses that will put an additional strain on our already congested infrastructure and resources.

Attached documents:

Comment: MM44 - LPMM18/1278  Respondent: Neil Haxton 10859265  Agent:

**MM44 Land at Alderton’s Farm, Policy A63**

I object to this because;

This is Green Belt land and there are heritage centres at Send Marsh Green which will be affected with an increase in traffic blocking already busy surrounding roads including Send crossroads.

Garlicks Arch, Clockbarn and Winds Ridge developments would increase the number of houses by 45% with an already insufficient infrastructure.

Attached documents:

Comment: MM44 - LPMM18/1105  Respondent: Mr (Mr Alec McIndoe) 10864065  Agent:

I object most strongly to this proposal. It has already been deleted from an earlier draft plan because of the numerous objections. It is a Green Belt site, it would go some way to "joining" the two communities of Send and Send Marsh (which is, I believe, not wanted by either community) and, it appears to me that there is very little demand in the area for additional housing. Properties, both new and existing, are not selling. and I see no reason to suppose that 120 new homes coming to the market would change that. Additionally, if 120 new homes were to built and occupied, Send Marsh Road would become even more congested than it already is, and make the junction with the Portsmouth Road and the Send Crossroads junction chaotic.

Attached documents:

Comment: MM44 - LPMM18/3655  Respondent: Edwina Fassom 10865537  Agent:

**MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.**

Attached documents:
**Comment: MM44 - LPMM18/382  Respondent: Christine Reeves 10866305  Agent:**

MM41 - Policy A43  
MM42- Policy A58  
MM44 -Policy A63  
MM9  
MM27 MM41 MM42 MM48  

I objected to the Land at Garlicks Arch Send Marsh being developed on in my last objection letter so to consider having another 37% development on the site would be outrageous considering 7000 objections were ignored previously for a fewer number of houses being built.

Businesses and employees that have been on the site for many years would lose their jobs as companies have to close or relocate. Their jobs have been their lifeline and income in some cases for their lifetime.

Over the years all the roads locally have been transformed from quiet country lanes to Grand Prix tracks and the lanes and roads infrastructure certainly couldn’t cope with extra housing, cars producing more dangerous nitrogen dioxide putting more people at health risk which they hoped to escape from by moving to the country. We certainly don’t need more people, housing or cars choking our village depleting our woodland areas and picturesque Send March green.

Roads, schools, health centres and hospitals are already overstretched.

**Attached documents:**

**Comment: MM44 - LPMM18/5884  Respondent: Andy Court 10866721  Agent:**

I am strongly objecting to the new site you are proposing at Aldertons Farm, Send Marsh Road Policy A63.

1/This land is Green Belt with no special circumstances, additionally is has a BAT COLONY located nearby.

2/This area is a quiet location and will not with the current infrastructure cope with additional housing, schools, doctors and road network will implode

3/It contradicts Policy MM9

4/It will detract from the heritage buildings in Send Marsh

5/The additional traffic that at least 240 cars will create will put too much pressure on the current traffic situation – already Send Marsh Road queues up to Portsmouth Road during the morning rush

6/With planning for Garlick’s Arch, Clockbarn and Winds Ridge this is an increase of 45% far too much for the current infrastructure and will add at least an additional 1540 cars to our road network.

7/Living in Tuckey Grove I back onto the Alderton Farm Fields and can confirm as noted above that during dusk there are many bats flying around so a bat colony is clearly located close by.

Can you please explain why local councils do not seem to look at current infrastructures, adding so many additional homes to and already crowded village will bring it to a standstill. Why are councils not looking
to building new villages which are self-supporting (own doctors surgery, schools and shops) away from existing villages.

These proposals you are putting forward MM41, MM42, MM44, MM9, M27 and MM48 will increase noise, nitrogen dioxide, diesel particulate pollution, delays/gridlock due to thousands of additional cars.

This is such a heavy concentration of additional housing in one village, it will not be able to cope. You will need to create additional road networks, schools, doctors surgery’s and allow more parking at each property as currently most houses have a minimum of 2 cars and only parking for one.

Please do not destroy our village.

**Attached documents:**

| Comment: MM44 - LPMM18/2602 | Respondent: Lynn Durbridge 10871169 | Agent: |
My First objections are to: MM41, MM42, MM44, MM9, MM27.

At the public examination the figure for Guildford Borough Council housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated. (This is illegal, by law you have to show how you have arrived at such figures. ... To this end Police involvement may be necessary as fraud may have taken place.)

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of G.B.C consultants figures which have always been very suspicious.

My expectation is that the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.

table S2b: Spatial Strategy: Distribution of Housing 2015 – 2034 (net number of homes) states that the net number of homes within villages is 154, this contradicts other figures and is obviously a lie?

And 2000 new homes at Wisley airfield is totally unacceptable. Not only will Send and Ripley be joined but the whole of Guildford...the whole of Surrey will be connected in one sprawling mass of houses and industrial parks with barely a patch of green as far as the eye can see. Individual communities will no longer have their own identities and roads will be even more congested. Services have only received lip service, Gps and schools (and parking) that are already at bursting point have not been thought about at all.

MM44 Land at Aldertons Farm, Send Road, Policy A63.

New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY.

With Garlicks Arch 550, Clockbarn 60 , Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%

How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment.

Again this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

Attached documents:
New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY.

**Comment: MM44 - LPMM18/1569  Respondent: Michael Hurdle 10876993  Agent:**

MM44 – Land WEST OF Aldertons Farm, Sendmarsh Road, Send POLICY A63

I OBJECT -

Will add significant traffic burden to overstretched road – both exits at Mays Corner A247 and at the B2215 are stretched already

On its own, adds 7% to homes in village. Together with other new additions, total impact in Send would have 16% more homes than in previous plan, and the Burnt Common industrial area as well.

Attached documents:

**Comment: MM44 - LPMM18/5909  Respondent: Phil Beddoes 10878529  Agent:**

MM44

The site will fill a gap between Send Marsh and Send which will invariably result in eventual merging of these settlements. The site has not been open to public scrutiny as have others at the Hearing. The site takes more green belt from the village without reason other than you need early build. Is that an exceptional reason for building on fields?

Attached documents:

**Comment: MM44 - LPMM18/3383  Respondent: James Anderson 10880481  Agent:**

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63 New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
- It is a Green Belt site with no special circumstances so it also contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads
• With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/544  Respondent: Roger Knee 10880993  Agent:

MM44

1. What are the "special circumstances" requiring this development. It falls [unreadable text] with policy to safeguard the Green Belt - see MM9.

2. These [unreadable text], together with [unreadable text], added 770 to the 1700 in Send at present. There is an increase of no less than 45%. The local infrastructure will be totally flooded.

3. This was deleted from an earlier draft because of the weight of objection. Why has it reappeared?

Attached documents:

Comment: MM44 - LPMM18/549  Respondent: Roger Knee 10880993  Agent:

Traffic Implications

MM27, MM41, MM42 and MM44.

The effect of greatly increased traffic on Send Barns Lane and Send Road is not fully understated by GBC. It seems there's a feeling that "it will be alright on the night". Well it won't be so until GBC commit to a proper study of the matter which will be made public and up to debate.

Attached documents:

Comment: MM44 - LPMM18/5704  Respondent: Ben Stevens 10881217  Agent:

I object to MM44 - Policy A63 because an extra site for 120 homes on top of the 550 in Garlick’s Arch, the 60 in Clockbarn and the 40 in Winds Ridge will add 770 homes to Send which is an increase of 45%. This is far too many to be acceptable and will have a massive impact on all our surrounding roads increasing congestion as well as pollution. Such a heavy concentration in one village is unreasonable and the building should be spread more evenly throughout Surrey.

Attached documents:

Comment: MM44 - LPMM18/3287  Respondent: Christine Brockbank 10881921  Agent:
MM44 Land at Alderton’s Farm

New site for 120 homes

This was deleted from an earlier draft because of objections, yet is included in current plans.

I object to this proposal on grounds of over-population and increase in infra-structure requirements.

Attached documents:

Comment: MM44 - LPMM18/5955  Respondent: Amanda Stevens 10882113  Agent:

I object to Policy A63, MM44 regarding the land at Alderton’s Farm, Send Marsh Road. It is a green belt site with no special circumstances and so it contradicts policy MM9. With Garlick’s Arch, Clockbarn and Winds Ridge, 770 houses will be added to the 1700 currently in Send which is an increase of 45%. This is too much for our infrastructure and in my view Surrey’s housing need should be spread more evenly throughout the villages in Surrey.

Attached documents:

Comment: MM44 - LPMM18/2881  Respondent: Dave Fassom 10884993  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/3452  Respondent: Jim Browne 10893921  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63 New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
- It is a Green Belt site with no special circumstances so it also contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads

Comment: MM44 - LPMM18/1657  Respondent: Kerstin Browne Kaempf 10896929  Agent:
MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63 New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July!
- It is a Green Belt site with no special circumstances so it also contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads
- With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/2090  Respondent: A Aldridge 10897633  Agent:

Land at Alderton's Farm, Send Marsh Road, Policy A63

This land was only re-inserted in July after being deleted from an earlier draft.

It is Green Belt land with no special circumstances and contradicts Policy MM9.

It will detract from the heritage buildings at Send Marsh Green.

The additional traffic will cause even more pressure on Send Crossroads and the A247, and on loca facilities.

As noted in the Strategic Flood Risk Assessment, Appendix D, Volume 3, there is a risk of flooding in this area of Send Marsh.

This site slopes down to Send Marsh Road and, following periods of heavy rain, water runs down the site to lie at the boundary of the road and causes flooding in the land to the north of Send Marsh Road. The gardens of the houses opposite and downhill from this site also flood during periods of heavy rain. Building houses and roads on the land to the east of Alderton's Farm will cause a more rapid run-off of water towards Send Marsh Road and, consequently, heavier and more rapid, serious flooding of all land and properties in the vicinity.

Send Marsh, by nature of its name, was and is, a marsh and liable to flooding.

Attached documents:

Comment: MM44 - LPMM18/4683  Respondent: Sue French 10897665  Agent:

Objection to MM44 Land at Alderton’s Farm Again this is Green Belt land and the additional traffic at Send Marsh will clog up the road and spill over to Send Crossroads. Send Marsh is a pretty area which will be destroyed by such a big development.

Attached documents:

Comment: MM44 - LPMM18/5726  Respondent: Michael Mills 10900385  Agent:
MM41-Policy A43---MM42-Policy A58---MM44 Policy A63

MM9 Green Belt Policy

MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.

Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

Attached documents:

Comment: MM44 - LPMM18/2209  Respondent: Derek and Lilian Scholes 10902113  Agent:

Local Plan Modifications MM44, MM41, MM42, MM9

We strongly object to the main modifications to the Local Plan for Send. This area is not suitable for such development. There is not the infrastructure to support this, and the real need is for just a small number of AFFORDABLE houses. With regard to MM9, the Green Belt Policy, Alderton's Farm in particular cannot be "considered to be within the village" and such intrusion into the Green Belt will benefit no one but the developers.

Attached documents:

Comment: MM44 - LPMM18/2998  Respondent: M Stokes 10903265  Agent:

I object to: MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63.

1. This was removed from the earlier draft but has now found its way back onto the agenda. It is on Green Belt land with no special circumstances and consequently contradicts policy MM9.
2. The added congestion along Send Marsh Road in both directions will increase pressure on the Send Crossroads and access onto London Road.

Attached documents:

Comment: MM44 - LPMM18/541  Respondent: Linda Freeland 10903681  Agent:
MM41/42/44 - Garlicks Arch, Burnt Common, Aldertons Farm. Garlicks Arch and Burnt Common have seen substantial increases for development following the inspection and Aldertons Farm has appeared from nowhere. A revised (upward) total of 789 dwellings is now proposed, yet the Office of National Statistics, based on their published housing needs data, have determined this figure should be 431. What is the justification for the additional 358 dwellings? Pressure on local infrastructure and services will be unbearable.

With so many arguments against the Plan, in particular the basis of estimating need and the unjustified destruction of the Green Belt, it is clear that this plan is not fit for purpose and should be rejected altogether.

Attached documents:

Comment: MM44 - LPMM18/1409  Respondent: Joe Gervasio 10906145  Agent:

I am writing to comment on the Main Modifications (MM) to the Guildford Local Plan.

I am a local resident and have lived in the village for over 30 years.

I object most strongly to the Transport Strategy relating to many of the modifications (MM41 MM42 and MM44 in particular). There has been no proper assessment of the impact so this is being proposed without any basis for mitigation. The impact is clearly going to be very great on the local roads and there is no proposal at all to alleviate it, never mind demonstrate that any alleviation could be adequate. Any disinterested observer can see that the local roads are already beyond capacity with traffic jams regularly in the (I remind you) Green Belt villages of Ripley and Send.

Attached documents:

Comment: MM44 - LPMM18/1412  Respondent: Joe Gervasio 10906145  Agent:

I object to the inclusion of MM44 the land at Alterton’s Farm. This site was not in the last draft local plans. There has been no justification for its inclusion, again no provision for mitigation, and inadequate public consultation. This whole area in the north of the Borough is having by far the most development forced upon it, against local opinion and not addressing local needs, and this additional development which was not included in the Local Plan has further unbalanced the delivery of houses, which is a factor which should have received wider consultation. As to the site itself, again it is a Green Belt site, with no special or exceptional circumstances to justify development, and inappropriate in scale.

Attached documents:

Comment: MM44 - LPMM18/3662  Respondent: Heather Thompson 10910753  Agent:

I object to MM44 - Land at Alderton's Farm, Send Marsh Road, Policy A63

I cannot understand why his proposed development was deleted from an earlier draft as a result of all of the objections and only re-inserted in July. this is a Green Belt site with no special circumstances and, once again, contradicts MM9. The increased traffic on Send crossroads will be considerable and, when considered alongside the other proposals, result in a 45% increase in housing in the village. This is clearly unfair, unacceptable and asking the impossible of our infrastructure. No one is disputing the need to build in order to provide homes for people, but the scale of these proposals
will destroy the village of Send and merely contribute to the urban sprawl. It seems that Guildford Borough Council has its sights set on this destruction. Is it purely cynical to wonder why so much of the county's building plans concentrate on two small villages, Send and Ripley, both held by members of minority groups on the Conservative led council?

<tr>
<td>I object to MM44 – Policy A63 – land at Alderton’s Farm, Send Marsh Road. This was deleted from an earlier draft because of the number of objections and not re-inserted until the public examination in July and it therefore seems underhand. Alderton’s Farm is a Green Belt site and has no special circumstances so it would completely contradict policy MM9. Not only would it detract from the lovely rural character of the village, it would add an immediate 120 new homes to the village which means 240 new cars – as very few families only have one car each. This alone would have a detrimental impact on the village in terms of congestion and pollution and yet these new houses together with the Garlick’s Arch, Clockbarn and Winds Ridge development would add a further 770 new houses to Send which is a 45% increase.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>It seems to me that Send is being allocated a huge chunk of Surrey’s housing burden and to expect our village to absorb this is not right. It has to be shared out more evenly with other villages.</td>

<tr>
<td>For similar reasons I object to MM44 land at Alderton’s Farm, Send Marsh Road Policy A63. The extra 120 homes will cause similar disruption even if it is on a lesser scale. Combined with the plans for Garlick’s Arch would mean a total of 1540 extra cars on roads that struggle with existing traffic levels. It simply is not practical. It is over-development on a totally unsympathetic scale, will ruin the village, cause appalling congestion and have a significant impact on pollution levels in the area. The resulting Nitrogen Dioxide levels will be a particular blight to local children and elderly people alike, increasing cases of asthma in a community which has worked hard to set up home here in what we strive to keep as a pleasant and welcoming village environment.</td>

1. **MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63**

New site for 120 homes including some self-build

I repeat all my objections under MM41.

Attached documents:

**Comment: MM44 - LPMM18/1315  Respondent: Ms Victoria French 10924161  Agent:**

The scale of the proposed developments represents a 45% increase in the number of dwellings in Send. The lack of viable public transport options will inevitably lead to more congestion on the local roads. This, together with the loss of Green Belt, deterioration of air quality and visual blight on the heritage buildings at Send Marsh Green would be an unacceptable degradation to the way of life of the existing residents.

There are no special circumstances that warrant building on the Green Belt, an action that will deprive citizens of this amenity for generations to come, and represent yet another threat to Surrey's wildlife.

Attached documents:

**Comment: MM44 - LPMM18/1542  Respondent: Benedict Phillips 10924193  Agent:**

I am writing to object strongly to some of the main modifications to Guildford's local plan.

I live on Send Road and will be hugely adversely affected by the massive growth in traffic on a road that is already too busy. The big increase in houses at Garlick's Arch (MM41), the doubling in size of the Burnt Common industrial estate (MM42), the Alderton's Farm housing development (MM44) and the Clandon A3 slip road (MM27, MM42, MM48) will combine to put intolerable pressure on Send Road. This will result in increased noise, delays and gridlock, not to mention the extra pollution which is a major health concern for those living on the road. In particular, the industrial estate is bound to increase HGV traffic on Send Road, which poses a major safety risk to young children. The 30mph limit is not usually adhered to and there are no speed cameras on the road or any traffic-slowing devices.

Furthermore, the Garlick's Arch housing development (MM41) is now increased by 150 houses. This is excessive and ignores the 7,000 objections to the original, smaller plans. This land is Green Belt land and ancient woodland. This will be lost while at the same time morphing Send and Ripley into one big sprawling mass of houses. Surely the whole point of the Green Belt is to stop this happening? The extra population will also put intolerable pressure on local schools and medical facilities - particularly after the council's recent decision to close Ripley Primary School in extremely dubious circumstances, which attracted negative coverage in the national press.
As far as the industrial estate at Burnt Common is concerned, the doubling of the size to 14,800 sq m seems a total insult to all those who objected to previous incarnations of the local plan. There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are no special circumstances so it goes against your own Green Belt policy (MM9). There is already a 25% increase in the Send Business Centre, while the huge new Vision Engineering factory and the fact that the old factory is being kept as a commercial property despite residents being told it would become housing, all combines to fundamentally change the nature of Send by massively increasing the amount of industrial and commercial activity.

And why has the Alderton's Farm housing development reappeared in the latest local plan? It is Green Belt with no special circumstances so again contravenes your own rule MM9. Added to the other proposed housing, it makes 770 houses added to the current 1,700 in Send. That is an unnecessarily high increase which is unfair on the people who live in Send already.

Moreover, the wording of the MM9 policy on the Green Belt seems to leave open the possibility of more 'infilling' of any land left that hasn't been developed.

It is staggering that after all the complaints, Guildford Borough Council has come back with these modifications.

Attended documents:

Comment: MM44 - LPMM18/6054  Respondent: Paul Dench 10926689  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

New site for 120 homes including some self-build

It is my opinion that the above three modifications to increase even more the already high number of developments will create huge problem to the already overstretched infrastructure, the roads, the school and the medical facilities. The roads in particular are totally unsuitable to take a greater load of traffic. I was born and brought up in Send and have lived most of my life on Send Road. I have seen the amount of traffic build up gradually. Now the long traffic jams on the road outside my house are common place. Often the village is gridlocked. It only takes a hold up such as traffic lights in Old Woking or congestion on the A3/M25 for the village traffic to grind to a halt with cars exhaust fumes filling the air.

In addition all these developments/modification encroach on to the Green Belt but this seems not to be a concern of the planning department. So the Green Belt Policy counts for nothing.

Attended documents:

Comment: MM44 - LPMM18/1380  Respondent: R Ebdon 10933569  Agent:

This is a green belt site with no special circumstances and so contradicts MM9, and was removed from previous drafts of the local plan. There have already been considerable objections to having 120 new houses but these are now being ignored. The impact on the roads that run into and through Send will be significant, particularly as this is the main route into Woking and will also have to carry additional traffic from the other developments proposed for the village. These include (MM41) 550 houses at Garlic's Arch, 60 houses at Clockbarn, and 40 houses at Winds Ridge on Send Hill where I live.
For one village the totality of developments is a wholly unreasonable and untenable amount of expansion - it is increasing Send housing by 45%! The infrastructure and services of Send village will simply not be able to cope. The school and medical centre will not be able to accommodate this massive increase in demand. The roads are already jammed-up at peak times coping with school and work traffic passing through Send from the A3 to Woking. An additional 1000+ local cars using the roads is simply not feasible and will cause unbearable stress to residents unable to travel freely to and from their homes.

I am particularly concerned about the treacherous conditions that will be created for cyclists. Send Road is already a very scary road to cycle on given the volume of traffic at peak times and difficulty in passing cyclists safely. I am put-off cycling to work in Woking due to the dangers on the narrow already busy road, but additional traffic will mean that it is positively dangerous for local children and adults to cycle to school, local services, amenities and to work.

Comment: MM44 - LPMM18/4678  Respondent: Liam Doyle 10966977  Agent:

MM44 - Land at Alderton’s Farm, Send Marsh Road, policy A63

I object to this on the following grounds;

- This is Green Belt land
- The additional traffic together with other proposed developments will further gridlock crossroad
- The existing poor drainage and flooding of local gardens will worsen
- With other locally proposed new development, this will result in a 45% increase to Send, for a small village this is too high
- Extra cars will block up the existing busy roads
- Impact the already strained local services such as schools and medical facilities

Attached documents:

Comment: MM44 - LPMM18/3564  Respondent: Robin L. Smith 10972833  Agent:

MM44 - Alderton's Farm (Policy A63)

- This disappeared from an earlier draft due to the number of objections and suddenly freshly reappeared for the public examination in July. Use of wrong version, a copy/paste error or just trying to slip things in again?
- Contradicts Green Belt policy outlined in MM9
- It will completely ruin the historical heritage around Sendmarsh Green
- The additional traffic will increase pressure on junctions at both ends of Sendmarsh Road
- The cumulative total in houses from developments at Garlick Arch (550), Clockbarn (60), Winds Ridge (40), resulting to an addition of 770 house to the current 1700 in Send is overkill and far, far too much for the local infrastructure

Attached documents:

Comment: MM44 - LPMM18/3574  Respondent: Robin L. Smith 10972833  Agent:

MM27, MM42, MM42 and MM48 Transport Strategy

The implications upon traffic that MM41 (Policy A43), MM42 (Policy A58), MM44 (A63) will bring are not addressed to any worthwhile depth outline at a high-level by the A3 changes, the Clandon slip roads. GBC offers up find sounding words but no serious "meat" with regards to full assessments to serious increase in traffic with impact on Send Barnes and Send Road with an increase of several thousands of cars acerbating the current, existing traffic problems.

More houses will be hit by traffic pollution, noise, delays and gridlock.

Attached documents:

Comment: MM44 - LPMM18/1355  Respondent: Mrs Julie Cameron 10984385  Agent:

I object to the proposal for 120 new homes on land at Alderton's Farm, Sendmarsh. I understand that this was not included in initial proposals and seems therefore to have introduced without the full consultation. The proposal is out of line with MM9 in that it the housing would be built on a Green Belt site outside the village of Send. Whether Sendmarsh can be regarded as a village itself is a moot point, being historically a row of houses built around a green with the later addition of a housing estate. It has no amenities as such, except for a pub. Building here would cause further erosion of the countryside between Sendmarsh and Send with a corresponding loss of open space and its associated habitat. As such, residents would rely on the local school and medical practice in Send, both already operating at capacity. Additional
traffic (as many as 240 motor vehicles) would pressure local roads, including the crossroads at Mays Corner, where large
a build up of traffic is apparent morning and evening. The additional flow would cause more disruption outside Send
school where the road is already congested at peak school times, especially the morning when parking is erratic and
dangerous, as parents seek to drop off their youngsters.

Attached documents:

Comment: MM44 - LPMM18/2540  Respondent: Ian Pigram 10987745  Agent:

Following objections the land at Aldertons Farm (MM44) was removed from an earlier draft but reinserted in July. This is
another example of MM9 policy contradiction, there being no special circumstances for Green Belt removal in MM44.
The additional traffic from this and other proposed developments in Send due to overall planned 45% increase in housing
would put excessive strain on the Send transport infrastructure and residents lives.

Attached documents:

Comment: MM44 - LPMM18/609  Respondent: Pam Harnor 10995233  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63
- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
- It is a Green belt site with no special circumstances so it contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure at the Send Crossroads and the already congested junction of Send
Marsh Road and Portsmouth Road
- With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an
increase of 45%. This is too much for our infrastructure

Attached documents:

Comment: MM44 - LPMM18/2452  Respondent: Peter Cormack 10995297  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/502  Respondent: Richard Baldwin 10999873  Agent:
MM44

Again, this is Green Belt land with no justification for building.

Attached documents:

Comment: MM44 - LPMM18/892  Respondent: Howard Milner 11003361  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

Well this one has certainly reared up out of ether again, YOU once again propose allowing building on Green Belt in contradiction of policy MM9. The added pressure of yet more traffic and people, should we conservatively guess at 200 cars, 400 people on the local infrastructure. A total proposed increase of 45% of housing in the local area, has anyone within committees considered an impact survey or even thought any of this through?

Attached documents:

Comment: MM44 - LPMM18/883  Respondent: Elizabeth Milner 11003681  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road Policy A63

Here again, you are intending to build on Green Belt land, which contradicts policy MM9. Send Crossroads will be under considerable pressure and with Garlicks Arch, Clockbarn and Winds Ridge developments, 770 houses would be added to the 1700 currently in Send, which is an increase of 45%. There is no rationale for this and it would ruin Send and the surrounding Green Belt.

Attached documents:

Comment: MM44 - LPMM18/807  Respondent: David Pycraft 11003969  Agent:

I wish to object to the proposed Local Plan for the village of Send, Send Marsh and the surrounding Green Belt area, which is not only unsuitable, but which also contradicts some policies, as detailed below.

MM44 Land west of Alderton's Farm, Send Marsh Road, Send

This area serves as a barrier between Send Marsh and the village of Send. The National Planning Policy Framework (point 80) states that one of the purposes of Green Belt land is 'to prevent neighbouring towns merging into one another'. Development at the site would therefore clearly be in breach of point 80.

Furthermore, I draw your attention to Policy P2, MM9, Policy Paragraph (1), which states that 'Inappropriate development will not be permitted unless very special circumstances can be demonstrated. Very special circumstances will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations'. Any development on this site would clearly be inappropriate, for several reasons (and there does not appear to have been a demonstration of any 'very special circumstances').
Firstly, the road (B368 Send Marsh Road) which passes site MM44 is unsuitable for the huge increase in traffic which will result from its development, as the road is narrow with sharp bends at either end, thus slowing traffic. Indeed, the corner of Send Marsh Green has been the site of several accidents; even more traffic will only add to the danger. Moreover, the huge increase in traffic will massively increase congestion in the area, joining/coming off the A3 into Send Marsh at one end of the B368, and coming off the A3 or joining/coming from Woking (itself undergoing massive redevelopment) at the other end of the B368, along the A247. The A247 suffers from severe congestion, and is often crawling or at a standstill through Send village during the times of the school drop/pickup and the daily rush hours.

Yet another factor that cannot be understated is the unsuitability of the land itself at site MM44. As someone who has lived near the site for 36 years, I can attest to the fact that it is flooded every winter, and is frequently waterlogged for most of the year.

This site had been removed from the Local Plan, no doubt after careful analysis, so it is mystifying that it is suddenly back under consideration, when the same reasons to have disqualified it previously still exist.

Attached documents:

**Comment:** MM44 - LPMM18/3776  **Respondent:** Nick Thomas 11005473  **Agent:**

*MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63*

This has been reinserted into plans at the last minute. The land is green belt, and the traffic will put pressure on already struggling infrastructure.

Attached documents:

**Comment:** MM44 - LPMM18/3250  **Respondent:** James Culmer 11007393  **Agent:**

*MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.*

Attached documents:

**Comment:** MM44 - LPMM18/248  **Respondent:** Mrs Sandra Reeves 11008033  **Agent:**

I object to this development particularly given the fact that it was deleted from an earlier draft because of all the objections and not reinserted until the public examination in July. Not only will this development detract from the heritage buildings on Send Marsh Green but it will increase pressure on the Send Crossroads which is already extremely busy particularly during rush hours and school times. It is a Green Belt site with no special circumstances so it also contradicts policy MM9. Along with the other housing proposals for Send, it will add 770 houses to Send - an increase of 45% and we simply do not have the infrastructure to cope with such an increase.

Attached documents:
MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63 New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
- It is a Green Belt site with no special circumstances so it also contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads
- With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/1293  Respondent: Sally Baker 11009825  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Send Policy A63 Again this is Green Belt land. The additional traffic at both ends of Send Marsh Road will be a nightmare in rush hours. This road carries a great deal of through-traffic throughout the day and can be considered a rat-run. 120 homes with a probable 240 cars at least will cause even more problems. Insufficient infrastructure for this increase is yet another problem.

Attached documents:

Comment: MM44 - LPMM18/5675  Respondent: Stephen Gill 11010945  Agent:

5 Proposal for another 500 houses in Send, in the Green Belt: Please see objection in statement 1. Please also note that these proposed houses will be car-dependent, and accordingly, the proposed development would not be sustainable development. Further, no account appears to have been taken of the impact of the increased volume of traffic that such development would have on the Portsmouth Road, Ripley, or on the surrounding local lanes and narrow roads. The Draft Plan is therefore unsound and the Examination should be reopened.

Attached documents:

Comment: MM44 - LPMM18/1401  Respondent: Mrs Janet Williams 11011041  Agent:

Additional houses mean additional traffic on already busy village roads. Send Road is frequently at a standstill at peak times.

There are no 'special circumstances' why Green Belt should be developed in this area.

This development is one of several that will add 770 more houses in Send. This is totally unacceptable. It will change the entire nature of this village.

Attached documents:
Comment: MM44 - LPMM18/4931  
Respondent: Mrs Janet Williams 11011041  
Agent: 

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

New site for 120 homes including some self-build

All my objections to MM41 also apply to MM44. In total these developments would increase the houses in Send by 45%. How can the village infrastructure possibly cope with such growth.

Attached documents:

Comment: MM44 - LPMM18/912  
Respondent: Mary Warren 11011713  
Agent: 

Proposed industrial space

Main Modification MM44

There is no real explanation as to why there has been an increase in the allocation of industrial space at Burntcommon. The local plan talks about updates to the Employment Land Needs Assessment but doesn't say what they are. My understanding is that ELNA has shown a reduction in demand for industrial land, not an increase. There is already proposed expansion of the Send Business Centre. Why do we need further expansion of Burntcommon as well, Particularly as there is spare capacity at Slyfield which is not in the Green Belt unlike Burntcommon. Once again, the transport links have not been fully discussed. The narrow roads around the area are completely unsuitable for heavy lorries and any increase in their number will end up blocking the roads and causing traffic chaos.

In conclusion, this latest local plan does nothing to maintain Send as a village. Its boundaries will be eroded by 'limited infilling' till they meet those of the adjacent villages and could even extend to Guildford itself and possibly to Woking. We will have an unattractive sprawl of housing and industrial sites with cars and lorries pumping out noxious fumes on narrow inadequate roads, driving away residents and damaging children's lungs. As I have asked before, is this really what they want?

Proposed Housing

Modification MM44 Alderton's Farm.

Like Garlicks Arch, this land is within the Green Belt. It separates Send and Send Marsh, allowing each to preserve their own character. There are no special circumstances to suggest it can be taken out of the Green Belt nor can building on it be considered 'limited infilling' as it has no close neighbours. There must have been some reason why this was deleted from an earlier plan and not re-instated until July. This reason still stands.

MM44 – I object on the following grounds
This has suddenly been re-inserted after being deleted from earlier draft due to objections – so why is it allowed to be reconsidered now.

This is green belt land and when its gone it will be gone forever – this was designated green belt land many years ago and no one should have the right to alter this now. Contradicts policy MM9

Additional traffic at Send traffic lights – additional school places will be needed and increased load on the doctors surgery.

Attached documents:

**Comment:** MM44 - LPMM18/4064  **Respondent:** Trevor Pound 11023489  **Agent:**

I am responding to the public consultation on the latest iteration of the Guildford Local Plan as it relates to Send. With respect to MM44 (Land at Alderton’s Farm, Send Marsh Road), this is Green Belt Land so I can see no justification for development on this scale, if at all. Send Marsh Green is a particularly attractive corner of Send and a large development would detract from its character. Neither would local roads, which already easily clog eg the turning from Send Marsh Road onto the Portsmouth Road or Send crossroads, easily accommodate increased traffic levels. I am not sure how other infrastructure would cope either such as the availability of school places or adequate medical services.

Attached documents:

**Comment:** MM44 - LPMM18/1850  **Respondent:** Jean Walker 11023585  **Agent:**

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July.
It is a Green belt site with no special circumstances so it contradicts policy MM9

It will detract from the heritage buildings at Send Marsh Green

The additional traffic will increase pressure at the Send Crossroads and the already congested junction of Send Marsh Road and Portsmouth Road

With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure

Attached documents:

Comment: MM44 - LPMM18/178  Respondent: Mike Tarrant 11032705  Agent:

I object to MM44 (Policy A63, Alderton’s Farm, Send Marsh Road).

Because the proposal for 120 houses was previously deleted from the earlier draft plan due to the objections levelled. The reintroduction of this, is equivalent of having a second referendum on leaving the EU. The people spoke, respect their wishes!

Because this is Green Belt Land with no special circumstances for development. Which contradicts MM9!

Because of the additional traffic this will create. There are circa 1,700 houses in Send. The proposed developments at Garlick’s Arch 550, Clockbarn 60, Winds Ridge 40, Plus Alderton’s Farm 120. Adds 770 new homes. An increase of 45%. This is excessive for our roads and indeed the infrastructure of our Village.

Attached documents:

Comment: MM44 - LPMM18/1161  Respondent: Nick Pycraft 11034817  Agent:

I wish to object to the proposed Local Plan for the village of Send, Send Marsh and the surrounding Green Belt area. I object to the following proposed developments in particular:

MM44 Land west of Alderton’s Farm, Send Marsh Road, Send

I object to development on site MM44. Having raised objections to previous proposals for development at this site, I was pleased to see that this area was no longer under consideration, and so am dismayed to see it being proposed again. I fail to see how it could have been analysed and found to be unsuitable (which it is), only to be once again under consideration.

This area serves as a barrier between Send Marsh and Send Village. The National Planning Policy Framework (point 80) states that one of the purposes of Green Belt land is to 'prevent neighbouring towns merging into one another'.

I draw your attention to Policy P2, MM9, Policy Paragraph (1): 'Inappropriate development will not be permitted unless very special circumstances can be demonstrated. Very special circumstances will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations.' Anyone who knows this particular area will attest to the proposed development as being inappropriate. The land in question floods every winter, and retains water at all but the very driest times the rest of the year.
It is also clear that the road could not cope with additional housing alongside it. One only needs to travel through Send Marsh to Send to realise that the road narrows in places and has tight bends which already slow traffic; the almost 90-degree turn on the corner of Send Marsh Road and Polesden Lane (the site of several accidents over the years), and a similar turn at the end of Send Marsh Road on the approach to Mays Corner restrict traffic flow already. Any additional traffic on this stretch of road from the proposed housing on this site will not only add to the traffic flow problem, but also make it increasingly dangerous (also bearing in mind that this is also a pedestrianised road).

These are very clear reasons why this site is inappropriate for development, and I have heard of no ‘very special circumstances’ which would change the situation.

Ref: Objection to Planning MM41, MM42, MM44, MM9 and transport strategies

I write to object most strongly to the planning modifications to the above developments.
I object because the excess number of properties being planned will change the village out of recognition, we do not have the space and infrastructure for this number of properties.

The vast enlargement of the industrial areas will cause excessive noise, damage and danger to the younger and older residents in the village. These developments are again out of proportion to the village of Send.

The traffic changes on and off the A3 will cause major traffic congestion, mainly due to the lack of road space in Old Woking at all times and Ripley during the peak rush hour periods.

The Green Belt should be protected and not ignored.

Overall these planning applications cause a vast overdevelopment of the village and area of Send and should not be continued at the scale of the current proposals.

MM44 Land at Alderton’s Farm, Send Marsh Rd., Policy A63

This development was deleted from earlier plans because of Local Objections and only re-inserted in July 18.

The objections are still applicable. It is Green Belt Land, the rural road is narrow and not built for the present volume of traffic.

So why plan to increase traffic and add to the already very congested road system?

The present infrastructure is not adequate

Attached documents:

**Comment:** MM44 - LPMM18/4962  **Respondent:** Sam Thompson 11042433  **Agent:**

MM44, Aldertons Farm, Policy A63

I am not sure where to begin with my objections here - in that this item is just so plain stupid!

Again, this item has made a comeback after previously having been withdrawn due to mass objections.
Yet again, it is a proposal to build on green belt land so contradicts MM9.

Sendmarsh Road is already a busy road that is not well maintained by the council with poor road quality, it cannot sustain increased traffic.

The area is extremely rural, with minimal public transport nearby (a bus that runs once an hour for a few hours a day is pitiful) - so such a development would likely need at least 2 cars per household assuming 2 adults per house as otherwise they could never get anywhere; there is not the space to park 200+ cars without destroying the character of the area.

The size of the development is frankly ridiculous and not in keeping with the area.

MM44 - Land at Alderton’s Farm, Send Marsh Road, policy A63

I object to this on the following grounds;

• This is Green Belt land
• The additional traffic together with other proposed developments will further gridlock crossroad
• The existing poor drainage and flooding of local gardens will worsen
• With other locally proposed new development, this will result in a 45% increase to Send, for a small village this is too high
• Extra cars will block up the existing busy roads
• Impact the already strained local services such as schools and medical facilities

Attached documents:

Comment: MM44 - LPMM18/3725  Respondent: Peter McGowan 11047201  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road Policy A63

This is a Green Belt site with no special circumstances and so it violates policy MM9. It should be pointed out that the the proposal for 120 homes (including some self-build) was deleted from the earlier draft because of the objections received and now has been re-inserted following the public examination in July. Infrastructure will be unable to accommodate the proposals due to the fact that alongside Garlick's Arch (550), Winds Ridge (40) and Clockbarn (60) it adds 770 houses to the 1700 houses already in Send (a 45 per cent increase). Send Crossroads will not be able to deal with the additional traffic. There are beautiful heritage buildings at Send Marsh Green which I have enjoyed for many years and the
proposals will detract significantly from these buildings. I have enjoyed using the public footpath running through the fields at Alderton's Farm and broad rural views will be lost and replaced with over development. There are also many species of birds and insects that inhabit the nearby woodlands of Alderton's Farm and this habitat will be negatively impacted by this development. There is a significant population of bats in the area and these developments will have a negative impact on them.

Comment: MM44 - LPMM18/5893  Respondent: Patrick Oven 11048481  Agent:

MM44, Alderton's Farm, Send Marsh.

This was included in the first draft of the Plan then removed. It was reinstated only at the Public Inquiry. As indicated above, it is the only area of undeveloped land between Send Marsh and Send village, and thus effectively provides some green space between the two built-up areas. It is adjacent to Send Marsh Green, which is an extremely attractive location, with several listed cottages as well as the stunning and also listed, Jacobean Manor House. Send Marsh Road is already very busy, as the preferred route between Send and Ripley. As indicated already, proposed housing need has fallen, and given that there is clearly going to be some development at Garlick’s Arch, there is no demonstrated need for any houses to be built at this site. Such development will add to traffic on this narrow road, which contains two very sharp bends, and will add to the existing congestion at the traffic lights at Send crossroads.

Attached documents:

Comment: MM44 - LPMM18/4195  Respondent: Belinda Nicoll 11049729  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

This wasn’t in the first local plan and there’s no reason why Send need this amount of housing so one can only imagine that Send has been selected to accept more than it should due to other parts of the borough not accepting their burden. Why can it be that the following points are being ignored?

• New site for 120 Homes including some self-build
• This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
• It is a Green Belt site with no special circumstances so it also contradicts policy MM9
• It will detract from the heritage buildings at Send Marsh Green
• The additional traffic will increase pressure on the Send Crossroads.
• With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.
Comment: MM44 - LPMM18/4627  Respondent: Roger Bean 11051713  Agent:

MM44 Alderton's Farm

I object to this because:

it is greenbelt land how can this even be considered I can only assume that.[Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]

this has already been deleted from a previous draft and now put back in.
these houses are unnecessary as there are hundreds of other proposed houses in the area, far too many for the village to cope with.
the narrow roads in the area will not be able to cope with the huge amount of increased traffic.Pollution levels will increase leading to shortened lifespans and more pressure on local services.Which following council cuts due to inefficiencies and top earning in upper tier management will not have the money to spend on infrastructure and services required to support this increase in local population.

Comment: MM44 - LPMM18/2977  Respondent: Claire Owen 11053825  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Comment: MM44 - LPMM18/1034  Respondent: Vicki Groden 11070401  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

• The reinsertion of this site will increase local traffic even more.

Comment: MM44 - LPMM18/5397  Respondent: Anthony Maine 11070977  Agent:

OBJECTION – Policies MM41, MM42 and MM44

I object to the proposed development at these sites as they are all within green belt areas. There are no reasons provided within the Main Modifications to the Local Plan that substantiates development on green belt land.
I urge the council not to consider removing the Green Belt and set in motion future development of these spaces, but to focus on the numerous unused BROWNFIELD sites that exist throughout the Borough. These would more than meet the current housing demand, once this is properly defined within the Local Plan.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/4998  **Respondent:** David Williamson 11077025  **Agent:**

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63:

I object to the reinstatement of Policy A63 for the following reasons:

- It was deleted from an earlier draft as a direct result of the huge number of objections made previously
- No ‘exceptional circumstances’ exist to justify this use of Green Belt land
- In conjunction with Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) this makes a total of 770 proposed new houses. Set against the existing 1700 houses in Send, this represents a staggering 45% increase. The village’s infrastructure simply cannot cope with this scale of development.
- The proposals for Send are wholly disproportionate compared to other areas in the borough.

Green Belt, Policy 2, paragraph 4.3.15:

- The council’s assertion that exceptional circumstances allow for “limited infilling outside the identified settlement boundaries where it can be demonstrated that the site should be considered to be within the village” introduces a subjective test, and effectively attempts to directly negate Green Belt Policy.

To summarise, all these developments in Green Belt land have attracted many thousands of objections from local residents - they are not wanted, but more importantly, they are simply not needed. There are many brown field sites throughout the borough that have not been taken advantage of, only because they would not yield as good a profit for developers.

Housing is needed, but it must be built in the right places, not just the most convenient or most profitable, and be accompanied with investment in local services for the huge increase in numbers of people that would come along with the proposed construction. The real tragedy is that were these developments in Send, Send Marsh and Burnt Common allowed to go ahead, the quality of life for existing and new residents alike would be much poorer than it is now. Local roads, schools and medical facilities are already fully stretched. There would be a considerable human cost for simply attempting to hit government targets.

**Comment:** MM44 - LPMM18/3345  **Respondent:** Neil Munro 11097409  **Agent:**

**RE: Objection to Local plan**

I am writing to object to the over development of Send village in the proposed Local plan.
My family have lived in Send for over 50 years. We, along with all residents of Send and the surrounding villages, will be negatively affected by the impacts of the development on the green space, transport system and the health and education provision.

The following specific objections relate to the following proposed developments

MM41 Garlicks Arch 550 homes

MM42 Burnt Common industrial and storage

MM44 Aldertons Farm 120 homes

1. The current proposed number of new homes is across all schemes is 770 compared the current number of 1700 homes in Send. This is a 45% increase and will massively change the nature and way of life in Send beyond all recognition and it will lose its village feel. In addition the developments that are being proposed will join Send to Send Marsh and Send Marsh to Ripley resulting in one large village removing the individual character.

2. The introduction of 770 new homes will result in an addition of up to 1500 cars on the roads of Send and Ripley. There are currently major delays and traffic queues through Send, Ripley and at all junctions at both morning and evening peak times which can extend throughout the day as soon as any road works are introduced in the local area. The addition of 1500 cars will cause the local roads to gridlock and increase the risk of accidents. This in turn will reduce the numbers of cyclists and pedestrians due to the pollution and increased risks of accidents.

The proposed Industrial and storage provision at Burnt Common will necessitate a large number of HGV vehicles passing through Send and Ripley. Even if there are proposed new roads and junctions to aid in this, without legal controls in place, companies will use the smaller roads as direct routes. In the event of problems on the main road network lorries would be diverted via the smaller roads -this is becoming and more and more frequent problem as the main road networks are becoming overwhelmed.

3. The Villages Medical centre already covers the villages of Send, Ripley, Clandon and surrounding areas and it can already take over 6 days to get an appointment to see a doctor. An increase number in excess of 2000 patients would make it impossible to get an appointment and would result is people being unable to see a doctor or having to present themselves at A&E as the only way to achieve a healthcare provision. This is totally unacceptable and would put people’s health and lives at risk.

4. The nearest secondary school is becoming increasingly oversubscribed from Guildford residents, leaving a reduced number of places for residents of Send. This is leading to a situation in a couple of year’s time when there will be no places allocated to children in Send. Provision of good quality school places to meet the current population requirements has been promised for years and is yet to be delivered. The planned increase in population will only add to this. The proposed number would require a new school to be built and established prior to any development to ensure provision was in place.

5. The necessary construction and infrastructure traffic required to construct these developments will have and major and lasting effect on the village, roads, trees and surroundings with pollution and damage to the roads. I work in Construction logistics and know fully the extent of the problems that will occur and how unless fully controlled, promises on measures to avoid impact during construction will be ignored once construction starts.

Although the proposed development in Send Hill is not included in the amendments, as residents of Orchard Way we would be negatively affected by the proposed development as follows.

• The proposed number of houses on the site is inappropriate for the size of the site.

• The increased traffic from the dwellings will overwhelm the road and the associated Junctions with impact on risk of accidents and delays

• The construction traffic to build the dwellings will cause major disruption and permanent damage to the road and environment including damage to trees and hedges from the large delivery vehicles.
• There are already major problems with the main sewer drainage from properties in Orchard Way and Send Hills which will be compounded by the introduction of 40 new dwellings.

• The area identified is Green Belt and this must be maintained for future generations.

• The number of dwellings proposed would not allow space for sufficient and realistic parking allocations for a rural housing location leading to parking in Send Hill which is already a problem and further adds to delays in traffic and accident risks.

• The inclusion of Traveller pitches will have a detrimental effect on the areas for the following reasons.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]. Where even a small number of pitch allocations have been provided it often leads to unofficial sites being set up locally and further travellers visit / locate to the area in an attempt to grow the provision and their community.

The Send Hill cannot accommodate the transport of mobile homes.

As with all proposals within the local plan they are based on providing the best option to housing developers by providing the largest number of dwellings in one block to maximise the opportunity for their profit.

The focus and responsibility of the council must be to meet the housing need in the most sympathetic and sustainable way and ensuring the villages are not lost under new towns and all character is lost. The local plan needs to be re-drafted under these terms and opportunity for small development identified that will fit within the villages and where the village can influence the development rather than the development have a major detrimental effect on the village.

**Attached documents:**

**Comment:** MM44 - LPMM18/345  **Respondent:** Michael Turner 11100193  **Agent:**

**Policy A63: Land West of Alderton’s Farm, Send Marsh Road, Send.** MM44 object to this new site for 120 homes within the green belt. Removing so much green belt land from around Send Marsh is incompatible with the Government’s definition of “sustainable development”. There are no “exceptional circumstances” as required by NPPF paragraphs 79-92 to justify allocating Green Belt land for development. There is no adequate assessment of the effect of the additional traffic which would be generated by this development, and the local roads are narrow and inadequate to support the additional traffic which would result.

**Attached documents:**

**Comment:** MM44 - LPMM18/141  **Respondent:** Nigel Tallick 11151617  **Agent:**

In particular I would like to object to the developments MM44 and MM41.

As well as impacting on the heritage of the area around Send Marsh Green, MM44 also contradicts the Green Belt policy of MM9. This land has always been listed as green belt land and therefore other non-green belt sites should be considered before developing this green belt land. In addition, the whole area around Send is at full capacity for what the current infrastructure can support, this includes:-
Roads
Schools
Doctors
Dentists

Send Villages Medical Practice is full, takes many days if not weeks to get a Doctor's appointment. Ripley has now lost its local primary school and only has one small dentist practice. The roads around this area are heavily congested at all times and safety is becoming an issue as more and more major accidents are happening on the A3 section parallel to the Send/Ripley area as well as parking being pretty non-existent during peak times. With no local schools being able to take a large influx of new residents, this would result in yet more traffic as new residents would have to drive their children to distant schools outside of the local area.

Therefore, without substantial additional infrastructure to support the above, this area cannot support any more additional housing as shown in MM44 and MM41.

Attached documents:

Comment: MM44 - LPMM18/3852  Respondent: Andy Freebody 11160001  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

In conclusion I would point out that the Inspector raised a considerable number of questions about the sustainability, viability and reasoning of Guildford Borough Council’s Local Plan and, despite modifications, these questions have not been addressed adequately in the modifications proposed by the Council in this consultation.

The Plan is unsound and should be re-examined.

### Comment: MM44 - LPMM18/6022  **Respondent:** Karen Lord 11550561  **Agent:**

MM44 Land at Aldertons Farm, Send Road, Policy A63.
New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY.
With Garlicks Arch 550, Clockbarn 60, Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%
How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment.
Again this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

**Attached documents:**

### Comment: MM44 - LPMM18/6012  **Respondent:** Debra Hurdle 11941665  **Agent:**

MM44 POLICY A63 Land West Of Aldertons Farm, Send Marsh Road, Send

I object – This site was not included in the current Local Plan as it was removed after the 2014 draft of the plan. With a tendency to extreme flooding but also a natural open area in the Green Belt and wildlife corridor it is questioned whether this site has not already been considered unsuitable for development?

**Attached documents:**

### Comment: MM44 - LPMM18/744  **Respondent:** Michael Cumper 12129889  **Agent:**

I object to this - This is green belt and there are no special circumstances to enable an argument that this green belt land should be built on.

**Attached documents:**

### Comment: MM44 - LPMM18/4754  **Respondent:** Katherine Pyne 15057889  **Agent:**

MM44 LAND AT ALDERTON’S FARM, SEND MARSH ROAD, POLICY A63

- I object because this additional development will result in traffic and increased pressure on already over-utilised and traffic blocked roads in the village.
- I object because wildlife will be displaced.
- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
- I object to the late inclusion of this site, deleted from an earlier draft due to the strength of local objections and that GBC ignore these by only re-inserting this proposal at the public examination in July. This late inclusion does not follow correct process or allow for legitimate consultation.
- I object to this development as it will contradict Government guidance in their proposals to build on Greenbelt land and because GBC fail to provide ‘exceptional circumstances’ to justify this. Presumption is not to build on
Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.

- I object that this development is proposed on Green Belt Land and will destroy countryside.
- I object because local infrastructure will not be able to support the additional demands of new residents.
- I object because GBC continues to promote excessive and unnecessary housing demand, rather than allowing for open and democratic evaluation of housing need in the area.
- I object because the proposal of adding 770 houses to our village (including 550 at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge) is disproportionate and places excessive and unachievable demand on local services roads and the infrastructure and character of our village. The addition of 770 new houses to the current population of 1700 properties would be an increase of more than 45%. This cannot be accommodated by the existing infrastructure.

Attached documents:

**Comment: MM44 - LPMM18/590  Respondent: Mr Anthony Fairbairn 15067393  Agent:**

I object to this proposal because it is a Green Belt area which should be preserved. It will change the character of Send forever. Additional traffic caused by the new homes will increase congestion and pollution along Send Marsh Road and at the junctions of Send Marsh Road with Portsmouth Road and Send Barns Lane. 120 homes will put more strain on schools and medical facilities (Ripley School has just been closed). This is a popular area for walkers the landscape and view will be ruined. The extra houses added to those proposed for Garlick's Arch, Clockbarn, and Winds Ridge will result in an increase to the number of homes in Send by 45%.

Attached documents:

**Comment: MM44 - LPMM18/846  Respondent: Anita Fairbairn 15067425  Agent:**

MM44

I object to this proposal because the fields where it is proposed to build 120 houses are a beautiful part of my local neighbourhood. I frequently walk past them as part of my fitness regime. They are in a Green Belt area which should be preserved. This proposal will change the character of Send forever. Additional traffic caused by the new homes will increase congestion and pollution along Send Marsh Road and at the junctions of Send Marsh Road with Portsmouth Road and Send Barns Lane. 120 homes will put more strain on schools and medical facilities (Ripley School has just been closed). This is a popular area for walkers the landscape and views will be ruined. The extra houses added to those proposed for Garlick's Arch, Clockbarn, and Winds Ridge will result in an increase to the number of homes in Send by 45%. This is unacceptable.

I object to any loss of the Green Belt, there are plenty of Brown Field sites available in Surrey. The whole point of having the Green Belt is to stop unnecessary development, to protect the flora and fauna of the area and to continue to ensure that for generations to come there are green spaces.

I am very concerned that all of the developments which are proposed for Send will have an adverse effect on the traffic and the roads. The proposals for Garlick's Arch, Burnt Common, Alderton's Farm and Clockbarn will inevitably lead to increased noise, air pollution and congestion along Send Barns Lane and Send Road. The proposed A3 changes and changes to the slip road will not be able to mitigate against the overall increase in sheer weight of traffic.
Send appears to have been unfairly targeted for a 45% increase in housing and extra industrial development. If these proposals go through, Send will be transformed from a beautiful, green village to yet another characterless piece of urban sprawl with a diminished quality of life for all its residents. Please don't approve these proposals.

Attached documents:

Comment: MM44 - LPMM18/486  Respondent: Ann Elms 15067585  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road Policy A63

Here again, you are intending to build on Green Belt land, which contradicts policy MM9. Send Crossroads will be under considerable pressure and with Garlicks Arch, Clockbarn and Winds Ridge developments, 770 houses would be added to the 1700 currently in Send, which is an increase of 45%. There is no rationale for this and it would ruin Send and the surrounding Green Belt.

Attached documents:

Comment: MM44 - LPMM18/326  Respondent: Sabine Marke-Deleau 15081281  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July.
- It is a Green Belt site with no special circumstances so it also contradicts Policy MM9.
- It will detract from the heritage buildings at Send Marsh Green.
- The additional traffic will increase pressure on the Send Crossroads.
- With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/120  Respondent: Gary Cable 15081569  Agent:

I was very disappointed to read about the modifications to the local plan following the consultations since the release in 2017. Not only have you not taken into account the thousands of objections we sent you by lessening the proposed sites, you have actually made the plan worse for our villages by increasing the homes and industrial land. I along with many others seriously believe the villages of Send and Ripley will be ruined over the next few years if all these plans go ahead, let alone we will no longer be living in a nice green belt area, the traffic congestion which is not brilliant at the moment will be catastrophic for the region.

Lets start on the traffic congestion, there are currently 1700 homes in Send and the MM41 and MM44 proposing another 670 new homes we are going to have nearly another 50% more cars on the road in the local area. Where are all these cars going during rush hour - Woking to commute (the A247 cannot cope presently during peak times you can queue for 30
minutes plus into Old Woking) - the A3 into London which will clog up Send Marsh Road, plus Ripley and of course the A3-M25 junction more than it is right now.

MM44 - 120 homes at Alderton's Farm - this was previously deleted from the plan because of objections, it is Green Belt again with no special circumstances so therefore contradicting policy MM9.

Comment: MM44 - LPMM18/193  Respondent: Mark Gibbs 15082657  Agent:

Not to mention all the other prospered plan such as MM44 & MM41/MM9/MM42/MM48

This was once a peaceful and picturesque little village that has slowly been eroded and destroyed by greedy and thoughtless developers

I have lived in send for 20 years and it is sickening and sad to see it being over developed

So I strongly object to the plans to specified above

Attached documents:

---

Comment: MM44 - LPMM18/3956  Respondent: Mrs Marilyn Scott 15094369  Agent:

MM44

This is green belt land with no special circumstances so contradicts MM9

The Send Crossroads is a dangerous and busy junction this development will increase traffic at both this junction and at the Portsmouth Rd, Send Marsh Rd junction already referred to.

Attached documents:
Send Marsh Green is an area of high importance because of its heritage buildings. Any modern development will detract from this area of special historic character.

The reinsertion of this development into the plan ignores all previous objections which caused it to be removed from the Local Plan.

**Comment:** MM44 - LPMM18/82  **Respondent:** Simon Crane 15104769  **Agent:**

**MM44 Land at Alderton’s Farm, Policy A63**

- This plan was deleted previously due to the high number of objections and yet has been sneaked back in now.
- As with MM42, it is in the green belt with no special circumstances, so again contradicts MM9.
- Like MM41, it will increase the pressure on schools and medical practices, congest the roads and increase air pollution.
- With the other planned developments in the area it will add 770 houses to the current 1700, an increase of 45%.

**Attached documents:**
Comment: MM44 - LPMM18/3799  Respondent: Y C Smithers 15106977  Agent:

MM44 Land at Alderton’s Farm, Send March Road Policy A63

New site for 120 homes including some self build

Send Marsh is a tiny hamlet, where I was born and grew up and many of my family still live in the area. The proposal will hugely destroy the area and will impact on all the residents many of whom have lived there for years and the road system is too small and is already overburdened. Send Crossroads is already treacherous especially during rush hour and school runs. The area is Green Belt and there is no justification to build houses in this area and contradicts Policy MM9. It is a devastating proposal.

Attached documents:

Comment: MM44 - LPMM18/66  Respondent: Andy Williams 15107041  Agent:

MM44 – Land at Alderton’s Farm, Send Marsh Road, Policy A63

Yet another proposal for an unrealistic number of homes, 120 (including some self-build) on top of what’s being proposed at Garlicks Arch, Clockbarn, Winds Ridge – in total a proposal of 770 houses in addition to the 1700 currently in Send, an increase of 45% which is completely unrealistic and too much for the surrounding infrastructure. This was deleted from an earlier draft of the local plan because of all the objections and not re-inserted until the public examination in July. Again this is a Green Belt site with no special circumstances which contradicts policy MM9.

Attached documents:

Comment: MM44 - LPMM18/348  Respondent: Louise Majithia 15109601  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

New site for 120 Homes including some self build

• This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July.
• It is a Green Belt site with no special circumstances so it also contradicts Policy MM9.
• It will detract from the heritage buildings at Send Marsh Green.
• The additional traffic will increase pressure on the Send Crossroads.
• With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/321  Respondent: Mr Stuart Reeves 15110721  Agent:
This large site has previously met with large scale objections because the development is out of proportion to the ability of the village to support it. The send march area is a historic rural area with no local amenities and small roads. A development of this size will destroy the village by completely overwhelming it. The roads will be impassable, and the schools, health centre and infrastructure will be unable to cope.

**Comment:** MM44 - LPMM18/1802  **Respondent:** Mrs Katherine Mutton 15115201  **Agent:**

I strongly object to the development of this Green Belt land when there is no justification and no special circumstances to justify this proposal. The proposal for 120 homes will make a huge impact on the size of the village and all traffic will have to use the Send Marsh Road one way or another. The traffic implications of this development have not been properly assessed. Ripley School has just been closed and Send School is full so where are these families going to send their children. The Doctors Surgery in Send cannot cope with the numbers already registered.

With the proposed 550 houses at Garlicks Arch, Clockbarn 60, Winds Ridge 40 it adds 770 houses to the 1700 currently in Send. A huge and unjustified increase. Where are the people with the money to buy these houses - property is not selling at the moment because the costs are too high.

**Attached documents:**

**Comment:** MM44 - LPMM18/134  **Respondent:** Roger Mutton 15131425  **Agent:**

MM44 Policy A63 Alderton's Farm I object as this is a Green Belt area and with no special circumstances so contradicts policy MM9. (limited infilling) Where is the limit?

It was deleted from an earlier draft because of the strength of objections and only re-instered at the public examination in July. It is quite against all normal considerations of a democratic process, bringing the planning law into disrepute. The additional traffic at Send Crossroads will increase the pollution on an already busy junction. It will detract from the heritage buildings in Send Marsh Green and increases the proposed number of houses at Garlick's Arch (55) Clockbarn (60) Winds Ridge (40) means a 45% increase to the current 1700 in Send, without including the development on Potters Lane Send Hill junction and whatever is being slipped through opposite the Primary School where a site is now being cleared.

**Attached documents:**

**Comment:** MM44 - LPMM18/163  **Respondent:** Samuel Holwell 15131969  **Agent:**

MM44 Alderton’s Farm. Surprised (more accurately unsurprised as the council’s actions are no longer shocking) to see this was re-added after its prior removal due to objections. Surely no need to reiterate objections so please refer to letters sent in by locals before.

**Attached documents:**
MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

This is a new site for 120 Homes including some self-build. This is a reinstatement despite earlier objections and will again impact on the surrounding area and the road, which is often congested and will bring even more traffic down to the traffic lights at the Send Crossroads. Add this to the Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40) and we have 770 more houses all using this crossing and a 45% increase is not going to be easy to cope with and will cause even further reduction in traffic moving freely during the rush hour and other parts of the day. It is for this reason I object.

Attached documents:

---

I object to this development

Attached documents:

I object to MM44 - this is another Green Belt area and there are no special circumstances to justify the build of some many houses!

Attached documents:

---
MM44 Land at Aldertons Farm, Policy A63

This site was deleted from the earlier draft because of all the objections, but now 120 houses are planned on this site. It is perfectly clear that the G.B.C does not take into account the feelings of Send residents when they learn they are about to be inundated with thousands more people & cars.

Attached documents:

Comment: MM44 - LPMM18/431  Respondent: Dr Christopher Slinn 15153569  Agent:

It is excessive to have both this and Garlicks Arch. One or the other would be more reasonable. Both together, with Clockbarn and Winds Ridge make a 45% increase in the number of homes. This makes a mockery of the Green Belt and turns our village into an urban sprawl with Ripley.

Attached documents:

Comment: MM44 - LPMM18/454  Respondent: Stephen Brunskill 15177313  Agent:

MM44 Land at Alderton’s farm, Sendmarsh Road Policy A63

This proposal was already rejected from earlier drafts because of the huge number of objections. Again this is greenbelt and there are no special circumstances to build here and it contradicts policy MM9. There are existing pinch points on Sendmarsh Road which makes it awkward for cars to pass each other, adding hundreds of cars from this development will put undue pressure on the immediate road network. Also as at Garlics Arch (MM41) this area regularly floods – that’s why it’s called Sendmarsh, this area is “marshy”.

Guildford Borough Council are not representing the residents of Send and are treating us with contempt. This plan puts a massively unfair burden on the village of Send to support the borough wide housing and development need.

Attached documents:

Comment: MM44 - LPMM18/642  Respondent: John Harris 15180001  Agent:

MM44

Why has this been reinserted after being removed earlier due to local objections?

This is green belt with no special circumstances so contradicts policy MM9.

This will only add to the already heavy traffic using Send crossroads.

With the other developments this adds 770 houses to the 1700 currently in Send a 45% increase!!

Attached documents:
Comment: MM44 - LPMM18/2857  Respondent: Paul Bedworth 15180193  Agent:

MM44 Alderton’s Farm, Send Marsh Road, policy A63

1. Why is this back on the plan when it had been deleted from an earlier draft due to all the local objections: this will be a loss of Green Belt land with no special circumstances, in contravention to MM9.
2. The roads are already congested particularly around rush hour.
3. Local infrastructure could not cope and would need further investment.
4. There would be a likely impact on ground water run-off caused by further development with an increased risk of flooding
5. Other brown land sites should be thoroughly investigated and developed before encroaching on Green Belt.

Furthermore, within the context of the proposed wider development in Send Marsh, there seems to be no consideration within the documents of the impact on the village of the overall planning proposals of all the sites, which could see dwelling numbers increase by around 45%+.

Attached documents:

Comment: MM44 - LPMM18/1449  Respondent: Muriel Millar 15184993  Agent:

MM44 Aldertons Farm

- Green belt
- Traffic problems
- Inappropriate location

Attached documents:

Comment: MM44 - LPMM18/1426  Respondent: Carrie Wheeler 15195969  Agent:

MM44 Aldertons Farm

This is Green Belt land! Having been deleted from the local plan, it has now been re-instated, which contradicts the policies in MM9 (Green Belt Policy). As with the other proposals this will also put pressure on local roads and services. It creates an increased risk of traffic accidents, stressful journeys, which also creates a risk of affecting the general health and well-being of the long-suffering local residents.

Where does it all end? If Green belt land is no longer just that, we will eventually have no open space!

Send and Ripley are charming old established villages, the local planners are potentially going to spoil this pretty area, by turning it into a concrete jungle, full of unhealthy residents, squashed and gridlocked, due to the greed and lack of foresight of the developers.

Please, please, listen to our objections, we live here so are more aware of the damage and destruction your proposed plans will cause. Don't have the legacy of causing such mayhem on your conscience!
MM44. Alderton's Farm. Policy A63

This is Green Belt with no exceptional circumstances and the additional traffic it would produce would, again, put too much pressure on already congested roads at peak times.

Comment: MM44 - LPMM18/4232  Respondent: Michael Corlett 15196161  Agent:

MM44

Why has this been reinserted after being removed earlier due to local objections?
This is green belt with no special circumstances so contradicts policy MM9.
This will only add to the already heavy traffic using Send crossroads.

With the other developments this adds 770 houses to the 1700 currently in Send a 45% increase!!

Comment: MM44 - LPMM18/657  Respondent: Louise Harris 15197345  Agent:

MM44 Alderton's farm

This option was deleted in the original plan after local objection, but has been reinstated without justification. There are no special reasons that have identified from the original decision.

Access onto the rat run will only make the route more dangerous around the green where the sight lines are already insufficient for the traffic that uses it at present without adding further traffic.

Together with Garlic’s arch this increases the house density in Send by some 45%.

Much of this development is in an area designated as flood plane. I recall that Council houses built in a flood plane near Guildford were flooded out resulting in huge repair, flood defence and compensation costs. Wasting taxpayers’ money. Stop building on flood planes.

Comment: MM44 - LPMM18/1071  Respondent: Elizabeth Howlett 15205921  Agent:

Comment: MM44 - LPMM18/1072  Respondent: Elizabeth Howlett 15205921  Agent:
MM44 Burnt Common industrial development

There is no case made for additional industrial land. Existing premises on the Portsmouth road remain undeveloped. The existing level of development is being abused with cars parked ion the road over the cycle lanes. The river at the end of the A3 slip road already floods closing the road for extended periods during heavy rainfall. The roundabout at Burnt common is overloaded at peak times. It is clear that industrial developments in Guildford are underdeveloped and if developed would offer jobs for local residents without having to travel out of town. There is no need for more job opportunities in the area.

Attached documents:

Comment: MM44 - LPMM18/4885  Respondent: Christine Relf 15241313  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road, Send  A 'new' site for 120 homes including some Self Build, which site has been reintroduced again because the housing inspector wanted more homes in the early years of the plan

All the above should be viewed in light of the fact that the latest ONS population and household formation statistics published in the last few weeks which admit to errors in previous calculations, which particularly affect Guildford as a University Town. If applied retrospectively to the Local Plan the revised figures would halve the projected housing requirement and allow a drastic reduction in the supposed need for building on sites in the current Greenbelt.

Please dont let our villages and Green Belt disappear.

Attached documents:

Comment: MM44 - LPMM18/4345  Respondent: Peter Relf 15241345  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road, Send  A 'new' site for 120 homes including some Self Build, which site has been reintroduced again because the housing inspector wanted more homes in the early years of the plan

Comment: MM44 - LPMM18/936  Respondent: Michael McGrath 15251105  Agent:

OBJECTIONS TO THE PROPOSED MAIN MODIFICATIONS TO THE LOCAL PLAN OF GUILDFORD BOROUGH COUNCIL

I am writing to register my objections to the Main Modifications in the Guildford Borough Council Local Plan that will be forever harmful for the residents of Send by overloading the infrastructure, environment, services, and amenities, and permanently damage what remains of our surrounding countryside, and open spaces.

OBJECTIONS RELATING TO ALL PROPOSED DEVELOPMENTS (MM27, MM41, MM42,MM44, and MM48) IN THE GUILDFORD BOROUGH COUNCIL LOCAL PLAN
1. The proposed developments, referred to later in this letter, do not consider the risk of future water shortages, where there are no plans or funding to increase the provision of water storage and supply to additional households and commercial facilities proposed for the Send Parish, within the Affinity Water region.

2. All developments in the Guildford Borough Council Local Plan - referred to later in this letter - are within an area designated by the Environment Agency as “water stressed”. Without any additional means of water supply, it would be irresponsible to risk greater water scarcity in the future by adding to the demands for water from additional developments in and around Send.

3. The Main Modifications where specific objections are described below are, when combined, an unacceptable increase of concentrated housing developments to be imposed on the village of Send and the already over-used roads - without any scope for increasing capacity - and the fully subscribed local medical and schooling facilities.

4. **MM44 LAND AT ALDERTON’S FARM, SEND MARSH ROAD, POLICY A63**

I object to the Policy A63 because:

- This additional development will lead to an increased burden of additional vehicle movements putting further congestion at the Send crossroads junction.
- It will devalue the attractiveness and character of Send Marsh.
- It will contradict the Green Belt Policy MM9 as there are no special circumstances to allow an exception to made for this proposed development.

**Attached documents:**

**Comment:** MM44 - LPMM18/2763  **Respondent:** ANTHONY GENT 15262497  **Agent:**

I STRONGLY OBJECT TO THE 120 NEW HOMES ON POLICY 163.I WORRY FOR MY HEALTH BECAUSE OF THE EXTRA TRAFFIC OMISSIONS. I SUFFER WITH A [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]. THIS IS A REAL CONCERN FOR ME.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/1869  **Respondent:** Robert Peake 15264001  **Agent:**

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.
Comment: MM44 - LPMM18/2072  Respondent: Mr Trevor Deacon 15274369  Agent:

Green Belt land without special circumstance as MM9 and should not be included

Send Marsh Road is already regularly blocked with traffic trying to access Portsmouth Road and the Send Road traffic lights often blocked in both directions due to the inability to turn into Send Marsh Road. Adding 200 plus cars will only worsen the situation.

The addition of this site together with the Garlic Arch site coupled with the existing dwellings will create a village mass without services or infrastructure.

Comment: MM44 - LPMM18/2093  Respondent: Mrs Dalis Deacon 15277281  Agent:

Green Belt and should not be built on

Existing infrastructure cannot cope now

Comment: MM44 - LPMM18/4263  Respondent: Ripley Parish Council (Jim Morris) 15278369  Agent:

RIPLEY PARISH COUNCIL RESPONSE TO GUILDFORD BOROUGH COUNCIL SUBMISSION LOCAL PLAN: STRATEGY & SITES - MAIN MODIFICATIONS

Ripley Parish Council continues to have major reservations regarding many aspects of the Guildford Borough Council (GBC) Local Plan, all of which have been previously submitted and still stand.

However, the council wishes to make further objections and contributions to the proposed main modifications namely:

1. Site Allocations:
   a) A43 Garlick’s Arch - increase of 150 homes to 550 homes
   b) A63 Aldertons Farm – new allocation of 120 homes
   c) A58 Burnt Common Strategic Employment Site – initial 100% increase of industrial space to over 14,000 sqm with the potential to increase in each 3-year period thereafter

2. Transport Strategy

3. A6 Town Centre – allocation of further retail space
4. Strategic Housing Market Assessment figures

5. A35 Former Wisley Airfield

1. Site Allocations

The allocations of sites: A43 Garlick’s Arch; A63 Aldertons Farm; and A58 Burnt Common Strategic Employment Site will have severe “in-combination” impacts upon the villages of Ripley, Send and Send Marsh. There is no escaping the fact that there is inadequate provision for any road traffic mitigation arising from an estimated 670-720 new homes, together with the inevitable large volume of traffic generated by the industrial site over the period of the Plan and beyond. To get this in proportion, the current number of houses in Ripley village is less than 700.

There does not seem to be any firm commitment to the construction of policy site A43a the A3 Burnt Common slip roads during the period of the Plan. Indeed, the financing of these slip roads appears to be in some disarray and relies upon 100% funding from the developers of site A35 Former Wisley Airfield. Ripley Parish Council continues to oppose the Burnt Common slip roads for reasons stated in earlier submissions. However, should the Garlick’s Arch development, the Burnt Common Strategic Employment Site and/or the Aldertons Farm development site all proceed to inclusion in the Local Plan, the parish council would strongly urge that traffic mitigation measures are put in place PRIOR to housing and industrial sites being constructed. Clearly provision of the new slip roads would go some way to easing local traffic congestion although it may of course be detrimental in that it will draw in additional road traffic to the Send/Burnt Common area.

Ripley Parish Council objects to the modifications of the Garlick’s Arch and Aldertons Farm sites based on the very poor provision of community infrastructure such as medical facilities, schools and community sports facilities. Ripley Primary School has recently been closed by Surrey County Council with no indication as to its future. The Villages Medical Centre is already heavily subscribed and it offers poor lead times for appointments. There is no the specific provision for such facilities within the documentation. Additionally, the car parking facilities in both Ripley and Send are at capacity and these increased numbers will only worsen an already bad situation.
