**Comment:** MM44 - LPMM18/4521  **Respondent:** Hannah Green 15303457  **Agent:**

1. **MM44 (Land at Alderton’s Farm, Send Marsh Road Policy A 63):**

This is green belt land with no special circumstances so it contradicts MM9 and is illegal. Also the additional traffic will increase pressure on Send Crossroads. Living at these cross roads, I can testify to the fact that it is very difficult to get out of our drive at rush hour as traffic is tailed back to the A3. Once again, air pollution affects our garden and environs.

**Attached documents:**

**Comment:** MM44 - LPMM18/1261  **Respondent:** Eloise Haxton 15313697  **Agent:**

**MM44 Land at Alderton’s Farm, Policy A63**

My objections are;
• This is Green Belt land with heritage centres at Send Marsh Green which will be affected, also an increase in traffic will block the roads and Send crossroads
• These proposed developments at Garlicks Arch, Clockbarn and Winds Ridge would increase the number of houses by 45% with already insufficient infrastructure and facilities for the current 1700 homes in Send.

Attached documents:

Comment: MM44 - LPMM18/1627  Respondent: Steven Brown 15320737  Agent: MM44 Alderton’s Farm

This proposed development is on green belt land and there are no special circumstances to justify it. This development would be close to Send Marsh green with beautiful heritage buildings and would spoil the character of the area. We chose to live in Send because of the amount of open green space. The local infrastructure cannot accommodate the cumulative effect of these developments.

Attached documents:

Comment: MM44 - LPMM18/1728  Respondent: J D W Todd 15326369  Agent: MM44 First inserted then deleted then reinserted! With other housing developments in the adjacent area (+45%) this is excessive. What of the strain on sewage, water supply, broadband speed (already about 1/3 of the nationally accepted minimum) and other essential services? A totally inadequate bus service to Woking and Guildford and with parking at these stations already at capacity will throw even more traffic onto the road network. Traffic at Mays corner, Send Dip Pollesden Lane and Newark Lane will be even more congested at peak times. (A recent traffic survey was made in August when there is no school traffic and half of Surrey are on holiday and so was totally invalid)

Attached documents:

Comment: MM44 - LPMM18/2021  Respondent: R.A. Love 15328865  Agent: I OBJECT to MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63 New site for 120 Homes including some self build

• This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
• It is a Green Belt site with no special circumstances so it also contradicts policy MM9
• It will detract from the heritage buildings at Send Marsh Green
• The additional traffic will increase pressure on the Send Crossroads
• With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:
Comment: MM44 - LPMM18/1644  Respondent: Suzie Powell-Cullingford 15329441  Agent:

I wish to object in the strongest terms to the following main modifications to the Local Plan:

1. The increase at Garlicks Arch to 550 homes This site is protected by ancient woodland
2. The addition of the Aldertons Farm site of 120 homes
3. The increase in size of the Burnt Common Industrial site

Attached documents:

Comment: MM44 - LPMM18/4210  Respondent: Gillian Thorpe 15341441  Agent:

We wish to object to 120 new homes proposed on the Alderton's Farm land between Send Marsh and Send.

Send cannot accommodate more traffic. During rush hours it is totally gridlocked, especially at the Send traffic lights. GBC are proposing 550 new homes at Garlicks Arch (MM41- Policy A43), 120 new homes at Alderton's Farm as well as houses at Clockbarn, Send Hill and traveller sites. The schools, medical centre and local roads will not be able to cope with the multiple developments. The roads will be totally gridlocked, and any small lanes will be used as alternative routes. An increase of 45% is excessive. Our infrastructure cannot cope now.

Attached documents:

Comment: MM44 - LPMM18/251  Respondent: Mr John Peed 15350689  Agent:

Why has this proposal been re-inserted despite all previous objections?

What special circumstances are mitigated within this proposal justifying this development?

This development will almost certainly detract from the heritage buildings at Send Marsh Green

Additional traffic will increase pressure on Send Crossroads.

An additional 770 houses to the currently 1700 in Send will overwhelm the infrastructure.

Attached documents:

Comment: MM44 - LPMM18/3885  Respondent: Ron Best 15358625  Agent:

MM44 Alderton's Farm (Policy A63): This will sacrifice greenbelt land which currently constitutes an important 'breathing area' between Send Marsh Green and May's Corner. My wife and I walk this route almost daily, but already suffer the consequences of heavy traffic noise and exhaust fumes. Together with the Garlicks Arch and London Road developments, our roads will be swamped with traffic - May's Corner is already a bottleneck at certain times of the day - and the addition to the traffic on Send Road will add to the daily blockages across Broadmead and into Old Woking. This proposal is antisocial and unhealthy.
I beg you to reconsider.

Attached documents:

Comment: MM44 - LPMM18/2473  Respondent: Alison Gee 15370593  Agent:

MM44 The new Green Belt site at **Send** is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/2312  Respondent: C R Woodland 15373153  Agent:

I object to MM44, the use of land at Alderton's Farm, Send Marsh Road Policy A63. This is a green field site with no "exceptional circumstances". Once again roads and a number of schools are at capacity already. With regard to roads traffic levels and pollution are already unacceptable and the additional housing in MM44 will only bring further cars to the already overcrowded local roads.

I continue to support in principle the idea of a new junction with access to and from the A3 in both directions somewhere between Burpham and Burnt Common, however the A3 changes and Clandon slip roads do not adequately address the likely future traffic levels, particularly with regard to right turn movements (A3 Southbound to Burnt Common and Clandon to A3 northbound). The correct place for a completely new junction is near to site A25 Gosden Hill Farm, using both sides of the London Road dual carriageway to access the new junction from Burnt Common roundabout.

Attached documents:

Comment: MM44 - LPMM18/5585  Respondent: Tim Poyntz 15381089  Agent:

MM44 The new Green Belt site at **Send** is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/3897  Respondent: Oliver Stewart 15389697  Agent:

MM44 The new Green Belt site at **Send** is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/5313  Respondent: Roderick Hutchison 15390273  Agent:
2) MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

I previously objected to this development and was relieved to see it deleted from the previous version of the Plan, but now re-instated. The local infrastructure is already saturated and this will add significantly to the loading on roads, schools and the medical practice. It is already very difficult to get appointments with named doctors at the medical practice and adding more homes will make this even worse. The roads around Send Marsh are already very congested at rush hours and this development will make matters worse.

Concerning both of the above proposals, the Office of National Statistics has recently downgraded its estimates of population growth, and this needs to be factored into GBC’s plan…..the basis of the plan seems to be on an over-inflated view of future requirements.

Attached documents:

Comment: MM44 - LPMM18/4062  Respondent: Marian Tarrant 15391329  Agent:

I object to MM44 (Policy A63, Alderton’s Farm, Send Marsh Road).

Because the proposal for 120 houses was previously deleted from the earlier draft plan due to the objections levelled. The reintroduction of this, is equivalent of having a second referendum on leaving the EU. The people spoke, respect their wishes!

Because this is Green Belt Land with no special circumstances for development. Which contradicts MM9!

Because of the additional traffic this will create. There are circa 1,700 houses in Send. The proposed developments at Garlick’s Arch 550, Clockbarn 60, Winds Ridge 40, Plus Alderton’s Farm 120. Adds 770 new homes. An increase of 45%. This is excessive for our roads and indeed the infrastructure of our Village.

Attached documents:

Comment: MM44 - LPMM18/4533  Respondent: Kirsten Collins 15398593  Agent:

MM44: I object because this site was originally deleted from the plan- it involves yet more houses. The local residents have given GBC a clear message that we are highly concerned about the impact on the local community. I have seen no evidence of thought about how local infrastructure will develop to solve the problems the more housing will introduce.

Attached documents:

Comment: MM44 - LPMM18/2339  Respondent: Guy Whatley 15406593  Agent:

Objection to MM44 Land at Alderton’s Farm A63

I object to the destruction of all and any planned development on the Green Belt surrounding Send village or in the Borough as a whole. I think Guildford has a responsibility to keep green spaces for generations to come. This sort of development opens the flood gates for all Green Belt Land to be developed and will ruin our countryside Borough.
I object to M44 Land at Alderton’s Farm, Send Marsh Road Policy A63. This was deleted from an earlier draft due to the number of objections and then re-inserted at the public examination in July 2018. It is Green Belt with no "special circumstances" so it also contradicts policy MM9. Any development in this area, let alone 120 new houses, will conflict with the heritage buildings at Send Marsh Green. Increased traffic will exacerbate the traffic problem at the Send Crossroads with the Send Road/Send Barns Lane which carries the traffic from Woking to the A3 and M25.

I object to MM44 (Land at Alderton’s Farm, Send Marsh Road Policy A 63):

- It is a Green Belt site with no special circumstances so it contradicts MM9
- The additional traffic will increase pressure on Send Crossroads. Living at these cross roads, I can testify to the fact that it is very difficult to get out of our drive at rush hour as traffic is tailed back to the A3. Once again, air pollution affects our garden and environs

I object to this addition of 120 houses to the plan because:

The increase in traffic will create gridlock on our roads

This site is a Green Belt site with no special circumstances

Existing local services such as the medical centre and schools will not be able to cope with all the additional people. This site and the others proposed for Send/Send Marsh amounts to 770 new homes being added to the current 1700 resulting in an increase of 45% - this is too much for our infrastructure to cope with. Consultancy firm, Barton Willmore, have said that the correct figure for Guildford’s housing need should be 431 per year, and the September data from the Office of National Statistics suggests that appropriate growth in Guildford Borough may be achieved with 460 houses a year - this is vastly different to the 789 per year figure being used by the Inspector at the Public Examination and therefore the proposals for Send should be reduced to reflect this

I understand the need for more housing and agree there should be some development, but surely it is better to spread the housing need fairly throughout the borough with smaller developments rather than ruin our village by creating traffic chaos and misery, pollution and destruction of the green spaces in and around Send. The current proposals for Send and Send Marsh are inappropriate, highly damaging for the community and the area, and an unnecessary erosion of the Green Belt.
14. I object to the addition of Alderton's Farm A63 to the plan with a further 120 homes which equates to 69% of the total increase in the borough from 12426 in 2017 to 12600 in 2018 and is totally excessive and unacceptable.

15. I object to the increase and inclusion of 120 homes at site allocation A63 Alderton's Farm as it is Green Belt and is contrary to the Green Belt limited infilling policy being totally inappropriate to the scale of the locality and would have an adverse impact on the character of the countryside and the local environment. Ref. Policy P2 under clause 4.3.26 on page 54. There are no special circumstances to justify this.

16. The increase and inclusion of 120 homes will add further to the number of cars in the area increasing traffic congestion and making existing parking problems in both Send and Ripley even worse.

17. I object to this increase and inclusion of 120 homes as the extra cars will add further to the potential harm from pollution and accident risk to pupils at Send Primary School and parents and staff, and also patients and staff at the Medical Centre as well as residents and businesses.

18. I object to this increase and inclusion of 120 homes as it will put even more pressure on local infrastructure including the school and Medical Centre.

19. I object to the addition of 120 homes which will further increase the residential link between Send, Send Marsh, and Ripley, the over development involved moving the locality closer to ribbon development and further harming the countryside and local environment.

I protest most strongly.

Medical facilities, roads cannot cope, noise, dirt, dust, bus service cannot cope. Area being ruined.

Green Belt has already been violated and the Council expect further capitulation from nearby residents. Overall they are planning a 45% increase to houses in Send and expect us to consider this a reasonable request. I wonder how many of them live in Send.
I object to yet more development on Green Belt land which will add even more traffic to adjacent roads which are already congested. The infrastructure cannot support so much development in a village location. Why is so much development being concentrated in such a small geographical area?

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

MM44 Land at Alderton's Farm: I object to this as it will increase the traffic locally, which is already far too high; also because it is Green Belt, and because the development will detract from the buildings around Send Marsh Green.

My previous objection related in particular to the loss of Green Belt land. I now notice that you have ignored this and increased the sites intended for build

- I object most strongly to the removal of green belt in this area
- The additional traffic resulting from this development will seriously impact the village especially at Send Crossroads. This additional development is too much for our village and will seriously harm our infrastructure.
MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

New site for 120 Homes including some self build

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July.
- It is a Green Belt site with no special circumstances so it also contradicts Policy MM9.
- It will detract from the heritage buildings at Send Marsh Green.
- The additional traffic will increase pressure on the Send Crossroads.
- With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40) it adds 770 houses to the 1,700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/5797  Respondent: Donna Collinson 15460737  Agent:

MM44 Can adding a new Green Belt site at Send be justified in view of revised figures?

Attached documents:

Comment: MM44 - LPMM18/4138  Respondent: Pauline East 15468705  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63.

New site for 120 homes.

Although deleted from an earlier draft because of objections it is has been reinstated! It is a Green Belt site with no special circumstances so it does contradict Green Belt Policy MM9.

Additional traffic will just add to the overall traffic problems that Send will have with these large developments.

When you combine this with Garlicks Arch it adds 770 homes to Send that is a 45% increase in houses and is far to much for our infrastructure, furthermore, Im told that according to Consultants and the Office for National Statistics appropriate growth in the Guildford Borough as a whole can be achieved with 460 houses per year.

Why are GBC not looking at Brownfield sites which I understand could meet the requirements.

Attached documents:

Comment: MM44 - LPMM18/4176  Respondent: Zoe Kollov 15468833  Agent:

object to MM44, Policy A63 Land at Alderton's farm, Send Marsh road because;
- With Garlicks Arch (550), Clockbarn (60), Wind ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%, this is far too much for the area to cope with as its infrastructure is already creaking, the roads jammed and the trains full.

- This is greenbelt land and as such there are no special circumstances to change its designation, contradicting MM9

- The additional traffic will heap pressure on Send cross roads

**Attached documents:**

---

**Comment: MM44 - LPMM18/227  Respondent: Nicholas Brown 15468993  Agent:**

**MM44 Policy A63**

Why is this proposal even being considered? Removed from an earlier draft due to overwhelming objections we are now being faced with it being re-inserted. It seems somewhat under-handed to re-insert the proposal at the public examination in July.

It would forever change the whole character of the rural link between Send and Send Marsh making it into one long conurbation. 120 houses at Alderton's Farm is on Green Belt land and clearly contradicts policy MM9.

Traffic queues from the Send traffic lights are often very long and the associated increase in the number of cars from such a large development will exacerbate the problem. The road has a pinch point over a culvert were there have already been a number of road traffic accidents. The road here is already too narrow and prone to flooding. Any further development (this will form a considerable proportion of the 45% proposed increase in housing in and around Send) will overload the village infrastructure and detract from the heritage buildings on Send Marsh Green.

**Attached documents:**

---

**Comment: MM44 - LPMM18/1004  Respondent: Lorraine Ozanne 15472833  Agent:**

**Objection to MM41, MM42, MM44, MM9 and associated Transport strategies**

I'm writing to formally object to the above Main Modifications on the following grounds:

- The excessive number of houses proposed
- Over development of Send and Ripley
- Excessive new industrial allocation of land
- Additional traffic causing major congestion of local roads and resultant safety concerns for pedestrians
- Green Belt land should be protected

**Attached documents:**

---

**Comment: MM44 - LPMM18/290  Respondent: M.M.L Prosser 15477089  Agent:**
What an extraordinary amount of building planned for Send Village; it would certainly stop being a village and turn into a town. However it would still only have one road going through which means traffic would be [unreadable text], and non-stop.

If you could build a flyover to Woking - great! [unreadable text] those extra people [unreadable text] doctor's surgery and one chemist and no extra school isn't feasible.

I do think a permanent gipsy site would be preferable to them parking, [unreadable text] ever they like and [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

Please have a rethink

Comment: MM44 - LPMM18/1564  Respondent: Jill Murphy 15502433  Agent:

MM44 Land at Aldertons Farm, Send Road, Policy A63.

New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY.

With Garlicas Arch 550, Clockbarn 60 ,Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%

How are our roads,sewage,water,healthcare,schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment.

Agin this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

Attached documents:

Comment: MM44 - LPMM18/4185  Respondent: Richard Golding 15509057  Agent:

MM44 LAND AT ALDERTON’S FARM, Send Marsh Rd POLICY A63

I OBJECT TO THE POLICY MM44 Land at Alderton’s Farm, Send Marsh Rd because:

this site is outside the boundary of Send Marsh it has already appeared in an earlier draft and been deleted due to reasonable objections to the development. The site is again green belt and the development would have a major negative detraction on the heritage buildings around the Send Marsh Green. It would also set a precedent, when any Developer could come along and make an application to undertake development within the green belt. With the other proposals that have been put forward for development there would increase the development in Send of 45%. Surly if the council use the Office of National statistic figures and spread the development around the borough a large amount of this green belt could be saved?
Comment: MM44 - LPMM18/4445  Respondent: Hazel Thompson 15571745  Agent:

MM44, Aldertons Farm, Policy A63

I am astounded that this site has been included as a modification to the plan, having previously been deleted following strong objections. It is a greenbelt site with no special circumstances, again contradicting MM9. The size of this development is completely out of the nature of the surrounding areas and will detract from it. The proposed location is ridiculous. It would add traffic joining the already busy Sendmarsh Road and additional pressure on Send Crossroads. The housing quantity and density on this site concerns me greatly. Each home is likely to have at least 2 cars, given the local public transport links and the (currently) rural location. These additional cars cannot be sustained on the roads nearby. Development of this site is completely unjustified, especially in addition to all the other planned development.

Attached documents:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/3327  Respondent: Ann Murray 15574497  Agent:

I object to Proposal MM44

Previous objections to this proposal meant that it was deleted from the plan, only to be re-inserted after the public examination in July. Again this is part of the Green Belt with no special circumstances and contradicts policy MM9. Traffic from 120 homes will increase the pressure in the village. With developments at Garlicks Arch, Clockbarn and Winds Ridge 770 houses will be added to the current 1700 in the village - an increase of 45%. The infrastructure cannot cope with this.

Attached documents:

Comment: MM44 - LPMM18/932  Respondent: Mr Peter Killingley 15575617  Agent:

Why is this suggestion back again?? It was previously removed, as it had become obvious that this was not a good idea. In addition to other suggested locations, it increases the number of houses in Send by almost half - how on earth would any village already struggling to cope with traffic, school places etc be able to cope with such increases? The traffic lights in the centre of Send are gridlocked already at key times of day - this would only increase that, or increase the volume of traffic on very narrow roads in the vicinity.

| I object to MM44 - **Land at Alderton's Farm, Send Marsh Road, Policy A63**  
I cannot understand why his proposed development was deleted from an earlier draft as a result of all of the objections and only re-inseted in July. this is a Green Belt site with no special circumstances and, once again, contradicts MM9. The increased traffic on Send crossroads will be considerable and, when considered alongside the other proposals, result in a 45% increase in housing in the village. This is clearly unfair, unacceptable and asking the impossible of our infrastructure. No one is disputing the need to build in order to provide homes for people, but the scale of these proposals will destroy the village of Send and merely contribute to the urban sprawl. It seems that Guildford Borough Council has its sights set on this destruction. Is it purely cynical to wonder why so much of the county's building plans concentrate on two small villages, Send and Ripley, both held by members of minority groups on the Conservative led council? | Attached documents: |

Comment: MM44 - LPMM18/4654  Respondent: Jackie van Heesewijk 15640897    Agent:

MM44, Land at Alderton's Farm, Send Marsh Road, Policy A63

A new site for 120 new homes including some self build. So many new homes proposed for such a small area constitutes extreme over development within this village/parish. Again, this is a Green Belt site with no special circumstances, so it contradicts policy MM9. The additional traffic that this development will create will increase traffic chaos at the Send traffic lights at Mays Corner as well as all surrounding roads. Any development in this area could detract from the heritage buildings at Send Marsh Green which are so beautiful and an important part of the character and history of this area.

With the proposals of increased housing at Garlick's Arch (550), Clockbarn (60) and Winds Ridge this adds 770 houses to the 1700 currently proposed for Send, an increase of 45%. This is undoubtably too much of an increase for our already weak infrastructure to contain. Again, the objections that were previously voiced have been disregarded.

Attached documents:

Comment: MM44 - LPMM18/3379  Respondent: Frances Turner 15657057    Agent:

POLICY A63: LAND WEST OF ALDERTON’S FARM, SEND MARSH ROAD, SEND. MM44

I object to this new site for 120 homes within the green belt. Removing so much green belt land from around Send Marsh is incompatible with the Government’s definition of “sustainable development”. There are no “exceptional circumstances” as required by NPPF paragraphs 79-92 to justify allocating Green Belt land for development. There is no adequate assessment of the effect of the additional traffic which would be generated by this development, and the local roads are narrow and inadequate to support the additional traffic which would result.

Comment: MM44 - LPMM18/3477  Respondent: Colin Sweby 17159393    Agent:

MM44; Aldertons Farm, Policy A63

This site has been re-inserted into the local plan with no justification.

The site lies within the green belt, thus development contradicts MM9

The infrastructure and local services are not sufficient to accommodate the effects of development. Refer to notes about traffic congestion, capacity of medical and educational other facilities presented under MM41; Garlicks Arch.

It is evident that controlled structured development can bring benefits to rural areas. However, the current proposals for MM41, MM42 and MM44, if implemented as proposed will have the cumulative effect of reducing the Send/Ripley area to an urbanized extension of Guildford & Woking with any of the infrastructure to sustain it.

Attached documents:
This site was removed from the local plan because of the large number of objections and for some reason has appeared again. With the Garlicks Arch proposal and the other proposal the infrastructure of send cannot possibly cope with this enormous number of additional house and all the traffic that entails. I object to this as i have the others in the strongest possible terms.

Attached documents:

MM44 Land at Alderton’s Farm, Send Marsh Road

Send is a village and should remain one. Another Green Belt site with no special circumstances therefore contradicting policy MM9. The additional traffic will increase the pressure on local roads and it will detract from the heritage buildings at Send Marsh Green.

Attached documents:

MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63

I strongly object the the building of 120 homes on this site. This is Green Belt land. Send Marsh is a unique area, with heritage buildings around Send Marsh Green. There have already been too many houses built in Send Marsh, with people cashing in on selling off part of their gardens. It will cease to be a small village, with a close community and become part of a big urban sprawl. Ripley School closed this year and there is only Send School in the area. This will be unable to cope with the increased number of children. The medical centre in Send Barns Lane is already under extreme pressure. They will not be able to cope with an increase in population. At peak times the roads in the area are heavily congested, making it difficult for people to get to work on time. A significant increase in the number of cars will impact on this.

I hope my objections will be taken into consideration. Generally the increase of 770 houses is far too great for the infrastructure.

Attached documents:
MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63: I object to the new site for 120 homes.

-this, together with the additions at Garlicks Arch(550), Clockbarn(60), Winds Ridge(40) makes a 45% increase those in Send, which the infrastructure cannot bear, and is disproportionate.

-it is a Green Belt site with no special circumstances, so contradicts Policy MM9.

Attached documents:

Comment: MM44 - LPMM18/1043  Respondent: Ian William Groden 17206177  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

- Deleted from an earlier draft (there were objections to the site) this has been re-inserted at the public examination in July and will mean additional traffic at Send Crossroads and add to the traffic on local roads.
- With Garlick’s Arch (550), Clockbarn (60), Wind’s Rush (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. Is this fair compared to other communities in the Borough?

Attached documents:

Comment: MM44 - LPMM18/4585  Respondent: Jenna Crombie 17206209  Agent:

MM44 Land west of Alderton’s Farm (Send) intended development now for 120 homes.

As a resident on Send Road (A247) I am, unfortunately, aware of the high levels of congestion already experienced through the village and have concerns regarding the resulting noise and air pollution. This pollution is exacerbated by the increase in HGV traffic through the village. All of the above will only worsen if the plans set out within the Local Plan go ahead, with some of the mitigating actions e.g. increasing the numbers of buses through the village appearing naively optimistic and wholly inadequate.

The plan continues to disproportionately affect Send and its surrounding areas, impacts negatively on protected green belt land, and will put unacceptable pressure on the existing infrastructure with intended mitigating activity inadequate.

I hope that these comments will be taken in to account alongside the numerous other objections and that further modifications can be made to the plan to ensure development requirements are spread evenly across the borough – sharing both the opportunities and the burdens of the plan across all residents within the borough.

Attached documents:

Comment: MM44 - LPMM18/2647  Respondent: Mrs S. Almeida 17246593  Agent:

MM44 Land at Aldertons Farm, Send Marsh Road, Policy A63

I object to the above as this will once again bring more unwanted traffic to Send at Sendmarsh Road which will become a main road towards Portsmouth Road altogether. With 550 more houses at Garlicks Arch this is madness.
1. Other brown land sites should be thoroughly investigated and developed before encroaching on Green Belt.
2. Local infrastructure could not cope and would need further investment.
3. Why is this back on the plan when it had been deleted from an earlier draft due to all the local objections: this will be a loss of Green Belt land with no special circumstances, in contravention to MM9.
4. The roads are already congested particularly around rush hour.
5. There would be a likely impact on ground water run-off caused by further development with an increased risk of flooding.

Amendments:

MM44 Alderton’s Farm, Send Marsh Road, policy A63

- Land at Aldertons Farm, Send Marsh Road. Policy A63.

This area for a proposed 120 homes was deleted from the 2014 plan and has since been increased twice, doubling the acreage involved. It was put back in until the public examination in July despite all the objections against and no evidence being produced in favour. Clearly another instance of ‘punishment’, which is not what the exercise is about.

If allowed, this development will severely detract from the heritage appeal of the beautiful Send Marsh Green which it adjoins and which has lited buildings on all three sides. It will also detract from the attractiveness of the listed Aldertons
Farm and its neighbouring Old Hall and constitute a raised eyesore and drainage problems to the properties on the north side of Send Marsh Road opposite this site.

The considerable resulting traffic will create serious problems at Mays Corner at the Send end of Send Marsh Road and will be a serious source of damage to the two 16th century timber-framed cottages between which Send Marsh Road makes a 90 degree bend. Traffic already sometimes backs up to Send Marsh Green on its way to the old Portsmouth Road and 120 extra homes will also make that problem very much worse. There have been a number of accidents already where the narrow road makes its 90 degree bend.

Together with Garlicks Arch (550), Clockbarn (90) and Winds Ridge (40), this site will result in 770 houses being added to the existing 1700 in Send. This is far too much for the infrastructure and will adversely affect the nature of this pleasant village to the detriment of the existing residents and visitors and passers through.

This is another Green Belt site with again no evidence of special circumstances, so it is contrary to MM9 and should be deleted.

This site and its surrounds are hugely popular with walkers and cyclists which the Plan aims to encourage, but extensive development such as is proposed here will greatly discourage them.

**Objections to changes to the Guildford Local Plan**

I am writing regarding the recent changes to the Guildford Local Plan and the devastating effect the changes will have on the village of Send. I would like you to consider my objections and those of many others who are extremely upset at the way Send, in particular, is being treated.

**MM44 Land at Aldertons Farm, Send Marsh Road, Policy No. A63**
The proposal to build 120 homes on this Green Belt land with no special circumstances I believe contradicts Policy MM9.

The pressure of the additional traffic at Send Crossroads and through the village of Send and Send Marsh will be intolerable.

This item was removed from the local plan because of the numerous objections but then re-inserted in the July version for public examination with no satisfactory reason for the change.

The building of so many houses will detract from the beauty of the heritage buildings surrounding Send Marsh Green and totally spoil this idyllic area.

Attached documents:

Comment: MM44 - LPMM18/3971  Respondent: Andrew Hollis 17329025  Agent:

MM44 Land at Aldertons Farm, Send Marsh

This area was taken out of the local plan and not re-instated until the July consultation. WHY?? 120 homes is too intensive for the village and will spoil the pretty and heritage buildings surrounding Send Marsh Green. Again too much traffic for the narrow country roads.

Attached documents:

Comment: MM44 - LPMM18/4986  Respondent: Zurich Assurance Limited 17343361  Agent: Barton Willmore LLP (Gary Stevens)

E. MM39, MM43, MM44 AND MM45: SITE ALLOCATIONS

28. As outlined under CTI’s response to MM2, the inclusion of these additional greenfield sites within the Green Belt, ahead of unsustainable and poor-quality existing employment sites is an unsound approach that does not conform to the tests of soundness set out in paragraph 182 of the NPPF (2012).

29. CTI therefore consider that the Council should re-evaluate its approach to the allocation of these four additional sites.

Attached documents:

Comment: MM44 - LPMM18/3474  Respondent: Freya Risdon 17344865  Agent:

MM44 Land at Alderton's Farm: I object to this as it will increase the traffic locally, which is already far too high; also because it is Green Belt, and because the development will detract from the buildings around Send Marsh Green.

Attached documents:
Comment: MM44 - LPMM18/4461  Respondent: Nicola Banham 17380161  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

- This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July

- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure at the Send Crossroads and the already congested junction of Send Marsh Road and Portsmouth Road
- With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure to handle.

Attached documents:

Comment: MM44 - LPMM18/5707  Respondent: Madeleine Stevens 17381601  Agent:

I object to MM44 – Land at Alderton’s Farm, Send Marsh Road - Policy A63 – the new site for 120 homes. I object to this chiefly on the grounds that it is greenbelt land with no special circumstances and it contradicts policy MM9. Most people live here because it is greenbelt land and we love the fact. However, more practically, it will probably mean another 240 cars on the roads around the village adding to the existing congestion in the mornings and evenings.

Comment: MM44 - LPMM18/5817  Respondent: Stuart Adair 17400641  Agent:

MM44 Land at Alderton's Farm, Send Marsh Road Policy A63

New site for 120 Homes including some self-build

- This was deleted from an earlier draft because of all the objections, but re-inserted in the public examination in July, why when this objected and is objected again
- It is a Green Belt site with no special circumstances, so it also contradicts policy MM9
- It will detract from the heritage buildings at Send Marsh Green
- The additional traffic will increase pressure on the Send Crossroads which is currently in very bad condition with potholes and poor road surface.
- With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Attached documents:

Comment: MM44 - LPMM18/4145  Respondent: Jill Thomas 17408225  Agent:
MM44 Land at Alderton Farm

I understand this was deleted from an earlier draft due to all the objections but has now been re-inserted. The objections remain the same ie it is Green Belt and there are no special circumstances so it also contradicts policy MM9; it will detract from the 'Village Green' and ancient buildings around the Green; the identity of Send Marsh as a separate village from Send will be lost with the infilling of houses; the local roads will be unable to cope with the increase in traffic particularly at the already dangerous hairpin cross roads at the Green. This development together with others in the area will add 770 houses to the 1700 houses currently in Send, an increase of 45%. The local infrastructure will be unable to cope with such a large increase.

Attached documents:

Comment: MM44 - LPMM18/4410  Respondent: Sally Novell 17413025  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/3127  Respondent: Katherine Pound 17413729  Agent:

I OBJECT TO MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

Most of the same considerations relating to MM41 also apply to this proposal, namely:

I do not think the local infrastructure is well placed to accommodate such a number of new houses in terms of the resulting increase in traffic, the increased pressure put on schools and the doctors’ surgery particularly when other developments proposed for Send are taken into account. The traffic through Send is already jammed at rush hour, before any of these developments are considered and the environmental aspect and pollution of significant increases in volumes of queuing traffic puts everyone's health at risk. Nitrogen dioxide levels are already high in the area.

I am unconvinced that there is a requirement for new houses being built on this scale – with the uncertainty of Brexit in particular and the reduced numbers already being seen of people wanting to come this country, I don’t think now is the right time to commit to the ongoing building on this scale.

There is no case for plundering the Green Belt, which people of a previous generation, with seemingly more foresight than we have today, created specifically to prevent such ever expanding urban sprawl.

The proposed development will also damage the special character of the Green at Send Marsh, which is a key part of village life, eg the annual Send Marsh Bonfire. Additionally this proposal has already been objected to and removed from an earlier draft local plan so it is underhand to re-add it into this consultation.

I OBJECT because there are no special circumstances to build on this Green Belt site which contradicts MM9.

Attached documents:

Comment: MM44 - LPMM18/5081  Respondent: Paul Good 17417217  Agent:
MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

New site for 120 Homes including some self build

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July

It is a Green Belt site with no special circumstances so it also contradicts policy MM9

It will detract from the heritage buildings at Send Marsh Green

The additional traffic will increase pressure on the Send Crossroads.

With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure. It will change the character of the villages of Send, Send Marsh and Ripley irrevocably.

Attached documents:

Comment: MM44 - LPMM18/4248  Respondent: Valerie Golding 17422881  Agent:

MM44 LAND AT ALDERTON’S FARM, Send Marsh Rd POLICY A63

I OBJECT TO THE POLICY MM44 Land at Alderton’s Farm, Send Marsh Rd because: This proposed development would reduce the open space between Send Marsh and Send, it is outside the boundary of Send Marsh so it would be an invitation for developers to use it as a precedent for any land they wish to build on. The development would overpower the heritage buildings that are located around the green and would increase the pressure on Send cross road which are creaking at the moment.

Attached documents:

Comment: MM44 - LPMM18/2530  Respondent: Simon Wright 17423681  Agent:

Policy A63 Land at Aldertons Farm, Send Marsh Road (Modification MM44)

I object to modifications MM44 Land at Aldertons due to the following points:

This site is in the Green Belt, there are no exceptional circumstances to justify development here so it contradicts Policy MM9.

This site is located close to listed historic buildings at Send Marsh Green and any development here would be too modern, and without a doubt designed so badly that it would ruin the rural character of the whole area. I cannot think of a modern development that doesn’t stand out like a sore thumb and looks totally out of place.

The inevitable extra traffic would cause increased congestion at Send Mays Corner crossroads. Combined with the extra traffic on the Send Road due to the other increases at Garlicks Arch and Burntcommon, and the whole area would become unsustainable.
With the proposed extra numbers of houses at Garlicks Arch & Clockbarn sites it would overcome the current infrastructure.

This site was sensibly removed from an earlier version of the Local Plan, and was re introduced in July. Why?

**Comment:** MM44 - LPMM18/4088  **Respondent:** Reverend Ruth Broithwell 17424705  **Agent:**

**MM44**

My previous objection related in particular to the loss of Green Belt land. I now notice that you have ignored this and increased the sites intended for build

- I object most strongly to the removal of green belt in this area
- The additional traffic resulting from this development will seriously impact the village especially at Send Crossroads. This additional development is too much for our village and will seriously harm our infrastructure.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/2619  **Respondent:** Gregory Webb 17424801  **Agent:**

**MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63**

It beggars belief that this site has been reintroduced into the Local Plan following its earlier deletion based upon the large number of objections. This development:

- Contradicts policy MM9, because there are no special circumstances to warrant a development like this in the Green Belt
- Will detract from the Heritage buildings in the area
- Create yet more traffic in Send and in particular create huge congestion at the Send cross road, which in turn will increase pollution for all. This in turn will deter pedestrians and cyclists from moving around the village, undermining village life. Not all residents are commuters.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/4709  **Respondent:** Darren Moss 17426593  **Agent:**

**MM44-Land at Aldertons Farm, Send Road, Policy A63.**

New site for 120 homes which was deleted because of objections, this was reinserted for public examination in JULY. With Garlicks Arch 550, Clockbarn 60 ,Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%!

Our roads, sewage, water, healthcare, schools will prevent us from being able to live normal lives in this polluted gridlocked stressful environment.

Again this is GREEN BELT and with NO special circumstances and contradicts policy MM9.
Comment: MM44 - LPMM18/4508  
Respondent: Aldertons Farm Residents Company Ltd (Paul Norman) 17427713  
Agent: 

MM44 – Policy A63: Land West of Aldertons Farm, Send Marsh Road, Send – as stated in items above this proposal is for inappropriate residential development within the Green Belt with no statement of justification, no indication of any 
Very Special Circumstances for the development and it is completely contradictory to MM9 Policy P2 as regards development within the Green Belt. The proposal for 120 houses is excessive and creates an overly dense form of development when gauged against the surrounding form of development which comprises a mix of detached and semi-detached bungalows and cottage style houses. A rough calculation of the local density for a site of the same gross area would indicate a figure of around 70 units as more in keeping with the character of the immediate area. A dense development would detract from this rural character and what can now be regarded as a countryside street scene would become much more suburban. The substantial increase in vehicular traffic would further impact on the Send Crossroads and in the other direction increase the potential for incidents at the sharp bend in the road at Send Marsh Green which is already quite dangerous.

Comment: MM44 - LPMM18/5998  
Respondent: Anya Williamson 17434689  
Agent: 

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63: I object to the reinstatement of Policy A63 for the following reasons: - It was deleted from an earlier draft as a direct result of the huge number of objections made previously - No ‘exceptional circumstances’ exist to justify this use of Green Belt land - In conjunction with Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) this makes a total of 770 proposed new houses. Set against the existing 1700 houses in Send, this represents a staggering 45% increase. The village’s infrastructure simply cannot cope with this scale of development. - The proposals for Send are wholly disproportionate compared to other areas in the borough. 
Green Belt, Policy 2, paragraph 4.3.15: - The council’s assertion that exceptional circumstances allow for “limited infilling outside the identified settlement boundaries where it can be demonstrated that the site should be considered to be within the village” introduces a subjective test, and effectively attempts to directly negate

Comment: MM44 - LPMM18/1166  
Respondent: Steve Nicoll 17434785  
Agent: 

3. MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63
This wasn’t in the first local plan and there’s no reason why Send need this amount of housing so one can only imagine that Send has been selected to accept more than it should due to other parts of the borough not accepting their burden. Why can it be that the following points are being ignored?

• New site for 120 Homes including some self-build
• This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July
• It is a Green Belt site with no special circumstances so it also contradicts policy MM9
• It will detract from the heritage buildings at Send Marsh Green
• The additional traffic will increase pressure on the Send Crossroads.
• With Garlick’s Arch (550) Clockbarn (60) Winds Ridge (40) it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure.

Land west of Alderton’s Farm, Send Marsh Road

The SA (2017) identifies the site as amber rated Green Belt and was assessed on the basis of 100 dwellings. The site scores poorly on against accessibility to district/ local centres, primary and secondary schools, alongside a railway station. In addition, the site would result in the loss of Best and Most Versatile Agricultural Land. The SA further raises concerns over an additional allocation at Send Marsh resulting in ‘in combination effects’.

The SA (2018) considers the delivery of 120 homes on the site and further states at paragraph 9.10.1 that ‘the proposed package of additional allocations is perhaps less than ideal on the basis that Alderton’s Farm is known to comprises ‘best and most versatile’ agricultural land with the site being within 400m of the Papercourt SSSI (para 9.2.2). Given the findings of the SA (2017), it is concerning that the cumulative effects on Send/ Send Marsh has not been considered robustly to inform the spatial strategy not being put forward through the main modifications.

The Green Belt Study identifies the site as B15 and was identified as potential development area under B15C with the estimated development capacity as 116 dwellings.

Whilst the site scores amber against Green Belt sensitivity, it scores poorly against local facilities and the train station. In addition, it would result in the loss of the best and most versatile agricultural land unlike our Client’s site. We have further concerns that GBC has not robustly considered the cumulative effects, as identified within the SA (2017), of the level of development proposed and Send/ Send Marsh on account of this additional proposed allocation. It is noted that further development at Flexford beyond the proposed allocation at Glazier Lane has been discounted yet further development is proposed at Send Marsh despite reservation contained within the SA (2017).

Attached documents:

Comment: MM44 - LPMM18/4715  Respondent: Diana Bridges 17463169  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63
I object to the proposal for 120 homes at this location which is a wholly unsuitable development in such an area and for the same reasons as the other locations in Send; namely excessive pressure on local services and additional traffic on a road system which was never intended for such potential traffic volumes. Again at this point 120 houses will more than likely mean 240 cars and the same amount of children requiring schools and a presumption of families requiring medical care at the one surgery serving the two villages.

The only way in and out of this site is through Send Marsh Road which is unsuitable to carry this amount of extra traffic generated by this many houses. Access either end, at Send Dip and Mays Corner onto Send Road is already very difficult due to the congestion through Send and Ripley and the result will be long traffic jams along Send Marsh Road. At commuter times the cars are already queued to either turn left or right depending whether they want to go south or north on the A3 from Send Dip.

This is prime green belt land and there is no reason to make an exception for housing here. There are many other areas outside of the greenbelt or on brownfield sites which can be selected. GBC do not have any explanation as to the reason for the exception to put this land on greenbelt land for this site and I fail to see why the Council elect not to prioritise brownfield sites.

Once again the evidence presented and the objections already submitted have told the council that this is not acceptable to the villages of Ripley and Send with clear reasons for their objections. This overwhelming reaction of the public has told and made their objections to the elected Council in the manner requested, but it seems that the actions of the council is to continue with their plans regardless.

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

- This was previously deleted from a previous draft local plan because of many objections and was not included in the recent local plan until the public examination in July.
- This is Green Belt land with no special circumstances so contradicts MM9
- Send Marsh Road is more like a country lane with a single track bridge and has a 90 degree bend in it. Many accidents have occurred at the bend with one house at the bend frequently having vehicles knocking down its walls. Already ‘maniacs’ travel along there is their cars and vans paying no heed to local road conditions. Large lorries come down there several times a day as their sat navs send them that way. With even more houses on this road, where there is also an old people’s home that would be adjacent to the proposed houses, this road is becoming increasingly dangerous year on year.
- The village nature of Send Marsh Green and its heritage buildings will be compromised if this planned housing goes ahead
- Traffic at Send crossroads is already busy and this would further increase traffic in the area as well as have a knock-on effect for Old Woking.
- Already traffic also backs up along Send Marsh Road at the junction with Portsmouth Road and the problem would be further exacerbated at this other end of the Send Marsh Road as well as at the crossroads.
- All the problems with this cannot be taken in isolation: the proposals for Garlick’s Arch, Clockbarn, Winds Ridge and the proposed industrial site at Burnt Common must also be taken into account. Send would increase by nearly 50% which is far too much for our infrastructure as well as completely changing the nature and make-up of Send and the surrounding area.

Attached documents:

Comment: MM44 - LPMM18/5837  Respondent: Thakeham Homes (Sir or Madam) 17976417  Agent: RPS Planning & Development (Mr Cameron Austin-Fell BA)

MM44 – see MM39/MM41

Main Modification 39 (MM39) – Site A61

The Modifications suggest that the greatest contribution to early housing delivery will be made via a constrained site with an uncertain delivery. The Sustainability Appraisal determines Aaron’s Hill as the most appropriate larger site due to its location in relation to Godalming and its relationship to the emerging proposed allocation in the Waverley Local Plan Part 2.

The Waverley Local Plan is not however far advanced, currently at preferred options stage. It cannot therefore be given weight in determining the suitability of the site. The relevant proposed allocation has also been submitted as a planning application, but this is not decided and is currently the subject of several environmental concerns and consultation objections. Adoption of the Waverley Local Plan is not anticipated until late 2019, and prior to approval of the above-mentioned site (if this should be achieved) the comprehensive design requirements of a cross boundary site under
separate applications and the delivery of infrastructure across multiple Council’s should only hinder the delivery of the site. The delivery of a site of this scale within the first 5 years of the plan with these delivery constraints is therefore unlikely and its inclusion would make the plan unsound.

**MM41 – Site A43 Garlicks Arch**

Given that the purpose of finding additional allocations is to provide more certainty of delivery in the early years of the plan, increased delivery at Garlick’s Arch should not be taken as a given without proper justification. Additional housing on a large existing site does not meet the purpose of this exercise and therefore any additional development at Garlick’s Arch should be additional to the 550 additional dwelling allocations requested by the Inspector.

Secondly, in proposing this additional housing in addition to site A63 (Land West of Alderton’s Farm, Send Marsh Road, Send) the Council are effectively proposing that they will deliver 570 homes (100 homes at Garlick’s Arch at year 6) across 2 sites within a single village in the first 5 years of the plan. This appears unrealistic whilst avoiding market saturation and fails to consider the capacity of existing community infrastructure to which the Sustainability Appraisal states that ‘higher growth at Send/Marsh may be considered problematic on the basis that this area is already set to receive a considerable amount of housing’ but concludes this with ‘however it is again difficult to assign any particular weight to this consideration.’ (page 60)

Furthermore, both sites (A43 and A63) are at least partially dependant on the development of the A3 of which delivery timescales are uncertain. The new slip roads to the A3 at Burnt Common are immediately adjacent to site A43 and yet page 72 of the Sustainability Appraisal considers only the larger sites at Clandon Golf, Liddington Hall and Aaron’s Hill. Site A43 is a large site relied upon for the early delivery of homes and is reliant on upgrades to the A3. Alone and cumulatively with site A63 the site will have a significant impact on traffic congestion on the A3, which is not duly considered within the Council’s evidence base. The provision of community and transport infrastructure can cause significant delays to development to which the Council have given no weight. The delivery of these sites is therefore uncertain and they cannot be relied upon to accommodate the Council’s shortfall in the early years of the plan. Their inclusion would therefore make the Plan undeliverable and therefore unsound.

In addition, no reference is made to the additional SANG requirement needed to accommodate the additional homes proposed at site A43. In addition to the requirement to protect the Thames Basin Heath Special Protection Area, the development of both this site and site A63 will impact on the Papercourt SSSI which lies within 400m of the sites. Particularly if the SANG capacity above is not provided for these developments could place additional pressure on the most significant habitat that is in close proximity to any of the omission sites. Evidence should therefore be provided to demonstrate that the site is capable of accommodating this additional area of SANG in order that the sites development does not harm the SSSI and to demonstrate accordance with emerging Policy P5 (Thames Basin Heaths Special Protection Area).

Attached documents:

**Comment: MM44 - LPMM18/2101**  **Respondent: Chris Wood 20020353**  **Agent:**

I strongly object to the proposed main modifications. This proposal is for inappropriate residential development within the Green Belt with no statement of justification, no indication of any Very Special Circumstances for the development and it is completely contradictory to MM9 Policy P2 as regards development within the Green Belt.

The proposal for 120 houses is extremely excessive and creates an overly dense form of development when compared against the surrounding form of development which comprises a mix of detached and semi-detached bungalows and cottage style houses. A rough calculation of the local density for a site of the same gross area would indicate a figure of around 70 units as more in keeping with the character of the immediate area. A dense development would detract from this rural character and what can now be regarded as a countryside street scene would become much more suburban.
The substantial increase in vehicular traffic would further impact on the Send Crossroads, and considerably increase the potential for incidents at the sharp and narrow bend in the road at Send Marsh Green which is already quite dangerous and the narrowing of the road over a small bridge just past Old Hall.

This proposal would also have a huge impact on the local wildlife which currently includes wild deer, bats, barn owls, little owls, nesting buzzards, nesting green and spotted woodpeckers, heron and many other species of flora and fauna.

[Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

Attached documents:

Comment: MM44 - LPMM18/5  Respondent: Mr Paul Broughton 20364545  Agent:

The village has insufficient resources for these homes - roads, schools, doctors, public transport

Attached documents:

Comment: MM44 - LPMM18/35  Respondent: Ms Anne Deacon 20453409  Agent:

I need to save this comment! Ditto - no development without front gardens and room for mature trees

Attached documents:

Comment: MM44 - LPMM18/50  Respondent: Mr James Jackson 20511297  Agent:

This is green belt, there are no special circumstances

as MM41 this will increase road traffic on small local residential roads.

There is NO infrastructure, where will the children who will no doubt live in these properties go to school both primary or high school.

Attached documents:

Comment: MM44 - LPMM18/96  Respondent: David Kean 20542785  Agent:

I, David Kean, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] would like to object to the proposed local plan for Send.
I object to MM44 at Alderton's farm, Send Marsh road policy A63 on the basis that this is green belt land and the local traffic particularly at Send crossroads will not be able to cope. This proposal was deleted from an earlier draft and has now been reinserted.

Attended documents:

**Comment: MM44 - LPMM18/106**  **Respondent:** Chris Smith 20545313  **Agent:**

I would like to object to proposed changes in my village, Send. The reference numbers are MM41, MM42, MM44, MM9, MM27, MM41, MM42 and MM48.

The proposed developments will constitute over-development and the road infrastructure will not cope. The traffic around Send and Ripley is bad already. Much of the developments will be on Green Belt land.

Attended documents:

**Comment: MM44 - LPMM18/126**  **Respondent:** Mrs Nicola Carol Brown 20546209  **Agent:**

MM44 Policy A63

I object most strongly to this new proposal. This was previously removed from the plan because of objections and so was not considered at the inquiry. To introduce it again at this late stage seems underhand and a cynical way of trying to push the development through.

This development will further increase the traffic problems along Send Marsh Road, the Old Portsmouth Road and the Send cross roads which is already congested in rush hours.

The whole character of the area will change - it will create a continuous development along Send Marsh Road, spoiling Send Marsh Green with its heritage buildings and removing the few remaining bits of countryside around the village. Again, this is supposed to be Green Belt so it is in contravention of MM9.

Flooding is also a potential problem as Send Marsh Road regularly floods near the culvert and this development would adversely impact on this problem.

This proposal, along with - Garlicks Arch (550), Clockbarn (60) and Winds Ridge (40) adds 770 houses to the 1700 currently in Send - a huge increase of 45% which is excessive and too great a burden on our infrastructure.

Attended documents:

**Comment: MM44 - LPMM18/167**  **Respondent:** Matthew Woods 20560225  **Agent:**

The plan which most affects me personally is the shambles that is the building of 120 homes on Alderton's Farm (Reference number MM44). Living down Send Marsh Road, I consider myself very lucky. It is an exceptionally beautiful place to live with reasonable traffic flows and an abundance of Green Belt land. However, once again it appears that Guildford seem to believe they have the right to destroy this land by building 120 homes on. It is Green Belt land,
something which GBC have absolutely no authority to build on despite the 'limited infilling' which is against national legislation. Once again this contradicts **MM9** (*The Metropolitan Green Belt, as designated on the Policies Map, will continue to be protected against inappropriate development in accordance with the NPPF*). Living on the crossroads and travelling down through Send Marsh each day, I know better than most that the demands on the roads will be far too much. The traffic congestion will be abhorrent and there will be sharp rise in pollution levels.

<tr>
<td>With respect to MM41, should that atrocity of a proposal be accepted in full (550 homes) then this is not acceptable in the slightest. Your proposals would look to increase residence by over 40% in the village, that is insanity. The current infrastructure will not cope with it. Air Quality and Environmental issues with the amount of building you are proposing to allow should have set alarm bells ringing way before this got to print. Send has terrible public transport links, there is a limited bus service, it is 2 miles to the nearest train station on unlit roads with poor pedestrian footpaths (not continuous and therefore you are forcing people to cross a 40 MPH road that is often liable to speeding, possibly in the dark) and no cycle paths - further in fact from this location shown. You need to improve this greatly before considering any further development in the area. Assuming an aggregate of 1.5 cars per household, you intend with these proposals to add 1000 vehicle movements at each end of the day to an area which simply is not designed for it, can not cope with it and will likely suffer for it. This shows a tremendous lack of foresight.</td>

NO NO NO to these developments!!

SAVE OUR VILLAGE
THINK OF OUR FUTURE

The additional traffic generated by building these houses, will put more pressure on Send Crossroads. With Garlick's Arch, Clockbarn, Winds Ridge it will add nearly 800 houses to the 1700 houses currently in Send, an increase of nearly 50%. This would put a huge strain on the current infrastructure.
Comment: MM44 - LPMM18/645  Respondent: Jane Harris 20622881  Agent:

MM44

Why has this been reinserted after being removed earlier due to local objections?

This is green belt with no special circumstances so contradicts policy MM9.

This will only add to the already heavy traffic using Send crossroads.

With the other developments this adds 770 houses to the 1700 currently in Send a 45% increase!!

Attached documents:

Comment: MM44 - LPMM18/648  Respondent: Cam Pulham 20622913  Agent:

MM44

As before, the main impact would be on the traffic levels and the overloading of local amenities and resources which are already at capacity. It will be out of character for the area, especially with the extension to the use of self build plots which will introduce a level of out of character houses and diversity of structure.

This will lead to traffic build up at the crossroads in Send which are already overloaded at peak times and will further increase the air pollution in the area. The infrastructure will not allow for the massive increase in housing in the area.

Attached documents:

Comment: MM44 - LPMM18/660  Respondent: Elsa Pulham 20623329  Agent:

MM44

The increase in traffic is disproportionate to the area. The houses will no doubt be out of character and will result in traffic backlogs at pinch points such as Send crossroads, leading to poorer air quality, noise and delays to local residents.

Attached documents:

Comment: MM44 - LPMM18/672  Respondent: Stephen Harnor 20624417  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road, Policy A63

This was deleted from an earlier draft because of all the objections and not re-inserted until the public examination in July

It is a Green belt site with no special circumstances so it contradicts policy MM9
It will detract from the heritage buildings at Send Marsh Green

The additional traffic will increase pressure at the Send Crossroads and the already congested junction of Send Marsh Road and Portsmouth Road

With Garlick’s Arch (550), Clockbarn (60), Winds Ridge (40), it adds 770 houses to the 1700 currently in Send, an increase of 45%. This is too much for our infrastructure

Attached documents:

Comment: MM44 - LPMM18/698  Respondent: Alastair Graham 20625825  Agent:

MM44 Aldertons Farm

The proposed building of 120 new houses at Alderton’s Farm is a further invasion of Green Belt land of a rural and peaceful character. The proposed development is far too close to the ancient houses of 16th and 17th century historical interest at Send Green, and will result in yet more traffic congestion in Ripley and vibration damage to this village’s heritage buildings in the rush hours as commuters access the A3 Northbound. It will mean at least 150 additional cars clogging the narrow Send Marsh Road, including at the crossroads at the junction of Send Marsh Road and Send Barnes Lane at one end of Send Marsh Road, as well as at the T junction of Send Marsh Road and the Portsmouth Road. Additionally the extra traffic will substantially increase the risk of accidents and injuries at the very sharp bend in Send Marsh Road at the junction of Polesden Lane.

Attached documents:

Comment: MM44 - LPMM18/702  Respondent: The Clandon Society (Eric Palmer) 20626273  Agent:

The Clandon Society is the Residents’ Association of the villages of East and West Clandon.

The Association is restricting its comments in this consultation to matters which could directly affect our residents.

The Association is very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Association expressed its concerns in the strongest terms, pointing out the inadequacies of the road. The major modifications now proposed to the Plan will bring additional pressure on this road.

The Association welcomes the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 (MM48) and the amount of development proposed in the area nearby. (MM41. MM42. MM44. MM35.) However, residents are of the view that the provision of £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the likely traffic.

Residents do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available, if indeed it is technically feasible.

We believe that in a few years time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs when traffic diverts because of congestion on the A3. This was pointed out in detail in previous submissions by the Association, the Parish Council and many residents.
What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint but this is not a unique problem viz. the widening of the Boxgrove Road bridge. It is already the intention to build a station next to the Merrow Lane bridge.

The £1million funding could with advantage be used to make the A247 safer.

**Why do we believe that traffic will increase significantly?**

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic. (MM42).
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247. (MM41).
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh. (MM44).
4. The development of 1800 houses at Gosden Hill. (MM35).
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. (A43a). The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247-potentially an easier route than any existing.
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic- presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

**Problems with the West Clandon section of the A247**

The Association reiterates its belief that the A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 S-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump.
4. The site lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and in places the narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

**Respondent:** Christina Reeves 20634753  
**Agent:**

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

New site for 120 homes.

This is a “green belt” site which contradicts Policy MM9. It has no special circumstances. It will not fit in with the buildings at Send Marsh Green.

The increase in traffic will put extra pressure on surrounding (narrow) roads.

Together with the proposed developments at Garlicks Arch, Clockbarn and Winds Ridge this adds a further 770 houses to those already in Send. This is a increase of 45%. The current infrastructure cannot cope with this massive over development.

### Attached documents:

### Comment: MM44 - LPMM18/741  
**Respondent:** Mr. David Minnett 20636033  
**Agent:**

The building of 770 new houses in Send would increase the number of residents living in the village to such an extent the local infrastructure will be unable to cope. The 120 new houses that are planned for Alderton's Farm are to be built on precious Green Belt land which is supposed to be protected by law. Guildford Borough Council must comply with Green Belt policy as it was originally intended, and not use ‘get out’ clauses as a convenience.

Already deleted from a previous draft due to local objection, the Council must again listen to their residents, for whom they supposedly represent.

Combined with the proposed changes to the Send junction on the A3, if that and an Alderton's Farm development were both to go ahead, then the crossroad at Send Marsh Road will become a living nightmare for all residents living nearby.

### Attached documents:

### Comment: MM44 - LPMM18/760  
**Respondent:** Emanuele Loggia 20638273  
**Agent:**

Regarding MM44; This again will add to traffic increase, huge pressure on Send crossroads! Please think carefully and protect our green belt for our younger generations!

### Attached documents:

### Comment: MM44 - LPMM18/789  
**Respondent:** Elissia Loggia 20638529  
**Agent:**
And lastly I object to the MM44 proposal to build 120 new homes on Alderton Farm’s land. Repeatedly, this land is in Green Belt possession meaning it also contradicts the MM9 policy. The demand of this antic proposition, along with the following MM41 plan above would mean a 45% increase of housing in the send area. This figure realistically showcases the impossibility of what you are proposing. These avarice plans are too much for our infrastructure, Send will not be able to with stand this exploitation, especially as there are so little benefits to the present community.

Once again the proposals appear illogical and detrimental to our community, the money should be used for far more pressing issues that coincide within our society and are relevant to those who already live in the area.

Attached documents:

Comment: MM44 - LPMM18/792  Respondent: Shula Sinai 20638625  Agent:

MM44 Aldertons Farm;

This is GREEN BELT LAND and previously deleted due to objections, but once again residents are being ignored. Send Marsh is a lovely heritage site around the green and this will be ruined. Another 120 homes here along with the other proposed developments will add 770 houses increasing the village by 45% this is wholly disproportionate. Again this will increase the strain on local services to breaking point. Congestion and pollution blighting our lives. I strongly object to MM44

Attached documents:

Comment: MM44 - LPMM18/823  Respondent: A.A.D Andrews 20642561  Agent:

MM44 Land at Aldertons Farm Send Marsh, Policy A63 - I object

It is a Green Belt site with no special circumstances so it contradicts MM9. It will distract from the heritage buildings on Send Marsh Green. It will add to the congestion in the area on Saturday the 6th October Guildford Woking were gridlocked. Bus were running of an hour [unreadable text] the weather was bad so adding to the problem will the planning commities come and sort out the gird lock situations. I dont think so.

Attached documents:

Comment: MM44 - LPMM18/851  Respondent: Send Parish Council (Send Parish Council) 20644225  Agent:

Tibbalds Planning and Urban Design (Richard Crutchley)

Main Modification 44

The inclusion of the site at Alderton’s Farm, Send Marsh is a new allocation within the parish, in addition to those already identified at Clockbarn Nursery, Garlick’s Arch and Winds Ridge. This site has not had the benefit of thorough testing through the Local Plan process, having been excluded after the 2014 consultation. In light of the changed housing requirements discussed above, the Parish Council is of the view that this allocation is no longer required, and registers an in principle objection.
This plot is currently used as pasture. It forms a natural, picturesque, wildlife corridor between Send Marsh and the heart of Send village, and is a haven for many forms of wildlife, including many bird types and deer. The land has had a tendency to flood, with the run-off from this affecting nearby properties adjacent to the site. Development of this land would mean a loss of openness for the area and removal of the current natural and attractive separation between Send and Send Marsh.

The allocation currently comprises of green belt and, whilst the green belt in this location may be less intrusive than other locations, its loss represents further erosion of the green belt around Send and Send Marsh, erosion in addition to the existing allocations made, some of which are being intensified through the Main Modifications. The overall impact of green belt erosion around the parish is significant and has not been comprehensively assessed.

The Parish Council believes that the wording within MM44 offers insufficient guidance and comfort as to the form of development and the requirements that would be sought to integrate development both within its immediate context or within the wider parish. The wording in the requirements is unclear as to what is sought; terms such as ‘sensitive’, significant’ and ‘unacceptable’ provide little direction (and therefore comfort) in achieving a scheme that respects the elements – such as the site boundaries, transitions between village edge and open countryside and hedgerows – that are recognised as worthy of protection and attention. If ‘no unacceptable impact’ is the objective in respect of trees, for instance, is some impact acceptable? And if so, what?

As discussed with other allocated sites in Send, Alderton’s Farm is also distant from the village centre, and the location of most services on Send Road to the west, and access to it along Send Marsh Road is not always conducive to non-vehicular transport, such as walking or cycling. If we are to achieve a reduction in car use in the parish, particularly to and from services within the parish for residents, any allocation that remains in the plan needs to have a series of transport related conditions to ensure that contributions and facilities can be put in place to provide alternatives to short car trips, as has been the case with other sites (see MM41 and MM42 in particular). This should include physical connections such as improved pavements, cycle lanes and better crossings alongside initiatives such as more frequent bus services and reduced speed limits.

A further allocation of 120 dwellings within Send also places additional pressures on existing services within Send, which the Main Modifications do not address. During the Examination, the position in respect of Send and Ripley’s Primary Schools was discussed, as well as the extent to which Send’s Medical Centre could accommodate growth.

The wording at (2) in the Opportunities section of MM44, therefore, is weak and vague.

Finally, within the 2014 Plan, when the site was allocated, a SANG was identified adjacent to it which was capable of delivering recreational opportunities to residents, and this proposal was acceptable to Natural England. If the allocation is to find favour, the Parish Council would expect a reference in the plan to a similar provision of SANG to be available for current and future residents.

Attached documents:

Comment: MM44 - LPMM18/854  Respondent: Send Parish Council (Send Parish Council) 20644225  Agent: Tibbalds Planning and Urban Design (Richard Crutchley)

Traffic implications of additional development introduced by the Main Modifications

At present the Parish Council is working with Surrey Police, Surrey County Council Highways and the local school and medical centre on Send Barns Lane to develop options to deal with the significant highway problems (speeding, volume, parking, pedestrian / cyclist safety) in the village. The A247 is presently a very busy road and this should be considered before local plan allocations are brought forward.
Send Parish are unclear on the cumulative traffic implications of the concentrations of development being proposed by MM41, MM42 and MM44. It is noted that the landowner at Garlick Arch considers that there are benefits to be had from the slip roads in terms of the impact upon the A247, particularly in respect of southbound movements. It is not clear where this southbound traffic is redistributed to. The benefits to Ripley are evident as traffic is redirected to the Burnt Common junction; the benefits to Send seem intuitively less apparent.

Additional housing at Garlick’s Arch (MM41) and a new site at Alderton’s Farm (MM44) cause further concern. It is not clear whether the impacts of an open ended industrial allocation at Burnt Common (MM42) have been factored into this traffic assessment, or indeed whether other smaller housing allocations and the traffic expected of the expanded Strategic Industrial Location at Tannery Lane within Send have been modelled. Notwithstanding some new references to transport strategy at Garlick’s Arch and Burnt Common warehouse, the absence of alternatives to the car bring into question the overall strategy and approach to the parish.

The Sustainability Appraisal raises this directly; it recommends that clarification be made regarding the risk of severe traffic congestion in Send (para 10.4.6) without really explaining how this fear arises (beyond the extent of development proposed) and without a clear indication of where the recommendation has been actioned within the plan or the plan-making process.

Work must be undertaken to determine the additional cumulative highway impacts of all the development in the parish (on all roads infrastructure), having regard to the overuse of the existing road infrastructure.

Attached documents:

**Comment:** MM44 - LPMM18/925  **Respondent:** Duncan Speight 20654049  **Agent:**

I am writing to you to object to the planning inspector’s report relating to the development of Send Village and the surrounding area, in particular MM41, MM42, MM44 and the related impact on the Green belt covered under MM9 and the transport strategy that impacts the above sites and site MM27.

Upon reading the outputs from the latest report it would appear that rather than listening to and addressing local residents’ concerns raised in the previous consultation periods you have just ignored those and continued to drive the plans forwards. In addition, GBC has significantly increasing the sizes of the Garlicks Arch development, doubled the industrial and storage development in Burnt Common and reinstated the Alderton’s Farm development which was previously deleted due to previous objections.

I would also seriously question that accuracy of the Public Examination figures (Policy S2) for Guildford Borough Housing, recommending 789 houses are built each per year. Reviewing the Barton Wilmore figures (suggesting 431 houses a year) and the ONS population forecasts suggesting the development of 460 houses a year across the borough. These well-respected authors reports suggest the need for new houses in this specific part of GBC has been significantly overinflated

The plans GBC lays out in the report do not support the policy for the protection of the Green Belt. Furthermore, the subjective test proposed puts the Green Belt at considerable risk and negates Green Belt protection. This means any land on the edge of the village could be picked off for future development. This point is clearly of serious concern to local residents.

Send Village and the surrounding area already suffers from significant traffic congestion. Traffic on the local roads is gridlocked in busy periods. It is clear from the plans that the suggested remedies do not adequately address the significant increases in traffic we will see if these developments are allowed to go ahead. In particular, Send Barns Lane, Send Road and Broadmead Road will not cope with the increased traffic heading in and out of Woking every day. Not only will the increases in traffic cause significant delays but will also impact residents with increased noise and nitrogen dioxide pollution levels.
As the people that live and experience the local area every day we are well positioned to provide an accurate point of view on the impact developments of this size will undoubtedly have on the area. On that basis I hope you give this issue the time and attention it deserves.

I object strongly to this proposal on the grounds that:

1. Previous objections that resulted in the withdrawal of this proposal have been ignored.

2. Both during the building works and even more so once they are completed, it will increase traffic pressure on Send Marsh Road and the Portsmouth Road leading onto the A3 as well as Send Barns Lane and the approaches to Woking. Traffic pressure on the Send Crossroads is already unacceptable and Ripley is already a major bottleneck for traffic, especially during rush hours and barely acceptable outside these hours. The extra pressure will increase noise and traffic delays which will exacerbate the natural increase in air pollution to be expected from the increase in the number of vehicles likely to be associated with the extra housing.

3. Polesden Lane is already a "rat run" for commuters trying to avoid current bottle-necks, with too many vehicles travelling too fast for such a narrow lane. The adoption of these proposals and the resulting increase in congestion (particularly during construction) would be bound to increase that number.

4. No extra infrastructure has been proposed to cope with the extra housing proposed in this policy in combination with those involving Garlick's Arch, Clockbarn and Winds Ridge - a total of 770 houses i.e a 45% increase - and this will place an unacceptable extra load on the standard utilities as well as schools, medical practices, hospitals etc.

5. The land affected is currently Green Belt and no special circumstances have been set out to justify an exception. This policy relies on a purely subjective test and conflicts with both MM9 and national guidance on Green Belt land.

6. There are heritage buildings including the 17th century manor house at Send Marsh Green and the proposed buildings will severely compromise their architectural integrity.

Attached documents:

Comment: MM44 - LPMM18/1050  Respondent: Theresa Gianotti 20663393  Agent:

MM44

- Detracts from the heritage buildings in the area;
- This is Green Belt and contradicts policy MM9;
- Extra traffic will place more pressure on the Send Crossroads; and
- An extra 770 houses is just too much for the existing infrastructure.

Attached documents:

Comment: MM44 - LPMM18/1092  Respondent: Marc Lippiett 20664481  Agent:

Please see below my clear objection to the proposed Main Modifications in Send under the Guildford Local Plan.

Objection to MM44 (land at Alderton's farm, policy A63)

- The proposal to develop 120 homes in this area will have catastrophic impact on the nature of the area, which is a Green Belt site and there is no special circumstance that require it be developed (and so it also contradicts policy MM9)

- The roads in the area are already at capacity and every day are congested at peak times of the day. The pressure on Newark Lane and Send Crossroads would be significantly beyond capacity as these are bottlenecks today and already
cause significant delays for people get to and from work or taking children to and from school (something that I as a parent and a commuter in the village already suffer every day and further traffic congestion would make commuting unviable)

- The above is particularly compounded by the further proposed developments in the Send area - the infrastructure is not sufficient to cater for the proposed developments. I would also not advocate further developing the infrastructure as this would further detract from the village and green belt and, even more significantly, bottlenecks such as the Newark lane humpback bridge and width of Newark Lane at Ripley make it unviable to alleviate the pressure

- Based on good judgement this proposed development was removed from an earlier draft of the plan but has now been re-inserted and I believe strongly that this is a catastrophic mistake for the reasons outlined above

Attached documents:

Comment: MM44 - LPMM18/1233   Respondent: Jim Allen 20674913   Agent:

3. Rows A61 – A64
We note all these sites are further releases of Green Belt lands rather than finding increased capacity in Town Centre sites... this akin to one year’s supply not five years supply (3,520) - noting lack of sewer capacity at just 325 houses in total..

Attached documents:

Comment: MM44 - LPMM18/1268   Respondent: Alstair Haxton 20676417   Agent:

MM44 Land at Alderton’s Farm, Policy A63
The Garlicks Arch, Clockbarn and Winds Ridge developments will increase the number of houses by 45% with already insufficient infrastructure for the current 1700 homes in Send. The subsequent increase in traffic will block the roads and Send crossroads. This Green Belt land and heritage centres at Send Marsh Green will be affected.

Attached documents:

Comment: MM44 - LPMM18/1700   Respondent: Mr Alan Sussex 20687457   Agent:

MM44 Land at Alderton’s Farm, Send Marsh Rd, A63
Introducing a new site at this late stage, I think is out of order, when it was left out previously, because of all the objections, at the Public Examination in July 2018.

I believe as a matter of openness this site should be deleted from the plans.

Once again infrastructure will not be adequate
I hope this long and protracted public examination will be completed with some notice being taken of all the objections made by Send residents.

It would appear that previous objections have led to yet more developments being imposed on Send.

Attached documents:

**Comment:** MM44 - LPMM18/2629  **Respondent:** Mrs Molly Ness 20687489  **Agent:**

MM44. Again no thought given to heritage building, increased traffic (noise and pollution). GREEN BELT land contravening MM9.

How can any sane, fair minded Councillor who has visited Send on a regular basis, make this ridiculous decision to increase the population of the village by nearly HALF.

If any of you have taken the trouble to visit us you will know that the main road (Send Road) is very narrow - and used by many pedestrians (on equally narrow pavements which often have over-hanging hedges/branches making it difficult to keep to the pavements) and the traffic already is non-stop.

It also has mostly LANES leading from it. Is it the intention of the Council to compulsorily purchase land to widen these lanes ? If so, more disruption and heart- ache for those having to give up their land/house.

There are now TWO schools adjacent to this busy main road -another brilliant decision by Guildford Council (closing the infant school in Bush Lane several years ago, which incidentally is now a lovely green PARK?? - which no-one can access by the way!!) Why didn't you put both schools on that site? One can't help thinking there is some sort of’deal' going on as this would be a prime building site for the Luxury House Developer.

The Medical Centre is brilliant but I tried to make an appointment for a non urgent appointment recently and was given a date for THREE weeks later! I'm sure that was a quick appointment - others take much longer. How long am I going to have to wait when the population of this VILLAGE is the size of a new TOWN?

I strongly OBJECT to all these decisions made by an obviously incompetent Council who have no concern at all of the impact all these extra houses, cars, pollution and people will have on the existing residents.

Why do you never consider our QUALITY of life

I have a prediction - there will be no villages in England in thirty years time!! How sad will that be - SO MUCH FOR THE CONSERVATIVE PLEDGE (IN THEIR MANIFESTO) TO GIVE THE PEOPLE CHOICE!!

I chose to live in a village!

I have always voted Conservative, both nationality and locally- NO MORE!

Attached documents:

**Comment:** MM44 - LPMM18/2400  **Respondent:** Mrs Eleanor Ayers 20688481  **Agent:**

MM44
This has already been deleted from an earlier version because of all the objections. It is Green Belt and on a busy minor road. With other developments it adds 770 houses to the total of 1700 too much for one village.

**Comment:** MM44 - LPMM18/1359  **Respondent:** Alicia Pigram 20689441  **Agent:**

I OBJECT to MM44, a new site for 120 homes at Aldertons Farm, Send Marsh Road. Another loss of the Green Belt, contradicting MM9 as there are no special circumstances. Increased traffic adding pressure to the Send Crossroads. The infrastructure of the village will not cope with the increased traffic that comes with the 770 new homes planned (120 at Aldertons Farm, 550 at Garlicks Arch, 60 at Clockbarn and 40 at Winds Bridge), this is a 45% increase to the 1700 homes currently in Send.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/1378  **Respondent:** Mrs Alison Warne 20689665  **Agent:**

This has previously been deleted from the plan due to all the objections. Are these objections now to be ignored?

From a transport perspective, Send is a bottleneck, because there are limited crossing points of the River Wey and Wey navigation. To make matters worse, Send and Send March are used as a cut-through of traffic from the A3 to Woking. Additional housing at Alderton's farm will increase the traffic at Send crossroads, which is also close to Send Primary School.

Send Marsh Road has a small narrow bridge, which restricts traffic flow. Any increased traffic on Send Marsh Road is likely to increase the risk of accidents at the bridge.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/1386  **Respondent:** Mrs Christine Mote 20689729  **Agent:**

The land around Alderton's Farm is inhabited by deer and other wildlife. It is in the greenbelt and will detract from the buildings in the surrounding area. Again the infrastructure is not in place to cope with the increased traffic. Send Marsh Road is quite narrow and is at capacity as is at peak times. With other proposed housing developments in the area there is no need for such a large development in such an inappropriate place.

**Attached documents:**

---

**Comment:** MM44 - LPMM18/3036  **Respondent:** Mr Martin Threakall 20689761  **Agent:**

MM44 Land at Alderton's Farm, Send March Road, Policy A63
This modification is the site I object to most strongly. As you'll know, it was deleted from previous draft plans based on the significant objections. It is Green Belt land with no special circumstances so it contradicts policy MM9. The significant new development will detract from the beautiful heritage buildings at Send Marsh Green. The additional traffic will cause increased pressure on local roads including Send Crossroads. It seems unbelievable to me that it has been thought appropriate to increase the number of houses further in Send; this along with Garlick's Arch, Clockbarn and Winds Ridge adds 770 houses to the circa 1700 currently in Send; an increase of 45% !! This is far too much for the local infrastructure including roads, medical services and schools.

Attached documents:

Comment: MM44 - LPMM18/1453  Respondent: Lauren Stafford 20690977  Agent: 

MM44, Policy A63

- It’s green belt land
- More houses in conjunction with other sites will again cause traffic pressure at Send traffic lights (already busy) and this is where primary school children walk to school

Attached documents:

Comment: MM44 - LPMM18/1487  Respondent: Commercial Estates Group 20691297  Agent: Nexus Planning (Adam Ross)

MM44 – Land west of Alderton’s Farm, Send

For the reasons set out in our detailed representations to MM2, the proposed allocation of this site is unjustified given the Council’s evidence in the SA Addendum 2018, and is contrary to the Council’s own spatial hierarchy / approach given its failure to allocate the deliverable, more sustainable and sequentially preferable site at Clandon Golf (as an urban extension to Guildford).

Changes Required

For the reasons set out in detail in our representation to MM2, the revised spatial strategy (and specifically the allocation of the sites identified in MM39, 43, 44 and 45) is unjustified and unsound.

The Council must re-visit the strategy to allocate additional sites to deliver in the first five years of the Local Plan (post- adoption) and base its decisions on clear evidence (most notably the SA Addendum) and its own spatial hierarchy / approach. This will result, on the Council’s own evidence, in the identification of a different development option (and therefore a different suite of sites) to those now proposed. It will also, most importantly, result in a more sustainable distribution of development (on the Council’s own terms).

Attached documents: Main Modifications Reps Combined Redacted.pdf (6.1 MB)

Comment: MM44 - LPMM18/1497  Respondent: Mrs Corinne Singleton 20692385  Agent:
I object to these proposals as follows:

It is green belt land and there are no special circumstances for it to be used in this way and therefore contradicts policy MM9.

The proposal will increase the traffic to the already extremely busy roads in particular Send Crossroads.

If you add the 550 at Garlicks Arch, Winds Ridge 40, Clockbarn 60 it totally 770 houses to the 1700 currently in Send which gives an increase of 45%. It is clear that this is too much for the current infrastructure.

Attached documents:

Comment: MM44 - LPMM18/3264  Respondent: Ms. (Ms Maria Schirmer) 20698529  Agent:

MM44 Land at Aldertons Farm, Send Road, Policy A63.

What with Garlicks Arch (550), Winds Ridge (40) and Clockbarn (60) this development would mean a total additional 770 houses to be built, compared to the 1700 currently in Send. That is a totally disproportionate increase of 45%.

Again; the current infrastructure just CANNOT cope. The roads in Send Marsh are narrow and will not be able to cope with the increased traffic and again the environmental impact of the additional car emissions will be horrendous; it’s bad enough as it is.

And again this is precious GREEN BELT and with NO special circumstances this plan too contradicts policy MM9.

Attached documents:

Comment: MM44 - LPMM18/1803  Respondent: Dr R S Mackinnon 20701633  Agent:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/2384  Respondent: Mrs Audrey Carpenter 20702561  Agent:

MM44 LAND AT ALDERTON'S FARM POLICY A63.

This is a Green Belt site, so as far as I am aware this contradicts Policy MM9.

It had previously been deleted from an earlier draft due to the number of rejections.

Again there will be additional traffic on the roads. In total it will add 770* houses to the 1700 currently in Send. This is far too much for our infrastructure. *Garlicks Arch (55) Clockbarn (60) Winds Ridge (40)

Attached documents:
**Comment: MM44 - LPMM18/1877  Respondent: J A Aldridge 20703521  Agent:**

**Land at Alderton's Farm, Send Marsh Road, Policy A63**

This land was only re-inserted in July after being deleted from an earlier draft.

It is Green Belt land with no special circumstances and contradicts Policy MM9.

It will detract from the heritage buildings at Send Marsh Green.

The additional traffic will cause even more pressure on Send Crossroads and the A247, and on local facilities.

As noted in the Strategic Flood Risk Assessment, Appendix D, Volume 3, there is a risk of flooding in this area of Send Marsh.

This site slopes down to Send Marsh Road and, following periods of heavy rain, water runs down the site to lie at the boundary of the road and causes flooding in the land to the north of Send Marsh Road. The gardens of the houses opposite and downhill from this site also flood during periods of heavy rain. Building houses and roads on the land to the east of Alderton's Farm will cause a more rapid run-off of water towards Send Marsh Road and, consequently, heavier and more rapid, serious flooding of all land and properties in the vicinity.

Send Marsh, by nature of its name, was and is, a marsh and liable to flooding.

Attached documents:

---

**Comment: MM44 - LPMM18/1927  Respondent: Nigel Blake 20704577  Agent:**

The 120 homes here combined with the others proposed in the plan will put too much extra strain on local roads, infrastructure such as schools and medical services will be excessive. I live on the main A247 near the New Inn, and in rush hour the traffic is often at a standstill already in teh direction of Old Woking. Our roads cannot support the extra traffic.

Attached documents:

---

**Comment: MM44 - LPMM18/4927  Respondent: Miss Karen Murray 20704993  Agent:**

**Objection to MM44 Land at Aldertons Farm, Send Marsh Road Policy A63**

Objector: [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

As a resident of Send Marsh, I object to the proposed housing development at Aldertons Farm for the following reasons:

- This development has already been heartily objected to by local residents and had been taken off of the previous proposals. Those objections should continue to be listened to.
- With the Garlicks Arch development and the Burnt Common development, there is far too much for one small part of the village. This should be considered over development or inappropriate development. The map you have included in this section shows that perfectly. The proposed housing developments of Aldertons Farm and Garlicks Arch would increase the size of the Send Marsh area by approximately 40-50%.

- This area is considered Green Belt. As part of the other elements in the local plan, protection of Green belt is important and this should be considered 'inappropriate development' (as per MM9/Policy P2: Green Belt).

- There are insufficient plans for infrastructure improvement or considerations in relation to this development apart from broadband/connectivity. The roads through Send and Ripley cannot cope with the increased traffic that this development and the numerous other developments that are proposed for the area will bring. The roads cannot cope with the peak traffic as it is.

- The school and medical facilities in Send (and Ripley because the development is so large), will be pushed to breaking point. The closure of Ripley First School has already put pressure on other primary/first/infant schools, along with an increased traffic impact as residents can no longer walk their children to school. The secondary school issue is well established in the area already with insufficient places for children of the area. Where will the children go to school?

Attached documents:

Comment: MM44 - LPMM18/1954  Respondent: Mr Peter Gilby 20705089  Agent:

This is development on Green Belt. If the proposed number of new homes is built, it will greatly increase traffic on already congested roads through Send.

Attached documents:

Comment: MM44 - LPMM18/1958  Respondent: kenneth harrington 20705153  Agent:

This development will increase the congestion at the junction of Send Marsh Road and Portsmouth road at peak times making it more difficult and dangerous to navigate the junction. It is a green belt site with no special circumstances and along with other proposed sites in the area will put unacceptable pressure on local infrastructure.

Attached documents:

Comment: MM44 - LPMM18/2109  Respondent: Zach Drennan 20708481  Agent:

MM44 LAND AT ALDERTON'S FARM, SEND MARSH ROAD, POLICY A63

- I object to the late inclusion of this site, deleted from an earlier draft due to the strength of local objections and that GBC ignore these by only re-inserting this proposal at the public examination in July. This late inclusion does not follow correct process or allow for legitimate consultation.
- I object to this development as it will contradict Government guidance in their proposals to build on Greenbelt land and because GBC fail to provide 'exceptional circumstances' to justify this. Presumption is not to build on
Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.

- I object that this development is proposed on Green Belt Land and will destroy countryside.
- I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.
- I object because local infrastructure will not be able to support the additional demands of new residents.
- I object because wildlife will be displaced.
- I object because GBC continues to promote excessive and unnecessary housing demand, rather than allowing for open and democratic evaluation of housing need in the area.
- I object because this additional development will result in traffic and increased pressure on already over-utilised and traffic blocked roads in the village.
- I object because the proposal of adding 770 houses to our village (including 550 at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge) is disproportionate and places excessive and unachievable demand on local services roads and the infrastructure and character of our village. The addition of 770 new houses to the current population of 1700 properties would be an increase of more than 45%. This cannot be accommodated by the existing infrastructure.

Attached documents:

**Comment:** MM44 - LPMM18/2137  **Respondent:** Val Houghton 20710529  **Agent:**

Development of this area is a direct attack on the Green Belt - it is farming land - a valuable source of food production & once built on can never be restored.

Attached documents:

**Comment:** MM44 - LPMM18/2266  **Respondent:** A Symonds 20721921  **Agent:**

MM44 Land at Alderton's Farm, Policy A63

This Green Belt land was deleted from the earlier draft because of all the objections but now 120 houses are planned on this site.

It is [unreadable text] clear that G.B.C. does not take into account the feelings of Send residents when they know they are about to be inundated with thousands more cars and people. Our roads are already suffering with [unreadable text] traffic jams and it would be incapable of coping with your suggested plan for our village.

Attached documents:

**Comment:** MM44 - LPMM18/2271  **Respondent:** Ruby Pyne 20722721  **Agent:**

MM44 LAND AT ALDERTON'S FARM, SEND MARSH ROAD, POLICY A63
• I object to the late inclusion of this site, deleted from an earlier draft due to the strength of local objections and that GBC ignore these by only re-inserting this proposal at the public examination in July. This late inclusion does not follow correct process or allow for legitimate consultation.

• I object to this development as it will contradict Government guidance in their proposals to build on Greenbelt land and because GBC fail to provide 'exceptional circumstances' to justify this. Presumption is not to build on Green Belt unless exceptional circumstances are provided to warrant this. GBC fails to do this, as such circumstances do not exist.

• I object that this development is proposed on Green Belt land and will destroy countryside.

• I object because of the detrimental impact of such development on the health of local residents and wildlife because of increased traffic.

• I object because local infrastructure will not be able to support the additional demands of new residents.

• I object because wildlife will be displaced.

• I object because GBC continues to promote excessive and unnecessary housing demand, rather than allowing for open and democratic evaluation of housing need in the area.

• I object because this additional development will result in traffic and increased pressure on already over-utilised and traffic blocked roads in the village.

• I object because the proposal of adding 770 houses to our village (including 550 at Garlicks Arch, 60 at Clockbarn, 40 at Winds Ridge) is disproportionate and places excessive and unachievable demand on local services roads and the infrastructure and character of our village. The addition of 770 new houses to the current population of 1700 properties would be an increase of more than 45%. This cannot be accommodated by the existing infrastructure.

At least 2 of the above mentioned sites are on Green Belt Land. What is the point of a Green Belt if you chose to ignore it.

The original purpose of the Green Belt was to prevent unrestricted development on and around the main road and rail amenities around London and at the large towns and cities. A very considerable policy of which until now it has been largely successful. This policy has seen to be abandoned by these proposals. Ripley state school is to be closed so where are all these new children supposed to go to school.

Send in particular seems to be singled out for such contained action. Why is this; is it because the Ripley, [unreadable text], East + West-Horsley they have had the courage to stand up to the bully boy tactics of GBC planning. Led by the inspiring leadership of Sue Parker and others in the ‘Green Belt Group’ these people are standing up to the G.B.C planning jugganaughts made up of ‘TORY + LIB-DEM [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature]’ this unholy alliance of [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] characters seem to have no feelings for local concerns, but are hell-bent on making money and getting revenge on people who have the courage to stand up to them. I ask you to think again and reject these [unreadable text] proposals.

PS Is Send being so certainly [unreadable text] because Sue Porter is a Send Borough Councillor and Green Belt group leader and founder!!
### Comment: MM44 - LPMM18/2348   **Respondent:** Sarah Stalley 20727361    **Agent:**

**MM44 LAND AT ALDERTONS FARM Policy A63**

This greenbelt land should not be built on at all the additional traffic will cause undue pressure at Send crossroads again narrow lanes will become problematic, also increasing 1,700 houses in Send, our infrastructure cannot cope now this will make it worse I do not think it has been planned or taken into account furthermore it contradicts Policy MM9.

### Comment: MM44 - LPMM18/2355   **Respondent:** L Smith 20729793    **Agent:**

**I object to: MM44 Land at Alderton's Farm, Send Marsh Road, Policy A63**

- This as this was actually deleted from an earlier draft due to all the objections and has now been re-inserted for the public examinations in July
- This is a new site for 120 homes including some self builds
- This is a green belt and there are no "special circumstances" so it also contradicts policy MM9
- This is an increase of 45% and is too much for our infrastructure in Send
- It will distract from the heritage buildings at Send Marsh Green and will not be an enhancement to the area
- The roads around this area are narrow and the increase in traffic would significantly raise the levels of Nitrogen Dioxide creating health problems in the area and increase pressure on the Send Crossroads.

### Comment: MM44 - LPMM18/2363   **Respondent:** T Smith 20729889    **Agent:**

Comment: MM44 - LPMM18/2551  Respondent: Rahim Krasniqi 20754785  Agent:

MM44 Aldertons Farm

The proposed building of 120 new houses at Alderton’s Farm is a further invasion of Green Belt land of a rural and peaceful character. The proposed development is far too close to the ancient houses of 16th and 17th century historical interest at Send Green, and will result in yet more traffic congestion in Ripley and vibration damage to this village’s heritage buildings in the rush hours as commuters access the AS Northbound. It will mean at least 150 additional cars clogging the narrow Send Marsh Road, including at the crossroads at the junction of Send Marsh Road and Send Barnes Lane at one end of Send Marsh Road, as well as at the T junction of Send Marsh Road and the Portsmouth Road. Additionally the extra traffic will substantially increase the risk of accidents and injuries at the very sharp bend in Send Marsh Road at the junction of Polesden Lane.

Comment: MM44 - LPMM18/2557  Respondent: Ereza Krasniqi 20754817  Agent:

MM44 (Land at Alderton’s Farm, Send Marsh Road Policy A 63):

- It is a Green Belt site with no special circumstances so it contradicts MM9
- The additional traffic will increase pressure on Send Crossroads. Living at these cross roads, I can testify to the fact that it is very difficult to get out of our drive at rush hour as traffic is tailed back to the A3. Once again, air pollution affects our garden and environs

Attached documents:

Comment: MM44 - LPMM18/2698  Respondent: Roger Parslow 20768001  Agent:

My initial objection is to : MM41,MM42,MM44,MM9, MM27. POLICY S2.

At the public examination the figure for Guildford.B.C. housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated.

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of G.B.C consultants figures which have always been very suspect.

I trust the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.

MM27. MM41. MM42.and MM48 Transport Strategy.
Why have the effect of thousands more cars in an already heavily congested area not been taken into account ?

The increased traffic for Send from Burnt Common Garlicks Arch,Aldertons,Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.
MM41 Land at Garlicks Arch, Send Marsh, Policy A43.
I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years. This is an increase of 37% in the number of houses to be built.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking. This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

Up to a thousand cars and between 1600 to 1700 extra people will block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added?

MM42. Land at Burnt Common, London road Send Policy A58.
As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics?

This is a further increase of 25% making it a huge increase in Send, bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity. There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT. This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

MM44 Land at Aldertons Farm, Send Road, Policy A63.

New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY. With Garlicks Arch 550, Clockbarn 60, Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%

How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted, gridlocked, stressful environment. Again this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

MM9 GREEN BELT POLICY.
How can you say the modifications claim to protect our precious GREEN BELT except in very special circumstances? GBC make an exception for LIMITED INFILLING OUTSIDE THE IDENTIFIED SETTLEMENT BOUNDARIES WHERE IT CAN BE DEMONSTRATED THAT THE SITE SHOULD BE CONSIDERED TO BE WITHIN THE VILLAGE.

This is a catch all statement which is completely subjective causing complete uncertainty and completely negates GREEN BELT PROTECTION. Virtually any land on the then ever increasing edges of the village can be picked off by developers and is open season for speculators at the expense of villagers.

I wish the above objections to be considered and this huge imposition of housing and commercial development to be largely abandoned.

MM44

Its green belt

Contradicts MM9

Detract from the heritage buildings locally in Send Marsh

Send crossroads, and local roads will not cope with the additional traffic

With the additional housing proposed the area will be too over developed

Attached documents:

Comment: MM44 - LPMM18/3084  Respondent: C R Gibbons 20775233  Agent:

I am writing as a long standing resident of Send Marsh in response to the current development proposals in our area.

We are proud of the unique character of our hamlet and of our close links with both Ripley and Send, both of which also have their own distinct character.

The proposed development at Alderton’s Farm in particular, which I have noted was removed from an earlier draft, is sited on a Green Belt area and would seem to contravene the policy as mentioned in MM9. Part of the special appeal of our area is the impressive manor house and other heritage buildings situated by the village green. A plan for 120 buildings would seem to me to be very much out of character with that area and would certainly detract from it.

This planned project, along with what is proposed for Garlick’s Arch, Clockbarn and Winds Ridge seems excessive. Send Crossroads and the local roads are already very busy throughout the day and adding what I believe would be an increase in around 45% would be a ‘step too far’

especially as the infrastructure in not in place to cope with that kind of upsurge - in particular the local schools and medical centre, as well as the local lanes.

I would urge you to listen to what the local residents have to say about this area and reconsider the extent of the final proposals, without dismissing those who voice their sincere opinions as whinging nimbys.

Comment: MM44 - LPMM18/3109  Respondent: Harriet Doyle 20775585  Agent:
MM44 - Land at Alderton’s Farm, Send Marsh Road, policy A63

I object to this on the following grounds;

- This is Green Belt land
- The additional traffic together with other proposed developments will further gridlock crossroad
- The existing poor drainage and flooding of local gardens will worsen
- With other locally proposed new development, this will result in a 45% increase to Send, for a small village this is too high
- Extra cars will block up the existing busy roads
- Impact the already strained local services such as schools and medical facilities

Attached documents:

Comment: MM44 - LPMM18/3405  Respondent: Brian & Helene Pavey 20789921  Agent:

MM44: This proposal has been re-inserted despite being deleted following the strong objection it received when 1st proposed. If added together with other proposals for housing it increases Sends housing build by 45%, this is not feasible with the infrastructure that the village currently exists on.

RE: Objection to Local plan

I am writing to object to the over development of Send village in the proposed Local plan.

Our family have lived in Send for over 50 years. We, along with all residents of Send and the surrounding villages, will be negatively affected by the impacts of the development on the green space, transport system and the health and education provision.

The following specific objections relate to the following proposed developments

**MM41 Garlicks Arch 550 homes**

**MM42 Burnt Common industrial and storage**

**MM44 Aldertons Farm 120 homes**

1. The current proposed number of new homes is across all schemes is 770 compared the current number of 1700 homes in Send. This is a 45% increase and will massively change the nature and way of life in Send beyond all recognition and it will lose its village feel. In addition the developments that are being proposed will join Send to Send Marsh and Send Marsh to Ripley resulting in one large village removing the individual character.

2. The introduction of 770 new homes will result in an addition of up to 1500 cars on the roads of Send and Ripley. There are currently major delays and traffic queues through Send, Ripley and at all junctions at both morning and evening peak times which can extend throughout the day as soon as any road works are introduced in the local area. The addition of 1500 cars will cause the local roads to gridlock and increase the risk of accidents. This in turn will reduce the numbers of cyclists and pedestrians due to the pollution and increased risks of accidents.

The proposed Industrial and storage provision at Burnt Common will necessitate a large number of HGV vehicles passing through Send and Ripley. Even if there are proposed new roads and junctions to aid in this, without legal controls in place, companies will use the smaller roads as direct routes. In the event of problems on the main road network lorries would be diverted via the smaller roads -this is becoming and more and more frequent problem as the main road networks are becoming overwhelmed.

3. The Villages Medical centre already covers the villages of Send, Ripley, Clandon and surrounding areas and it can already take over 6 days to get an appointment to see a doctor. An increase number in excess of 2000 patients would make it impossible to get an appointment and would result is people being unable to see a doctor or having to present themselves at A&E as the only way to achieve a healthcare provision. This is totally unacceptable and would put people’s health and lives at risk.

4. The nearest secondary school is becoming increasingly oversubscribed from Guildford residents, leaving a reduced number of places for residents of Send. This is leading to a situation in a couple of year’s time when there will be no places allocated to children in Send. Provision of good quality school places to meet the current population requirements has been promised for years and is yet to be delivered. The planned increase in population will only add to this. The proposed number would require a new school to be built and established prior to any development to ensure provision was in place.

5. The necessary construction and infrastructure traffic required to construct these developments will have and major and lasting effect on the village, roads, trees and surroundings with pollution and damage to the roads.
Even if promises on measures to avoid impact during construction are made they will be ignored once construction starts.

Although the proposed development in Send Hill is not included in the amendments, as residents of Orchard Way we would be negatively affected by the proposed development as follows.

- The proposed number of houses on the site is inappropriate for the size of the site.
- The increased traffic from the dwellings will overwhelm the road and the associated Junctions with impact on risk of accidents and delays
- The construction traffic to build the dwellings will cause major disruption and permanent damage to the road and environment including damage to trees and hedges from the large delivery vehicles.
- There are already major problems with the main sewer drainage from properties in Orchard Way and Send Hills which will be compounded by the introduction of 40 new dwellings.
- The area identified is Green Belt and this must be maintained for future generations.
- The number of dwellings proposed would not allow space for sufficient and realistic parking allocations for a rural housing location leading to parking in Send Hill which is already a problem and further adds to delays in traffic and accident risks.
- The inclusion of Traveller pitches will have a detrimental effect on the areas for the following reasons.

[Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it]

The Send Hill cannot accommodate the transport of mobiles homes.

As with all proposals within the local plan they are based on providing the best option to housing developers by providing the largest number of dwellings in one block to maximise the opportunity for their profit.

The focus and responsibility of the council must be to meet the housing need in the most sympathetic and sustainable way and ensuring the villages are not lost under new towns and all character is lost. The local plan needs to be re-drafted under these terms and opportunity for small development identified that will fit within the villages and where the village can influence the development rather than the development have a major detrimental effect on the village.

**Comment: MM44 - LPMM18/3984  Respondent: Catherine Louise McGowan 20802593  Agent:**

**MM44 Land at Alderton's Farm, Send Marsh Road Policy A63**

This is a Green Belt site. There are no special circumstances for 120 new homes and this would contravene policy MM9. With the 120 new homes added to the other proposed new housing sites in Send, this would see an increase in housing of 45%. The existing infrastructure within Send could not support this increase.

**Attached documents:**

---

**Comment: MM44 - LPMM18/4151  Respondent: Nicolas and Judith Ware 20808161  Agent:**

**MM44 – Aldertons Farm (policy A63)**

This site proposes development for building around 120 homes, but it is GREEN BELT land

No ‘special circumstances’ should apply, especially as the land has been subject to flooding and does not drain well

The likely increase in traffic would be inappropriate for a site bordering on residential areas

Levels of pollution (such as nitrogen dioxide) are already increasing, and this proposal would exacerbate matters further

The knock-on effect, in addition to other sites, would be excessive for our village, given the revised (ie lower) ONS forecasts for housing needs

Therefore I OBJECT to this development and the proposed modification

**Attached documents:**

---

**Comment: MM44 - LPMM18/4321  Respondent: Annmarie Shenton 20819521  Agent:**

**MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.**

---

**Comment: MM44 - LPMM18/4865  Respondent: Anna-Louise Clough 20833537  Agent:**

**MM44 Land at Aldertons Farm, Send Marsh Road Policy A63**

- This has already been deleted from an earlier draft.
- This land is ‘green’ belt with no special circumstances, so contradicting policy MM9.
- Narrow surrounding lanes and roads already go to single lane in areas and will not manage an increase in traffic.
- This area is Marsh land, prone to flooding, highlighted in searches, building will increase flooding for existing homes.
- Infrastructure cannot handle an increase in homes by 45%
• Air quality will rapidly deteriorate with increase in vehicles.
• Wildlife in this area will be threatened, Bats, Owls etc.
• A number of historic Oak trees also exist in this area.

Attached documents:

Comment: MM44 - LPMM18/5115  Respondent: Richard Smith 20841889  Agent:

MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63

• I strongly object to the proposed development of 120 homes on this site, which proposal was deleted from an earlier draft due to the number of objections raised.
• Once again, this is a Green Belt site with no special circumstances and so it contradicts policy MM9.
• Once developed, it will significantly increase the number of vehicles using village roads to an intolerable level. Together with the proposed developments to the North and South of Ripley and Send and the proposed development at Garlicks Arch (MM41), the junctions between Sendmarsh Road and the Portsmouth Road and at the Send crossroads will become major points of congestion as envisaged in MM41 (0e). There is no amount of mitigation that is going to resolve the “adverse material impacts on communities and the environment”. The existing communities and the local environment will simply be destroyed.
• The “sensitive design” suggested is presumably an acknowledgement to the number of listed properties and to the beauty of Send Marsh Green. This of course will make the new houses unaffordable to all but the wealthy, while destroying the essential beauty of Send Marsh Green.
• The opportunities suggested in Policy A63 of “green corridors and linkages to habitats outside of the site” and “encourage connections with services and facilities in the village” are exactly the opportunities that will either be lost by the new development or strained to breaking point.
• It will remove an important natural corridor between Send and Send Marsh.
• Together with the proposed sites at Garlicks Arch, Clockbarn and Winds Ridge, it adds 770 houses to the 1,700 currently in Send, representing an increase of 45%. Apart from being far too much for the area’s infrastructure, this is an excessive amount of development for one small Green Belt village.

Attached documents:

Comment: MM44 - LPMM18/5126  Respondent: Ann Smith 20842305  Agent:

• MM44 Land at Alderton’s Farm, Send Marsh Road Policy A63
• I object to the proposed new site for 120 homes, including some self build.
• This is a Green Belt site with no special circumstances so it contradicts policy MM9.
• Additional volume of cars will create delays and traffic jams on the Send crossroads.
• It will have an adverse impact on local infrastructure, the character and amenity of the area.
• It will remove an important natural corridor between Send and Send Marsh.
• As the name implies, this is low lying land and is frequently waterlogged.
• With the proposed sites at Garlick’s Arch, Clockbarn and Winds Ridge, it adds 770 houses to the 1,700 currently in Send, being an increase of 45%, which is far too much for the area’s infrastructure.

Attached documents:

MM44 The new Green Belt site at Send is not justified in view of the revised housing figures.

Attached documents:

Comment: MM44 - LPMM18/5560  Respondent: Elizabeth Mills 20850209  Agent:

MM41-Policy A43---MM42-Policy A58---MM44 Policy A63
MM9 Green Belt Policy
MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.

Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

Attached documents:
I object to MM44 – Land at Alderton’s Farm, Send Marsh Road - Policy A63 – the new site for 120 homes. I object to this because it is greenbelt land with no special circumstances and it contradicts policy MM9. Most people live here because it is greenbelt land. However, more practically, it will probably mean another 240 cars on the roads around the village adding to the existing congestion in the mornings and evenings. If these 240 are added to the cars that will belong to the massive development planned at Garlick’s Arch, it will mean a total of around 1540 extra cars on the road in Send. This is why people like me feel as strongly as they do. We do not want such a massive increase and is against the wishes of almost everyone who lives here.

Attached documents:

1. INTRODUCTION

1.1 Sustainable Land Products Ltd (SLP) has an interest at Tangley Place Farm, Worplesdon and has promoted the site throughout the local plan process as a suitable location for residential development.

1.2 Following the inspector’s comments on the hearing sessions, the Council were required to make several amendments to the plan which were then to be consulted upon. This consultation period has now begun and is scheduled to run from 11th September 2018 to 23rd October 2018.

1.3 These representations set out the particularly pertinent changes to the plan and provides some commentary on them.

2. POLICY CONTEXT AND BACKGROUND

2.1 The Guildford Local Plan was submitted to the Planning Inspectorate in December 2017. The examination hearings took place between June and July 2018, following which the inspector provided their conclusions to the Council.

2.2 The inspector’s conclusions on the plan confirmed that the stepped approach to housing delivery was inappropriate, raised concerns over the deliverability of housing within the early years of the plan and recommended that additional sources of housing delivery be identified to address this.

2.3 SLP welcomed this finding, having expressed the same reservations over the Council’s strategy to deliver its housing requirement and maintain a healthy supply of housing in the early years of the plan in their representations to the Regulation 19 plan.

2.4 In response, the Council has proposed a number of changes, including the allocation of four new green belt sites at settlements outside of Guildford. SLP will provide their comments on these allocations in the following chapter.
2.5 This was in addition to several modifications to the plan that were required to make the plan sound. This included, but was not exclusive to, the following key measures:

- accommodating 20 per cent of Woking's unmet need (MM2);
- reducing the Gosden Hill Farm allocation by 200 to 1,800 homes (MM35);
- increasing Burnt Common industrial floor space to 14,800 square metres to meet employment land needs (MM42); and
- a new policy (S3) to deliver regeneration in Guildford town centre (MM3).

2.6 In respect of the first bullet point specifically, SLP welcomes this measure, having expressed concerns in respect of the approach to unmet need set out in the submission plan. All other modifications to the plan are not relevant to our client’s interests and, therefore, we do not wish to make any further comments.

3. COMMENTS ON THE KEY MAIN MODIFICATIONS

3.1 To be clear, the specific modifications that SLP feels should be commented on relate to the new green belt sites that have been allocated to help address the shortfall in the early years of the plan. These allocations are contained within policies A61, A62, A63 and A64 and are set out below:

- **Policy A61**: Land at Aaron's Hill, Godalming (200 dwellings);
- **Policy A62**: Land at Hornhatch Farm, adjoining New Road, Chilworth (80 dwellings);
- **Policy A63**: Land west of Alderton’s Farm, Send Marsh Road, Send (120 dwellings);
- **Policy A64**: Land between Glaziers Lane and Strawberry Farm, Flexford (105 dwellings).

3.2 The Council have also identified an already existing site (Land at Garlick’s Farm) as being able to deliver an additional 150 dwellings over the plan period. This is, presumably, the result of the removal of employment space that was originally going to be delivered alongside 400 dwellings. SLP have no comments to make on this modification.

3.3 As can be seen, the Council has sought to address the shortfall in the early years of the plan by allocating additional sites at several locations across the district. Aside from the site at White Lion Walk, High Street, Guildford (Policy A60), all of the identified sites are within the Green Belt.

3.4 Combined, the identified sites have the potential to deliver around 700 additional dwellings over the plan period.

3.5 SLP has the following concerns with the approach of the Council. These are:

- The lack of contingency sites identified alongside the additional allocations; and
- The appropriateness of the locations chosen in sustainability and green belt terms.

**Insufficient contingency in the event of a housing delivery shortfall**

3.6 In previous representations, SLP has highlighted the disparity between past completions within the Borough and the annual housing requirement identified in the local plan. Since the examination, the latter figure has been further increased due to the need to take on some of Woking’s unmet need.

3.7 There is clearly a challenge to raise housing completions to the level required by the local plan. The reliance on large strategic and brownfield sites within Guildford mean that there are significant question marks around the deliverability
of these sites due to the need to provide infrastructure for the former (e.g. the A3 RIS) and potential viability issues with the latter.

3.8 Whilst we note the incorporation of a 20% buffer within the proposed housing target, SLP are concerned that the constraints within a significant proportion of the District i.e. Green Belt mean that any shortfall in delivery could not be easily met through speculative applications to boost housing supply.

3.9 Indeed, this has likely been one of principal reasons as to why there is such a disparity between the Council’s net completions over the past 10-12 years and their local plan target.

3.10 Paragraph 11 of the NPPF requires plans to positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. The Council clearly feel that the allocation of the above sites to be sufficient to address this shortfall; however, SLP does not feel that simply allocating more sites provides this flexibility, especially given that there will be no realistic scope to address any future housing shortfall until the Local Plan review stage due to the Green Belt constraints discussed above.

3.11 Whilst SLP is confident that the Council would seek to address any shortfall at the Local Plan review stage, the effect will have been to delay the delivery of housing that could potentially have come forward in the shorter term. This would be contrary to the NPPF’s goal to significantly boost the supply of housing (paragraph 59).

3.12 SLP, therefore, feels that it would be prudent for the Council to consider the inclusion of a set of ‘reserve’ sites that could come forward in circumstances where the ‘presumption’ was engaged (i.e. a deficient housing land supply position or poor performance against the Housing Delivery Test).

3.13 On the issues of Housing Land Supply, the adoption of the plan will not rectify the Council’s position overnight. The revised NPPF makes it explicitly clear as to what can and cannot be included as part of a Five-Year Housing Land Supply assessment. This definition is provided below:

“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”

3.14 Unless the Council is able to provide compelling evidence that the identified sites are deliverable in the short term, it is highly debateable that they would be able to deliver any sites in the early part of the plan period. This would also mean that progress towards addressing the existing shortfall would not be met until the middle part of the plan period which is precisely what the Council are trying to avoid with these allocations.
3.15 In short, any shortfall in housing delivery over the plan period (including the early years) could not be addressed through speculative applications in sustainable locations as these are affected by Green Belt constraints. Therefore, the Council should look to allocate reserve sites (inevitably located in the Green Belt) for development that could come forward in the event of such a shortfall being identified.

3.16 Whilst land at Tangley Place Farm was previously promoted alongside the land allocated as land north of Keens Lane (Policy A22), it would not be reliant on the delivery of the latter in order to come forward for development and certainly could assist in meeting a shortfall, should one arise. Thus, were the Council minded to produce a list of ‘reserve sites’, we would strongly encourage them to include Tangley Place Farm on such a list.

Are the proposed locations the most appropriate?

3.17 SLP questions whether the locations chosen by the Council are the most appropriate in both sustainability and green belt terms.

Sustainability

3.18 The Council has included sites at Godalming, Chilworth, Send and Flexford. Godalming aside, Chilworth, Send and Flexford have limited access to facilities and services and would likely require residents to travel into Guildford or other nearby villages to meet their day-to-day needs.

3.19 This is not to say that the sites chosen are inherently unsustainable; however, given that these sites are identified as ‘tier 10’ settlements in the Council’s Sustainability Appraisal, the sequential approach would dictate that sites within the Green Belt around Guildford (‘tier 9’) should have been considered in the first instance.

3.20 Large urban extensions are planned for Guildford (Blackwell Farm and Gosden Farm) as well as an allocation of 150 dwellings at Keens Lane (adjacent to Tangley Place Farm). However, only the latter (alongside some of the brownfield sites identified in the plan) would be expected to deliver any housing in the early plan period.

3.21 Guildford, being the most sustainable location for development (as reflected in the settlement hierarchy) also has the ability to deliver homes swiftly, particularly on non-infrastructure heavy, greenfield sites (such as Tangley Place Farm).

3.22 Indeed, demand at the locations identified by the Council is likely to be weaker than it would be within Guildford given access to services, facilities and employment opportunities that are absent from the surrounding villages. The sustainability credentials of a site generally correlate positively with its market desirability and, therefore, its potential for delivery. If the ambition is to identify sites that could be delivered early in the plan period, then a review of sites within the Green Belt around Guildford should have been the first port of call.

Green Belt

3.23 Furthermore, it is questionable whether the proposed locations are the most appropriate in Green Belt terms. Indeed, the sustainability appraisal conveniently summarises the four identified sites (paragraph 6.6.16). This extract is included at figure 1.
3.24 The SA echoes the findings of the Green Belt and Countryside Study which confirms that all but one (Aldertons Farm, Send Marsh Road, Send) are RED rated in terms of their Green Belt sensitivity. In short, they are proposing allocations on highly sensitive Green Belt sites that are no more sustainable than other available and deliverable sites.

3.25 Whilst Tangley Place Farm also falls within an area identified as being highly sensitive in Green Belt terms (parcel J4), this is the result of the site being assessed as part of a wider ‘cell’. Indeed, it is possible for areas within identified parcels to be of limited sensitivity when compared with others. We contend that this is the case for parcel J4.

1 This assessment considered the performance of each ‘cell’ against the five purposes as set out within the NPPF 2012. These did not change following the publication of NPPF 2018. It was assumed that all sites met the fifth aim (assisting in urban regeneration) and so the assessment only assessed performance against the other four purposes.

3.26 SLP has consistently argued that Green Belt boundaries should be reviewed around the north-western edge of Guildford more generally to accommodate a mix of housing and open space uses (including SANG) and reflect physical features that are readily recognisable and likely to be permanent. It is these physical features which should have dictated the land parcels identified for the purposes of the Green Belt review, rather than arbitrary areas based on field boundaries.

3.27 The Land at Tangley Place Farm benefits from such physical/defensible features which limit its sensitivity in Green Belt terms. These features constitute:
• an existing watercourse which bisects this parcel and would form a strong boundary along its western edge);
• important ecological designations and buffer zones affect the site within its northern half and this would ensure a robust northern boundary could established; and
• existing road infrastructure to the east and south which would secure these boundaries.

3.28 The concept document previously submitted with representations also shows how the delivery of development within the southern areas of the site (i.e. those most closely related to the built-up area of Guildford) the site can still contribute to the five key purposes of the Green Belt whilst accommodating some additional development. The site would also be able to deliver SANG as part of any scheme which has the potential to bring wider ecological benefits by relieving pressure on the Thames Basin Heath SPA.

3.29 The sustainability benefits of the location would make it a much preferable site to those sites that have been identified which are also rated as being highly sensitive in Green Belt terms.

Summary

3.30 Given that the ambition is to deliver homes in the early period of the plan, SLP objects to the Council’s decision to allocate sites that are inherently less sustainable and on highly sensitive Green Belt land when other viable options with better prospects of delivery exist (e.g. Tangley Place Farm).
Conclusion

3.31 SLP does not believe that the Council’s approach to simply identifying more sites provides sufficient flexibility to help deliver the required dwellings in the early years of the plan period. This is because the Green Belt constraints that affect almost all land within the borough mean that opportunities to address the shortfall through speculative applications are severely limited. SLP therefore object fundamentally to the simplistic approach taken by the Council.

3.32 In order to improve this flexibility, SLP feels that the Council should incorporate a set of reserve sites, alongside those that have been identified that could come forward in the event of a shortfall in housing supply.

3.33 SLP also objects to the sites that have been identified by the Council which are less sustainable and, with the exception of Aldertons Farm, at least as (if not more) sensitive in Green Belt terms than other viable alternatives (e.g. Tangley Place Farm).

3.34 The Council has missed an opportunity to review the Green Belt boundary in a sustainable location along the north-western edge of Guildford to accommodate a mix of housing and open space uses (including SANG) that could alleviate pressures on the Thames Basin Heath SPA and deliver housing during the early years of the plan period.

4. LOCAL PLAN REVIEW

4.1 Paragraph 33 of the NPPF 2018 sets out the requirement for Councils to undertake local plan reviews within five years of their adoption. This has the purpose of updating policies where changing local circumstances indicates a need to do so. This includes a specific reference to strategic housing policies which will require updating if local housing need has changed, or is expected to change, significantly.

4.2 The implications of the revisions to the standard method for Guildford’s housing need are not yet clear, although this would be applied as part of any Local Plan review.

4.3 The Council’s housing completions data are also a cause for concern given that they have been significantly below the required housing need of the plan. Furthermore, the Council’s reliance on large strategic sites to deliver much of its housing toward the middle/later stages of the plan means that there is the potential for a shortfall should there be any significant delays to one or more of these sites.

4.4 The progress of these sites and the Council’s performance against the Housing Delivery Test should be monitored closely to inform the Local Plan review. Should it be revealed that the Council is performing poorly against these and other various measures (Housing Land Supply, delivery trajectories at the key strategic sites etc.) then there will be a strong case for the allocation of further sites given that the Green Belt constraints within the Borough would essentially negate the ability for speculative development to take place in order to address any shortfall.

4.5 Land at Tangley Place Farm would be ideal for an allocation as part of such a plan review given that it would be deliverable, sustainable and allow for the creation of a long-term, robust, defensible Green Belt boundary.

5. CONCLUSION

5.1 SLP generally welcomes the findings of the inspector following the examination hearings and acknowledges some of the positive steps made by the
Council in response to his concerns. However, SLP objects to the lack of flexibility within the plan moving forward in the event that a housing shortfall is identified (a scenario which is not unlikely given the disparity between completions figures and the proposed annual housing target).

5.2 Whilst the allocation of additional sites is welcomed, the choice of these sites does not appear to be particularly logical given that more sustainable and less sensitive Green Belt sites are available and, therefore, more likely to be deliverable. Land at Tangley Place Farm is one such location.

5.3 Furthermore, the Green Belt constraints placed on land within the Borough means that there is no scope to address any identified shortfall in scenarios where the ‘presumption in favour of sustainable development’ would apply (e.g. deficient housing land supply position or poor performance against the housing delivery test).

5.4 SLP would, therefore, wish to see the incorporation of a ‘reserve site’ list to provide additional flexibility to the plan. This will ensure that sites can come forward to maintain a healthy supply of homes throughout the plan period should delivery on other allocated sites be slow or fail to come forward at all. Again, land at Tangley Place Farm could fulfil such a role.

5.5 Alternatively, it will be imperative for the Council to be positive at the Local Plan review stage for example, should circumstances dictate a requirement for a higher housing target and/or in the case of under delivery over the early period of the plan. In looking to address these potential issues, the Council will need to identify additional allocations, ideally alongside reserve sites, in order to ensure that housing can come forward consistently throughout the remainder of the plan period.

**Comment: MM44 - LPMM18/5956**  **Respondent: Helen Court 20859137**  **Agent:**

I would like to object to the changes proposed on the Guildford Local Plan and specifically on the following areas:

**MM44 Alderton’s Farm, Send Marsh Road A63**

This site has a proposal for 120 homes – it was previously in the plan and there were so many objections to it that it was removed and then suddenly slipped back in at the last minute in July. I don’t understand how all the previous objections can be wiped out as if they never existed?

This land is a Green Belt site, how can this come out of the green belt protection without a separate consultation before planning is applied for?

As a resident backing on to this land – we have a huge number of bats living in the trees in and around the fields – please could you assure me that a survey will be completed before any plans are approved?

This is a rural village area and this building work will detract from the heritage feel of the buildings around the green.
The traffic around our village is horrendous, the crossroads at Mays Corner are already congested – the addition of 240 cars in this one area will swamp the roads even more.

**Comment:** MM44 - LPMM18/6009  **Respondent:** Barratt Developments Plc (Giuseppe Zanre) 20863329  **Agent:**

### 7. Draft Policy A63

7.1. The vision for the Site is for the delivery of c.120 dwellings in line with proposed Policy A63, with the proposed retention of a central area of greenspace and the provision of a 14ha SANG adjacent to the Site. This off-site provision would enhance the ability of the residents of Send Marsh to interact with the natural environment and enjoy the 2.3km circular walk provided within the Site. This is shown indicatively in the accompanying proposal Brochure prepared by Lytle Associates (Appendix 1), and confirms that the required level of residential and natural development can be appropriately accommodated on Site.

7.2. Policy A63’s wording is limited in its descriptive capacity for the Site; however, it clarifies that this Site is allocated for approximately 120 homes (C3), including some self-build and custom house building plots; the requirements for development are (1) sensitive design at site boundaries that has significant regard to the transition from village to greenfield and (2) no unacceptable impact on trees and hedgerows; with opportunities presented by the development in terms of (1) green corridors and linkages to habitats outside of the site and (2) connections with services and facilities in the village.

7.3. BDW currently provide similar opportunities for custom build/self-build plots on their developments although via the capacity for allowing purchases to change, within certain limits, internal specifications if they purchase off-plan or reserve early in the build process. In this regard BDW suggests the Policy wording should be amended to include the proviso that self-build / custom house building plots should only be provided where possible and where the option is provided by the developer.

7.4. BDW has already undertaken site specific assessment in terms of ecology, landscape and heritage to inform an indicative masterplan for the site (see Appendix 1). Through careful detailed design it will be possible to ensure the development is sensitive, particularly at the Site boundaries to create an attractive transition between village and greenfield. This includes the potential for green corridors and linkages to be created to habitats outside of the Site.

7.5. The land at Allocation Site A63 is able to be brought forward in the first five years of the plan period. It is under single ownership with no legal or ownership barriers that could prevent the Site coming forward. BDW is one of the Nation’s largest housebuilders and it is envisaged that housing will be delivered on the Site within 18 months of a Planning Application being submitted.

7.6. Below is an ‘Indicative planning’ timeframe to demonstrate that within 18 months of submission of a full planning application, first occupations could occur and start delivering housing numbers to the Borough.

- Day 1 - Submission of full planning application for circa 120 dwellings and accompanying SANG
- Month 7 – signing of S106 and issuing of Decision Notice
- Months 7 - 11 – submission of information pursuant to planning conditions, approval of planning conditions and legal completion of Site
- Month 12 – Site start (residential and SANG)
- Month 15/16 – SANG completion
- Month 18 – first occupations

**Suitability of the Site**
7.7. BDW has a legal interest in the Site and there is additional land available for a SANG. The Site’s identification surfaced from the GBC’s ‘Green Belt and Countryside Study’ (2014) in which Send Marsh was identified as a potential “major village expansion site within the Green Belt within Guildford Borough” as the “sustainability credentials were considered to outweigh the potential; harm to the openness and purposes of the Green Belt”.

7.8. The Report cites the sustainability benefits of the village’s growth, in terms of new local centres, community halls, and amenity open spaces absent from similar villages in the Borough. The benefits of the established infrastructure network identified within this report are repeated within the 2014 study and the extension of the village is not considered to lead to settlement coalescence or historic setting, avoiding a compromise of Green Belt purposes 2 and 4.

7.9. The 2014 SHLAA completed in support of the Draft Plan identified a deliverability timeframe of the site of 0-5 years stating that the future development of the site would be suitable if sufficient deliverable home outside of the Green Belt is not identified.

7.10. As stated, the assessment of the Site found that the Site has good transport links and will ensure the ongoing sustainability of the village through the provision of additional housing, a SANG and a provision of Affordable dwellings. The design of any development would need to account for the surrounding Green Belt location, as well as accounting for any existing biodiversity on the Site through surveys and mitigation as appropriate.

7.11. A Transport Assessment was completed as to the suitability and safety Send Marsh Road for a residential development on the farm site itself in 2013. A site-specific Transport Assessment will be completed for this scheme although several conclusions can be drawn from the adjacent assessment. The Site’s access will utilise the field existing access point with the development entering Send Marsh Road. The Report finds that the Site is acceptable by a variety of modes of transport with the potential to reduce reliance upon the private car. This Conclusion has arisen due to the Site’s proximity of bus stops and wider connectivity with railway hubs as well as the lightly trafficked roads in the vicinity of the Site ensuring that cycling is a reasonable alternative to travelling by private car.

7.12. An Archaeological study and Heritage Assessment were completed in 2014 to better inform the evolution of the residential development on the Site. There are seven Grade-II listed buildings within 500m of the Site with the closest, Alderton’s Farm, located on the plot of land adjacent to the Site.

7.13. In response to the Indicative layout shown in Appendix 1, the Heritage Assessment Concludes that the development cannot be regarded as caused substantial harm to the Alderton’s Farmhouse, or its setting. The Assessment states that ‘there is no or extremely limited intervisibility between the listed building and the Site, and weak evidential and historical association’.

7.14. The Scheduled Ancient Monument (SAM) located 350m from the Site boundary will also not be affected. The low density development proposed on the western part of the site will be screened by dense planting and will have minimal impact on views of the aforementioned monument. The assessment finds that the provision of much needed housing including Affordable housing, in a sensitive manner and location outweighs the less than substantial harm caused to the surrounding designated heritage assets. The archaeological assessment concludes that the Site may have Medieval or prehistoric archaeological potential; however, the impact on the SAM is likely to be low due to the proposed planting, separation and proposed density on the relevant boundary. On this basis, the impact on Heritage would be limited and can be mitigated through a sensitive design and layout.

7.15. In terms of Ecological constraints within the Site, an Ecological report was completed which was found to support Low ecological potential. The Report stated that the semi-improved grasslands which dominate the site are species-poor and of low ecological value. However, the large trees along the western boundary are likely to form a habitat resource for a range of species; these would be retained as far as possible as part of the master planning for the Site.

7.16. The existing hedgerows provide potential for bats, birds, badgers and invertebrates and a pond within 250m of the site may have potential for Great Crested Newt habitats. Further ecological assessments will be undertaken and biodiversity enhancement measures will be incorporated into the development to ensure minimal impact on biodiversity results from the scheme. The Report states that the habitat creation and enhancement within areas of open space could deliver substantial benefits to the overall ecological value of the Site and so the impact on local biodiversity will be appropriately mitigated and would not preclude development of the Site.
7.17. Discussions were held with Natural England regarding the proposal inclusion of the SANG adjacent to the residential element of the scheme. NE stated that, following review of a revised SANG plan, the Site offers the potential to meet all of NE’s SANG guidelines, including the requirement for an uncontrived circular walk of 2.3-2.5km. NE advised therefore that the proposed bespoke SANG is acceptable ‘in principle’.

7.18. Regarding Landscape Impact, a preliminary Landscape Appraisal was prepared in 2014 by David Williams Landscape Consultancy to support the formulation of a landscape-sensitive scheme on the Site. The appraisal assessed Site visibility, trees, access, landscape character and landscape planning and was accompanied by a constraints/opportunities plan. The assessment arrived at the following conclusions which will be used to inform the master planning of the Site:

- The proposal to include land to the west as SANGS land would be seen as a benefit to the scheme.
- The Site is surrounded by defensive boundaries with partial visual enclosure. The Site is relatively unconstrained in environmental capacity terms.
- Any hedge removed to create any additional access width should be replanted to maintain the character of the road on the approach to Send Marsh.
- There are opportunities to increase tree cover and enhancement wildlife/habitats within the Site.
- Views from the surrounding area are limited due to low lying topography and a natural containment of the Site by housing to the north, east and south and a tree belt to the west.
- The Site is devoid of any other significant vegetation aside from grassland and boundary trees/hedgerows.
- Careful consideration should be given to the density, scale and type of development within the Site; additional planting could be provided along the Site’s boundaries to reduce views and minimize the likely visual effects.
- The option of providing further internal planting should be explored to create a suitable attractive and pleasant landscape environment for residence.

7.19. Overall, the 2018 Local Plan’s Main Modifications and the October 2018 addendum to the Land Availability Assessment (LAA), supported by the Green Belt and Countryside Study (2014), found that the Site is suitable for housing development and that the development could be delivered within the first five years of the Plan Period, subject to other considerations being fully addressed. The Technical Reports prepared thus far do not raise any significant issues that will delay the delivery of the site or submission of the Application.

7.20. Any assessment of land availability to identify a land supply for the future delivery of housing needs to ensure that the Site is not only suitable, but also available and achievable. The October 2018 LAA addresses these items in limited detail, however the Planning Practice Guidance does offer further direction as to how availability and achievability can be assessed, this is confirmed below;

**Availability**

7.21. The PPG (Ref ID: 3-020-20140306) identifies that “a site is considered available for development, when, on the best information available (confirmed by the call for sites and information from landowners and legal searches where appropriate), there is confidence that there are no legal or ownership problems…”

7.22. The Site ownership is listed as available for development with the delivery record stating that the Site is under the control of BDW.

**Achievability**

7.23. The PPG (Ref ID: 3-021-20140306) states that “a site is considered achievable for development where there is a reasonable prospect that the particular type of development will be developed on the site at a particular point in time”.

7.24. Similarly, BDW will likely complete the development within 3 years of the submission of an Application. The LAA is realistic in its assumption that the development could be achieved within the next five years given it is already within the control of a house builder who is seeking to submit a planning application to the Council following the adoption of the Local Plan. This is concurrent with the previous 2014 estimations of delivery timescales on the Site.
Summary

7.25. The Site is a tier three settlement (large village) that is located in a sustainable location, is suitable, available and achievable, and therefore deliverable over the Plan period. Given the deliverability of Land to the West of Alderton’s Farm, the sustainable location of the Site, and the identified shortfall in meeting its five year housing land supply requirement, GBC are supported in including this site as an allocation. This will help to ensure that GBC meets its housing need over the Plan period, and that Send Marsh remains a sustainable settlement with an area-defining area of open space that would be an extremely convenient alternative to the Thames Basin Heaths Special Protection Area (TBH SPA) for future residents of the new homes as well as being wholly accessible for the residents of Send Marsh.

7.26. The management of the Site once it is designated as a SANG, which would be privately managed, would bring significant nature conservation enhancements not otherwise enjoyed by the site at present. Furthermore, the SANG would ensure the ongoing preservation of the TBH SPA by preventing a potential increase in visitor pressure having a significant detrimental effect on its integrity. Indicative plans show that the SANG would provide visual variation and interest, and the linkages to the area’s extensive footpath network would be of benefit to the residents of neighbouring villages of Send, Ripley and Pyrford.

Sustainability Appraisal

7.27. The 2018 Sustainability Appraisal (SA) addendum on the proposed Main Modifications of the Guildford Local Plan is supported in principle on the basis that it recognises in the assessment of Send Marsh generally that it shows greater potential than other village Green Belt sites to direct housing growth and in transport / sustainable development terms.

7.28. The SA also clearly recognises Send Marsh as having three potential sites to which direct growth; the SA rules the site at Land South of Tannery Lane (50 dwellings) as least preferable, with Land at Polesdon Lane/Send Marsh Road (50 dwellings) and Land West of Alderton’s Farm (120 dwellings) proving most appropriate. The combination of these two remaining sites is deemed as problematic due to delivery risk and in-combination effects on local heritage. The smaller, Polesdon Lane/Send Marsh road site is located within red-rated Green Belt within proximity to listed buildings and a SSSI although distant from a local centre of bus services.

7.29. Land west of Alderton’s Farm, is similarly in proximity to heritage and ecological assets but comprises amber-rated Green Belt and better located for wider transport links. The SA recommends that walking/cycling links at Alderton’s Farm, including to Send Primary School and the GP surgery, and to the bus services on the Portsmouth Road are given consideration.

7.30. The 2018 SA addendum outlines GBC’s preferred option (3) for additional housing allocations, in-light of alternatives presented. Option 3, as stated previously, combines a larger development at Aaron’s Hill, Godalming (200 dwellings) with a package of smaller extensions to villages associated with strong delivery certainty.

7.31. The Site specific assessment of Option 3, as conducted as part of the 2018 SA addendum, assesses the Site against all Sustainability Objectives, and concludes that of the 17 objectives, whilst numerous elements are deemed to be positive (most preferentially under the headings of housing and brownfield) or the impact could be resolved dependant on strategy or Policy, only two are considered to register tensions with the objective, transport and climate change. The same order of preference applies to these two topics due to the broad focus of their discussion, namely access to key destinations; it is here that larger settlement extensions are preferred to smaller village extensions.

7.32. Overall, the SA supports GBCs proposed package of sites within preferred option 3, and BDW Supports its Conclusions that it represents sustainable development with the ability to avoid or mitigate any harmful effects (and capitalise on opportunities) through the development management process.

Benefits

7.33. The delivery of the Site will assist in addressing existing, established social and infrastructural deficiencies in the community through providing a SANG and enhancing the existing Public Right of Way network.
7.34. The delivery of the Site will ensure that the growth of Send Marsh is in line with its historic and projected population growth, ensuring a sustainable level of growth and the continued health of Send Marsh as an important satellite settlement to the larger settlement of Send.

7.35. Allocation of the Site will help to ensure that GBC meet their housing target, delivering homes within the first five years of the Local Plan,

7.36. Overall the Allocation and development of land to the west of Alderton’s Farm for c.120 new homes presents an excellent opportunity for both the delivery of market housing, affordable housing, and the enhancement of community and biodiversity infrastructure to Send Marsh.

8. Conclusion

8.1. These Representations have been prepared by BDW in light of land to the West of Alderton’s Farm, which provides the opportunity for delivery of a residential-led scheme providing:

    • c. 120 new homes, with 40% affordable housing.
    • Provision of 14ha SANG with sensitive landscaping features and connections to existing PROW network

8.2. Send Marsh is located within Guildford Borough. The majority of GBC is covered by a Green Belt designation with two of the largest urban areas (Ash and Guildford) enveloped by Green Belt. Whilst this does leave other urban areas outside of the Green Belt, achieving balanced growth across the District, and ensuring the continued sustainability of existing settlements located within the designation, will not be possible to achieve without a level of development occurring within the Green Belt itself.

8.3. In order to ensure that any development that occurs in the Green Belt is sustainable, it will need to be closely located to the existing settlements and settlement boundaries and ensure that any development has a minimal impact on the Green Belt, both in a local sense and with regard to the impact of any development upon wider views.

8.4. The proposed Allocation of land to the West of Alderton’s Farm for the development of approximately 120 dwellings and provision of a 14ha SANG represents sustainable development that will have a minimal harmful impact upon the Green Belt and will ensure the continued health and sustainability of Send Marsh as a settlement. GBC has assessed the Site and examined the impact development on the Site will have on the Green Belt. All of the analysis has led to the Conclusion that the Site should be included, and this stance is wholly Supported by this Representation and BDW.

8.5. Overall, the Site has been assessed appropriately, and the inclusion of land to the west of Alderton’s Farm for the development of housing is Supported in the proposed Policy A63, which is backed up by the evidence base prepared by GBC, scrutinised and modified by the Planning Inspectorate and added to through this representation.

8.6. This Representation Supports the Allocation of land to the west of Alderton’s Farm, as it is a positive step that will help meet a recognised need for market and affordable housing across the District, and will help to deliver a sustainable level of growth to Send Marsh whilst providing a substantial area of open space that would be an extremely convenient alternative to the TBH SPA for future residents of the new homes as well as being accessible for the residents of Send Marsh.

8.7. BDW can confirm that the Site is achievable and available, and are confident that it will be delivered within the next five years.

Barratt Developments Rep_Redacted.pdf (7.2 MB)
Can adding a new Green Belt site at Flexford be justified in view of revised figures?

Attached documents:

---

I object to the proposed amendment to MM45 Policy A64 a plot of land in previous applications known as land to the East of Glaziers Lane, Normandy not actually Flexford at all.

- What are the exceptional circumstances needed for removing this land from the sensitive green belt? The openness of this area is very important to see and for our wildlife who need corridors of land to move freely in and not squeezed into small areas where they can’t flourish.
- Previous applications for a much smaller number of housing have been refused by Guildford Borough Council on the grounds it is in the green belt. One application for 9 houses I believe was refused only last year. Therefore how can GBC suddenly want to build 105 homes?
- Access to this site will be from Glaziers Lane which is classed as a ‘D’ road with a hump backed bridge just metres away. Glaziers Lane is used by many lorries that cannot use Westwood Lane at they are too high for the railway bridge there. They come thundering over the Glaziers Lane bridge which has a slight bend on it and with up to a possible 200 cars (let’s be honest most homes have on average 2 cars some with young adults may have more) coming out onto this D road it would be disastrous. Also the pavement straight after the hump back bridge (heading towards the Drs Surgery and this proposed development) runs out and pedestrians have to cross to the other side of the road, another huge danger.
- If there is not enough parking for the 105 houses which typically there is not nowadays on new build estates and especially no room for visitors then people will start parking along Glaziers Lane which will make it again very dangerous when cars come over the hump back bridge. We are currently having new pavements laid on Glaziers Lane what we don’t want are cars parking half on the pavement and half on the road wrecking the new tarmac and making it unsafe to walk on.
- The Thames Basin Heath Special Protection Area has been identified as an internationally important habitat for four rare species of bird - the Dartford warbler, woodlark, tree pipit and nightjar. Natural England believes that recreational use of the heaths arising from housing developments up to five kilometres away from a SPA will create disturbance to rare bird populations especially as many are ground nesting and easily disturbed.
- I believe the landowner of the lake area of A64 (where the plot is divided by a public footpath) does not want to sell his field? Is GBC compulsory buying land now? It would be criminal to fill in this man-made lake which is 25 year old now and well established. It has become a vital source of water for wildlife especially in a hot summer like we have just experienced. A watering hole for foxes, badgers, kingfisher, and numerous birds. The Great Crested Newt has been found on the SNCI at the Little Flexford Flaxpond just over the railway line and in a pond at Passengers farm not too far away. Great rested Newts are land and water amphibians so are more than likely in this lake as well and they are a Protected Species. We are lucky enough to have barn owls nesting about 400 metres away and this year they succeeded in fledging 5 young. They use the fields around them to hunt for voles and mice and likely to drink from the lake. Many of the streams on the side of the railway bridge A64 dry up in the summer months so taking away this oasis would be criminal.
To fit 105 homes on this small plot of land one assumes you are thinking of some flats which would be very out of keeping with the area.

There would be no community benefit to having 105 homes on this land. Instead there will be more stress on the sewage and water pipes of an already fragile area.

The part of the field that abuts Glaziers Lane is under water much of the year as it is on the flood plain and is on clay soil. This will be most unsuitable for housing and gardens if they are given any.

Comment: MM45 - LPMM18/1949  Respondent: Mrs Fiona Curtis 8570273  Agent: Mrs Fiona Curtis

This new site for 105 homes in red-rated Green Belt has not featured in any previous public consultation on the Local Plan. It would increase by 7% the number of dwellings in Normandy Parish, and would place considerable strain on an already inadequate road and sewerage infrastructure in Glaziers Lane. By extending the Flexford settlement boundary north of the natural break of the railway line it would also start to eat into the open space between the distinct settlements of Normandy and Flexford, and damage the openness of the Green Belt in this area. In addition to the sensitivity of the site itself no “exceptional circumstances” have been demonstrated that would justify removing it from the Green Belt. There are also serious doubts about the ability of the site to deliver houses early in the Plan period, which is the sole justification for its inclusion at this late stage.

Attached documents:

Comment: MM45 - LPMM18/1215  Respondent: Burpham Neighbourhood Forum (Jim Allen) 8581505  Agent: Policy A62 /A63 /A64 new sites

Aside from being located in the Green Belt, these policies make no mention of infrastructure requirements such as roads and sewer capacity on any site or the specific requirement to provide meaningful upgrades to the existing infrastructure.

3. Rows A61 – A64
We note all these sites are further releases of Green Belt land rather than finding increased capacity in urban areas. The additional capacity is akin to one year supply (672) not five (3,360).

Attached documents:

Comment: MM45 - LPMM18/4904  Respondent: The House of Commons (Jonathan Lord MP) 8583137  Agent: Ref. MM45, Policy A64.

I write as the Member of Parliament for Woking. My constituency includes (and has always included) the Guildford Borough village of Normandy.
Specifically, I write to OBJECT strongly to the above Proposal and I would respectfully request GBC to remove site A64 from the revised draft Local Plan.

In doing so, I concur with the reasons set out in the email that I enclose below by Normandy's County Councillor Keith Witham.

Thank you for taking my views into consideration in this consultation. I am sure you will have received many further submissions from the residents of Normandy, who are very concerned about the likely impact of this proposal and who wish to retain all the Green Belt land that makes their village such a pleasant place in which to live.

----------

I OBJECT to this Proposal and ask GBC to remove site A64 from the revised draft plan.

My main concern is the effect of this proposed development site for 105 new homes are the effects on traffic, road safety and congestion. Glaziers Lane is a "D" road and over 100 new homes would add at least 150 cars onto the local roads daily.

The 'exceptional circumstances' that are needed to redraw the Green Belt boundary in Normandy have not been shown.

GBC should further review the overall housing number in the Local Plan as the current number may be exaggerated, failing to take into account the latest housing projections from the Office of National Statistics, which suggest the numbers in the Plan are overstated by 45%.

The lack of a convincing justification for site A64 in particular suggests that it was inserted just to respond to the Inspector's challenge, taking no account of the circumstances of its location.

A large part of site A64 is a fishing lake and it is not even clear that all of it is even available for development.

The road and sewerage systems in Normandy are already stretched and 7% more houses - all to be built over a three-year period - will create a significant additional burden.

Although included as a 'Main Modification' to the Local Plan no accompanying improvements to infrastructure are suggested. There are no existing facilities in Flexford and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality. This site only places long term strain on the community without conferring any community benefit.

I believe that Normandy residents have shown in their responses to previous Local Plan consultations that they clearly want to preserve the rural nature of the Normandy/Flexford community.

Comment: MM45 - LPMM18/1622  
Respondent: Peta Malthouse 8596673  
Agent: Normandy Local Plan. Main Modification 45 dealing with Policy A64  
PLUS  
Objection to the ONS number put forward as MM2 is out of date and I wish to call for the issue to be examined by the Inspector and the Inquiry to be re-opened  
I write to OBJECT to the above proposed amendment to the plan on the following grounds  

General Introduction
1. I note that for some reason the land is now being described as ‘Flexford’. It is not. The administrative area under the control of Normandy Parish Council consists of 6 hamlets washed over by the green belt. These are Flexford, Christmas Pie Wyke, Normandy, Willey Green and Pine wood. The clear and enforceable boundary for Flexford lies alongside the railway line. This land has been the subject of several applications refused for green belt status and the sensitivity of the area. It has always been described as ‘Land to the east of, Glaziers Lane, Normandy, GU3 2EB’ it cannot be described as a ‘village extension’ or be justified as an extension of Normandy. It is not in the settlement area (recent previous application 17/P/01413).

2. The land consists of green fields previously used for grazing and farmland. I believe it is designated Red Farmland or Grade 3 which should not be used for development according to Government guidelines. *

3. The land includes a lake. Close by to this lake is one other Flax Pond where Great Crested Newts live. That pond and surrounding land is an SNCI designated for the presence of a colony of Great Crested Newts and water voles. It is not unreasonable to record there is a high probability that the newts thrive in this lake also. They are migratory. (see below **) Great Crested Newts are a species protected by EU Law.

**Travel constraints**

4. Access to the site relies on an entrance off Glaziers Lane which at any point in my view would be dangerous. Glaziers Lane, a D Road, is already a busy cut through for traffic wishing to pass from the A322/A323 and A31/A3. There is no height restriction and as a result it takes most of the lorry traffic as opposed to Westwood Lane. The bridge over the railway is hump backed and squint. Lorries move into the centre of the road in order to pass over it and at speed.

The proposal to add a junction to the A31 slip road joining the A3 will further add to the problems as traffic is backed up as stated above already from the junction between A31 to A3 and this will just add to the problem (Policy MM37 Land for access road between A31 Farnham Road and Blackwell Farm, Hogs Back, Guildford).

5. It is proposed to put 105 dwellings on this site. At minimum one could expect this to generate 210 further cars fighting to either get on the A323 or the A3. Although it will be close to Wanborough Station, access to the station is only achieved over the railway bridge to the south with a further bridge to be crossed once on the platform. Safety for pedestrians is an issue which is why most either get dropped off at the station in cars or park there. The car park is very small with only space for about 10 cars to park. There is no spare land either to provide pedestrian access from the road or provide further parking for cars.

6. Facilities for primary school, doctor’s surgery, and village hall are all situated 2KM away encouraging further car use. There are no shops, pub or garage in the Parish except for Hunts Hill Farm in Normandy which sells its own organic meat. Nearest shops are in Ash Wharf and Fairlands both 5KM distant.

7. Even though the County Council have recently carried out high quality maintenance of the path from the Normandy Crossroads to the station the pathway is only one sided over the bridge and requires pedestrians to cross over at a point adjacent to this land. Again, pedestrian safety has always been an issue.

8. There are infrequent bus services to or from Flexford which has only a skeleton service.

9. The Wanborough train service involves half hourly service at peak times and hourly outside those times. Until a few years ago there was no service on a Sunday at all.

10. Both the A323 and A31 which are the roads that lead in and out from Flexford are full. The A323 has been assessed as such by SCC approximately 2 years ago. The A31 to Guildford is often at standstill from the A31/B3000 junction which serves Flexford. The A323 is often backed up to the Normandy Xroads leading to Guildford in the am. When an accident occurs on either road it is not unusual to be gridlocked on both Westwood Lane and Glaziers Lane.

The heaviness of the traffic has increased more than usually expected after the Summer holidays along the A roads and one has to assume that this is due to the new developments in Aldershot (3850 new homes in first phase under construction) and at Deepcut (1450 new homes presently under construction) on Ex-Army Land. On top of this the frequency of traffic down both Glaziers Lane and Westwood Lane again at speed is noticeable since the end of school summer holidays as cars held up in jams on the A roads seek alternative routes. There aren’t any.
General Infrastructure

11. There is one farm shop 'no pub or petrol selling garage. Ownership of a car is pretty well essential. The Christmaspie cycle trail is not one that can be easily used for work. It is mainly scenic and meanders through Wood Street Worplesdon and Park Barn. The roads/pathways in very poor condition therefore it is not used for that purpose and was not intended to be so

Flooding

12. An assessment has been commissioned by GBC of Flexford because of the habitual flooding and back flush experienced by those who live in the area. The ponds and lakes that feature along the length of the railway line at this point are key to the fact that the drainage of the land is assisted by a number of streamlets leading into the Hoe stream. The car park at Wanborough Station is often under water. Committees to address the general floodwater problems in the area have been chaired by our MP Jonathan Lord over the last 5 years during which time it has emerged that the soil pipe which serves properties along Glaziers Lane is only 4inches in diameter. As far as I am aware Thames Water have no plans to increase the size of the soil pipe and other drainage facilities. At times overflows/flooding into ditches at Manor Fruit Farm have caused Environmental Pollution events to occur. This proposal would add to the outflow of sewerage. The land concerned does not presently flood to my knowledge during Spring/Summer months but any building on this land will interfere with natural drainage and pose further stress to an already barely adequate public sewer

Wildlife Habitat

13. The site is situated approximately 2KM from areas designated SNCI at Wyke Church and Normandy Common and less than 2.2KM from the Thames Basin Heath and SSSI. It is also adjacent to the SNCI **incorporating the Flax Pond. This was designated SNCI because of the colony of Great Crested Newts which are a protected species under EU Law. The site is an extremely important area for habitat and in my view, it is disingenuous to suggest that by developing it one opens up the area for a green corridor… you are reducing it!! and cutting down the migratory opportunities for wildlife in the area of Ancient Woodland situated directly opposite to the west of Glaziers Lane i.e. Pusseys Copse

14. As stated above *. Traditionally this land has been used for grazing farm animals and is designated Grade 3 or Red farmland. Govt guidance states this should not be used for development. Industry forecasts show that the market value for such land as farmland will increase over the next five years because of the impact of Brexit

Reasons to develop in the greenbelt

15. There appear to be no reasons given in this plan to explain the intention to depart from the Guidance given in the NPPF. This parcel of land was described in the original supporting documentation as H10 a necessary retention of greenbelt status to ‘prevent Normandy Wood Street and Flexford from merging’ That remains the case. Given the proposals to inset Normandy and thus extend the settlement area this proposal seeks to merge Normandy and Flexford. The proposal in it’s size represents a 7% increase in households in the Normandy Administrative area quite apart from the additional land made available for development. It also unacceptably extends the development area towards Wood Street thus destroying the openness of the greenbelt as a whole. The administrative area of Normandy forms the only realistic buffer between the town of Guildford which sprawls into Worplesdon and Aldershot which overflows into Ash

‘Once established, Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans. Strategic policies should establish the need for any changes to Green Belt boundaries, having regard to their intended permanence in the long term, so they can endure beyond the plan period. ’

NPPF
No such reasons are given despite the fact that the land in question satisfies each and every one of the 5 examples of the ‘five purposes’

16. In contrast land is being set aside in Ash as follows and many of the reasons given for this exceptional step apply to the land East of Glaziers Lane

Comment: MM45 - LPMM18/2675  Respondent: CPRE Surrey Branch & Guildford District (Tim Harrold) 8607169
Agent:

PROPOSED 105 HOUSES FOR NORMANDY LAND BETWEEN GLAZIERS LANE & STRAWBERRY FARM, FLEXFORD

As Chairman of CPRE Guildford, I have become very familiar with Normandy over many years, and in order to keep up to date I went for a walk on 19th October to review the location of this proposed site. This involved me accessing the nearest public rights of way in proximity to its main lake and included a visit to the railway bridge overlooking the station and the countryside on both sides of Glaziers Lane. I felt it to be important also to assess the impact of other local development and of the steadily increasing traffic on Glaziers Lane, and at Wanborough, the A31 along the Hogs Back, and the A323. All of these roads will be severely affected by any further development growth along the lines proposed. It should be recalled also that Glaziers Lane has a "D" classification.

It was interesting to note the dryness of the clay soil as a result of the warm summer and autumn. Any new development would of course have to take account of the possibility of flooding problems during at least the winter and spring months. Development along the lines proposed would have a major impact on the current sewage system which is inadequate. It is a daunting prospect to consider when and how the sewage pipe under Glaziers Lane will need to be replaced. The road regularly requires attention owing to its vulnerability to the weight of heavy lorries that progressively damage its weak foundations.

I was present also at a very well attended meeting of the Parish Council on 2nd October at which I spoke together with the local MP, and the relevant Guildford Borough and Surrey County Councillors. It was interesting to note the overwhelming vote against this proposal from the estimated 200 people present.

To any visitor to the proposed development site in daylight hours, one is immediately conscious of the noise disturbance from the heavy equipment needed for concrete crushing and soil distribution at the neighbouring Backhurst facility. Bulldozers and diggers are constantly at work and would make living in any new development in their vicinity very unattractive. Additionally, it needs to be borne in mind that access to the proposed building site is located dangerously close to the Wanborough Station bridge. Because the site proposed is higher than housing on the other side of the road, car headlights will cause light pollution at night through the bedroom windows of houses facing the road as they drive to and from the new development. The amenity of those living opposite the estate entrance will be severely affected. It would appear that these major problems have not been adequately considered.

The presence of the lake is important to the wildlife in this area and to those lucky enough to have the chance to fish for carp in its water. Bats and owls have been seen in this location and should be protected. Deer are often present. I am informed that the owner has no intention to allow it to be sold and those who value the environment in the Normandy community will welcome this decision.

Describing the proposed site as a "village extension" is misleading. 105 houses represents a 7% increase in the number of dwellings in Normandy and Flexford. The site was not included at any time within the SHLA. It is highly sensitive Green Belt land outside the settlement of Normandy and should be protected. GBC has failed to indicate the "exceptional circumstances" that are needed to redraw this Green Belt boundary. We question whether it is desirable to allow the expansion of Flexford North of the railway line and to encourage linear sprawl that will link this community with
Normandy. It is also likely that the height of the buildings envisaged will be visible from the Surrey Hills Area of Outstanding Natural Beauty along the Hogs Back which is an undesirable outcome that should be avoided. It also appears probable that the development proposed will be unsustainable.

In the light of this letter and the reasons included in it, I hope that it will be clear that this site should not be approved as appropriate for consideration as a Main Modification to the GBC Local Plan. In our view, it seems unlikely that it should be considered in this context as we believe it involves land that will not be available within the next 5 years which invalidates its selection for consideration. CPRE therefore strongly objects to this proposal and urges that it be rejected as a Major Modification to the GBC Local Plan 2018.

**MAIN MODIFICATION 45 (MM45): POLICY A64**

**PHOTOGRAPHS OF LAKE**

I have already sent in an Email submission dated 19th October objecting to Main Modification 45.

Unfortunately, I was not able to gain visual access to the lake on my visit that Friday as the neighbouring rights of way which I used did not permit me to evaluate how attractive this landscape feature is.

I have now received the enclosed photographs of the lake which illustrate just how damaging it would be to the local environment if this Green Belt landscape were to be altered as a whole or in part to make way for the proposed new development.

I understand that the owner of this land wishes to maintain the lake as a spectacular feature of the rural environment which he and we value.

This would appear to indicate that the viability of the suggested development will be adversely affected. Accordingly, CPRE therefore questions whether it will be possible to implement the current proposal in its present form and during the time period a located.

We therefore urge that this modification to the GBC draft Plan is rejected and permission refused for it to proceed, bearing in mind not only its environmental aspect but also the other objections given in our separate email correspondence dated 19th October.
With no up-grade of the sewer system in Glaziers Lane this would be a catastrophic mistake to build 105 houses on this site. I'm sure you are aware of the sewer pipe under Glaziers Lane is 160mm/5" in diameter, which at the present can only just cope. Two hundred and ten extra toilets using this sewer pipe would be disastrous.

Glaziers Lane is a D-class road which in layman's terms means it has no foundations, so the road surface is always sinking in various places. The extra traffic would cause no end of problems.

The proposed site is very near to 'Backhurst' who supply soil and crush concrete. This site creates lots of noise during day light hours with bulldozers, metal buckets and diggers banging and crashing throughout the day, so these fields act as a sound buffer. It would be very thoughtless to build house so close to this site.

A turning into the proposed housing site would be very dangerous considering how close it would be to the Wanborough Bridge. Also, car headlights coming out of the site would illuminate the bedrooms on the other side of the lane because the houses are built lower to the level of the road. This would be very unfair on those residents to endure such a torment.

The 2-proposed fields for the 105-houses would block-out the view from the road of the old brickworks chimney, which is of historic importance because most of the bricks that built Guildford Town came from this site.
One of the proposed fields put forward for luxury houses involves a beautiful lake, which is teeming with wildlife. This would be sacrilege to destroy such a delightful area. I would ask you come and visit this secret oasis in the heart of Normandy and see for yourself. A natural spring from the Hogs-Back feeds a stream near by and also the lake. To eradicate such a jewel in the crown of Normandy would be a crime against humanity.

The Aldershot to Guildford Road (A323) is a nightmare in the rush hour and once again needs widening to help with the flow of traffic through Normandy.

Attached documents:

Comment: MM45 - LPMM18/1911  Respondent: Sir Michael Aaronson 8687041  Agent:

I wish to OBJECT to the inclusion of this site as a Main Modification to the Submitted Local Plan, on three counts:

1. GBC has not demonstrated the “exceptional circumstances” that would justify redrawing the Green Belt boundary in this area.
2. Development on this site would have severe adverse implications for the communities of Flexford and Normandy, which have not been addressed in the proposal.
3. This site is highly unlikely to contribute to the early delivery of housing, which is the sole rationale for its inclusion as a Main Modification.

Lack of “Exceptional Circumstances”

As I have argued in my comments on MM2, Policy S1, the latest version of the Local Plan needs re-examination in the light of the latest household formation figures issued by the ONS in September. These indicate that the housing number of 630+42 underpinning the Plan is greatly exaggerated. This radically undermines any justification to use the argument of “exceptional circumstances” to take this site out of the Green Belt.

Furthermore the A64 proposal fails to do justice to the extreme sensitivity in Green Belt terms of this particular location, which acts as part of the buffer between the settlements of Flexford and Normandy and makes a substantial contribution to the openness of the Green Belt in this area. Building on this site would increase the size of Normandy by 7% and would open the floodgates to further urbanisation north of Flexford and south of Normandy.

The site is proposed as a ‘Village Extension’ into the Green Belt, redrawing the boundary of the Flexford settlement and relocating it to the north of the railway line that currently contains it. At present all the land between Flexford (to the south of Normandy Parish) and Normandy (to the north) is classified as Green Belt. Previous applications for planning permission on land to the east of Glaziers Lane have stressed the damage that would be done to the openness of the Green Belt if development were permitted here. Ironically these include two unsuccessful applications for development on part of what is now site A64 (16/P/01452 and 17/P01413). These are for substantially smaller developments than the one that is now proposed: for 42 and 9 homes respectively.

Planning Officers have also drawn a distinction between block-style development such as characterises the settlement of Flexford and the linear development that characterises Glaziers Lane and most of the settlement of Normandy. A dense development of 105 houses on A64 would sweep aside this distinction and introduce inappropriate development into a presently open area. Furthermore this would be the thin end of a much longer wedge: once A64 had been developed it would strengthen the hand of the developer seeking to build on the southern part of the now abandoned site A46 (also north of Flexford over the railway line, but to the west of Glaziers Lane), plus that of other developers seeking to build further north on, and to the rear of, Glaziers Lane. In other words, taking A64 out of the Green Belt would presage the end of Normandy and Flexford as two separate settlements with open space in between, and would kick start the effective urbanisation of the whole area.
I therefore OBJECT in the strongest possible terms to the over-riding of Green Belt sensitivity in the absence of any “exceptional circumstances” that would justify this.

Adverse implications for the local community.

The rationale for the inclusion of A64 contained in the ‘Sustainability Appraisal’ prepared by a firm of private consultants, AECOM, makes clear that the site is on ‘red rated’ Green Belt land, but argues for its inclusion largely on the basis of its proximity to Wanborough Railway Station. However it admits that of all the sites proposed for additional growth in this latest version of the Plan Flexford is the smallest and most rural: “There are no existing facilities in Flexford and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality in this way.” (Section 9.14.1) Although it claims that Flexford benefits from access to the local primary school (which is, however, right at the other end of the Parish) and the GP surgery in Glaziers Lane it is silent on the issue of access to secondary education and admits that no assessment has been made of the capacity of the GP Surgery to accommodate this number of extra patients.

In addition to the above considerations there are major concerns with regard to the impact of an additional 105 houses on the already overburdened road and sewerage infrastructure in Normandy:

- Glaziers Lane is a notoriously busy road and the Officers’ Reports on the two unsuccessful previous applications for this site both drew attention to the dangers inherent in locating the access point to this site no more than 150 metres to the north of the blind summit railway bridge at Wanborough Station.

- In addition the Plan envisages 35 houses a year being built in three consecutive years from 2020; the impact of this level of construction traffic in Glaziers Lane and the surrounding area will be considerable. The road leading up to the south side of the railway bridge is increasingly suffering from subsidence where it joins the bridge, and this would be exacerbated by an increase in heavy traffic.

- The sewerage system in Glaziers Lane is already at maximum capacity. Many houses have had to have non-return valves fitted to stop sewage back-up. The existing infrastructure will not support an additional 105 houses.

It is noteworthy that no additional infrastructure improvements have been incorporated into the Main Modifications version of the Plan to reflect a 7% increase in the number of dwellings in the Parish – indeed given the constraints it is hard to see what such improvements might consist of. It is not sufficient to claim that these would be addressed at planning application stage; as a matter of principle the site should not be taken out of the Green Belt unless realistic infrastructure plans are in place.

In short, the A64 site has no merit in terms of benefit to the local community but has many serious drawbacks that have not been addressed by the ‘Main Modifications’ proposal. It puts long term strain on the community without offering any countervailing benefit.

I therefore OBJECT to Policy A64 on the grounds that its harmful consequences for the local community have not been addressed.

Failure to secure early delivery of housing.

This site did not feature in any of the previous versions of the Local Plan that have gone out for public consultation. It was included in the October 2013 ‘Strategy and Sites Issues and Options’ paper as one of the many sites under consideration across the Borough, but was subsequently discarded. Its reappearance in 2018 was therefore a complete surprise and there are good reasons to believe that its inclusion was misjudged because it will not achieve the early delivery of housing called for by the Inspector - the sole rationale for its inclusion at this late stage. There are a number of concerns about its viability, as follows:

- The site is not in single ownership and there is good reason to believe that not all of it is available for development. The prospective developer should be challenged to demonstrate that he has control of the site and can guarantee early delivery of 105 houses. In particular he should be asked what his plans are for the deep artificial fishing lake that currently occupies roughly one third of the site.
- The lake and its margins also constitute an important wildlife habitat. The site is within 100 metres of the SNCI at Little Flexford (the now discarded Site A47). The latter is home to Great Crested Newts, a protected species; they are also a migrant species and it is highly possible that they have colonised site A64. At the very least a detailed wildlife and habitat appraisal would need to be carried out before this site could be given the go-ahead for development.

- The Sustainability Appraisal makes clear that “there is a degree of surface water flood risk at the site’s eastern extent” (page 63 of the SA). This would be exacerbated if the artificial lake were partly or completely filled in for development.

- The site is bisected by a public footpath that goes on to cross the railway line on an uncontrolled, pedestrian-operated, crossing; significant work would have to be undertaken by Network Rail before the site could be considered safe for a major housing development.

- The site abuts onto the Strawberry Farm waste management site, where building waste is brought in from building sites and processed, crushing the bricks and concrete, screening out the soil for resale. Green waste from tree surgeons and others is also processed on the site. There is a 30+ metre high pile of material within 25 metres of the rear boundary of this site; it is likely there is also historic industrial and organic materials contamination. The environmental health implications would need to be addressed, possibly involving some restriction of current waste management activity, before development could go ahead.

- Building at high density on this site will have an adverse effect on the Surrey Hills AONB. In order to deliver the number of houses required, and given the existence of the lake covering roughly one third of the site, it might realistically be necessary to build 3 or even 4 storeys high. Not only would this be completely out of keeping with the rest of Normandy/Flexford (there is currently nothing of comparable size in the area) it would also be visible from the Hog’s Back in the AONB and would introduce a new and discordant element to the landscape. There is also about to be a review of the boundary of the AONB that will include the Area of Great Landscape Value to which this site is very close; if the boundary is moved this will impose further constraints on development in the area.

- I have already mentioned the fragile state of the road and sewerage infrastructure in Glaziers Lane, and the severe impact that three years of construction traffic leading to 105 extra houses would create. It is highly unlikely that these issues could be addressed in time to allow the required number of houses to be built within the 5 year period.

Most of the above points have been made by Planning Officers in their rejection of the previous planning applications for a part of this site (16/P/01452 and 17/P01413). It appears that these points have been overlooked in the present proposal.

For all these reasons I submit that Policy A64 will fail to deliver the early years housing that is the sole justification for its inclusion, and I therefore OBJECT to its being a Main Modification to the Local Plan.

Attached documents:

Comment: MM45 - LPMM18/243

Respondent: Richard Cunningham 8708897

Agent:

The addition of this modification goes against the soundness of the Local Plan, in that it is not justified.

- The site is within the Green Belt - no exceptional circumstances for the revision of the Green Belt boundary or its development have been given. It would lead to the urbanisation of Flexford & Normandy, two distinct villages.
- There are no proposed improvements to infrastructure to accompany the modification - the area is prone to flooding; the sewerage system is already at capacity in wet weather; Glaziers Lane to which the site enters, is a D class road and was not intended for higher traffic density.
- There are no facilities in Flexford, with the exception of Wanborough railway station - this development will not contribute towards the sustainability and vitality of the village, as indicated in the Sustainability Appraisal.
- There is no community (Normandy & Flexford) benefit from this modification.
• More consideration should be given to building on existing brownfield sites rather than on Green Belt land.

**Comment:** MM45 - LPMM18/567  **Respondent:** Alan Burchett 8747969  **Agent:**

**GUILDFORD LOCAL PLAN**

I am writing with regard to Main Modification 45 dealing with Policy A64 of the Local Plan

I object to the inclusion of this site for the following reasons.

1. **INCLUSION OF SITE A64 & INFRASTRUCTURE**

Site A64 has never been put forward as a ‘Policy’ although it was given consideration as part of the Sustainability Appraisal in 2017. Its appearance now as part of the Local Plan is a complete surprise to residents and gives little opportunity to properly comment on its inclusion or to suggest other suitable sites.
When site A46 (land to the south of Normandy and north of Flexford) was withdrawn from the submission Local Plan, the infrastructure projects associated with the site were also removed. It would be hoped that there would be infrastructure projects to support site A64, should it be included in the Local Plan. 105 houses would generate a significant increase in traffic on Glaziers Lane, which is an unclassified road (D60) and is already a busy commuter route for cars, commercial vehicles, lorries, multi-axle heavy goods vehicles and articulated lorries travelling between the A323 Guildford to Aldershot Road and the A3 and A31, with many of the vehicles failing to adhere to the speed limit of 30mph. Traffic management improvements would be needed at both ends of Glaziers Lane, at the junction of Flexford Road/Westwood Lane, and at the B3000 Puttenham Hill/A31 Hog’s Back junction.

Other infrastructure projects that would be needed are:

- Bus network to provide the southern end of Glaziers Lane with a regular bus service, as the nearest bus route is on the A323 more than a mile away. (Previous planning applications for developments in the Lane have claimed there is a bus route in Glaziers Lane, but this is extremely limited in its scope).
- Cycle network to provide a safe means of cycling along the dangerous unclassified Glaziers Lane and surrounding road network
- Improvements to the railway bridge to make it safe for pedestrians and cyclists (see Glaziers Lane section below).
- Upgrade of the sewerage network, as this is notoriously inadequate for the existing village population.
- Expansion of Wyke Primary School to accommodate the number of pupils of primary school age from the new development
- Improvements to rectify the sunken road surface of the railway bridge (see Glaziers Lane section below).

A major infrastructure project that would have to be undertaken is to resolve the issue of the public footpath that bisects this site and continues to cross the railway line on an uncontrolled crossing. Significant work would have to be undertaken before the site could be considered safe for a major housing development with such a footpath running through it, exposing children to huge risk on the uncontrolled crossing.

### 2. THE GREEN BELT & EXCEPTIONAL CIRCUMSTANCES

A planning application (16/P/01452) was submitted for just the front field of site A64 for the construction of 42 new residential units with associated parking and gardens and was refused on 14 February 2017

The reasons for the refusal were:

1. *The proposed development is located in the Green Belt, outside any identified settlement area and therefore represents inappropriate development, which is by definition harmful to the openness of the Green Belt and conflicts with the purposes of including within it. While there are circumstances that weigh in favour of the development these do not amount to the very special circumstances such as to clearly outweigh the substantial harm arising.*

2. *The proposed development would introduce development at depth which fails to respect the linear pattern of development that is characteristic of this part of Glaziers Lane. Furthermore, the proposal would close the visual gap that exists between Normandy and Flexford, both to the detriment of the character and appearance of the area.*

A further planning application (17/P/01413) was submitted for just the part of Site A64 fronting on to Glaziers Lane for the construction of 9 new residential units with associated parking and gardens and was refused on 19 January 2018

The reasons for the refusal were:

1. *The proposal is considered to constitute inappropriate development in the Green Belt and would cause material impact to the openness of the Green Belt. There are no very special circumstances which outweigh the substantial harm to the Green Belt by reason of its inappropriateness and the actual harm to the openness of the Green Belt.*
2. **The scale and bulk of the proposed dwellings and the resultant spread of development across the undeveloped and open site would have a detrimental impact on the open character of the existing site and would appear as an incongruous feature within the immediate rural setting, leading to the erosion of the rural edge of the built up area of Glaziers Lane.**

3. **The site lies within the 400m to 5km zone of the Thames Basin Heaths Special Protection Area (TBHSPA). The Local Planning Authority is not satisfied that there will be no likely significant effect on the Special Protection Area and, in the absence of an appropriate assessment, is unable to satisfy itself that this proposal, either alone or in combination with other development, would not have an adverse effect on the integrity of the Special Protection Area and the relevant Site of Special Scientific Interest (SSSI). In this respect, significant concerns remain with regard to the adverse effect on the integrity of the Special Protection Area in that there is likely to be an increase in dog walking, general recreational use, damage to the habitat and disturbance to the protected species within the protected areas.**

The reasons for refusal of the planning applications for 42 houses in February 2017 and 9 in January 2018 are just as applicable now as they were at the time of refusal, especially as both applications are very recent, and also as the A64 proposed development is much more dense at 105 houses. Also relevant is that GBC have given no special circumstances for the proposal to build on this site that would justify redrawing the Green Belt boundary.

### 3. **SUSTAINABILITY**

The ‘Sustainability Appraisal of the Guildford Local Plan – Report update June 2017’ lists 18 sustainability issues and objectives, and yet site A64 is included as a possible development site on the basis of just one issue, that being its proximity to Wanborough Railway station. It can be expected that from a new development of 105 houses only a small proportion of the new residents will use a train to get to work, as their place of work is unlikely to be linked to rail transport if they have moved to Normandy from elsewhere. Therefore the sustainability issue is a ‘red-herring’.

The SA makes it clear that **“There are no existing facilities in Flexford, and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality.....”**

The SA also says, **“Flexford is also notable in that it is a small village without even a Primary School.”** It continues, almost in desperation to find a positive point, **“Nearby Normandy does have a Primary School and a GP Surgery.”** However, from research carried out within the village, it appears that the School would not be able to accommodate the number of pupils of primary age that would come from a development of 105 homes, and the GP surgery would struggle to add over approximately 250 new residents to its list.

It is also acknowledged in the SA that **“Land east of Glaziers Lane falls as comprising ‘red-rated’ Green Belt.”**

### 4. **GLAZIERS LANE**

As stated above (within Infrastructure section), Glaziers Lane is an unclassified road (D60) and the increased traffic movements generated by an additional 105 houses would pose extra dangers. The Lane is a rural, residential road, just 6 metres wide at the widest point, with a 30mph speed limit throughout its length and has become a ‘rat-run’ for vehicles accessing the A3, A31 and A323.

From 7.00am there are approximately 15 Grab Lorries an hour entering and exiting the waste management site at Strawberry Farm, most exceeding the speed limit on the stretch of road from the railway bridge to the Strawberry Farm site. These pose an additional and ongoing daily risk to other road users and pedestrians, and would do so especially to residents from the proposed development given the proximity of the road bridge over the railway to any access road to the site.

Parked vehicles are mostly parked on the pavement owing to the narrowness of the rural Lane. This means that pedestrians, those in wheelchairs and parents/carers with pushchairs or prams, have to walk in the road and are at risk from passing vehicles.
The street lighting in Glaziers Lane is poor and could at best be described as footpath lighting. Towards the southern end of the Lane is a humpback road bridge over the railway line, which has a sharp incline and decline so that on approach there is no view of the other side of the bridge. The bridge is also on a slight, but deceptive, double bend in the road. At this point the Lane narrows to 5.5 metres, slightly under in places. This is an especially dangerous part of the Lane as cars speed towards the bridge from both directions, with no view of the other side. The roadway of the bridge is badly sunken on both sides due to the weight of the heavy goods vehicles crossing the bridge. This bridge would be hazardous for cyclists travelling to and from the proposed development and, because of the narrowness of the bridge, no dedicated cycle lane could be installed. Because of the hazards mentioned, pedestrians already have to exercise extreme caution when crossing the bridge. At the northern end of the Lane is the junction with the A323 Guildford to Aldershot Road, where Glaziers Lane crosses over to Hunts Hill Road. This is a difficult junction to negotiate owing to the amount of traffic travelling along the main road, and also because there are cars turning right out of Glaziers Lane on to the main road, cutting across the path of cars coming across from Hunts Hill Road, with both sets of drivers attempting to find a gap in the main road traffic. There is often a tail-back of traffic in Glaziers Lane waiting to exit, and traffic from 105 additional houses will only exacerbate the problems.

The single footpath along the Lane is not continuous, changing from side to side of the road along its length. This means that pedestrians have to cross the road at various points in order to remain on the footpath, with two exceptionally dangerous crossing points.

Currently there are 2 plots being developed in the southern reaches of Glaziers Lane, both for single detached dwellings. The disruption caused by workers’ cars and vans, and delivery lorries, for just 2 houses, has been intense, due to the narrowness of this rural Lane. The disruption caused by the construction of 105 houses over a short time scale on site A64 is unimaginable.

5. ACCESS TO THE PROPOSED SITE

The proposed site is in an exceptionally dangerous position with regard to access to and from the site, as it is very close to the road bridge that crosses the railway line. Speeding vehicles approaching from the south would only have a short stopping distance after crossing the blind summit of the bridge before arriving at possible access points for the site. This is already a problem for those in wheelchairs, the elderly and infirm, and parents/carers with pushchairs or prams, who have to cross the road here, as the pavement is not continuous, and who require more time to cross the road.

6. FISHING LAKE & FLOODING

A large proportion of site A64 comprises of a deep fishing lake and there has been no attempt by GBC to indicate how this would feature in the development of the site.

Also, the Sustainability Appraisal acknowledges that, “This site is associated with a degree of surface water flood risk at the eastern extent.”

7. H&S - PROXIMITY TO WASTE MANAGEMENT SITE, RAILWAY LINE & ROAD BRIDGE

Site A64 is directly adjacent to the Strawberry Farm waste management site. Waste material, such as bricks, concrete and soil are taken in from building sites and processed, crushing the bricks and concrete and screening the soil for resale. Green waste is also taken in from tree surgeons and composted. There are huge piles of material within 25 metres of the rear boundary of site A64 which includes composted green waste and when this is moved the smell is intolerable to residents and airborne particles must be a danger to health. When the hard materials are crushed the noise can be clearly heard for days on end by residents living in all parts of Glaziers Lane. There is also noise from heavy machinery on a daily basis. The proximity of site A64 to the waste management site would surely be a health and safety hazard for the residents there.

See above (Infrastructure section) for details of the public footpath that bisects this site and crosses the railway line at an uncontrolled crossing.

See above (Glaziers Lane section) for details of the dangers pedestrians and cyclists are exposed to when crossing over the railway bridge.
I believe that Normandy should accept some housing development as part of the Local Plan, but not on the Green Belt.

A planning application (17/P/02326) was submitted in 2017 to build 30 dwellings on a previously developed site at The Elms Centre in Glaziers Lane GU3 2DF. This application was refused in February 2018.

This would be a much more preferable site to develop than the proposed site A64 as it is not in the Green Belt and utilises previously developed land. This would be more readily acceptable to residents.

Attached documents:

Comment: MM45 - LPMM18/534  Respondent: Paul Bouncer 8748609  Agent:

I am writing to object to the above change to the Local Plan proposal of site - Policy A64: Land Between Glaziers Lane and Strawberry Farm, Flexford; on the basis of the following points:

- Responding correctly to this proposal has been difficult when the ‘exceptional circumstances’ as to why the green belt can be altered have not been made available to us.
- This is green belt area and adjacent to an area of outstanding natural beauty. If approved its development would fundamentally alter the importance of protection of our green belt for future generations, aside from visually impacting an area of outstanding natural beauty adjacent to it and highly visible from the top of the Hog’s Back.
- There are numerous brown field sites listed on the GBC web site. Whilst recognising that for developers these are not a cheap option’s v’s green belt land, surely repurposing brown belt land must come before the desecration of the green belt? Perhaps developers should be forced to take on 5 houses in brown field sites for every 5 in the green belt, halving the impact??
- Glaziers Lane is a narrow lane with an awkwardly angled railway bridge and sharp right hand bend that compromise the road width even further. Such a development with all the additional traffic is going to increase the risk of a serious accident/death in the Lane. It’s important to note this is a Lane not a road, and any possible entrance exit to this site would be unsighted by traffic approaching from the South increasing this risk significantly, especially as at peak times people speed down the lane.
- Light pollution is currently very low in Glaziers Lane this development would increase this considerably with cars at night turning in and out of any access road, which will have a knock on impact on wildlife in the area.
- We currently have a thriving population of hedgehogs which do cross the Lane and increased traffic is highly likely to impact them directly, whilst not on any endangered list now there is serious concern over their future as they continue to disappear from our hedgerows.
- There are a good number of mature oak trees in site A64, with all of the issues over the last couple of decades with disease we need to ensure their protection, not building here and so not impacting their environment would be a good support.
- Noise pollution is also low in this part of Glaziers Lane, adding 105 houses would dramatically change this in a negative way, adding circa 200 plus cars to the area which is a significant impact.
- People park in the lane especially if they have a larger number of visitors, with the current limited housing this is less of an issue but adding in so many more houses with limited parking will result in an increase in the occasions when people will park in Glaziers Lane and again increase the risk of accidents (as people always park as near as they can to where they want to be) coupled with the higher traffic volumes again especially important being so near the blind approach from the railway bridge.
- The fields and land all around Normandy Village are subject to excessive water build up this will be clearly visible as we move into winter. We are in an area of clay with a high water table, which the standing water after rain at all differing levels reinforces. Such a large development is going to impact this and may affect the water table in a wider area putting houses at risk of flooding?
• Has a survey been carried out of the lake including any wildlife it supports in the surrounding area. We assume such a plan will result in the lake being drained for houses to be built? Please note the lake to my knowledge has never dried out, so there is a source of water into it that will end up bubbling up somewhere else causing risk of flooding?
• Sewage / general drainage is an issue in Glaziers Lane, is a significant issue in the Lane. Adding 105 houses will place a massive additional strain on an already challenged sewage system (the system has already collapsed twice in the last few years at the northern end of the Lane, and dip has started forming again recently so later this winter may see it collapsing again). All the additional lorries over a 3 year period to build these houses will massively accelerate this issue and the risk of damage to the road and the just renewed pavement.

• Special note on the heavy lorries associated with such a development. The lorries associated with Backhurst etc are already noticeable in that you can feel them in the house as they go by (sometimes at excessive speeds!!) The massive increase in such large vehicles is going to further damage the road and potentially cause our structural issues to houses in the area. Also the buses and lorries that currently come down the Lane (please note not a road) find it very difficult to stay on their side of the Lane due to its narrowness and completely impossible to turn in and stay on the correct side of the road, both dangerous and very unnerving as a driver going towards them.

**Attached documents:**

**Comment:** MM45 - LPMM18/1357  **Respondent:** Christine Melville 8753729  **Agent:**

I am opposed to the proposed building of 105 houses between Flexford and Normandy which will increase housing by 7% in the area and will remove land from the Green Belt. With the new lower housing requirement for the Guildford area from over 670 new houses per year to 360 per year there can be no justification for removing land from the Greenbelt. What are the exceptional circumstances to allow removal of land from the greenbelt? I also have concerns with the increase in traffic 105 houses will cause. The roads around Normandy are dangerously busy already and are used as cut throughs when there are jams on A31, A3, M3 and M25 and the flow of traffic is too much for a quiet residential area surrounded by green fields, ancient woodland and AONB. There are no facilities in Flexford and relatively few in Normandy but an increase to housing of 7% would require infrastructure which is not there.

**Attached documents:**

**Comment:** MM45 - LPMM18/73  **Respondent:** Casper Gorniok 8768417  **Agent:**

I'm probably in a tiny minority, but in all honesty, I think Guildford Borough Council should come up with a far more creative solution for Normandy.

Building 105 homes on Glaziers Lane Site (A64) will simply increase more traffic over a very dilapidated railway bridge, which should be knocked down and re-built.

You should think bolder, and create a 3,000 home "all-inclusive" village, which has:

> Upgraded roads - Westwood Lane is so worn out / Glaziers Lane + Dilapidated Railway Bridge is a safety hazard.
> Retail - We have NO shops or meeting places (such as a pub/coffee shop)
> We DO have a surgery & station
We should have 21st century business/office facilities for small businesses

Upgrade Sewage & Overhaul the flooding issues that have best the village for many decades.

My vision would be to turn Normandy into a "Cobham" - somewhere all-inclusive where you could do so much locally, and that would be good for the environment.

I am totally against building more houses and no improvement in facilities / amenities - but that doesn't mean building a secondary school, either.

Best wishes,

Casper

Casper Gorniok  [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

Attached documents:

Comment: MM45 - LPMM18/395  Respondent: Mrs Diana Delahoy 8794657  Agent:

Facilities in Flexford area do not cope currently, so will be made worse by additional people and vehicles. For example, currently 3 week wait for GP appointment. Hogs Back is a traffic jam every weekday morning, and on travel reports every day. Addition of maybe about 400 extra people and vehicles will make this much worse.

Attached documents:

Comment: MM45 - LPMM18/444  Respondent: Mr Roger Mitchell 8805089  Agent:

Policy A64, Land between Glaziers Lane and Strawberry Farm, Flexford

I wish to object to the inclusion of Site 64 in GBC’s proposed revised version of its Local Plan for the following reasons:

1/ It involves moving an important tract of land out of the Green Belt. This Green Belt land is important in defining the rural character of this part of the borough and is a bulwark against urban sprawl.

2/ There are no exceptional circumstances which would justify removing this site from the Green Belt.

3/ This proposal has not been put to the residents for consideration in earlier drafts of the plan and seems to have been plucked randomly from thin air.

4/ There is no infrastructure to sustain this proposed development: surrounding roads are effectively country lanes and are already over-congested; Water tables are high and local drainage inadequate to cope with even the existing rain and waste water and effluent; local shops do not exist and local health and school provision are overstretched.

Attached documents:
Comment: MM45 - LPMM18/960  Respondent: Claire Waters-Duke 8810145  Agent:

I am a resident in Glaziers Lane, Normandy, Guildford, Surrey and I’m very concerned about the recently suggested field in my road which now comes under the new Local Plan, site A64, to follow are my thoughts:

- I gather you would like to see an additional 105 houses built on this highly sensitive green belt land, to the north of the railway line at Wanborough Station, on the east side of Glaziers Lane, this represents a 7% increase in the number of houses in Normandy and Flexford.
- I gather one of the reasons why this site was mentioned because there was a short fall in the number of houses in the Woking area. Our area I believe tends to be a lot more Greenbelt land than Woking, so I’m not sure why we are potentially having to build on our Greenbelt land.
- This land and this proposal has not yet been out for public consultation, so it seems unfair to include it at the last minute.
- We in Normandy are wondering what the exceptional circumstances are that you feel that our Normandy Greenbelt boundary needs to be removed? Have you really considered the actual need for all these houses and will people want to move to a quiet village, with no facilities? Surely we need to be looking around for a lot more Brownfield sites.
- Most importantly previous applications on this site have been refused by yourselves and have stressed on the extreme sensitivity and the damage that would be done to the openness of the Greenbelt should a development be permitted. A64 would be the thin end of a long wedge by starting to close the gap between the distinct settlements of Normandy and Flexford, it would eventually potentially lead to the urbanisation of Normandy.
- The sustainability assessment for this site says it is the smallest and most rural of all the sites included. It states that there are no existing facilities in Flexford….
- I gather no accompanying infrastructure improvements have been included, with the road and sewage systems in Normandy and Flexford already overloaded and 7% more houses being proposed will make the situation even worse.
- The proposed development would also have an adverse effect on the Surrey Hills Area of Outstanding Natural Beauty (AONB) in order to deliver the number of houses required the site would probably need to be 3 or even 4 storeys high. This would be completely out of keeping with the rest of the area and would have an adverse impact on the vista from the Hog’s Back in the AONB.

To conclude the site considered in Glaziers Lane would put long term strain on the community without conferring any countervailing benefit…

Other infrastructure issues:

- Roads – already congested, traffic often going too fast (we have had 2 cats killed on this road already) extra pollution
- A small railway bridge at a difficult angle close to the site – probably wouldn’t be able to cope with the additional load
- Doctors - already oversubscribed, likewise the local Primary School as well
- The wildlife and flora and fauna – we have lots of this in Normandy and some quite rare, their homes and habitats would be destroyed. We have a number of bats as well which I believe are a protected species, these might all die due to this development.
- We moved to Normandy for its rural area, to bring our children up to walk and enjoy the local countryside and to learn about the wildlife, this would be destroyed.

These are my concerns about the proposed development and I would very much like you to consider these when thinking about this site.

Attached documents:

Comment: MM45 - LPMM18/2221  Respondent: Mr Chris Kelland 8819425  Agent:
I wish to respond to a part of the revised Local Plan as follows.

With reference to **Main Modification 45 (MM45)** dealing with **Policy A64** I would comment as follows.

The plan to build 105 houses over 3 years on this area of Green Belt Land is unacceptable for the following reasons:

1) This is valuable Green Belt Land which should be retained as such for the sake of current and future generations of villagers. Normandy is essentially a rural area and should remain as such.

2) This proposal would necessitate the altering of the settlement boundary. There are no exceptional circumstances to justify any development here.

3) Such development on this land would increase the population of the village by some 7% without there being any improvement to infrastructure. Normandy already suffers from flooding, bad surface water and foul water systems and inadequate roads. Any development would exacerbate this already intolerable situation.

4) I understand that the pressure on GBC to build more houses is partly due to a shortfall in the Woking Local Plan. Why should Guildford have to make up for the shortfall of another Council?

5) This proposal has not been in previous versions of the GBC Local Plan and so there has been no public consultation in this regard.

6) A development in this area will cause an unacceptable strain on Glazier's Lane in terms of volume of traffic. A minor road such as this will not be able to cope with such an increase in traffic.

7) The lack of facilities in Flexford and Normandy generally are such that any development here could never secure the long term future of the village.

For these reasons, I trust you will reconsider the inclusion of this Policy and omit it from the final version of the GBC Local Plan.

**Attached documents:**

**Comment:** MM45 - LPMM18/3681  **Respondent:** Rebecca Young 8825825  **Agent:**

**Main Modification 45 (MM45), Policy A64 Land East of Glaziers Lane, Flexford**

I object to the proposed Policy A64.

**No exceptional circumstances have been demonstrated**

Under the National Planning Policy Framework “Exceptional Circumstances” are required to take land out of the Green Belt to allow development. These haven’t been demonstrated by Guildford Borough Council (GBC) in the selection of a site that has recently been confirmed as “red sensitivity” Green Belt. This site has been the subject of several planning applications for smaller numbers of houses, these have all been rejected due to the value of this piece of the Green Belt.

It is difficult to imagine what the exceptional circumstances would be, given that it appears from the SA Report Addendum September 2018, page 22 note to Table 5.1 in reference to the Total Additional Homes (yrs 1 to 5):

“* There is a need to reiterate two points. Firstly, these homes would be in addition to the land supply supported by the submission plan.”
This tells us that proposed Policy A64 would remove land from the Green Belt to deliver homes that are in addition to those already included in the local plan, therefore these are homes in addition to those required to meet GBC’s stated anticipated housing need.

How can removing land from the Green Belt to provide houses to exceed the estimated need be consistent with “exceptional circumstance”?

GBC should exert pressure on developers for early delivery on sections of the sites already identified in the Local Plan, rather than consuming unnecessary Green Belt.

**Sustainability**

Of the numerous sustainability factors to be considered, only one appears to be met by Policy A64 i.e. proximity to a train station.

No evidence has been provided to justify such strong preference based on a survey of the travel habits of the existing Flexford population.

Sustainability must surely be considered in conjunction with accessibility. There is no access to the East bound platform of Wanborough station for people with reduced mobility.

As the SA Report Addendum reiterates, there are no other facilities in Flexford. The nearest shop is Pinewood Stores, Ash approximately 2.5 miles away. The nearest primary school (Wyke) is 1.5 miles, which most people would consider too far to walk with young children. These distances to amenities is inconsistent with “sustainable development”.

**Flooding Considerations**

Approximately a quarter of the proposed site is a lake. The water table on the rest of the site is frequently high, demonstrated by visible surface water during the winter months. I consider the SA Report Addendum statement (page 63) to be optimistic:

“Glaziers Lane at Flexford is associated with a degree of surface water flood risk at its eastern extent.”

**Lack of Local Consultation**

Both Glaziers Lane and Westwood Lane have seen development of “brown field sites” in recent years. Examples include: Milton Close, Manor Farm Close, Station Approach.

There may be more brownfield sites in the area that could be brought forward for sensitive re-development, but local residents and the Parish Council have not been given opportunity to pursue these as an alternative to Green Belt site Policy A64.

**Attached documents:**

**Comment:** MM45 - LPMM18/2955  **Respondent:** Diana Marchant 8828641  **Agent:**

Regarding MM45 Policy A64.

As a long time Resident of Normandy I do not agree with the proposed new housing development, which in my view seems to threaten the rural character of Normandy.

My main reasons are lack of local amenities - no shops or pubs, serious overcrowding on surrounding rural roads, lack of any plan of new local infer structure & general full capacity of our School & Medical Centre.
It seems that this is a completely new site & did not feature in previous versions of the local plan & 105 houses in our village would considerably alter the character of this Green Belt area.

I would very much like the Inspector to re-open the examination & amend the Local Plan.

Attached documents:

Comment: MM45 - LPMM18/4746  Respondent: Chris Jackson 8833505  Agent:

Objection to the addition of site A64 (Flexford) in MM45

We are of the strong opinion that site A64 in MM45 should be removed from the local plan for the following reasons:

1. Neil MacDonald has demonstrated that building 360 homes per year would adequately support the very ambitious growth rate for Guildford proposed by the Planning Inspector. The figure of 630 new homes per year on which the local plan is based is massively out of step with the new Office of National Statistics figures.

2. We firmly believe 360 homes per year could be accommodated in Guildford town centre (as requested by the Planning Inspector) or on brown-field sites, thereby protecting our beautiful green, open spaces for future generations.

3. Site A64 is located within the Green Belt and no exceptional circumstances to remove it’s Green Belt designation have been provided.

4. The addition of site A64 is simply a knee-jerk reaction to the Planning Inspector’s request to build more houses earlier in the planning period. Over the years that the Local Plan has been under consultation, this site has never even been considered, let alone proposed. Further, all previous planning applications for this site (nothing to do with the Local Plan) have been refused, underlining the sensitivity of the site and the damage that would be inflicted on the Green Belt.

5. Building 104 new homes on such a small site will not be in keeping with the rest of the village, almost all of the houses along Glaziers Lane are family homes with extensive gardens. To achieve 104 homes on the proposed site would require very dense housing and involve multistorey flats, realistically this site could not accommodate more than 20 new homes if it is to remain in keeping with the rest of the village.

6. The villages of Flexford and Normandy lie in a shallow basin that is very prone to flooding, site A64 is currently a field that acts as drainage during periods of heavy rain, how do you propose to accommodate the water run-off once the field has been concreted over?

7. This site is close to Surrey Hills AONB, as such, building on this land will have a detrimental impact on local wildlife.

8. Site A64 is located on Glaziers Lane, a small D road, not really suited to cope with an additional 400+ car journeys per day.

9. The entrance to the site will be just north of the bridge over the railway line, with a notoriously blind summit that silly idiots speed over, having an additional 400+ cars exiting and entering the proposed site each day will inevitably lead to collisions. In addition, the railway bridge is currently in need of major repair work.

10. The sustainability assessment indicates site A64 is a very poor choice: Flexford currently has no facilities other than the train station, and the facilities of nearby Normandy village (GP surgery and primary school) are already over-subscribed. No improvements to the local infrastructure have been included in the plan to accommodate the proposed 2-400 new residents.

Attached documents:
Comment: MM45 - LPMM18/616  Respondent: Roger Shapley 8836129  Agent:

I wish to object to your MM45 re policy A64 on the grounds that it will have an adverse effect on Surrey Hills AONB.

Attached documents:

Comment: MM45 - LPMM18/752  Respondent: Marian Sage 8836545  Agent:

I strongly object to this proposal.

This land is classified as red-rated Green Belt.

The proposed development would have an adverse effect on the Surrey Hills Area of Outstanding Natural Beauty (AONB) and would have an adverse effect on the views from the Hog’s Back (AONB).

Guildford Borough Council has not given any circumstance that would be needed to redraw the Green Belt boundary. What “exceptional circumstances” can justify taking this land out of red rated Green Belt. Again, why consider extending the Flexford settlement north of the railway line onto a red rated “Green Belt” site.

This site has already had two building applications refused. The reasons for their refusal have not changed in any sense and stress its extreme sensitivity and the damage that would be done to the openness of the Green Belt should development be permitted on it.

The description of this land Policy A64: as Land between Glaziers Lane and Strawberry Farm, Flexford is misleading. The land is in Normandy. Flexford is wholly on the southern side of the railway line.

No proposals have been made by GBC to improve the infrastructure. With road and sewerage systems already overloaded, 7% more houses would create an intolerable burden.

The site is next to Strawberry Farm waste management site. Possible environmental and other hazards have not been addressed.

The Planning Inspector at the Plan’s Examination in Public in June challenged GBC to build more houses earlier in the plan period suggesting more houses could be built in the town centre where there are plenty of Brownfield Sites waiting to be utilised. GBC has completely ignored this and unjustifiably plucked out five green belt sites.

Normandy residents have shown during previous responses to earlier versions of the Local Plan that we care passionately about preserving the rural nature of our community. I wonder now whether we’ve been listened to all.

Expert opinion indicates that the overall housing estimated in the Local Plan is greatly exaggerated, failing to take account of the latest housing projections from the Office of National Statistics.

As this site has not featured in the local plan up until now, why is it allowed to be inserted at such short notice with no previous public consultation.

The traffic increase would be considerable and dangerous at a joining point within yards of the narrow and blind railway bridge.

Attached documents:
Comment: MM45 - LPMM18/1400  Respondent: Ms Ruth Archer 8839233  Agent:

I wish to object to this proposal to build 103 dwellings on this site. I'm not opposed to some AFFORDABLE housing development within the Normandy and Flexford area but this high density housing proposal threatens the area's rural character. This proposal appeared out of nowhere and does not seem to have been thought through.

- There are no community facilities in Flexford and the GP surgery in Normandy and the local infant school already struggle to cope with demand
- There is no access for the mobility impaired to the platform for the trains to Guildford.
- The site is next to the Strawberry Farm waste management site and there is no mention of assessing the possible environmental impact and potential hazards
- The sewerage system in the Flexford/Glaziers Lane area is already overloaded and results in flooding after heavy rain and there is nothing in the proposal to improve the sewage system
- Building 7% more houses without plans to improve the road infrastructure will cause traffic problems particularly as the railway bridge in Glaziers Lane is already showing signs of structural stress
- Previous planning applications for building on this site have been turned down due to the effect on the Green Belt and the Surrey Hills Area of Outstanding Natural Beauty
- There is no explanation of the required "exceptional circumstances" to explain why the Green Belt boundary in Normandy should be redrawn

Attached documents:

Comment: MM45 - LPMM18/1716  Respondent: Mrs Julia Hall 8839425  Agent:

This is a very large development on green belt land with the only access being Glaziers Lane. Glaziers Lane is already a very busy through route for vehicles from Woking/Godalming/Farnham and for very large recycling vehicles for the increasingly numerous recycling facilities which have been allowed in this area. The bridge over the railway line is already (worryingly) developing a 'bump' which can be felt as you drive over it - more traffic would increase the problems with this. The size of the development would increase the traffic considerably and unacceptably both on Glaziers Lane and at the junction of the Glaziers Lane and Guildford Road which is already notoriously dangerous and would add to the traffic queuing every morning and evening trying to turn right or to cross into Hunts Hill Road. Hunts Hill Road is a narrow winding road and this development would add to the traffic unacceptably on that road also. I think 105 houses is much too great a number for Normandy to shoulder when there are other more suitable sites available around Guildford.

Attached documents:

Comment: MM45 - LPMM18/750  Respondent: Vera Bulbeck 8846529  Agent:

Re: Inappropriate Development on site A64 Green Belt, Normandy

I would like to raise my objections regarding the development of 105 homes in our lovely rural village of Normandy. This will totally ruin the heart of our village and destroy our rural environment. As you are aware from past consultations the above site is not a welcome proposition, for a number of reasons.

- There is already a problem with the traffic; this can only get worse with all the extra housing, and the extra cars etc using the small D rural roads. In Westwood lane there is the extra problem of the railway bridge with one way traffic. It is utter chaos in the evening trying to get onto the Guildford/ Aldershot Road during the peak times. It can take as long as 40 minutes to drive a mile towards Ash. The primary school is going to cause more problems with children being dropped
off and picked up for school, as well as the possibility of being overcrowded. The roads are so small and not wide enough
for two cars to pass. One has only to come and see the state of the grass verges all around the area to establish vehicles
have to mount the pavement to get past other vehicles, at the present times with the huge Lorries using our village as a
short cut to the A31. The bridge in Glaziers Lane over the railway line adjacent to Wanborough station is currently
showing signs of worse for wear due to the amount of traffic over the bridge. It is also extremely dangerous because the
size of the lorries take more than one lane to drive over.

The local GP surgery cannot cope at the moment; I have to wait four weeks to see my doctor at the present time. There is
no point saying get more doctors as there is already a shortage of doctors. The local services will not be able to cope
either.

• We need to maintain our wildlife, we should be looking at ways of keeping the environment green and not being
overloaded with property in areas of wild life. What would happen to the current lake on the site in question? This
situation makes an even worse scenario for our drainage system, and could lead if more property is built, being all
concrete, to the whole area being flooded. This is purely greed of squeezing people into confined spaces. Changing the
fields into a concrete jungle is not a welcome sight. Why are you even considering building on green belt land? When
there are numerous other sites to be considered for example brown field sites, your Councillor explained the reasons for
not using them, the answer to that is take the matter to Parliament get the law changed. Or is this because GBC wants
more money from Council Tax.

• I am very surprised with GBC allowing all the extensions on small two bedroom bungalows when there is a shortage of
affordable housing, GBC allows small two bedroom bungalows to be made into 4/5 bedrooms. Is this again a money
making facility for GBC.

• I would like you to consider the A64 site with the village of Normandy as a priority to maintaining a healthy
environment to live in. I look forward to your

Attached documents:

Comment: MM45 - LPMM18/4335  Respondent: Faye Medley 8846785  Agent:

Your Ref Main Modification 45/Policy A64

I am writing to reject the proposed housing development for the following reasons.

Green Belt: Need I say more.

105 Dwellings: To accommodate this amount of dwellings you must be proposing flats within this development. This is
not in keeping with the current housing guidelines that we as residents have had to abide by for many home improvement
application.

Flooding: When we have excessive rain fall the field becomes a major floodplain, it retains a large amount of rain fall
over the year. The properties further down Glaziers Lane have been flooded on several occasions. This field is located at
the top of a gradual hill in Glaziers Lane. I am lead to belief you are not intending on making any improvements to the
drainage system that is in place. We are all well informed that flooding issues in the UK have increased due to many
people converting gardens to hardstanding for parking/patios etc.
Building on this field would cause increased flooding in many more homes along Glaziers Lane without a doubt.

Parking: With a possible increase of 105 cars, I cannot see how you expect that amount of vehicles to park in the
proposed area without it off spilling on to Glaziers Lane 50 yards from Wanborough Station Bridge. Drivers do not stick
to the 30mph speed limit. With cars parked so close to the bridge will cause a major highway hazard. You will notice that
every home in Glaziers Lane has provisions for at least two cars per property, thus reducing parked cars along Glaziers Lane. It is not the widest of roads.

D road: Glaziers Lane is classified a D road. It is not capable in accommodating 105 extra vehicles every day.

Loss of habitat for the wildlife and flora: The pond located in the field is a hub for many of our local wild insects and mammals; we are blessed with the variety of birds and insects that pollenate our gardens. We have hedgehogs, foxes, deer, adders and many more that all use the pond. During the dryer months of the year the front of the field is home for our local traveling community to house their horses that are in foal. This plot of land is far more than just an empty field with a pond.

There are umpteen reasons why this development should not go ahead; I've just given you a couple.

**Attached documents:**

**Comment:** MM45 - LPMM18/4782  **Respondent:** Adrian Mills 8848481  **Agent:**

I wish to voice my concerns that the council are looking to modify the local plan in order to inflict the village of Normandy with a site of 105 new houses which equates to a 7% increase in the size of the village on a site that has been the subject to a number of previous applications that have been refused due to damage this would inflict on the greenbelt, there is a total lack of consideration for current residents with the council purely trying to demonstrate to the planning inspectors challenge, the village already suffers from inadequate infrastructure with overloaded sewers, constant flooding and too much traffic this kind of development will only increase the burden on our community, along with the lack of facilities such as shops, access to schools and GP’s, yes we have a station but you try getting a train at the weekend it is almost always a replacement bus service.

Guildford Borough Council should concentrate their efforts on utilising the many brownfield sites that exist in the borough rather than propose more building on sensitive greenfield sites such as this.

**Attached documents:**

**Comment:** MM45 - LPMM18/1457  **Respondent:** Martin Sweeting 8857025  **Agent:**

I am writing in response to the consultation on the proposed Guildford Local Plan and specifically the Main Modification 45, i.e. MM45, dealing with Policy A64.

In this regard, I wish to register my strong objection to this Modification as it proposes a major new housing development on existing Green Belt land without any justification of the ‘exceptional circumstances’ that are needed in order to redraw the Green Belt boundary in Normandy.

Such a development will substantially threaten the rural character of Normandy and, indeed, previous refusals of planning applications on this site have stressed its extreme sensitivity and the damage that would be done to the openness of the Green Belt should development be permitted thereon.

Furthermore, there has been no accompanying improvements to infrastructure proposed in the Modification. The access road (Glaziers Lane) is narrow, already heavily used by large lorries, and constrained by an even narrower railway bridge with poor visibility from the south – the additional traffic load due to the proposed development would give rise to dangerous congestion. The sewerage systems in Normandy are already overloaded and this additional major housing
development would exacerbate this problem. The site proposed is also adjacent to the Strawberry Farm waste management site and I note that there is no assessment of the possible environmental hazards and necessary mitigation.

I also note that expert opinion has identified an exaggeration (by ~45%!?) of the overall housing number in the GBC Local Plan and it appears that insufficient emphasis has been given to capitalising on brownfield sites in Guildford town centre and elsewhere in the Borough rather than the easier option of more building on greenfield sites. This proposal has been inserted into the Local Plan at a very late stage and without the extensive consultation of local inhabitants who have shown in their responses to previous Local Plan consultations that they care passionately about preserving the rural nature of their community.

In conclusion, I request that you take note of my strong objection to this proposed Main Modification 45 as an inappropriate development on Green Belt land without any justification of the ‘exceptional circumstances’ needed that would have a highly detrimental impact on the local community.

Attached documents:

Comment: MM45 - LPMM18/2628  Respondent: Mr Roger Sage 8859905  Agent:

This Main Modification is wholly inappropriate, it has been refused planning on two previous occasions on Greenbelt ground.

The Main Modifications appear to add an additional 500 homes to the Local Plan which is already based on grossly over estimated numbers therefore I would ask the Inspector to reopen the Examination.

Attached documents:

Comment: MM45 - LPMM18/2082  Respondent: Mr Raza Shah 8862625  Agent:

RE: MM45 dealing with Policy A64

I have concerns about the proposal to build 105 houses in the above mentioned location within Normandy, Guildford and the threat it poses to the local environment and rural character of Normandy.

I do not agree with the councils proposal to consider green belt land for building new homes, here there is plenty of brownfield sites within Guildford that can be considered to build upon.

Bearing in mind that the requirement for additional homes has been overstated by 45%.

I feel GBC has not considered all the brownfield sites that are available to build any required housing facilities.

I feel the Council has not considered any of the previous refusals of planning applications on this site that has stressed its extreme sensitivity and the damage that would be done to the openness of the Green Belt should development be permitted on it.

I fail to see that GBC has stated any exceptional circumstances to readdress the boundaries of Greenbelt in Normandy.

The area in the proposal has not taken into consideration all previous refusals for planning applications on this site have clearly highlighted its extreme sensitivity and the damage that would be done to the openness of the Green Belt should development be permitted on it.
I feel that consideration to build on this site has been stealthily inserted into the plan without justification. I feel this goes against the principles of a consultation held previously, where the residents of Normandy have made it clear in previous responses that they value and passionately care about preserving the rural landscape of their community.

No proposals have been considered to improve the infrastructure of the village to support the increase in housing, including utilities, sewerage and drainage and increase in traffic. With most households owning two or more cars we would expect to at least 200 more cars on the roads in Normandy, which not only harms the environment but has the potential to cause significant rise in the volume of traffic within the village.

Any build of this scale would have an impact on the Surrey Hills Area of Outstanding Natural Beauty [AONB].

The quantity of houses suggests that they will be more larger than the average bungalow and the proposed homes would not be in character of the local area where the likely size of property is set to be greater than 2 storeys. This would be completely out of keeping with the rest of Normandy/Flexford and would have an adverse impact on the view from the Hog’s Back in the AONB.

I question the councils proposal where the Sustainability Assessment that accompanies this proposal confirms that of all the sites proposed for additional growth in this latest version of the Plan, Flexford is the smallest and most rural, it states that “There are no existing facilities in Flexford and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality in this way.”

In conclusion, I must ask you amend the Local Plan to utilise brownfield land rather than green field sites.

Attached documents:  Local Plan comments Oct 2018.docx (16 KB)

Comment: MM45 - LPMM18/654  Respondent: Ms Josephine Holliday 8876321  Agent:

Would you please take into consideration my following comments regarding the consultation and proposed development of A64 land adjacent to Wanborough railway and Glaziers Lane.

The field in question is green belt land. This field would join the settlements of Normandy and Flexford thereby leading to the urbanisation of our village community. To put 105 houses on the field and drain the beautiful lake of its wildlife is beyond comprehension. This space would not take 105 decent sized houses with 210 parking spaces unless the intention was to put up blocks of flats which is not in keeping with the surrounding houses. Where are 105 cars going to park, as I understand that there is only to be one parking space per residence. How can you get 105 cars down Glaziers Lane right at the bottom of the railway bridge without an accident waiting to happen. Cars park in Culls Road right by the entrance already to save money in parking fees to use the station which is dangerous as cars have to go on the wrong side of the road to exit and cars on Glaziers Lane cannot turn into Culls Road because the entrance is blocked. What a blot on the landscape this large development would be within such a pretty area looking down from the A31 Hogs Back. This area of outstanding beauty would have an adverse effect on the Surrey Hills.

Where would the deer go that roam across the road to go into the countryside beyond?

Having just had to wait three weeks for a doctors appoint (and that was a telephone appointment not actual attendance) how do you envisage an extra 210+ patients being able to be integrated into the Normandy/Fairlands doctor and dental surgeries.

The local infrastructure is old and needs attendance, how does the council envisage connecting into an already over stretched pipe works to accommodate these residences, and strengthen and widen Glaziers Lane for all of the traffic now having to use it.
This land is GREEN BELT land and not for use for housing. Surely there are plenty of brown filled sites in the Guildford area. Why have residents not been consulted on this potential development. If Guildford Borough Council had given permission over the decades for infilling for housing we might not be in this position. Instead they have been very strict to say that no building could take place in Glaziers Lane from bridge to bridge, which would take in this site. What has changed the borough’s mind and if this development takes place then presumably every house down Glaziers that is large enough to have more houses on their land will not be refused permission as has happened over the last 20 years or so. Just because the government requires more housing all over the country the answer is not green belt land. Housing is required in Guildford town and on the University and Sports Park by the Royal Surrey Hospital, where there is a perfectly good field not being used by Tesco’s.

Normandy has suffered long and hard over many years with travellers sites and always seems to be the parish/village that seems to be chosen for any and every proposed development “Oh Normandy will do we can stick it there” without any care of goodwill to the residence in that area. Surrey Council should look at all of Surrey and not always think that just because Normandy is rural that they can stick housing there, which in essence would mean that we were no longer a village and become part of Guildford town.

Please, please, take my very personal comments to heart and rethink this very large proposal and explain why you are building on GREEN BELT LAND when surely there must be other land that can be used within Guildford Borough Council.

Attached documents:

Comment: MM45 - LPMM18/1773   Respondent: W.P. Garson 8880833   Agent:

I am writing to express my objection to the above.

This development would be an encroachment into the green belt. There are no exceptional circumstances to justify this.

Apart from this fact there are a number of factors which make it inappropriate.

The infrastructure is not in place to support it. It would significantly increase the population of the village. Between 20 and 30 new dwellings have already been built in Glaziers Lane in recent years.

An additional 105 new houses would further increase the load on the infrastructure.

Traffic is already heavy in Glaziers Lane and much of it consists of heavy lorries. The small bridge over the railway is already showing signs of damage, which at some stage will have to be made good.

The site A64 is occupied in part by a small lake. Drainage has always been a problem in Normandy.

A lot of water runs off the north slope of the Hogs Back and at times overflow water infiltrates the gas supply in Glaziers Lane. Insurance of any houses built on this site might be difficult.

The local school at Wyke would have difficulty accommodating a large influx of new pupils.

The doctors’ surgery in Glaziers Lane would also be challenged, at a time when GPs are already struggling to provide a good service.

More serious consideration should be given to the use of brown field sites. eg. the large area now occupied by Waitrose in Guildford, for which there was no need. The land used for this development including a car park could have provided many more homes.
Overall I believe this an ill conceived plan and not enough consideration has been given to the possible consequences were it to come to fruition.

Attached documents:

**Comment: MM45 - LPMM18/2544  Respondent: Ms Sarah Irving 8883905  Agent:**

I am writing this email to object to the main modification MM45 to the Policy A64 (Land between Glaziers Lane and Strawberry Farm, Flexford). The modification states that this land is now “allocated for approximately 105 homes (C3), including some self-build and custom house building plots”. Before I state my reasons for my objection, I will include some background information as I understand it.

In their Draft Local Plan, GBC calculated that 672 extra homes should be built each year, but new lower population and household figures, just published by the Office for National Statistics, mean that GBC’s calculations have greatly overestimated how many students stay and procreate after finishing university. A revised figure of 360 homes a year is a much more realistic one and obviates the need to find extra sites to build in. Specifically, a lower housing figure means that building on the Green Belt, as proposed in The Plan, CANNOT be justified.

MM45 picks Site A64 as a site for development as one of five locations in the Green Belt. Site A64 is in the village where I live and I do not consider it suitable for a housing development for the following reasons:

In previous planning applications for this site, refusals have highlighted the enormous damage that would be done to the openness of the Green Belt should development be allowed. Development here would also close the gap between the two settlements of Flexford and Normandy, starting the urbanisation of what is now a VILLAGE community. It should stay as a village community and not be bludgeoned into a housing sprawl in what is meant to be protected Green Belt.

In the Sustainability Assessment linked to the proposal to develop Site A64 it states that, “There are no existing facilities in Flexford and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality in this way.” In addition, GBC has not indicated that improvements to infrastructure have been earmarked to accompany any development so the already stretched sewage and road systems around Site A64 would be completely overloaded.

The Development of 105 homes under MM45 would see a 7% increase in the number of houses in Normandy and Flexford on a site that has not featured in any of the previous versions of The Plan and which has therefore NOT been subject to public consultation.

“Exceptional circumstances” are needed to remove an area of land from the Green Belt. I would argue that GBC CANNOT argue exceptional circumstances to use Green Belt land in Normandy to build on, especially as their figures for housing need now appear to be greatly inflated.

GBC should now ask the inspector to relook at The Plan in the light of the revised housing figures and make new suggestions that relate to these lower figures. In terms of housing need, GBC should fulfil its obligations by building on brownfield sites within the town centre or on other available sites in the Borough which are not Green Belt sites. GBC should NOT build on Green Belt land when it is not necessary.

Attached documents:

**Comment: MM45 - LPMM18/2320  Respondent: Ken Marchant 8884225  Agent:**
The proposal for Normandy within the latest GBC plan

MM45 dealing with policy A64 proposal FLEXFORD settlement of 105 houses.

After many years all the previous GBC proposals for very good reasons have been refused after [unreadable text] legal appeals paid by the local [unreadable text]. This is yet another which I wish to lodge an objection for the following reasons:

1) No mention in the GBC submission of why the exceptional circumstances are for justifying using a part of the GREEN BELT surrounding the village.

2) The water table is very high and the area is liable to serious flooding.

3) The medical centre is already stretched eg it has taken my wife 5 weeks to get a doctors appointment.

4) The increased traffic will add to the very congested roads through the village.

5) The rail station is only a local line and the local bus route would be over 3/4 of a mile walk. There are no shops or post office and so all local purchases would involve use of a car except for those that do not have one.

6) The current sewage system is already overloaded and would require excessive restructuring work to be done.

7) The village school would likely need some expansion and car parking facilities.

8) The village is adjacent to the Surrey Hills an area of Outstanding Natural Beauty and would be adversely affected by building on the proposal Green Belt site, also the impact on the area from the Hogs Back would be affected.

Lastly I am a long time resident and rate payer living in the village and am concerned of the adverse effect the proposed intention would have of life in the village.

Attached documents:

Comment: MM45 - LPMM18/430  Respondent: Sandra Marshall 8887329  Agent:

Please note the following key issues concerning the proposed plan A64 in Glaziers Lane Normandy

There are no new infrastructure plans included in the proposal. The impact of 105 new homes would put impossible pressure on the village school which is already full to capacity and the local doctors’ surgery would have great difficulty coping with the needs of potentially 200-400 new patients.

The sewage system in Normandy is already overstretched and is prone to considerable flooding.

The road systems around Normandy and Flexford are not suitable for heavy traffic. The narrow bridge in Glaziers Lane was not built to carry heavy traffic and the narrow bridge in Westwood lane has the potential to be a bottle neck as well as being dangerous from motorists disregarding speed limits and right of way at the bridge as well as those turning out of Beech Lane.

The junctions at Wyke church and Glaziers Lane on to the Aldershot road experience traffic jams (increasing pollution in the village from idling engines) and the Glaziers Lane junction is an accident black spot. The junction at Flexford road and Westwood Lane is also a well known black spot for traffic accidents.

Previous applications on this site have been refused because of the damage it would do to The Green Belt. Why is it being reconsidered for an even larger development.
In short this site would place long term and unsustainable pressure on the local community with no benefit. Please forward to the relevant members of your team concerned with this issue.

**Attached documents:**

**Comment:** MM45 - LPMM18/443  **Respondent:** Gill Woolfson 8893697  **Agent:**

**OBJECTION TO A64**

A64 is a recent addition to the New Local Plan, Having had the chance to look at it, I have the following Objections.

The proposed site is on Green Belt, Green Belt which has been assessed by Guildford Borough Council (GBC) itself as some of the most sensitive in the Borough. The NPPF states that exceptional circumstances must be shown for development in the Green Belt. Unmet housing is not sufficient reason for such development. GBC have not shown any exceptional circumstances in the case of A64. Previous applications here have been turned down on account of the harmful impact development would have on the Green Belt.

The Local Plan has little residential development in Guildford itself. I query why GBC has such a focus on new retail space, such as the North Street development, when bricks and mortar retail is struggling to deal with online competition. GBC might consider whether such sites would be more suited to housing. The requirement to find housing early on in the life of the plan provided an opportunity to look at this site again; GBC have again sought to put development in the Green Belt.

Recent ONS figures show that the anticipated housing need in Guildford has been overstated. As yet GBC have yet to factor this into the Local Plan. Looking at the impact of the new figures should be undertaken before more Green belt is sacrificed.

Such a large (for Flexford) development will change the character of the settlement. It will also start to close the gap between Flexford and Normandy and it crosses the natural barrier of the railway line. There is nothing in this proposed development that will enhance the lives of Flexford residents, only disadvantages such as increased traffic with its associated harmful pollution and strain on an already problematic sewage system.

I have not been asked, but if I were, I would say that we need development in Normandy Parish. This development should be small scale (organic growth) and should be dwellings that people can afford to buy.

**Attached documents:**

---

**Comment:** MM45 - LPMM18/679  **Respondent:** Christine Wilks 8898241  **Agent:**

I would like to comment on the above application for 105 proposed houses in my village.

I have lived in Normandy for 62 of my 71 years and think that yes we do need some new houses with new families here. Normandy has an ageing population which could do with an injection of youth. However the site in question isn't suitable.

1) The sewers in the area are already overloaded, causing problems with drains and exacerbating regular flooding. This is a long standing problem which doesn't appear to have been addressed.
2) The extra traffic will make Glaziers Lane, a D road, a very busy road especially at peak times. When there are traffic problems on the A31 Hogs Back everyone cuts through Normandy down Glaziers Lane to get to work in town via the A323 and considerable queues build up. I see them from my house. We don't need any more traffic from this new development.

3) If this development goes ahead whoever exits from it is putting themselves directly in danger into the path of vehicles coming over the hump back bridge just yards away.

4) The said bridge is already degrading due to an increasing amount of traffic. I have noticed the road surface at the top has a more pronounced ridge and dip in it recently which is becoming a danger to vehicles which now 'bounce' over it. I know this isn't your problem but it is a factor to consider that without work being done the bridge could collapse one day.

5) There does not appear to be any upgrading of local infrastructure to cope with this development. See point 1.

6) We have no shops (unless you want karaoke equipment or a motorbike!), no pubs, no post office, no petrol station and if you need anything you have to get in your car and drive elsewhere. So more strain on the roads, more air pollution, more noise from these additional families going about their daily lives.

7) Previous planning applications for this site have been refused because of the damage to the Green Belt so shouldn't this still apply or is local government now being forced to renege on past promises by central government - who previously said that the Green Belt should be preserved.

When you hold these so-called public consultations do local people's views count for anything at all ? I sometimes wonder, as write yet another letter, whether anyone will take any notice of it. What we really need in Normandy ( as I have stated many times before) is a residential development for the elderly. Us 'oldies' could then downsize and free up our family homes with their big gardens for people who need them more than us. Any developer would have no difficulty selling these retirement homes because we have the equity to afford them and many of my neighbours agree with the idea. There would be a long waiting list. If any developer presents you with a plan like that please approve it straight away !

Comment: MM45 - LPMM18/4744  Respondent: Teri Hodgson 8900289  Agent:

Objection to the addition of site A64 (Flexford) in MM45

We are of the strong opinion that site A64 in MM45 should be removed from the local plan for the following reasons:

1. Neil MacDonald has demonstrated that building 360 homes per year would adequately support the very ambitious growth rate for Guildford proposed by the Planning Inspector. The figure of 630 new homes per year on which the local plan is based is massively out of step with the new Office of National Statistics figures.

2. We firmly believe 360 homes per year could be accommodated in Guildford town centre (as requested by the Planning Inspector) or on brown-field sites, thereby protecting our beautiful green, open spaces for future generations.

3. Site A64 is located within the Green Belt and no exceptional circumstances to remove it’s Green Belt designation have been provided.

4. The addition of site A64 is simply a knee-jerk reaction to the Planning Inspector’s request to build more houses earlier in the planning period. Over the years that the Local Plan has been under consultation, this site has never even been considered, let alone proposed. Further, all previous planning applications for this site (nothing to do with the Local Plan) have been refused, underlining the sensitivity of the site and the damage that would be inflicted on the Green Belt.
5. Building 104 new homes on such a small site will not be in keeping with the rest of the village, almost all of the houses along Glaziers Lane are family homes with extensive gardens. To achieve 104 homes on the proposed site would require very dense housing and involve multistorey flats, realistically this site could not accommodate more than 20 new homes if it is to remain in keeping with the rest of the village.

6. The villages of Flexford and Normandy lie in a shallow basin that is very prone to flooding, site A64 is currently a field that acts as drainage during periods of heavy rain, how do you propose to accommodate the water run-off once the field has been concreted over?

7. This site is close to Surrey Hills AONB, as such, building on this land will have a detrimental impact on local wildlife.

8. Site A64 is located on Glaziers Lane, a small D road, not really suited to cope with an additional 400+ car journeys per day.

9. The entrance to the site will be just north of the bridge over the railway line, with a notoriously blind summit that silly idiots speed over, having an additional 400+ cars exiting and entering the proposed site each day will inevitably lead to collisions. In addition, the railway bridge is currently in need of major repair work.

10. The sustainability assessment indicates site A64 is a very poor choice: Flexford currently has no facilities other than the train station, and the facilities of nearby Normandy village (GP surgery and primary school) are already over-subscribed. No improvements to the local infrastructure have been included in the plan to accommodate the proposed 2-400 new residents.

**Attached documents:**

---

**Comment: MM45 - LPMM18/666  Respondent: Raymond Woolfson 8901825  Agent:**

**Re: New Local Plan - OBJECTION TO A64**

My objections to the plan for A64 are as follows:-

- The proposed site is on Green Belt land. This land has previously been assessed by GBC as the most sensitive Green Belt Land in the Guildford area.

- The NPPF states that exceptional circumstances must be shown for development in the Green Belt. Unmet housing is not a sufficient reason for establishing Exceptional Circumstances. Indeed previous applications in Normandy have been turned down because of the perceived harmful impact that development would have on the Green Belt.

- Such a development will create an increase in traffic on Glaziers Lane. This road is a category D road and is not suitable for an increase in traffic. In addition no provision for improved infrastructure is included in the GBC plan.

- No benefit to the local community has been demonstrated in the plan and local residents were not consulted about what they thought about the proposed development.

- The proposed development is within sight of the Area of Outstanding Beauty. It will damage the view and have an adverse effect on the beautiful Surrey Hills.

- Why, instead, is building in central Guildford not being proposed? This was even suggested by the Inspector of the plan.

**Attached documents:**
I oppose the proposed development in Glaziers Lane.

1. This is a 7% increase in the size of Normandy without any accompanying improvements in infrastructure.
2. The existing bridge is dangerous with poor sight lines. Increase in immediate traffic will only acerbate the problem.

Attached documents:

--

I write to object to the Local Plan modifications as they apply to the proposed development of green belt land in Normandy/Flexford. This number of houses (105) is disproportionate in this location and will cause dangerous traffic congestion on a D road. Aesthetically it will blight the rural street scene and represents unwanted and destructive congestion.

This part of the Local Plan is opposed by the Parish Council, our MP, county councillor and the borough councillor who has said he will vote against it in council. This opposition was reflective of the views expressed at a very well attended meeting in the village hall. If this exercise in consultation and localism is anything other than cynical manipulation you should drop this proposal.

The proposed plan will not help solve the housing problem Surrey and Guildford have. We need cheap flats and small houses to accommodate young people that are affordable and centrally located near shops, entertainment and easy commuting hubs. A shop-less village, necessitating a car journey for every bottle of milk, with no social space for those under 60 is the wrong location for new development.

Developers want green field sites in high value locations while the borough council is too underpowered and badly led to be able to develop alternative capacity and so we are presented with dismal proposals such as this. A plan to dissolve the borough and county councils into a unitary authority, elected by proportional representation, would be a better use of energy than this assault on the green belt.

RE MM45 Policy A64

Just had water supply etc checked, and new wonderful foothpaths, and now another "major new housing"

The lane is used by large vehicles unable to get under bridge in Westwood Lane, and is always busy.

At present time building work on 2 houses in Lane causing difficulties for pedestrians and vehicles. So another housing development will cause complete havoc on that area of Lane Bridge over railway.

Do the GBC Planning Dept ever get off their seats and take a trip of the area?

Comment: MM45 - LPMM18/5846  Respondent: Nichola Armstrong 8914945  Agent:

'Main Modifications' to the Local Plan - proposed site, A64, for 105 homes in Greenbelt, Flexford, Normandy

I strongly object to A64, a major development on Greenbelt in Flexford and a main modification in the draft local plan. It must be removed for the following reasons.

A64 is a new site that has not appeared in previous versions of the draft local plan or ever put out to consultation.

No 'exceptional circumstances' have been submitted by Guildford Borough Council to move the Greenbelt boundary in Normandy.

I find it incredible that a major development of this size has, out of the blue, been proposed by GBC. The site is in Greenbelt, is categorised as red as a site of extreme sensitivity. It would impact on the openness of Normandy and Flexford up to the AONB and views from the AONB across Flexford and Normandy to the THBSPA. Site A64 would urbanise and destroy the distinct and unique rural characters of Flexford and Normandy.

In GBC’s own Sustainability Assessment, Flexford is the most smallest and rural, "There are no existing facilities in Flexford and so it is not possible to argue that development would help secure the long term future of village facilities, and hence contribute to village vitality in this way." A64 will not bring any benefits whatsoever to Flexford but with a 7% increase in housing will only make the existing infrastructure a lot worse.

Glaziers Lane is a category 'D' road. The traffic congestion in the local and surrounding locations are well documented and acknowledged, there is also a lack of infrastructure and facilities to accommodate another 105 homes.

Rather than destroying a site of extreme sensitivity a much more suitable and sustainable location for housing is Guildford Town Centre with a public transport hub, infrastructure, shopping facilities, entertainment etc. One example is North Street, Guildford, run down, with empty shops, ugly architecture from 60's to the 90's, crying out for creative and sensitive design to rejuvenate the whole area with new homes, rather than GBC’s vision of unrealistic emphasis on yet more retail space. Potentially Debenhams and House of Frazier could be the High Street's next victims. Shopping habits have changed radically and GBC need to move with the times!

The Office for National Statistics has published a revised population growth of 45% fewer households in Guildford. This is a significant reduction in 'housing need' which must be considered by Guildford Borough Council and Mr Bore the planning inspector. The borough's 'housing need' targets in the draft local plan must be lowered by 45% to reflect the revised projections. This would protect and preserve the extremely sensitive Greenbelt site, A64 from inappropriate development proposed by GBC.

By reducing the housing targets by 45% to the revised projections, developing redundant, empty shops, boarded up houses, for example North Street into well designed and sustainable homes will invigorate Guilford Town Centre. Well
designed development here will be positive, beneficial and economic. To build excessively on Greenbelt land in rural areas only creates negativity, congestion, overloads the infrastructure, is totally unsustainable and brings no benefits to rural areas at all.

Please protect and preserve the extremely sensitive Greenbelt site, A64 from inappropriate development and remove it from the local plan. You have already acknowledged there is no benefit to Flexford and Normandy whatsoever.

Attached documents:

Comment: MM45 - LPMM18/5564  Respondent: R Atkins 8916673  Agent: 

I would like to object to the Normandy proposal (MM45 RE POLICY A64) on the following basis,

1) The village contains no facilities and a further 105 houses would have no local amenities or serve any benefits to existing householders.

2) The infrastructure is unable to cope with the current level of housing even without a further 105 houses.

3) Flexford and Normandy are small and rural and hence unsuitable for an additional 105 houses.

4) More efforts should be made to build houses on brownfield sites in Guildford where facilities and amenities exist.

5) Previous applications on the site have been rejected on the basis that damage would be inflicted on the green belt and its openness.

Attached documents:

Comment: MM45 - LPMM18/4898  Respondent: Andrene Aaronson 8916769  Agent: 

And then there is the question of whether the proposed location is suitable for a volume of houses given that Glaziers Lane is a D Road, with a dangerous chicane on the bridge over the railway, prone to flooding and subsidence at the northern end of the Lane, and part of dangerous current traffic congestion north to the Guildford crossroads and south to the A31.

Although I was unable to attend the public meeting in Normandy on 2 October, I understand that there was a remarkable turnout demonstrating the strength of feeling in the village. And that the universal view was that this development is unsuitable and will benefit neither the current community nor those who really need affordable housing and would find themselves ill-served by the current facilities and infrastructure in the village.

Thank you for taking account of my views.

Attached documents:

Comment: MM45 - LPMM18/1530  Respondent: A.I. Olley 8918497  Agent: 

2317 of 2575
As a lifetime resident of Glaziers Lane, Normandy I write to object to the proposal to build 105 houses over a three year period on Green Belt land to the north of the railway line east of Glaziers Lane. Surely there are brownfield sites in the Guildford area where these properties could be built. Are there exceptional circumstances why this site has been chosen particularly as this would have an adverse effect on the Surrey Hills Area of Outstanding Natural Beauty? This would have an adverse impact on the vista from the Hogs Back in the AONB. I recall too, that planning applications on this site have been refused in the past. Why has this now changed?

The development would, I understand, result in a increase of 7% in the size of Normandy without any improvements in the infrastructure. The roads and sewerage systems are already overloaded, there are no shops in the village and only a sub surgery from Fairlands Medical Centre coping with the population of the village. The access to and from the site also gives real cause for concern as it will inevitably be extremely close to the bridge over the railway line. The bridge is narrow and would not cope with all the extra traffic it would have to carry particularly whilst the building was taking place and it would be impossible for heavy lorries etc to pass each other on the top of the bridge and accidents would be inevitable.

There is a fishing lake occupying a large part of the site –what would happen to this? There is also the question of the site’s proximity to the Strawberry Farm waste management site-could this create possible environmental hazards-has this been assessed?

I trust my concerns will be carefully considered.

Attached documents:

Comment: MM45 - LPMM18/3229  Respondent: Samantha Marchant 8927105  Agent:

I am writing with regards to the public consultation on the ‘Main Modifications’ to the local plan. In particular with reference to MM45 policy A64.

I am against the proposed site, A64, for 105 houses on Greenbelt in Flexford for a number of different reasons, as outlined below, I would like these to be considered as you review the plan.

- It is unclear what the exceptional circumstances are to develop red-rated Greenbelt land that has been previously discounted as suitable for development.
- The sustainability assessment that accompanies the proposed site outlines that of all the sites proposed Flexford is the smallest and most rural. The proposal does not include improvements or additions to existing infrastructure or services.
- It is difficult to understand how an additional 105 homes will generate economic growth to Flexford. There are no existing facilities in Flexford, therefore it is impossible to identify any particular opportunities for the rural economy.
- With regards to Flooding, Flexford being former flax fields, has considerable surface water and suffers from flooding.
- In reference to Biodiversity, the site is situated very close to the Thames Basin Heaths Special Protection Area.
- The proposed development will have an adverse effect on the rural character of the village. It will also impact the view from the Hogs Back in the AONB.

Attached documents:

Comment: MM45 - LPMM18/1015  Respondent: Peter See 8933185  Agent:
Main Modification 45
Policy A64: Land Between Glaziers Lane and Strawberry Farm, Flexford (105 homes approx.)

Objection. Too many homes are planned, so the development will not be in keeping with existing development. Also, there will be insufficient space for:

a) Attractive and safe cycle routes off the carriageway, eg to the railway station.

b) Adequate driveways for all homes.

c) Adequate gardens for all homes.

d) Highway trees and attractive green spaces.

Future Action

Bearing in mind my letters to you over the last 4 years about the proposed Local Plan, on this occasion I would appreciate a reply from you regarding the points which I have made in this letter. Thank you for this opportunity to comment.

Attached documents:

Comment: MM45 - LPMM18/5026  Respondent: Gerry Armstrong 8947457  Agent: 

I want to register my opposition to this development:

There has not been enough focus or thoughtful planning ideas for the development of Guildford town centre. Here is where true sustainable development should take place eliminating the need for car use as shops, public transport, entertainment etc would all be on the doorstep. It is crying out for better use of the existing space and some creative thinking. For example, just look at the underutilisation of North Street were tired and ugly architecture prevails and many of the shops are now closed. This area should be redeveloped with sustainable high density apartments that could be accommodated over retail space and designed to complement and enhance this area. More homes in the town centre would be beneficial to all and would help reduce traffic and relieve pressure for yet more development on the Green Belt.

The Flexford/Normandy site is in the green belt and Guildford Borough Council have not made clear the ‘exceptional circumstances’ that are needed to redraw the green belt boundary in this area. Previous applications to build on this site have been refused because of the damage that would be done to the openness of the green belt and the extreme sensitivity of this site. Local people have not been consulted and their views haven’t yet been taken into consideration.

This is a rural area and should remain so, please reject this proposal.

Attached documents:

Comment: MM45 - LPMM18/1515  Respondent: Earl of Onslow and the Trustees of Onslow Estate 8957345  Agent: Nexus Planning (Adam Ross)

MM45 – Land between Glaziers Lane and Strawberry Farm, Flexford

For the reasons set out in our detailed representations to MM2, the proposed allocation of this site is unjustified given the Council’s evidence in the SA Addendum 2018, and is contrary to the Council’s own spatial hierarchy / approach given its
failure to allocate the deliverable, more sustainable and sequentially preferable site at Clandon Golf (as an urban extension to Guildford).

**Changes Required**

For the reasons set out in detail in our representation to MM2, the revised spatial strategy (and specifically the allocation of the sites identified in MM39, 43, 44 and 45) is unjustified and unsound.

The Council must re-visit the strategy to allocate additional sites to deliver in the first five years of the Local Plan (post-adoption) and base its decisions on clear evidence (most notably the SA Addendum) and its own spatial hierarchy / approach. This will result, on the Council’s own evidence, in the identification of a different development option (and therefore a different suite of sites) to those now proposed. It will also, most importantly, result in a more sustainable distribution of development (on the Council’s own terms).

**Policy A64: Land between Glaziers Lane and Strawberry Farm, Flexford**

**MM(undef) – OBJECTION A64-1**

Given the excess number dwellings proposed in the Local Plan (see Objection S2-1 to modification MM2), the increase in housing provision following the Planning Inspector’s examination of the Local Plan should be reversed in accordance with Objection S2-4 above. This review should include Site A64 (Land between Glaziers Lane and Strawberry Farm, Flexford – 105 dwellings).

**Attached documents:**

---

**Comment:** MM45 - LPMM18/4560  **Respondent:** Keith Witham 10260769  **Agent:**

I OBJECT to this Proposal and ask GBC to remove site A64 from the revised draft plan.

My main concern is the effect of this proposed development site for 105 new homes are the effects on traffic, road safety and congestion. Glaziers Lane is a “D” road and over 100 new homes would add at least 150 cars onto the local roads daily.

The ‘exceptional circumstances’ that are needed to redraw the Green Belt boundary in Normandy have not been shown.

GBC should further review the overall housing number in the Local Plan as the current number may be exaggerated, failing to take into account the latest housing projections from the Office of National Statistics, which suggest the numbers in the Plan are overstated by 45%.

The lack of a convincing justification for site A64 in particular suggests that it was inserted just to respond to the Inspector’s challenge, taking no account of the circumstances of its location.

A large part of site A64 is a fishing lake and it is not even clear that all of it is even available for development.
The road and sewerage systems in Normandy are already stretched and 7% more houses – all to be built over a three-year period - will create a significant additional burden.

Although included as a ‘Main Modification’ to the Local Plan no accompanying improvements to infrastructure are suggested. There are no existing facilities in Flexford and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality. This site only places long term strain on the community without conferring any community benefit.

I believe that Normandy residents have shown in their responses to previous Local Plan consultations that they clearly want to preserve the rural nature of the Normandy /Flexford community.

Attached documents:

Comment: MM45 - LPMM18/1182  Respondent: Mr Paul Wordingham 10651105  Agent:

There is no justification in allowing the use of green belt land for building new housing in the Normandy and Flexford area. There is adequate brownfield land in the Guildford area to accommodate extra housing needs. There is also inadequate road and sewerage capacity in the area to allow for such a large number of houses to be built.

Attached documents:

Comment: MM45 - LPMM18/724  Respondent: Mary Turnill 10772961  Agent:

Submission Local Plan - Normandy

I wish to add my own objections to the new local plan. Rather than repeat all the comments my husband has made, I wish to post my complete agreement to the comments he has made below.

I wish to OBJECT most forcibly with the proposed development in Normandy in Glaziers Lane. My reasons for objection are as follows:- Inadequate Infrastructure, especially the lack of suitable roads; flooding and Sewage problems leading to severe Health considerations; The impact on the Environment; The use of Red notated agricultural land, and in the Green Belt for building 105 houses; The lack of local consultation with GBC to discuss the desires of the Village, in line with the Governments declared policy of the need to ensure that the village actually WANTS the extra housing. I will expand on each.

1. Inadequate Infrastructure.

I refer primarily to the effect 105 extra houses, each with a probable two cars, will have on the local traffic situation, which is already creaking. Glaziers Lane is a country lane, which has a dangerous bridge associated with the railway line. This road is on the border of the planned development.

Whenever there is an accident on the Hogs Back or A3, traffic tries to exit via Wanborough Hill to use Glaziers Lane, which is neither capable nor designed to take that volume of traffic. Anyone who tries to access the A31 at peak traffic times from either the Puttenham or Wanborough directions will know how long the queues are, and the potential for accidents for traffic leaving the A31 at the Puttenham turn off. This could severely jeopardise Emergency traffic trying to access the new development, whose road structure might well be not capable of allowing Fire and Ambulance vehicles to attend an emergency, especially during peak traffic times.

2. Flooding and associated Sewage Problems.
Parts of Normandy, especially at the southern edge of the proposed development and in the area next to the Hoe stream, are subject to severe flooding problems, and the associated release of sewage into people's properties and into the Hoe stream. The Station Car Park is regularly flooded during the downpours which have been occurring frequently. The Hoe stream also floods, which affects Glaziers Lane at the bridge crossing the stream, and sewage has been released into it, causing a severe health hazard.

The proposed development area at present allows natural drainage through the soil and trees, although the water table is already high in this area; if this area is concreted over, the resultant run off of surface water would overwhelm the present system, causing even more flooding in the local area. It is noted that no infrastructure has been planned to take care of this hazard.

**Environmental Impact**

The village of Normandy lies within an area of outstanding natural beauty close to the Surrey Hills to the South and the Army Heathland to the North. It provides a welcome rural break between the towns of Aldershot and Guildford, and is in designated Green Belt. It features a wide range of wild life, including many endangered and protected species, and the addition of 105 households, with their associated cats, would decimate much of the wild life that lives here. In addition, the replacement of the present agricultural land with housing would remove a valuable habitat for all the wild creatures that have come to rely on the peaceful nature of the area.

3. The use of non-safeguarded Agricultural Land for Building.

The area proposed for building 105 houses in Green Belt, designated Red agricultural land, which has been constantly used for grazing and livestock. The government has repeatedly said that such land should NOT be used for building, unless there were overwhelming requirements to do so. These requirements have not been shown to exist in this village, and sufficient use of Brown field sites has not been adequately explored.

4. Legal aspects

Guildford Borough Council, unlike the other Surrey Councils, insists that there is a requirement for double the number of houses in this area compared with theirs, an estimate now challenged by the Office of National Statistics which says that the estimate 45% too high. That former estimate was provided by a firm which refuses to disclose how it came to that conclusion on the grounds of "commercial sensitivity". Thus, the Council has no way of verifying how accurate this estimate is, or what assumptions were used in coming to this figure. It is imperative that this arbitrary figure be challenged, and another firm used who will be transparent in the assumptions it makes, so that a proper estimate can be used.

In summary, and in view of the points I have made above, I would be grateful if you would log my strong objections to the proposal to build 105 houses in Glaziers Lane in the village of Normandy.

**Attached documents:**
Guildford Borough Council has miscalculated and overestimated the number of homes that it needs to build - something that should be re-examined with consideration for the latest predictions for household formation from the ONS.

On top of these anthropocentric arguments, the land also forms an important wildlife corridor, through which animals can find a safe route to transit from the rural areas East of Flexford, through Pussey’s copse and the rural land to the West, connecting up many areas of local green space. If development goes ahead then this corridor will be destroyed, disrupting the existence of many of the animals that enrich the local landscape.

Furthermore, I have concerns about the traffic and infrastructure of Glaziers Lane - a lane which is categorised as a ‘D’ road, has persistent problems of subsidence, leading to poor quality of road surface, which is exacerbated by the heavy traffic flows that this road experiences at peak times. The railway bridge on Glaziers Lane is another point which is already problematic, and can only be made worse by the pressure of an extra 200 or so cars looking to enter or exit the proposed Policy A64 at peak times. This sort of development cannot be sustainable without additional investments in infrastructure such as traffic calming measures on the railway bridge. The extra traffic generated by the residents of proposed Policy A64 will also lead to a worsening of the already terrible traffic jams seen at the Normandy crossroads, and the Hogs Back junctions above Wanborough. This interchange with the A31 is already the site of nasty tailbacks, causing stop-start traffic jams on the steeply inclined roads on either side of the Hogs Back. This will surely be made even worse by the extra traffic, increasing the likelihood of accidents and decreasing quality of life for the local residents who have to suffer these jams! Whilst the developers hope to get permission for such sites on a rationale of their proximity to railway stations, its hard to imagine that any of these new residents will use the train to take their kids to school or to do the weekly supermarket shop. Instead they are much more likely to do these things by car, meaning more cars on the local roads, and more strain on the road infrastructure.

In a similar vein, I have concerns about the sewerage systems here in Glaziers Lane. These are already heavily overloaded, which causes problems at the low point of the lane (where the road crosses the stream). I am worried about the effect that an extra 105 homes worth of excrement will have on these already overloaded systems, and so I again make the point that a development such as that which is proposed, cannot be sustainable without accompanying investments in local infrastructure.

Finally, I would like to draw attention to the fact that public opinion in the village seems to be overwhelmingly opposed to the proposed development of Policy A64, as was clear to anyone in attendance of the public meeting hosted by Normandy Parish Council and Normandy Action Group on the 2nd October. At this meeting it was concluded that the proposal will bring no tangible benefit to the village, instead only causing more problems of an extra burden on our already strained local services, such as Wyke School and the Glaziers Lane surgery, as well as local infrastructure, as I have already discussed.

In conclusion, I am concerned not just about the proposal for MM45 of Policy A64, I am concerned about the whole process of planning and development on Green Belt land, because it seems that not enough consideration is being given to the problems that will be caused by higher population on our local services, infrastructure and environment.

Thank you for giving us this chance to express our views as local residents, in a matter that has the potential to drastically affect the future of our village.

Attached documents:
2) Previous planning applications on this site have stressed the extreme sensitivity of this site.

3) The sustainability of this site - it is the smallest and most rural

4) The road + sewage systems in Normandy are already overloaded + cannot support more development.

The proposal development would have a detrimental effect on the Surrey Hills area of Natural Beauty.

When 'The Paddocks' was built some 40 years ago permission was sought to build twice as many houses, the Council at that time refused permission on the grounds that there would be too much traffic generated - how right they were.

Comment: MM45 - LPMM18/5512  Respondent: Guildford Greenbelt Group (Susan Parker) 10799425  Agent:

**MM45 Land between Glaziers Lane and Strawberry Farm, Flexford**

This new site for 105 homes in red-rated Green Belt has not featured in any previous public consultation on the Local Plan. It would increase by 7% the number of dwellings in Normandy Parish, and would place considerable strain on an already inadequate road and sewerage infrastructure in Glaziers Lane. By extending the Flexford settlement boundary north of the natural break of the railway line it would also start to eat into the open space between the distinct settlements of Normandy and Flexford, and damage the openness of the Green Belt in this area. In addition to the sensitivity of the site itself no “exceptional circumstances” have been demonstrated that would justify removing it from the Green Belt. There are also serious doubts about the ability of the site to deliver houses early in the Plan period, which is the sole justification for its inclusion at this late stage.

Comment: MM45 - LPMM18/5824  Respondent: Anthony Jordan 10818305  Agent:

I am writing to OBJECT to the above sites late addition to the GBC local plan.

My property is adjacent to the proposed development and as such some of my objections are listed below.

1/ EROSION OF THE GREEN BELT.

The site is to have 105 houses built over a 3 year period on designated green belt land, this equates to a 7% increase in the size of Normandy, with no improvements in infrastructure.

The very nature of the area would be changed from green fields to suburbia.

Previous applications to develop this site have been refused with " No Exceptional Circumstances " being one of the reasons. What has changed now.

2/ INCREASE IN TRAFFIC.

The definitions of D road and Lane are as follows.

D road ….. low density of traffic.
Lane.....narrow road especially in rural areas.

In the 7 years of residing on Glaziers lane the amount and type of traffic has increased considerably, to the extent that the above definitions no longer apply. We now have car transporters, double length HGV learner drivers, an assortment of heavy duty trucks (few adhering to the 30 mph speed limit) and the usual assortment of cars vans etc. In fact some are so large they cannot keep within the central white line and only just go under the overhead electric cables. An increase, of a minimum of 200 hundred cars, with new residents would cause even greater congestion and present an ever increasing danger to pedestrians.

3/ PUBLIC TRANSPORT.

Southwestern railways operate Monday to Saturday a twice hourly service from Guildford to Ascot.

Kite operate a bus service from Guildford to Aldershot from the end of Glaziers lane, and the 520 bus service operate 3 times a week along Glaziers lane to Woking once and Guildford twice.

By intimation because the site is near to Wanborough station is GBC expecting the public transport options to be used instead of cars. Does GBC have input into these public transport options to be able to increase frequencies and thus deter new residents not to use cars.

4/The proposed site is built on CLAY and as such during heavy periods of rain FLOODS.

Therefore with all the excavation needed I am very concerned that the natural water table and drainage would be damaged. and water would find new channels leading to more flooded areas possibly on my property.

In conclusion I must ask you to review the need to use this site and utilise any brownfield/derelict land rather than the Green Belt, because once gone its gone forever.

Comment: MM45 - LPMM18/5599  Respondent: Nicola Ford 10868161  Agent:

I am writing to object to MM45, dealing with Policy A64.

This site is Green Belt land and previous applications to build on it have been rejected. No new exceptional circumstances have been put forward to make this proposal any different.

If the proposal did go ahead, it would merge Flexford and Normandy together, without providing any new amenities to contribute to the village community.

There are Brown field sites in Guildford town centre which would be more suitable to build houses on, which have so far been overlooked in the Local Plan.

Please register my strong objection to Policy A64.

Attached documents:

Comment: MM45 - LPMM18/2314  Respondent: E.M. Ellery 10897313  Agent:
Main Modification 45 dealing with Policy A64

As most of Normandy is ribbon development a housing estate of this magnitude does not fit!! Which I thought, planning is all about, plus its Green Belt with no special circumstances, except a very high water table, between five and fifteen houses propped in here and there go unnoticed, that way you retain village status, site A64 is some distance away from village school, surgery, shops, village hall, so out comes the car. So no wonder the government target for global warming are unachievable, with so many houses built far away from amenities. And how does wildlife stand with all this nibbling of the countryside, not very well!!

Attached documents:

Comment: MM45 - LPMM18/1334  Respondent: Claire Walker 10911201  Agent:

As far as I can see there are no exceptional circumstances that justify taking this site out of the green belt. Planning permission has already been turned down for this site on a previous occasion for the very reason that it would be damaging to the openness of the green belt.

we have no facilities in Flexford or Normandy so additional housing on this scale will do nothing to secure the future of village facilities. In fact it will put a tremendous strain on our doctors surgery and primary school.

The majority of people living in Glaziers Lane at present own at least one car and use it daily. The effect of a further 200 cars using this D road would be a disaster. The access would be where pedestrians have to cross the lane to the other side because the pavement stops on one side and continues on the other, just before a bridge with a blind summit.

Glaziers Lane frequently floods, so removing the sponge effect of green fields and replacing with 105 houses would take away the effect of the fields and further increase the problem of flooding. To say nothing of the problems with sewage which has over the last few years run freely into the stream on our field boundary and into the adjoining fields.

If houses need to be built in Normandy, and I think the number needed is incorrect and overinflated, then build them on brownfield sites and in numbers that can be sustained by the infrastructure and the existing residents.

I strongly object to this modification of the local plan.

Comment: MM45 - LPMM18/1621  Respondent: Ray Partridge 10911297  Agent:

MM43/44/45 - sites at Chilworth, Send and Flexford should be kept as Green Belt as revised housing need figures do not justify the sacrifice of this precious resource to housing.

Thank you for providing this consultation opportunity.

Attached documents:

Comment: MM45 - LPMM18/754  Respondent: Laura Bouncer 10959041  Agent:
I am writing to **object** to the above change to the Local Plan proposal of site - Policy A64: Land Between Glaziers Lane and Strawberry Farm, Flexford; for the following reasons:

1 - This is green belt area and adjacent to an area of outstanding natural beauty. If approved its development would fundamentally alter the importance of protection of our green belt for future generations, aside from visually impacting an area of outstanding natural beauty adjacent to it and highly visible from the top of the Hog’s Back.

2 - There are many brown field sites listed on the GBC web site. Whilst recognising that for developers these are not a cheap option’s v’s green belt land, surely repurposing brown belt land must come before the desecration of the green belt.

3 - Glaziers Lane is a narrow lane with an awkwardly angled railway bridge and sharp right hand bend that compromise the road width even further. Pedestrians need to cross the road several times along it's length as the pavement is only available on one side at a time. Such a development with all the additional traffic is going to increase the risk of a serious accident/death in the Lane. It’s important to note this is a Lane not a road, and any possible entrance exit to this site would be unsighted by traffic approaching from the South increasing this risk significantly, especially as at peak times people speed down the lane.

4 - Light pollution is currently very low in Glaziers Lane this development would increase this considerably with cars at night turning in and out of any access road, which will have a knock on impact on wildlife in the area.

5 - We currently have a thriving population of hedgehogs which do cross the Lane and increased traffic is highly likely to impact them directly, whilst not on any endangered list now there is serious concern over their future as they continue to disappear from our environment.

6 - There are a good number of mature oak trees in site A64, with all of the issues over the last couple of decades with disease we need to ensure their protection, not building here and so not impacting their environment will protect them.

7 - Pollution from vehicles and noise is also low in this part of Glaziers Lane, adding 105 houses would dramatically increase these pollutants, adding circa 200 plus cars to the area would be a significant impact on physical and mental health of all living in the area.

8 - People park in the lane especially if they have a larger number of visitors, with the current limited housing this is less of an issue but adding in so many more houses with limited parking will result in an increase in the occasions when people will park in Glaziers Lane and again increase the risk of accidents (as people always park as near as they can to where they want to be) coupled with the higher traffic volumes again especially important being so near the blind approach from the railway bridge.

9 - We are in an area of clay with a high water table, which the standing water after rain at all differing levels reinforces. Building more housing on this land, where there is currently a very large lake, clearly does not make sense.

10 - Assuming the plan will result in the lake being drained for houses to be built, this will result in the loss of the wildlife it supports. A survey will need to be carried out to ensure endangered species are not adversely affected. Also the lake possibly has a source of water into it that could causing risk of flooding.

11 - Sewage / general drainage is an issue in Glaziers Lane, is a significant issue in the Lane. Adding 105 houses will place a massive additional strain on an already challenged sewage system (the system has already collapsed twice in the last few years at the northern end of the Lane, and dip has started forming again recently so later this winter may see it collapsing again). All the additional lorries over a 3 year period to build these houses will massively accelerate this issue and the risk of damage to the road and the just renewed pavement.

12 - The lorries associated with Backhurst etc are already noticeable in that you can feel them in the house as they go by (sometimes at excessive speeds!!) The massive increase in such large vehicles is going to further damage the road and potentially cause structural issues to houses in the area. Also the buses and lorries that currently come down the Lane, which is D rated, find it very difficult to stay on their side of the Lane as it is narrow plus are unable to turn in and stay on the correct side of the road, which is extremely dangerous to other road users including pedestrians.
I am entirely opposed to the development. It was not proposed in the previous plan and would remove a large chunk of green belt. It would further create an urban creep.

Guildford Borough Council (GBC) is consulting on a revised version of its Local Plan to include a new site (A64) in Normandy with 105 houses built over a three year period on Green Belt land, a 7% increase in the number of houses in Normandy and Flexford.

The proposed site has not been included in any of the previous versions of the local plan that have gone out for consultation as the area in question was rated as “red” for sensitivity. If approved, this would become the first incursion into the Green Belt by crossing the natural barrier of the railway line separating Flexford from Normandy with the potential risk of major urbanisation.

The plan states that it wishes to protect the Green Belt and will only encroach into the Green Belt under exceptional circumstances. However, GBC has not explained the ‘exceptional circumstances’ that relate to this site. Previous planning applications for the development of this site have been refused on the grounds of its extreme sensitivity and the potential damage to the openness of the Green Belt.

GBC has proposed no improvements to infrastructure in Normandy and Flexford. Road and sewage systems are already overloaded and a 7% increase in houses over a three-year period will only make matters worse.

In addition planning permission has been agreed for the construction of a new road bridge on the A323 spanning the railway line between Aldershot and Guildford at Ash Station so as to remove the current bottleneck for vehicles travelling between Aldershot & Guildford, as well as an imminent major housing development in Ash/Tongham. The increased traffic from this development will have serious consequences for the A323, the A31 Hog’s Back and Normandy. 105 new houses in Glaziers Lane will add further to congestion and the increased traffic exiting Glaziers Lane on to the A323 will be both hazardous and detrimental to the village, especially during peak times.

Finally the Local Plan makes no mention of the impact of Site 64 on local infrastructure – doctor’s surgeries, sewage, utilities, drainage – there is already a large lake within the curtilage of the proposed site, which would render it liable to flooding.
- this is Green Belt land and should remain so to preserve the historical boundary between the two settlements;

- the existing roads could not sustain the additional traffic during the building process or when the new homes are occupied. NB there are no shops at all in the immediate area and no buses down Glaziers Lane so people do rely on cars to get to shops etc - hence the very real concern about increased traffic;

- the existing facilities would not be able to meet the demands of the additional families - ie the doctor's surgery on Glaziers Lane where existing patients already have to wait three weeks for an appointment and Wyke Primary School (for 105 homes it would be reasonable to expect at least 75 children - two and a half classes worth in a primary school).

Comment: MM45 - LPMM18/1904  Respondent: Mr Martin Bramley 11055489  Agent:

Please see file attachment "GBC Local Plan submission 22-10-18"

There would appear to be statements within the Local Plan relating to the inclusion of Site A64 as a “Village Extension” creating 105 houses built over a 3-year period, which are somewhat tenuous to say the least:

1. The proposed site is in Green Belt land and, if approved, becomes the first incursion into the Green Belt by crossing the natural barrier of the railway line separating Flexford from Normandy thereby making Normandy susceptible to major urbanisation. Yet the plan states that it wishes to protect the Green Belt and will only encroach into the Green Belt under exceptional circumstances. No attempt has been made to explain the exceptional circumstances that relate to Site A64.

2. The proposed site was not included in the original local plan, that part of Normandy being rated as “red” for sensitivity. Evidently the current submission no longer regards the area as sensitive, a volte-face on the part of the Council without any explanation given.

3. The Local Plan acknowledges that Site A64 is the smallest and most rural of all the sites proposed. At the same time, the Local Plan refers to the now agreed development of Ash and Tongham but without going into greater detail. This scheduled development is imminent and not more than 3 miles west of the proposed Site A64; it is also a major housing development covering 96 hectares of land. In addition planning has agreed to the construction of a new road bridge on the A323 spanning the railway line between Aldershot and Guildford at Ash Station so as to remove the current bottleneck for vehicles travelling between Aldershot & Guildford. Site A64 is located on Glaziers Lane which exits via a cross road onto the A323; today exiting onto the A323 is dangerous and extremely difficult during the morning and evening peak periods. The Ash/Tongham development will add considerably to the current congestion: 105 new houses in Glaziers Lane will add further to this congestion irrespective of the near proximity of Wanborough Station and the proposed additional station serving the Royal Surrey Hospital and the Surrey Research park. There is no justification for building a further 105 new houses on Green Belt land in the short term and probably not even in the longer term if the latest ONS housing projections are taken into account.

Finally I cannot find anywhere within the Local Plan mention of the impact of Site 64 on local infrastructure. The proposal to build 105 new houses represents a 7% increase in the number of houses in Normandy & Flexford and is considered to be a “Main Modification” yet there is no impact assessment on doctors' surgeries, schools, supply of utilities, sewage, drainage – there is already a large lake within the curtilage of the proposed site – shops (there are no local shops) and finally road traffic. This part of the Local Plan gives the impression of being cobbled together purely to respond to the Inspector’s challenge to the original Local Plan.

Comment: MM45 - LPMM18/4823  Respondent: Garry Scheide 11089377  Agent:

Re Normandy proposal Main Modification 45 policy A64..

I have many concerns some of which are the local infrastructure is unable to cope with the current traffic, these include numerous Heavy goods vehicles passing the proposed site on a daily basis to local businesses. The planned access is also close to a small road bridge with width and visibility restrictions and would be a major safety concern. Glaziers lane is a notorious (rat run) during the day. I am aware there are numerous other considerations why this site is not suitable and I’m surprised that this late addition to the Guildford local plan is even being considered. Please ensure that my objections are registered.

Attached documents:

Comment: MM45 - LPMM18/3756  Respondent: Alastair Lawson 11115361  Agent:

The background of my response is set against awaiting for the official figure of our future housing need to be revised downwards, the potential of having to take on Woking’s unmet housing need and me being unclear why these five sites have been magic’d into the Local Plan at the last minute simply because the Inspector in the EIP wanted more development in the first five years of the plan rather than moving those already mentioned in the proposed plan being bought forward.

In addition those residents of this rural community (around 200) who came to a meeting called by the Normandy Parish Council overwhelmingly (only one lone hand was in favour) clearly felt that this proposal to build 105 houses on Site 64 should be rejected - clear democracy in action.

I object to this for the following reasons:

- **Green Belt**

  This parcel of land is designated Green Belt and therefore should have full protection from development as it fulfils the rules…

  To check the unrestricted sprawl of large built-up areas

  To prevent neighbouring towns from merging into one another

  To assist in safeguarding the countryside from encroachment

  To preserve the setting and special character of historic towns

  To assist in urban regeneration, by encouraging the recycling of derelict and other urban land

  In fact this site is a ‘red-rated’ area of Green Belt.

- **No exceptional circumstances**

  To build in the Green Belt you have to prove there are exceptional circumstances and this seemingly knee-jerk reaction to find some sites to bring forward into the first five years of the Local Plan has not done that.

- **History of Site 64**
This site has been rejected before - a couple of times - last was for just 9 buildings 17/P/01413 for the following reasons:

1. The proposal is considered to constitute inappropriate development in the Green Belt and would cause material impact to the openness of the Green Belt. There are no very special circumstances which outweigh the substantial harm to the Green Belt by reason of its inappropriateness and the actual harm to the openness of the Green Belt. The proposal is therefore contrary to the chapter 9 of the NPPF and policies RE2 of the Guildford Borough Local Plan 2003 (as saved by the CLG direction 24/09/07).

2. The scale and bulk of the proposed dwellings and the resultant spread of development across the undeveloped and open site, with limited screening along the eastern boundary, would have a detrimental impact on the open character of the existing site and would appear as an incongruous feature within the immediate rural setting, leading to the erosion of the rural edge of the built up area of Glaziers Lane. It is therefore considered that the proposal would be contrary to policy G1 and G5 of the saved local plan and paragraph 64 of the NPPF.

3. The site lies within the 400m to 5km zone of the Thames Basin Heaths Special Protection Area (TBHSPA). The Local Planning Authority is not satisfied that there will be no likely significant effect on the Special Protection Area and, in the absence of an appropriate assessment, is unable to satisfy itself that this proposal, either alone or in combination with other development, would not have an adverse effect on the integrity of the Special Protection Area and the relevant Site of Special Scientific Interest (SSSI). In this respect, significant concerns remain with regard to the adverse effect on the integrity of the Special Protection Area in that there is likely to be an increase in dog walking, general recreational use, damage to the habitat and disturbance to the protected species within the protected areas. As such the development is contrary to the objectives of policies NE1 and NE4 of the Guildford Borough Local Plan 2003 (as saved by CLG Direction on 24/09/07) and conflicts with saved policy NRM6 of the South East Plan 2009. For the same reasons the development would fail to meet the requirements of Regulation 63 of The Conservation of Habitats and Species Regulations 2017, as amended, and as the development does not meet the requirements of Regulation 64 the Local Planning Authority must refuse to grant planning permission.

Nothing has changed on this site being inappropriate for development so it cannot be possible to now make it a viable site for inclusion.

- **Ownership of Site 64**

This site is not in single ownership. There is no evidence that the current landowners are keen to sell so this will a huge barrier to getting this site developed within the five years.

- **Composition of the Site 64**

Almost a third of the site is a lake - the options are to leave it and that would result in a squeeze on the resultant space to get 105 houses built - this would be of a density or height that would be out of keeping to the surrounding area.

If filled in - this would take a considerable effort in time and cost that maybe be prohibitive to achieve.

- **Location of Site 64**

Clearly its location near the railway station has made it a ‘sustainable’ option to GBC. However the access would be off a country lane right below a potentially dangerous railway bridge - visibility and sightlines will make this a hazard for residents.

At the north end of the site is Strawberry Farm that is a noisy, smelly and unsightly earth processing operation can’t be good for a new residential area.

The footpath that cuts the site in two leads to the Network Rail un-manned crossing of the line to Guildford - a potential danger that would need serious thought between all parties.
- **Impact of site 64**

The area has a history of flooding and removing the lake that must act as an alleviator would be a serious worry as well as concreting over this field. In the report it states ‘Glaziers Lane at Flexford is associated with a degree of surface water flood risk at its eastern extent.’

It would result in a development that would be at odds with the ribbon form of development within the area. Due to the layout of the proposal it would have suburban appearance and character which would be detrimental to the established semi-rural character of the area.

The road is a country lane …Glaziers Lane…not a main arterial road that can cope with an large increase of traffic - estimated based on the house number at over 200 vehicles.

The good primary school is over-subscribed and would have to be extended to cope with what could be a whole new classroom.

There is no evidence that parents would be happy to walk the minimum 30 minute walk to the schools therefore adding more car journeys in the village making it unsustainable.

As there is no mention of secondary education solution one can only assume people will drive to one of the existing like Ash Manor, as regular rail / bus journeys would be expensive in comparison.

Whilst the doctors surgery is mentioned there is no evidence to demonstrate its capacity to cope with the increase in patients.

The site is close to an Area of Great Landscape Value, Surrey Hills Area of Outstanding Natural Beauty and also adjacent to an SNCI; and there is no evidence that a detailed wildlife assessment has been done to see what the impact would be.

And lastly, by the admission in the GBC proposal, there is no evidence that this site would bring any lasting infrastructure, value or benefit to the community - it appears to be detrimental in the short and long term. So why would anyone who cared about living in this rural setting, who happen to be in vicinity of the ‘growth area’ of Guildford, be for it?

**Attached documents:**

**Comment:** MM45 - LPMM18/5859  **Respondent:** Miller Developments 11145825  **Agent:** Carter Jonas (Jamie Stanley)

2 Additional Site Allocations – MM39, MM43, MM44, MM45

Putting aside the continued failure of the Council to identify sufficient sites for delivery within the early years of the Plan, the additional sites proposed within the Main Modifications fail to both accord with the current strategy, whilst representing less sustainable locations than alternative deliverable sites.

As an example, at Hook Farm and Hunts Farm has the potential to accommodate approximately 150 dwellings, care home, substantial green infrastructure, and additional parking and a new access to Worplesdon Primary School, alleviating existing congestion within Fairlands. This development is of a comparable size to those proposed within the Main Modifications; however, represents greater community benefit within a more sustainable location close to the Guildford urban edge. The plans accompanying these representations demonstrate the ability of this development to provide an appropriately proportioned development alongside newly formed, defensible boundaries for the Green Belt.

For clarity, the additional sites favoured by the Council comprise:
• East of Glaziers Lane, Flexford (105 homes)
• Village extensions at:
• Urban extension at Aarons Hill, Godalming (200 homes)
• Hornhatch Farm, Chilworth (80 homes)
• Alderton’s Farm, Send Marsh (120 homes)

The selection process undertaken by the Council for these additional sites is highly contentious and, based on the evidence available to them at the time of making this decision is not founded on the results of the assessment before them.

As is detailed within the Council’s response “Measures to boost housing delivery in the early years in the context of an OAN figure of 630dpa + contribution to the wider HMA”2, the decision to incorporate the above sites followed the Inspector’s note3 published on 22nd June and was made prior to the hearing session on 3rd July.

The SAA supporting the Main Modifications has since been published retrospectively to justify these decisions rather than used to help inform their allocations as the most appropriate additional sites. It is this process that helps explain the failure of the Council to demonstrate these additional sites represent sustainable development.

This results lead assessment is evident in the manipulation of the site options at each spatial tier. In particular, Tier 8 of the September 2018 SAA covers Green Belt around Guildford or Godalming/Farncombe. This is a deviation from the earlier Sustainability Appraisals (SA), which informed the decision to allocate these sites, which defined Tier 8 sites as Green Belt around Guildford only. This change in approach coincided with the decision to include Aarons Hill, Godalming as an additional allocation. This site was previously assessed as a Tier 10 site.

However, the decision to include Tier 10 sites is not opposed by Miller Developments. In fact, we have emphasised the crucial role sites in these (Tier 10) villages can play in delivering much-needed homes within the early years of the plan period. Where the Council has erred is in the inconsistent and inaccurate approach to both site assessment and site selection.

Our Hearing Statement submitted to the Examination detailed flaws within the 2017 SA. This highlighted that the Council having prioritised three sites4 that had been assessed as ‘less sensitive’ Green Belt sites along with a further four ‘reasonable site options’5 that were within “higher sensitivity” Green Belt locations, deemed appropriate on the basis that these smaller sites that could be delivered in the first five years of the Plan. Three of these four sites now form the additional sites included at MM43-45 despite the Land Availability Assessment document concluding that they were contrary to the spatial strategy.

The SA uses only these as an example of Tier 10 sites capable of acting as a reasonable ‘variable’ from which to assess alternative strategies to the spatial strategy. This paints an inaccurate picture of how this alternative strategy could be implemented. In reality, there are other sites that are more sustainably located to the main urban centre of Guildford that can be provided in conjunction with, or as an alternative to the Council’s additional sites. The allocation of these sites would enable the Council to deliver a greater quantum of housing earlier in the Plan period. It is considered that the narrow assessment taken by the Council fails to give adequate consideration of these alternative options. These shortcomings highlight the failure of the Plan to be positively prepared or for the strategy to be truly justified.

In this context, land immediately to the south of Fairlands (comprising land at Hook Farm and Hunts Farm) has been completely overlooked as a reasonable alternative in the SA and the SAA despite it meeting the tests set out in the SA to a greater degree than any other of the Tier 10 sites.

footnotes
2 GBC-LPSS-020
3 ID/6
4 Land at Winds Ridge, ‘the Horsleys’, and land at Garlick’s Arch
5 Aldertons Farm, Land north east of Flexford, Land south of Halfway House, and Hornhatch Farm

The site lies immediately adjacent to the Fairlands settlement boundary, benefits from good road/public transport access to Guildford town centre and could be delivered in the first five years of the plan period. In addition, this proposal would
alleviate a recognised local constraint by providing an alternative access and additional parking for Worplesdon Primary School. Furthermore, the Council’s Green Belt and Countryside Study Volume III states that Land Parcel H8 (incorporating land Hook Farm/Hunts Farm, which was identified as parcel H8C) provides opportunities to accommodate development without significantly compromising the purposes of the Green Belt. Parcel H8C was considered to be “surrounded by defensible boundaries” and achieved a higher sustainability rating (ranked 5th) when compared with the 41 Potential Development Areas surrounding villages.

The table included at Appendix 1 demonstrates how land south of Fairlands compared to the sites at Aldertons Farm, Flexford, and Hornhatch Farm, as well as alternative sites at Fairlands (H8A&B).

This contrast is reflected within the individual assessment of the sites in the 2017 SA. The table included at Appendix 2, noting that the three Fairlands sites were assessed as a whole and applying a quantitative scoring system to the traffic light assessment undertaken, demonstrates Fairlands as a more sustainable option than any of the sites being bought forward by the Council within these Main Modifications.

The September 2018 SAA recognises land at Hook Farm and Hunts Farm as less preferable to that to the west of Fairlands. This is totally at odds to the findings of the numerous assessments on sustainability undertaken by the Council and referenced above.

The rationale given for the site’s exclusion is its need for access to run across Common Land, with the legal process necessary to secure access giving rise to unforeseen delays to delivery. However, Surrey County Council (SCC) has agreed to the principle of securing an access across the common, subject to terms and pursuant to the development providing a community benefit solution in the form of an alternative access to Worplesdon Primary School. Such an alternative access is proposed as part of the development and has garnered the support from the school (see letter included at Appendix 3). Should the site benefit from an allocation with the inclusion of the primary school’s new access and parking, an expedited process can be undertaken in securing the necessary agreements to secure access over the Common Land. This is comparable to the Potential Development Areas at H8A&B, which are also reliant on access within Common Land but has not begun such negotiations with the County Council.

Paragraph 5.4.8 of the SAA excludes land west of Fairlands (though would equally apply to Hook Farm and Hunts) on the basis that a combination of one of the proposed Tier 8 sites alongside a development the size proposed for west of Fairlands (270 dwellings) would involve too great a reliance on the delivery of just two sites. The SAA goes on to immediately contradict itself by accepting that a reliance on two larger sites would equally apply to scenarios 1, 2 and 7, allowing these as potential strategies on the basis that these would align more closely to the spatial strategy. However, simply stating that the categorising of the Tier 8 sites as more closely in line to the spatial strategy than land at Fairlands is an inaccurate representation. Land at Hook Farm and Hunts Farm lies within 400m of Liddington Hall, was assessed as more sustainable within the 2017 SA, and provides the same accessibility options into major urban centres (in particular Guildford) as any of the Tier 8 sites.

The argument that an over-reliance on fewer sites increases risk also fails to paint a full picture. If fewer but larger sites are allocated, any delays to these sites would lead to a shortfall in delivery. However, equally the failure or delay in delivery of smaller sites would create a failure to meet the local housing need. What the SAA fails to recognise is the allocation of a greater number of sites increases the potential for individual sites to run into delivery problems. A greater number of sites results in the need for a greater number of planning applications, a reliance on a greater number of delivery agents and potentially a greater number of land deals, all of which increase the risk for delays to delivery within the early years of the Plan.

By contrast, Miller Developments represents a proven delivery partner, and controls the land at Hook Farm and Hunts Farm that is demonstrated as containing no absolute constraints to delivery, is in a highly sustainable location, and therefore can be delivered within the first five years of the Plan.

A further failure of the Council, which is reflected throughout its site selection process, is a failure to identify ‘exceptional circumstances’ to justify alterations to the Green Belt, as required by the NPPF (paragraph 83). The Plan makes one reference to exceptional circumstances, stating that these exist in order to promote sustainable patterns of growth.
Miller Developments supports in principle the Council’s decision to make amendments to the Green Belt in order to accommodate sustainable development. In this regard, the tiered hierarchy within the SA prioritises the use of land outside of the Green Belt but recognises that in order to meet the housing and economic needs of the Borough, development within the Green Belt will be required. However, there has been a failure of the Council to seek opportunities for essential infrastructure that can be delivered in conjunction with sustainable housing development in order to form a more robust ‘exceptional circumstances’ case.

As demonstrated throughout our representations to the Plan, land at Hook Farm and Hunts Farm would deliver access to Worplesdon Primary School from the south, removing the majority of school traffic from the village; congestion within the village is a recognised and substantial local constraint. In this regard, SCC has confirmed (Appendix 4) that provision of a new access from the south is the only deliverable, comprehensive solution to the school traffic constraints in the village. Miller Developments has worked in conjunction with the school to design a new access and provide additional parking sufficient to alleviate existing congestion and future proof against expansion of the school in years to come.

This significant social benefit, combined with a housing development assessed by the Council as more sustainable than its competitors, represents considerably more robust ‘exceptional circumstances’ than is identified for other sites. Each of the additional proposed site allocations will provide solely a mix of housing tenures and site-specific mitigation necessary to make the proposed development acceptable in terms of its impact on the local environment.

Submission Local Plan: Strategy and Sites - Main Modifications

Site A64 Land between Glaziers Lane and Strawberry Farm, Flexford Normandy Homes (C3) 105

I object to the proposed development of 105 houses on the above site. My reasons are stated below:

1. The land is included in the Green Belt
2. There are no exceptional circumstances to develop on this land
3. The area cannot cope with any more traffic
4. The infrastructure in the local area will be unable to cope with the extra demand, especially with drainage
5. There is a lot of natural wildlife and animals in the area that will be affected. Especially hedgehogs, deer, foxes and owls.
6. The bright lights at night will affect the local AONB's views

Attached documents:

Comment: MM45 - LPMM18/583  Respondent: Neil Aust 15062017  Agent:

This is green field, green belt land and as such I do not think appropriate to shoehorn into the local plan at the last minute for no apparent reason other than make up GBC's numbers. The village infrastructure, especially but not exclusively the roads, cannot cope with another 105 families. The site includes part of a lovely countryside public footpath. It appears from the previous versions of the local plan, the proposed development of Blackwell Farm and this proposal, that what GBC really wants to do is extend the town borders all the way to Aldershot. If that is the case, please make it clear so those of us who live in the countryside can leave now.

Attached documents:
Comment: MM45 - LPMM18/736  Respondent: Mrs Margaret Dodson 15157473  Agent:

These proposals amount to over development. The village will cease to be a community. The infrastructure is not equipped for a development of this scale.

Attached documents:

Comment: MM45 - LPMM18/2  Respondent: Mr Stephen Callender 15162625  Agent:

This comment relates to MM45.

Based on the 2011 census, there was an average of 2.43 inhabitants per household and 1.5 cars. If the latter is increased by the increase in vehicle numbers licensed in the UK between 2011 and 2017 (c10%) this means 1.65 cars per household. Therefore 105 homes would result in 255 extra people and 173 cars.

I am not arguing against building these houses, but there are two issues that I believe need to be dealt with prior to approval to build:

1. Road infrastructure  As currently laid out, the junction of the B3000 with the A31 already leads to very long tailbacks at many times of day, not just at rush hour. Currently traffic can queue up Wanborough Hill, on both slip roads from the A31, and particularly along the B3000 past Puttenham - sometimes as far back as the A3 junction. There are also often lengthy queues, especially at rush hour, at the junctions of Westwood Lane and Glaziers Lane with the A323. To knowingly add yet more traffic prior to solving traffic flow issues will simply add significantly to the current queues which in turn leads to wasted fuel, wasted time and driver frustration. Traffic management experts need to be tasked with finding solutions especially at the Southern end of this particular road network before planning permission is granted.

2. Medical services  Can the Fairlands medical practice cope with an extra 255 people? If not, where can these new people go for GP treatment?

Finally, is the area concerned not regularly under water? Assuming suitable drainage is put in place, where will this water end up? How will it be diverted to run into those existing water courses that can cope with the extra flow?

Attached documents:

Comment: MM45 - LPMM18/735  Respondent: Mrs Mary Adkins 15173313  Agent:

The land between Glaziers Lane and Strawberry Farm currently provides a green buffer between the essentially linear development of Glaziers Lane and Normandy. The building of 105 houses would remove that buffer to create suburban sprawl between the two communities. The site is locked in by a railway line to one side, with farmland and housing on two other sides. The only possible access is into Glaziers Lane. The proposed modification to the plan would significantly increase traffic on Glaziers, Flexford and Westwood Lanes.

A proposed Green Belt site on the other side of Glaziers Lane was included in the original draft plan and removed as inappropriate. The arguments against that site stand for the current site at Strawberry Farm.

The site is subject to flooding and a large proportion is currently occupied by a lake.
It is with dismay that once again I find that Normandy is under threat from excessive development, this time by the submission of plans to change the Green Belt Boundary, enabling the development of the site A64 for housing. Apparently this site was belatedly included to make good the failure of Woking to provide its share of housing! How interesting to note that this particular site has already had planning refusals on the grounds of its extreme sensitivity and damage to the openness the Green Belt offers.

Normandy is a small village, of some 1300 houses. This proposal will increase the size of a delightful village by 7%, bringing with it horrendous traffic problems. Glaziers Lane (D60) is a narrow, minor road with a blind bend on a bridge crossing over the railway: an already dangerous layout but potentially deadly with an increased number of vehicle movements emerging onto Glaziers Lane at the site of A64, just yards from the bridge.

I OBJECT TO THIS PROPOSAL ON THE GROUNDS OF INADEQUATE ROAD INFRASTRUCTURE TO ACCOMMODATE INCREASED TRAFFIC MOVEMENTS

This village has already given up 32 acres of land, Manor Fruit Farm, to the detrimental impact on wildlife. Reduced numbers of gold-crests, linnets, owls and the destruction of the nightingale population are the result. More high density housing will destroy what wildlife remains: the foxes, the deer, the hedgehogs, the Badgers.

I OBJECT TO THE DEVELOPMENT PROPOSALS BECAUSE THIS VILLAGE HAS ALREADY LOST VALUABLE HABITATS FOR WILDLIFE AND BUILDING ON THIS SCALE WILL DESTROY, TOTALLY OBLITERATE, NATIVE SPECIES.

No mention has been made of any initiatives planned to deal with flooding which is already an issue within the village. This development will exacerbate an already intolerable situation.

I OBJECT TO THIS DEVELOPMENT PROPOSAL BECAUSE THE DRAFT PLAN OFFERS NO REMEDY TO THE ISSUES OF ROAD CONGESTION AND SAFETY, AND INFRASTRUCTURE.

Surrey University has skewed housing needs within the borough by not building sufficient 'on campus' student accommodation, resulting in several thousand houses being unavailable for the housing market. The university has a moral responsibility to provide accommodation for its students.

I OBJECT TO THE DRAFT PLAN DRAWN UP BY GUILDFORD BOROUGH COUNCIL FOR THE FOLLOWING REASONS:
- The plan for the Normandy development is ill-conceived.
- Poor road infrastructure cannot accommodate increased vehicle movements, exacerbating safety.
- Land adjacent to A64 already has major flooding issues.

- Destruction of the rural environment is unacceptable.
- Normandy is indeed a sensitive site, and should be protected, for the benefit of all.
So having successfully fought off a proposal to swamp the village of Normandy with a massive building site; out of the blue comes something much smaller. But where have they chosen to site it? On a Green Belt land off a D road (Glaziers Lane) just yards from a tricky, narrow, bridge over the railway. It might be smaller proposal but even more dangerous! Of course making it smaller means that you can do away with any pretence of infrastructure, facilities etc. and just stick them in somewhere. Well you have certainly chosen a poor site.

This proposal should follow the previous one. I speak as a concerned resident of Normandy for 38 years.

Re: Proposals for development in Normandy's Green Belt 105 homes in Glaziers Lane, Normandy. Guildford Borough Council (GBC) Draft Local Plan Main Modification 45 dealing with Policy A64

We, as residents of Normandy/ Flexford, are writing to express our concerns and objections to the above proposal that are now being suggested to be included in the draft structure plan for our village - proposals that include 105 new houses in Glaziers Lane.

We object to the above proposals for the reasons below -

This area is green belt land, land for our enjoyment, open space, countryside, land full of wildlife, deer, hedgehogs, birds, foxes, badgers etc.etc. Natural habitats and wildlife need to be protected, our area is a priority habitat under The Wildlife and Countryside act 1981 and the NERC act. We object to the erosion of our green belt land; green belt policy is about preventing urban sprawl by keeping land permanently open, the National Planning Policy Framework (NPPF) writes about openness and permanency, openness and permanency in our Surrey Hills Area an area of outstanding natural beauty ... we have a Surrey Hills sign less than half a mile from our house. The above proposals would destroy our green belt.

No exceptional circumstances have been raised to justify this area being removed from the green belt. Also in the sustainability assessment it has already been admitted that there are no existing facilities in Flexford so this proposed development wouldn’t help secure the long term future of village facilities nor contribute to the village vitality.

The proposals are disproportionate and would be an unsustainable development, a 100% increase in the number of homes in our village, the joining of Flexford and Normandy infilled with housing destroying the rural environment and taking away the free space between our hamlets. This area referred to as Policy or Site A64 is pasture land, erosion of this free space will have devastating effects on our wildlife - where will they have to live? Increasing the urbanisation and joining of Guildford, Normandy and Flexford areas.

Surrey County Council (SCC), we understand, recommended a development at Blackwell Farm for a number of reasons but in particular for reasons of accessibility in transport terms. The site A64 proposals would cause complete and unworkable traffic chaos, 105 homes equates to 200+ additional vehicles using Glaziers Lane - our roads are gridlocked during rush hour times as it is, Guildford Road/Aldershot Road and the Hogs Back A31. We have a narrow humpback bridge with weight restrictions in Glaziers Lane over the railway right next to this proposed development and a single track bridge with the railway going over the top in Westwood Lane. The junction at the beginning of Glaziers Lane at the
crossroads with the Guildford Road/Aldershot Road has been turned down for improvement due to lack of space, ditto the Westwood Lane junction at the Wyke Church of St Marks. These are both narrow country lanes totally unable to cope with the necessary construction traffic let alone the traffic generated by 105 additional homes. In many places there is insufficient room to widen either of our country lanes, Glaziers Lane/Westwood Lane, there are Grade 2 listed buildings, 'Little Glaziers' for example which is close to the edge of the lane and would be severely impacted by any road widening proposals.

GBC objected to development on MOD land in Aldershot (Rushmore Council area) on grounds of insufficient capacity of our roads network, how can they therefore propose development here on the same limited road network?

Services, electricity, gas, water, sewage etc. are all at capacity we have been informed, the top of Glaziers lane water pipe has continued to break presumably due to the increased pressure being put through the pipe at peak times to meet the increasing demand for this essential service to our existing housing. This couldn't cope with any further demands.

The area between Glaziers And Westwood Lanes has a high water table and is prone to flooding, covering this area with concrete and tarmac will only make this problem worst. This land is the natural water course off the Hogs Back hill an area, as previously stated, of outstanding natural beauty in the Surrey Hills. The area has ancient and natural woodlands within it, these may be earmarked to be preserved within the proposals but how can they be enjoyed surrounded by concrete, bricks and tarmac. The wildlife won't be fooled into staying in an urbanised area just because we keep the woods and not the surrounding fields that we currently enjoy, the open space we moved here to live within.

[Removed personal data]

**Comment:** MM45 - LPMM18/690  **Respondent:** Susan Burchett 15241281  **Agent:**

I am writing with regard to Main Modification 45 dealing with Policy A64 of the Local Plan

I object to the inclusion of this site for the following reasons.

The short consultation period related to Site A64 at this late stage of the Local Plan process is a complete surprise to residents and does not give us the opportunity to devise a development plan for the village that is acceptable to the residents in order to suggest more appropriate sites. It is also unclear how the site could accommodate 105 houses given that there is a large lake on the site. Also, a potential problem is that the site is in the ownership of two different people. Another serious issue is that there is a public footpath that runs across the middle of the site on to the railway line at an uncontrolled crossing, which would be a hazard to children from the development.

The proposed development is located in the Green Belt, outside any identified settlement area and therefore represents inappropriate development, which is harmful to the openness of the Green Belt. It would introduce a “housing estate” type of development whereas there is currently a linear pattern of development in this part of Glaziers Lane. It would also close the visual gap that exists between Normandy and Flexford, to the detriment of the character and appearance of the area. Also relevant is that GBC has stated no special circumstances for the proposal to build on this site that would justify redrawing the Green Belt boundary. GBC has already turned down two planning applications for this site, citing the reasons given above, and the these reasons for refusal are just as relevant now as they were then.

Site A64 is not a “Sustainable” site. The “Sustainability Appraisal of the Guildford Local Plan – Report update June 2017” uses the issue of Site A46’s proximity to Wanborough railway station as the sole reason for its development. However the Sustainability Appraisal makes it clear that:

- *Land east of Glaziers Lane falls as comprising ‘red-rated’ Green Belt*
- *There are no existing facilities in Flexford, and so it is not possible to argue that development would help to secure the long term future of village facilities, and hence contribute to village vitality*
• Flexford is also notable in that it is a small village without even a Primary School
• This site is associated with a degree of surface water flood risk at the eastern extent

Glaziers Lane is an unclassified (D60), rural road with speeding cars and lorries using it as a cut through to the A31 and A3. Vehicles park on the pavement because of the narrowness of the road causing problems for pedestrians. An additional 105 houses would generate more traffic and make the Lane even more dangerous. The street lighting is poor and there is a dangerous hump-back bridge with a blind summit very close to the proposed site. Currently there are two plots being developed in the southern part of Glaziers Lane and this is already causing much disruption from the number of associated vehicles being parked just for these two houses. The traffic associated with 105 houses would be totally intolerable.

There are Health and Safety issues with Site A64 as it is adjacent to the Strawberry Farm waste management site. On a daily basis dozens of “Grab” lorries speed along the Lane to the Waste Station and dump bricks, concrete, soil and green waste. This is then processed with the hard materials being crushed, the soil being screened and the green waste composted. This produces dust and other airborne pollutants which affect local residents and their properties, the smell of green waste at times can be pungent, and there is noise from machinery on a daily basis.

If Site A64 were to be developed many infrastructure projects would need to take place, such as:

• Road junctions would need to be improved due to the increase in traffic, and improvements made to the railway bridge
• A proper bus service would be needed to serve the southern end of Glazier Lane
• A safe cycle network installed
• Improvements to the sewerage system
• Expansion of Wyke Primary school
• Additional facilities at the Doctors’ surgery

If GBC decide not to develop Site A64 consideration could be given to the Planning Application (17/P/02326) for 30 dwellings on previously developed land that was recently refused at The Elms Centre in Glaziers Lane GU3 2DF. This is a much more preferable site and is not on the Green Belt.

**Comment:** MM45 - LPMM18/2653  **Respondent:** Normandy Parish Council (Leslie Clarke) 15259937  **Agent:**

**Re: Response from Normandy Parish Council to Guildford Borough Council regarding the 'Main Modifications' the Guildford Local Plan October 2018**

Normandy Parish Council wishes to OBJECT to Main Modification 45 (MM45) relating to Policy A64.

1. **Synopsis of Objection**

1.1 The site is within a 'red-rated' area of Green Belt and the 'exceptional circumstances' that would justify removing it from the Green Belt have not been established.

1.2 The site is not in a sustainable location despite its proximity to the train station, since the settlement lacks any facilities and necessitates the need to travel by car to meet basic needs. This is reflected in the SA Addendum (9.14.1) but not properly analysed or given weight in that report.

1.3 The existing infrastructure cannot cope with 105 additional properties, but no mention is made of this.

1.3.1 Despite the site being close to the railway, there are no public transport options to attend schools and doctor's surgeries, necessitating car journeys for most patients, students and parents.
1.3.2 The addition of 105 homes will bring with it around 200 cars, which would result in a significant increase in traffic on Glaziers Lane (which is classified as a D road) and further add to the daily clog at the Give Way junctions at each end.

1.3.3 Glaziers Lane already experiences a large number of heavy goods vehicles travelling along, many at speed. It is currently experiencing large numbers of commercial and delivery vehicles with the development of two houses, so the addition of vehicles required to transport materials and personnel for a further 105 during construction would cause significant disruption and hazard.

1.3.4 The site is close to the bridge over the railway line near Wanborough Station. This is also a hazard due to it being offset and in constant need of repair due to the heavy lorries that cross it.

1.3.5 The existing sewerage and drain network is barely able to cope with the current village population.

1.4 The site does not have capacity to accommodate 105 dwellings without substantial harm to the character of the area, and to the wider landscape. This is recognised in the refusal of application 16/P/01452 which does not seem to have been properly considered.

1.5 If the fishing lake is not infilled, the density of the development will obviously be excessive and cause harm to the wider landscape including the setting of the AONB.

1.6 The site is not likely to be delivered in whole or in part in the first five years of the plan and is unlikely to accommodate the quantum of development for which it is allocated. Therefore, its allocation does not achieve the stated purpose.

1.7 The issue of the impact from the soil processing facility (see Planning Officer's Comments, 16/P/01452) has not been resolved and is likely to result in substantial objection to the development until it is.

1.8 Network Rail's position is unknown but given their previous stance there is likely to be concern about the intensification of use of the crossing which might necessitate a further order to divert the footpath or works to ecological effects which will substantially delay the delivery of housing.

1.9 If the fishing lake is to be infilled, then (a) that will delay delivery and (b) there are potentially significant ecological effects which have not been assessed and might delay delivery of housing or result in objections.

1.10 The site may not be deliverable within the first five years of the plan as it is not in single ownership and there is no evidence that all the landowners are willing to cooperate.

1.11 There are unresolved concerns about drainage which might delay the delivery of the site.

2. Background and further detail

2.1. On 2 October the Parish Council organised a public meeting jointly with the Normandy Action Group to hear views of local residents on GBC's proposals. There was a strong turnout (around 200 people) and a near unanimity of view (only one dissenting voice) opposing the inclusion of Site A64 as a Main Modification to the Local Plan. The meeting was also attended by our MP, County Councillor, and Borough Councillor, all of whom indicated their opposition to the proposal.

From this meeting it is clear that Normandy residents wish to preserve the semi-rural nature of their environment. They also have major concerns about the impact on infrastructure of a large-scale development of this kind: traffic, drainage, and sewerage in particular (which are already a well-documented chronic problem in Glaziers Lane), but also added pressure on facilities such as the local primary school and the doctors' surgery. In that regard a development of 105 houses presents the same. The Parish Council would not in principle resist any further allocation of land in Normandy, but not if it is on this scale and such that it damages the open nature of the Green Belt between the settlements of Normandy and Flexford. Other sites in Normandy have recently been the subject of unsuccessful planning applications. Two examples are North Wyke Farm (14/P/00779 and 15/P/01670) and the Elm Centre (17/P/02326) - a close look at the reasons that were given by Planning Officers for turning down these applications makes clear that these considerations have been ignored with regard to site A64. A comparative analysis of the arguments advanced against the
Elm Centre proposal with the A64 proposal is attached. Incidentally the Elm Centre site is on GBC's Brownfield Register but was not considered in the Sustainability Appraisal.

2.3. In addition to its reservations about Site A64 the Parish Council believes that GBC has failed to demonstrate the 'exceptional circumstances' that justify moving the Green Belt boundary. The recent publication by the Office for National Statistics (ONS) of revised household formation figures has called into question the underlying basis of this Local Plan, which is an annual housing need of 630, plus 42 to make up for Woking's shortfall. In response the Inspector himself has, on 25 September, issued the following note: "I should like to offer the Council an opportunity to comment on the latest version of the Household Projections and their implication for OAN. The related population projections were of course discussed in the hearings." At the very least the Parish Council believes that the Examination in Public should be re-opened so that the credibility of the eventual housing number can be established.

2.4. In addition, the sole rationale for this site is that it supposedly allows for the early delivery of additional housing. However, this is questionable for a number of reasons:

2.4.1. The land is in multiple ownership and we have no good reason to believe that the owner of a major portion of it is unwilling to sell.

2.4.2. Roughly a third of the site is taken up by an artificial but substantial fishing lake (which also conveys significant wildlife benefits) and it is not clear whether this would be retained as a feature or whether it would be partly or completely filled in.

2.4.3. There are environmental health issues deriving from the site's close proximity to the waste management facility at neighbouring Strawberry Farm.

2.4.4. There are issues of public safety deriving from the fact that the public footpath that traverses the site goes over the railway line on an uncontrolled crossing; Network Rail would presumably need to address this before the site could be developed.

2.4.5. The site abuts the Area of Great Landscape Value that in turn abuts the Surrey Hills Area of Outstanding Natural Beauty; the boundaries of the latter are about to be reviewed, and this could further constrain the development of the site.

2.4.6. The site is adjacent to an SNCI and a detailed wildlife assessment would need to be undertaken before it could be developed.

3. Summary

The Parish Council opposes this development because 'exceptional circumstances' have not been demonstrated a development on this scale, while being of no benefit to the community, would also prove very harmful to it. Nor would it be likely to deliver the benefits of early housing delivery that the Inspector challenged GBC to find.

See appendix attached.

Attached documents: Normandy Parish Council Appendix.pdf (256 KB)

Comment: MM45 - LPMM18/1476  Respondent: Mrs Roshan Bailey 15264065  Agent:

This site is entirely inappropriate for development and should be removed from the Local Plan. It has been added at the last minute with no previous consultation, having not featured in any of the previous versions of the Draft Local Plan, although previous applications to GBC for development on the site have, quite rightly, been refused. This is Green Belt and there are no special circumstances to justify building here. The character of the overall village of Normandy is a collection of distinct settlements, with this site A64 being the open area between Flexford and Normandy. Development
here would therefore damage the openness of the countryside and the character of our village. It would also affect the AONB adversely by scarring the views with a dense housing development completely out of keeping with the area. It should be noted that a large proportion of the site is filled with a lake, and the proposed housing numbers could only be achieved with buildings which would be closer together and higher rise than is appropriate for a rural village. Furthermore, the infrastructure simply could not cope with a new development here, and particularly not on this scale. The traffic through Normandy is already unacceptable during rush hours and whenever there is an incident on either the A3 or A31, and current and planned building in areas such as Tongham are already going to exacerbate this problem significantly. Land drainage and sewerage systems are under intolerable pressure and many houses in Normandy already suffer regular flooding in times of heavy rainfall. Normandy has an extremely high water table and significant loss of fields to roadways and buildings will have an enormous adverse impact with heavy rainfall swelling flood waters further downstream. Normandy is a country village and would be hugely damaged by the proposed 7% increase in housing. Given that the housing need currently shown in the draft Local Plan is far too high (see comments on MM2), this site in Flexford & Normandy should be removed entirely.

Attached documents:

Comment: MM45 - LPMM18/1354  Respondent: Mrs Valerie Cheesman 15273249  Agent:

This is based on 672 extra homes per year, where as the latest projection is for 360 by a leading national expert, the inspector should take this into account.

The site entrance is onto a Lane, D class, next to a blind top railway bridge, endangering all those entering and leaving the site

The site is 1.5 miles from the nearest primary school and 5.0 miles from a secondary school there are no public transport connections to either, thus creating more car usage at peak times.

Road linkage to major roads, A323 and A31 is already an accident waiting to happen, with severe congestion at peak times.

Glaziers Lane has major defects, at the junction to the A323 it is sinking with major ruts, which are repaired on a regular basis. At the railway bridge it is also sinking making a hump in the road where cars can 'ground'.

One third of the site is a fishing lake, which stops the rest of the site from flooding, where will the water drain too if this is removed?

The infrastructure will not take further housing in Glaziers Lane, sewers already have none return valves fitted to stop back up and the lane is often awash with raw sewage!

This is green belt land, where on special circumstances have been shown.

This site will increase the usage of the local doctors surgery which at present it takes two to three weeks to book an appointment.

No where in the draft amendments of the Local Plan are any improvements to infrastructure for this site mentioned.

Previous applications on this site have been rejected, as inappropriate development within the green belt.

Attached documents:
I wish to register my Objection to the proposed Policy A46.

Specifically

- I do not accept that the housing demand figures have been properly scrutinised and explained. The failure to publish the assumptions used undermines public confidence in this process.
- I do not think that there are the necessary Exceptional Circumstances to permit moving the boundary of the Green Belt at this location in Flexford.
- The road system is not capable of taking further pressure and there are existing problems with the capacity of the sewerage system. There are only three routes into Flexford - one from the Hogs Back and the Aldershot Road (to/from Aldershot and Guildford). The junctions at Normandy and the A31 are clogged at peak hours and this development will make matters worse.
- There are regular leaks of sewerage in Flexford Road - approx 100 m south of the proposed site on the south side of the railway. This is because the sewer from Wanborough has to flow north and it is already at capacity. The addition of 100 houses will make this situation worse.
- A number of planning applications for this site have been turned down in the past because of the impacts on the Green Belt - I cannot understand how GBC can now decide it is suitable for circa 100 houses.
- A large part of the site is water and therefore not suitable for housing. There are resident and migratory birds who use the pond who will be displaced. Each autumn large flocks of Canada geese gather and fly between this site and the area of the Hogs Back where they glean from harvested land. Other wildlife will also be adversely affected.
- The proposed development is not sustainable as there are no shops or other facilities in the area. This development will not preserve improve the viability of any local services.
- The Green Belt is meant to be open - the view from the Hogg’s Back currently is very pleasant. Filling in this area of open space will permanently affect the area and create more urban sprawl between Aldershot and Guildford.
- The last minute inclusion of this site in the Draft Local Plan is very surprising and suggests it is the result of intemperate action rather than careful consideration.

Attached documents:

---

I wish to object to the inclusion in the local plan of MM 45 policy A64.

My main concerns are the increase in traffic that this huge development will generate.

When there is a problem on either the A3 or A31 the route through Normandy down Glaziers Lane becomes the preferred route for rush hour traffic.

Without any improvement to the roads in Normandy the crossings of the railway, either over or under are inadequate to cope with the number of vehicles.

The railway bridge on Glaziers lane is at present a dangerous blind summit with a huge 'step' up to it when traveling south to north. This is just as the footpath crosses the road to access the station side of the road. So either the pedestrians from the new development will risk the road crossing to access the station or they’ll be using their cars and greatly increase the traffic already using Glaziers Lane.

The crossroads in Normandy where Glaziers Lane meets the A323 is an accident black spot so without any further improvements to this junction things will only get worse with another 105 houses along Glaziers Lane.
I also cannot see that there are any exceptional circumstances to justify taking this site out of green belt. Use brownfield sites instead. Once our green fields have been built over the green belt will no longer exist! We will have one huge urban development and the rural character of our village will be lost forever.

**Attached documents:**

**Comment:** MM45 - LPMM18/837  **Respondent:** Christine Doven 15283777  **Agent:**

**Reference; Normandy Main Modification MM45, Policy A64**

I wish to record my objection to the above planning policy. In particular I am concerned about the inappropriate change of use of green belt farmland and the building of 105 houses over a period of 3 years. I am concerned that the proposal has been introduced without consultation and without being given the opportunity to suggest more suitable alternatives.

The change of use for the land in question is wholly unwarranted and would adversely impact upon the existing infrastructure, and the adjacent road is a country lane which is already overburdened with excessive traffic.

Much of the traffic to and from the proposed site during construction and when completed will be faced with going over the already dangerous blind humpback railway bridge only a few metres away from the entrance/exit.

The heavy amount of traffic currently using the adjacent Flexford Road is causing damage to properties with cracked walls and any further traffic will worsen the situation.

This proposal has been made without any benefit to the local community and the provision for the much needed improvement of the local infrastructure is missing from the proposal.

**Attached documents:**

**Comment:** MM45 - LPMM18/725  **Respondent:** T.W. Turnill 15284385  **Agent:**

**Submission Local Plan - Normandy**

I wish to submit my objection to the planned proposal for 105 houses in Glaziers Lane, Normandy for the following reasons.

1. **Inadequate Infrastructure**

I refer primarily to the effect 105 extra houses, each with a probable two cars, will have on the local traffic situation, which is already creaking. Glaziers Lane is a country lane, having a dangerous bridge associated with the railway line. Whenever there is an accident on the Hogs Back or A3, traffic tries to exit via Wanborough Hill to use Glaziers Lane which is neither capable nor designed to take that volume of traffic. Anyone who tries to access the A31 at peak traffic times from either the Puttenham or Wanborough directions will know how long the queues are, and the potential for accidents for traffic leaving the A31 at the Puttenham turn off. This could severely jeopardise Emergency traffic trying to access the new development, whose road structure might well not be capable of allowing Fire and Ambulance vehicles to attend an emergency, especially during peak traffic times.

2. **Flooding and associated Sewage Problems**
Parts of Normandy are subject to severe flooding problems, and the Station Car Park is regularly flooded during the downpours which have been occurring regularly. The Hoe stream also floods, which affects Glaziers Lane at the bridge crossing the stream, and sewage has been released into it, causing a severe health hazard.

The proposed development area at present allows natural drainage through the soil and trees, although the water table is high here, as witnessed by the grass remaining green during the recent dry summer; if this area is concreted over, the resultant run off of surface water would overwhelm the present system, causing even more flooding in the local area.

3. Environmental Impact

The village of Normandy lies within an area of outstanding natural beauty close to the Surrey Hills to the South and the Army Heathland to the North. It provides a welcome rural break between the towns of Aldershot and Guildford, and is in Red designated Green Belt. It features a wide range of wild life, including many endangered and protected species, and the addition of 105 households, with their associated cats, would decimate much of the wild life that lives here. In addition, the replacement of the present agricultural land with housing would remove a valuable habitat for all the wild creatures that have come to rely on the peaceful nature of the area.

4. The non-safeguarded Agricultural Land for building.

The area proposed for building 105 houses is Green Belt, designated Red agricultural land, which has been constantly used for grazing and livestock. The government has repeatedly said that such land should NOT be used for building, unless there were overwhelming requirements to do so. These requirements have not been shown to exist in this village.

5. Legal Aspects

Guildford Borough Council, unlike the other Surrey Councils, insists that there is a requirement for double the number of houses in this area compared with theirs. The estimate was provided by a firm which refuses to disclose how it came to that conclusion on the grounds of "commercial sensitivity". It has been put into question by the Office of National Statistics which has recently said that the estimate is about 45% too high. Thus, the council has no way of verifying how accurate the firm's estimate is, or what assumptions were used in coming to this figure. It is imperative that this arbitrary figure be challenged, and another firm used who will be transparent in the assumptions it makes, so that a proper estimate can be used.

6. The use of Brown Field sites.

I feel that GBC has made little imaginative use of the many brown sites that are available especially in the Town centre. Much more effort should be made to these, in spite of developers' objections.

In summary, and in view of the points I have made above, I would be grateful if you would log my strong objections to the proposal to build 105 houses in Glaziers Lane in the village of normandy.

Attached documents:

Comment: MM45 - LPMM18/761  Respondent: Mrs Laurel Kitchen 15299169  Agent:

I have great reservations about the planning application to erect 105 houses on land next to Glaziers Lane. We have no infrastructure in Normandy to cope with this number of properties the surrounding roads are lanes and not capable of handling the additional traffic. To fit the number of proposed properties on the land designated they would need to be of a town hose style and 3 storeys high which is completely out of character with the rest of our village. The sewerage system is currently over capacity and there are no plans to improve this. The station at Wanborough is currently running slow as there are problems with the line this will only increase with more stress on the bridges and road network. There are no plans to increase the size of the doctors and they currently have an overworked system.
I am not in favour of this going ahead. We do not have the infrastructure to cope in our village.

**Comment:** MM45 - LPMM18/154  **Respondent:** Ian Nicholson 15321249  **Agent:**

Revised local plan - Policy A64 - land between Glaziers Lane and Strawberry Farm

Regarding the above I have to register a strong objection to the inclusion of this area of land in the revised local plan. The Normandy/Flexford area is just not suitable for significant further development, even we ignore the fact that this is actually Green Belt land.

The local infrastructure just would not cope with such an increase in the number of dwellings (105) without significant improvement to it extending well beyond the boundaries of Normandy and Flexford themselves. The access to the site would be via Glaziers Lane itself and from Flexford road over the railway bridge. Traffic would be significantly increased, especially at peak times, which would be to the detriment of all residents, including those residing at the proposed new development.

Of far more concern is the strain that would be put on the drainage/sewage network. Are any significant improvements to that planned? The existing network is already overloaded at times and at full capacity in normal circumstances so to add an additional 105 homes without any significant increase in drainage/sewage capacity could cause major problems for everyone, existing and proposed new residents alike. To make any significant improvements to the drainage/sewage infrastructure would, no doubt, be very expensive and obviously cause major disruption and inconvenience extending well beyond Normandy and Flexford.

It is difficult so see how such a development on this site can be justified at this time given that it is Green Belt land and so far I have seen no exceptional circumstances put forward that would justify redrawing green belt boundaries. I feel sure that there are many far more suitable brown field sites in Guildford and the surrounding area that could be utilised to enable GBC to meet its responsibilities for house building before having to resort to considering building on this site. The infrastructure in the area really isn’t capable of supporting any further major development.

Attached documents:

**Comment:** MM45 - LPMM18/639  **Respondent:** Redmond Neale 15342305  **Agent:**

I strongly object the A64 Site Proposal in Normandy (Glaziers Lane).

Stop trying to ruin our beautiful village / green spaces for financial gain. This is getting rather repetitive now!

Plenty of other places outside Normandy that are not green belt where the houses can be built. Happy to show you these.

There are no exceptional circumstances, a application has already been denied on the site, there is a infrastructure deficit, AONB would be ruined, there would be no community benefit, wildlife including hedgehogs and rare newts would be killed off - the list goes on!!

I’m not sure who makes the decision to put sites in this plan but personally I think there job needs reviewing as it’s clearly not a suitable site.

Attached documents:
**Comment:** MM45 - LPMM18/1006  **Respondent:** Brian Oliver 15350817  **Agent:**

Guildford Local Plan, Site A64

I wish to register my objection to this proposal, as it relates to Normandy and, in particular this plan to put 100 extra properties in Green Belt Land near Wanborough Station. It would exacerbate the already poor flow of traffic along Glaziers Lane - the state of which has previously led to the withdrawal of two previous applications. The reasons given for withdrawal included the following and each would apply to [unreadable text] to A64: -

1. "Exceptional Circumstances" were and are not demonstrated

2. O.N.S. forecasts implay that the Plan overstates by nearly a half the projected extra housing requirement.

3. Brownfield sites not being part of the plan. If in comparison with building on our cherished Green Belt some extra costs are involved, I feel sure that the enviromental benefits are well worth it.

4. Infrastructure: The Lane is not equipped for such an increase in traffic as over 100 new properties would generate - as I write blocked drains and some flooding are clearly evident features.

5. Merging two discrete and settled communities such as Normandy and Flexford, having [unreadable text] sizes and characters, would be non viable and not function satisfactorily as an organic whole.

Ref: Guildford Local Plan: Strategy & Sites Main Modifications **MM45 POLICY A64**

I object to the modification of MM45 POLICY A64.

I strongly object to this lands inclusion in the local plan for the following reasons:

It is a Green Belt site and is therefore protected. The need for violating this does not appear to have been proven.

Permission to build on this site has already been denied.

105 homes equate to approximately 210 cars, the roads are already clogged, and the entrance to the development will be on one side of a hump back bridge, which will be hazardous.

105 homes on a package of land that small is not sympathetic to the current housing in the area.

The local plan does not appear to take on board the likely post Brexit case that less housing will be needed.

**Comment:** MM45 - LPMM18/2380  **Respondent:** Ian Rose 15358945  **Agent:**

Re: Local Plan Consultation Document: Main Modification 45, Flexford/Normandy Site A64
I am writing to register my objections to the large number of proposed houses within the above Site which would take the Flexford settlement across the natural barrier of the railway line barrier and the Normandy settlement by building on designated "red rated" Green Belt land at Site A64 for the following reasons:

1. **Green Belt**

The intention and importance of sensitive Green Belt land is to ensure that the hamlets and villages within it are separated by openness and are not conjoined by large scale housing developments such as those proposed adjoining the east side of Glaziers Lane near Wanborough Station.

The proposed development of Site A64 will increase the number of homes by 7% in the settlement area of Normandy which is designated as Green Belt.

Previous Planning Inspectors have declined applications on broadly this site and consider that the green fields contribute to the openness of the Green Belt with views to the Surrey Hills AONB.

In June 2015 the Conservative Government and the Prime Minister in their election manifesto said ‘we will always protect the Green Belt and make sure planning decisions are made by local people and only in exceptional circumstances when there are no other options would the Green Belt be allowed to be built on.

Guildford Borough Council has not only publicly demonstrated that there any exceptional circumstances that could be applied to this site.

2. **Destruction of rural environment:**

I strongly object to the proposed development of an additional 105 houses within the Green Belt and is currently green field pasture/agricultural land.

The Green Belt is in place to check unrestricted sprawl of built up areas which will occur with this proposed development leaving only a railway line to separate the hamlets of Flexford and Normandy from joining up.

It is also there to safeguard the countryside from the encroachment of building development. With regard to the proposed modification 45 to the Local Plan document these principles appear to have been completely disregarded.

3. **Infrastructure**

The existing road of Glaziers Lane flanking the west side of the proposed site for the 105 houses is classified as a minor 'C' class roads and will not be able to cope with the increase in additional traffic generated by this large development. At present Glaziers Lane (C60) does not have a continuous footpath on any one side of the road from its junction with Flexford Road and the A323 Aldershot Road and pedestrians have to cross the road twice at two very dangerous points on this busy road.

One is the north side of the humped back railway bridge at Wanborough Station and the other one is between numbers 38 to 43 Glaziers Lane. If the proposed number of houses are built with resulting large increase in traffic there would be a need to have additional footpaths constructed over the length of Glaziers Lane in the interests of road safety to pedestrians.

The A323 Guildford Road at commuter times frequently build up through Normandy at present due to the increase of large developments of houses within the Ash Parish and Rushmoor area.

The increase of traffic travelling up Wanborough Hill/Westwood Lane (C16) to join the A31 will severely increase the queues of traffic travelling east to Guildford or west to Farnham and also the B3006, Puttenham Heath Road to join the A3. These roads are already gridlocked at peak times now without the additional traffic generated by the proposed development.

4) Wyke Junior School, School Lane, adjoining A323, Aldershot Road:
If this development is approved there will be an element of young children living there and as a result there will be increased pressure on the school to provide places for them which is already at its maximum capacity.

Additional finance will have to be provided in order to expand its classroom capacity.

The proposed development, if approved, will generate even more additional traffic on Glaziers Lane and the A323, Aldershot Road and the existing traffic queues at peak times will exacerbate the traffic problems at the start and end of school hours.

5) **Flooding Issues:**

The area in Glaziers Lane (C60) where the Hoe stream crosses underneath the road between Numbers 68 and 76 on the west side and Numbers 38 to 43 on the east side is subject to flooding and is designated as an area liable to flooding on the Environmental Agency maps. The flooding occurs when there is heavy continuous rainfall and can occur summer or winter. The two main causes of this flash flooding is the rainwater runoff from houses and driveways with drains connected to the main sewer. This causes the **150mm main sewer** running south to north to surcharge causing the road and surrounding land and gardens to flood.

The 150mm connects into a 225mm main sewer between numbers 38 and 48 which is also of insufficient capacity the sewer also surcharges at this point causing additional flooding. **Thames Water** is well aware of **this flooding problem** and there would need to be a major increase in sewer capacity if the proposed housing development takes place.

There has been a previous application to build 70 houses on this site which **Thames Water** objected to as the existing main sewer of 150mm diameter is of insufficient capacity to cope with the proposed number of homes and I am not aware of any proposals to increase its capacity. The proposed new developments would detrimentally **increase the risk of flooding** the above mentioned location causing great distress to the residents currently living there.

6) **Brown Field Sites:** More consideration should be given to developing brown field sites of which there are a considerable number listed, a proportion of which could be considered for housing to meet the future 5 year window within the Main Modifications 45 document.

MM45 Policy A64 Houses to be built on Glaziers Lane

My objections to building of 105 houses are the following.

More traffic through Normandy

More pressure on the local primary school (bigger classes)

More time waiting for an appointment with the doctors and nurses

The loss of Green Belt land

A resident of Normandy since 1995

**Attached documents:**
Comment: MM45 - LPMM18/3085  Respondent: Judith Baker 15390817  Agent:

Re: MM45 Policy A64

I am writing to you to object to the proposed plan of building 105 new houses in Glaziers Lane Normandy.

1. Building on Green Belt – this proposed site is listed as green belt land – building on this would mean destruction of habitats which would have an detrimental effect on our wildlife.
2. I would like to know why you cannot build on the many brown listed sites which are listed on your website.
3. Surrey Hills AONB – this proposed site would have a adverse impact on the vista from the Hogs Back in the AONB
4. A large site like this would place long term strain on our community – our roads are busy and Glaziers Lane is very narrow at the railway bridge, an increase of traffic would be a nightmare and this ‘Lane’ would not cope especially at the bridge which would be next to the entrance of the proposed site. Our GP surgery and local school would be come over subscribed – it is already difficult to get an GP appointment.
5. Wanborough Station – I would like to make the point that only an able person can get on the platform at Wanborough Station – if you are a disabled person or a mother with a pram/pushchair there is no access to the platform for trains going to Guildford. So if the proposed site was chosen for this facility you would need to improve the Station by installing a lift.

Your proposed new housing development threatens the rural character of Normandy – we must try and save our countryside, stop sealing our green belt land not just in our village but all over our county.

Attached documents:

Comment: MM45 - LPMM18/5305  Respondent: June Newell 15434177  Agent:

My comments are that the infrastructure would be unable to cope with a large number of additional houses as proposed. Further the green belt will be damaged if these houses are built in an area that is very rural by its nature and would lead to a large number of additional car movements on roads that are unable to cope.

I hope you will consider my comments.

Normandy Planning Proposal

Main Modification 45 (MM45), dealing with Policy A64

I am forwarding my OPPOSITION towards the above planning proposal.

I do not see any exceptional circumstances as to why this development needs to be on Greenbelt land. Has all consideration truly been given to the Brownfield sites in the borough? What is the justification for this particular site?
More than 105 new houses will create a 7% increase in the size of Normandy but so far I see no accompanying proposed measures for improvements in the local infrastructure. Whilst there is a medical centre/doctors surgery/churches/community centres in the village, other amenities such as local shops and public houses have slowly been depleted over the years. Any residents needing the use of the majority of services in life has to travel on the main road going through Normandy (Aldershot to Guildford). It is obvious that this road can already be congested and slow moving at peak times so with the addition of vehicles from another 105 dwellings, this will only exacerbate the current traffic problems further.

**Comment:** MM45 - LPMM18/5798  **Respondent:** Donna Collinson 15460737  **Agent:**

MM45 *Can adding a new Green Belt site at Flexford be justified in view of revised figures?*

Attached documents:

**Comment:** MM45 - LPMM18/1365  **Respondent:** Mrs Melanie Williams 15460801  **Agent:**

Dear Inspector,

I am very surprised to see site A64 has been included as a main modification in the new local plan and appeal to you to reject it based on the following reasons:

- This site was protected by the greenbelt in the local plan last year. I ask what are exceptional circumstances for moving the boundary and including it this time?
- Previous applications have been rejected due to the greenbelt status, therefore it appears contradictory to include it now. It suggests the reason is no more than a panic response to the lack of provision for housing throughout the borough in previous years without consideration to impact.
- The site is of great landscape value, which can been viewed from the Hogs Back, the Surrey Hills Area of Outstanding Natural Beauty. A development of 105 houses will be visible from the this area and will spoil the view. Surely the intention of the AONB awarded to the Surrey Hills is to conserve the natural beauty of that environment?
- The Special Protection Area at Ash and Pirbright Ranges also lies within the 5km of the site. As per European and national legislation new developments may harm rare bird and wildlife populations. Many of which have been sighted and recorded within this boundary.
- Development of site A64 would place long term strain on the village. There is nothing in plan for infrastructure improvements to cope with a 7% increase to the village.
- It will place a strain on existing services within the village. The school would be under immense pressure to cope with the extra capacity a development of this size would generate, as would the Doctors surgery. Local people as well as health care professionals, teachers and doctors are all very aware of the demands on our village practice and school at the moment. It appears the plan prefers to ignore these issues and promote additional housing irrespective of the quality of life.
- I am also very concerned about the extra traffic an additional 105 houses will generate. Unfortunately, Glaziers Lane is a D classified road and not suitable for the significant rise in road users it would produce. Almost 100% of driveways and front gardens face directly onto Glaziers Lane, the very nature of this presents safety issues already on a road used as a cut-through during rush hour, let alone adding further demand to this rural lane.
- The volume of traffic through Normandy on the A323 Aldershot to Guildford Road, has increased significantly due the development of thousands of homes in Rushmoor borough council. These developments are on-going
and haven't been completed yet. Normandy and Flexford will continue to feel the impact of this as drivers choose local roads to/from Aldershot to Guildford, to avoid the heavily congested A31 during rush hour.

Given my views above it appears the inclusion of site A64 serves no benefit to the village only 'developer gain' and I would appreciate your full consideration in rejecting it from the local plan. Thank you.

Regards

Melanie Williams

I am writing to make my to **OBJECTION** Main Modification 45, ie MM45 dealing with Policy A64, known.

**No demonstration of meeting the Planning Inspector's challenge to bring forward a greater proportion of houses from the existing Local Plan sites**

It is my understanding that MM45 is only included because at the Guildford Local Plan’s Examination in Public in June 2018 the Planning Inspector challenged Guildford Borough Council (GBC) to build a greater proportion of houses in the early part of the Plan period. MM45, along with several other similar main modifications, has been proposed to build additional houses in this time period. There has been no evidence that any replanning / rephasing of the existing Local Plan sites has taken place to consider how that challenge could be met within the existing draft plan. Having established a housing need, and identifying sites to create that housing supply, GBC have a responsibility to consider how the phasing of the housing supply could be met within those existing sites.

**Proposed housing is in addition to the housing need identified in the Local Plan.**

**The existing housing need identified in the Local Plan is proven to be overestimated**

Recently, the Office for National Statistics has released new figures relating to the number of new homes needed, and the current Conservative Government has released a new formula for estimating housing need required for economic growth. The GBC Local Plan figures are well in excess of these numbers. Therefore there cannot be a strong justification for redrawing the Green Belt around Flexford to create the proposed ~105 houses, especially since this is in addition to the existing Local Plan's figures.

**The site identified in MM45 is "Red Sensitivity" Green Belt, and no "Exceptional Circumstances" demonstrated.**

In particular, there has been no demonstration of the National Planning Policy Framework "exceptional circumstances" that required to remove this piece of "Red Sensitivity" Green Belt.

The proposal does not include any details on the site development, nor account for the demand on infrastructure or consider the activities surrounding the site. Therefore it would be there is no evidence that any consideration of the impact on the surrounding settlements has been made.

**Attached documents:**

---

**Comment:** MM45 - LPMM18/2064  **Respondent:** Mrs Juliana Baxter 15500097  **Agent:**

---

This site was not in the original plan.

No special circumstances have been shown that would justify building a housing development on the green belt.

The infrastructure does not exist to support the additional road traffic that would be generated. The danger of traffic accidents and congestion would be high, when this number of additional cars is added to the existing level of traffic on small residential roads. Public transport would not bear the load: train fares are expensive - just look at the cost of the 5-minute journey from Wanborough to Guildford. It is cheaper to take the car and pay the parking charges. The bus service is sketchy and does not run daily; for example you can go to Guildford on a Tuesday or Friday if you happen to want to spend 3 hours there. Realistically, people will not walk to the Aldershot Road to catch the Kite bus because it is not close enough.

Comment: MM45 - LPMM18/4708  Respondent: Andrew Whitehall 15508257  Agent:

Location: GREEN BELT LAND in Normandy Main Modification 45 (MM45, dealing with policy number A64)

Proposal: To build 105 houses over 3 years on GREEN BELT LAND to the North of the railway line east of Glaziers Lane.

I am writing with regards to the above proposal to build 105 homes over 3 years on GREEN BELT LAND! Having lived in the village for most of my life and a child played in the proposed fields, I wish to strongly object due to the attributing factors listed below -

- Erosion of green belt land when there are brownfield sites, elsewhere in Guildford, far better suited with all the amenities already on their doorstep.
- Disproportionate & unsustainable development, on Green Belt land, what are the “exceptional circumstances” that justify taking this site out of the Green Belt?
- This is a completely new site that has NOT featured in any of the previous versions of the Local Plan.
- There are no exisiting facilities in Flexford which even the sustainability assessment accompanying the proposal admits.
- Destruction of rural environment where currently protected brown snakes, deer & other wildlife live, building houses on this type of land is not the way forward.
- The Council are ignoring the advice of previous planning inspectors that the fields of Normandy add to the openness of the green belt, hence all previous applications have, and rightly so, been refused.
- Glaziers Lane & Flexford Road are country lanes and are not remotely suitable for the vast increase of traffic that would ensue from building these houses.
- The congestion on the roads in Normandy is already a major issue with multiple delays & accidents not to mention the pollution.
- People actually move to Normandy for the open fields & try to give their families a safe and rural life, fully aware there are not large housing estates.
- Who is going to pay for the extra emergency services required to service this out of town area as this proposal would greatly increase the size of our village?

We have all been blessed with nature on our doorsteps, embrace it & protect it as it is so precious, if you agree for this to be all ripped away it will never, ever be replaced.

Surrey County Council has always prided itself on being one of the forerunners of providing green, open land for people to walk, ride & play in, don’t now destroy this legacy.

Attached documents:
Comment: MM45 - LPMM18/1779  
Respondent: Anthony Hillard 15581857  
Agent:

* I wish to object very strongly about the recent late alteration (A64) to the local plan which proposes to destroy a significant part of the Green Belt.

* It will add about 7% to the population of Normandy and Flexford within 3 years which is far too soon to make improvements to the already overstretched local infrastructure.

* The sewerage system is overloaded now

* The hump bridge over the railway by the proposed extension is dangerous and the alternative bridge (under) in nearby Westwood Lane even more so.

* It seems very perverse that one of the justifications for the plan is to absorb some of Woking’s housing needs.

* I find the “exceptional circumstances” for building on the Green Belt completely unconvincing

Attached documents:

Comment: MM45 - LPMM18/695  
Respondent: Christine King 15585217

New Local Plan - New housing Normandy MM45, Row A64

I am surprised that, having had previous suggestions for development in Normandy turned down, another has materialised in the new local plan with no consultation with local people.

The land to the north of the Hog's Back is in an Area of Outstanding Natural Beauty. It is difficult to understand why this view is being disregarded. In addition, this development is on Green belt land. I can see no Exceptional Circumstances described that would allow this to happen. The creep of urbanisation west of Guildford is insidious, with little green space along the line between Wood Street and Ash/Aldershot. A64 should not be allowed to move the Green Belt safety ring and open the area for more possible housing.

The transport systems are inadequate for current housing, let alone another plot of this size. Only two buses twice a week go up Glaziers Lane, trains (of 3 carriages) only run half-hourly and are often cancelled completely during strikes. The A323 is often stationary at junctions such as the Wood Street turning during rush hours already. The surgery is already well used, there are no local food shops, pubs or cafes in the entire parish. How can this lack of facilities be sustained by such a development when there are none?

The infrastructure is simply not able to cope with a development of this size. The water and sewage systems are already under strain. Drains overflow in heavy rain and drainage from road and off the surrounding hills is already inadequate.

There is much controversy over the housing needs of Guildford Borough and it seems not to have taken the revised housing projections from the Office of National Statistics. The Brownfield sites in Guildford would no doubt be less convenient in terms of more small developments but short-term convenience should not override very real objections to infilling a rural community with poor infrastructure.

Attached documents:

Comment: MM45 - LPMM18/5310  
Respondent: Jane Owen 15594657  
Agent:
Re the Planning application of houses on Green Belt Land Main modification 45

I don't believe that there has been sufficient documented information as to why the Previous GreenBelt land should be utilised for a housing development.

There should only be exceptional circumstances for this to happen and there are plenty of brownfield sites that remain unused. So I am against the proposal of utilising green belt land.

Attached documents:

Comment: MM45 - LPMM18/5308  Respondent: Nicky Ford 15601377  Agent:

My objection to Policy A64 is based on the impact that building 105 new houses will have on Glaziers Lane. The road is already very busy, especially during rush hour because it links the Hogs Back with the Aldershot road into Guildford. 105 new houses would mean roughly 200 more cars using the road daily, which would put immense strain on the traffic.

Also the Hogs Back is an Area of Outstanding Natural Beauty and the views from it would be spoilt by such a big new development.

So my vote is against Policy A64.

Attached documents:

Comment: MM45 - LPMM18/2517  Respondent: William Cross 17286945  Agent:

to whom it may concern

I don't think that this hasn't been thought out at all with 105 houses proposed to be built and my main concern is the extra traffic in the area its terrible now what will it be like  with at another 100 cars plus down glaziers land and wanborough hill,also there isn't any shops in Normandy apart from motorcycle shop and music shop

also you are eroding the greenbelt

Attached documents:

Comment: MM45 - LPMM18/316  Respondent: Mr Mike Dean 17328609  Agent:

I am very concerned about this particular development for a number of reasons:

- What are the "exceptional circumstances" that justify taking this site out of the Green Belt? I haven't been able to find them noted within the documents.
- I cannot find any justification within the documents for extending the Flexford settlement north of the railway line. What is that justification
- There is nothing within the plan to address infrastructure. The infrastructure in Glaziers Lane can barely cope with the existing housing. For instance:
103 Houses is going to mean about 200 more cars. Something like half of those are going to be on the move during peaks hours, going to work, taking children to school etc. This will just add to the chaos that all ready exists because Glaziers lane is a rat run off the A31 particularly when there has been an incident on the A31.

- Already sewage, water and electricity struggles to cope with existing needs.
- The area is already prone to flooding.
- The railway bridge at Wanborough station is already significantly damaged. This will be exacerbated by the additional cars and construction traffic.
- The doctor's surgery can barely cope with existing needs without the perhaps 400 additional inhabitants.
- Where will the children go to school?

- what is the benefit of this development to Normandy? None as far as I can see.
- I understand that this revised plan does not mean any more houses but bring forward a number of houses within the plan period. If that is so then the original plan will have identified appropriate sites. If that is the case why is it not possible to bring forward one of these site? Site A64 was not in the original plan.
- I have read in the Surrey Advertiser that the plan significantly over estimates the housing requirement. If that is the case why is this being considered at all?

Comment: MM45 - LPMM18/4987  Respondent: Zurich Assurance Limited 17343361  Agent: Barton Willmore LLP (Gary Stevens)

E. MM39, MM43, MM44 AND MM45: SITE ALLOCATIONS

28. As outlined under CTI’s response to MM2, the inclusion of these additional greenfield sites within the Green Belt, ahead of unsustainable and poor-quality existing employment sites is an unsound approach that does not conform to the tests of soundness set out in paragraph 182 of the NPPF (2012).

29. CTI therefore consider that the Council should re-evaluate its approach to the allocation of these four additional sites.

F. SUMMARY AND CONCLUSION

30. CTI consider that the Council has failed to adopt a sustainable approach in identifying the additional site allocations that are proposed through this main modification consultation. As a result, the proposed do not comply with the tests of soundness described in paragraph 182 of the NPPF (2012).

31. We take this opportunity to remind the Council and the Inspector that the Site is available for residential development and offers scope to provide a meaningful contribution to the borough’s housing needs in the first 5 years of the plan period, something Inspector Bore has identified as a flaw with the originally submitted plan. We therefore recommend that the Council makes further modifications to the Submission Local Plan and reinstate the Broadford Business Park site as a residential site allocation as per the 2016 version of the Local Plan.

32. We trust that the Council and the Inspector will find these representations to be of use in drawing the examination in public to a close. Should any further information be required, please do not hesitate to contact us.

see attached for appendix

We are writing to advise you of our concerns and formal objection to the modifications to the Guildford Borough Local Plan, specifically relating to Policy A64, Land between Glaziers Lane and Strawberry Farm, Flexford (MM45).

It is irresponsible to propose to expand the village without first having plans in place to improve the infrastructure. Living at a property on Glaziers Lane directly opposite to the proposed site, very close to the railway bridge, we feel first-hand the effect of heavy goods vehicles making their way over the narrow, angled bridge. Walking over the bridge is life-threatening as vehicles passing over the bridge come within centimetres of the edge of the pavement. For the construction of 105 homes, which would take a number of years, the onslaught of heavy goods vehicles over this bridge to access the site would be horrendous. The infrastructure to accommodate the building site and the additional traffic throughout the village once the site has been developed has to be planned first and the Local Plan provides no detail in that regard.

Development of this site would eradicate the openness and separation between Flexford and Normandy to create a sprawling conurbation that is completely out of character with the concept of the Green Belt. Would this development mean that the Green Belt would be eradicated on the east side of Glaziers Lane, whilst remaining intact on the west? If so, then the proposal is non-sensical. Furthermore, as there are no special circumstances prevailing that would permit the abandonment of the Green Belt for such a development, this plan must be rejected.

Attached documents:

Dear Sir or Madam,

Strategy and sites - main modifications: consultation on the Submission Local Plan MM45 Policy A64

The Friends of Normandy Wildlife (FNW) is a local organisation which aims to foster an appreciation of the beauty and diversity of wildlife in Normandy and to protect it through recording sightings, educational talks and events and seeking protection for notable sites, habitats and species where required. The group has 50 paying members from Normandy and the surrounding area. It is organised by a Committee of experts in wildlife, conservation, communications and local knowledge.

The Committee of FNW has strong objections to the A64 proposal site at Flexford – amendment MM45 – being included because of the significant negative impact it would have on the site's value for wildlife, its importance to the wider ecological network and the impact on the Thames Basin Special Protection Area.

At a strategic level, this land is in the Wanborough and Normandy Woods and Meadows Biodiversity Opportunity Area (BOA). This area is partly characterised by enclosed systems of small fields, hedgerows and ditches, which describes the proposed site well. Safeguarding BOAs through Local Plans fulfils the requirements of the National Planning Policy Framework to plan for biodiversity at a landscape scale and halt biodiversity decline through coherent ecological networks that are more resilient to current and future pressures.

At a site level, the assemblage of unimproved grassland, mature hedgerows and freshwater lake are of at least local significance.

The ecology report for the refused application 17/P/01413, also relevant to this site, shows that the grassland is an unimproved, moderately species-rich MG5 community of crested dog's-tail – black knapweed. Diverse neutral grasslands are considered important at a county and national level and MG5 communities are included within Surrey Site of Nature Conservation Importance criteria. In addition, the fields are very likely to be feeding grounds for barn owl which nests around 400m away and fledged five young this year.
The mature hedgerows and green lane consist of a mixture of several shrub species, providing excellent connective habitat through the site and into the surrounding landscape, which includes ancient woodland and a Site of Nature Conservation Importance that are almost immediately adjacent to the site. These hedges will provide flight lines for foraging bats and increasing light levels through development will be a barrier to continued use by bats even if the hedges are to be retained.

The combination of fields and hedges here are known to provide habitat for yellowhammers, a red-listed species of conservation concern in the UK, and badgers, a protected species; badger dung pits are clearly visible along hedge bottoms and setts may be present.

The aquatic value of the small lake is likely reduced due to being stocked for fishing, but it still provides a valuable freshwater habitat that is otherwise uncommon in the area and has value for a wide assemblage of wildlife.

Constructing housing of any size in this area also has an impact on the Thames Basin Heaths Special Protection Area. By car, the proposed development is twice as close to the heaths than the either of the permitted SANGs at Wood Street Village or Ash Lodge. On foot, the shortest route between the boundaries of A64 and the Wood Street SANG is a 20 minute walk; the SPA is a 4 minute drive. If there is no likelihood of a SANG closer than the SPA to the proposed development coming forward then the application should be refused. A proposal for only nine houses on this site was rejected in part for this reason by the Council in January 2018.

FNW also endorses points raised by Normandy Action Group and Guildford Residents Association that relate to erosion of the Green Belt between Normandy and Flexford and over-estimates of the housing required that is resulting in greenfield sites such as A64 being put forward. This is from the point of view that such policies will lead to further losses of countryside upon which our wildlife – much of it already in decline – depends.

The FNW Committee urge the Council to remove amendment MM45 from the Local Plan.

Thank you for considering our comments.

Attached documents:
Scores amber against Green Belt sensitivity and was identified as a potential development site unlike Aaron’s Farm, Hornhatch Farm and Glaziers Lane
Is more accessible to a train station unlike the allocation at Send Marsh
Has the same proximity to local facilities as the other allocations
Is not constrained by being within or adjacent to the AGLV or AONB unlike the allocations at Aaron’s Farm and Hornhatch Farm
Would round off Flexford to the west and not result in an out of character form of development unlike the site to the north of the railway line at Glaziers Lane

We will be responding to the Main Modifications consultation in due course. However we hope that this letter is useful and highlights the continuing availability of this site. It is, as is highlighted by the Council’s own proposals, at a settlement which is suitable for growth, but with a lesser impact on the Green Belt. As such, we would be grateful if GBC’s Planning Policy team would continue to have regard to its availability and suitability to accommodate housing development.

We hope this submission is useful. Please do not hesitate to contact if you wish to discuss this matter further. Our representations have been submitted.

Attached documents:

**Land between Glaziers Lane and Strawberry Farm, Flexford**

The SA (2017) considers the site for 100 dwellings and acknowledges the site is red-rated Green Belt and would introduce in-depth built form north of the railway, although it is in very close proximity to Wanborough train station (para 6.6.16). Such a position is contradicted by footnote 36(A) on page 32 which states that ‘the site is on the edge of the village relatively distant from the train station’. Page 129 states that the site ‘has a water body and stream at its eastern extent and falls within the Wanborough and Normandy Wood and Meadows BOA. The SA (2018) reiterates the comments above.

The Green Belt study identifies the site as red-rated and within parcel H10. The site was identified as parcel H10B and is identified as a potential development area. This said, it is clear that the site breaches the existing railway line with the settlement of Flexford to the south. In addition, as identified within the SA, the development of the site - besides a small scale linear development- would result in in depth form. No consideration has been given to these matters in the Council’s evidence.

Our Client has concerns that not only does the proposed allocation breach the existing boundary of the railway line and would undermine the character of the linear pattern of development of Normandy but results in removing Green Belt land which scores higher sensitivity to Green Belt than our Client’s site.

Attached documents:

**Land at Westwood Lane, Flexford**

We have submitted representations in relation to the suitability, availability and deliverability of the site for residential development through the Local Plan Examination. For ease, these representations are enclosed at Appendix 2. On the
basis of the concerns identified above, the additional sites proposed for allocation through the Main Modifications are not considered to be the ‘reasonable alternatives’ based on the Council’s own evidence. GBC has failed to justify why our Client’s site has discounted at this time.

In addition to the above, a Vision Document (enclosed at Appendix 1) has been prepared to demonstrate the opportunities for the site to deliver new development in light of technical considerations and accessibility. The site itself is within 800m of Wanborough railway station and is accessible to a range of local facilities within a maximum of a 20 minute walk from the site. Baseline survey work has been undertaken in relation to the technical constraints/ opportunities of the site which has led to the following design principles:

- Sensitive development to the east of the site in response to the existing housing on the boundary edge;
- The landscaping strategy should retain and enhance trees and hedges, particularly the high quality field boundary trees, to support ecology and biodiversity
- A 15m buffer to be provided to the off-site Ancient Woodland
- Additional planting and other landscape measures should be implemented to the western site boundary to create a strong landscape edge to the settlement
- The site should feature a sustainable drainage system working with the topography of the site.

In light of the above, the site could accommodate up to 350 dwellings with primary vehicular access from Westwood Lane. In addition, pedestrian links could be provided through the development linking to the surrounding PROW’s and road network. An indicative layout is shown below (as contained within the vision document).

**Summary**

Overall, the additional allocations proposed within the Main Modifications to the Local Plan are unjustified and based on a lack of sufficient evidence to demonstrate that ‘all reasonable alternatives’ have been robustly considered within the SA. In our view, some of the proposed allocations could significantly undermine policies contained within the draft Local Plan and could result in adverse landscape impacts which cannot be fully considered on the basis of a lack of evidence supporting this consultation. We do not consider there is sufficient justification at this time to demonstrate that the main modifications are the most appropriate strategy for the emerging Local Plan.

The land at Westwood Lane, Flexford is a suitable and sustainable location for development. It is not at risk of flooding, not subject to ecological designations or interest, is not subject to national or local landscape designations, sits within an enclosed landscape and is not at risk of flooding. Moreover, the site is approximately 800 metres from Wanborough train station and therefore offers the opportunity to support modal shift away from the car, including for trips to Guildford. The site is also close to existing bus services, such as the 694 school bus route which runs from Christmas Pie via Puttenham to Broadwater School, the 520 runs five buses per day both ways between Aldershot and Guildford via Flexford. The PT5 service provides a school bus service to St Peter’s School running during term and operates between Ash and the school.

The land at Westwood Lane, Flexford is also deliverable. The involvement of a national housebuilder highlights its availability for development and it is notable that this site is not subject to any restrictions which might arises as a result of the need for infrastructure delivery for example. Linden Homes consider that this site would be achievable within 5 years and on the basis of the comments set out above, encourages the Council to support the allocation of the land at Westwood Lane, Flexford.

see attachment for appendix

**Attached documents:** Turley Hannah Bowler Rep Redacted.pdf (9.6 MB)
MM44: A64 - Land between Glaziers Lane and Strawberry Farm, Flexford

The policy proposes to allocate the site for approximately for approximately 105 homes (C3), including some self-build and custom house building plots.

The proposed site is detached from the main Flexford settlement, being on the other side of the railway line, an important and permanent defensible boundary which defines the village of Flexford.

LHF does not have these landscape issues and has the distinct advantage of being closest to Guildford. Every option assessing LHF scores more positively than any option involving Flexford (A64).

Proposed additional housing site A64 should not be included within the Main Modifications to the Plan, particularly at the expense of LHF.

Inclusion of Liddington Hall Farm site

LHF was removed from the previous Proposed Submission (Regulation 19) version of the Local Plan and has not been re-inserted. We believe this renders the Plan unsound given the council should be planning for more housing and is surprising given that:

- The site is in a sustainable location on the edge of Guildford and within easy reach of the Fairlands Estate;
- It is well-served by local bus routes with good cycling connections to the town centre. It is within walking distance of the local facilities in Fairlands;
- The level of additional traffic generated from LHF and affecting the A3 would be very low and the level of traffic impacting the key links during the peak periods would be minimal. A scheme for only half the site i.e. 300 homes would have an even more limited impact;
- From this, it can be concluded that no further work would be required to the junctions and there would not be a severe impact with the addition of LHF over and above the developments already assumed to be delivered in the early part of the plan period. A scheme for only half the site i.e. 300 homes would have an even more limited impact;
- The above does not take into account modal shift that could be enabled as a result of improvements to bus / pedestrian / cycle network in and around LHF. It does also not take into account other factors such as peak spreading / changing working from home patterns, etc. Clearly, these would reduce the impact on the A3 during the critical peak periods even further;
- The site is well connected at present and the development of the site has the potential to enhance the pedestrian, cycle, and public transport network significantly for the wider population. To do so, would require relatively limited improvements compared to other sites. LHF is well placed to assist and benefit from the Sustainable Movement Corridor (SMC) given that SMC1 appears to be the only element of the whole corridor that has secured Local Growth Funding, undergone public consultation and has advanced designs. The delivery of c.300 units allows scope to secure additional financial contributions towards the local walking and cycling routes around and across the site that exist at present to link up with the SMC. In terms of public transport, LHF is already well connected with 6 bus services running adjacent to the site including three high frequency routes (KITE and 26/27). There may be opportunities to divert services into the site, promote new services and/or improve frequencies of existing services;
- GBC are in advanced discussions with Berkeley Homes and that this would aid the delivery of the site, particularly in the short term. It is our view and Berkeley Homes’ that the LHF site could delivery up to 300 homes within the next five years. The site is in single ownership, is not incumbered by any significant transport constraints/infrastructure needs, and discussions are advanced with various housebuilders. There is no impediment to early delivery;
- We are also confident that the site can be master planned to avoid any significant impact on the openness of the Green Belt. Although we disagree with the conclusions and scoring of the LHF site in the Council’s Green Belt Study anyway, if a smaller portion of the LHF site were reassessed, we are confident that the site would not be scored as ‘highly sensitive’ Green Belt
- The existing footpaths already connect the site back in to adjoining residential areas;
- The site is effectively surrounded on three sides by existing development and two streets of existing development extend into the site from Aldershot Road;
• The substantial tree belts and small copses on the western and southern boundary, together with the settlement edges and road corridors on the northern and eastern boundaries establish a sense of containment to the site;
• The site has clear defensible boundaries and an appropriate Masterplan for the site could provide a robust green edge;
• The site has a very limited role in preventing the merging of Guildford and Fairlands;
• The site has only a limited role in containing the sprawl of urban areas;
• The site plays no role in preserving the setting and special character of an historic town;
• The site is not subject to any landscape-related, ecological, archaeological or heritage designations;
• None of the land is high grade agricultural land (predominantly grade 3 with some grade 4);
• The site is not a flood zone;
• Residential development of the site would be compatible with adjacent residential land uses; and
• Appropriate access into the site can be achieved.

Soundness of the Proposed Submission Local Plan with Main Modifications

As with the previous versions of the draft Local Plan, we maintain that the Proposed Submission Local Plan with Main Modifications is unsound because:

• It has not been positively prepared and it fails to adequately meet Guildford’s housing need or exceed minimum housing requirements;
• It is not based on a robust spatial strategy to meet housing need;
• It is not effective and is unlikely to deliver enough new homes earlier enough in the Plan period; and
• It is inconsistent with the aims of national planning policy in terms of the presumption in favour of sustainable development.

I trust that the above is clear but please let me or my colleague, Ben Frodsham, know if you have any questions.

Attached documents:

Comment: MM45 - LPMM18/6264  Respondent: Thakeham Homes (Sir or Madam) 17976417  Agent: RPS Planning & Development (Mr Cameron Austin-Fell BA)

MM45 – see MM39

Main Modification 39 (MM39) – Site A61

The Modifications suggest that the greatest contribution to early housing delivery will be made via a constrained site with an uncertain delivery. The Sustainability Appraisal determines Aaron’s Hill as the most appropriate larger site due to its location in relation to Godalming and its relationship to the emerging proposed allocation in the Waverley Local Plan Part 2.

The Waverley Local Plan is not however far advanced, currently at preferred options stage. It cannot therefore be given weight in determining the suitability of the site. The relevant proposed allocation has also been submitted as a planning application, but this is not decided and is currently the subject of several environmental concerns and consultation objections. Adoption of the Waverley Local Plan is not anticipated until late 2019, and prior to approval of the above-mentioned site (if this should be achieved) the comprehensive design requirements of a cross boundary site under separate applications and the delivery of infrastructure across multiple Council’s should only hinder the delivery of the site. The delivery of a site of this scale within the first 5 years of the plan with these delivery constraints is therefore unlikely and its inclusion would make the plan unsound.

Attached documents:
MM45 Policy A64
Land between Glaziers Lane and Strawberry Farm Flexford

We are concerned about the proposals to redevelop the land between Glaziers Lane and Strawberry Farm, Flexford, Normandy because of the potential impact that the proposed residential units could have on the existing Strawberry Farm Waste site. The proposed new residential development in such close proximity to the facility could potentially comprise a future threat to the operation of this existing site. It is therefore considered, in accordance of paragraph 182 of the NPPF, that the plan making authority, as ‘the agent of change’ in promoting this development, must ensure that suitable mitigation can feasibly be delivered to safeguard the future operation of the existing waste facility.

Attached documents:

Comment: MM45 - LPMM18/36  Respondent: Ms Anne Deacon 20453409  Agent:

and the same again - no high density housing and without front gardens and room for mature trees

Attached documents:

Comment: MM45 - LPMM18/393  Respondent: Nick Sargent 20587137  Agent:

I am disappointed by the inclusion of site A64 (Normandy) into the latest version of the draft local plan. The reason I object to the development of this site is;

1. No exceptional circumstances have been provided as to why the green belt boundary should be redrawn in Normandy.
2. Several previous applications on this land have been refused.
3. The current sewage systems are already overloaded and this would make it worse.
4. Access to this site is dangerous due its close proximity to the railway bridge.
5. It will potentially damage views of the Surrey Hills (AONB).
6. This site is also prone to surface water flooding and is a natural run off for the surrounding area.
7. The local community has not been consulted on what development they would like in the area.
8. This site sets a potentially dangerous precedent for green belt development.

Attached documents:

Comment: MM45 - LPMM18/427  Respondent: Mrs Elaine Sibley 20603265  Agent:

Why would Guildford Borough consider building 105 houses in an area that has no existing facilities and already is suffering from increased traffic and pressure on local health services? In addition, the road and sewage systems in Normandy and Flexford are already overloaded and building yet more houses would make matters a lot worse. Guildford Borough Council has also not explained clearly what ‘exceptional circumstances’ are needed to redraw the Green Belt
boundary around Normandy. It seems to local people that this proposed planning application would lead to the urbanisation of our community and place long term strain on it without any benefit.

Attached documents:

**Comment:** MM45 - LPMM18/455  **Respondent:** Mrs Elizabeth Owver 20605793  **Agent:**

Area A64. Glaziers Lane. 105 Houses.

I am writing to object to the plan to build 105 houses on A64 in Glaziers Lane, Normandy. This is the third, and biggest, application to build on this site. The last 2 smaller developments were turned down and nothing has changed.

**Green Belt**

This is valuable green belt land dividing the settlements of Normandy and Flexford. I see no exceptional circumstances which make it necessary to sacrifice green belt for housing.

A64 was not in the local plan at all until recently but has been added later. There are brownfield sites which should be used for housing. I understand it may cost more to develop brownfield sites but brownfield areas need to be used sometime and must be cleaned up sooner or later. Councils need to bite the bullet and do it now. People can then live where they work + not see abandoned land in towns going wild + being neglected. Our green belt is **priceless** and once it has been built on and violated it is lost forever.

**Environment + Flooding**

A64 is not suited for building. It is good grazing land but remains waterlogged throughout the winter with a high [unreadable text], as illustrated by the lake which is full, even after an exceptionally dry summer.

Flooding + surface water drainage are by [unreadable text] in Normandy (ref. Flood Forum minutes for the last few years). A64 is a valuable "sponge" holdup water + preventing harmful run-off + problems elsewhere.

**Traffic**

Glaziers **Lane** is a D-road + not designated a Lane for nothing. Access from 100 houses onto the Lane would be a nightmare. One of the reasons planning was refused before. They will all have cars, an essential in an isolated village for school, shopping and work. Just because it is near a railway station people still need a car.

**Infrastructure**

As a D-road there are lots of parts of the Lane needing repair, a bumpy bridge, subsidence at the North end. We have waited 3 years for the repair of a collapsed drain outside our house - it took 3 men 4 days - and at last surface water is not spreading into gardens. The men doing it said it was a result of heavy traffic. This shows our infrastructure is struggling now and cannot take anymore strain. The sewage system to the north of us also fails to cope at times, so it too cannot take any more.

Please, hands off our Greenbelt.

Attached documents:

**Comment:** MM45 - LPMM18/667  **Respondent:** Bryan Starkey 20624065  **Agent:**

2365 of 2575
I wish to register my objection to the above which relates to the proposed development of 105 dwellings North of the railway line to the East of Glaziers Lane, Normandy.

My reasons are as follows:

1. No exceptional circumstances have been cited for removing the area from the Green Belt - or building on Green Belt land. Indeed, previous planning applications for smaller developments on the site have been rejected on the grounds that the area makes an important contribution to the openness of the Green Belt.

2. Such a development would increase the population of Normandy significantly, increasing the load on local infrastructure - roads, sewerage and drainage, schools, healthcare etc. There appears to be no mention of the need - and expenditure required - to improve the infrastructure to cope with the proposed new development.

Attached documents:

Comment: MM45 - LPMM18/738   Respondent: Mr Christopher Read 20636065   Agent:

I have lived in Normandy for 15 years and I am in favour of this new policy, ie I would like to see development on this site.

I share the concerns of my neighbours on infrastructure but, as an alternative to resisting development, I would urge the council, in due course, to apply with resolve policies on s106, CIL and Affordable Housing and not to let the developers argue down or out these benefits on spurious grounds of viability as too often happens.

If the requirements on infrastructure improvements and Affordable Housing are known and clear in advance, this should inform the site price (regardless of whether this land is already 'optioned'). If the developer is too keen and and if the landowner is too greedy and a deal is struck on the land at a level which, after costs, delivers a reduced level of profit, then, since the relevant policies (in particular on affordable housing and s106) will by then be clear, the council should ensure that there is no reduction in community/infrastructure benefits to subsidise this; the risk must lie with the developer and not with the community,

I do not object to this proposal on grounds of loss of green belt; too many times such arguments are allowed to prevail when, in reality, and crudely, there is plenty of green belt and this should not be allowed to prevent desperately needed housing.

I believe that, far from being detrimental to the character and life of the village, the arrival of 'new blood', and in particular young families, would be a good thing.

Attached documents:

Comment: MM45 - LPMM18/749   Respondent: Chris and Caroline Lenton 20637857   Agent:

Thank you for your time in reading this email in respect of the GBC draft local plan including the Normandy Amendment Proposal Ref MM45, Policy A64.

Having considered the Amendment Proposal Ref MM45, Policy A64, we have strong objections to the Amendment Proposal, and as a starting point would make the observation that it just seems an extraordinarily complex and problematic plan to implement given all the environmental, transportation and other logistical issues that will need to be addressed to significantly increase the volume of people and traffic in Normandy.
We appreciate that houses are required and need to be built somewhere, but they need to be built somewhere appropriate, and from our perspective there are three obvious and fundamental issues concerning Normandy that need to be dealt with as a starting point, namely:

- how are the already inadequate and busy roads going to cater for the increased volume of cars;
- how is the impact on the protected and fragile local eco-systems going to be satisfactorily managed; and
- how are the flooding issues that affect Normandy going to be sorted out.

Everyone will have their own personal issues and opinions in respect of all of the above and more, but we will just deal with the two issues that from our perspective just make the plans a non-starter regardless of anything else. This is not to say that we do not agree with and support other objections, but traffic and flooding are what we see on a daily basis.

Traffic

I work in Guildford and aim to leave at 7.30am every day and the absolute cut-off time for leaving is 7.45am. If I leave after that point then I will struggle to be at work for 8.30am. We are talking about a distance of 5 miles! The junction where I get on to the A323 is from Hunts Hill Road with Glaziers Lane directly opposite. By 7.45am there is a never ending stream of traffic going past that makes even turning left difficult. You have to take your chances and get out when you can, but at the same time you have the poor people trying to turn right from Glaziers Lane directly opposite, they just get stuck there, and sometimes you both pull out at the same time. It is dangerous and there is too much traffic already at this one junction.

My wife goes down to Petersfield so ideally she would cross the A323 from Hunts Hill Road to Glaziers Lane. She goes a bit later at about 8.15am and has given up trying to make that crossing, it is very dangerous, you wait for ages and when there is a gap in the traffic it is very unclear who has priority. She therefore goes in the opposite direction down Hunts Hill Road to Pirbright Road where she turns left and left again so that she can come to the end of School Lane and turn left and then right, all of which isn't very satisfactory.

There is already too much traffic. There have been big developments already around Ash that have flooded the roads with traffic with more proposed. We have not seen any proposals as to how the additional traffic can be accommodated, and we simply don't see what could be put in place from an infrastructure perspective to address the significant additional traffic volume that would result from the proposed developments in Normandy.

Flooding

The rain on Sunday caused flooding all over Normandy, there was static water and large puddles on every road, it is dangerous and a real issue. This is the case every time there is a significant amount of rain, be it during the Summer or the Winter. It is difficult to see how the development could not affect the stream running through the designated area, so where will this water go? In my experience unless works are specifically being done to address flooding issues, large developments just exacerbate the problem because there is less land for the water to drain into and it deprives the locality of the natural water courses so the water will need to find a new course. Flooding is a known and very noticeable issue in Normandy and again it is difficult to see how the proposed development would not make the situation even worse, not only for the areas immediately surrounding the development but further afield too where we live and the main roads that are already prone to flooding. Again there are no details of how this problem will be, or could be, addressed.

Moving away from the specific planning considerations we moved into Normandy fairly recently at just over 3 years ago, but have lived in the general area most of our lives and it seems extraordinary that Normandy should be singled out as the obvious place for a development of this sort. It is one of the few villages that still has a genuine village feel with a community of residents who have lived there all their lives. Very different from other local areas such as Worplesdon where we have recently moved from which is mostly inhabited by people who have recently moved out of London down to Surrey, keep themselves to themselves, and generally just view the village as a useful commuter base for London. This is why we moved here!

Obviously nobody wants a development in their back yard, and it is understandable that any people potentially affected by a development will react swiftly and with a huge element of self-interest. However we believe that Normandy is unique in being a genuine village community, and a close community that has been together for many generations.
reaction of a lot of the long term residents we have heard talk about it is one of bewilderment and sadness rather than anger and blatant self-interest, because they know what could be destroyed in terms of community and village spirit in addition to the worrying impact on the countryside and wildlife in the local and surrounding areas.

We understand that the decision rests in your hands so we would also ask that in addition to the more technical and legal arguments that will be thrown your way that you also just pause to consider the unique spirit of Normandy.

Attached documents:

Comment: MM45 - LPMM18/817  Respondent: Geoffrey Doven 20642209  Agent:

Reference; Normandy Main Modification MM45, Policy A64

I wish to record my objection to the above referenced planning policy. My objections are that the proposal has been introduced without consultation and without local residents being given the opportunity to suggest more suitable alternatives.

There are brown field sites in the area, in particular the Elms Centre where an outline application was rejected for the erection of 30 dwellings. The following reasons given for the rejection apply to the A64 proposal and are as follows;

The proposal would result in an adverse impact on the openness of the Green Belt and no very special circumstances have been put forward that would outweigh the inherent harm. The proposed development would also be at odds with the ribbon form of development within the area and would equally be to the detriment to the established semi-rural character of the area.

There are other sites which should be considered before A64 such as the Wyke Farm site at the Guildford Road end of Westwood Lane. The Wyke Farm site adjacent to the main Guildford Road and would accommodate 105 dwellings. Within that site a provision could be made to incorporate a roundabout at the Westwood Lane/Guildford Road junction. This would be a tremendous benefit to the community by way of easing road conditions at the junction, it would also reduce through traffic on Flexford Road and Glaziers Lane while taking into account future road transport requirements as well as the much needed slowing of traffic adjacent to Wyke School.

The change of use for the land for A64 from Green Belt is wholly unwarranted and would adversely impact upon the existing infrastructure, the existing local sewage system is already backing up on local properties to a point where some properties have installed non return valves to prevent homes being flooded with waste and Glaziers Lane is a country lane which is already overburdened with traffic.

This proposal has been made without any benefit to the local community or securing the long term future of village facilities, also the provision for the much needed improvement of the local infrastructure is missing from the proposal.

Attached documents:

Comment: MM45 - LPMM18/848  Respondent: Mrs Sarah Sangster 20642529  Agent:

Strong objection to the proposed development on the following grounds:

1. It has not been made clear what the 'exceptional circumstances' are to enable the Council to re-draw the green belt boundary in Normandy. The proposed development MM45 is red rated land in terms of green belt sensitivity.
2. Applications for development at other sites in Normandy have been rejected on exactly the same ground as apply to this one: inappropriate development in and negative impact on the openness of the green belt. This marks a u-turn by the council.

3. No justification about why this site has been chosen over any others - there is no clear advantage to this site over others. The burden of the proposed development does not have equivalent benefits to the community - as admitted in the Sustainability Assessment.

4. Adding this proposed development in the Local Plan Modification makes a mockery of the whole local plan process. Denies local residents the chance to have their say about development in their community.

5. Recent (Oct 2018) revised forecast for Guildford population growth from the Office for National Statistics means that expert opinion (Barton Fillmore) has calculated a decreased housing need - a 45% reduction.

6. Surface water flood risk at the eastern extent of development, (including a stream at the eastern extent which drains south to nearby Little Flexford SNCI) and what impact any changes will have on nearby properties - particularly driveways with a downward gradient. Our garage floods when there has been past excessive rain coming from the road by the proposed site.

7. Normandy residents already struggle with an overloaded sewage system, without extra houses adding a strain to the system.

8. Glaziers Lane is an unclassified road and will struggle to cope with substantially increased traffic this proposed development could bring.

9. Due to the fact that there are no local facilities in the area (the nearest shop, for example, is more than a 10 minute drive away), it is essential to use a car from the proposed site. The majority of people drive to work, with no local school within walking distance, residents have to use their car(s). There are a number of points in relation to increased traffic along Glaziers Lane:

   - Glaziers Lane has a 30mph speed limit and at points poor sight lines that have caused a small number of serious accidents in the past.

   - Current access to the proposed site is very close to a potentially dangerous blind bridge (due to its steepness) over which some drivers speed. The council has recently acknowledged this dangerous spot by investing in new pavement which extends further away from the bridge so that pedestrians do not have to cross the road at this same access point (the pavement only runs along one side of the road). Therefore it is not safe for cars to regularly exit out of this access point in addition to pedestrians crossing nearby.

   - Although reinforced 40 years ago, the bridge has suffered from front and rear edge subsidence as a consequence of local HGV traffic, exposing the front edge of the reinforcing concrete slab. Further disturbance by substantially increased traffic and HGVs for this development project might lead to the closure of Glaziers Lane for bridge repairs. Although a Class D road, Glaziers Lane is used by through traffic HGVs for access to the A323 towards the Ash area to the west and A324 to the Worplesdon area to the east. More frequent damage to the road bridge due to significantly increased traffic flows would be hugely disruptive to local vehicle movements and disrupt this traffic flow which will have a back up effect onto the A31 at peak times, in addition to the cost of maintenance.

10. There is a fishing lake in the proposed development which has not been considered for wildlife.

11. The proposed site is within 2km of the Thames Basin Heaths Special Protection Area and will have a knock-on impact.

Attached documents:
I wish to object strongly to the inclusion of the above site in the modified proposals for the local plan.

When an application to build 24 houses on this plot was made some years ago I was in favour as the plan included a number of more affordable homes, which the village desperately needs. Once the application was reduced to large 3 and 4 bedroom homes, of which the village has plenty I opposed the application. My opposition to the building of over 100 homes on this plot is based on the following.

1) Why is it now considered acceptable to build over 100 homes on a green belt site at which two applications for much smaller developments were refused on the basis that this was top level green belt and must be kept as such.

2) The infrastructure in the village is already overloaded and this development would only exacerbate that problem whilst adding no benefits to the overall community. In detail the road system in the local area is already stressed with delays common on major routes. The two north south roads in the village Glaziers Lane and Westwood Lane handle not only local traffic but a large number of crane trucks for the recycling facilities in the area as well as being used as rat runs during the rush hour periods. This area of Surrey and northern Hampshire is already in the process of a number of large housing developments which will exacerbate these problems. The added traffic from over 100 homes accessed from Glaziers Lane will result in chaos as the junction from Glaziers Lane to the Aldershot road is already a pinch point during the morning and evening. The doctors surgery and its parent at Fairlands are already stressed. The sewage and electrical supply systems in the area are already stressed by the number of small developments which have taken place with no infrastructure improvement. Without infrastructure improvements this is a no win situation for the village.

3) What are the 'exceptional circumstances' which would allow such a development on greenbelt land.

4) Why have the residents of Normandy not been approached to determine where they believe any development should take place.

5) A part of the development would be adjacent to the Strawberry Farm Waste Management Site. There appears to be no environmental assessment concerning any possible risk from this proximity.

Attached documents:

---

I object to the Main Modification 45 – MM45 – dealing with policy A64 of the Guildford Local Plan, due to the following reasons:

- The Council has been unable to state what the ‘exceptional circumstances’ which mean that the Council can redraw the greenbelt boundary in Normandy.
- In fact, previous applications for development at other sites in Normandy have been rejected on exactly the same ground as apply to this one: inappropriate development in and negative impact on the openness of the Green Belt. Previous rejections have actually stressed the extreme sensitivity of the site and the damage that would be done to the openness of the Green Belt should development be allowed on it. By adding this additional proposed development into the Local Plan it is a ridicule of the whole Local Plan process. It means that local residents can’t have their say about any change in their community, as they previously have in past rounds of consultation.
- The Sustainability Assessment stated that there is no benefit for the community to this development taking place. It would of course, though, place a burden on the resources of the community and on the Green Belt. There is no clear justification for this site to be developed over any other. There are no strong arguments.
In order to fulfil the 105 homes quota on this proposed site, there would need to be buildings 3 storeys, maybe 4 high. This would be completely out of character for Normandy and Flexford and also the view from the Hogs Back – it would severely detrimentally affect the Surrey Hills Area of Outstanding Natural Beauty.

The total housing number in the Local Plan fails to take into account the very latest housing projections by the Office for National Statistics. So the numbers for Guildford population growth are overstated. Expert opinion from Barton Willmore has confirmed a 45% reduction should be applied.

Failure to consider brownfield sites by the Council.

No infrastructure improvements have been proposed as part of this Main Modification to the Local Plan. The proposal would increase the size of Normandy by 7% - not an insignificant amount for a small village.

Normandy residents already struggle with an overloaded sewage system, without extra houses adding a strain to the system.

Surface water flood risk at the eastern extent of development, (including a stream at the eastern extent which drains south to nearby Little Flexford SNCI) and what impact any changes will have on nearby properties – especially driveways with a downward gradient. Our garage floods when there has been past excessive rain coming from the main road by the proposed site.

Glaziers Lane is an unclassified road and will struggle to cope with substantially increased traffic this proposed development could bring. Glaziers Lane has a 30 mph speed limit and at points poor sight lines that have caused a small number of serious accidents in the past. Despite having a train station, due to the lack of local facilities in Normandy, owning a car is essential in order to live in the village.

Current access to the proposed site is very close to a potentially dangerous blind bridge (due to its steepness) over which some drivers speed. Up until recently, pedestrians also had to cross the road next to this access point because the pavement ends here and starts again on the other side of the road. The council has recently acknowledged this dangerous spot by investing in new pavement on the other side of the road, so that it extends further away from the bridge so that pedestrians do not have to cross the road next to this same access point. It is not a safe place for the number of potential cars likely to regularly exit out of this access point - in addition to pedestrians crossing nearby.

Concerned about the possible environmental hazards of the Strawberry Farm waste management site. No assessment has been made.

Attached documents:

**Comment:** MM45 - LPMM18/1100  
**Respondent:** Bob Hutton 20664513  
**Agent:**

I am writing in response to the consultation regarding the Guildford Draft Plan.

As a resident of Normandy, I am particularly concerned and would like to register my objection to the Policy A64, in which 105 houses are proposed for Normandy.

I have a number of objections

1. This site has not been mentioned in any of the previous consultations, so this is a very late stage in the proceedings to request feedback on the viability of the proposed site.
2. The site is within the current green belt and there are no exceptional circumstances for it to be considered. The site is very close to the AONB and any significant developments would be visible from and damaging to the views from the Hogs Back.
3. On parts of this site there have been previous smaller planning applications, all of which which were rejected; among the the reasons given were that the proposed developments would go against the current linear nature of Normandy’s Glaziers Lane, as well as the lack of services in the area.
4. Given that there is already a pond on the site it is difficult to see how 105 houses could fit onto this site, without removing the pond and / or building houses of more then two storeys, which would also be out of keeping with the surrounding area.
5. This area, as with several other locations in Normandy is susceptible to flooding; this occurs not only by occasional flash flooding as a result of heavy rainfall, but also by foul water resulting from overflow or blockage of the local sewerage systems.

6. The proposed number of houses would provide excessive strain on Normandy’s services. The local junior school and the doctors’ surgery are at breaking point and would be unable to cope with the additional workload. The report notes that Normandy has a lack of shops and other services. There is no indication that any additional services or facilities would be provided along with the proposed site.

7. The addition of this number of houses would also increase the traffic on Glaziers Lane significantly. It is not reasonable to expect all the occupants to use the train, so it is normal to expect each household to own and use two cars. Glaziers Lane is classed as a ‘D’ road and already has large numbers of cars and heavy lorries using it on a daily basis.

8. The location of the site would lead to an entrance/exit very close to a narrow bridge that is on a bend and is blind. There are regular complaints that the bridge is dangerous, and the bridge surface is already suffering signs of wear from the already heavy use.

9. There are many reports that the latest housing figures are an exaggeration, so these latest figures should be considered.

10. There should be further consideration of brown field sites and the town centre area before damaging the green belt.

11. Finally, this site is being proposed as a quick win; I understand the ownership of the overall site is not clear and given that the site includes the pond, it is likely that there would be significant complexity and objection to any plans.

Thank you for the opportunity to comment on the changes to the Draft Local Plan. I am largely supportive of the contents of the plan, but feel that is important that its acceptance does not damage the nature of the green belt, nor does the need for rapid response to issues raised by the inspector result in lack of due consideration of the merits and demerits of proposed site allocations.

Attached documents:

**Comment:** MM45 - LPMM18/1101  **Respondent:** Sue Hutton 20664897  **Agent:**

I am writing to register my objections to the plans to build 105 houses as site A64 on Glaziers Lane in Normandy. Building this number of houses in that location would be totally out of character with the rest of Glaziers Lane and is in the green belt as it gives the area views out into the open countryside. Putting buildings there would result in the area being built-up and would surely result in even more houses to be built resulting in the loss of Normandy as the collection of rural hamlets it is currently.

This would also result in significantly more cars on Glaziers Lane, which is already busy. There would also be more families needing to use the surgery and junior school which are already heavily used. As there are no shops in Normandy, there would also be more shopping trips or delivery vans on the Lane.

I’m aware that there was a public meeting where about 200 people attended and there was almost universal objection to building in this location.

Please reconsider the plan to build in this location. Surely there must be old commercial buildings or shops in the Guildford area that could provide this number of houses without building on the green belt?

**Comment:** MM45 - LPMM18/1130  **Respondent:** Dennis W. Higgins 20666401  **Agent:**
Normandy Proposal, Main modification 45 / dealing with Policy A64

MM45/ A64

I object to this planning proposal as it's build the council need to re-draw the Flexford village boundary north of it's current position, namely the railway line through Wanborough station. The current boundary fully separates the villages of Flexford and Normandy, thus allowing their quite separate identities, and historic charm, to prevail.

In redrawing the Flexford boundary to accommodate this proposal, the council is going against the fundamental aim of green belt policy as supported by the National planning practice guidance. i.e. "to prevent neighbouring towns (villages) from merging into one another". In redrawing the boundary this will start this devastating reality. This proposed site is already rated "red" for sensitivity to prevent the urbanisation of Normandy as a whole.

I also object to this MM45/A64 proposal as I am not aware that Guildford Borough Council (GBC) have given as needed the "Special circumstances" surrounding the need to develop this land. My understanding is that they must define the "exceptional reasons" why this land is more suited than other sites within the borough. This they have not done.

I also object to MM45/A64 proposal because of the sheer scale of development, an increase of some 7% or more homes in Normandy. The strain placed on services and facilities needed is one issue, but GBC have not outlined any improvements to the infrastructure of the surrounding villages needed to complete this proposal.

I also object that what will result from this proposal is no more than a "Housing Estate" that is totally out of character with the existing housing stock in the area. In short there is no benefit to the Flexford/Normandy villages, but a guaranteed long term strain on the communities existing facilities.

I also object to MM45/A64 proposal as GBC have inserted this into the Local Plan at the last minute without any serious consultation with the residents of this area, and appears to be inserted as some sort of "Quick fix" to satisfy the Inspectors new housing quota. GBC need to focus on available brownfield sites within the borough before randomly plucking green belt land as sensitive as this land, and throwing it into the plan.

Green Belt land is only that if it is open and permanent. We are located so close to the "Surrey Hills" which is an "Area of outstanding natural beauty". This proposal will impact on the view from that vantage as well as simply destroying our natural village life by it's mere presence.

I ask you to reject this proposal MM45/A64 in full.

Attached documents:

Comment: MM45 - LPMM18/1131   Respondent: Sheila Higgins 20666561   Agent:

MM45 / A64

I refer to this above mentioned proposal (MM45 / A64) and wish to object on the following grounds.

1. Guildford Borough Council (GBC) has not put forward, as required, the "exceptional circumstances" that surround the reason for wanting to use this green belt land over existing brownfield sites available in the borough.

2. The natural border, separating the two villages of Flexford and Normandy is currently the railway line. I object the GBC re-drawing that boundary line to accommodate this proposal as it will effectively merge the two villages thereby causing them to lose their individual identities.

3. The sheer number of houses, an increase of 7% or more, will result in a strain on our existing services (Doctors, Schooling, Public transport) and the resulting increase in the volume of traffic/lorries during construction will damage the
already weak infrastructure that exists in the villages. GBC have not proposed any improvements to the already overloaded road and sewage networks to accompany this proposal.

4. GBC has not fully appraised existing brownfield sites available in the borough for development. They are reserving these for commercial/retail use. It is widely accepted that the fact of the high street is changing and will continue to do so due to internet shopping. This is accepted by large and small retailers alike. GBC need to look at re-developing these sites for residential use.

5. Previous refusals for use of this "red" rated for sensitivity Green Belt land, have declared the extreme damage to the openness that would be caused. Green Belt has got to be seen to be permanent to be effective.

As a resident I object to this proposal completely.

Attached documents:

Comment: MM45 - LPMM18/1184   Respondent: Mrs Amanda Wordingham 20670529   Agent:

I feel that there is no need to build on green belt protected land. There are plenty of other areas to build on!

Also the roads are not designed for the huge amounts of extra traffic. We have no local amenities. The local schools can’t support the families that would move in.

Attached documents:

Comment: MM45 - LPMM18/1234   Respondent: Jim Allen 20674913   Agent:

3. Rows A61 – A64
We note all these sites are further releases of Green Belt lands rather than finding increased capacity in Town Centre sites... this akin to one year’s supply not five years supply (3,520) - noting lack of sewer capacity at just 325 houses in total..

Attached documents:

Comment: MM45 - LPMM18/1218   Respondent: Richard Cheeseman 20675137   Agent:

The current infrastructure provision for the area does not support the addition of so many new dwellings.

Attached documents:

Comment: MM45 - LPMM18/1303   Respondent: Mrs Steph Pryke 20676513   Agent:
As a parent with young children it is a major concern that we will struggle to find places for our children in secondary school especially with the housing developments currently going ahead in Ash/Tongham. For a village where most people can walk to the local primary school it is very worrying that we could be driving quite a distance to a secondary school that will have enough places.

The old narrow pavement along the main road is already a treacherous route for walkers due to speeding drivers and inadequate pedestrian crossings, especially by the school. The increase in traffic from a large housing development will only increase this danger.

**Attached documents:**

---

**Comment:** MM45 - LPMM18/1305  **Respondent:** Mrs Christine Endacott-Palmer 20676865  **Agent:**

Main Modification 45, MM45, dealing with Policy A64.

Whilst I understand and agree with the need for more houses in the area, in particular affordable housing, this should wherever possible be on Brown Field land or in existing housing developments, not within the Green Belt. Green Belt land should whenever possible be preserved.

There is considerable unused housing and land once used by The Army around the Aldershot area - this should be fully exhausted, along with land (I believe to be owned by GBC) off the A3 on the Ripley side of Guildford, and land on the flood plain in this area (using techniques perfected by the Dutch), before considering building on Green Belt land.

Any and all plans MUST satisfactorily address the infrastructure - so even Brown Field and land already used for housing requires consideration of the infrastructure requirements and improvements that are often required.

There are no proposals to improve the infrastructure with this plan.

The junctions of Glaziers Lane and Westwood Lane (at Wyke) and the A323 Guildford Aldershot Road; Wyke Lane and Flexford Road / Westwood Lane; the junctions onto and off the A31 Hogs Back at Puttenham, Wanborough Hill and the B3000 (which is often queued almost end to end between there and the A3 at Compton) are all currently woefully inadequate and often dangerous with no active traffic management systems (lights, roundabouts, etc).

The hump-backed bridge over the railway line at Wanborough is even now dangerous and would be considerably more so with additional traffic leading off Glaziers Lane nearby.

The sewerage system currently struggles to cope.

The platform of the railway station at Wanborough is too small and could not cope with any additional use (in rush hour even now it is dangerous).

There are no shops in Normandy and the nearest shopping being Ash Vale (limited), Guildford or Aldershot which would add to the already over busy A323 - especially in rush hour and any time a train stops at Ash - in evening rush hour the queue to get through this area can lead back to the start of Normandy (Guildford side).

There is inadequate provision of schools in the area (primary and more so secondary) and public transportation is too expensive and limited so parents add to congestion and pollution by taking their children to school.

The broadband also struggles to cope at the peripheries of the Puttenham exchange - 105 additional houses would result in a degradation of service to all further downstream users.

This is not about NIMBY - it is about preventing building on Green Belt land and ensuring the infrastructure improvements are adequately taken care of before building commences.
The site of Vokes on the A324 required the construction of a large roundabout at the entrance/exit of the site during the redevelopment some years ago - the same rules should apply to any substantial housing developments, whether on existing housing land or Brown Field.

**Attached documents:**

**Comment:** MM45 - LPMM18/1404  **Respondent:** Mr John Archer 20689857  **Agent:**

I would like to register an objection for the 103 dwellings under MM45. I accept the need for affordable housing, but given the rural nature of Normandy, and this last minute inclusion of this in the plan (making consultation all but very difficult), these high density homes are not in character with the area. I also have a number of other issues relating to this proposal.

There is no explanation of the ‘exceptional circumstances’ as to why the green belt boundary should be redrawn. This is a significant abuse of greenbelt land. Given the proximity of the Surrey Hills Area of Outstanding Natural Beauty, this plan is again out of keeping with the area. Previous plan for this land have of course been turned down before for the same reason.

Traffic on Glaziers Lane (operative name LANE) is already very busy on this narrow lane. Given poor public transport (other than Wanborough Stataion) car movements will be required for all but commuting to/via Guildford. The narrow pavement, while recently resurfaced, is not safe for pushchairs or mobility impaired access, particularly as vehicles (often heavy vehicles) regularly break the speed limit.

Wanborough station only has mobility access from the Reading/Ascot bound platform, not the Guildford direction.

There are no community facilities in the area, and none are planned. The doctors surgery is already beyond full capacity, typically requiring more than 1 week to get a doctors appointment. Thi proposed development will not secure additional facilities and will just over burden the existing infrastructure.

GBC has failed to make proper use of brownfield sites, and developers are more keen to build on green belt land purely to increase their profits.

Thank you for your consideration.

**Attached documents:**

**Comment:** MM45 - LPMM18/1488  **Respondent:** Commercial Estates Group 20691297  **Agent:** Nexus Planning (Adam Ross)

**MM45 – Land between Glaziers Lane and Strawberry Farm, Flexford**

For the reasons set out in our detailed representations to MM2, the proposed allocation of this site is unjustified given the Council’s evidence in the SA Addendum 2018, and is contrary to the Council’s own spatial hierarchy / approach given its failure to allocate the deliverable, more sustainable and sequentially preferable site at Clandon Golf (as an urban extension to Guildford).

**Changes Required**
For the reasons set out in detail in our representation to MM2, the revised spatial strategy (and specifically the allocation of the sites identified in MM39, 43, 44 and 45) is unjustified and unsound.

The Council must re-visit the strategy to allocate additional sites to deliver in the first five years of the Local Plan (post-adoption) and base its decisions on clear evidence (most notably the SA Addendum) and its own spatial hierarchy / approach. This will result, on the Council’s own evidence, in the identification of a different development option (and therefore a different suite of sites) to those now proposed. It will also, most importantly, result in a more sustainable distribution of development (on the Council’s own terms).

Attached documents: Main Modifications Reps Combined_Redacted.pdf (6.1 MB)

Comment: MM45 - LPMM18/1774  Respondent: Andrew Shaw 20701441  Agent:

I write to object to the proposal to build 105 houses north of the railway line east of Glaziers Lane. The reasons for my objection are that it involves building on Green Belt land where there would not appear to be any exceptional circumstances for such encroachment, the road is unsuitable for the extra traffic that would be generated both during and after construction, the sewage system in Normandy is already overloaded and the new homeowners would increase pressure on the doctors surgery and local school. The effects on the surgery is of particular concern as it cannot cope with current demand – a wait of 3 weeks for a non-urgent appointment with a doctor is not now unusual.

Attached documents:

Comment: MM45 - LPMM18/2103  Respondent: Mr Ray Chong 20704033  Agent:

This proposal of building 105 homes in an area of AONB is without real and tangible justifications as it does not respect the environment or the wishes of its residents.

The proposal comes with little or no understanding of the impact on the environment, infrastructure requirements, disruption to the area and community plus there are no real sustainability understanding or design and no real value or contribution to the residents or the area.

Furthermore, there is lacking any risk assessment on the impact on the infrastructure needs of such a major development on road and services like sewage & water requirements.

We utterly opposed such a proposal.

Attached documents:

Comment: MM45 - LPMM18/2381  Respondent: Mrs L Rose 20730753  Agent:

Ref: Local Plan Consultation Document: Main Modification 45, Flexford/Normandy Site A64

I wish to express my objections to the large number of proposed houses within the above site which would combine the settlement areas of Flexford and Normandy within designated Green Belt land for the following reasons:
1) I consider that the overall plan indicates overdevelopment for the Normandy and Flexford areas which will destroy the openness and rural environment which currently exists.

2) I object to the proposed development of a 105 houses within the boundaries of Site A64 which is all within Green Belt land.

3) Building on Green Belt land can only be considered if it can be shown that there are very special circumstances. Guildford Borough Council have not demonstrated any special circumstances within the Local Plan as to why it is necessary to remove this land from the protection of the Green Belt and is therefore against National Policy for the Protection of the Green Belt and I strongly object to the proposals. The intended purpose of the Green Belt is to maintain areas of green fields and natural beauty of the green fields which will be destroyed if Site A64 is allowed to be developed.

4) The proposed development is within sight of the Hogs Back and the Surrey Hills which are allocated as Areas of outstanding Natural Beauty and as such would be detrimental to the openness and beauty of this area.

5) There are many brownfield sites that exist within the GBC area which could be Used to meet the housing needs but the Main Modifications 45 document does not demonstrate that any of these sites have been considered to meet the demand of future housing requirements particularly in the next 5 years.

6) Whilst I may accept more houses are needed, if this site is approved for development of 105 homes, Normandy would increase by 7% and would eliminate the separateness of Flexford and Normandy hamlets.

7) **Infrastructure**

   **Traffic:** There are no proposals to improve the existing road systems and footpaths within Normandy and the development would increase traffic and congestion from the resulting additional housing.

   In Normandy the A323 suffers with congestion with the main junctions at Glaziers Lane and Westwood Lane as does the A324 at its junction with the A323 at Elm Hill. In particular Glaziers Lane has no continuous footpath from one end to the other and pedestrians have to cross the road twice where there is a humped back railway bridge and a blind bend.

   **Flooding:** Flooding frequently occurs due to inadequate surface water drainage and also from the sewer pipes. Both of the system have insufficient capacity for the existing houses and would need to be significantly enlarged to prevent future flooding.

   **Utilities:** The existing overhead Electricity supply would also need to be modernized as it frequently cuts off whenever there is high winds or heavy downfalls of rain.

   **Sustainability:** There are no Grocery/General stores within the hamlets of Flexford, Normandy and Wyke to supply the household requirements of food and other domestic supplies and this development would increase the road traffic on the existing minor roads of Glaziers Lane and Westwood Lane.

   **Primary School/Nurseries:** Wyke School does not have the capacity to absorb the potential increase of children from the increase in family homes necessitating additional building work to increase the number of classrooms required.

   In conclusion, within the Main Modification Plan documentation, Site A64 seems to have been suddenly identified as suitable for development within the next 5 years without any appreciation of the designated requirements of the openness of the Green Belt and without any due consideration to any of the points raised above.

   **Attached documents:**

   **Comment:** MM45 - LPMM18/2548  **Respondent:** Finnian James 20754721  **Agent:**
I am writing to object to Main Modification 45 dealing with policy A64.

I do not think that this is a suitable plot to build 105 new houses on for the following reasons:

1. It is green belt land that should not be built on
2. There is not the required infrastructure in place to support any increase in population to the village - traffic would be a big problem
3. No benefit to the community with this development - such as community halls or gardens
4. Previous refusals of planning applications due to impact on green belt and the environment

Please prevent any development of houses on site A64

Attached documents:

Comment: MM45 - LPMM18/3196  Respondent: Peter and Christine Read 20778433  Agent:

GBC - Local Plan 2018 (LPMM18)
Ref Main Modification 45 dealing with Policy A64

We wish to OBJECT to the above modification to Local Plan 2018.

Our objections are on the following grounds:

1. Insufficient warning of proposed development.
2. Number of houses proposed (105) including possible 3 storey dwellings is far too dense for this area. It is totally out of keeping with the existing area.
3. The infrastructure in this area ie roads & sewage systems, is not adequate to support this size of development.
4. Severe damage to the Green Belt area and joining villages together resulting in loss of character.
5. Increased traffic movement on Glaziers Lane which is only a lane and includes hazardous bends and a narrow hump back bridge beside the station entrance.
6. Exceptional circumstances are claimed for this proposal but no details are given.
7. Regular bus route is a mile away and the train service is only 1/2 hourly resulting in more car travel on Glaziers Lane and need to bus pupils to the middle school.
8. No convenient shops, pubs and petrol stations with the result that the new development residents would be totally dependent on using cars.
9. Footpath is on one side only alternating along Glaziers Lane meaning that pedestrians will be forced to cross and re-cross what will be a busy road to reach buses, trains, village hall and medical centre.

We would be grateful if you would take our concerns into consideration when assessing this planning proposal.

Attached documents:

Comment: MM45 - LPMM18/4090  Respondent: James Bouncer 20806401  Agent:
I’m writing to object the Local Plan proposal of site - Policy A64: Land Between Glaziers Lane and Strawberry Farm, Flexford; on the basis of the following points:

This is green belt area and adjacent to an area of outstanding natural beauty. If approved its development would fundamentally alter the importance of protection of our green belt for future generations, aside from visually impacting an area of outstanding natural beauty adjacent to it and highly visible from the top of the Hog’s Back. Responding correctly to this proposal has been difficult when the “exceptional circumstances” as to why the green belt can be altered have not been made available to us.

Glaziers Lane is a narrow lane with an awkwardly angled railway bridge and sharp right hand bend that compromise the road width even further. Such a development with all the additional traffic is going to increase the risk of a serious accident/death in the Lane. It’s important to note this is a Lane not a road, and any possible entrance exit to this site would be unsighted by traffic approaching from the South increasing this risk significantly, especially as at peak times people speed down the lane.

Light pollution is currently very low in Glaziers Lane this development would increase this considerably with cars at night turning in and out of any access road, which will have a knock on impact on wildlife in the area.

Noise pollution is also low in this part of Glaziers Lane, adding 105 houses would dramatically change this in a negative way, adding circa 200 plus cars to the area which is a significant impact.

At present have a thriving population of hedgehogs which do cross the Lane and increased traffic is highly likely to impact them directly, whilst not on any endangered list now there is serious concern over their future as they continue to disappear from our hedgerows. There are a good number of mature oak trees in site A64, with all of the issues over the last couple of decades with disease we need to ensure their protection, not building here and so not impacting their environment would be a good support.

People park in the lane especially if they have a larger number of visitors, with the current limited housing this is less of an issue but adding in so many more houses with limited parking will result in an increase in the occasions when people will park in Glaziers Lane and again increase the risk of accidents (as people always park as near as they can to where they want to be) coupled with the higher traffic volumes again especially important being so near the blind approach from the railway bridge.

The fields and land all around Normandy Village are subject to excessive water build up this will be clearly visible as we move into winter. We are in an area of clay with a high water table, which the standing water after rain at all differing levels reinforces. Such a large development is going to impact this and may affect the water table in a wider area putting houses at risk of flooding? Has a survey been carried out of the lake including any wildlife it supports in the surrounding area. We assume such a plan will result in the lake being drained for houses to be built? Please note the lake to my knowledge has never dried out, so there is a source of water into it that will end up bubbling up somewhere else causing risk of flooding?

There are numerous brown field sites listed on the GBC web site. Whilst recognising that for developers these are not a cheap option’s v’s green belt land, surely repurposing brown belt land must come before the desecration of the green belt? Perhaps developers should be forced to take on 5 houses in brown field sites for every 5 in the green belt, halving the impact??

Sewage / general drainage is an issue in Glaziers Lane, is a significant issue in the Lane. Adding 105 houses will place a massive additional strain on an already challenged sewage system (the system has already collapsed twice in the last few years at the northern end of the Lane, and dip has started forming again recently so later this winter may see it collapsing again). All the additional lorries over a 3 year period to build these houses will massively accelerate this issue and the risk of damage to the road and the just renewed pavement.

Special note on the heavy lorries associated with such a development. The lorries associated with Backhurst etc are already noticeable in that you can feel them in the house as they go by (sometimes at excessive speeds!!) The massive increase in such large vehicles is going to further damage the road and potentially cause our structural issues to houses in the area. Also the buses and lorries that currently come down the Lane (please note not a road) find it very difficult to
stay on their side of the Lane due to its narrowness and completely impossible to turn in and stay on the correct side of the road, both dangerous and very unnerving as a driver going towards them.

Comment: MM45 - LPMM18/4393  Respondent: Linda Pike 20820545  Agent:

I am writing to object to the proposed development of the Green Belt land between Glaziers Lane and Flexford, Ref( MM45 )Policy 64.

What are the “special circumstances” that justify building on this Green Belt land? A proposed development of only 9 houses has already been refused for this site. Building on this side of the railway will open up more land to erode the Green Belt even further.

A development of this size will have a massive negative effect on the local wildlife. This area is within the Wanborough and Normandy Woods and Meadows Biodiversity Opportunity Area which directly meets National Planning Policy Framework.

Attached documents:

Comment: MM45 - LPMM18/4531  Respondent: Peter Medley 20824513  Agent:

Your Ref: Main Modification 45/Policy A64

I am writing to reject the proposed housing development.

This plot/field proposal should not be used as part of the County’s extra housing project. This land is designated ‘Green Belt’ land. You must use all brown field sites before you even consider taking away precious green belt land. Just because the brown field sites are not cost effective is not a good enough reason to start building over the green belt, as and when it suits. This request for extra housing is government lead; therefore I would request that the government part fund the development of brown field sites to make them appealing to the property developer. This proposal is cash lead not environmentally lead.

I understand that this piece of land was considered very late in GBC Local Plan and therefore has no added infrastructure or benefits to the proposed new and present villagers of Normandy. This development will over stretch the local doctor’s surgery, our sewage system, major traffic delays in getting in and out of the village.

If the thinking behind using this land was the convenience of Wanborough train station, with all new residents using the train? I hate to disappoint but it’s not an affordable way to travel if you are on a low income. Plus the majority of new residents will work outside of Guildford town centre, thus requiring a car. As a resident of Normandy many use Brookwood and Woking stations as they are far more reliable. Replacement buses are constantly being used to get to and from Wanborough station.

Your local development team have refused many a housing application on this piece of land. Please oppose this application. It is not suitable to house such a large development, let alone its Green Belt land. It’s protected for a reason.

Attached documents:
Comment: MM45 - LPMM18/5045  Respondent: Louis Medley 20840833  Agent:

Your Ref: Main Modification 45/Policy A64

Dear Local Planning Officer.

I am writing to reject the proposed housing development in Glaziers Lane, with a large proportion being affordable housing.

I have lived in Normandy since the age of one; I am now 25yrs old. There is nothing affordable about living in Normandy. There are no local shops within walking distance, you have to use your own transport or expensive public transport, or use the internet for home delivery. You must have a vehicle to live in Normandy if you want some kind of life and social life.

With the potential of 105 houses being built will cause mayhem in Glaziers Lane. We already have Tunnel Hill trucks banging and crashing along the lane plus the ex-large vehicles going to and from Backhursts. I have noticed that Wanborough Rail Bridge has developed a large ridge in the top. This has been caused by the compression of heavy trucks and local traffic. Our roads in Normandy and Wanborough are not fit to accommodate this amount of extra housing in one area. We are constantly being used as a rat run when the A31 is congested leading onto the A3.

With most development projects they come with added bonuses; this development comes with nothing. It’s just going to put a huge strain on our roads, no extra funding for a doctor to accommodate extra patients. I understand that our sewage system is at maximum capacity.

This proposal of using ‘Green belt’ land is highly damaging to the meaning and laws of ‘Green Belt’. If we were to pass this small area of land over to mass development then we have opened the flood gates on every piece of ‘green belt’ land within Normandy, Guildford, Surrey and the whole of the UK. It needs to stop. I believe there are ‘brown field’ sites within Guildford that have been flagged up for possible development, but these sites are not cost effective. I’m sorry but that’s no excuse for not developing those sites. We need to protect our green spaces in Surrey. The more I listen to the news and hear how mental health and obesity is on the increase in the young and older generations. Having green spaces has been proven to help the recovery of depression.

Talking from experience the field and pond in question is a beautiful place to spend an hour or two exploring and enjoying the wildlife that use it as their home. Please don’t destroy this wildlife sanctuary.

Comment: MM45 - LPMM18/5427  Respondent: Gillian Stanworth 20848577  Agent:

In response to the Main Modifications consultation on the Submission Local Plan, October 2018, I wish to object to the inclusion of Site 64, detailed in main modification 45 (ie. MM45)

The proposed site lies between the two settlements of Normandy and Flexford. In the 2016 Submission Local Plan the area comprising Site 64 was not inset from the green belt whilst the villages of Normandy and Flexford were both taken out. In order to facilitate the development of the site, GBC are now proposing that the said piece of land should also be taken out of the green belt, as shown on the map accompanying the proposals for Site 64 - a desperate measure to enable them to build more houses. According to NPPF guidelines, green belt boundaries can only be altered where there are “exceptional circumstances”, but GBC have given no evidence of the existence of any such circumstances. In addition a study made by the GRA (Guildford Residents' Association) suggests that the figures for the number of extra homes required for the Guildford area have been greatly over-inflated by GBC, which means that development on so much green belt in the Borough in general is unnecessary. It is my contention that there is no justification for the development on the green belt proposed in site 64.
Normandy and Flexford have long been regarded as distinct and separate settlements (see map accompanying the 2014 draft Local Plan, and the fact that they were treated as separate villages when inset from the green belt as already mentioned). If the piece of land for Site 64 is taken out of the green belt and developed as proposed, there will be a severe impact upon the openness of the green belt in this area. It is part of an open belt of countryside stretching from Guildford to Ash/Tongham, which is vital in preventing the town of Guildford from extending out in this direction (one of the purposes of the green belt is to stop urban sprawl). By compromising the openness of the green belt in this way, GBC would be creating the opportunity for further degradation in the future. This would result in the possibility for even more development, and the merging of Normandy and Flexford, with the consequent loss of the open character of each. The increasing encroachment into the countryside in this way would lead to the loss of undeveloped land and would potentially result in the degradation of important wildlife habitats and compromise the rural nature of the area. Moreover Site 64 lies within the Wanborough and Normandy Woods and Meadows Biodiversity Opportunity Area (TBL01) designated by the Surrey Nature Partnership, and as such is in all likelihood a valuable resource for nature conservation and biodiversity. By identifying this area as important for wildlife conservation by making it a BOA, developing it for housing is totally inconsistent with NPPF policy.

For the above reasons I strongly object to the inclusion of Site 64 in the local plan and would ask that this is removed from the Submission Local Plan.

Attached documents:

Comment: MM45 - LPMM18/5632  Respondent: Thomas Haynes 20850977  Agent:

I am writing to OBJECT to the above sites inclusion in the GBC local plan.

I live in the property [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] and some of my objections are listed below.

1/The development is proposed to take 3 years, during this period myself and neighbours would be disturbed by a significant increase in noise, pollution, etc for the entire length of construction.

2/By the very nature of the development, the copse adjacent to my property would be destroyed, leading to the lose of the numerous birds, slow worms, and hedgehogs and various other wildlife that live in and around the copse, and has done for years.

3/The entries to and from the site would lead to an increase in road safety issues.

The increase in the number of large heavy duty vehicles needed to go to the site would cause increased dangers to other road users and pedestrians alike.

4/The increase in housing numbers would in turn lead to an increase in residents.

The existing facilities and utilities I/e medical,drains,overhead electrical cables,flooding,water supply would not be able to cope with the additional residents especially as no expansion of these facilities are proposed.

In conclusion the Council and residents are proud to live in an area of Outstanding natural beauty, please don't change this into USED TO BE........

Attached documents:
In response to the Main Modifications consultation on the Submission Local Plan, October 2018, I wish to strongly object to the inclusion of Site 64, detailed in main modification 45 (i.e. MM45) for the following reasons:

1) No exceptional circumstances (NPPF guidelines) are given to take the site out of the Green Belt

2) The site is outside the settlement boundaries of Normandy and Flexford, as shown in the Local Plan maps of 2014 and was not inset from the Green Belt at that time. Moreover the sites location is described as Flexford whereas the railway clearly forms a natural northern boundary to that settlement.

3) The site will compromise the openness of the Green Belt between Guildford and Ash/Tongham. As these end locations are already threatened with planned development and destruction of the Green Belt it is even more important to keep the Green Belt in this area intact. Taking site A64 out of the Green Belt can only make it easier for further Green Belt degradation in the future.

4) Site 64 lies within the Wanborough and Normandy Woods and Meadows Biodiversity Opportunity Area (BOA, TBL01) designated by the Surrey Nature Partnership. As such this BOA forms an important east-west wildlife/green corridor between Guildford and Ash/Tongham, and removal of the Site 64 area from the Green Belt and subsequent development will decrease the size of important feeding grounds and habitats for birds, mammals and other wildlife. I have recorded a flock of Starling (BoCC4, Birds of Conservation Concern – UK, Channel Islands and Isle of Man, 2015, Red list) feeding on the site in recent years, Yellowhammers some years back in the hedgerow and I have no reason to believe that other BoCC4 red listed birds such Fieldfare, Redwing, Mistle Thrush, Linnet, Grey Wagtail and House Sparrow feed on this site as they have been seen in the surrounding nearby area.

I understand that the Guildford Residents Association (GRA) have appointed an leading national expert to look at the housing requirements for the Borough, and I am very concerned that this advisor has estimated that the number of houses which need to be built per annum is considerably lower (almost half) than the number proposed by GBC in the local plan. If this is correct it is questionable whether so many sites proposed on green belt in the Borough (including Site 64) are justifiable.

Omission Site: Policy A46 - Land to the south of Normandy and north of Flexford

Policy A24 (Slyfield)

Policy A25 (Gosden Hill Farm) Policy A26 (Blackwell Farm) Policy A43 (Garlick’s Arch); and

Policy A35 (Former Wisley Airfield)

General

In the previous 2016 version of the Plan, land at Normandy/Flexford formed a proposed allocation for residential led mixed use development under Policy A46 although this was removed in the Draft Submission (2017) version of the Plan. As previously stated, we consider that Policy A46 should be reinstated into the Plan as its exclusion from the Main Modifications represents a serious failure to consider reasonable alternatives particularly with regard to the refined deliverability definition in the revised NPPF.

Consideration of the Council’s Evidence Base regarding the Main Modifications
The updated Sustainability Appraisal (Pg.16) details the reasons for rejecting the land between Flexford and Normandy from allocation in the Main modifications. This indicates with respect of land at Flexford:

“There are four omission sites, of which one can be ruled-out immediately as sequentially least preferable. This is Land to east of The Paddocks (50 homes), which encompasses an SNCI. This was removed from the 2016 Proposed Submission Plan on the basis of a re-survey of the SNCI. Of the remaining three, one can be identified as sequentially least preferable. This is Land to the south of Normandy and north of Flexford (280 homes), which comprises the southern part of a previously much larger site (namely that part which stands-out as benefiting from proximity to Wanborough railway station), that was a proposed strategic allocation in the 2016 Proposed Submission Plan.

The site benefits from its proximity to the rail station; however, a primary issue with the site is that it is too large, and has no potential to be made smaller whilst making use of strong, defensible Green Belt boundaries. It would introduce a very different built form to Flexford, and would have a greater visual impact than the other sites discussed below. It is also the case that, as a larger site, there could be an element of delivery risk, noting that the sequential approach to spatial strategy would necessitate that any allocation at Flexford would need to be in addition to allocation of one of the three Tier 8 sites discussed above, which are all similarly large sites.”

Paragraph 1.1.2 provides the framework within which the Sustainability Appraisal was undertaken. This states:

“A key outcome of hearing sessions was an understanding that there is a need for the Local Plan to allocate one or more additional sites, sufficient to provide for c.550 homes within the first five years following plan adoption, in order for the plan to be found ‘sound’ by the Planning Inspector.”

Whilst the Sustainability Appraisal work was framed upon the basis of accommodating around 550 dwellings, as detailed in these representations, it is not considered that clear evidence of the deliverability of the proposed sites have been included to accord with the refined definition of such sites in the revised NPPF. Furthermore, whilst the objective of ensuring delivery of around 550 dwellings is important, the detailed assessment of our clients site indicates that it was rejected on the basis that it was “too large”. However, given the challenges to increasing delivery within Guildford Borough, together with the clear involvement of a major housebuilder in the promotion of the land at Flexford /Normandy, it is clear that these factors have been discounted in the Council’s especially. Such an approach is considered contrary to the refined definition of a deliverable site in the revised NPPF.

Although the Sustainability Appraisal refers to the visual impact of the site, as highlighted in our earlier representations, paragraph 24.66 in Volume 5 of the Council’s Green Belt & Countryside Study (April 2014) states:

“A PMDA at land parcel H12-A between Flexford and Normandy would be appropriate as a major village expansion due to the established public transport links alongside potential improvements to sustainability credentials, being considered to outweigh the potential harm to the openness and purposes of the Green Belt. A major expansion at H12-A between Flexford and Normandy would generate an additional population of approximately 2,599 and a total population of 4,383, this being very likely to enable a wide range of new facilities with associated sustainability benefits. The location of H12-A between Normandy and Flexford is considered to be particularly sustainable in terms of public transport connections with Wanborough Station located directly to the south within Flexford in addition to the bus services. The PMDA would result in greater settlement coalescence of Flexford and Normandy (Purpose 2). Whilst recognising that any major village expansion will detract from the openness of the surroundings, in this instance, the PMDAs impact will be limited on the wider Green Belt due to extensive woodlands, treebelt and hedgerows, particularly at Waldens Copse and Pusseys Copse within the village expansion site” (Our emphasis)

It has never been our understanding that our client’s site was included as a proposed Green Belt release due solely to its ability to deliver a secondary school. The reason for its previously proposed allocation is effectively summarised in the above statement.

Land for a secondary school was only proposed as part of our representations upon the proposed safeguarded status of the site in the draft Local Plan published for consultation in July 2014. Accordingly, the offer of land for the school was made by Taylor Wimpey after the Council’s Green Belt assessment (see above) confirming the suitability of developing
the site in Green Belt terms, including having regard to the sustainability merits of doing so in locational terms (given the proximity of the site to bus and rail services).

In short the land benefits from sustainability credentials that justify its release, in particular, given its enabling benefit of providing land for a new secondary school to serve needs arising from the western part of the Borough and that the land’s impact upon the Green Belt will be limited due to its existing vegetation. There is therefore a fundamental inconsistency between the Plan’s evidence base and the decision taken by the Council in May 2017. Accordingly, the Local Plan is not justified when considered against its own evidence base in this respect.

With the above findings in mind, our clients instructed CSA Environmental to undertake a detailed review of the Council’s Green Belt evidence base documents. This work includes a comparative assessment of certain of the proposed Green Belt allocations. When assessed against the paragraph 80 tests, it is evident that paragraph 24.66 of the Council’s Green Belt & Countryside Study was correct and the site performs well when assessed the five purposes.

Importantly the Council’s proposed allocations perform in certain cases poorly when considered against the NPPF paragraph 80 purposes. Accordingly we request that our client’s site is reallocated either in addition to, or instead of other proposed Green Belt releases. As drafted, the Plan is not justified or consistent with national policy, given that the reasonable alternative of allocating land at Normandy/Flexford, that provides a more sustainable and NPPF Green Belt compliant strategy.

As detailed above, it is not considered that adequate justification for rejecting the clearly deliverable site controlled by Taylor Wimpey at Flexford/Normandy has been provided, especially given the concerns detailed above regarding the deliverability credentials of the Council’s current sources of housing land supply.

On its own merits the actual visual and Green Belt implications of releasing the Policy A46 site for development are not adverse. Therefore, the concerns in the updated Sustainability Assessment on this matter are consequently not justified.

**Deliverability**

For the reasons discussed in our response to Modified Policy S2, there is a demonstrable need for deliverable sites, such as that controlled by our client in order for the Council to be able to demonstrate a continuous 5 year housing land supply throughout the plan period. Its development credentials have been acknowledged in its previously proposed allocation and the site suffers from no technical constraints to delivery. The site is controlled by a national house builder, who has secured appropriate off-site SANG mitigation land at Wyke (SANG location plan attached) and is undertaking detailed survey work to enable a timely outline submission upon adoption of the Plan. Consequently the site offers the opportunity for material delivery within the 5 year period. We consider the site could deliver 100 dwellings by 2021/22, 140 dwellings in 2022/23 and a further 140 dwellings in 2023/24.

Such an approach would assist in meeting the defined and pressing needs discussed above. The re-allocation of the site is therefore necessary so to achieve an effective plan that is delivers housing at the necessary time (i.e. early on it in the plan period).

**Alternative Allocation Options**

Our clear position is that the site should be reinstated as an allocation under Policy A46 and the Council’s proposal to de-allocate the site is unsound.

However, and notwithstanding, the site at Normandy/Flexford was identified within several volumes of the Council’s Green Belt & Countryside Study, both as a smaller development parcel in the south (adjacent to Wanborough station) of approximately 280 dwellings and a larger development of approximately 1,100 dwellings.

The current iteration of the Local Plan has removed the site as an allocation without reconsideration of a potential smaller allocation. Accordingly, we have prepared 3 no. new masterplans that illustrate how smaller developments could come forward on the site and still provide a material contribution towards defined housing needs. These are described below:

- Concept Masterplan – Wanborough Station (No. CSA/2516/121B) illustrates a proposed scheme on the southern part of our client’s This would provide for approximately 400 no. dwellings, a 2 form entry primary school, local
centre and large of areas of publicly accessible green space. A direct pedestrian route to Wanborough station is also provided.

- Concept Masterplan – Combined (No. CSA/2516/122A) illustrates how both of these schemes could be developed, whilst retaining a significant gap between Normandy and It is evident from this plan that a self-sustaining community, with a multitude of key services and facilities and good accessibility.

- Concept Masterplan – Great Westwood (No. CSA/2516/120A) provides for approximately 425 dwellings on the northern part of our client’s site. A 60 bed care home, local centre, community facility, sports pitches and public open space are also provided. to public transport can be provided on the land. Such a scheme would enable substantial housing delivery and as set out in the CSa Green Belt Review in a manner consistent with NPPF paragraph 80.

**Securing a Permanent Green Belt Boundary Beyond the Plan Period**

In addition, NPPF paragraph 83 requires that when undertaking a Green Belt Review Council’s should consider the intended permanence of the revised Green Belt boundaries such that they should be capable of enduring beyond the plan period. Accordingly we refer to paragraph 4.115 of the original draft Local Plan (July 2014) that stated:

> “National planning policy states that when altering boundaries we should have regard to their intended permanence in the long term so that they are capable of enduring beyond the plan period. This includes, where necessary, identifying safeguarded land in order to meet longer-term development needs. We have identified safeguarded land at Fairlands, Send Marsh, Normandy and Flexford, as set out in Site Allocation 118-120 and 123. This land will also ensure that we have the flexibility to meet our current development needs should any of our strategic sites not come forward as envisaged over the plan period.”

Contrary to the above statement, the plan no longer includes proposals to safeguard any land to meet longer term development needs.

Such an approach is inconsistent with NPPF paragraph 83. The safeguarding of additional land would introduce greater flexibility into the Plan so to ensure that if one of the proposed housing allocations does not deliver, safeguarded land could fill the gap without the need for a new Green Belt review. It follows that such an approach would enable a more effective plan.

Whilst the updated Sustainability Appraisal (Box 5.2, page 16) rejects our clients site on the basis on inability to sub-divide the site whilst providing boundaries that reflect the NPPF guidance on permanence for boundaries, as detailed in our earlier representations, these discounts the associated requirement in the NPPF (2012) to provide safeguard land. The approach in the Sustainability Appraisal has discounted this option and this therefore further reinforces our view that it has discounted reasonable alternatives, especially given the clear suitability of the site identified in the Council’s own evidence.

**Suitability of other site in Flexford proposed for allocation**

Box 5.2 of the updated Sustainability Appraisal explains the reasons for the choice of the Glaziers Lane site in policy A64. It indicates:

> “Of the two more preferable sites, on balance one can be identified as overall sequentially preferable, namely Land east of Glaziers Lane (105 homes). The potential for allocating the site was given close consideration as part of SA work completed in 2017, as reported within the SA Report Update (2017), and it was similarly identified that it should be examined further through additional housing scenarios. Relative to the other site (Land between Beech Lane and Westwood Lane; 100 homes) Land east of Glaziers Lane benefits from better proximity to the train station (it is almost adjacent). This is considered to be an overriding consideration, albeit the site would be visible from the railway station and Glaziers Lane, and is less preferable in Green Belt terms (the GBCS identifies the PDA within which Land East of Glaziers Lane falls as comprising ‘red-rated’ Green Belt, whilst Land between Beech Lane and Westwood Lane falls within an ‘amber-rated’ PDA). Land east of Glaziers Lane is considered further in Section 5.4.”

As noted previously in our representations, our clients land at Flexford/Normandy directly adjoins the station and therefore is consequently equally sustainable to that to the east of Glaziers Lane site. In terms of securing a permanent...
defensible Green Belt boundary however, our client’s site is bound by roads on its eastern and western sides and if a smaller part of it were to be released woodland on its northern side.

By comparison the Glaziers Lane site does not benefit from any logical boundary on its northern or eastern boundaries and is instead simply defined by a field boundary.

It follows that in terms of securing a permanent defensible boundary it performs worse than our client’s site. Therefore, sequentially it is preferable to the site allocated through the Main Modifications, especially as the Council’s own evidence indicates it could be removed from the Green Belt without harm to the relevant purposes.

We further note that the site is within the control of a housebuilder who could commence delivery on the site such that a material contribution can be made to the Council’s housing land supply position. We re-assert the important benefits our client’s site can offer (having regard to the above) Finally we note that the site to the north of Wanborough Station could provide a logical extension to Flexford and benefit from excellent accessibility to the train station. We therefore consider that if larger Green Belt releases are not to be made then a justified strategy would need to allocate our client’s site instead of the Glaziers Lane site, as the better available option.

Summary: Proposed Change

We object to the proposed deletion of our client’s land between Flexford and Normandy (Policy A46) as a housing led mixed use allocation. For the reasons set out in these representations we request that it is reallocated in the form previously proposed as a further main modification.

Notwithstanding the above position, alternative options are also available and we are seeking an allocation for smaller schemes as set out below:

1. Allocate the Great Westwood site for a residential led allocation comprising approximately 425 dwellings.
2. Allocate the Wanborough Station site for a residential led allocation comprising approximately 400 dwellings.
3. Allocate the site but with reduced site boundaries that cover the southern and northern sites, resulting in an overall allocation for approximately 825 dwellings.
4. Allocate a smaller site directly to the north of Wanborough Station site for a residential led allocation in favour of the proposed site at Glaziers
5. Identify our client’s site as safeguarded land removed from the Green Belt to meet longer term needs beyond the plan

Next Steps

We request the opportunity to appear at any future Examination sessions, should any such hearings take place in order to consider the soundness of the Plan having regard to the proposed modifications,

We remain committed to further engagement with the Council to explore the option of a deliverable allocation on this site, such that it can be incorporated into final modifications to the Local Plan as part of the Examination process.

Please do not hesitate to contact the writer should you wish to discuss any matter(s) arising

Attached documents:
1 My total mistrust of any proposal to be dealt with by GBC. Having lived here for 26 years you have totally failed to develop the brown field site within Guildford itself.

2 The proposal does not take into account the green belt, or the damage that a development like this will be do.

3 It contains a pond, that is particularly wildlife sensitive.

4 The local infrastructure cannot cope with more development, sewage etc.

5 Local roads are already at dangerously high levels particularly at peak times.

6 My mistrust of developers motivation in building such a high concentration of housing in a confined area.

I find it disturbing that GBC that does not seem to have an ability to plan anything with any expert thought, plucking plans such as this without major justification.

**Comment:** MM45 - LPMM18/5928  **Respondent:** Sustainable Land Products Ltd 20858657  **Agent:** Mr Roger Daniels

---

1. **INTRODUCTION**

1.1 Sustainable Land Products Ltd (SLP) has an interest at Tangley Place Farm, Worplesdon and has promoted the site throughout the local plan process as a suitable location for residential development.

1.2 Following the inspector’s comments on the hearing sessions, the Council were required to make several amendments to the plan which were then to be consulted upon. This consultation period has now begun and is scheduled to run from 11th September 2018 to 23rd October 2018.

1.3 These representations set out the particularly pertinent changes to the plan and provides some commentary on them.

2. **POLICY CONTEXT AND BACKGROUND**

2.1 The Guildford Local Plan was submitted to the Planning Inspectorate in December 2017. The examination hearings took place between June and July 2018, following which the inspector provided their conclusions to the Council.

2.2 The inspector’s conclusions on the plan confirmed that the stepped approach to housing delivery was inappropriate, raised concerns over the deliverability of housing within the early years of the plan and recommended that additional sources of housing delivery be identified to address this.

2.3 SLP welcomed this finding, having expressed the same reservations over the Council’s strategy to deliver its housing requirement and maintain a healthy supply of housing in the early years of the plan in their representations to the Regulation 19 plan.
2.4 In response, the Council has proposed a number of changes, including the allocation of four new green belt sites at settlements outside of Guildford. SLP will provide their comments on these allocations in the following chapter.

2.5 This was in addition to several modifications to the plan that were required to make the plan sound. This included, but was not exclusive to, the following key measures:

- accommodating 20 per cent of Woking’s unmet need (MM2);
- reducing the Gosden Hill Farm allocation by 200 to 1,800 homes (MM35);
- increasing Burnt Common industrial floor space to 14,800 square metres to meet employment land needs (MM42); and
- a new policy (S3) to deliver regeneration in Guildford town centre (MM3).

2.6 In respect of the first bullet point specifically, SLP welcomes this measure, having expressed concerns in respect of the approach to unmet need set out in the submission plan. All other modifications to the plan are not relevant to our client’s interests and, therefore, we do not wish to make any further comments.

3. COMMENTS ON THE KEY MAIN MODIFICATIONS

3.1 To be clear, the specific modifications that SLP feels should be commented on relate to the new green belt sites that have been allocated to help address the shortfall in the early years of the plan. These allocations are contained within policies A61, A62, A63 and A64 and are set out below:

- **Policy A61**: Land at Aaron’s Hill, Godalming (200 dwellings);
- **Policy A62**: Land at Hornhatch Farm, adjoining New Road, Chilworth (80 dwellings);
- **Policy A63**: Land west of Alderton’s Farm, Send Marsh Road, Send (120 dwellings);
- **Policy A64**: Land between Glaziers Lane and Strawberry Farm, Flexford (105 dwellings).

3.2 The Council have also identified an already existing site (Land at Garlick’s Farm) as being able to deliver an additional 150 dwellings over the plan period. This is, presumably, the result of the removal of employment space that was originally going to be delivered alongside 400 dwellings. SLP have no comments to make on this modification.

3.3 As can be seen, the Council has sought to address the shortfall in the early years of the plan by allocating additional sites at several locations across the district. Aside from the site at White Lion Walk, High Street, Guildford (Policy A60), all of the identified sites are within the Green Belt.

3.4 Combined, the identified sites have the potential to deliver around 700 additional dwellings over the plan period.

3.5 SLP has the following concerns with the approach of the Council. These are:

- The lack of contingency sites identified alongside the additional allocations; and
- The appropriateness of the locations chosen in sustainability and green belt terms.

**Insufficient contingency in the event of a housing delivery shortfall**

3.6 In previous representations, SLP has highlighted the disparity between past completions within the Borough and the annual housing requirement identified in the local plan. Since the examination, the latter figure has been further increased due to the need to take on some of Woking’s unmet need.
3.7 There is clearly a challenge to raise housing completions to the level required by the local plan. The reliance on large strategic and brownfield sites within Guildford mean that there are significant question marks around the deliverability of these sites due to the need to provide infrastructure for the former (e.g. the A3 RIS) and potential viability issues with the latter.

3.8 Whilst we note the incorporation of a 20% buffer within the proposed housing target, SLP are concerned that the constraints within a significant proportion of the District i.e. Green Belt mean that any shortfall in delivery could not be easily met through speculative applications to boost housing supply.

3.9 Indeed, this has likely been one of principal reasons as to why there is such a disparity between the Council’s net completions over the past 10-12 years and their local plan target.

3.10 **Paragraph 11** of the NPPF requires plans to positively seek opportunities to meet the development needs of their area and be sufficiently flexible to adapt to rapid change. The Council clearly feel that the allocation of the above sites to be sufficient to address this shortfall; however, SLP does not feel that simply allocating more sites provides this flexibility, especially given that there will be no realistic scope to address any future housing shortfall until the Local Plan review stage due to the Green Belt constraints discussed above.

3.11 Whilst SLP is confident that the Council would seek to address any shortfall at the Local Plan review stage, the effect will have been to delay the delivery of housing that could potentially have come forward in the shorter term. This would be contrary to the NPPF’s goal to significantly boost the supply of housing (paragraph 59).

3.12 SLP, therefore, feels that it would be prudent for the Council to consider the inclusion of a set of ‘reserve’ sites that could come forward in circumstances where the ‘presumption’ was engaged (i.e. a deficient housing land supply position or poor performance against the Housing Delivery Test).

3.13 On the issues of Housing Land Supply, the adoption of the plan will not rectify the Council’s position overnight. The revised NPPF makes it explicitly clear as to what can and cannot be included as part of a Five-Year Housing Land Supply assessment. This definition is provided below:

“To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years. ”

3.14 Unless the Council is able to provide compelling evidence that the identified sites are deliverable in the short term, it is highly debateable that they would be able to deliver any sites in the early part of the plan period. This would also mean that progress towards addressing the existing shortfall would not be met until the
middle part of the plan period which is precisely what the Council are trying to avoid with these allocations.

3.15 In short, any shortfall in housing delivery over the plan period (including the early years) could not be addressed through speculative applications in sustainable locations as these are affected by Green Belt constraints. Therefore, the Council should look to allocate reserve sites (inevitably located in the Green Belt) for development that could come forward in the event of such a shortfall being identified.

3.16 Whilst land at Tangley Place Farm was previously promoted alongside the land allocated as land north of Keens Lane (Policy A22), it would not be reliant on the delivery of the latter in order to come forward for development and certainly could assist in meeting a shortfall, should one arise. Thus, were the Council minded to produce a list of ‘reserve sites’, we would strongly encourage them to include Tangley Place Farm on such a list.

**Are the proposed locations the most appropriate?**

3.17 SLP questions whether the locations chosen by the Council are the most appropriate in both sustainability and green belt terms.

*Sustainability*

3.18 The Council has included sites at Godalming, Chilworth, Send and Flexford. Godalming aside, Chilworth, Send and Flexford have limited access to facilities and services and would likely require residents to travel into Guildford or other nearby villages to meet their day-to-day needs.

3.19 This is not to say that the sites chosen are inherently unsustainable; however, given that these sites are identified as ‘tier 10’ settlements in the Council’s Sustainability Appraisal, the sequential approach would dictate that sites within the Green Belt around Guildford (‘tier 9’) should have been considered in the first instance.

3.20 Large urban extensions are planned for Guildford (Blackwell Farm and Gosden Farm) as well as an allocation of 150 dwellings at Keens Lane (adjacent to Tangley Place Farm). However, only the latter (alongside some of the brownfield sites identified in the plan) would be expected to deliver any housing in the early plan period.

3.21 Guildford, being the most sustainable location for development (as reflected in the settlement hierarchy) also has the ability to deliver homes swiftly, particularly on non-infrastructure heavy, greenfield sites (such as Tangley Place Farm).

3.22 Indeed, demand at the locations identified by the Council is likely to be weaker than it would be within Guildford given access to services, facilities and employment opportunities that are absent from the surrounding villages. The sustainability credentials of a site generally correlate positively with its market desirability and, therefore, its potential for delivery. If the ambition is to identify sites that could be delivered early in the plan period, then a review of sites within the Green Belt around Guildford should have been the first port of call.

*Green Belt*
3.23 Furthermore, it is questionable whether the proposed locations are the most appropriate in Green Belt terms. Indeed, the sustainability appraisal conveniently summarises the four identified sites (paragraph 6.6.16). This extract is included at figure 1.

[see attachment for image included here]

3.24 The SA echoes the findings of the Green Belt and Countryside Study1 which confirms that all but one (Aldertons Farm, Send Marsh Road, Send) are RED rated in terms of their Green Belt sensitivity. In short, they are proposing allocations on highly sensitive Green Belt sites that are no more sustainable than other available and deliverable sites.

3.25 Whilst Tangley Place Farm also falls within an area identified as being highly sensitive in Green Belt terms (parcel J4), this is the result of the site being assessed as part of a wider ‘cell’. Indeed, it is possible for areas within identified parcels to be of limited sensitivity when compared with others. We contend that this is the case for parcel J4.

1 This assessment considered the performance of each ‘cell’ against the five purposes as set out within the NPPF 2012. These did not change following the publication of NPPF 2018. It was assumed that all sites met the fifth aim (assisting in urban regeneration) and so the assessment only assessed performance against the other four purposes.

3.26 SLP has consistently argued that Green Belt boundaries should be reviewed around the north-western edge of Guildford more generally to accommodate a mix of housing and open space uses (including SANG) and reflect physical features that are readily recognisable and likely to be permanent. It is these physical features which should have dictated the land parcels identified for the purposes of the Green Belt review, rather than arbitrary areas based on field boundaries.

3.27 The Land at Tangley Place Farm benefits from such physical/defensible features which limit its sensitivity in Green Belt terms. These features constitute:

- an existing watercourse which bisects this parcel and would form a strong boundary along its western edge;
- important ecological designations and buffer zones affect the site within its northern half and this would ensure a robust northern boundary could established; and
- existing road infrastructure to the east and south which would secure these boundaries.

3.28 The concept document previously submitted with representations also shows how the delivery of development within the southern areas of the site (i.e. those most closely related to the built-up area of Guildford) the site can still contribute to the five key purposes of the Green Belt whilst accommodating some additional development. The site would also be able to deliver SANG as part of any scheme which has the potential to bring wider ecological benefits by relieving pressure on the Thames Basin Heath SPA.

3.29 The sustainability benefits of the location would make it a much preferable site to those sites that have been identified which are also rated as being highly sensitive in Green Belt terms.

Summary
3.30 Given that the ambition is to deliver homes in the early period of the plan, SLP objects to the Council’s decision to allocate sites that are inherently less sustainable and on highly sensitive Green Belt land when other viable options with better prospects of delivery exist (e.g. Tangley Place Farm).

Conclusion
3.31 SLP does not believe that the Council’s approach to simply identifying more sites provides sufficient flexibility to help deliver the required dwellings in the early years of the plan period. This is because the Green Belt constraints that affect almost all land within the borough mean that opportunities to address the shortfall through speculative applications are severely limited. SLP therefore objects fundamentally to the simplistic approach taken by the Council.

3.32 In order to improve this flexibility, SLP feels that the Council should incorporate a set of reserve sites, alongside those that have been identified that could come forward in the event of a shortfall in housing supply.

3.33 SLP also objects to the sites that have been identified by the Council which are less sustainable and, with the exception of Aldertons Farm, at least as (if not more) sensitive in Green Belt terms than other viable alternatives (e.g. Tangley Place Farm).

3.34 The Council has missed an opportunity to review the Green Belt boundary in a sustainable location along the north-western edge of Guildford to accommodate a mix of housing and open space uses (including SANG) that could alleviate pressures on the Thames Basin Heath SPA and deliver housing during the early years of the plan period.

4. LOCAL PLAN REVIEW

4.1 Paragraph 33 of the NPPF 2018 sets out the requirement for Councils to undertake local plan reviews within five years of their adoption. This has the purpose of updating policies where changing local circumstances indicates a need to do so. This includes a specific reference to strategic housing policies which will require updating if local housing need has changed, or is expected to change, significantly.

4.2 The implications of the revisions to the standard method for Guildford’s housing need are not yet clear, although this would be applied as part of any Local Plan review.

4.3 The Council’s housing completions data are also a cause for concern given that they have been significantly below the required housing need of the plan. Furthermore, the Council’s reliance on large strategic sites to deliver much of its housing toward the middle/later stages of the plan means that there is the potential for a shortfall should there be any significant delays to one or more of these sites.

4.4 The progress of these sites and the Council’s performance against the Housing Delivery Test should be monitored closely to inform the Local Plan review. Should it be revealed that the Council is performing poorly against these and other various measures (Housing Land Supply, delivery trajectories at the key strategic sites etc.) then there will be a strong case for the allocation of further sites given that the Green Belt constraints within the Borough would essentially negate the ability for speculative development to take place in order to address any shortfall.

4.5 Land at Tangley Place Farm would be ideal for an allocation as part of such a
plan review given that it would be deliverable, sustainable and allow for the creation of a long-term, robust, defensible Green Belt boundary.

5. CONCLUSION
5.1 SLP generally welcomes the findings of the inspector following the examination hearings and acknowledges some of the positive steps made by the Council in response to his concerns. However, SLP objects to the lack of flexibility within the plan moving forward in the event that a housing shortfall is identified (a scenario which is not unlikely given the disparity between completions figures and the proposed annual housing target).

5.2 Whilst the allocation of additional sites is welcomed, the choice of these sites does not appear to be particularly logical given that more sustainable and less sensitive Green Belt sites are available and, therefore, more likely to be deliverable. Land at Tangley Place Farm is one such location.

5.3 Furthermore, the Green Belt constraints placed on land within the Borough means that there is no scope to address any identified shortfall in scenarios where the ‘presumption in favour of sustainable development’ would apply (e.g. deficient housing land supply position or poor performance against the housing delivery test).

5.4 SLP would, therefore, wish to see the incorporation of a ‘reserve site’ list to provide additional flexibility to the plan. This will ensure that sites can come forward to maintain a healthy supply of homes throughout the plan period should delivery on other allocated sites be slow or fail to come forward at all. Again, land at Tangley Place Farm could fulfil such a role.

5.5 Alternatively, it will be imperative for the Council to be positive at the Local Plan review stage for example, should circumstances dictate a requirement for a higher housing target and/or in the case of under delivery over the early period of the plan. In looking to address these potential issues, the Council will need to identify additional allocations, ideally alongside reserve sites, in order to ensure that housing can come forward consistently throughout the remainder of the plan period.

**Comment:** MM46 - LPMM18/6134  **Respondent:** Helen Jefferies 8717921  **Agent:**

**Appendix 0**

Object FWA housing trajectory is inconsistent with the HE revised timescale for J10 which is now planned to commence when it was previously planned to be completed (ie 18-24 months late) with NO FIXED COMPLETION DATE. Further this scheme is now linked to the M25 smart motorway scheme for J10-J16 which will delay further.

**Attached documents:**

**Comment:** MM46 - LPMM18/8  **Respondent:** Mr Andy Los 8889537  **Agent:**

The new build schedule for the 3 schemes which are either in or are close to West Horsley delivers over 2250 new homes spread over a 15 year period from 2020. This starts with the areas to the north and west of West Horsley from 2020 to 2024 and then ramps up from 2023 to 2034 at the old airfield, Wisley site with 150-200 homes per year. This presents a massive, prolonged period of change which coupled with the work at the A3/M25 intersection will mean that West Horsley will lose its characteristic village status and become just another part of the sprawling conurbation inside the M25.

2.0 Representations on Main Modifications

(i) General Housing Requirement and Land Supply Matters

MM2 – Policy S2 – Spatial Strategy

MM46 – Appendix 0 Housing Trajectory

2.1 Bewley Homes is in full support of the representations submitted by the Guildford Housing Forum in relation to the housing requirement and general housing trajectory matters. It is clear that the Council has not gone far enough to address the problem of early years delivery in order to be able to maintain a robust 5-year housing land supply in the early stages of the Plan period.

2.2 It is clear from a review of the Sustainability Appraisal (“SA”) Addendum1 that the Council has in fact only pursued the approach it set out to the Inspector at the Examination hearing sessions in response to his note ID-006, namely to introduce a limited number of further Green Belt allocations.

2.3 The issue with the approach taken by the Council is that it has failed to properly consider all reasonable alternative options for boosting early years supply. Additionally the Council has not sought to adjust or update its housing delivery trajectory to take account of key changes in circumstance, particularly in relation to Wisley, which as the Forum identifies will result in delay to the delivery of housing completions on that site.
2.4 In Bewley Homes’ view the Council has overlooked two key sources of supply that could deliver easily within the early years of the Plan period:

2.4.1 Ash and Tongham Allocation – As presented in Bewley Homes’ Matters Statement and in oral evidence at the hearing session it is clear that the Ash and Tongham allocation area has potential to deliver between 130 – 300 additional dwellings in the first five years of the Plan period 2.

2.4.2 The Council has simply dismissed the concept of additional housing provision within the Ash and Tongham area without any sound reason for doing so. The Council’s suggestion that the market cannot absorb further housing in this area is simply unsupported by any evidence and does not amount to a reason to resist making best use of one of the most sustainable locations in the Borough and the only strategic allocation outside of the Green Belt.

2.4.3 Selective Releases Around Green Belt Villages – The approach the Council has taken is simply to add in a small number of locations that it had previously considered without properly considering all available options in a holistic manner. The consequence of this approach is that the Council has overlooked suitable and sustainable development opportunities around other Green Belt villages that would a) accord with the spatial strategy set out in the Plan b) avoid any impact with the A3 RIS and c) could deliver housing early in the Plan period.

2.4.4 Two such settlements are Horsley and Effingham. Both of these locations have capacity to accommodate further smaller scale residential development in a sustainable manner that would make a positive contribution to delivery in the early years of the Plan period.

2.4.5 PDL in the Green Belt – The Council has in fact reduced the capacity it envisages from this component of its supply. Whilst the reason for this is set out in the SA3 the Council has merely reacted to a change in circumstance for an individual site rather than undertaking a reassessment of the potential for delivery from this supply source as a whole. In Bewley Homes’ view there is greater potential from this source in suitable and sustainable locations that could again make a meaningful contribution to early years delivery. In particular an opportunity exists in Woodstreet Village4 that the Council has not properly explored. Although included in the PDL category the site in question has a greater capacity than the Council has allowed for in its supply.

2.5 As a consequence of the above points it is Bewley Homes’ view that the Council has not properly considered the Inspector’s interim findings that required a full review of all options to deal with early years delivery and ensure a robust housing delivery strategy. It is clear that there are options the Council has simply chosen to ignore and consequently opportunities have been missed that would make a valuable contribution to the early years supply.

Comment: MM46 - LPMM18/4310  Respondent: Highways England (Patrick Blake) 15746081  Agent:

Thank you for the opportunity to comment on the Main Modifications of the Guildford Local Plan Strategy and Sites Consultation.

Highways England has been appointed by the Secretary of State for Transport as strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the strategic road network (SRN). The SRN is a critical national asset and as such Highways England works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity. We will therefore be concerned with proposals that have the potential to impact the safe and efficient operation of the SRN, in this case the A3 and M25.
I refer you to the Statement of Common Ground (SoCG) between Highways England and Guildford Borough Council agreed on 5 June 2018. 3.3 of the SoCG states:

“It is agreed that if the growth trajectory was to change, the Submission Local Plan supporting evidence would need to be updated to consider both the individual and cumulative impact from growth to establish if any further mitigation/infrastructure is required to enable delivery.”

It is noted that it is proposed in the current consultation to develop a flat profile of 672 homes to be delivered annually during the plan period, which appears a significant increase from previous understood housing delivery trajectories in the early years of the plan (up to 2024). It is understood that neither the Strategic Highways Assessment or Mott Macdonald A3 Study has not been updated, in turn informing the Council’s Infrastructure Delivery Plan setting out what infrastructure is necessary to facilitate growth. If any of this identified infrastructure directly or indirectly relates to the SRN, we recommend early dialogue with Highways England. This is essential to demonstrate the proposed growth is deliverable in transport terms. We would be concerned if any material increase in traffic were to occur on the SRN as a result of planned growth within Guildford Borough, without careful consideration of mitigation measures. It is important that the Local Plan provide the planning policy framework to ensure development cannot progress without the appropriate infrastructure in place.

**At this point in time we are unable to confirm if the proposed increase in planned housing trajectory up to 2024 is deliverable without adversely impacting the safe and efficient operation of the A3.**

### Comment: MM47 - LPMM18/3585  **Respondent:** Linda Parker-Picken 8587105  **Agent:**

**MM14.** I can see no justification for further allocations for leisure and retail. High street shopping is declining and this area is adequately provided for re leisure.

I hope you will bear these comments in mind when finalising the Local Plan and in particular reduce the horrendous proposed increase in both housing and industrial development in the Send area.

**Attached documents:**

### Comment: MM47 - LPMM18/6111  **Respondent:** Mr Kes Heffer 8672993  **Agent:**

- MM47. There is no justification for altering the boundary of the Site of Nature Conservation Interest (SNCI): the whole site qualifies as a SNCI on ecological grounds. The biodiversity of the SNCI will be destroyed by the proposed development.
- In breach of case law an Appropriate Assessment and a Habitats Regulation Assessment have not been completed.

**Attached documents:**

### Comment: MM47 - LPMM18/5770  **Respondent:** Ockham Parish Council (Peter Bevan) 8916001  **Agent:**

**Specific : Site A35 – Three Farms Meadows/the former Wisley airfield**

The late, and OPC considers ill thought through, addition of land to the south of the site: (a) directly abuts and significantly prejudices the Ockham Conservation Area; (b) further increases the visibility of the site to and from the Surrey Hills Area of Natural Beauty; (c) has no safe access; and (c) does not in reality materially mitigate the issue of density as development on much of the extra land is constrained by the existence of the VOR.

MM47: the size of the Site of Nature Conservation Importance is drastically reduced without justification and notwithstanding that the whole area qualifies for SNCI status on ecological grounds. The biodiversity of the SNCI will be destroyed by the proposed development.

Contrary to case law, an Appropriate Assessment and a Habitats Regulation Assessment have not been completed.

Both individually and collectively, these are grounds for the Local Plan as a whole to be re-examined and specifically for Site A35 (which the Secretary of State has already pronounced to be unsustainable) to be taken out of the Plan.

**Attached documents:**
Main Modification: MM48  Number of representations: 271

**Comment:** MM48 - LPMM18/2994  **Respondent:** Chris Brown 8561057  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes. Currently buses run one an hour to Woking and so people are forced to use cars.

**Attached documents:**

---

**Comment:** MM48 - LPMM18/559  **Respondent:** Mr David Gianotti 8565153  **Agent:**

MM27 MM41 MM42 and MM48

- Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads; and
- No proper assessment of the traffic impact with thousands more cars in the area every day adding to increased pollution, noise, delays and gridlock.

Please do take these comments seriously and don't allow our rural community to be destroyed!

**Attached documents:**

---

**Comment:** MM48 - LPMM18/1258  **Respondent:** Mr David W Lazenby 8566049  **Agent:**

MM27, MM41, MM42 & MM48 Transport Strategy.

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons plus of course Gosden Hill and Wisley/Ockham are major and not adequately addressed with the proposed A3 changes etc.

It will I feel result in thousands more cars daily using Send Barns Lane and Send Road going to/from Woking etc past schools, medical centre and shops with major delays and gridlocks, noise and air pollution all to an intolerable and unacceptable level for our village.

**Attached documents:**
I OBJECT to the great concentration of development in and around the village of Send. It is neither sensible nor equitable to propose such enormous overloading of one village, when many could share any possible load.

Attached documents:

Comment: MM48 - LPMM18/2175  Respondent: G Mansbridge 8571137  Agent:

REF. MM27, 41, 42 and 48

TRANSPORT STRATEGY

OBJECTIONS: There would be total gridlock at rush hours if this amount of development overall is allowed in our small village.

Attached documents:

Comment: MM48 - LPMM18/5688  Respondent: Douglas French 8574369  Agent:

MAIN MODIFICATIONS MM27 MM41 MM48 Transport Strategy

I object that consideration of the full traffic implications of all these proposals have received such scant attention. With the neighbouring sites at Ockham and Gosden Hill the aggregate impact on traffic in Send Barns Lane and Send Road have simply not been appreciated, still less calculated. The authors of this part of the plan show all the signs of a lack of familiarity with what they are writing about, including in respect of non-vehicular transport routes. Clearly they do not understand the magnet effect of Woking especially Woking Station. Increased noise and nitrogen dioxide pollution will rise to intolerable levels for people living on those two roads, made worse by the impact of the proposed Clandon slip roads. None of this should happen unless and until an in depth study is made to measure the effects and establish whether there would be any ameliorating solutions. I strongly object to the cavalier approach of Guildford Council that it will sort out these matters later.

Attached documents:

Comment: MM48 - LPMM18/2252  Respondent: Leslie Brown 8586017  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC seem to be intent on joining Send to Ripley and changing them from villages into towns. I am also unclear as to who all this additional housing is for, because there is no industrial development which requires more people to live in the
area and the type of housing proposed is not low cost housing which would be affordable to most. Furthermore no mention has been made of the number of people the Council is seeking to provide accommodation for.

Attached documents:

Comment: MM48 - LPMM18/3512  Respondent: Trans Lease Services (Mrs Lisa Scott) 8586625  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 Houses at Clockbarn in Tannery Land and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

Attached documents:

Comment: MM48 - LPMM18/1554  Respondent: Michael R. Murphy 8589953  Agent:

MM27. MM41. MM42.and MM48 Transport Strategy.

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlick’s Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

Attached documents:

Comment: MM48 - LPMM18/3952  Respondent: Allen Fencing (Mr Paul Cope) 8598433  Agent:

MM27 / MM41 / MM42 / MM48 – Transport Strategy
The transport/traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane/Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

In summary, the modifications are simply too much for the village of Send and Burnt common, that already suffer from increased traffic and congestion/pollution.

Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’.

ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan.

It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising. A loss of more countryside/Green Belt would exacerbate this.

Abandoning the new A3 slip-road (policy A43a) would save money which could be better spent on other services for existing residents, who pay high levels of Council Tax.

(such measures could include traffic-calming, road repairs and noise reduction).

Attached documents:
£1 million developer funding for the A247 transport infrastructure clearly demonstrates what I have been stating about the lack of will to make developers pay. This is but a drop in the bucket for what this work will cost, while the developers will walk away with vast profits and the tax-payer will pay for years to come both financially and in disruption (on congested roads and while works take place). I am deeply offended by the assumption of government at all levels, that ordinary people are stupid. This is the only conclusion one can draw from their repeated actions in this and other matters.

Comment: MM48 - LPMM18/2145  Respondent: Susan Greenman 8606081  Agent:

MM27, MM41, MM42 and MM48 - Transport Strategy

The traffic implications on Send from the proposed plans for Garlick’s Arch, Burnt Common, Clockbarn and Aldertons added to nearby Gosden Hill and Wisley/Ockham are not being taken into account re the changes to the A3 and Clandon slip roads.

The impact from these developments on Send Barns Lane and Send Road will be huge. The roads in Send are already totally congested particularly during rush hour in the morning and evening. Send Road is now one of the main roads from Woking to the M25. Also from Guildford to Woking.

The increase in traffic will cause more chaos, noise, nitrogen dioxide pollution, gridlock and hazards.

Potters Lane, Send has now become a "Rat Run" in the morning and evening. Traffic starts at 5am and when there are problems on the northbound A3 (which is frequently) the traffic diverts down Potters Lane. This lane is in its name a "LANE" not a major road. It is narrow and has many bends some of which are blind and very dangerous. I have encountered huge lorries and it is only a question of time before there is a major accident and fatality. The Police I believe want this Lane shut off from the A3 due to the many accidents when drivers think it is the Ripley exit slip road. In fact there is now traffic using Potters Lane constantly all day long and throughout the night - often by taxi drivers.

I have written many times to the appropriate Councils and authorities on this specific problem - to no avail. We just have to wait for the accidents.

The increase in noise and pollution for the local residents in the Lane, is now a serious problem.

Comment: MM48 - LPMM18/6248  Respondent: West Clandon Parish Council (John Stone) 8609217  Agent:

Guildford Submission Local Plan: Strategy and Sites - Main Modifications

Thank you for the opportunity to respond to the consultation on the above.

West Clandon Parish Council has very grave concerns about many of the proposed main modifications within the proposed plan and the subsequent impact on increased traffic problems on The Street, West Clandon (A247) which is already totally inappropriate to be classed as an A road and experiences many difficulties.

The road does not have the capacity to carry the expected increase in traffic. Problems already include:

1. The sharp bend at the Lime Grove junction with The Street (A247) where traffic routinely exceeds the 30mph limit.
2. The dangerous junction with the approach road to Clandon Station where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump.

3. The site lines for the exit of the Onslow Arms car park.

4. The narrowness of the road near Summers.

5. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement.

6. The sharp bend near Clandon Regis.

7. The narrowness of the road at the Bull’s Head Public House.

8. The speed of traffic past Clandon Junior School and in places the narrow footpath for children walking to school.

9. The sharp bend with poor sight lines in either direction at the Church.

10. The lack of a continuous footpath through the length of the village.

11. The speed of traffic.

12. The classification as an A-road without it having the capability of an A-road.

We are pleased to see allowance made for environmental and traffic mitigation measures on the A247 through Clandon. Funding for this scheme is specifically linked in the Plan to MM41 Garlicks Arch and MM42 Burnt Common. Other schemes likely to have an impact on the A247 include MM35 (Gosden Hill) and A35 (Wisley Airfield) which do not have such a condition at present. This should be rectified in the final plan.

We note however, that while it may be possible to implement measures which have a positive impact on traffic speed and vehicle/pedestrian safety there is no easy solution to the problems of increased traffic volume that the above developments will produce. The development of Park Lane/Merrow Lane as an alternative route to the A3 and the improvement of the Railway Bridge at Merrow Park remain the only long-term solution and provision for a future scheme should be included in the Plan.

**Comment:** MM48 - LPMM18/1062  **Respondent:** Allan Howlett 8656417  **Agent:**

Transport strategy MM27, MM41, MM42, MM48

The proposed developments will add to the already overcrowded roads, where journeys take far longer than necessary. Most residents now have to factor in the probability that there will be delays.

The road network is in desperate need of a major maintenance programme. In Send the surface at the traffic light intersection has completely broken up with holes appearing in all approaches. This non slip surface has broken down, wasted money, poor design. Or too much traffic?

The bridge over the A3 on the Clandon road has had the road surface pushed into the kerb resulting in large undulations that force motorists into the middle of the road.

Priority should be given to getting existing roads into a reasonable condition over the building new developments that will only increase traffic and make the matters worse. Most roads in the areas have kerb stones, and service covers dislodged and numerous potholes.

Who decides what a reasonable time is to queue on the roads into and out of Guildford and Woking getting to and from work. What is the environmental impact of thousands of cars, Lorries and buses queuing every morning and evening polluting the atmosphere, wasting fuel and residents and commuter’s time?

Comment: MM48 - LPMM18/776  Respondent: Shaun Cheyne 8775169  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/451  Respondent: Janet Manktelow 8793025  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic changes for this village are hideous. The situation of the 4 way junction will pile on the traffic nightmares for local people. No changes are planned to relieve congestion in the surrounding villages which already suffer congestion every day. The current A3 is blocked every morning and evening. Adding a four way junction will do nothing to relieve this situation. Any slight accident blocks within minutes and takes hours to clear.

Attached documents:

Comment: MM48 - LPMM18/1387  Respondent: Mr Paul Tubman 8794529  Agent:

It is not clear how this proposed development will help to cope with the additional transport pressures that will result from all of the new developments now proposed at Garlick's Arch, Burnt Common, Clockbarn and the Golden Hill Farm developments. Reliance on better access to / from the A3 is a fallacy as the A3 is gridlocked daily going both towards the M25 and towards Guildford. Local residents in both existing houses and the proposed new developments will resort to finding alternative routes through Send or Clandon exacerbating stress on the already pressured local road system. Something more fundamental than just a new traffic management scheme is required.

Attached documents:

Comment: MM48 - LPMM18/953  Respondent: Wellesley Theodore Wallace 8803841  Agent:
Policy A58 – Land around Burnt Common Warehouse (MM42) (MM48)

The allocation for either or a mix of light industrial, general industrial and storage and distribution should not be increased to a minimum of 14,800 sq m. The goods traffic generated would add to the adverse material impact on the A247 in Send and West Clandon.

The Transport Strategy Requirements at (Ob) and (Oc) fail to pay proper regard to ID3(1), (2)(c) and (7). The Requirements are too imprecise and either impossible to meet or impracticable and are therefore devoid of effect. Off-site walking and cycle networks under (Ob) could only be via the Burnt Common roundabout; it is impossible to see how this could be achieved safely at the roundabout; further, on the stretch of the A247 between the roundabout and the bridge over the A3 there is no scope for a cycle path and the only footpath is on the Ripley side of the road.

Policy A58 does not meet the requirements of paragraph 154 of the NPPF which includes the word "clear" twice.

Policy A63 : Land west of Alderton's Farm, Send Marsh Road (MM 44)(MM48)

This land is in fact east of Alderton's Farm not west. The road runs from May's Corner, Send, where it joins the A247, to the B2215 Portsmouth Road opposite ancient woodland which is part of Site 43 and nearly opposite Kiln Road which borders Site 43.

The traffic generated by 120 homes will undoubtedly impact traffic on the A247 in Send and West Clandon as well as Ripley. There are already traffic lights at May's Corner. Far from contributing to the delivery of an integrated accessible and safe transport system, it would do the reverse.

The geographical misdescription of the location of the site indicates the lack of adequate consideration given to this allocation, Policy A63 should be deleted.

Policy A43 : Land at Garlick's Arch (MM 41)(MM 42)(MM 48)

The allocation for homes should not be increased from 400 to 550; even 400 homes is excessive. The additional allocation fails to pay proper regard to paragraph 154 of the NPPF and to ID3(1), (2)(c) and (7).

Requirement (Oe) under "Transport Strategy" recognises "the otherwise adverse material impacts on communities and the environment including in … West Clandon". This clearly refers to traffic on the A247. The Response of Surrey County Council ("SCC") to the 2014 Draft Plan included "the A247 is a very heavily trafficked A class road and carries a very heavy proportion of HGVs". This is significant coming from the Highway Authority. The current level of traffic including HGVs has certainly not lessened since 2014.

The additional traffic resulting from 150 more homes on Site 43 can only accentuate the "adverse material impacts", particularly in view of the commercial and goods traffic generated under Policy 58 which specifically refers to "storage and distribution". It is inevitable that a material proportion of the additional traffic will travel south along the A247, if only to avoid the junction of the A3 with the M25 and the M25 itself.

The Assessment by MK of Transport Impacts at para 2.3 forecast that the additional housing at Garlick’s Arch would result in 24 additional movements in the AM peak hour and an additional 25 in the PM peak hour and stated, "Additional mitigation may be required on the local road network where the impact will be at its highest." The forecast of only 24 or 25 additional movements at the peak hours generated by 150 additional homes seems remarkably low.

Requirement (Od) specifies a "contribution towards an off-site walking and cycle network to the village centre of Send, the Burnt Common Warehouse site and Clandon railway station".

Traffic management and environmental improvement on the A247 are also covered at Infrastructure Project LRN 26 to be delivered by SCC with the likely cost of £1m to be developer funded. There is no detail of what traffic management or mitigation is envisaged. It is not clear whether separate cycle lanes would be required in each direction or whether cycle lanes would be shared with pedestrians. It is difficult to see what traffic management or mitigation is practicable or indeed possible, particularly on Clandon Road and The Street.
The A247 is clearly not wide enough to accommodate even one cycle lane and road widening would involve extensive compulsory purchases, since, apart from the field between the bridge over the A3 and Green Lane, there is housing on both sides of the road. It would also involve felling many fine trees which contribute greatly to the character of West Clandon all of which is in the Green Belt. Most of the A247 only has a footpath on one side of the road, often quite narrow. When walking from the A43 site to the station it is necessary to cross the A247 four times.

The requirements at (Od) and (Oe) are devoid of any effect because the are in practice incapable of being met and therefore they do not comply with ID3(1),(2)(c) and (7).

Paragraph 154 of the NPPF states that Local Plans should be realistic. It includes the following, "Only policies that provide a clear indication of how a decision maker should react to a development proposal should be included in the plan". Policy A43 does not meet this requirement. ID3(10) is not sufficient.

The Statement of Common Ground dated 3 July 2018 signed on behalf of the Council and the developers during the public examination states at paragraph 10 that Site 43 "can be accessed by sustainable modes of transport including a well-established pedestrian network that incorporates pedestrian crossings on key desire lines" and bus routes 462/463 which follow routes incorporating Clandon Station. In fact there are no crossings at all between Site 43 and Clandon Station; further, since 1 September 2018 there have been no Sunday buses and during the week there are only seven buses daily arriving at the station from Burnt Common, the earliest being at 0759 and the last at 1857, and only five buses daily passing the station towards Burnt Common, the earliest being at 1005 and the last being at 1740; these buses are at intervals of at least two hours. SCC observed in 2014 that there was "a very limited bus route" along the A247. Although the September 2018 version of the Local Plan lists under "Opportunities" at (3) "improve bus frequency", any improvement would have to be dramatic to merit the description "sustainable mode of transport".

**Comment:** MM48 - LPMM18/6104  **Respondent:** Alena Thomas 8805633  **Agent:**

**MM27 MM41 MM42 and MM48 / Transport Strategy**

Proposed changes to the A3 and the Clandon slip roads (document 003a, sections 11.14 to 11.34) will help to feed traffic more quickly into the local road system - what then? Jams will feed back onto the major roads and cause massive problems for both local and longer-distance motorists. Remember my remarks in the beginning of the letter, yes, it was me standing in traffic trying to get on time to RSH for work.

GBC's assessment of possible solutions to this is extremely superficial - it's easy to write a few sentences promising infrastructure will follow but this is a real problem to which there won't be an acceptable solution: a proper amount of infrastructure to cope with this amount of development will devastate the green belt and destroy the character of the area. Will make the life of existing and new residents miserable, extend commute time and pollute the air.

Your current document suggests (Appendix 11.4 of GBC Responses to Matters, Issues and Questions reference 003b) that the increase in morning traffic on the A247 Send Road will be just 3% - after adding nearly 40% to the housing stock of the village. The estimate is out by an order of ten and as far as I am concerned is just plain falsification.

It would be great to think that as a result of the time and thought residents put into these discussions, Guildford BC would make a genuine attempt to create a workable plan, I submit the above in the hope that the strength of feeling of Send residents will eventually make some impression on you and lead to a more moderate and sensible set of proposals.

Attached documents:
I write to object to the local plan for Send.

I feel for all the sites in this area no consideration appears to have been given to the congestion on local roads, school places, parking and the medical centre where it's difficult to get an appointment and this is now (looking further afield the parking and appointments at the Royal Surrey are also hard to come by).

I think the council should think carefully before wiping out the green belt and turning another Surrey village into suburbia, a corridor from Guildford to Woking.

We need to keep the small pockets of countryside for the wildlife and our health benefits, instead of increasing the pollution in the village.

---

MM27 MM41 MM42 and MM48 Transport Strategy

Implications to traffic increasing to thousands more cars using our local roads and causing complete chaos, gridlock and air pollution have not been addressed. I therefore object and wish for more effort to be used to sort this major problem out.

Attached documents:

---

I object to MM27, MM41, MM42 and MM48 Transport Strategy.

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful way addressed by the Road changes of the A3 and Clandon Slip Roads. This massive increase in traffic heading to and from Woking along Send Barns Road and Send Road, which are single lane roads, will cause horrendous noise, air pollution delays and gridlock. I live just off Send Road on Wharf Lane and find the road is already congested during rush hours. Additional development to the scale described in the plan would undoubtedly result in significant increased congestion, air and noise pollution and very real decrease in quality of life for Send’s residents.

Attached documents:
Ref: Guildford Borough Council’s Modified Local Plan consultation

I would like you to note my following comments:

1. I fully endorse the responses of The Clandon Society, the Guildford Residents’ Association and the Guildford Vision Group and would like their responses to be registered as mine as well.

1. I OBJECT to the Modified Local Plan as a whole as I believe it is fundamentally unsound because:
   2. Guildford Borough Council has not properly observed its hierarchy of development. Brownfield opportunities, especially in the town centre, have not been fully exploited
   3. There is too much reliance on A3 improvements and these are beyond the council’s control
   4. The town centre policy, S3, is inadequate and also does not address the infrastructure deficit
   5. The grounds for Green Belt development are inadequate and do not fulfil the criteria for ‘exceptional circumstances’.

1. I would like the Inspector to RE-EXAMINE the Local Plan because:
   2. There has been a number of major changes made to the Plan by the Council which have changed it significantly, including, but not exclusively, the editing of D1 and removal of D4, and the addition of new housing and increased commercial development on the Green Belt
   3. New figures and projections for housing numbers have been released by the ONS which clearly demonstrate that the housing number in the Local Plan is too high

In case Guildford Borough Council is not prepared to accept my request in Section A above I am including the key points made by those three organisations in my full objection to the Modified Local Plan below:

1. The Clandon Society Objections and Concerns Which I Share

The A247

I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road.

The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (eg through East Clandon) which will be used to avoid the inevitable traffic build ups on the A247

I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manoeuvres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem viz. the widening of the Boxgrove Rd. bridge. It is already the intention to build a station next to the bridge.
The £1 million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.

**I believe that traffic will increase significantly because:**

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh
4. The development of 1800 houses at Gosden Hill
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

**Problems with the West Clandon section of the A247**

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The sight lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

**Housing Number and the Green Belt**
The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt.

The Council has long argued that much of the housing required must be built on such sites.

This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker.

The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.

Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

4. The development of 1800 houses at Gosden Hill.
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common.
avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing.

8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.

9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.

10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The site lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

Housing Number and the Green Belt

The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt.

The Council has long argued that much of the housing required must be built on such sites.

This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker.

The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.

Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

Attached documents:
Ref: Guildford Borough Council’s Modified Local Plan consultation

I would like you to note my following comments:

1. I fully endorse the responses of The Clandon Society, the Guildford Residents’ Association and the Guildford Vision Group and would like their responses to be registered as mine as well.

1. I OBJECT to the Modified Local Plan as a whole as I believe it is fundamentally unsound because:
2. Guildford Borough Council has not properly observed its hierarchy of development. Brownfield opportunities, especially in the town centre, have not been fully exploited
3. There is too much reliance on A3 improvements and these are beyond the council’s control
4. The town centre policy, S3, is inadequate and also does not address the infrastructure deficit
5. The grounds for Green Belt development are inadequate and do not fulfil the criteria for ‘exceptional circumstances’.

1. I would like the Inspector to RE-EXAMINE the Local Plan because:
2. There has been a number of major changes made to the Plan by the Council which have changed it significantly, including, but not exclusively, the editing of D1 and removal of D4, and the addition of new housing and increased commercial development on the Green Belt
3. New figures and projections for housing numbers have been released by the ONS which clearly demonstrate that the housing number in the Local Plan is too high

In case Guildford Borough Council is not prepared to accept my request in Section A above I am including the key points made by those three organisations in my full objection to the Modified Local Plan below:

1. The Clandon Society Objections and Concerns Which I Share

The A247

I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road.

The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (eg through East Clandon) which will be used to avoid the inevitable traffic build ups on the A247

I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1 million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manoeuvres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem viz. the widening of the Boxgrove Rd. bridge. It is already the intention to build a station next to the bridge.

The £1 million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.
I believe that traffic will increase significantly because:

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic.
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247.
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh.
4. The development of 1800 houses at Gosden Hill.
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing.
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway).
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph.
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The sight lines for the exit of the Onslow Arms car park.
5. The narrowness of the road near Summers.
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement.
7. The sharp bend near Clandon Regis.
8. The narrowness of the road at the Bull’s Head.
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school.
10. The sharp bend with poor sight lines in either direction at the church.
11. No continuous footpath through the length of the village.
12. The speed of traffic.
13. The classification as an A-road without it having the capability of an A-road.

Housing Number and the Green Belt

The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt.

The Council has long argued that much of the housing required must be built on such sites.
This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker.

The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.

Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.
Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

**Comment: MM48 - LPMM18/1988  Respondent: Mrs K I Mackay 8896641  Agent:**

I would also like to add that if you look at the West Clandon Village Safety Scheme Feasibility Reprot 6 June 2007, you will find that the report outlines all the problems with the A247 and the conclusion was that although the route through the village is an A Class road it is below todays standards in regard to width of carriageway. In places it is below the requirement. 

As an ex Health and Safety Consultant I have frequently requested that a pollution and noise survey in undertaken in the actual village itself. Properties are very close to the road and at times you can taste the fumes as you are walking to and from the Railway Station. The amount of vehicles using this route is already unsuitable and unacceptable to the residents as it affects our quality of life.

**Comment: MM48 - LPMM18/2396  Respondent: Marianne Pascoe 8896961  Agent:**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock. There is too much reliance on A3 (Guildford) improvements that are beyond the council’s control and have no fixed timescale.

**Comment: MM48 - LPMM18/1671  Respondent: Richard VanMellaerts 8907681  Agent:**

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.
Comment: MM48 - LPMM18/4165  Respondent: Lynda Newland 8913985  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

Comment: MM48 - LPMM18/2651  Respondent: Andrew Russell 8920353  Agent:

MM27, MM41, MM42 and MM48

As a resident in Send Marsh I use the car every day for travel to and from work and it is preposterous that no proper assessment as to the aggregate traffic impact on Send Barns Lane and Send Marsh Road will be affected. The pace of development in Woking and the proposed scale of new residential development in Guildford and more specifically Garlicks Arch (MM41) and potentially Aldertons Farm (MM44) will have a major impact on the roads in the immediate area, a situation which has got steadily worse during the last five to ten years.

Whilst I accept that there has been population growth Surrey and particularly West Surrey, is a popular place to live and the traffic implications for Send Marsh are worrying. The A3 is gridlocked on a regular basis, particularly during school term time and it often takes me over an hour to reach the office which via the A3 is only some 5.5 miles distant.

The proposed development is 550 houses at Garlicks Arch, 60 units at Clockbarn, 40 units at Winds Ridge adds over 770 houses to the 1,700 currently in Send, an increase of some 45% which is simply too much for the current infrastructure to accommodate.

I find it abhorrent that Guildford Borough Council are proposing to set aside such an astronomical number in the North-West part of the Borough when there are far more appropriate sites for development closer to Guildford Town Centre where there are adequate transport nodes, particularly following the recent consent on appeal for the redevelopment of Guildford mainline railway station.

Attached documents:

---

Comment: MM48 - LPMM18/3875  Respondent: Claire Bridges 8923905  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.
Currently buses run one an hour to Woking and so people are forced to use cars.

**Comment:** MM48 - LPMM18/1921  **Respondent:** Miss Fi Middleton 8946721  **Agent:**

I would like to object to the proposed south bound exit slip of the A3 proposed at West Clandon. I live on Clandon Road and the traffic going down that road is often exceeding the speed limit- especially on a Sunday when motorbikes are heading too and from new lands corner. They regularly drive at speeds of 60-70 mph along the 40 limit section. A slip road into the straight section of road would be a disaster. I have concerns regarding children crossing the road. Calls for speed cameras have not been heeded. We would need an average speed camera for that entire section. People would also use it as an escape route from the A3 as on a nightly basis the queues reach to before the burpham exit- casting increasing the volume of traffic, destroying the village further.

**Comment:** MM48 - LPMM18/403  **Respondent:** Shelagh Smith 10540161  **Agent:**

MM27, MM41, MM42, MM48 Transport Strategy

**I strongly object to even more traffic resulting from your intentions in the plan modifications.** As above, the increased pollution and the resulting gridlocked roads in the immediate area are already evident. The A3 and local A Roads are already at breaking point and this has a continuous overflow impact on surrounding village and the nearby narrow B roads. Your assessment for your proposed transport strategy is unrealistic and inadequate.

Overall, your proposals constitute an unrealistic and negative impact on the area of Send, Send Marsh, Burnt Common and Ripley. Without the Green Belt and Ancient Woodland to protect the area, we may just as well live in the centre of a major conurbation. Please do not destroy our communities.

**Comment:** MM48 - LPMM18/2939  **Respondent:** Sarah Wright 10543937  **Agent:**

I object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn’t cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.
Comment: MM48 - LPMM18/2200  Respondent: John Creasey 10563457  Agent: MM27/MM41/MM42 and MM48 Transport Strategy

I object to the proposed changes to the A3 junction at Burnt Common. The increased traffic on the A247 through Send will be intolerable as at peak times it is already at capacity. It will cause unavoidable congestion, pollution and traffic will come to a standstill.

Attached documents:

Comment: MM48 - LPMM18/2208  Respondent: Hazel Creasey 10563777  Agent: MM27/MM41/MM42 and MM48 Transport Strategy

Comment: MM48 - LPMM18/1126  Respondent: Alison Drennan 10717985  Agent: MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM48 - LPMM18/710  Respondent: Zareena Linney 10718625  Agent: MM27, MM41MM42 and MM48

Traffic implication again as more cars will use [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] Send road, as it is my son is learning to drive and the road is too congestion for us to even get out of. The speeding and level of traffic dangerous. The house has experienced cracking and damage due to it being roadside and volume and amount of traffic.

Will we as home owners be compensated? we have complained previously? the increase in volume of traffic in Send Road is damaging our house and its losing value and council increasing numbers and traffic this will make it worse.

Its often gridlock in Send road outside our house. If an incident on A3 nothing moves. Its impacting on our ability to work/drive and move about.
Pollution would be increased with even more traffic and we may have health issues due to this. With weight and volume of traffic the house cracking I mentioned could become unsafe made worst by the councils plans.

I have been strip of my right to complain about smaller modifications I am also objecting to these, travellers site, clock barn, tannery lane business centre increase which would impact greatly which adding this to the major changes makes a large problem for the local people, green and environmental areas and safety concerns.

I enjoy the nature wildlife and bringing a family up in Send.

Concerns around roads, impact on environment, use damage, health damage and infrastructure weaknesses are causing me major concern, I object to these changes and express my horror and concern that this was just a tokenism consultation and no one views have been listened to from the last lots of objections. Please can you explain this? Why is there more development then before? What the feedback how has this been implemented?

The worry and impact on villagers mental health and physical health means that by being listened too and having informed choice that the people actually have a say in, could be minimised.

Attached documents:
words but NO proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased Noise, Nitrogen pollution, delays and gridlock.

It would be a complete dereliction of duty by the council not to ensure clean air, light and recreational space for the residents of the borough. Further concrete development on this scale, toxic traffic fumes from thousands of more vehicles and removal of green space is and will reduce quality of life for all in the borough as it becomes an urban sprawl likened to towns such as Basingstoke and Crawley.

Attached documents:

Comment: MM48 - LPMM18/1150  Respondent: L Beraud 10721121  Agent:

I object to G.B.C. MM27,MM41,MM42 AND MM48 TRANSPORT STRATEGY

Traffic implications for Send Garlick’s Arch, Burnt Common, Clockburn and Alderton’s Farm added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. G.B.C offer fine words but NO proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased Noise, Nitrogen pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/392  Respondent: Hilary Sewter 10724897  Agent:

I object to MM27 MM41 MM42 and MM48 Transport Strategy because:-

Currently, heavy traffic from the A3 already heads to Woking through Send and even small roadworks cause major traffic jams, particularly at rush hour. This will be exacerbated when the proposed changes to the A3 improvements take place. With the extra industrial and housing developments in the areas mentioned above, Send will regularly become gridlocked.

Attached documents:

Comment: MM48 - LPMM18/1996  Respondent: Gill Love 10728993  Agent:

I OBJECT to MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockburn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:
Regarding road traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, any further developments will create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

The modifications are simply too much for the villages of Send and Burnt common, that already suffer from increased traffic and congestion / pollution.

Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’.

ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan. Send residents have repeatedly been voicing their concerns in previous feedback, but these have been largely ignored.

It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising.

A loss of more countryside/Green Belt/nature/openness would exacerbate this.

Abandoning the new A3 slip-road (policy A43a) would save a great deal of money which could be better spent on other services for existing residents, who already pay substantial levels of Council Tax (such measures could include traffic-calming, road repairs and noise reduction).

Local residents and Parish Councils feel they are now being ‘punished’ for simply voicing their concerns over the years – concerns which ONS and other boroughs seem to be taking heed of – except, it would seem, Guildford Borough Council.

Attached documents:
The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough.

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure.

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled.

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley).

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions.

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’).

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane).

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane).

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!

Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

In summary, the modifications are simply too much for the village of Send and Burnt common, that already suffer from increased traffic and congestion / pollution.

- Send has already taken on many developments (Skene Close, Vision Engineering, re-building Send school, Tannery Lane, Woodhill) as part of gentle but considered ‘in-filling’

- ONS reports show that the actual levels of housing needs have been grossly over-estimated by the Council in its Local Plan

- Send residents have repeatedly been voicing their concerns in previous feedback, but these have been largely ignored.

- It is not appropriate to try to ‘absorb’ unused housing capacity needs from Woking.

- Noise levels are already uncomfortable, and it has been reported that nitrogen dioxide levels are rising. A loss of more countryside/Green Belt would exacerbate this.

- Abandoning the new A3 slip-road (policy A43a) would save money which could be better spent on other services for existing residents, who pay high levels of Council Tax.

(such measures could include traffic-calming, road repairs and noise reduction).

Many residents feel they are now being ‘punished’ for simply voicing their concerns over the years.
The Wisley airfield could perhaps be re-considered for some light industrial development, if demand can be proven, given its greater proximity to the M25/A3.

It is also better suited to having an appropriate traveller pitch allocation (instead of Winds Rush A44 – practically opposite the cemetery!!) as part of a mixed development.

**Comment: MM48 - LPMM18/1469  **Respondent: Leslie Bowerman 10732193  **Agent:**

5) Objection applying generally to MM27, MM41, MM42 & MM48. Transport Strategy,

The traffic implications for Send of Garlicks Arch, Burnt Common, Clockbarn and Aldertons when considered with nearby Gosden Hill and Wisley/Ockham are not sufficiently dealt with by the A3 changes and the Clandon slip-roads. The over-all effect of the total extra traffic on Send Barns Lane and Send Road does not appear to have been addressed, bearing in mind that thousands of extra cars and trade vehicles, combined with HGVs will be going to and from Woking every day, causing increased noise, pollution, delays and tail-backs.

Attached documents:

**Comment: MM48 - LPMM18/1086  **Respondent: Ruth Hunter 10733409  **Agent:**

OBJECT to MM41 and MM42 and MM9 and MM27 and MM48

I strongly object to main modifications to above policies.

The increase in the amount of new houses (MM41) is preposterous. It is too much for the village and will create insurmountable problems in destroying natural habitats, Flora and fauna; the traffic congestion will block roads and access for residents and emergency services; there will be flooding and the infrastructure and facilities of Ripley and Send stretched to breaking point. This is an irresponsible plan which should not go ahead.

Re MM42, there is no need for so much industrial warehousing when Slyfield is not running at capacity. It is too much for our villages and goes against everything in MM9.

The proposed changes to A3 at Burnt Common has not been properly assessed and will cause chaos on our roads and risk safety of many resident children and vulnerable elderly.

Please re think these modifications and stop this unnecessary development.

Attached documents:

**Comment: MM48 - LPMM18/4742  **Respondent: Debbie Leane 10742753  **Agent:**

MM27 MM41 MM42 and MM48 Transport strategy
I object to the A3 changes and the Clandon slip roads as the GBC has not carried out a proper assessment of the traffic implications on Send Barnes Lane and Send Road. These changes will lead to thousands more cars making their way through Send to get into Woking town centre. There are serious implications for such an enormous increase in traffic on pollution levels, noise, traffic jams etc. This has not been carefully assessed.

<td>MM27, MM41, MM42, MM48 – taken together as the transport strategy. The implications of the increase in traffic from nearly doubling the housing in the village, other local development plans such as Wisley and Gosden Farm, plus the proposed changes to the A3 junction at Burnt Common have not been adequately addressed by Guildford Borough Council or any other responsible agency. Thousands of extra vehicles will be heading through Send on the A247 every day. The road is already over congested with long queues at peak hours. [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] I am extremely concerned for my health and that of my children. I, and two of my children are asthmatic and I am very worried about the increase in levels of nitrogen dioxide and other pollutants and particulates which would be inevitable with additional traffic. There is also a primary school along this route and the traffic increase would have a deleterious affect on the health of the children.</td>

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockharn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/4847  Respondent: Wendy Lodge 10775137  Agent:

I object to MM27, MM41, MM42 and MM48.

Traffic has increased considerably through Send Village in the past ten years. The extra traffic that is bound to clog the A247 from the new slip roads with the A3 will expose villagers to significantly increased pollution levels. Children walking to the local school already are subjected to this. Another 700 houses with, maybe, a further 1400 cars are not going to help. I do not believe GBC has looked at this in a sufficiently robust manner.

Attached documents:

Comment: MM48 - LPMM18/311  Respondent: Prue Robinson 10776033  Agent:

MM27, MM14, MM42 AND MM48 Transport Strategy

I object most strongly to The Transport Strategy

These are my reasons:

The traffic implications for Send of developments at Garlick’s Arch, Burnt Common, Clockharn and Alderton's Farm, added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads.

GBC appear not to have carried proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road. It would be anticipated that thousands more cars will head to Woking every day. Imagine the increased noise levels, nitrogen dioxide pollution, horrendous delays and total gridlock!

Attached documents:

Comment: MM48 - LPMM18/805  Respondent: Jane Baker 10784769  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications of the above developments plus those for nearby Gosden Hill and Wisley/Ockham have not been adequately addressed by GBC who has made no real assessment of the traffic situation as thousands of cars head down Send Barns Lane and Send Road towards Woking.

Attached documents:
Regarding MM27, MM41, MM42 and MM48 Transport Strategy

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

Attached documents:

---

I object to this revised proposal.

In common with many of these Main Modifications, no notice or understanding of the previous 7000plus objections has can be seen.

This does not seem to show any evidence of a proper and full impact assessment of the combined / aggregated traffic increases that will affect Send Barnes Lane, Send Road and Old Portsmouth Road.

The impact on Send (and by implication Ripley and Clandon) of this apparent lack of clear assessment of the Garlick's Arch, Burnt Common, Clockbarn and Alderton's proposals is extremely worrying for the existing residents.

The likely impacts of the new proposals are at least significant increases on NOx levels, thereby affecting health, and increases in traffic congestion. It is not too far to believe an increase in motor accidents will also result.

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. As noted above nearby roads are popular with cyclists and children travelling to Send Primary and Clandon CoE Schools. Increasing the traffic on these roads will be dangerous, noisy and massively increase pollution to the cyclists, runners and children as they travel to school.

Attached documents:

Comment: MM48 - LPMM18/533  Respondent: Mrs Penelope Corlett 10815681  Agent:

There are no definite plans laid out and it is impossible to widen Send Road or the Clandon Road to accommodate the increase in traffic approaching or returning from the A3. These are narrow roads in many places and the traffic is already at a standstill at peak times. A full assessment must be made and published and I ask the inspector to revisit at peak times.

Attached documents:

Comment: MM48 - LPMM18/1290  Respondent: Jeff Waine 10816481  Agent:

MM27, MM41MM42 and MM48

Traffic implication again as more cars will use my road Send road, as it is my son is learning to drive and the road is too congestion for us to even get out of. The speeding and level of traffic dangerous. The house has experienced cracking and damage due to it being roadside and volume and amount of traffic.

Will we as home owners be compensated? we have complained previously? the increase in volume of traffic in Send Road is damaging our house and its losing value and council increasing numbers and traffic this will make it worse.

Its often gridlock in Send road outside our house. If an incident on A3 nothing moves. Its impacting on our ability to work/drive and move about.

Pollution would be increased with even more traffic and we may have health issues due to this. With weight and volume of traffic the house cracking i mentioned could become unsafe made worst by the councils plans.

I enjoy the nature wildlife and bringing a family up in Send.
Concerns around roads, impact on environment, use damage, health damage and infrastructure weaknesses are causing me major concern, I object to these changes and express my horror and concern that this was just a tokenism consultation and no one views have been listened to from the last lots of objections. Please can you explain this? Why is there more development then before? What the feedback how has this been implemented?

The worry and impact on villagers mental health and physical health means that by being listened too and having informed choice that the people actually have a say in, could be minimised.

Attached documents:
MM27, MM41, MM42 and MM48 Transport Strategy

If GBC go ahead with all the sites in the local plan the road system will come to a grinding halt. The increase in traffic will just cause more gridlock, more frustration to road users, and hence more accidents. Drivers will try to circumnavigate the problem areas down single track roads and cause endless damage and accidents will happen. Every day there will be more noise, more pollution, more delays and more gridlock.

All in all, too much development in one corner of Guildford Borough, why can’t the developments be shared with other villages?

Attached documents:

---

REF. MM27, 41, 42 and 48

TRANSPORT STRATEGY

OBJECTIONS: There would be total gridlock at rush hours if this amount of development overall is allowed in our small village.

Attached documents:

---

MM27 MM41 MM42 and MM48

Transport Strategy

The traffic implications for Send of:

Garlick's Arch,
Burnt Common,
Clockbarn
Alderton's
Gosden Hill
Wisley/Ockham

are not adequately addressed by the A3 / Clandon slip road changes.
No proper assessment of the aggregate traffic impact causing increased noise, nitrogen dioxide pollution, delays and gridlock has been undertaken.

Attached documents:

Comment: MM48 - LPMM18/2134  Respondent: D Smith 10819329  Agent: MM27 MM41 MM42 and MM48 Transport Strategy

Changes to the A3 Clandon slip roads will have an impact on Send Barns Lane and Send Road as thousands more cars make for Woking. This will also have consequences for Old Woking, as the roads are very narrow with many parked cars, which large vehicles have trouble navigating.

As far as I know no detailed assessment of the impact has been made.

Attached documents:

Comment: MM48 - LPMM18/836  Respondent: D Davies 10820961  Agent: MM9 Green Belt Policy MM27 MM41 MM42 and MM48

I think the planning committee pays no attention to the Green Belt and Public Transport. They just want houses and careless about increased noise, nitrogen dioxide and delays and gridlocks plus there are other developments coming up. We need less houses and more amenities. The plan is rubbish.

Attached documents:

Comment: MM48 - LPMM18/975  Respondent: Karen Dougherty 10822913  Agent: MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. As highlighted in the Parish Council report, it is unclear how the traffic implications associated with development contained within the local plan, will be addressed. The proposed changes to the A3 are not adequate and a full and proper assessment needs to be carried out to examine the impact that thousands more vehicles will have around our existing village and environs.

Attached documents:

**Comment: MM48 - LPMM18/3647  Respondent: AJ Cheeseman 10830753  Agent:**

**MM27, MM41, MM42, MM48 Transport Strategy**

- All the proposed developments do not take into consideration the impact of traffic on the community. There could be a further 2000+ cars and lorries going through Send creating noise and air pollution and traffic gridlock. I have lived on Send Barns Lane for the last 6 years and have noticed the traffic get increasingly worse without any new developments. The pollution is evident from the pollution deposits I find on the inside window sills, I have no idea what it is doing to my lungs.
- GBC has no transport strategy.

Attached documents:

**Comment: MM48 - LPMM18/2442  Respondent: Ms Katherine Gervasio 10836033  Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

I object to the inadequate changes to the A3 and Clandon slip roads proposed by Guildford Borough Council which will not accommodate the huge increase in traffic if the Garlick Arch, Burnt Common Clockbarn and Alderton’s Farm developments go ahead. These developments added to the nearby Gosden Hill and Wisley/Ockham developments will augment the traffic on Send Barns Lane and Send Road as thousands more cars head to Woking every day and the damaging effect of this on pollution, noise, gridlock and delays has not been properly assessed.

I would like these objections to be noted and preferably listened to - unlike the 33,000 earlier objections sent in by me and other local residents which seem to have been completely ignored.

Attached documents:

**Comment: MM48 - LPMM18/2693  Respondent: Jacky Fenton 10839009  Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

The traffic implications for Send with Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Gosden Hill and Wisley/Ockham developments have not been adequately addressed by the A3 changes and the Clandon slip roads. You have not assessed the amount of traffic that is currently on the roads let alone the thousands more cars heading to Woking everyday causing increased noise, pollution and gridlock!

Attached documents:
Re: MM41 - Land at Garlicks Arch, Send Marsh, Policy A43

MM42 - Land at Burnt Common, London Road, Send, Policy A58

MM44 - Land at Alderton's Farm, Send Marsh Road - Policy A63

MM9 - Green Belt Policy

MM27, MM41, MM42 and MM48 - Traffic

There are unimaginable difficulties with your proposed plan for Send and Send Marsh. There is not enough infrastructure to house the proposed amount (for example)

- of cars (and the extra pollution that they will bring)
- a lot more people needing healthcare
- schooling
- our small country lanes
- and we are DEFINITELY NOT AN INDUSTRIAL AREA, why not enlarge Slyfield, which has empty space readily available?
- plan to route the A3 traffic towards Woking through Burpham.

The proposed 750 houses will more than likely mean 1500 more cars on our narrow roads. We can't move freely now when there are roadworks or an accident or breakdown, let alone move with all this extra traffic.

Try coming around to this area at 'rush' hour or when there has been an accident - it's a nightmare.

NO, NO, NO TO YOUR PLAN

Attached documents:

Comment: MM48 - LPMM18/1770  Respondent: Lawrence Harris 10839649  Agent:

MM27, MM41, MM42 and MM48....Transport Strategy

I cannot see any evidence that a proper traffic impact assessment has been carried out to ‘prove’ the actual impact on the villages of Send and Clandon of the proposed changes to the A3 at Burnt Common. It is not acceptable to merely ‘state’ that everything will be ‘fine’ when it clearly will not as thousands more vehicles head through both villages every day!!

I thank you for your attention to this matter and request your serious consideration of my objections and the many others that you have no doubt received with respect to the proposed developments under the latest modifications to the Local Plan.

Attached documents:

Comment: MM48 - LPMM18/1139  Respondent: J.A. Manlow 10840321  Agent:
The impact on Send Barns Lane and Send Road as thousands more cars lead to Woking every day, causing increased noise, pollution, delays and gridlock, will be much heavier.

Comment: MM48 - LPMM18/5844  
Respondent: Yvonne Woozley 10843521  
Agent:

**MM41, MM42, MM44, MM9, MM27 MM48**

I am writing to object to plans for our village. I have lived here for 20 years and have seen traffic increase dramatically. I have to use the A3 up to M25 J10 most weekdays and it is perfectly clear that Send cannot cope with further traffic.

Increasing industrial areas and a massive increase in housing is completely the wrong thing for a village. We have a strong village feel in both Ripley and Send and I have lived in North London as a child and saw my village merge with the next one and eventually become part of London and it destroyed the area. I don’t want to see this happen here. There are some glorious greenbelt areas and ancient woodland and so there will be far better places to build that are brownfield sites.

I have already watched the Tannery Lane industrial area increasing in size. This is already a ridiculous place for an industrial site, right by the river along a narrow country lane and to increase the size is just not thought through!

I live on Send Marsh Road and building at Alderton’s will make an already dangerous and busy road, even worse. The sharp bend is very difficult to drive around and to cross over to get to Polesden Lane and with a dramatic increase in traffic, this would be impossible.
Along with Garlick’s Arch, Clockbarn, Winds Ridge etc, it is just too much for our infrastructure to bare. I have just had to wait 2 weeks for an appointment at the doctors and increased housing will just exacerbate the problem so that it is out of control.

My children were lucky enough to get into George Abbot school, but what do you intend doing with all the new children and associated traffic that so much building would create? Closing Ripley Primary was ill-thought out if you are intent on going ahead with this building, despite objections and the traffic at the Burntcommon roundabout to get to Send Primary will be ridiculous, especially if you’re considering building new slip roads to the A3 too.

So my main concerns are traffic congestion, destruction of the green belt, no provision for increased infrastructure such as doctors with so many new homes, increase in industrial space not appropriate for a village setting, over-development, flooding and a completely ignoring all previous objections!

Please reconsider destroying our villages of Send and Ripley. They will be destroyed if even a portion of this building goes ahead along with the modifications we are not able to object against such as the traveller’s site and Clockbarn etc. Please listen to your residents and think of the future of Surrey as a beautiful place to live and not just the financial advantages. In the long run, stopping this dense build up of population will save money, as the social problems in north London now, where I grew up are immense.

Attached documents:

______________

Comment: MM48 - LPMM18/4369  Respondent: Rosemary Key 10844641  Agent: 

MM27 MM41 MM42 and MM48 Transport Strategy

Traffic management and infrastructure has not been properly addressed by the changes at the A3 slip roads, there needs to be a proper independent traffic impact analysis on the increase of traffic, through traffic as well as local due to the proposed increase in both housing and industrial estate development. The noise, pollution, delays and problems on the roads in these small poorly managed current roading has not been addressed in any documents provided to residents.

Attached documents:

______________

Comment: MM48 - LPMM18/2570  Respondent: John Wright 10844929  Agent: 

I object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn’t cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.

Attached documents:

______________

Comment: MM48 - LPMM18/376  Respondent: John Ford 10846241  Agent: 

2438 of 2575
It is with extreme disappointment that I have to, yet again, protest against the over development of Send. It beggars belief that the Planning Inspectorate in collusion with GBC have increased the number of properties planned for the village (as per the refs. above).

Do the PI and GBC not recognise the damage this will do to the infrastructure of this area? At the same time I understand there will be some incursion onto Green Belt land which contradicts Green Belt Policy.

I hope that the Local Plan is reviewed to allow Send to be relieved of the developments planned and more suitable sites found.

Attached documents:

Comment: MM48 - LPMM18/3326  Respondent: Frank Drennan 10846625  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM48 - LPMM18/496  Respondent: Evan Parry-Morris 10853249  Agent:

2. I wish to raise the following objections to the Guildford Local Plan MM27, MM41, MM42, MM48:

Many local roads around the villages of Send, Ripley and Clandon are narrow and there are already many instances of vehicles having to mount pavements to allow large vehicles to pass. This is particularly an issue on the A247 between Burnt Common and Clandon Crossroads. The inclusion of the Garlick’s Arch proposal, particularly the industrial and warehousing elements of the plan, is certain to make the situation far worse. I object to the development proposed in the local plan, which will result in more traffic using narrow roads.

Many of the villages are suffering from severe congestion, for example the Shell roundabout at Burnt Common, and the Newark Road & Rose Lane junction in Ripley. I object to the further development which will cause further congestion in and around our villages.

The A3 and M25 already suffer from severe congestion during rush hours, in addition, Highways England have no plans to improve the A3 prior to 2020. I object to the development of these sites shown in the local plan because trunk roads would be unable to cope.

Attached documents:

Comment: MM48 - LPMM18/2192  Respondent: Susan Mansbridge 10855297  Agent:

MM27 MM41 and MM48 Transport Strategy
I OBJECT to what appears to be a lack of common sense to how the traffic situation can be solved, the infrastructure is just not there to be able to cope.

MM41 - Policy A43
MM42 - Policy A58
MM44 - Policy A63
MM9
MM27 MM41 MM42 MM48

I objected to the Land at Garlicks Arch Send Marsh being developed on in my last objection letter so to consider having another 37% development on the site would be outrageous considering 7000 objections were ignored previously for a fewer number of houses being built.

Businesses and employees that have been on the site for many years would lose their jobs as companies have to close or relocate. Their jobs have been their lifeline and income in some cases for their lifetime.

Over the years all the roads locally have been transformed from quiet country lanes to Grand Prix tracks and the lanes and roads infrastructure certainly couldn’t cope with extra housing, cars producing more dangerous nitrogen dioxide putting more people at health risk which they hoped to escape from by moving to the country. We certainly don’t need more people, housing or cars choking our village depleting our woodland areas and picturesque Send March green.

Roads, schools, health centres and hospitals are already overstretched.

Attached documents:

**Comment:** MM48 - LPMM18/1538  **Respondent:** Steve Loosley 10867105  **Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

**Comment:** MM48 - LPMM18/2298  **Respondent:** Ron and Charmian Leach 10868193  **Agent:**
MM27, MM41, MM42 and MM48 Transport Strategy

Opening new entry/exit slip roads off the A3 will overload Send Village, Send Barns Lane and Send Road with unacceptable levels of vehicular traffic, a lot of it HGV. The road network is unsuitable for this level of traffic and will give rise to unacceptable levels of pollution of all types. I therefore OBJECT.

Attached documents:

Comment: MM48 - LPMM18/576  Respondent: Richard Vickery 10869345  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

This area suffers from very high traffic throughout the week. The surrounding villages, Ripley, Clandon, Ockham and Old Woking, are overwhelmed at times. This plan will increase the problem and make it intolerable to get anywhere by bringing more traffic through the villages, especially Send, to get on and off the A3 at Burnt Common.

Attached documents:

Comment: MM48 - LPMM18/2603  Respondent: Lynn Durbridge 10871169  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

Why have the effect of thousands more cars in an already heavily congested area not been taken into account?

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill, Wisley and Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. It seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

This massive increase in traffic and associated air pollution will affect pupils of Send 1st school which will take brunt of the increased pollution as will St Beads middle school. The dropping off of children at Send 1st school is already absolute mayhem and it is only a question of time before a fatality happens. With an increase of traffic the chances of a fatality goes up exponentially.

Attached documents:

Comment: MM48 - LPMM18/3391  Respondent: Rob Stevens 10873313  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The effect of thousands more cars has not appear to have been properly taken into account? The A3 junction wont fix the issue of masses of traffic along A roads to Woking.
The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

Attached documents:

Comment: MM48 - LPMM18/5104  Respondent: Margaret Powell 10876609  Agent:

I wish to object to ALL the above Main Modifications 9, 27, 41, 42 & 48

Our village is big enough already - the roads get very congested & Send Primary School would not be big enough to take all the extra children especially as Ripley School is closing! It is getting increasingly difficult to get teachers - so are our children going to get any decent education?

I have lived the village most of my life & over the last ten years there are now fewer places to walk & get out into the countryside! The Green Belt land & woodlands are becoming non existent.

Why build more Industrial Units - in the past they have been left empty & some now turned into living space - so why do we need more!!! Places are being vacated weekly & left into disrepair- so definitely don't need anymore!

The houses that have recently been built in the village & surrounding areas have not sold - so how are they going to sell a few hundred more! You are DESTROYING village life & going to pollute the countryside! Therefore a lot more health problems without sufficient Medical facilities available - what a NIGHTMARE!

I Strongly object to ALL the above Modifications. - so please re think your policies.

Comment: MM48 - LPMM18/3393  Respondent: James Anderson 10880481  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.
MM48 Transport Strategy.

I object to the fact that a real assessment of the traffic requirements have not been considered. The implications for the current residents are horrendous. Air, pollution, traffic noise, grid lock and delays will be the order of the day for residents of Send. Walking children to school in such polluted air will be out of the question, and lead to ever more cars on the road.

There has already been considerable development of sites such as the Tannery on Tannery Lane, and it is proposed 60 houses on the Clockbarn site. This has already had adverse effects on residents in the area in terms of increased traffic, but is of nothing compared to the effects of this outrageous over development that the council is foisting upon us against our will.

It is very disappointing to feel that the council members do not consider the opinions of the current residents and that they treat us with such contempt.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. Comment: MM48 - LPMM18/2098  Respondent: A Aldridge 10897633  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The proposed changes in the A3 and Clandon slip roads do not adequately address the impact of thousands more cars travelling along the Portsmouth Road. Send Barns Lane and Send Road past a school and through residential areas, with resulting noise, delays and gridlock and more severe pollution. The infrequent bus services in the area will do nothing to reduce the amount of car use.

In general these proposals place a heavy load on Send and, in the light of recent reports that the Guildford area does not require such a high level of development as originally thought, are unreasonable and unjustified.

Attached documents:

Comment: MM48 - LPMM18/4686  Respondent: Sue French 10897665  Agent:

Objection to MM27, MM41, MM42 NS MM48 TRANSPORT STRATEGY Can this really be called a transport strategy? This strategy will clog up all the roads around Send and Ripley, the A3 and the A247 to Woking. These roads are already loaded to capacity and almost at saturation point several times a day.

GBC have received thousands of objections to their plans. Is no one listening?

Attached documents:

Comment: MM48 - LPMM18/5729  Respondent: Michael Mills 10900385  Agent:

MM41-Policy A43---MM42-Policy A58---MM44 Policy A63

MM9 Green Belt Policy

MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.
Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

Attached documents:

**Comment:** MM48 - LPMM18/3003  **Respondent:** M Stokes 10903265  **Agent:**

**MM27 MM41 MM42 & MM48 Transport Strategy**

The traffic implication for our village with all the new proposed development is untenable. GBC has not been clear in their assessment of the impact of the movement of the thousands of extra cars travelling along congested roads, the pollution levels, delays and gridlocks that will ensue. Even with the proposed A3 changes this still does not address the issues that will arise.

It would seem that GBC has decided that Send and Ripley are to be the fall guys in their planning due to our proximity to two major routes. I ask the Planning Inspector to please see some sense and consider the views of our communities. I personally have no problem with developments that reflect the need within our village but not this huge proposed over development in our area.

Attached documents:

**Comment:** MM48 - LPMM18/2238  **Respondent:** D White 10905185  **Agent:**

**MM27 MM41 MM42 MM48 Transport Strategy.**

Guildford B.C. have produced, what they call a Transport Strategy, without addressing the wider vehicle movement problems. The Leader of Guildford B.C has already acknowledged in public that the area has significant congestion and transport problems and yet still adds his name to policies that are clearly flawed.

The traffic on the North Bound A3 backs up from the M25 junction, "rat running" takes place off the Burnt Common exit and through Ripley village. This has not been referred to in any document.

The Southbound traffic backs up from Stag Hill to the Burpham Junction exit. This has not been reffered to in any document.

None of the roads surrounding Send were designed to take large volumes of traffic. They were and still are, in effect, village streets, despite their A road classification.

Burnt Common roundabout will be gridlocked by the increase in the number of vehicles, of commuters, school run drivers and the manoeuvring of HGV vehicles visiting the proposed new industrial site at Burnt Common, and the new units in Send Business Centre.

Emotionally this is a Transport Strategy for disaster.

These OBJECTIONS are based on facts and it would be naive for Guildford B.C. and its associated developers to think that it is truly doing the residents of Send a huge favour.

Attached documents:
Comment: MM48 - LPMM18/3674  Respondent: Heather Thompson 10910753  Agent:

I object to MM27, MM41, MM42, MM48 Transport Strategy

The cumulative impact on the traffic and pollution issues on the village, when all of the proposed developments at Garlick's Arch, Clockbarn, Alderton's Farm, Gosden Hill and Wisley and Ockham, is totally unacceptable. Our road systems are already heavily congested, especially at key points in the day. My daughter lives on Send Road where it is often difficult to enter and exit her drive because of the ceaseless flow of vehicles. Crossing the road is perilous. The pollution levels are a real cause for concern as I have a young grandchild. We already know that far too many of today's youngsters suffer from asthma, a direct result of the increasing levels of pollution. This can only be exacerbated if these proposals go ahead.

Attached documents:

Comment: MM48 - LPMM18/1705  Respondent: Stuart Ray 10915713  Agent:

MM27. MM41. MM42.and MM48 Transport Strategy.

Attached documents:

Comment: MM48 - LPMM18/4768  Respondent: Katharine Moss 10918273  Agent:

MM27. MM41. MM42.and MM48-Transport Strategy.

This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why?

The increased traffic for Send from Burnt Common Garlicks Arch, Alderton's, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents, trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane.
This massive increase in traffic of all sorts heading to and from Woking along Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

Attached documents:

The development of the Clandon slip roads on the A3M will cause the local roads to be completely overwhelmed. Already the traffic from Burnt Common to Woking is horrendous and this development will cause it to virtually gridlock. None of this will be to the benefit of the land inhabitants who will also suffer increased pollution. I object to this proposal.

In summary, i'm absolutely appalled by the above Main Modifications and the other developments that have been approved for Send Village. The concentration of all these developments in Send village is completely disproportionate and is vindictive in the local inhabitants. None of this is for the benefit of the local inhabitants who have not requested any of it. You should be utterly ashamed of yourselves as the so called Planning Policy Team and remember who pays your taxes and therefore your wages. Its very obvious that Send Village has been effectively pilled on as ripe for development and expendable. Every ruse has been used to overcome the protection of the Green Belt and destroy this local enviroment. The way proposals have been conveyed from nothing (i.e no local demand) been dismissed and unnecessarily revived suggests a system that is rotten to the core.

Attached documents:

Comment: MM48 - LPMM18/582  Respondent: Sebastian Forbes 10920865  Agent: MM27, MM41, MM42, and MM48: When will the traffic implications be properly addressed?

Attached documents:

Comment: MM48 - LPMM18/5640  Respondent: Kathleen Grehan 10922689  Agent: MM27 MM41 MM42 and MM48 Transport Strategy

Changes in the various transport strategies will in no way solve the problem of the increased traffic that will be produced by all the planned developments. It is more likely to make the situation worse.
It seems Send is getting far more than its fair share in this plan. Why is that? We have certainly submitted plenty of objections to the Local Plan at the various stages but it seems to have no effect. I have lost all faith in the planning process. If the burden was shared out more fairly the traffic problem would be diluted.

Attached documents:

Comment: MM48 - LPMM18/1545  Respondent: Benedict Phillips 10924193  Agent:

I am writing to object strongly to some of the main modifications to Guildford's local plan.

I live on Send Road and will be hugely adversely affected by the massive growth in traffic on a road that is already too busy. The big increase in houses at Garlick's Arch (MM41), the doubling in size of the Burnt Common industrial estate (MM42), the Alderton's Farm housing development (MM44) and the Clandon A3 slip road (MM27, MM42, MM48) will combine to put intolerable pressure on Send Road. This will result in increased noise, delays and gridlock, not to mention the extra pollution which is a major health concern for those living on the road. In particular, the industrial estate is bound to increase HGV traffic on Send Road, which poses a major safety risk to young children. The 30mph limit is not usually adhered to and there are no speed cameras on the road or any traffic-slowing devices.

Furthermore, the Garlick's Arch housing development (MM41) is now increased by 150 houses. This is excessive and ignores the 7,000 objections to the original, smaller plans. This land is Green Belt land and ancient woodland. This will be lost while at the same time morphing Send and Ripley into one big sprawling mass of houses. Surely the whole point of the Green Belt is to stop this happening? The extra population will also put intolerable pressure on local schools and medical facilities - particularly after the council's recent decision to close Ripley Primary School in extremely dubious circumstances, which attracted negative coverage in the national press.

As far as the industrial estate at Burnt Common is concerned, the doubling of the size to 14,800 sq m seems a total insult to all those who objected to previous incarnations of the local plan. There is no need to put new industrial sites in the Green Belt when Slyfield has unused capacity. There are no special circumstances so it goes against your own Green Belt policy (MM9). There is already a 25% increase in the Send Business Centre, while the huge new Vision Engineering factory and the fact that the old factory is being kept as a commercial property despite residents being told it would become housing, all combines to fundamentally change the nature of Send by massively increasing the amount of industrial and commercial activity.

And why has the Alderton's Farm housing development reappeared in the latest local plan? It is Green Belt with no special circumstances so again contravenes your own rule MM9. Added to the other proposed housing, it makes 770 houses added to the current 1,700 in Send. That is an unnecessarily high increase which is unfair on the people who live in Send already.

Moreover, the wording of the MM9 policy on the Green Belt seems to leave open the possibility of more 'infilling' of any land left that hasn't been developed.

It is staggering that after all the complaints, Guildford Borough Council has come back with these modifications.

Attached documents:

Comment: MM48 - LPMM18/6055  Respondent: Paul Dench 10926689  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
The transport strategy will not compensate or eradicate the problem that will occur when you put so many new houses in one area rather than spreading them throughout the borough. E.g to make access north bound on the A3 is not going to solve any problems only create more as it will encourage more cars through the village from the Woking direction. To increase the number of houses by 45% in Send is a recipe for disaster unless far more though and planning is put into the infrastructure. This Local Plan does not address the problem of the already overloaded infrastructure.

**Comment: MM48 - LPMM18/303**  
**Respondent:** JN Boardman 10945793  
**Agent:**

It is obvious that with the above policies & strategies are still reflecting directly from what has gone before; amending & increasing on the Local Planning Foot Print. These changes are shown in shaving bits off here and adding bits to there.

These amendments:

Still disregards all technical impacts on current & future structures. Most structures sit on a deep clay base which needs peculated ground water to function as a foundation base.

Tweaking weak infrastructures, no way puts in place any future proofed infrastructures.

Increasing these capacities will greatly increase all impacts on enviroment. Not all of which is yet to be fully understood or been considered.

Concreting over "Green Belt" is just not on, now or anytime in the future. We all complain about the forests in South America being cut down, along with plastic waste; this is no different.

The impact of such large developments, will swamp Send & all surrounding areas. If Wisley was a no no; then these proposals are doubly bad.

So what part of NO, does the current dominant political power not understand?

It seems as if the first judgement, common sense (Wisley) went against the current political-monied power houses. How strange that with a new judge conforms now to their wishes. How did all this happen?

Stop faffing about! Ask the local populous "What they want to happen by holding a Local Referendum." Just like Switzerland.

Attached documents:
Comment: MM48 - LPMM18/175  Respondent: Ivan Szabo-Toth 10949729  Agent:

MM27/MM41/MM41/MM48 Transport strategy. The combined traffic increase is not currently covered by the A3 changes and clandon slip roads. The levels of pollution and traffic will be unacceptable.

Attached documents:

Comment: MM48 - LPMM18/3617  Respondent: Alison Humberstone 10952161  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The effect of thousands more cars has not appear to have been properly taken into account? The A3 junction wont fix the issue of masses of traffic along A roads to Woking.

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

**Comment:** MM48 - LPMM18/506  **Respondent:** Richard Baldwin 10999873  **Agent:**

MM27/41/42/48

The A3 changes will not prevent a massive traffic impact on Send Barns Lane and Send Road’

Attached documents:

**Comment:** MM48 - LPMM18/897  **Respondent:** Howard Milner 11003361  **Agent:**

MM27 MM41 MM42 and MM48
Again no proposal is made regarding the major increase in traffic to the immediate or surrounding areas, narrow roads and tight junctions in the villages of Ripley, Send, Old Woking and Clandon already prove problematic at peak times, how emergency services will be able to attend callouts at peak times is unthinkable. The tremendous increase in pollutants caused by the increase in traffic is yet another cause for concern, especially in the light of the removal of trees, hedges and grassland required to build all the homes in the immediate area, going against the environmentalists latest requests to plant more trees and create green spaces in an effort to improve air quality.

As a closing note I would ask all those councillors and local government officers involved in this decision making to make themselves known to the local residents, so that we can avoid them on any future election papers.

Comment: MM48 - LPMM18/888  Respondent: Elizabeth Milner 11003681  Agent: MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send with Garlick's Arch, Burnt Common, Clockbarn and Alderton's would not be adequately solved by the A3 changes and the Clandon slip roads. Add in the developments at Gosden Hill and Wisley/Ockham and you will have major problems in the future with traffic. I would suggest you come out to view Send Barns Lane and the roundabout by Little Waitrose at the rush hour, around 8.30 am and just imagine how the levels of noise, pollution, delays would be increased intolerably both for the existing residents and for the proposed new residents. The roads would be gridlocked.

Please do not ignore the objections of Send Residents. We have already objected en masse in the past to the unfair proposals of Guildford Borough Council where it has been proposed that Send is swamped with new developments, completely changing the nature and character of the village. These developments should be spread around some of the other villages. Send would become effectively a suburb of Woking with these developments.

Yours with great indignation at the lack of consideration to the objections already made by Send residents

Attached documents:

Proposed changes to the A3 and the Clandon slip roads (document 003a, sections 11.14 to 11.34) will help to feed traffic more quickly into the local road system - what then? Jams will feed back onto the major roads and cause massive problems for both local and longer-distance motorists. GBC's assessment of possible solutions to this is extremely superficial - it's easy to write a few sentences promising infrastructure will follow but this is a real problem to which there won't be an acceptable solution: a proper amount of infrastructure to cope with this amount of development will devastate the green belt and destroy the character of the area.

Your current document suggests (Appendix 11.4 of GBC Responses to Matters, Issues and Questions reference 003b) that the increase in morning traffic on the A247 Send Road will be just 3% - after adding nearly 40% to the housing stock of the village. Heaven only knows how anyone arrived at this figure, but you don't need complex calculations to see that an estimate is out by an order of ten, as this is.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/1080  Respondent: Sally Baker 11009825  Agent:

MM27 MM42 MM48 Transport Strategy  These proposals are all quite out of proportion for Send. Anybody forced to travel at rush hours on these local roads will know all too well the delays are already totally unreasonable.

Attached documents:

Comment: MM48 - LPMM18/4942  Respondent: Mrs Janet Williams 11011041  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

Changes to the A3 slip road will in no way make up for the increased traffic that will be generated by all the planned developments. In fact it is far more likely to make the situation worse. What assessments have been done to predict the actual changes in traffic that will occur as the result of the planned developments?

Attached documents:

Comment: MM48 - LPMM18/909  Respondent: Mary Warren 11011713  Agent:

Transport

Modifications MM27, MM41, MM42, MM48.

As before, there appears to be no clear plan for transport links or other facilities such as schools and medical facilities, just fine words. Without such a document, the local plan is useless and will only lead to chaos and gridlock on the roads and impossible class sizes in our schools. Already, the roads around Send, Ripley and West Clandon are overloaded with enormous European sized lorries which rumble through the villages with no thought given to parked cars or pedestrians, mounting the pavements if they meet a lorry coming the other way. In addition, they emit considerable diesel fumes, risking the health of the children in the schools, at least two of which are very close to the road.

Attached documents:
Comment: MM48 - LPMM18/634  Respondent: Brenda Tulloch 11016001  Agent:

MM27 – MM41 – MM42 – MM48 – I object on the following grounds

Already congestion exists in Send at rush hours mainly with people travelling into Woking etc and at school drop off and pick up times. Are the proposed changes to the A3 really going to improve this – I don’t think so. This causes delays – pollution and gridlock.

Attached documents:

Comment: MM48 - LPMM18/1840  Respondent: Jean Walker 11023585  Agent:

1. The Clandon Society Objections and Concerns Which I Share

The A247

I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road.

The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (eg through East Clandon) which will be used to avoid the inevitable traffic build ups on the A247.

I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manouevres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem viz. the widening of the Boxgrove Rd. bridge. It is already the intention to build a station next to the bridge.

The £1million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.

I believe that traffic will increase significantly because:

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh
4. The development of 1800 houses at Gosden Hill
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The sight lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

Housing Number and the Green Belt

The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt.

The Council has long argued that much of the housing required must be built on such sites.

This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker.

The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.
Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/182  Respondent: Mike Tarrant 11032705  Agent:

I object to MM27, MM41, MM42, MM48, Transport Strategy.

Because we have no verified assessment from Guildford Borough Council of the Traffic implication these modifications will impact on Send.

Common sense tells me development on the scale proposed in Send and wider a field at Gosden Hill, Wisley and Ockham. Plus the proposed M25/A3 Junction will increase traffic in our Village and with it the problems it brings.

Attached documents:

Comment: MM48 - LPMM18/1696  Respondent: Brian Slade 11036705  Agent:

MM27,MM41,MM42,MM48 Transport Strategy  Increased traffic density caused by the proposed addition of 770 dwellings to Send, an increase of 45%; the majorly expanded industrial and storage area: and the new sliproads to and from the A3 resulting in thousands of extra cars and lorries travelling into Woking daily via the A247 together with the serious congestion and air pollution (which is already at dangerous levels) does not seem to have had any form of formal traffic assessment undertaken by GBC otherwise they would realise that their proposed plan will result in the destruction of Send's current infrastructure and that of its surrounding areas as well as increased noise and nitrogen dioxide pollution causing damage to the health of residents as well as serious traffic delays and gridlock of local roads.

Attached documents:

Comment: MM48 - LPMM18/1756  Respondent: Beryl Sussex 11041633  Agent:
All the combined developments planned will place a huge burden on the present traffic system.

Send is already used by many Woking Commuters to reach the A3.

It is already a very busy road. More traffic will lead to more delays, gridlock, noise and pollution.

Please listen to the people from Send and weigh the objections thoroughly and carefully.

Attached documents:

Comment: MM48 - LPMM18/4967  Respondent: Sam Thompson 11042433  Agent:

MM27, MM41, MM42 and MM48, Transport Strategy

The local roads are narrow, already over congested and badly maintained. SendMarsh Road, Polesdon Lane and Newark Lane are busy commuting roads that constantly have potholes that are not repaired. There is frequent gridlock and also no real public transport options as an alternative. The local area cannot sustain thousands more cars transiting in the area that would be the result of 770 more houses in the area.

The proposed changes to the A3 and Clandon slip roads do nothing to address these issues.

Attached documents:

Comment: MM48 - LPMM18/3722  Respondent: Peter McGowan 11047201  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The proposed A3 amendments and the Clordon slip roads do not properly address the impact of traffic for Send of development proposals for Alderton’s, Clockbarn, Burnt Common and Garlick’s Arch in addition to Gosden Hill and Wisley/Ockham. There is no adequate analysis of the total traffic implications on Send Barns Lane and Send Road especially taking into account the fact that thousands more cars will transit the area daily, bringing about increased noise and chemical pollution as well as delays, which noticeably have increased significantly over the 18 years that I have lived in the area, at the expense of residents and the natural environment.

Other Developments

The consultation only permits commentary on the principal changes and thus denies residents the opportunity to object again to 40 houses and a travellers’ site on Send Hill, 60 Houses at Clockbarn in Tannery Lane and a 25 per cent increase in the size of the Send Business Centre notwithstanding the existence of the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

As a general point, many of the amendments can only be viewed without the context of appropriate infrastructure, with mention only being made that consideration need only be given to issues, including schools. It is unreasonable and unfair to put the amendments forward without mention of the infrastructure needed to support the original proposals, earlier modifications and these modifications.
MM27, MM41, MM42 and MM48 - Transport Strategy.

GBC has grossly underestimated the effect on the local roads of the proposed developments discussed above and the other developments proposed in the Plan at Clockbarn Nurseries, Send Hill and the expansion of the Send Business Centre in Tannery Lane, which are not the subject of amendments and so precluded from discussion here. At the Public Inquiry GBC indicated only a minor increase was anticipated in traffic through Send on the A247 was anticipated. That totally fails to take into account that such huge development has to bring a large increase in both car and HGV traffic, which can only use the existing roads - no new ones are proposed. The proposed 4 way slip roads at the Burnt Common Clandon slip, currently only a northbound exit and a southbound joining will inevitably lead to increased traffic through Send. At present, traffic on the clockwise M25, bound for Woking generally leaves at junction 11. It is possible leave at junction 10 and take the A3 for a mile, leaving and going through Ripley, then Send and Old Woking. However the bottleneck that Ripley presents at busy times morning and evening at present dissuades this. Traffic turning right into the very narrow entrance to Newark Lane, heading for Pyrford and Byfleet, blocks the High Street, causing tailbacks that often stretch back to the A3 junction. GBC has completely failed to take into account that the provision of the 4 way slips at Burnt Common will also serve a new road from the proposed large development at Wisley Airfield, running parallel with the A3 and bypassing Ripley. M25 clockwise traffic intending to go to Woking will thus find it worthwhile when the M25 has its usual morning and evening queues from Cobham Services to leave at junction 10 and take the new route to Burnt Common without any fear of hold-ups in Ripley. That traffic will however have to travel along Send Barns Lane and Send Road, already gridlocked morning and evening, adding even more congestion, noise and pollution. Ripley meanwhile, will bask in relative peace.

Send had the temerity to elect Guildford Greenbelt Group Borough Councillors in 2015. It is impossible to avoid the conclusion that this Plan is punishing the village for doing this. The proposed development, even as it stood prior to the increases provided by the amended Plan and the Inquiry, concentrated 40% of the housing development in an area with 18% of the Borough's population. We are also now intended to take a huge industrial area, the only one of its size in the Plan - all in one rural location. This Plan, taken as a whole as it must be, is utterly disproportionate and unfair to Send, Send Marsh and Burnt Common.

Comment: MM48 - LPMM18/4200  Respondent: Belinda Nicoll 11049729  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Comment: MM48 - LPMM18/4631  Respondent: Roger Bean 11051713  Agent:
the traffic implications on the village are huge, it would not be able to cope with thousands more cars everyday. The roads would be gridlocked, there would be increased noise and air pollution. Council and highways can not cope with current traffic and wear and tear on roads, potholes, broken kerbs, street lights not working.

Attached documents:

Comment: MM48 - LPMM18/1037  Respondent: Vicki Groden 11070401  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

- Has an updated comprehensive assessment been made, taking into account all the sites affecting local traffic - Garlick’s Arch, Burnt Common, Clockbarn, Alderton’s, Wisley and Gosden Hill, with the changes in housing numbers, to assess the impact on Burnt Common roundabout which will be substantial, and needs assessing at peak hours when most are affected and pollution, congestion and noise will be greatest.

MM27, MM41, MM42 and MM48 Transport Strategy

- The planned changes to the A3 and Clandon slip roads are not sufficient to cope with the increased traffic that will arise from the proposed developments of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s.
- Queuing traffic for the A3 will back up into Send, again clogging the roads and increasing air pollution, plus traffic in to Woking through Send will also increase hugely.

I also note that this consultation only allows me to comment on the main changes, so other planned developments (including 40 houses and a travellers’ site on Send Hill plus 60 houses at Clockbarn, Tannery Lane) cannot be commented on. These will also negatively impact the village for the same reasons as MM41 and MM44.

Please help to keep our Village just that – a Village, not a sprawling development that will effectively join up Send and Ripley.

Attached documents:

Comment: MM48 - LPMM18/3813  Respondent: Y C Smithers 15106977  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for the area are devastating and as such totally overburdens traffic on local roads and also the A3, entering and leaving this enormously busy road which is regularly a car park! The new proposals don’t take into consideration the traffic impact of the additional thousands of cars, let alone increased pollution, noise and likelihood of more accidents, especially during peak times.

Other developments

This consultation does not include the chance to comment/object to the 40 houses and travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and the increase in size to the Send Business Centre despite the Wey Conservation area, these proposals are again devastating to the local roads in all of these areas, they are too narrow, often difficult to pass and have many blind spots, and the larger roads are already standing traffic during peak times, let alone at other times of the day, the small village cannot take any more development especially of the sizes proposed.

We do hope you consider our strong objections to all of the above, as not only us but our family and friends will be severely impacted. We are pensioners and are already finding the amount of traffic too much and has significantly risen in recent years, especially with commuters using our village as a cut throughs from the A3 and M25.

Attached documents:

Comment: MM48 - LPMM18/71  Respondent: Andy Williams 15107041  Agent:

MM27, MM41, MM42, MM48 - Transport Strategy

The implications have not been properly assessed or addressed by the A3 changes and the Clandon slip roads. Potential significant traffic impact upon Send Barnes Lane and Send Road of traffic heading for Woking, increased noise and pollution levels, additional delays and gridlock on the roads.

It's about time reasonable proposals were submitted in the local plan, constant challenge an objections to the plan are not helpful and are no doubt expensive to manage. Reasonable proposals are likely to be viewed more favourably.
Regards
Andrew Williams

Comment: MM48 - LPMM18/2486  Respondent: Sylvia Pyne 15138433  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The changes to the A3 will make things even worse for Send with the traffic from the above developments coming straight through the village to Woking. This will mean unacceptable pollution, which has been increasing over the years and which I find is already causing more breathing problems for me as an asthmatic living on Send Road, so what it will do to children walking to school along Send Road and Send Barnes Lane with increasing nitrogen dioxide pollution exacerbated by the delays and gridlock it will cause. We are supposed to be encouraging more children to walk and this will only give parents an excuse to use their cars even more, and who could blame them.

More consideration should be given to the siting of additional housing elsewhere, as we are bearing an unacceptably large proportion of the new housing and development in the Guildford area, which should be spread more evenly through the villages etc. It appears we are getting about 50% of all development in the next 5 years, which can’t be right. For this reason I feel I have no other alternative but to object strongly to the enlarged burden which we are now being asked to bear, and it seems every time we object we are just given more development as our reward.

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/4788  Respondent: Paulina Adair 15142977  Agent:

I object to MM27, MM41, MM42, MM48 - there is no way to introduce the amount of traffic you are proposing into the area!

Attached documents:
Finally, the MM27, MM41, MM42 and MM48 Transport Strategy

Changes to the A3 do not alter the narrow winding roads that lead off of the main Send Road. These small roads are not designed for large numbers of cars and the risk of accidents will dramatically increase with more traffic on them.

I invite you to really consider the proposed developments and try to come up with alternative and innovative solutions that extend outwards from the village of Send and even Surrey. It would be more advantageous to spread the load of new housing more evenly rather than completely changing the feel of Send and forcing many people who have been happily settled there over a number of years to have to move as it would no longer be the village they moved too and would become overcrowded and polluted.

Attached documents:

There are no definite plans laid out and it is impossible to widen Send Road or the Clandon Road to accommodate the increase in traffic approaching or returning from the A3. These are narrow roads in many places and the traffic is already at a standstill at peak times. A full assessment must be made and published and I ask the inspector to revisit at peak times.

Attached documents:

Transport strategy MM27, MM41, MM42, MM48

The proposed developments will add to the already overcrowded roads, where journeys take far longer than necessary. Most residents now have to factor in the probability that there will be delays.

The road network is in desperate need of a major maintenance programme. In Send the surface at the traffic light intersection has completely broken up with holes appearing in all approaches. This non slip surface has broken down, wasted money, poor design. Or too much traffic?

The bridge over the A3 on the Clandon road has had the road surface pushed into the kerb resulting in large undulations that force motorists into the middle of the road.

Priority should be given to getting existing roads into a reasonable condition over the building new developments that will only increase traffic and make the matters worse. Most roads in the areas have kerb stones, and service covers dislodged and numerous potholes.

Who decides what a reasonable time is to queue on the roads into and out of Guildford and Woking getting to and from work. What is the environmental impact of thousands of cars, Lorries and busses queuing every morning and evening polluting the atmosphere, wasting fuel and residents and commuter’s time?

OBJECTIONS TO THE PROPOSED MAIN MODIFICATIONS TO THE LOCAL PLAN OF GUILDFORD BOROUGH COUNCIL

I am writing to register my objections to the Main Modifications in the Guildford Borough Council Local Plan that will be forever harmful for the residents of Send by overloading the infrastructure, environment, services, and amenities, and permanently damage what remains of our surrounding countryside, and open spaces.

OBJECTIONS RELATING TO ALL PROPOSED DEVELOPMENTS (MM27, MM41, MM42, MM44, and MM48) IN THE GUILDFORD BOROUGH COUNCIL LOCAL PLAN

1. The proposed developments, referred to later in this letter, do not consider the risk of future water shortages, where there are no plans or funding to increase the provision of water storage and supply to additional households and commercial facilities proposed for the Send Parish, within the Affinity Water region.

2. All developments in the Guildford Borough Council Local Plan - referred to later in this letter - are within an area designated by the Environment Agency as “water stressed”. Without any additional means of water supply, it would be irresponsible to risk greater water scarcity in the future by adding to the demands for water from additional developments in and around Send.

3. The Main Modifications where specific objections are described below are, when combined, an unacceptable increase of concentrated housing developments to be imposed on the village of Send and the already over-used roads - without any scope for increasing capacity - and the fully subscribed local medical and schooling facilities.

Attached documents:

---

Comment: MM48 - LPMM18/946  
**Respondent:** Michael McGrath 15251105  
**Agent:**

5. MM27, MM41, MM42, AND MM48, TRANSPORT STRATEGY

I object to these Strategies because:

- The various Modifications refer to “mitigation schemes to address the otherwise adverse material (and visual) impacts on communities and the environment” without declaring any conditions that would have to be met by any such “mitigation schemes”. The absence of any defined scope for “mitigation schemes” is to deny the objectors to the
Transport Strategy the chance to assess and comment on the desirability of any “mitigation scheme”. The prospect of implementing “mitigation schemes” without any pre-conditions would be poor governance and unacceptable to the communities affected by this Transport Strategy.

- Guildford Borough Council have not demonstrated any assessment of the aggregated traffic impacts on Send Barnes Lane and Send Road from the proposed changes for additional slip roads to the junction of the A247 with the A3, which will substantially increase the traffic flows to and from Woking each day.

- The Transport Strategy will lead to yet more vehicle traffic being added to the minor ‘A’ road (the A247) through Send, with already high volumes of traffic, where the 'uktrafficflow' web site shows an average of nearly 14000 vehicles passing along the A247 in Send each day. This high volume already has an adverse effect on the quality of life for the residents of Send with congestion, noise, and pollution from vehicle emissions. Such daily high traffic flow is excessive and must not be increased further by senseless and unnecessary developments.

- The loss of open spaces for additional roads will reduce the ability of the natural environment to remove pollutants such as CO₂ from the atmosphere.

I thank you for your time and consideration of my objections.

Attached documents:

Comment: MM48 - LPMM18/869  
Respondent: Mr Brian Middlemiss  15257953  
Agent:

MM27,MM41,MM42 and MM48 Transport strategy for the whole area. There appears to be no proper assessment of the combined traffic impact on the Send Road and Send Barnes Lane with potentially thousands of extra cars passing through the village daily. What would Mr Hammond think of this? It is bad enough at present trying to get to Woking or Guildford. This I object to.

Comment: MM48 - LPMM18/1854  
Respondent: Robert Peake  15264001  
Agent:

Ref: Guildford Borough Council’s Modified Local Plan consultation

I would like you to note my following comments:

1. I fully endorse the responses of The Clandon Society, the Guildford Residents’ Association and the Guildford Vision Group and would like their responses to be registered as mine as well.

2. I OBJECT to the Modified Local Plan as a whole as I believe it is fundamentally unsound because:
   2.1 Guildford Borough Council has not properly observed its hierarchy of development. Brownfield opportunities, especially in the town centre, have not been fully exploited
   2.2 There is too much reliance on A3 improvements and these are beyond the council’s control
   2.3 The town centre policy, S3, is inadequate and also does not address the infrastructure deficit
   2.4 The grounds for Green Belt development are inadequate and do not fulfil the criteria for ‘exceptional circumstances’.

3. I would like the Inspector to RE-EXAMINE the Local Plan because:
2. There has been a number of major changes made to the Plan by the Council which have changed it significantly, including, but not exclusively, the editing of D1 and removal of D4, and the addition of new housing and increased commercial development on the Green Belt

3. New figures and projections for housing numbers have been released by the ONS which clearly demonstrate that the housing number in the Local Plan is too high

In case Guildford Borough Council is not prepared to accept my request in Section A above I am including the key points made by those three organisations in my full objection to the Modified Local Plan below:

1. **The Clandon Society Objections and Concerns Which I Share**

   **The A247**

   I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road.

   The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (eg through East Clandon) which will be used to avoid the inevitable traffic build ups on the A247.

   I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1 million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

   I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

   I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manoeuvres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents.

   What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem viz. the widening of the Boxgrove Rd. bridge. It is already the intention to build a station next to the bridge.

   The £1 million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.

   **I believe that traffic will increase significantly because:**

   1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic
   2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247
   3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh
   4. The development of 1800 houses at Gosden Hill
   5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247
   6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3
   7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common,
avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing

8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.

9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments

10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

**Problems with the West Clandon section of the A247**

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The sight lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

**Housing Number and the Green Belt**

The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt.

The Council has long argued that much of the housing required must be built on such sites.

This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker.

The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.

Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

5. MM27, MM41, MM42 and MM48 Transport Strategy

There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock.

Attached documents:

Comment: MM48 - LPMM18/1632  Respondent: Steven Brown 15320737  Agent:

Transport strategy for MM27, MM41, MM42 and MM48

There has been no rigorous assessment of the impact of the proposed developments on traffic flows in the area. The road to Woking is already gridlocked in rush hour times. The proposed developments would lead to significantly worse traffic which would be intolerable to existing residents.

I strongly object to these plan modifications.

Attached documents:

Comment: MM48 - LPMM18/1732  Respondent: J D W Todd 15326369  Agent:

4) MM27 MM41 MM42 MM48 are part of the above observations.

Relevant above is the latest government survey of housing needs in this area which shows a reduction in need of 45%.

Attached documents:

Comment: MM48 - LPMM18/2026  Respondent: R.A. Love 15328865  Agent:

I OBJECT to MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/4071  Respondent: Marian Tarrant 15391329  Agent:

I object to MM27, MM41, MM42, MM48, Transport Strategy.
Because we have no verified assessment from Guildford Borough Council of the Traffic implication these modifications will impact on Send.

Common sense tells me development on the scale proposed in Send and wider a field at Gosden Hill, Wisley and Ockham. Plus the proposed M25/A3 Junction will increase traffic in our Village and with it the problems it brings.

Attached documents:

Comment: MM48 - LPMM18/5973  **Respondent:** Jennifer Slade 15429985  **Agent:**

**Transport Strategy: MM27 / MM41 / MM42 and MM48**  GBC has not published any assessment of the increased traffic density which will be caused by the proposed addition of 770 dwellings to Send, which is an increase of 45%; the significantly expanded industrial and storage area and the new slip roads to and from the A3, which will result in thousands of extra cars and lorries traveling daily along the A247, together with the serious congestion and air pollution (which is already at dangerous levels). Any proper assessment would show that the proposed plan will result in the destruction of Ripley and Send's current infrastructure and that of its surrounding areas as well as increased noise and nitrogen dioxide pollution, causing damage to the health of residents and particularly children at the School on the A247 in Send, as well as serious traffic delays and gridlock of the local road network.

Attached documents:

Comment: MM48 - LPMM18/2745  **Respondent:** Helen Green 15433153  **Agent:**

Regarding MM27, MM41, MM42 and MM48 Transport Strategy

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock

Attached documents:

Comment: MM48 - LPMM18/2379  **Respondent:** David A Sprigings 15438049  **Agent:**

**MM27 MM40 MM41 MM42 MM48 Transport Strategy**

The transport strategy in the Send/Send Marsh/Burntcommon/Ripley area does not look as though it will help deal with traffic congestion in the area but more likely to make it worse.

The timing is such that the developments in the area are front end loaded, mostly in the first 5 years of the plan, whilst major road improvements are mostly scheduled to not be completed until later years.

The road developments appear anyway to be designed to bring yet more traffic through these villages including to and from Woking which will increase pollution, delays and gridlock. To build many of the proposed new homes in advance of road improvements will only make matters worse.
The potential future all movements junction of the A3 with the A3100 London Road, the B2215 London Road and the A247 Clandon Road for the provision of land for a connector road to the B2215 London Road/A247 Clandon Road in MM35 Gosden Hill Farm under Transport Strategy (2) and Opportunities (6) sounds like a recipe for yet more traffic to be drawn through Burntcommon/Send Marsh/Send/Ripley making things even worse so although a plan for the future I object to it now.

Attached documents:

Comment: MM48 - LPMM18/2237  Respondent: C Knaggs 15443265  Agent:

I protest most strongly.

Medical facilities, roads cannot cope, noise, dirt, dust, bus service cannot cope. Area being ruined.

Attached documents:

Comment: MM48 - LPMM18/4111  Respondent: Ruth Brothwell 15448897  Agent:

MM9

I object most strongly to the removal of green belt in this locality. Using 'limited infilling outside the identified settlement boundaries' as an excuse for this development shows very poor concern for loyal residents, is entirely subjective and produces uncertainty. Investment in property in this area was made believing certain areas were inviolate and this may well cause a change in the nature of the wealth of the entire area which would be a loss to GBC.

Attached documents:

Comment: MM48 - LPMM18/5480  Respondent: Margaret Ashmore 15449409  Agent:

Nobody has yet come up with plans for roads and other transport needs MM27, MM41, MM42, MM48. You as a Council know how important it is to get this done IF your plans are to go ahead. At present the current roads cannot take any extra traffic, all roads into and out of the Villages will be complete gridlock. Please think very carefully what you want to destroy, such as Green Belt, Village Life, and the History of this area.

Attached documents:

Comment: MM48 - LPMM18/474  Respondent: Janet Tarbet 15454529  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy
The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

---

**Comment:** MM48 - LPMM18/4142  **Respondent:** Pauline East 15468705  **Agent:**

MM27, MM41, MM42 & MM48 Transport Strategy.

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s plus of course Gosden Hill and Wisley/Ockham are major and not adequately addressed with the proposed A3 changes etc.

It will I feel result in thousands more cars daily using Send Barns Lane and Send Road going to/from Woking etc past schools, medical centre and shops with major delays and gridlocks, noise and air pollution all to an intolerable and unacceptable level for our village.

Attached documents:

---

**Comment:** MM48 - LPMM18/4180  **Respondent:** Zoe Kollov 15468833  **Agent:**

I object to MM27, MM41, MM42 and MM48 Transport Strategy because:

- The traffic implications for Send as a result of proposed changes at Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC has performed no proper assessment of the resulting aggregate traffic and the way that this will build up to every working day causing pollution, delays gridlock and noise.

I object to the proposal to inset Send Business park from the green belt because;

- It will generate further traffic that will clog up the area to the detriment of all those currently living here
- It is an area of outstanding beauty and is quite rightly protected as green belt that would be completely destroyed by this change
- There is no exceptional circumstance why the current green belt allocation should be changed for this purpose

I object to policy A42 change at Cockbarn in tannery lane because:

- I believe it should not take place in the first place, however a further increase in the number of homes is proposed which make the situation even worse
- The traffic in this area is getting worse and especially at the A247 junction
- Green belt land is protected in law and I see no reason that it should be built on.

The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

I have three Grandchildren who live on SendBarns Road and I despair at how their lives will be affected.

Attached documents:

---

Comment: MM48 - LPMM18/4191  Respondent:  Richard Golding 15509057  Agent:

**MM27 MM41 MM42 and MM48 Transport Strategy**

Guildford Borough Council has given no thought to the traffic implications of all this excess development proposed for the local area. The local roads are already approaching gridlock, the A3 really suffers in peak period, the proposed changes to the Clandon slip roads will only make the A3 worse, I suppose traffic lights will be used to reduce the flow on to the A3 with even more problems in Send.

Attached documents:

---

Comment: MM48 - LPMM18/4450  Respondent:  Hazel Thompson 15571745  Agent:

**MM27, MM44, MM42 and MM48, Transport Strategy**

I have already discussed concerns about the local infrastructure and in particular in the additional traffic to surrounding roads. The proposed changes are not adequately addressed by the A3 and Clandon slip roads. There is great concern about local roads. There is no evidence of robust structured assessment of local roads, in particular Sendmarsh Lane, Send Barns Lane and Send Road as traffic moves towards Woking.

Attached documents:

---

Comment: MM48 - LPMM18/4169  Respondent:  Karsten Kollov 15582817  Agent:

I object to MM27, MM41, MM42 and MM48 Transport Strategy because;

- The traffic implications for Send as a result of proposed changes at Garlicks Arch, Burnt Common, Clockbarn and Alderton's added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC has performed no proper assessment of the resulting aggregate traffic and the way that this will build up to every working day causing pollution, delays gridlock and noise.

Attached documents:
MM27. MM41. MM42 and MM48 Transport Strategy

Send is a highly congested village. My own road, Potters Lane, is evidence of this; in July my parked car was written off by a council van when the driver found himself boxed in by rush hour traffic and panicked, driving in to the side of my car and then reversing in to the front of it. 'Road rage' is becoming a serious problem in Potters Lane, with almost daily conflicts; this was not the case when I moved in five years ago. My question, therefore, is why has the potential effect of thousands of extra cars in an already heavily congested area not been taken into account? Nothing has been done to address this in the most recent document.

Attached documents:

Comment: MM48 - LPMM18/3692  Respondent: John Thompson 15591585  Agent:

I object to MM27, MM41, MM42, MM48 Transport Strategy

The cumulative impact on the traffic and pollution issues on the village, when all of the proposed developments at Garlick's Arch, Clockbarn, Alderton's Farm, Gosden Hill and Wisley and Ockham, is totally unacceptable. Our road systems are already heavily congested, especially at key points in the day. My daughter lives on Send Road where it is often difficult to enter and exit her drive because of the ceaseless flow of vehicles. Crossing the road is perilous. The pollution levels are a real cause for concern as I have a young grandchild. We already know that far too many of today's youngsters suffer from asthma, a direct result of the increasing levels of pollution. This can only be exacerbated if these proposals go ahead.

Comment: MM48 - LPMM18/4190  Respondent: John Thompson 15591585  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

Guildford Borough council has given no thought to the traffic implications of all this excess development proposed for the local area. The local roads are already approaching grid lock the A3 really suffers in peak period, the proposed changes to the Clandon slip roads will only make the A3 worse, I suppose traffic lights will be used to reduce the flow on to the A3 with even more problems in Send.

Attached documents:

Comment: MM48 - LPMM18/4518  Respondent: Ann Watkins 15603361  Agent:

None of these proposals will help an already chaotic traffic problem.

Attached documents:
MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications of the increased developments at Garlick's Arch, Burnt Common, Clockbarn and Alderton's have not been properly thought through. The proposed changes to the A3 and Clandon slip roads will not address the problems created by the extra traffic on top of the usual rush hour Woking commuter traffic congestion, causing increased noise, nitrogen dioxide pollution delays and gridlock.

MM9 Green Belt policy and MM27 MM42 MM48 Transport Strategy

The Green Belt should be protected and preserved for future generations. Wild life and walkers alike need our greenbelt areas and over development of our villages devastating the rurality of the area. I do not wish to live in a town, choked by increased volume of traffic with reduced places to enjoy nature, peace and a walk with my family and dogs.

Attached documents:

---

MM27 MM41 MM42 and MM48 Transport Strategy

- I would respectfully suggest that, although individual site allocations may in the outcome be judged by the Council to be without severe impact in the Strategic Road Network, my concern throughout has been for the traffic implications, primarily for Burnt Common Roundabout itself, as well as its converging roads including the road through Send, from the combination of extremely large developments at Wisley, Gosden Hill, Garlick’s Arch, commercial development at Burnt Common and the new north-facing sliproads.
- All will individually lead to new or changed traffic patterns with substantially increased volumes, congestion, noise, and fumes but the combined impact at Burnt Common roundabout merits your utmost confidence that it works without extreme consequences, particularly with the increases at Garlick’s Arch (MM41) and the commercial development at MM42.
- I have mentioned that the increased Garlick’s Arch will still create traffic via the roundabout to Send and Woking.
- In addition, even if the link road through Garlick’s Arch proves sufficient to divert southbound and eastbound traffic (from the Wisley development and Newark Lane), increased numbers from the Wisley development could choose to turn right at the Burnt Common roundabout and take a route to Woking and beyond, which is less tortuous than via Newark Lane. Importantly, traffic coming off the M25 and A3 North could also choose this route (particularly heavy vehicles?). In the same way the Gosden Hill development could lead to larger numbers heading to Woking from the south on the A3.
- The very fact that Guildford’s development figures could now include numbers to make up for Woking’s housing needs surely suggests there will be related increased movement that way.
- The vehicle figures could be in thousands through this small roundabout which will be the crunch point.
- I note that the statistics in response to the Inspector’s query 11.37 re the road through Send are shown in terms of annual average daily traffic and annual average weekday traffic.
• Have GBC projected all the above possible movements, including of course the additions at MM41, MM42 and MM44, to reflect scenarios of future peak hour travel, at Burnt Common roundabout and its feeder roads? It is at these times that the most impact will be felt by the most people in terms of queuing and emissions and local inconvenience and it is this which requires the most attention.

Attached documents:

Comment: MM48 - LPMM18/1653  Respondent: Shirley Bowerman 17308417  Agent:

Objection applying generally to MM27, MM41, MM42 & MM48. Transport Strategy,

The traffic implications for Send of Garlick's Arch, Burnt Common, Clockbarn and Aldertons when considered with nearby Gosden Hill and Wisley/Ockham are not sufficiently dealt with by the A3 changes and the Clandon slip-roads. The over-all effect of the total extra traffic on Send Barns Lane and Send Road does not appear to have been addressed, bearing in mind that thousands of extra cars and trade vehicles, combined with HGVs will be going to and from Woking every day, causing increased noise, pollution, delays and tail-backs.

Attached documents:

Comment: MM48 - LPMM18/4442  Respondent: David Banham 17321089  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, predominantly at peak times, causing increased noise, nitrogen dioxide pollution, delays and gridlock. Should you not think this is a problem I would invite you to recreate a commute from Send during rush hour times. I would not feel comfortable cycling with my children on the local roads should the proposed developments go ahead as the narrow roads, currently with no special provisions or lanes for cycling, will become too busy and dangerous to consider risking the lives of my children.

Attached documents:

Comment: MM48 - LPMM18/1115  Respondent: Gail Wicks 17328641  Agent:

MM27, MM41, MM42 and MM48 Transport Strategy

Guildford Borough Council want to implement changes to the A3 with a slip road south at Burnt Common/Clandon. This does not take into account the massive impact on Send Barns Lane and Send Road as thousands more cars and lorries etc head to Woking every day from the added nearby sites including Wisley and Gosden Hill. This will mean increased pollution, noise, delays and gridlock on these already busy roads. The rush hour will be intolerable as it is now when there is a problem on the A3 or M25.

Attached documents:
Comment: MM48 - LPMM18/3976  
Respondent: Andrew Hollis 17329025  
Agent: MM27, MM41, MM42 and MM48 Transport Strategy

Most traffic will use the existing roads, which already in the rush hour when there is a problem with the A3 or M25 or where there are road works, causes huge hold ups  this will be a continuous traffic jam if the new developments go ahead

S2 Revision of Housing Need

The Statistics office states that Guildford can achieve its housing need with 460 houses per year. and the consultancy firm, Barton Willmore states that growth can be achieved with 431 houses per year. Yet Guildford Borough Council and the Inspectorate are intending to plan for 789 houses per year. This figure must be looked at again and reduced in line with the latest growth figures.

Attached documents:

Comment: MM48 - LPMM18/2293  
Respondent: T Hodkinson 17370209  
Agent: MM27, MM41, MM42 and MM48 Transport Strategy

Opening new entry/exit slip roads off the A3 will overload Send Village, Send Barns Lane and Send Road with unacceptable levels of vehicular traffic, a lot of it HGV. The road network is unsuitable for this level of traffic and will give rise to unacceptable levels of pollution of all types. I therefore OBJECT.

I trust my concerns will be taken into account this time around.

Attached documents:

Comment: MM48 - LPMM18/4477  
Respondent: Nicola Banham 17380161

Comment: MM47 - LPMM18/3133  Respondent: Katherine Pound 17413729  Agent:

I OBJECT TO MM27, MM41, MM42 and MM48 Transport Strategy

As alluded to above, traffic in the area of Send is already at dangerous levels for the environment and health of individuals, most notably at peak time when it's often already at gridlock. It is ridiculous to consider adding thousands more cars to this chaos, which would result in significant noise and nitrogen dioxide pollution, which increases significantly with queuing traffic. This will significantly impact the time it takes me and other local residents to travel to work or school, which is not productive for the local economy, our well-being or the environment.

Attached documents:

Comment: MM48 - LPMM18/5086  Respondent: Paul Good 17417217  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock, as already stated in previous points. This area is unable to support increased residential traffic and is unsuitable for heavy commercial traffic.

In conclusion, development of this scale in this rural village will be detrimental to the character of this living space, and impact hugely on residents, there is insufficient consideration of the enormous size of development being placed in one small area of the constituency, as opposed to spacing out development, which would ease traffic overloading, decrease the escalating problem of pollution, share the increased strain on services; education, health.

I urge the planners to take these objections in to consideration and listen to the observations regarding these plans from the people who live and work in these areas and see each day how the infrastructure is completely inappropriate to support such huge development in squeezed into one small area of the borough.

Attached documents:

Comment: MM48 - LPMM18/4252  Respondent: Valerie Golding 17422881  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy
The amount of development proposed will bring major traffic problems to the area most properties have a minimum of two cars so the developments proposed would add another 1540 cars to the roads of Send. This excludes the development proposed for the surrounding area.

Attached documents:

**Comment:** MM48 - LPMM18/2535  **Respondent:** Simon Wright 17423681  **Agent:**

I object to Modifications MM27, MM41, MM42 & MM48 Transport Strategy due to the following points:

The result of proposed Local Plan development in the area of Send would cause so much traffic congestion, that the plans to improve the A3 and Clandon slip roads would not make any significant difference at all. The rural roads in the centre of Send / Send Marsh couldn't cope with the extra traffic. Regardless of traffic surveys that have been carried out in recent months and years, it doesn’t take much to realise it.

Attached documents:

**Comment:** MM48 - LPMM18/4091  **Respondent:** Reverend Ruth Broithwell 17424705  **Agent:**

MM48

The proposed A3 changes and Clandon Road changes do not provide adequate support for the changes that would be incurred through this development suggestion. No assessment has been advised to us as loyal council tax payers regarding it. Roads towards London and Woking are very heavy every day already as I know from commuting. This situation can only add journey time, increased pollution and gridlock within the villages environments.

In sending these objections I would further add that this consultation has not permitted mention of the further developments proposed in our village. There is a strong feeling of being singled out and yet for what reason?? This village is important as a residential area, a commuting area to London producing wealth for GBC, an employment area within GBC whilst maintaining it's community and provision of local amenities. It is based on a historical foundation, parts of it dating back to Doomsday and beyond. The proposed developments are out of synch with the needs of the council which can be realised through more equitable sharing throughout its geography.

Attached documents:

**Comment:** MM48 - LPMM18/2624  **Respondent:** Gregory Webb 17424801  **Agent:**

MM27, MM41, MM42 and MM48 Transport Strategy

The proposed Garlicks Arch, Alderton’s Farm, Clock Barn and Winds Ridge developments mean that 770 houses are proposed to be added to the current stock of 1700 currently in Send – an increase of 45%. This in itself is excessive and disproportionate in the context of Send’s size within the Borough. Send needs to be treated fairly and it currently seems as though the village is being singled out for development by the plan.
However, the huge increase in traffic that these developments, the industrial developments that are proposed in Send and the large developments at Gosden Hill and potentially Wisley/Ockham are not adequately addressed by the modifications referenced above.

A full assessment of the changes resulting from the proposed access on and off the A3 from Clandon Road has not been completed. **At present** residents of Clandon Road may wait more than 5 minutes to leave their drives during commuting periods. Would I ever be able to leave for work if these developments proceeded? The scale of development proposed in Send and Burnt Common, the limited capacity of local roads and the proposed introduction of new access to the A3 will be catastrophic for the local area and the Borough as a whole.

I most strongly urge the Council to rethink the Local Plan, stand up to central government if the planning policies for England are not appropriate for Guildford, and to provide a just and reasonable outcome for its citizens.

**Comment:** MM48 - LPMM18/4718  **Respondent:** Darren Moss 17426593  **Agent:**

5. MM27 MM41. MM42.and MM48-Transport Strategy.
This area is already very heavily congested! There has been no investigation into the effect caused by 1000’s more cars on these local roads. Why?
The increased traffic for Send from Burnt Common Garlicks Arch, Aldertons, Clockbarn in addition to Gosden Hill and Wisley, Ockham will bring the area more regularly to a standstill and has not been adequately addressed by the Road changes to the A3 and Clandon Slip Roads. It will become impossible for residents of Potter’s Lane to actually leave their driveways or pull out into the flow of traffic. There are many high-sided, wide and heavy goods vehicles who take up the entire width of the Potter’s Lane as they steam down the road ignoring any other vehicles and the speed limits. It is a daily occurrence that residents , trying to access their homes both as drivers and pedestrians, are verbally abused, cars damaged and are at risk of being run over as drivers regularly mount the pavement to get down the lane. I have witnessed this personally and it continues to get worse and this over development of Send will only exacerbate this.

This massive increase in traffic rat running to and from Woking along Potter’s Lane, Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock. We will become PRISONERS IN OUR OWN HOMES!

MM27 MM41 MM42 and MM48 Transport Strategy

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry and there are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focused on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

Attached documents:

Comment: MM48 - LPMM18/1810  Respondent: Samantha Gilchrist 17495393  Agent:

1. The Clandon Society Objections and Concerns Which I Share

The A247

I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road.

The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (eg through East Clandon) which will be used to avoid the inevitable traffic build ups on the A247.

I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1 million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manoeuvres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem viz. the widening of the Boxgrove Rd. bridge. It is already the intention to build a station next to the bridge.

The £1 million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.

I believe that traffic will increase significantly because:
1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic.

2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247.

3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh.

4. The development of 1800 houses at Gosden Hill.

5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.

6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.

7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go south of Guildford to use the A247 - potentially an easier route than any existing.

8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.

9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.

10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway).

2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph.

3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.

4. The sight lines for the exit of the Onslow Arms car park.

5. The narrowness of the road near Summers.

6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement.

7. The sharp bend near Clandon Regis.

8. The narrowness of the road at the Bull’s Head.

9. The Clandon Junior School and the, in places, narrow footpath for children walking to school.

10. The sharp bend with poor sight lines in either direction at the church.

11. No continuous footpath through the length of the village.

12. The speed of traffic.

13. The classification as an A-road without it having the capability of an A-road.

Housing Number and the Green Belt

The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt.

The Council has long argued that much of the housing required must be built on such sites.

This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker.
The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites.

Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

It is obvious that with the above policies & strategies are still reflecting directly from what has gone before; amending & increasing on the Local Planning Foot Print. These changes are shown in shaving bits off here and adding bits to there.

These amendments:

- Still disregards all technical impacts on current & future structures. Most structures sit on a deep clay base which needs peckedulated ground water to function as a foundation base.

- Tweaking weak infrastructures, no way puts in place any future proofed infrastructures.

- Increasing these capacities will greatly increase all impacts on environment. Not all of which is yet to be fully understood or been considered.

- Concreting over "Green Belt" is just not on, now or anytime in the future. We all complain about the forests in South America being cut down, along with plastic waste; this is no different.

- The impact of such large developments, will swamp Send & all surrounding areas. If Wisley was a no no; then these proposals are doubly bad.

- So what part of NO, does the current dominant political power not understand?

- It seems as if the first judgement, common sense (Wisley) went against the current political-monied power houses. How strange that with a new judge conforms now to their wishes. How did all this happen?

- Stop faffing about! Ask the local populous "What they want to happen by holding a Local Referendum." Just like Switzerland.

MM27, MM41, MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to the nearby Golden Hill and Wisley / Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC
offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Attached documents:

**Comment:** MM48 - LPMM18/653  **Respondent:** Cam Pulham 20622913  **Agent:** MM27, MM41, MM42 and MM48

This strategy, although considering the access onto the A3, does not consider the impact on local roads. As it is, these roads are already heavily congested and leads to poor air quality for residents. The slips roads may well be an improvement, but it is not offset by the proposed changes listed elsewhere.

These roads are not policed for speed and residents are already subjected to high noise levels through speeding traffic and high speed motorcycles. The congestion may also lead to an increase in accidents and a further slowing down to the response time of emergency vehicles.

These are my objections to the plans which I hope will be documented.

 Attached documents:

**Comment:** MM48 - LPMM18/665  **Respondent:** Elsa Pulham 20623329  **Agent:** MM27, MM41, MM42, MM48

The planned road strategy, which allows for more and safer access onto the A3, will only serve to cause more congestion on local roads which are already overloaded at peak times. As these roads are rarely policed, this already leads to speeding and pollution to local residents.

These are my objections to the current modification to the plan.

 Attached documents:

**Comment:** MM48 - LPMM18/677  **Respondent:** Stephen Harnor 20624417  **Agent:** MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking and the A3 every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

 Attached documents:
The Clandon Society is the Residents’ Association of the villages of East and West Clandon.

The Association is restricting its comments in this consultation to matters which could directly affect our residents.

The Association is very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Association expressed its concerns in the strongest terms, pointing out the inadequacies of the road. The major modifications now proposed to the Plan will bring additional pressure on this road.

The Association welcomes the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 (MM48) and the amount of development proposed in the area nearby. (MM41, MM42, MM44, MM35.) However, residents are of the view that the provision of £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the likely traffic.

Residents do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available, if indeed it is technically feasible.

We believe that in a few years time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs when traffic diverts because of congestion on the A3. This was pointed out in detail in previous submissions by the Association, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint but this is not a unique problem viz. the widening of the Boxgrove Road bridge. It is already the intention to build a station next to the Merrow Lane bridge.

The £1million funding could with advantage be used to make the A247 safer.

Why do we believe that traffic will increase significantly?

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic. (MM42).
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247. (MM41).
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh. (MM44).
4. The development of 1800 houses at Gosden Hill. (MM35).
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. (A43a). The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247-potentially an easier route than any existing.
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic- presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247

The Association reiterates its belief that the A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 S-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump
4. The site lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries and buses being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and in places the narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

Attached documents:

Comment: MM48 - LPMM18/733  Respondent: Christina Reeves 20634753  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for the above proposed developments added to nearby Gosden Hill, Wisley and Ockham have not been properly addressed by the A3 changes and the Clandon slip roads. Guildford Borough Council offer no proper assessment of the combined traffic on Send Barns Lane and Send Road when hundreds more cars use the roads every day, causing more pollution, noise, delays and gridlock.

Attached documents:

Comment: MM48 - LPMM18/816  Respondent: Clive Sewter 20642081  Agent:

I object to MM27 MM41 MM42 and MM48 Transport Strategy because:-

Currently, heavy traffic from the A3 already heads up to Woking through Send and even small roadworks cause major traffic jams, particularly at rush hour. This will be exacerbated when the proposed changes to the A3 improvements take place. With the extra industrial and housing developments in the areas mentioned above, Send will become regularly gridlocked.

Attached documents:
**Comment: MM48 - LPMM18/828  Respondent: A.A.D Andrews 20642561  Agent:**

MM9 Green Belt Policy, MM27, MM41, MM42 and MM48 Transport Policy - I object

I think the planning committee pays no attention to Green Belt and public transport they just want [unreadable text] increased noise, nitrogen dioxide pollution, delays and gridlock plus there are other developments coming up. We need less houses and more amenities. These plans are rubbish.

**Attached documents:**

**Comment: MM48 - LPMM18/985  Respondent: Carmen Niblett 20658817  Agent:**

**MM27 MM41 MM42 MM48  Transport Strategy**

The traffic implications for Send of the extra traffic generated by Garlick's Arch, Burnt Common, Clockbarn and Alderton's will have a totally detrimental effect in the area which already is over used by traffic from A3 and Clandon and Woking commuters.

GBC is offering solutions on paper but for the last 20 years of people and car growth in that area has been ignored by GBC.

I have lived in the Send area for 35 years and I can categorically confirm that nothing has changed in that time, except for the replacement of the bridge at the end of Send Road, which now permits higher number of articulated lorries to travel along the Send Road to Ripley, the A3 and Clandon (as the old bridge couldn't cope before with the weight or width of these lorries).

This increase traffic through Send put children, vulnerable people and adults at risk of accidents when crossing the road to either go to school or to the shops or for a walk.

The traffic on the Send Barns Lane and Send Road are usually at a stand still, especially at key times, when children are walking to school. Air pollution is a terrible danger to our children and we should be minimising this risk instead of adding thousands of more cars to our roads.

I would request that you supply details that show you are being fair and reasonable to all village councils in the Guildford Borough in a form that shows existing number of houses in that area and the number of new applications ( as a total number of houses ) and express this as a percentage %.

This would then show that the GBC are being fair across the whole county. Instead it will show that GBC are being totally unfair and overburdening SEND village with their insistence in putting all their "eggs" in SEND's basket.

A very very concerned resident.

**Attached documents:**

**Comment: MM48 - LPMM18/997  Respondent: Mrs E.E. Wheatley 20659073  Agent:**

Objections.

A) Traffic implications are horrendous

B) No assessment apparently of the impact locally of gridlock, delay, noise, air pollution and general anger and frustration of local residents. Do we get any consideration from [unreadable text]

Attached documents:

Comment: MM48 - LPMM18/1054  Respondent: Theresa Gianotti 20663393  Agent:

MM27 MM41 MM42 and MM48

• Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads; and
• No proper assessment of the traffic impact with thousands more cars in the area every day adding to increased pollution, noise, delays and gridlock.

Please don't allow our rural community to be destroyed by overdevelopment.

Attached documents:

Comment: MM48 - LPMM18/1098  Respondent: Marc Lippiett 20664481  Agent:

MM27, MM41, MM42, MM48 - Transport Strategy

- Traffic congestion is a significant issue in the area (Send, Ripley and Woking) and there are currently significant delays caused every day on the way to school and work. The current plans do not provided clarity on how these critical issues will be avoided.

- Supposing that the traffic congestion issue can be mitigated in an acceptable way, there will be no avoiding the noise and air pollution and associated impact on the quality of life for local residents

Attached documents:

Comment: MM48 - LPMM18/1273  Respondent: Alstair Haxton 20676417  Agent:

MM27, MM41, MM42, MM48 Transport Strategy

The excessive increase in cars with resulting extensive delays, gridlock, noise and nitrous dioxide pollution have not been properly assessed.

Attached documents:
As with the previous local plan GBC has failed to address the increased traffic implications for the local area. It's all very well proposing two new A3 sliproads but the traffic still has to go somewhere. There has been no proper assessment by GBC of the impact on additional traffic, noise, pollution, delays and likely gridlock. What have they actually been assessing on in the last few years? This uncertainty has gone on too long and yet again GBC has failed to engage in an open and transparent manner with local residents.

Attached documents:

I object to these; I do not believe that the traffic implications for the various Send sites (Garlick's Arch, Burnt Common, Clockbarn and Alderton's) are adequately addressed by the A3 changes and local slip roads. There will be a very significant increase in traffic along Send Barns Lane and Send Road with thousands of additional cars likely to use these daily to go to and from Woking, a route that is already often blocked with traffic jams.

Attached documents:

Traffic implications are not adequately addressed by the A3 changes and the Clandon slip roads. The increase in noise, pollution, delays and gridlock as cars drive through to Woking would be terrible. How you can let that happen past a PRIMARY SCHOOL?

Attached documents:

The roads in and around Send, Send Marsh, Ripley, Burnt Common etc are already running at capacity. They will not cope with the addition of what potentially would be hundreds if not thousands more cars; never mind the hugely negative impact on the environment; has this been considered?

This massive increase in traffic of all types of vehicles, not just cars, heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise and air pollution. Furthermore delays and gridlock are going to be worse than they already are.

Attached documents:
Comment: MM48 - LPMM18/1723  Respondent: Richard Duddy 20700801  Agent: 

How are these proposals going to improve the already crowded roads and reduce the current high pollution levels, because certainly your transport strategy MM27, MM41, MM42 & MM48 does not deal with these issues.

Attached documents:

Comment: MM48 - LPMM18/1792  Respondent: Dr R S Mackinnon 20701633  Agent: 

1. The Clandon Society Objections and Concerns Which I Share

The A247

I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road. The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (e.g. through East Clandon) which will be used to avoid the inevitable traffic build-ups on the A247. I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north-facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1 million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manoeuvres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents. What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem. The £1 million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.

I believe that traffic will increase significantly because:

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic.
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247.
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh.
4. The development of 1800 houses at Gosden Hill.
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North-facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247. The conversion of the Burnt Common roundabout to an all-ways junction with the A37. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing.

A statement from GBC...
that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.

10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247

The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The sight lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

Housing Number and the Green Belt

The recent release of information from the ONS must cause a recalculation of the housing requirement. In turn, this requires a reconsideration of the policy of taking sites out of the Green Belt. The Council has long argued that much of the housing required must be built on such sites. This argument is not supported by the NPPF or ministerial statements and if the housing number is decreased the argument becomes even weaker. The attendees at the AGM of the Association heard a very cogent case presented by the Guildford Vision Group for much more of the required development to occur in the town on brownfield sites. Coupled with modal shift these proposals offer the prospect of more manageable traffic levels, improved prospects for the town centre and reduced pressure on the Green Belt.

Attached documents:

Comment: MM48 - LPMM18/2388  Respondent: Mrs Audrey Carpenter 20702561  Agent:

MM27 MM41 MM42 MM48 TRANSPORT STRATEGY

Has a proper assessment of the traffic impact on Send Barns Lane, Send Road been made as thousands of new cars head to Woking every day. Again causing increased noise, air pollution and delays.

I hope the above points will be seriously taken into consideration.

Attached documents:

Comment: MM48 - LPMM18/1883  Respondent: J A Aldridge 20703521  Agent:
MM27, MM41, MM42 and MM48 Transport Strategy

The proposed changes in the A3 and Clandon slip roads do not adequately address the impact of thousands more cars travelling along the Portsmouth Road, Send Barns Lane and Send Road past a school and through residential areas, with resulting noise, delays and gridlock and more severe pollution. The infrequent bus services in the area will do nothing to reduce the number of car use.

In general these proposals place a heavy load on Send and, in the light of recent reports that the Guildford area does not require such a high level of development as originally thought, are unreasonable and unjustified.

Attached documents:

Comment: MM48 - LPMM18/1931  Respondent: Nigel Blake 20704577  Agent:

There does not seem to have been any proper assessment of the impact on Send Road and Send Barns Lane of the large amount of additional traffic that will be generated by the aggregate of all the developments proposed in the plan. Traffic gridlock and potential increase in road accident injuries seems to have been ignored in the rush to build new houses at any price. This is not acceptable. Send road heading to Woking is frequently at a standstill in rush hour near the New Inn pub. It will be a total car park if the new development proceed. Send cannot absorb this amount to new development.

Attached documents:

Comment: MM48 - LPMM18/2114  Respondent: Zach Drennan 20708481  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

- I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM48 - LPMM18/2185  Respondent: Barry Konkle 20712385  Agent:

MM27 MM41 MM42 and MM48 Transport Strategy

I object. To GBC offering fine words, but no real assessment of the traffic impact in Send Barns Lane, Send Road. Vehicles heading to Woking and vehicle from Woking making their way Send and Ripley to gain access to the A3 both North and South bound.

Attached documents:

Comment: MM48 - LPMM18/2231  Respondent: Alan A. White 20720737  Agent:
MM27 MM41 MM42 MM48 Transport Strategy.

Guildford B.C. have produced, what they call a Transport Strategy, without addressing the wider vehicle movement problems. The Leader of Guildford B.C has already acknowledged in public that the area has significant congestion and transport problems and yet still adds his name to policies that are clearly flawed.

The traffic on the North Bound A3 backs up from the M25 junction, "rat running" takes place off the Burnt Common exit and through Ripley village. This has not been referred to in any document.

The Southbound traffic backs up from Stag Hill to the Burpham Junction exit. This has not been referred to in any document.

None of the roads surrounding Send were designed to take large volumes of traffic. They were and still are, in effect, village streets, despite their A road classification.

Burnt Common roundabout will be gridlocked by the increase in the number of vehicles, of commuters, school run drivers and the manoeuvring of HGV vehicles visiting the proposed new industrial site at Burnt Common, and the new units in Send Business Centre.

Emotionally this is a Transport Strategy for disaster.

These OBJECTIONS are based on facts and it would be naive for Guildford B.C. and its associated developers to think that it is truly doing the residents of Send a huge favour.

Attached documents:

Comment: MM48 - LPMM18/2281  Respondent: Ruby Pyne 20722721  Agent:

MM27, MM41, MM42 AND MM48, TRANSPORT STRATEGY

• I object that GBC has failed to assess the implications of excessive and unwarranted development on traffic and infrastructure of traffic driving through Send each day.

Attached documents:

Comment: MM48 - LPMM18/2336  Respondent: Stephen Hewett 20726113  Agent:

REF - MM41, MM42, MM44, MM9, MM27, MM41, MM42 and MM48

I "object" in the strongest possible terms to the proposed developments on the above mentioned REF's for many and [unreadable text] reasons that have been waived before many thousands of [unreadable text] in the form of protest letters and emails that now seem to have been ignored.

At least 2 of the above mentioned sites are on Green Belt Land. What is the point of a Green Belt if you chose to ignore it.

The original purpose of the Green Belt was to prevent unrestricted development on and around the main road and rail amenities around London and at the large towns and cities. A very considerable policy of which until now it has been
largely successful. This policy has seen to be abandoned by these proposals. Ripley state school is to be closed so where are all these new children supposed to go to school.

Send in particular seems to be singled out for such contained action. Why is this; is it because the Ripley, [unreadable text], East + West-Horsley they have had the courage to stand up to the bully boy tactics of GBC planning. Led by the inspiring leadership of Sue Parker and others in the 'Green Belt Group' these people are standing up to the G.B.C planning juggernauts made up of "TORY + LIB-DEM [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] this unholy alliance of [Response has been redacted due to statements being considered defamatory, derogatory, inflammatory or offensive in nature] characters seem to have no feelings for local concerns, but are hell-bent on making money and getting revenge on people who have the courage to stand up to them. I ask you to think again and reject these [unreadable text] proposals.

PS Is Send being so certainly [unreadable text] because Sue Porter is a Send Borough Councillor and Green Belt group leader and founder!!

Attached documents:

Comment: MM48 - LPMM18/2360   Respondent: L Smith 20729793   Agent:

I object to: MM27, MM41, MM42 and MM48 Transport Strategy

- The impact of traffic for Send of Garlick's Arch, Burnt Common, Clockharn and Alderton's added to the nearby Gosden Hill and Wisley/Ockham will not be adequately addressed by the A3 changes and the Clandon slip roads
- There has been no effective traffic impact assessment

I object to any removal of villages from the Green Belt

I object to the disproportionate amount of development in one area of the Borough

I object to the lack of any evidence for the alleged housing need numbers

I object to the blatant ignoring of the well-established policies of the Green Belt (NPPG 79-83) to protect open space, prevent encroachment into the countryside and stop linear development leading to the joining together of developed communities have been ignored in the proposals for Send. This plan will produce a huge overload on local and main roads, overcrowd our schools and put enormous pressure on the local surgery and hospitals. It will effectively join Send and Burpham along the A3 creating exactly the type of urban sprawl the Green Belt was set up to defend against

I OBJECT to the fact that this plan represents a terrible sentence for our village. We are destined to become a suburb of the conurbation of Guildford and Woking. NPPG 83 states that the Green Belt should only be altered in "exceptional circumstances"

THERE ARE NO EXCEPTIONAL CIRCUMSTANCES

MM27, MM41, MM42 and MM48 Transport Strategy

- There has been no adequate assessment by GBC of the impact of this transport strategy on congestion, noise pollution and air pollution as thousands more cars head to Woking each day. There is the possibility of gridlock

Attached documents:

Comment: MM48 - LPMM18/2702  Respondent: Roger Parslow 20768001  Agent:

My initial objection is to: MM41,MM42,MM44,MM9, MM27. POLICY S2.
At the public examination the figure for Guildford.B.C. housing need used by the inspector was 789 per year. This figure was obtained by G.B.C Consultants and was greatly exaggerated by including Surrey University Student figures. These Consultants and GBC refused to disclose how this figure was calculated.

The figure now published by a highly respected consultancy Barton Wilmore has said the correct figure is 431 houses per year.

The data from the Office of National Statistics, doing population forecasts says the appropriate growth in GBC can be achieved by 460 houses per year.

This latest data makes a mockery of G.B.C consultants figures which have always been very suspect.

I trust the Inspector and GBC will now drastically reduce the housing need to reflect the true figures, and particularly in our already very congested village of Send.

MM27. MM41. MM42.and MM48 Transport Strategy.
Why have the effect of thousands more cars in an already heavily congested area not been taken into account ?

The increased traffic for Send from Burnt Common Garlicks Arch,Aldertons ,Clockbarn in addition to Gosden Hill and Wisley Ockham is not in any meaningful fashion addressed by the Road changes of the A3 and Clandon Slip Roads. They seem both the developers and GBC to offer narrative and not action.

This massive increase in traffic of all sorts heading to and from Woking along Send Barns Road and Send Road will cause horrendous noise, air pollution delays and gridlock.

MM41 Land at Garlicks Arch,Send Marsh,Policy A43.
I object to the increase from 400 to 550 houses of which 450 are to be built in the first 5 years.
This is an increase of 37% in the number of houses to be built.

Despite the promises by the developers and GBC the ancient woodland after hundreds of years of peace will be ruined once the fuss has died down and nobody is checking. This over development will effectively join Ripley to Send, and spoil the wisdom of our Green Belt Planners of many years ago.

Up to a thousand cars and between 1600 to 1700 extra people will block the surrounding roads and overwhelm the already full to capacity schools and health facilities, sewage, water etc.

Why have over 7000 objections to the earlier plan been ignored and more houses etc added ?

MM42. Land at Burnt Common,London road Send Policy A58.
As the Employment Lands Needs Assessment showed a reduction in demand for Industrial Land why has again Send been picked on again to have the largest industrial allocation in any village in the Borough, is it politics ?

This is a further increase of 25% making it a huge increase in Send , bigger than any other village.

There is no need for new industrial sites when Slyfield is has unused capacity There are NO SPECIAL CIRCUMSTANCES so it contradicts MM9.

There is no need to put Industrial premises in our precious GREEN BELT. This plan has since being deleted from 2014 plans, has been increased twice from 7000 to a MINIMUM of 14800 sq m.

MM44 Land at Aldertons Farm, Send Road, Policy A63.
New site for 120 homes which was deleted because of objections and not reinserted until the public examination in JULY. With Garlicks Arch 550, Clockbarn 60, Winds Ridge 40, that means 770 houses to the 1700 currently in Send AN INCREASE OF 45%

How are our roads, sewage, water, healthcare, schools etc going to allow us to live normal lives in this polluted gridlocked stressful environment. Again this is GREEN BELT and with NO special circumstances and contradicts policy MM9.

**MM9 GREEN BELT POLICY.**
How can you say the modifications claim to protect our precious GREEN BELT except in very special circumstances? GBC make an exception for LIMITED INFILLING OUTSIDE THE IDENTIFIED SETTLEMENT BOUNDARIES WHERE IT CAN BE DEMONSTRATED THAT THE SITE SHOULD BE CONSIDERED TO BE WITHIN THE VILLAGE.

This is a catch all statement which is completely subjective causing complete uncertainty and completely negates GREEN BELT PROTECTION. Virtually any land on the then ever increasing edges of the village can be picked off by developers and is open season for speculators at the expense of villagers.

I wish the above objections to be considered and this huge imposition of housing and commercial development to be largely abandoned.

**MM27 MM41 MM42 AND MM48 Transport Strategy**

Any plans involving developments in this area must take into consideration the huge developments now taking place in Woking, which will act as a magnet for vehicle traffic both to and from all surrounding areas. Residents of the new houses will inevitably want to take advantage of the new shopping and employment opportunities in Woking. Projects like Victoria Square and the St Dunstan's tower block, already well advanced, will generate traffic both into Woking and out to the Surrey countryside, and the A247 through Send towards Newlands Corner, and Dorking etc. This can only lead to greater traffic congestion.

The traffic implications on the local roads will result in in excessive congestion as well as the local trunk roads

**Attached documents:**

---

**Comment:** MM48 - LPMM18/3408  **Respondent:** Brian & Helene Pavey 20789921  **Agent:**
MM27 MM41 MM42 MM48.: this proposal will impact negatively on the traffic within our village. We already have gridlocked roads when there is a problem on the A3, we have speeding cars, thundering lorries and traffic build ups. This village needs less traffic coming through it not more. In Potters Lane where we live it is a speed run for cars accessing the A3, with weekly aggressive road rage witnessed by us the residents. We do not need anymore traffic damaging our roads and putting lives at risk.

**Comment:** MM48 - LPMM18/3424  **Respondent:** Sally Anderson 20790081  **Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

The traffic implications for Send of Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s added to nearby Gosden Hill and Wisley/Ockham are not adequately addressed by the A3 changes and the Clandon slip roads. GBC offer fine words but no proper assessment of the aggregate traffic impact on Send Barns Lane and Send Road as thousands more cars head to Woking every day, causing increased noise, nitrogen dioxide pollution, delays and gridlock.

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

Attached documents:

**Comment:** MM48 - LPMM18/3436  **Respondent:** Paul Kenny 20790305  **Agent:**

MM27 MM41 MM42 and MM48 Transport Strategy

MM27 / MM41 / MM42 / MM48 – Transport Strategy

The transport / traffic strategy confirms that cycling routes need to be vastly improved and protected, as current ‘flow’ is not good enough

Regarding road (vehicle) traffic, the Transport Strategy is not robust and not truly reflective of the needs and concerns of our highways infrastructure

With so many recent developments (Skene Close in Send, Vision Engineering, Clockbarn/marina in Tannery Lane), the main road through Send has struggled

Having temporary lights has become a regular feature, and continues even today (4-way lights at the A247 junction to Old Woking, and along Portsmouth Road into Ripley)

Send is a VILLAGE, not a town – and the main road through Send regular gets clogged with traffic, and backs up most mornings and evenings – in both directions

The Local Plan attempts to address the issue of transport, but is inaccurate in several places (eg ‘on most local roads in urban areas and in villages, there is at least one footway, usually two’)

Other than the main routes out of the village (which are already under pressure), most roads are in fact lanes, often with no footways at all (eg Polesden Lane, parts of Vicarage Lane & Potters Lane)

Many other routes are lanes which cannot accommodate free-moving two-way traffic (Newark Lane, Burnt Common Lane, Rose Lane, Send Hill, Woodhill, Potters Lane, Church Lane, Vicarage Lane)

The existing bends around Potters Lane / Send Hill are already treacherous, with several blind corners and narrow apertures – these need attention already, not more traffic volume!
Overall, the slightest developments can create significant traffic, pollution, delays and backlogs, putting more pressure on people using ‘back roads’ (ie lanes) and clogging up the villages.

**Comment:** MM48 - LPMM18/4874  **Respondent:** Anna-Louise Clough 20833537  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

- No recognised assessment has taken place for increased volume of traffic, noise and air pollution.

Attached documents:

**Comment:** MM48 - LPMM18/4920  **Respondent:** Nicholas Brown 20834593  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

All of the above proposals will involve a considerable increase of traffic on roads which are already inadequate for the amount of traffic they carry. There are no proposals which will alleviate or improve the situation in the face of the concentration of building activity which seems unfairly to be focussed on Send.

GBC appear to want to merge the villages of Send to Ripley into one and adopt an aggressive building policy which will change them from villages into towns.

There is no improved traffic policy or any plans to upgrade or improve roads or bus routes.

Currently buses run one an hour to Woking and so people are forced to use cars.

Attached documents:

**Comment:** MM48 - LPMM18/5120  **Respondent:** Richard Smith 20841889  **Agent:**

**MM27 MM41 MM42 and MM48 Transport Strategy**

- I strongly object to the proposed transport strategy, which contains fine words but no solution to the traffic chaos that will result as a consequence of the proposed developments at Garlicks Arch, Burnt Common, Clockbarn and Alderton’s Farm together with Wisley/Ockham and Gosden Hill.
- The existing M25 junction is unable to cope with current demands and needs to be redeveloped just to satisfy this demand. The proposed redevelopment will resolve the existing problem only and is very unlikely to be sufficient to meet the demands created by the proposed developments listed above in aggregate.
- The A3 already backs up to the Clandon slip roads during the rush hour due to the lack of a ring road or other credible alternative for traffic travelling through Guildford. The Portsmouth Road passing through the historic and beautiful village of Ripley is already a nightmare to join or cross during the rush hour due both to the number of cars using the old A3 through Ripley as a work around for the congestion on the A3 backing up from the M25 and the number of cars using the village roads to provide a link between Woking and Guildford.
already. The proposals will simply make these problems worse by adding more traffic than the proposed Transport Strategy will solve.

- The significant increase in traffic will impact greatly on Send Barns Lane, Send Road, Ripley High Street, causing considerable delays, excessive pollution and gridlock. The suggested improvements will condemn the local population and many other travellers to months, if not years, of misery while they are being implemented, all to meet a demand which appears to be the invention of local politicians seeking to increase their fiefdom and unsustainable Government policies on immigration.

Attached documents:

- I object to this transport strategy as the increase in traffic impications due to the proposed site at Garlick’s Arch, Burnt Common, Clockbarn and Alderton’s Farm together with Wisley/Ockham and Gosden Hill appear not to have been properly addressed by the changes to the A3 and Clandon slip roads.
- The significant increase in traffic will impact greatly on Send Barns Lane, Send Road, Ripley High Street, causing considerable delays, pollution and gridlock.

Attached documents:

Comment: MM48 - LPMM18/6261  Respondent: Hazel McGee 20850017  Agent: I OBJECT to the Modified Local Plan as a whole as I believe it is fundamentally unsound because:

1. Guildford Borough Council has not properly observed its hierarchy of development. Brownfield opportunities, especially in the town centre, have not been fully exploited
2. There is too much reliance on A3 improvements and these are beyond the council’s control
3. The town centre policy, S3, is inadequate and also does not address the infrastructure deficit
4. The grounds for Green Belt development are inadequate and do not fulfil the criteria for ‘exceptional circumstances’.

I would like the Inspector to RE-EXAMINE the Local Plan because:

1. There has been a number of major changes made to the Plan by the Council which have changed it significantly, including, but not exclusively, the editing of D1 and removal of D4, and the addition of new housing and increased commercial development on the Green Belt
2. New figures and projections for housing numbers have been released by the ONS which clearly demonstrate that the housing number in the Local Plan is too high

In case Guildford Borough Council is not prepared to accept my request in Section A above I am including the key points made by those three organisations in my full objection to the Modified Local Plan below:

The Clandon Society Objections and Concerns Which I Share

The A247
I am very concerned that the latest modifications to the Plan will put even more pressure on the A247 through West Clandon and Send. In the previous consultation, the Clandon Society and others expressed concerns in the strongest terms, pointing out the inadequacies of the road.

The major modifications now proposed to the Plan will bring additional pressure on this road, and surrounding roads (eg through East Clandon) which will be used to avoid the inevitable traffic build ups on the A247.

I welcome the recognition in the proposed modifications to the Plan that problems will be created for the A247 by the north facing slip roads to the A3 and the amount of development proposed in the area nearby. However, the provision of a £1million of developer funded mitigation measures for the A247 through West Clandon will not change the fact that the A247 through West Clandon does not have the capacity to deal with the increase in traffic.

I do not believe that increasing the carrying capacity of the road is realistic because of the close proximity to the road of listed structures and other buildings and the limited width available - if indeed it is technically feasible.

I believe that in a few years’ time the traffic will be stop-start heading to the A3 during the morning peak and similarly in the evening peak away from the A3. Such congestion already occurs on the A247 when traffic diverts because of congestion on the A3 and leads to dangerous manoeuvres with lorries and coaches mounting the pavements. This was pointed out in detail in previous submissions by the Clandon Society, the Parish Council and many residents.

What is needed is an alternative route for traffic. The Plan calls for Merrow Lane to be modified in conjunction with the Gosden Hill development so that it connects to the A3. Together with Park Lane this forms a good, full width road which could divert traffic from the A247. It is recognised that the railway bridge is a constraint, but this is not a unique problem viz. the widening of the Boxgrove Rd. bridge. It is already the intention to build a station next to the bridge.

The £1million funding is totally inadequate for reducing the inevitable increase in traffic through the villages of West and East Clandon. At most it could be used to make the A247 marginally safer for pedestrians and cyclists by improving speed control measures.

I believe that traffic will increase significantly because:

1. The development of an industrial estate at Burnt Common. At greater than 1.4ha, this is now doubled in size from the previous consultation and presumably will generate at least double the amount of commercial traffic.
2. The development of 550 houses at Garlick’s Arch (an addition of 150) with the main entrance/exit on the A247.
3. The development of 120 houses (new site) at Alderton’s Farm, Send Marsh.
4. The development of 1800 houses at Gosden Hill.
5. The opening of North-facing slip roads to/from the A3 at Burnt Common. The timing of the building of these North facing slip roads now appears to be unconnected with the timing of possible relief measures by Highways England for the A3. The implication is that traffic facing continued congestion on the A3 will divert along the A247.
6. The conversion of the Burnt Common roundabout to an all-ways junction with the A3.
7. The development of a road from the Gosden Hill development to the A247/Burnt Common roundabout. This would allow traffic leaving Gosden Hill and Merrow Lane to access the A3 northbound at Burnt Common, avoiding Burpham. It would also allow any traffic from Gosden Hill/Burpham wishing to go due south of Guildford to use the A247 - potentially an easier route than any existing.
8. A statement from GBC that the North-facing slip roads at Burnt Common are critical to the delivery of the Local Plan and are necessary for re-distribution of traffic - presumably as part of the policy of directing traffic around Guildford.
9. The obvious implication is that the slip roads will form a northern bypass for Guildford, servicing a wide area to the East and South of the town and using the A247 to access the A3. The pressure caused by this re-distribution is in addition to any increase caused by new developments.
10. The Strategic Highways Assessment showing that much of the additional traffic on the A247 will come from the South (i.e. through West Clandon village) during the a.m. assessment period.

Problems with the West Clandon section of the A247
The A247 through the village of West Clandon does not have the capacity to carry the expected increase in traffic. Starting at the A3 and working South on the A247 the issues are:

1. The junction with the current A3 south-bound slip road (modifications are underway)
2. The sharp bend at the Lime Grove junction with The Street (A247) where traffic is still in excess of 30mph
3. The dangerous junction with the station road where the exit sight line to the North is limited by the hump and parapet of the bridge over the railway. The visibility of traffic emerging from the station road is also poor for traffic approaching the bridge from the North because of the hump. It was for these reasons, among others, that Surrey County Council rejected Guildford Borough Council’s proposal to build a 1,000 place school on the site behind the station.
4. The sight lines for the exit of the Onslow Arms car park
5. The narrowness of the road near Summers
6. Heavy lorries, buses and coaches being unable to pass each other in the narrow parts of the road without mounting the pavement
7. The sharp bend near Clandon Regis
8. The narrowness of the road at the Bull’s Head
9. The Clandon Junior School and the, in places, narrow footpath for children walking to school
10. The sharp bend with poor sight lines in either direction at the church
11. No continuous footpath through the length of the village
12. The speed of traffic
13. The classification as an A-road without it having the capability of an A-road.

THIS ROAD SHOULD BE DE-CLASSIFIED TO THE B-ROAD WHICH IS ALL IT IS ADEQUATE ENOUGH TO BE. TRAFFIC FOR THE A3 FROM THE A25 SHOULD BE SENT THROUGH MERROW TO THE ROUNDABOUTS & DUAL CARRIAGEWAY ALREADY BUILT FOR THE PURPOSE YEARS AGO.

MM41-Policy A43---MM42-Policy A58---MM44 Policy A63

MM9 Green Belt Policy

MM27-MM41-MM42-MM48 Transport Strategy

Other Developments

I strongly object to the above planning proposals, especially now as the Office of National Statistics confirm that this is far more developments than what is required.

The existing infrastructure will not be able to support the above developments. The roads are already gridlocked, insufficient hospitals, schools, doctor surgeries, transport and the list of these items just keep on growing.

Perhaps it is now time to consider new towns in other parts of the UK as this area of the South East is already at breaking point.

Main Modification: MM50  Number of representations: 43

Comment: MM50 - LPMM18/1780  Respondent: Mrs Diana Brighton 8566145  Agent:

The modifications reduce the size of the SNCI and yet the whole site qualifies on ecological grounds. The biodiversity of the SNCI will be destroyed when there is rapidly increasing evidence that global warming and human life itself needs this diversity in order to continue.

An Appropriate Assessment and Habitats Regulation Assessment have not been carried out. This is in breach of case law.

Attached documents:

Comment: MM50 - LPMM18/1950  Respondent: Mrs Fiona Curtis 8570273  Agent: Mrs Fiona Curtis

Map Amending SNCI Former Wisley Airfield

The amendment drastically reduces the size of the site of nature conservation importance at the Former Wisley Airfield. However, the ecological interest of the land still merits SNCI designation. The published SNCI designation is sound and there is no justification for changing it.

The change appears to be to facilitate the new settlement. However, SNCI designation depends upon the merits of the land rather than desires to develop it. Policy ID4(6) sets out the test to be applied to weigh any benefits of a scheme against the harm to an SNCI. It is not there to be bypassed by the removal of SNCI designations because land is allocated for development or SANG.

Attached documents:

Comment: MM50 - LPMM18/5751  Respondent: Sarah Belton 8598561  Agent:

MM50 It seems very convenient that suddenly such a large area no longer qualifies as SNCI (or am I misunderstanding this map). It is irrelevant, as this is greenbelt land and as such cannot be developed as previously stated.

Attached documents:

Comment: MM50 - LPMM18/2672  Respondent: CPRE Surrey Branch & Guildford District (Tim Harrold) 8607169  Agent:

SITE SPECIFIC : A35 FORMER WISLEY AIRFIELD, OCKHAM (MM37 & MM47)
1. The addition of land to the South of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR air traffic control beacon regulations. This prevents construction within a certain radius.
2. Land to the South abuts the Ockham Conservation Area and increases the visibility of the site to and from the Surrey Hills AONB.

3. The biodiversity of the SNCI will be destroyed by the proposed development.

4. It is a breach of case law that an Appropriate Assessment and Habitats Regulation Assessment have not been completed.

Attached documents:

**Comment:** MM50 - LPMM18/3278  **Respondent:** Valerie Thompson 8671969  **Agent:**

6. **MM47** I object to the loss of more SNCI land at Wisley
7. I object to the fact that the Appropriate Assessment and Habitats Regulation Assessment have not been completed. This is a breach of case law!

Attached documents:

**Comment:** MM50 - LPMM18/5380  **Respondent:** Helen Jefferies 8717921  **Agent:**

MM50 The whole site should remain a SNCI and the removal of this designation for the whole area is not justified. This action makes a mockery of the whole of the council’s strategy for increasing biodiversity rendering it meaningless. The appropriate statutory body has not been consulted.

Attached documents:

**Comment:** MM50 - LPMM18/3642  **Respondent:** Tony Edwards 8733857  **Agent:**

Finally may I point out that the biodiversity of the SNCI will be totally destroyed by the proposed development as outlined in the modifications to the Local Plan.

Attached documents:

**Comment:** MM50 - LPMM18/1427  **Respondent:** Sheila Mellstrom 8772289  **Agent:**

As a result of the info we have received re the amended local plan I OBJECT strongly to the following:-

MM47 Despite the site of "3 Farms Meadows" being designated an area of ecological importance the size of the SNCI is much reduced. I OBJECT strongly to its exemption from design constraint A35 3 Farms Meadows I OBJECT strongly to this being a subject of the discussion because of the addition of land to the south of the appeal site which is prevented by
VOR from any construction within a radius of the air traffic control beacon. In conclusion, I call for the hearing to be reopened so that the latest ONS figures can be reconsidered and these matters of grave concern can be addressed.

Attached documents:

**Comment:** MM50 - LPMM18/1686  **Respondent:** Alan Robertson 8819265  **Agent:**

- The addition of land to the south of the appeal site does not mitigate the density issue as much of the new land is constrained by the VOR.
- Land to the south abuts the Ockham Conservation area and increases the visibility of the site to/from the Surrey Hill AONB.
- MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.
- The biodiversity of the SNCI will be destroyed by the proposed development.
- An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law.

Our Local Plan is there for the benefit of Local Residents, not for the profit of off shore tax avoiding property developers. Those in Authority appear to have lost sight of this fact thereby making their tenure of office precarious.

Attached documents:

**Comment:** MM50 - LPMM18/4581  **Respondent:** R Brind 8837281  **Agent:**

- MM47 – the size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.
- The biodiversity of the SNCI will be destroyed by the proposed development.
- An Appropriate Assessment and a Habitats Regulation Assessment has not been completed – in breach of case law.

Attached documents:

**Comment:** MM50 - LPMM18/1580  **Respondent:** David K Reynolds 8840193  **Agent:**

A35 Much of the new land to the south of the appeal site is unable to be used due to the VOR beacon and therefore does not make a significant reduction in the density problem. This land abuts the Ockham Conservation Area and the site visibility to and from the Surrey Hills AONB.

There are no justified grounds for reducing the size of the SNCI as the whole site qualifies on ecological grounds. The development will destroy the biodiversity of the SNCI.

Case law requires an Appropriate Assessment and a Habitats Regulation Assessment which have not been done.

I support the representation made by the Wisley Action Group which was written with advice from Richard Harwood QC.
In my view all the above make a very strong requirement for the public hearing to be reopened.

Attached documents:

Comment: MM50 - LPMM18/3820  Respondent: John F. Wood 8852289  Agent:

4. MM47: The size of the SCNI is drastically reduced, despite the ecological grounds that apply to the entire site.
5. MM47: There is no justification for altering the SCNI boundary.
6. MM47: the biodiversity of the SCNI will be destroyed by the proposed development.
7. MM47: Case law is breached as the "Appropriate Assessment" and a "Habitats Regulation Assessment" have not been completed.

Attached documents:

Comment: MM50 - LPMM18/5878  Respondent: Clare Bevan 8859553  Agent:

1. MM47: there are no grounds for reducing the SNCI boundary when the whole site at TFM qualifies on ecological grounds

The examination in public must be opened so that the latest Office of National Statistics can be used

Yours Faithfully

Map Amending SNCI Former Wisley Airfield/Three Farm Meadows (FWA/TFM)

The amendment drastically reduces the size of the site of nature conservation importance at the FWA/TFM. However, the ecological interest of the land still merits SNCI designation. The published SNCI designation is sound and there is no justification for changing it.

The change appears to be to facilitate the new settlement. However, SNCI designation depends upon the merits of the land rather than desires to develop it. Policy ID4(6) sets out the test to be applied to weigh any benefits of a scheme against the harm to a SNCI. It is not there to be bypassed by the removal of SNCI designations because land is allocated for development or SANG.

- The addition of land to the south of FWA/TFM does not mitigate the density issue with the site as much of the new land is constrained by the VOR which prevents construction within a certain radius. There is currently a no set date by the CAA for this aviation beacon to moved

- Land to the south **abuts the Ockham Conservation** area and increases the visibility of the site to/from the Surrey Hill AONB
- An Appropriate Assessment and a Habitats Regulation Assessment have not been completed – in breach of case law

Removal of the site known as A35 would deal with a number of these issues.

I trust you take into considerations the issues highlighted in my letter as the soundness of your Local Plan depend on you satisfactorily addressing these issues.

**Attached documents:**

---

**Comment:** MM50 - LPMM18/4374  **Respondent:** Colette Clegg 8910273  **Agent:**

Regarding MM47, the size of the SNCI is drastically reduced, which is not acceptable and there is no justification for it. It will destroy the biodiversity of this area. I also understand that an Appropriate Assessment and a Habitats Regulation Assessment have not been completed which is a breach of case law.

**Attached documents:**

2513 of 2575
**Comment: MM50 - LPMM18/4434  Respondent: Annie Cross 8926529  Agent:**

**MM47 - former Wisley airfield SNCI**

Site A35 is situated alongside areas of SPA and SSSI. Its contribution as an SNCI is a natural fit for land in the middle of Greenbelt, situated to the adjoining designations. It should remain as SNCI as there are no "exceptional circumstances" for site A35 to be removed from the Greenbelt and doing so to allow construction must have an effect on the adjoining SPA and SSSI.

In conclusion, the updated ONS figures must be taken into account and the whole GBC draft Local Plan revised accordingly. It should make use of the sustainable town centre sites and avoid irretrievable removing large areas from the Greenbelt, in accordance with NPPF requirements.

**Attached documents:**

---

**Comment: MM50 - LPMM18/4343  Respondent: WAAG (Wisley Airfield Action Group) 8968961  Agent:**

**60 MM47 Map Amending SNCI Former Wisley Airfield**

The amendment drastically reduces the size of the site of nature conservation importance at the Former Wisley Airfield. However the ecological interest of the land still merits SNCI designation. The published SNCI designation is sound and there is no justification for changing it.

The change appears to be to facilitate the new settlement. However SNCI designation depends upon the merits of the land rather than desires to develop it. Policy ID4(6) sets out the test to be applied to weigh any benefits of a scheme against the harm to a SNCI. It is not there to be bypassed by the removal of SNCI designations because land is allocated for development or SANG.

In summary these objections and issues could largely be overcome by first removing the least acceptable site A35 from the draft Local Plan and working up to minimise any greenbelt removal requirements.

**Attached documents:**

60 MM47

Map Amending SNCI Former Wisley Airfield/Three Farm Meadows (FWA/TFM)

The amendment drastically reduces the size of the site of nature conservation importance at the FWA/TFM. However, the ecological interest of the land still merits SNCI designation. The published SNCI designation is sound and there is no justification for changing it.

The change appears to be to facilitate the new settlement. However, SNCI designation depends upon the merits of the land rather than desires to develop it. Policy ID4(6) sets out the test to be applied to weigh any benefits of a scheme against the harm to a SNCI. It is not there to be bypassed by the removal of SNCI designations because land is allocated for development or SANG.
• The addition of land to the south of FWA/TFM does not mitigate the density issue with the site as much of the new land is constrained by the VOR which prevents construction within a certain radius. There is currently no set date by the CAA for this aviation beacon to be moved.
• Land to the south abuts the Ockham Conservation area and increases the visibility of the land to/from the Surrey Hill AONB
• An Appropriate Assessment and a Habitats Regulation Assessment have not been completed - in breach of case law.

The removal of Site A35 would deal with a number of these issues.

I trust you take into considerations the issues highlighted in my letter as the soundness of your Local Plan depend on you satisfactorily addressing these issues.

Attached documents:

Comment: MM50 - LPMM18/3802  Respondent: Anita Wilkinson 10954209  Agent:

MM47 – the gradual reduction in the size of the SNCI will impact on biodiversity, a more coherent view needs to be taken taking into account how flora and fauna use the habitats and link habitats together, which is why the appropriate Habitats Regulation Assessment needs to be taken and attended to.

I would request that my comments be paid due regard.

Attached documents:

Comment: MM50 - LPMM18/1865  Respondent: Aiden Clegg 10956833  Agent:

Regarding MM47, the size of the SNCI is drastically reduced, which is not acceptable and there is no justification for it. It will destroy the biodiversity of this area. I also understand that an Appropriate Assessment and a Habitats Regulation Assessment have not been completed which is a breach of case law.

Attached documents:

Comment: MM50 - LPMM18/3204  Respondent: Trevor W. Orpwood 10991873  Agent:

Amendment MM47

I object to the fact that the size of the SNCI has been drastically reduced. The whole site qualifies on ecological grounds and there is no valid justification for altering the SNCI boundary. The biodiversity of the SNCI will also be destroyed by the proposed development.

Attached documents:
Comment: MM50 - LPMM18/3342  Respondent:  Hannah Earle 11011297  Agent: MM47

The size of the SNCI is drastically reduced despite the whole site qualifying on ecological grounds. There is no justification for altering the SNCI boundary.

The biodiversity of the SNCI will be destroyed by the proposed development.

An Appropriate Assessment and a Habitats Regulation Assessment have not been completed, which is in breach of case law.

*SITE SPECIFIC - A35 - THREE FARMS MEADOWS
*

The additional land south of the appeal site fails to mitigate the issue of density because much of it is constrained by the VOR and it also abuts the Ockham Conservation Area and increases the visibility of the site both to and from the Surrey Hills AONB. In addition, no justification is provided for the significant reduction in the size of the SNCI the biodiversity of which will be eroded and a complete Appropriate Assessment and Habitats Regulation Assessment should be submitted to enable a full and accurate assessment of the impact of the proposed development.

Attached documents:

Comment: MM50 - LPMM18/4804  Respondent:  Judith Mercer 11036801  Agent: MM47

MM47- the size of the SNCI (Site of Nature Conservation Importance ) has been drastically reduced ( to about 15-20% of its former size).This is unacceptable since the whole site qualifies as an SNCI on ecological grounds. There is no justification for altering the SNCI boundary.

The biodiversity of the SNCI will be destroyed by the proposed development.

An Appropriate Assessment and a Habitats Regulation Assessment have not been completed, in breach of case law.

I would argue that any development of this site and especially of the scale stipulated in the Plan will be in breach of current NPPF law in particular that of the required principle to preserve the openness of the Green Belt.(paras 79-90). Any harm by inappropriate development will prevent the preservation of openness of the Green Belt- Case law Boot v Elmbridge Borough Council Feb 2017.

Attached documents:

<tr>
<td>MM47: wildlife and biodiversity; this appears to be just an obstacle to be got around by developers. This conflicts with the guidelines laid down in the NPPF which stipulate that wildlife and biodiversity must be protected at all times, not chipped away because they happen to be in the way of a developers greater scheme. Similarly, no emphasis is placed on Areas of special scientific interest, such those that exist all around the WW2 Wisley / Ockham Airfield aka Three Farms Meadow; I do think that the L.A. has the right to judge on these areas, it should be the judgement of independent specialists. Either way the allotted areas of SSI have shrunk from the size they were previously. That is unacceptable and I feel should be legally contested at a Judicial Review. At the same time the overall area of the proposed site applied for by WPI Ltd has grown by over 20 ha. The latter is equally unacceptable due to the impact on the ancient commune of Ockham and Water Lane, as well as the loss of even more important grade 1 agricultural land.</td>

4. I live next to the additional land for site A35. Much of this land is unsuitable for housing due to its proximity to the air traffic control VOR beacon and the Ockham Conservation Area and is visible from the Surrey Hills AONB. The site A35 qualifies for SNCI status and there is no justification for altering the boundary which would result in a severe reduction in biodiversity. The absence of an Appropriate Assessment and Habitats Regulation Assessment is in breach of case law.

Attached documents:

Comment: MM50 - LPMM18/1436  Respondent: Mr Nick Mellstrom 20690721  Agent:

I would like to OBJECT strongly to the following amendments:-

MM47 despite the whole site qualifying on ecological grounds the size of the SNCI is drastically reduced. I OBJECT to this as it has no justification. The biodiversity will be destroyed by any development and I do not consider that an appropriate assessment and Habitats Regulation assessment has been completed In conclusion I ask that the hearing be reopened so that ONS figures can be reconsidered and these matters of great concern can be addressed

Attached documents:

Comment: MM50 - LPMM18/1496  Respondent: Mrs Lesley Tregaskes 20692737  Agent:

Also, under MM47 there is no justification for altering the SNCI boundary, drastically reducing its size – despite the whole site qualifying on ecological grounds. There is also a breach of case law as an Appropriate Assessment and a Habitats Regulation Assessment have not been completed.

Attached documents:

Comment: MM50 - LPMM18/6256  Respondent: Dirk Mercer 20699553  Agent:

MM47- the size of the SNCI (Site of Nature Conservation Importance ) has been drastically reduced ( to about 15-20% of its former size). This is unacceptable since the whole site qualifies as an SNCI on ecological grounds. There is no justification for altering the SNCI boundary.

2.9 Notwithstanding that WHPC object to the policy of insetting their village (and others) from the Green Belt, the MM boundary change on the published Consultation map for West Horsley is noted, following GBC recognition that the previous boundary was non-defensible. If the village is to be inset, then this proposed change is welcomed.

2.10 In addressing this point, the Inspectors attention is drawn to a number of discrepancies in the proposed inset boundary defining the Green Belt around West (and East) Horsley. This matter was raised at the hearing on this topic on 05.07.18. The Inspector invited West and East Horsley Parish Councils to discuss this matter at a meeting with Guildford Borough Council to review the boundaries and deficiencies in the insetting justification provided within the Green Belt & Countryside Study. However, when efforts were made to arrange such a meeting, it was refused by the Council on the grounds of being unnecessary (please see the email exchange set out at Appendix 1). It is the Parish Council’s view that the Borough Council have been uncooperative and unhelpful throughout the Local Plan process, and their approach to this issue is another example of their complete lack of engagement with West Horsley Parish Council.

Please register my firm approval of this modification.
No more dwellings of any sort should be built in this area—preservation of country walks, presence of wild life (deer, pheasants, foxes, etc.) is essential current & future generations. Poor drainage, lack of adequate roads, & general facilities is a further negative—in fact extension of this area.

To Ripley Lane might be considered,

**Attached documents:**

**Comment:** MM51 - LPMM18/5381  **Respondent:** Helen Jefferies 8717921  **Agent:**

**MM51** I object to the change in the green belt boundary in West Horsley. I also object to the fact that the erratum notice only refers to the main document and not main modifications so is extremely confusing. For clarity, I object to removing green belt in this location.

**Addendum to the HRA date 6th September**

This document refers to the June 2018 HRA which was established at the EIP by James Burton of counsel, representing the Wisley Action Group to be “in name only” in that the words had been changed but the assessment had not been done. The reference to policy S2 mentions traffic from the Local Plan development but there is no evidence to show that the increased traffic as a result of the J10 improvements have been properly taken into account. The increase in housing proposed at Garlicks Arch, Aldertons and Burnt Common will further increase traffic in Ripley High Street and the impact of this coupled with the impact of the current preferred route for the 1.4 million cars attributed to the RHS have also not been properly accounted for. Any slips at Burnt Common do NOT mitigate these issues, despite assurances from developers. The traffic model is NOT FIT FOR PURPOSE.

The only reference to maintaining the integrity of the TBHSPA is recreational pressure whereas in fact pollution NOX, NO2 and nitrogen deposition pose equally significant threats.

There is no evidence to show that the in-combination effects of traffic and recreational use on the TBHSPA has been considered in combination with developments in Woking and/or Surrey Heath yet bizarrely the cumulative impact on the Wealden Heath SPA has been considered despite being in Waverley.

It is simply not credible that limited infilling in some villages has no HRA implications particularly as some of these are within the TBHSPA zone of influence.

Policy P5 is inconsistent with current case law. Para 4 appears to predetermine as drafted as there appears to be no room for the council or NE to disagree and therefore disallow development which will impact the TBHSPA. Additionally, para 4.3.50c appears to predetermine the outcome of appropriate assessments before they have even taken place – it is unclear whether the avoidance strategy is compliant with case law.

In summary, the proposed modifications do not in my opinion render the plan sound. The opposite occurs and they provide further evidence of the council and the inspector using a greenfield first, town centre last policy, in contravention of policy that requires that the opposite occurs.

I support re-opining of the examination in public to address some of these issues including importantly the use of up to date ONS statistics for household formation.

**Attached documents:**

**Comment:** MM51 - LPMM18/1249  **Respondent:** Emma Pernet 8727105  **Agent:**
I am writing to confirm my approval to Amendment 1: Horsley (West Horsley) (MM51)

Attached documents:

Comment: MM51 - LPMM18/2058  Respondent: Tom Suffolk 8736865  Agent:

I wish to fully support the amendment of the Local Plan, and the work of Guildford Borough Council and West Horsley Parish Council, and the Amendment to bring the Green Belt boundary back to the original Green Belt boundary as proposed at the main map at title document Amendment 1 page 84.

I strongly oppose the Amended Green Belt Boundary indicated at the upper right-hand side of page 84. We and many others wish to protect the rural character and unspoilt tranquility of the landscape so that it can be valued by residents of, and visitors to, West Horsley.

Such a development would amount to an unwarranted and unnecessary destruction of the Green Belt and would destroy the rural character and tranquility of our village.

Attached documents:

Comment: MM51 - LPMM18/2047  Respondent: R Kimpton 8742337  Agent:

Re: Guildford Local Plan - Strategy & Sites - Main Modifications 2018 Sept 2018

MM51 Amendment 1: Horsleys - West Horsley (South) - map page 84

We strongly approve this amendment, which moves a previously proposed unsound and indefensible boundary - being a basic post & rail fence - and therefore not a valid argument to bring greenbelt land into village settlement boundary.

We can see no merit including this high value prime agricultural land into the village boundary. Possible development will be vigorously opposed, costly and be of little value to an affordable housing vision

The new proposed modification now runs in a straight line along the back of Silkmore Lane and will protect and preserve the highly valued rural character of West Horsley South as it faces beautiful open countryside toward the National Trust's Hatchland Park.

The tranquility and beauty of this unspoilt side of the village adjacent to the conservation area with its 42 listed buildings, is highly valued not only by village and local residents, but also by visitors to the area, particularly specified by Olympic and frequent cycling events, should be preserved at all costs.

Attached documents:

Comment: MM51 - LPMM18/2597  Respondent: Daphne Padfield 8743969  Agent:

Amendment 1: Horsleys - West Horsley (South) (MM51) - map page 84
I understand that West Horsley Parish Council have successfully brought back Silkmore Lane's "defensible" property boundary to the West. While I am unclear what makes this boundary "defensible" I am certainly in favour of not extending building to the West of Silkmore Lane, so support the modification. There is already one building, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] which extends beyond the pleasing line as one travels down Ripley Lane towards the Street. How this site was given planning permission to turn it from a cottage into a mansion more suitable to a Bournemouth waterfront property I cannot imagine. However, my principal objection to building between Ripley Lane and Silkmore Lane is that traffic access in the area is already problematic and further building, therefore more cars, would only inflate the problem.

Attached documents:

Comment: MM51 - LPMM18/1406  Respondent: Chris Tailby 8749697  Agent:

I am writing in support of the above amendment which returns the West Horsley village boundary to its original position. It is important that the amendment is maintained so as to preserve the rural character and landscape from development. The land in question is greenbelt and should remain so.

I would be grateful if you would note my firm approval of this modification.

Attached documents:

Comment: MM51 - LPMM18/4072  Respondent: Chris Tailby 8749697  Agent:

I am writing to object to the proposal that West Horsley village should be “inset” ie removed from the Green Belt. GBC have never demonstrated that there are exceptional circumstances which justify such removal. Furthermore, new lower population and household figures have been produced by the ONS so instead of 630 extra homes plus Woking’s “unmet need” current research indicates that we only need 360 extra homes a year. Indeed, I object to Guildford having to take Woking’s “unmet need” (MM2). Accordingly I want the hearing to be reopened so that the latest figures can be considered by the Inspector.

I consider that with more residential development in Guildford town centre and better use of brownfield sites, the housing need can be met and the insetting of the village is unnecessary.

Attached documents:

Comment: MM51 - LPMM18/2126  Respondent: Fernanda Mayne 8830177  Agent:

Ref: Guildford Local Plan: Strategy & Sites - main modifications 2018

Amendment 1: Horsley - West Horsley (South) (MM51)

I would like to express my strong approval of the above modification of Guildford Council's Local Plan protecting the unspoilt greenbelt and rural character of the village of West Horsley.
The previous proposed boundary was clearly indefensible and should never have been considered as acceptable for development.

In addition, the village infrastructure will simply not allow for development of this kind.

Thank you for taking the sensible decision to protect the greenbelt in this way.

Attached documents:

Comment: MM51 - LPMM18/11  Respondent: Martin O'Hara 8835425  Agent:

3. Appendix H: Maps – MM51  
I write to OBJECT to the proposed modification to this policy.

I believe that to seek to vary the extent of a long disputed inset village settlement boundary at this late stage is unacceptable. Many of the local population have responded on numerous occasions objecting to the extent of the land around West Horsley that is to be removed from Green Belt protection. I believe that, inevitably, there will be a degree of consultation fatigue amongst some who have previously responded, particularly given that this modification document is extensive and not the easiest read for a lay person.

Attached documents:

Comment: MM51 - LPMM18/1428  Respondent: Moira Tailby 8846177  Agent:

I am writing to register my firm approval of Amendment 1: Horsleys - West Horsley (South) (MM51) as there was no justification for encroaching on Greenbelt land.

Attached documents:

Comment: MM51 - LPMM18/4348  Respondent: Dawn Childs 8857057  Agent:

Amendment 1 Horsleys - West Horsley (South) (MM51)

Please take this email as approval of the above modification. The previous boundary was indefensible and therefore not valid argument to bring greenbelt land into the village settlement area.

We must do all that we can to protect our Greenbelt and this is prime open space and would dramatically set the wheels in motion to change the landscape of the village forever.

Attached documents:

Comment: MM51 - LPMM18/1547  Respondent: Karen Stapleton 8888065  Agent:
I write to state that I firmly approve of this modification as the now designated settlement village boundary will protect the rural nature and character along with the unspoilt nature of the landscape which is valued by the residents in the village along with visitors. It is wonderful news that the previous proposed boundary will not become a reality and therefore the greenbelt land will be preserved.

Attached documents:

Comment: MM51 - LPMM18/2959  Respondent: Simon Stapleton 8889889  Agent:

I write to state my firm approval of this modification as the now designated settlement village boundary will protect the rural nature and character along with the unspoiled nature of the landscape which is valued by the residents in the village along with visitors. It is wonderful news that the previous proposed boundary will not become a reality and therefore the greenbelt land will be preserved. Objections to this amendment will only provide excuses for the creeping urbanisation and development of greenbelt land and this must be resisted for the benefit of all those living in and around the Horsleys both now and in years to come.

Attached documents:

Comment: MM51 - LPMM18/3718  Respondent: John Burgess 8900481  Agent:

5. whilst I have no objection per se to housing development, such development should be proportionate. I believe that the proposed housing allocation in my area (the Horsleys) is excessive and, if combined with the Wisley Airfield proposals and other proposed housing sites further afield but still nearby (e.g. Ripley/Send) will have a severe, adverse impact on the area’s general infrastructure: roads, local railway stations, medical provision, car dependency, etc.

Regretfully, time constraints prevent me from commenting further and in more detail.

Attached documents:

Comment: MM51 - LPMM18/4620  Respondent: Lynne Carr 8914721  Agent:

I completely support and endorse that the village settlement boundary has been brought back to Silkmore Lane’s defensible property boundary, thus protecting this beautiful area from development of the precious greenbelt land. I understand there may be objections to this modification. I believe it is essential to protect this beautiful land for visitors from outside the village, as well as for ourselves. This land is used partly for fine crops and regularly by many for walks every day on their way to such places as Hatchlands. As a people, we all so need open spaces to breathe, relax and walk in.

I hope you take our wishes very seriously and trust that the planners will stand by their decision not to permit any development which would spoil these lovely fields.

Attached documents:
I object particularly to the sites earmarked for housing in West Horsley, a historic and largely rural village. We have much localised flooding from the dip-slope and springs of the North Downs. Even the A246 is often badly affected, and this could be exacerbated by the effects of Climate Change. Our schools and the Medical Centre in our shopping area of East Horsley are full. Parking at the local shops and Horsley Station, will become difficult and stressful for the disabled and an ageing population. Our local roads are appallingly congested already at peak times.

Guildford Borough should be concentrating on AFFORDABLE homes for vital workers built near ‘hubs’ in a sustainable way. It should encourage the University of Surrey to house its own students.

Above all it should honour the Green Belt around London, to avoid urban sprawl and to avoid setting a precedent for a future megalopolis of pollution and congestion in the over-heated South-East.

Attached documents:

There is no justification for taking land in The Horsley out of the greenbelt. There are many more sites within Surrey that are brownfield that could be built on instead. There is no plan for any infrastructure to support these extra homes and our village will not cope with the extra population. We already have a busy station, doctors and our roads flood whenever there is rain. It is unnecessary to build on areas of green beauty when other options are available.

Attached documents:

I wish to protect the rural character of the landscape enjoyed by residents & visitors in the village Of West Horsley Therefore I confirm my approval of this modification.

Attached documents:

Re: Guildford Local Plan - Strategy & Sites - Main Modifications 2018 Sept 2018

MM51 Amendment 1: Horsleys - West Horsley (South) - map page 84

We strongly approve this amendment, which moves a previously proposed unsound and indefensible boundary - being a basic post & rail fence - and therefore not a valid argument to bring greenbelt land into village settlement boundary.

We can see no merit including this high value prime agricultural land into the village boundary. Possible development will be vigorously opposed, costly and be of little value to an affordable housing vision
The new proposed modification now runs in a straight line along the back of Silkmore Lane and will protect and preserve the highly valued rural character of West Horsley South as it faces beautiful open countryside toward the National Trust's Hatchland Park.

The tranquility and beauty of this unspoilt side of the village adjacent to the conservation area with its 42 listed buildings, is highly valued not only by village and local residents, but also by visitors to the area, particularly specified by Olympic and frequent cycling events, should be preserved at all costs.

Dear Madam,

Re: Guildford Local Plan: Strategy & Sites-Main Modifications 2018-Sept 2018
AND
Re: Amendment 1: Horsley-West Horsley (South) (MM51)- map page 84

I write to you to confirm that I give my firm approval of the above modification of the village settlement boundary i.e that it has been brought back to Silkmore Lane’s property boundary. This amendment will protect the greenbelt land and valued rural character of the village of West Horsley.

Attached documents:

Comment: MM51 - LPMM18/5021  Respondent: Mel Beynon 15321025  Agent:

OBJECTIONS TO THE CURRENT FORM OF THE LOCAL PLAN;

I wish to object in the strongest possible terms to the continued reluctance on the part of GBC to modify its housing numbers in our village. This seems particularly disgraceful since the original figures on which the perceived needs were originally based, are now, it seems based on inaccurate figures. They are based on what has now become a shrinking population, a population which therefore has less need of housing. In any event, there are far too many vagaries. Not only has the borough based its information in its insistence on the old requirements for the numbers of housing, but both it and the definition of “affordable housing” is a ridiculous nonsense in the context of our Borough. What we need is Social Housing and there seems almost no provision for that. Further, there is no secure safeguard from developers who suddenly present “good reasons” for not completing a development as intended. Thus even these ridiculously small numbers of "affordable homes” will see further reductions in their number due to a little “unforeseen misfortune” that inevitably visits the "financially stressed” developers.

Not only do I object to the unchanged housing numbers, but I object even more strongly, if that is possible, to the continued refusal, especially given what should be reduced housing requirements, to restore our Green Belt to our village. ANY incursion into the Green Belt on some spurious and unsubstantiated housing need, will once and for all, destroy the rural nature of our village. This not only destroys our enjoyment of it, but to the countless hundreds of visitors who come to share it with us and damages the environment beyond repair.

No substantial justification for the use of Green Belt for extensive development has ever been presented for West Horsley. Given the reduction in retail space required now that we have unequivocal proof that the High Street is shrinking, should the Borough not take a more enlightened view and use up unwanted retail space for modest town
housing and release, as it is meant to, the brown filed sites that it jealously guards, thus safeguarding the precious Green belt.

If our communities are to survive, is we want to have cleaner, less polluted environs, people need to live much nearer their working places in the town and not be forced to use cars to travel from villages outside the town. At the moment such people can’t even travel by bus because our transport system doesn’t allow for a work force to travel by public transport to our anywhere except London. The result is never ending grid lock through Guildford and in both direction on the A3 Any development of the Green Belt needs “proved special circumstances”. As the current plan stands, there are no special circumstance and none have been put forward to justify building in he Green Belt.

To reiterate my position....... I OBJECT to the plan as it currently stands and would beg GBC to reconsider.

The lunacy of the whole plan is further emphasised by the re-insertion of the Three Meadows site at Wisley despite its having been rejected by the inspector! He saw only too clearly that there is no supporting infrastructure even after the M25/A3 development, insufficient educational support far too late in the plan especially when local schools are all over subscribed and total destruction of a sensitive bio-diversity Indeed these issues MUST be careful re-thought and re-sconsidered for all our sakes,

PLEASE NOTE: Although I am a Parish Councillor in West Horsley, this submission is entirely an expression of what is entirely my own opinion.

Local Plan Amendment 1 Horsleys - West Horsley (South) MM51 - map page 84

I am writing to support the above amendment to the local plan as it will protect the rural character of the village and the landscape in which it sits.

Attached documents:

Comment: MM51 - LPMM18/3494  Respondent: Heather Mason 15608769  Agent:

I am writing to give my firm approval of the modification of Guildford Borough's Local Plan Amendment 1: Horsleys - West Horsley (South) (MM51) map page 84 which will protect the rural character and unspoil tranquility of the landscape which, as a resident of West Horsley village, I thoroughly enjoy and value as do many visitors, walkers, runners and cyclists.

Attached documents:

Comment: MM51 - LPMM18/4930  Respondent: Rhys Beynon 17413953  Agent:

Again I must strongly object to the revised Local Plan for West Horsley. The withdrawing of the grant of Green Belt to our village must be resisted in every possible way. As any reasonable local resident I do appreciate that a reasonable
number of houses are required in our area but the local plan as amended greatly exceeds the limited infrastructure which exists or which could be developed quickly enough to cope with the order of proposed house building. What our village needs for our young people is council built properties that can be rented by the many low paid workers rather than high priced executive properties which will be filled by highly paid commuters leaving our villages as empty dormitories having to import services from outside our area.

Please reconsider the Local Plan before it leads to the death of our historic village.

I write to you to confirm that I give my **firm approval** of the above modification of the village settlement boundary i.e that it has been brought back to Silkmore Lane’s property boundary.

This will protect the Green Belt land and valued rural character of the village of West Horsley.

MM51 Amendment 1: Horsleys - West Horsley (South) - map page 84

We strongly approve this amendment, which moves a previously proposed unsound and indefensible boundary - being a basic post & rail fence - and therefore not a valid argument to bring greenbelt land into the village settlement boundary.

We can see no merit including this high value prime agricultural land into the village boundary. Possible development will be vigorously opposed, costly and be of little value to an affordable housing vision.

The new proposed modification now runs in a straight line along the back of Silkmore Lane and will protect and preserve the highly valued rural character of West Horsley South as it faces beautiful open countryside toward the National Trust's Hatchland Park.

The tranquility and beauty of this unspoilt side of the village adjacent to the conservation area with its 42 listed buildings, is highly valued not only by village and local residents, but also by visitors to the area, particularly specified by Olympic and frequent cycling events, should be preserved at all costs.

Thank you for your letter with reference to Guildford Local Plan/Strategy & Sites – Main Modifications 2018 / Sept

Amendment 1: Horsleys – West Horsley (South) (MM51) – Map page 84

I firmly approve the proposed modification to the Settlement Boundary /Green Belt boundary for West Horsley South (MM51) and am grateful to Guildford Borough Council for their decision to support West Horsley Parish Council and Residents in protecting and preserving Green Belt land on this side of the village from future development.
Image top right Pear Tree Cottage paddocks with post and rail fence in distance overlooking open Green Belt land /public footpath leading down to Ripley Lane & National Trust parkland

The previously proposed Green Belt Boundary (small map bottom right) to include Pear Tree’s land was totally indefensible being a basic post and rail fence overlooking open green belt land and not a valid argument to bring Green Belt land into the village settlement boundary. Development on this land would be highly detrimental.

The new proposed modification to the settlement boundary, which now runs neatly along the back of Silkmore Lane’s property boundaries will protect and preserve the highly valued rural character of West Horsley South’s Green Belt land with its beautiful open countryside and public footpath leading down to the National Trust’s Hatchlands House, the farm, parkland, walks and public footpaths.

The tranquillity and beauty of this unspoilt side of the village with 42 listed buildings abutting the conservation area and The Surrey Hills area of outstanding natural beauty is enjoyed and highly valued by not only village residents and locals but also by the many visitors to the area and should be preserved at all costs.

We have a duty of care towards nature conservation. The revised boundary will ensure protection of Green Belt land, the ancient Oak Trees (protected by TPO’s – however we have been warned that builders would be prepared to cut them down and pay the nominal fine) important agricultural land, the biodiversity, the native bats, deer, woodpeckers and pheasants in the fields beyond leading down to Ripley Lane.

The benefits to us all both physically and mentally of being able to enjoy the open countryside, the space, the tranquillity, the time to observe and experience nature is fundamental to our wellbeing. Along with Hatchlands House, West Horsley Place is fast becoming a highly regarded visitor attraction and with the proposed development sites in West Horsley, it is really important to safeguard the quintessential rural village character and landscape of West Horsley South for many more to experience and enjoy in the years to come.

Thank you for your work on putting the plan together.
We sincerely trust the proposed modification will be implemented.
I would like to be kept updated.
Silkmore boundary – part post and rail part hedge is ‘defensible’ in that it forms a legal property boundary.

Pear Tree’s paddock post and rail fence is ‘indefensible’ in that it is neither a road, river, railway line, woodland, copse, hedge, ditch etc.

Comment: MM51 - LPMM18/2104  Respondent: Russell and Greta Sunderland 20708417  Agent:

GUILDFORD LOCAL PLAN

Amendment: 1 Horsleys -- West Horsley (South) (MM51) (Map page 84)

We have been informed of the expected attempts of builders to overturn the Council's highly welcome decision to cancel a previous proposal to allow the building of a group of houses in the large and important field between Silkmore Lane and Ripley Lane. This area, partly used for fine crops, is of considerable beauty, and even in winter the adjoining old houses in the upper part of Silkmore Lane blend admirably into the eastern background.

It is not surprising that the path which crosses the field is well used by local people who enjoy the splendid views to the north and south, with particular emphasis on two or three quite superb trees (in the very area targeted by builders).

We trust planners will stand firmly by their decision not to allow any building that would enroach on this rather special feature of West Horsley.

**Representation to Emerging Local Plan Main Modifications**

1. This representation is submitted on behalf of our client the owner of Pear Tree Cottage and the land to the west and north of Pear Tree Cottage (such land referred to in this representation as the "Site").

2. This representation is in support of our client's objection to the modification proposed by Guildford Borough Council ("GBC") to the Submission Local Plan to amend the Green Belt boundary which under the Submission Local Plan runs along the western boundary of the Site (the "Submission Plan Green Belt Boundary"). The amended boundary is set out in the Proposals Map for West Horsley (see page 84) of the Schedule of Proposed Main Modifications dated 11 September 2018 (the "Amended Green Belt Boundary").

3. A site plan of the land at Pear Tree Cottage (shown edged blue) and the land adjoining (shown edged red) can be found at Annex 1.

4. Aerial and other photographs of the relevant boundaries of the Site can be found at Annex 2 (P1 to P16). The photographs show the boundaries as follows (letters taken from Map1):

   - P1 & P2: H to A;
   - P3 to P10 : Ato6;
   - P11: Part of C to D;
   - P12 to P15: E to F;
   - P16: I.

5. Copies of emails referred to in this representation and others related to those emails can be found at Annex 3 (page numbering referred to below is to the handwritten page number on the top right of each page).

**Summary of Basis of Objection to the Modification**

6. In summary, the proposed modification should be rejected by the Inspector because:
   • the Amended Green Belt Boundary proposed by GBC is not compliant with the relevant provisions of the National Planning Policy Framework ("NPPF");
   • the reasons given for the modification are not supported by any proper evidence or planning basis and in fact conflict with the evidence base prepared by GBC;
   • the modification reduces the supply of land immediately available for development in circumstances where there is an existing deficit of housing supply in the borough and a need for GBC to provide additional housing in the first five years of the plan period;
   • the modification is not the result of main modification resulting from the Local Plan Examination Hearings or needed to make the plan sound but comprises an additional change to the Submission Local Plan, GBC do not have the power to make such a change at this stage of the Local Plan process.

**Site and Surroundings**

7. Our client is partner in a City law firm, purchased Pear Tree Cottage and the Site in 1994 and is very familiar with the surrounding area and West Horsley.

8. Pear Tree Cottage, is located to the west of Silkmore Lane from which it gains access, it comprises a pair of 19th century cottages that were converted into one dwelling in the 1960s and heavily extended after the conversion. The house is not a statutorily listed building and the residential property and its garden is currently within the settlement of West Horsley and is within the Green Belt.

9. Prior to purchase by the then owners of Pear Tree Cottage in May 1985, the Site was agricultural land. The Site was purchased in order to extend the garden of Pear Tree Cottage. The Site now forms part of that garden.
10. The Site is bounded by a tree belt to the south, hedgerow to the north and fencing and hedgerow sitting on a pronounced mound to the west. There is no physical demarcation of approximately 40% of what was previously the eastern boundary of the Site as this is part of the direct rear garden of Pear Tree Cottage. The remaining eastern boundary runs along the rear boundary of one residential property on Silkmore Lane and a paddock belonging to that property and is demarked by fencing and hedgerow and a number of posts (see paragraphs 31 and 32).

11. The Site and Pear Tree Cottage were designated as falling within the Green Belt under the 1987 Local Plan. The wider settlement of West Horsley is "washed over" by the Green Belt.

Inclusion of the Site in the emerging Local Plan

12. The Site was part of a much larger area of land that was identified as a proposed allocation for the development of 185 houses in the draft Local Plan (2014). GBC reconsidered that area of land following consultation of the draft plan and the site allocation was removed from the Local Plan in 2016.

13. The Site along with 4 other residential properties was identified as having development potential by GBC in its Land Availability Assessment report dated October 2017 ("LAA 2017") (see Appendix 2 page 283 site reference no 2026 of the LAA 2017). Appendix B of this report identifies the Site as being a "realistic candidate for development" for 20 homes in the 6-10 year period. The assessment of the Site concludes that the Green Belt and Countryside Study (GBCS) identifies that this land to be inset from the Green Belt.

14. The Submission Local Plan proposed the insetting of West Horsley from the Green Belt with the new Green Belt boundary insetting the settlement, existing properties on Silkmore Lane and the Site. This was accompanied by a detailed Sustainability Appraisal (June 2016) which considered the hierarchy of potential development sites, alternatives and the detailed reasoning for (in this instance) the removal of the site from the Green Belt.

15. The LAA Addendum published in September 2018 deletes this Site stating: "Site no longer inset from Green Belt due to boundary amendment following Local Plan hearing sessions".

Green Belt Review

16. The Site falls within a large parcel of land identified as "D6" Guildford Borough Green Belt and Countryside Study ("GBCS") prepared by Pegasus Planning Group ("PPG"). Appendix 1 of Volume 1 of the GBCS identifies the Site as part of a larger land area to the west of West Horsley as a "Potential Development Area surrounding Villages".

17. In the Volume II, the wider Parcel D6 is given an overall score of 4 for furthering the purposes of Green Belt policy on the basis that it serves purposes 1 — 4 of the Green Belt and is therefore considered to be of high sensitivity. Volume III goes on to identify the Site as part of Potential Development Area C in West Horsley (South) which includes land to the west up to Ripley Lane. The assessment sets out that:

"D6-C is surrounded by defensible boundaries including treecover following the railway line to the north, hedgerows and garden boundaries following Silkmore Lane and Pincott Lane to the east and south, and hedgerows bordering Ripley Lane to the west of the PDA. The PDA is generally contained by a local undulation, hedgerows and railway infrastructure."

18. Volume VI of the GBCS considers the insetting of Villages and defensible boundaries and identities the area of land including the Site as Area 1 C, which is identified for low density development. The GBCS identifies the defensible boundary in this location to be the "Hedgerows and fencelines located to west of Silkmore Lane" and the boundary is as illustrated in the Submission Local Plan.

19. The Site is small part of Area 1 C. Given this, and the fact that from the ground the Site appears to fall within the village settlement boundary, our client thought it helpful for PPG to give an opinion of the Site's (as opposed to D6-C generally) contribution to the Green Belt. PPG confirmed that it was prepared to give such an opinion subject to GBC's consent. Our client contacted GBC by email on 28 September 2018 requesting consent and clarifying that he would pay PPG's fees for the exercise stating:
"It seems uncontroversial that the inspector should have all relevant evidence before him in order to make an informed
decision. Having Pegasus Planning Group update the study ensures continuity in approach which would be clearly
helpful'.

GBC responded to our clients request on 27 September stating:

"the Council is satisfied with the proposed amendment so will not service this request'.

20. It would appear highly likely that (using the methodology employed by PPG in the GBCS) if assessed on its own, the
Site would be deemed to be low sensitivity Green Belt. Clearly, this issue could have been definitively determined had GBC
consented to PPG giving an opinion on this point.

**Background to the Main Modification**

21. It is clear from the emails provided by GBC to our client on 23 October 2018 (see Annex 3) that the proposed
amendment is the result of GBC accommodating the objection of West Horsley Parish Council ("WHPC") that the
Submission Plan Green Belt Boundary is "non defensible" on the basis that it does not meet "some of the criteria" set out
in paragraph 85 of the National Planning Policy Framework ("NPPF"). Those emails also show that WHPC's objection is
based solely on final bullet point of paragraph 85 of the NPPF 2012 which states:

"85. When defining boundaries, local planning authorities should:....
• define boundaries clearly, using physical features that are readily recognisable and likely to be permanent."

That is, the proposed modification is a result of WHPC's view that the Submission Plan Green Belt Boundary would not,
in the absence of readily recognisable permanent physical features, be defensible.

22. The Inspector is aware of the representations made by WHPC related to the emerging and Submission Local Plan but
to briefly recap WHCP submitted representations to the Regulation 19 consultation in July 2016 objecting to:

• proposals for new Green Belt boundaries and insetting of villages from the
Green Belt;
• OAN and housing targets;
• various proposed allocation.

23. WHPC made further representations in July 2017, these repeated the objections made in 2016.

24. At paragraph 3.29 of these representations WHPC (through their agent) state:

"the proposed defensible Green Belt boundaries are contested, particularly west of the properties in Silkmore Road,
where the proposed boundary follows a post and rail fence in poor condition that would partly enclose an area of open
fields behind the existing houses (boundary 3M on the "Defensible Boundaries map of Volume IV of the Green Belt
Study")." and "The insetting methodology is not consistent or justified and appears to be based on allowing scope for
future development sites rather than a proper assessment of the contribution of a settlement to the Green Belt'.

25. It should be noted that the June 2016 Sustainability Appraisal which accompanied the Submission Local Plan did
carry out a detailed assessment of the changes to the Green Belt boundaries including removing the Site from the Green
Belt.

26. The proposed Green Belt boundaries were also an issue on the West Horsley Neighbourhood Plan. The examiner of
the plan noted:

"I recommend that at an appropriate point in the supporting material to policies WH2 and WH3, a clear and explicit
statement be made as to the way the Plan deals with the question of Green Belt/settlement insets. If the intention is, as is
stated elsewhere, to achieve alignment with the Submission Local Plan, the Policies Map should be redrawn accordingly.
If, on the other hand, the WHNP is proposing to depart from the inset boundaries as shown on the Submission Local
Plan, the supporting material should draw attention to the detailed differences and contain an explanation."
27. As a preliminary point, from the emails of Laura Howard of 16 July 2018 (page 33) and Councillor Jenny Wicks of 18 July 2018 (page 31) it is clear that the Amended Green Belt Boundary was proposed by GBC at a meeting with WHPC on 16 July 2018 to finalise the West Horsley Neighbourhood Plan. It would however appear that this decision had been made before that meeting, see the email from Councillor Jenny Wicks to a redacted recipient of 12 July at page 35.

28. Under the NPPF 2012 a neighbourhood plan cannot be the vehicle for changes to Green Belt boundaries which is not the case with the NPPF 2018. The relevant NPPF for the purposes of this examination of the Submission Local Plan is the NPPF 2012. Irrespective of that, it would be wrong for a local plan to be amended during examination to take account of a yet to be finalised neighbourhood plan or arguably a neighbourhood plan that has been successful at referendum. A neighbourhood plan must be in general conformity with the strategic policies of the local plan and contribute to the achievement of sustainable development (two of the basic conditions set out in paragraph 8 of Schedule 4B of the Town and Country Planning Act 1990).

A number of points arise from this:

• there is not any equivalent provision for a local plan to be in general conformity with a neighbourhood plan;
• the June 2016 Sustainability Appraisal submitted with the Submission Local Plan provides detailed reasoning for the removal of the Site (amongst other land) from the Green Belt, there is no such reasoning in the WHPC neighbourhood plan;
• there has been no equivalent assessment of the proposed GBC changes to the Green Belt boundary affecting the Site to that set out in the June 2016 Sustainability Appraisal. With the importance given to Green Belt boundaries in the NPPF 2012 (and NPPF 2018) such an assessment needs to be carried out (see also below);
• it is unclear why, from a planning policy perspective why GBC felt compelled to make the modification given the Examiner of the West Horsley Neighbourhood Plan placed the burden on WHPC to explain its position on the boundary and as is clear from Laura Howard's email of 16 June 2018 (page 31), GBC considered that WHPC's proposal as to where the boundary should run "cannot be justified". Nothing has changed since.

Defensible Boundaries

Submission Local Plan Green Belt Boundary

29. It is not difficult to understand why PPG concluded that the defensible Green Belt boundary for this part of the West Horsley is the Submission Plan Green Belt Boundary. As can be seen from the aerial photograph (Annex 2 Map 1) and the photographs from the ground (Annex 2 P3 to P10), the boundary runs in a continuous line from the bottom of the gardens of the houses at the northern end of Silkmore Lane to the south western corner of the Site. The boundary is comprised of rail and post fencing and hedgerow and sits on a pronounced mound which is the result of continued ploughing of the agricultural land that sits on the western side of the boundary. The boundary visibly and clearly demarks land of different uses and character (garden on one side and agricultural on the other) and is also clearly readily recognisable from a distance.

WHPC Proposed Boundary

30. In her email of 30 July 2018 to Councillor Paul Spooner (page 1), Councillor Jenny Wicks notes:

"The parish council's main concern is that moving the boundary to a post and rail fence (from a dilapidated post and rail fence) isn't a defensible boundary as required by the NPPF. Post and rail fences, unless meticulously maintained, might last 10 years, but are not a long lasting features like the end-of garden line suggested by the parish council which is clearly defined and long lasting".

This misunderstands the position on the ground as follows:
• it can be seen from photographs P3 to P10 that the Submission Plan Green Belt Boundary (A to B on Map 1) is not purely demarked by a post and rail fence but also by hedgerow, there is a clear difference between the height and visual character and the use of the land either side of the boundary;
the post and rail fence is not dilapidated as claimed, see the photographs referred to above. The fencing was in place before our client bought the property 24 years ago and has been repaired 4 to 5 times during his ownership;

• the end-of garden line proposed by WHPC (E to F on Map 1) is demarked in a number of places by post and rail fencing alone and is much less visually distinctive than the line of the Submission Plan Green Belt Boundary (see P12 to P15);

• the boundary proposed by WHPC cuts through the main rear garden of Pear Tree Cottage (C to D on Map 1) and consequently a very significant position of the boundary has no physical demarcation at all (see photograph P11);

• in addition to the rear garden of Pear Tree Cottage, there are various other points along the boundary where there is no physical demarcation — for example the northern boundary of the paddock adjoining Silkmore (point I on Map 1, see photograph P16)

• if WHPC’s approach to where the boundary should run was properly applied it would run in the position of the Submission Plan Green Belt Boundary — WHPC has selectively ignored that the Site was bought to extend and visually and functionally forms part of the garden of Pear Tree Cottage (see above).

Amended Green Belt Boundary

31. The aerial photograph (Map 1 of Annex 2) shows the line of the Amended Green Belt Boundary. The boundary has different physical characteristics across its length and these are indicated on the map by the lines running from letters B-C, C-D, D-E and E-F. The section of the boundary running between B and C is demarked by low-level hedgerow. There is no physical demarcation of the boundary between C and D (other than a short section of fencing and shrubs in the southern part of the boundary) — rather the boundary runs thought the main rear garden of Pear Tree Cottage (see photograph P11). The boundary between D-E is demarked by post and rail fencing (in poor repair) and hedgerow. The demarcation of the boundary between points E-F is mixed. It is in part demarked by post and rail fencing (some in good and some in a poor state of repair) in other parts there is no demarcation (the fencing was removed to accommodate a wedding reception held at Silkmore and not currently reinstated) and in another by a series of posts (see photographs P12 to P15).

32. It appears to our client that GBC may not be aware of the current physical characteristics of the Amended Green Belt Boundary (although see the email from Laura Howard of GBC Planning Services to Councillor Paul Spooner dated 16 July 2018 at page 33) and has invited it to attend a site meeting in order that this can be properly established and agreed in order to avoid the Inspector being presented with conflicting views on this point. GBC declined to attend such a meeting.

33. The Amended Green Belt Boundary is not compliant with the relevant provisions of the NPPF and GBC appear to be aware of this. In her email of 16 July 2018 to the leader of GBC and copied to the head of GBC’s planning team, the Principal Planning Officer of GBC states:

"Just to let you know that Dan and Daniel met with West Horsley PC regarding their Neighbourhood Plan and the implications to changing the GB boundary. They are not happy with our proposed boundary regarding the land behind Silkmore Lane stating that it is still not defensible.

Of the three potential boundaries — the previous insert boundary [the Submission Plan Green Belt Boundary— our clarification] is the most easily recognisable. Part of it does run down a post and rail fence however this is acknowledged in the GBCS but there are no other better alternatives as the next boundary is Ripley Lane which is some distance away. Our proposal from last week is then the next best option although it has its issues — as I came to you with regarding the little bit that doesn’t follow to anything in the south. I should point out that the northern part of this boundary also follows a post and rail fence albeit one closer to the built up edge (so is no more or less defensible than the previous proposal in this stretch of the boundary). They are still pushing for those two fields to be removed (and following the 2003 settlement boundary) — this would follow no defensible features along the northern section and goes into what appears to be a garden, it then follows a fenceline.

I understand they are intending to follow this up with me. What would you like the approach to be? There are three options. There is their stated preference which cannot be justified. There is our proposal from last week [the Amended Green Belt Boundary — our clarification] which still causes some problems or there is the option to revert to the previous boundary as they are not satisfied with the alternative?"
34. Paragraph 84 of the NPPF 2012 states:
"When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary."

35. Paragraph 85 of the NPPF 2012 sets out that when defining boundaries local planning authorities should:
• ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development;
• not include land which it is unnecessary to keep permanently open;
• where necessary, identify in their plans areas of 'safeguarded land' between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period;
• make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development;
  • satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.

36. Paragraph 158 of the NPPF 2012 sets out that "Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area".

37. The Submission Local Plan Green Belt Boundary was subject to a detailed sustainability appraisal that took the requirements of paragraph 84 of the NPPF 2012 into account. No such appraisal has been carried out with respect to the Amended Green Belt Boundary.

38. The 2018 Sustainability Appraisal that accompanied the proposed main modifications refers to the change to the Green Belt boundary affecting the Site (at paragraph 9.11.3 under 48 (Policies Map)) but effectively only repeats the statement in the LAA Addendum (September 2018) without any detailed consideration regarding the modification.

39. We note that the reference to the modification in the September 2018 Sustainability Appraisal shows that GBC consider this change of such significance as to warrant a update to the June 2016 Sustainability Appraisal. Clearly, the modification to the boundary should not be made without detailed consideration required under paragraphs 85 and 158 of the NPPF 2012. In the absence of such an assessment and taking into account the points we make in this representation concerning the physical characteristics of the boundaries, if made it would be contrary to sections 19 and 39 of the Planning and Compulsory Purchase Act 2004 and the Environmental Assessment of Plans and Programmes Regulations 2004. The change is not supported by any substantive evidence against that set out in the June 2016 Sustainability Appraisal; simply there is no basis for it.

40. Additionally, the Amended Green Belt Boundary is not considered to be consistent with paragraph 85 of the NPPF 2012 for the following reasons:
the amendment removes a site from the Local Plan identified for meeting future sustainable development; it is highly likely that if assessed in its own right the Site would be deemed to be low sensitivity Green Belt and consequently unnecessary to keep permanent open — any development of the Site would still be subject to the planning process generally but the lack of a proper assessment of the proposed modification should be compared with the assessment contained in the June 2016 Sustainability Appraisal mentioned above; the planning team of GBC has concluded (as is clear from the Principal Planning Officer of GBC’s email above) that the Amended Green Belt Boundary is not as defensible as the Submission Plan Green Belt Boundary; the Amended Green Belt Boundary is not defined across its length by physical

41. As stated above, not only is the Amended Green Belt Boundary less defensible that the Submission Plan Green Belt Boundary (and GBC appear for the reasons above to be fully aware of this), it is inconsistent with the evidence base prepared by GBC on this subject as set out in the GBCS and the June 2018 Sustainability Appraisal features that are likely to be readily recognisable and likely to be permanent.
Potential Development Site

42. In addition to the Site being appropriate for release from the Green Belt, it also has the potential to provide additional residential development in the first five years of the plan period. As mentioned above, the Site forms part of a parcel of land that was identified as having development potential by GBC in the LAA 2017 (Appendix 2 page 283 site reference no 2026). This was only discounted due to the amendment to the proposed Green Belt boundary the Submission Local Plan, which as outlined above is considered to be unsound.

43. The LAA 2017 states that access to the Site could be from Silkmore Lane and that five private houses (Two Chimneys, Goodwood, Willowpond, Silkmore and Ashley Cottage) are included in the Site. When commenting on the availability and achievability of development, the report notes that although the primary area for development within the Site is in single ownership, the land adjoining the area (the residential properties referred to above) is not owned by the site promoter and would need to be acquired to provide access to the Site. Given the uncertainty that results from the need to acquire land in order to gain access, the Site should be considered developable within the next six to ten years. The identification of the Site as a potential development site in the LAA (2017) is supported by the landowner.

44. However, GBC failed to appreciate when considering the availability of the Site that access could be achieved thought Pear Tree Cottage and therefore the Site could be available for development at the start of the plan period.

45. Churchods Estate Agents marketed the Site to a number of developers during September and October of 2016. They received offers from five of these developers (if necessary redacted copies of these offers can be supplied). The two front running developers have a considerable amount of preparation work regarding the Site including a Highways Assessment. They have both recently stated that they wish to enter into contracts to acquire Pear Tree Cottage and the Site should the Site be removed from the Green Belt. They have stated that they are willing to submit a planning application immediately after purchase. There is therefore a high likelihood of the Site being developed and delivering housing within the borough.

46. The effect of the modification of the Green Belt boundary related to the Site is approved would be to keep the Site (which would likely be deemed to be low sensitivity Green Belt if assessed in its own right and which visibly sits within the village settlement in an otherwise well-developed area) within the Green Belt. This would reduce the land available for development in the early part of the plan period in circumstances where the Inspector had instructed GBC to make amendments to the Submission Local Plan to increase the sites available for development in the early part of the plan period. Not only would the modification appear to be contrary to the instruction of the Inspector, the modification was not requested by the Inspector but was instigated at the request of leader of GBC as evidenced in his email of 30 July 2018 in which he states:
"They [WHPC- our clarification] can make their point during Consultation and the Inspector and Council can then take a view. Remember that the Inspector did not ask for any change — it is being done at my request"

Status of the Modification

47. The proposed modification to the Green Belt boundaries and specifically the boundary that affects our clients land is not required to make the plan sound. We cannot find and nor have we been provided with any evidence to the contrary. GBC has failed to give a proper explanation as to why the modification has been made.

48. In Samuel Smith Old Brewery (Tadcaster) v Selby DC (2015) EWCA Civ 1107 Sales LJ gave the judgement of the Court of Appeal. At paragraph 28 the various stages of plan making are described:

"The stages of the plan making process constituting respectively, the preparation of a local development document as provided for in section 19, and independent examination, as provided for in section 20, are distinct and separate from each other: ... They are sequential stages. The preparation comes to an end before examination begins. The former is an activity undertaken by the local planning authority, the later an activity undertaken by the inspector, albeit with the scope for him to call for further work to be done by the authority with a view to making the plan sound. As Ousley J observed (2015) PTSR 719, para 29, once the plan passes from the stage of preparation to the stage of examination, it leaves the authority's hands — save for the authority's power of withdrawal under section 23 — until it able within the constraints of section 23 to adopt it."
49. Section 23(3)(b) of the Planning and Compulsory Purchase Act 2004 allows a local planning authority to make changes to a submitted local plan where main modifications have been requested by the inspector only "with the main modifications and additional modifications if the additional modifications (taken together) do not materially affect the policies that would be set out in the document if it was adopted with the main modifications but no other modifications." To seek to adopt a local plan other than in accordance with section 23(3)(b) would be contrary to section 23(4) which states that "the authority must not adopt a development plan document unless they do so in accordance with subsection (2) or (3)."

50. It is not within GBC's powers to make changes to the local plan at this stage unless such changes have been called for by the Inspector to make the plan sound or do not materially affect the local plan policies. We do not believe that the proposed change to the Green Belt boundary from those set out in the Submitted Local Plan are necessary to make the plan sound.

51. In conclusion the modification to the Green Belt boundary:
• does materially affect the local plan policies;
• is not a main modification requested by the inspector (it is clear from the emails at Annex 3 that the modification is a politically motivated request rather than one with any proper planning basis);
• that the effect of the modification if adopted would be to release a small parcel of land from the Green Belt, a site that has substantial doubt about whether it can be developed within 6-10 years (given the small size of the site it may not be economic to purchase one of the adjoining properties to give access);
• the Amended Green Belt Boundary is less defensible (in NPPF paragraph 85 terms) than the Submission Plan Green Belt Boundary);
• retaining the Submission Plan Green Belt Boundary provides a site that is available for development in the early stages of the local plan.
• the modification runs counter to the modifications to the Submission Local Plan requested by the Inspector and the local plan polices to identify more sites that can be delivered in the early part years of the local;
• the proposed modification is not a main modification, is not required to make the plan sound and materially affects policies in the local plan;

52. We request that the proposed modification is withdrawn or if not that we have the opportunity to address these issues at a further examination hearing session. We also request that the inspector recommends that this proposed modification does not form part of the adopted plan.

See attachment for appendix.

Comment: MM51 - LPMM18/3496  Respondent: Mr and Mrs R O'Gorman 20791393  Agent:

We are contacting you to give our firm approval of the village settlement boundary being brought back to Silkmore Lane’s defensible property boundary as per Amendment 1: Horsleys – West Horsley (South) (MM51) – map page 84. The previous proposed boundary was indefensible and therefore not a valid argument to bring greenbelt land into the village settlement area.

Attached documents:
| Comment: MM51 - LPMM18/3594 | Respondent: John Joyce 20794209 | Agent: | I totally object to the local plan for West Horsley because it has never been explained why it was necessary for the village to be taken out of Green Belt protection. Once the countryside is lost it is lost forever. We expect our local councilors to protect us from the greed of property developers. |
| Attached documents: |

| Comment: MM51 - LPMM18/3622 | Respondent: Mr & Mrs Plummer 20794529 | Agent: | resident approval West Horsley (South) main modifications Sept 18 MM51/ page 84 |
My family and I are residents [Response has been redacted due to statement containing personal data that cannot be disclosed due to the provisions of the Data Protection Act 1998] We purchased the property in 2015 and wish to protect the unspoilt tranquillity, landscape currently cherished by the residents of Silkmore Lane the wider West Horsley community and many visitors to the area. Therefore I would like to extend my **firm approval of the above modification** re-establishing our village settlement boundary thus protecting us from further residential development enabling future generations of families to enjoy these unspoilt areas of natural beauty. |
| Attached documents: |

| Comment: MM51 - LPMM18/5262 | Respondent: Deborah Wagstaff 20844449 | Agent: | For the attention of Tracey Coleman, Director of Planning and Regeneration |
I would like to lodge my **firm approval** for the modification of the boundary - **New Local Plan - Amendment1:Horsleys- West Horsley (South) (MM51) - map p84** |

**General feedback**

I really don’t understand why it is necessary to comment again on these sites.

GBC do not appear to be following a democratic process. There have been over 7000 objections from Send and Ripley which is a very loud and clear message to say GBC have got it wrong. Now we are effectively gagged and can only comment on modifications to proposals which appear to be presented as a ‘done deal’.

I do not feel both my own and those of the many residents I know who all share the same feeling are being listened to and each time a plan is presented it is modified to an even more concentrated plan.

We in Send have expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before.

The opening paragraph to the local plan states

*Our Proposed Submission Local Plan balances the needs of residents, businesses and visitors with protecting the borough’s most important countryside, landscapes and heritage. It addresses housing, employment, retail and leisure requirements, supported by suitable infrastructure including education, healthcare and transport. The new Local Plan will be in place until 2034.*

Furthermore there are signs at various points proclaiming

*The Surrey Hills an area of Outstanding Natural Beauty.*

I am very disappointed with the way the Guildford Plan has been presented and the complete lack of listening to resident’s views.

If 7000 objections does not get the message across then I fail to see what GBC need to get the message that they have these proposals completely wrong.

OTHER DEVELOPMENTS

OBJECTIONS: The total amount of development proposed is quite extraordinary and unreasonable and we cannot understand why Send and Send Marsh are being targeted in this way.

Attached documents:

GENERAL OBSERVATIONS

For what it is worth I would like to repeat what I have written before, that whilst so much of what the Council does on behalf of the community is taken for granted, probably with very little expression of gratitude, I personally am much more critical of the Local Plan proposals.

We in Send have expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before.

The opening paragraph to the Local Plan states

"Our Proposed Submission Local Plan balances the needs of residents, businesses and visitors with protecting the borough’s most important countryside, landscapes and heritage. It addresses housing, employment, retail and leisure requirements, supported by suitable infrastructure including education, healthcare and transport. The new Local Plan will be in place until 2034."

Furthermore there are signs at various points proclaiming "The Surrey Hills an area of Outstanding Natural Beauty."

Yet despite this the Local Plan will considerably increase traffic volumes, transform existing villages into small towns, reduce the benefit of the Green Belt, result in undesirable ribbon development and increased demand for education and health services which are already trying to cope. The scale of the plan is such that it will inevitably have a negative effect on the whole area.

I regret to say that I remain disappointed in the Council's objectives and total disregard of public opinion which has been expressed consistently at meetings and in letters of objection by residents deeply concerned with their environment and have great affection for Send in particular and their way of life. I would like to feel that GBC are more in tune with those who represent and willing to heed and be much more supportive of their concerns expressed in the thousands of letters they have received and especially from Send residents. I'm afraid I remain disappointed, sceptical and suspicious of GBC's motives and objectives which seem to be at odds with the wishes of the community they serve.

Comment: Other comments - LPMM18/5732  Respondent: Sarah Belton 8598561  Agent:

Guildford Borough Council – Proposed Main Modifications to Local Plan

Having reviewed the documents regarding the main modifications to the Local Plan, I continue to feel that the changes pay lip service at best to the concerns of the broad population, raised in the 2014, 2016 and 2017 consultations. It shows a clear agenda for development at any cost, and that there are vested interests at play within both the Council and Central Government.
The Local Plan is unnecessarily wordy and complicated to ensure that it is inaccessible to most ordinary people in terms of having the time and knowledge to be able to comment in the manner which the process requires. Consultation is required but not truly about seeking broad public opinion. It is good to see that targets for reducing appeals have been removed, but it was appalling that such wording was ever included – more evidence of how the democratic process is now being undermined in the UK.

**Attached documents:**

**Comment:** Other comments - LPMM18/5753  **Respondent:** Sarah Belton 8598561  **Agent:**

In summary, many of the amendments are semantics, without addressing the extension of the earlier proposed developments, increased numbers of houses and sizing of business space, and expanded intrusion into protected green-belt land. Removing limitations to building in flood-zones 2 and 3 is disgraceful.

I continue to object to the local plan on these grounds and because the Borough has failed to provide sound evidence of need or exceptional circumstances for much of the development. The Council continues to fail in providing guaranteed and appropriate infrastructure improvement already needed without additional local development. It has also failed to address issues of building in flood prone areas, especially when flooding is becoming an increasing problem with changes in weather patterns as the climate changes.

The Council shows clear disdain for the opinion of local residents.

As it is evident that many Councils in England are struggling financially, it is highly unlikely that such overdevelopment will be properly overseen and that infrastructure and services will keep pace with the increased population and traffic. Only the developers will win.

I will be accused of not wanting development in ‘my own back yard’, but my concerns are more far reaching than my local area. I believe the south east of England is at capacity, and I want to see vision and innovation in development practice for the future good of Britain as a whole. Our elected representatives at all levels must conduct themselves with due diligence and integrity, for the long term future of all, including their own children, not for the short term profit of a few.

**Other Developments**

This consultation only allows comment on main modifications - ths excluding the chance to object yet again to 40 houses and a "travellers site" on Send Hill. Also 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite it being the Wey Conservation Area.

The very title "Travellers" site is contradictory. Why do "Travellers" need a permanent site. The nature of their life style means travel not statutory. If they want to be Travellers - then travel. [Response has been redacted due to statements being considered contrary to the Council’s duty under the Equalities Act 2010 to eliminate discrimination, harassment, victimisation against persons with a protected characteristic; and to foster good relations between persons with a protected characteristic and persons who do not share it].
To subject Send to all this development of housing and industrial sites in such a small village is totally unacceptable. This should be spread over Surrey and its 40 other villages.

The residents of Send have been voicing their feelings and justified objections to this amount of development for years to Guildford Borough Council.

The Council seem to now completely ignore the Residents. What happened to Democracy!!

As a Conservative Voter my entire life and Guildford Borough Council being a majority Conservative run Council - I will think long and hard at the next local and national Elections.

I have written to Sir Paul Beresford in the past on this subject and Potters Lane in particular - sadly no response.

Why vote for a Party who ignore their Electorate on local and national issues.

Believe me if Brexit does not go ahead as the voters wish - not a fudge by Mrs. May and her Government and the Conservative Party - it will be a sad day for Democracy and I shall not vote again.

Guildford Borough Council with their proposed actions re this Local Plan are also ignoring their Electorate and Democracy!

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to this the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

Attached documents:
site A22 land north of Keens Lane is Green Belt land with ancient hedgerows and is an important wildlife corridor. The local lanes, mostly little more than single track cannot support the level of traffic that a development of this size will create, nor can the infrastructure (A roads, schools, doctor & sewers) cope. Greenbelt land, as per Government guidelines should remain Greenbelt unless there are exceptional circumstances. There are NO special circumstances, just greedy developers.

Attached documents:

From Anthony Umney BSc CEng FICE
Guilford Resident for 31 Years and a member of the Guildford Society’s Planning Group

General:
As an overall comment, I am extremely disappointed with the piecemeal development of Guildford resulting from the lack of a Town Centre Plan addressing housing, infrastructure, etc. The lack of detailed consideration of brownfield sites ahead of the proposals for major developments on Green Belt sites is contrary to Government directions. The transportation issues for the Town Centre are serious with the traffic regularly being brought to a standstill.

Attached documents:

10. I object to the addition of new sites at the examination without proper consultation

2548 of 2575
Dear Sir / Madam

I have recently been informed by our local action group that we need to make any objections/comments regarding the modifications of the GBC Local Plan.

It seems that you are no longer sending us emails, along with thousands of other local residents, due to the GDPR issue. I received around 100 emails, regarding GDPR, from other companies/organisations, and, if I no longer wished to receive their emails, I notified them to that effect. I am assuming that your GDPR email has requested everyone to opt in to continue receiving the emails, which means that the majority of people did not read your email carefully enough and, like me, did not request to continue receiving them. Please can you make sure you add my name to continue receiving your emails from immediate effect.

Attached documents:

Comment: Other comments - LPMM18/1771  Respondent: Frances Porter 8917665  Agent:

Dear Sir/Madam

I feel very strongly that the examination in public should be reopened so that latest info and statistics can be used.

I only heard about this via someone else. I have not had any formal notification. Not sure this is a true public consultation if people don’t get notified.

I fully support WAG and their representations

Attached documents:

Comment: Other comments - LPMM18/3853  Respondent: Claire Bridges 8923905  Agent:

I completely fail to understand why it is necessary to comment again on these sites.

GBC do not appear to be following a democratic process. There have been over 7000 objections from Send and Ripley and this is a phenomenally clear message to say GBC have got it wrong. Now we are effectively gagged and can only comment on modifications to proposals that appear to be presented as a ‘done deal’.

I do not feel both my own and those of the many residents I know who all share the same feeling are being listened to and each time a plan is presented it is modified to an even more concentrated plan.

-

We in Send have expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before.

The opening paragraph to the local plan states

“Our Proposed Submission Local Plan balances the needs of residents, businesses and visitors with protecting the borough’s most important countryside, landscapes and heritage. It addresses housing, employment, retail and leisure requirements, supported by suitable infrastructure including education, healthcare and transport. The new Local Plan will be in place until 2034.”
Furthermore there are signs at various points around the area proclaiming

“The Surrey Hills an area of Outstanding Natural Beauty.”

I am very disappointed with the way the Guildford Plan has been presented and the complete lack of listening to resident’s views.

Lessons from the previous plans have clearly not been learnt and one has to question the logic of the proposers thinking and how completely unsupported and illogical plans can have reached this stage. One also has to question whether anyone from GBC has ever driven or walked around Send and Send Marsh. One journey, particularly during rush hour would have demonstrated how ridiculous and unreasonable these plans are.

Furthermore, GBC’s decision to present these modified plans completely disregards the 7000 objections already raised to the proposals. If that volume of valid and justified objections does not cause GBC to see that the proposals are completely inappropriate and unsuitable for the area then I fail to see what will and question what other motivations may be behind the plans.

In conclusion, the continual disregard of local public opinion is very disappointing and GBC needs to revisit the original proposals and Main Modifications now put forward to create a significantly better and more appropriate plan than this one for the area we live in.

**Comment:** Other comments - LPMM18/1519  **Respondent:** Sue Reeve 8928961  **Agent:**

1. **CONCLUSION**

It is very clear from chatting to local people that many are completely unaware of the current consultation that is taking place. These are people who responded to the previous consultation. I think it is very important that the consultation period be extended and an extended effort to alert at the very least, all those who responded to the last consultation. I am one of the people who had not been alerted to this activity. I understand that GDPR (or lack of signing up to it for the Council) has been cited as a reason for alerting a subset of previous respondees. I don’t remember whether I was asked to do so and clearly haven’t as I don’t get any alerts. However SCC find no problem in continuing to send correspondence about local planning matters and I haven’t signed a GDPR statement for them.

It has been suggested that Conservative policy on housing is to flood the market with available housing and in doing so hopefully reduce house prices. I would hope that Guildford is working on behalf of its residents and not Conservative policy, there is no place for party politics in local communities. Also it wouldn’t work in our area – house prices are consistently high.

**Conclusion**

GVG has other concerns related to the plan, e.g. Policy D2 appears to have been substantially weakened in its protection of heritage assets but GVG has focused in this note on the key issue of Policy S3 and interlinked supporting policies.

GVG believe the plan as it is proposed is unsound as it:

- Has weak and inadequate policies for the town centre, which requires a masterplanned approach for the entire area
- In the absence of a proper plan for the town centre housing, utilises precious greenbelt space
- Doesn’t address a wide range of Infrastructure issues
- Doesn’t safeguard key sites for Infrastructure improvement in the town centre

Finally, GVG, as always, remains ready to engage positively with other parties to create the plan that Guildford so desperately needs, and that the South East economy requires for Guildford to play its rightful role.

To remain productive and helpful to the council, GVG has prepared comments/proposed rewording in detail on Policies

Other Developments

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers' site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of Send Business Centre - despite the Wey Conservation area.

Added to the other housing sites and an industrial space such heavy concentration in one village, which could be more evenly shared with 40, is totally unreasonable.

To me your proposals to build on Green Belt in the Send area are completely unacceptable. In fact it appears that GBC have not only not listened to the many thousands of locals' objections and points of view but appear set on making life worse for us all! To accomodate all that you would like to do there is absolutely an inadequate infrastructure. For example schools, medical facilities (as required by law), sewerage and drainage systems plus our already crowded roads. And this is aside from the planned decimation of ancient woodland and beautiful countryside enjoyed by so many.

To sum up, I find these latest proposals completely unacceptable.

General Impact

I object to all the above because of the numbers of housing and industrial sites being planned. We do not have adequate schools, doctors, or roads to manage this enormous increase. Our local roads are already clogged during rush hour.

I am certain that the Planning Inspector has no idea of the environs around Send, otherwise he would have never supported and INCREASED the planned numbers of houses and Industrial space.

Nor do I think that members of the Planning Committee live anywhere near Send or Ripley and that their own wards are not being subjected this wholly unnecessary Local Plan of destruction of both our village enviroment and the precious Green Belt. We recognise the need for new housing, but not on such a ruinous scale.

The whole process involving Guildford Borough, the Planning Committee and the Planning Inspector shows that democracy is dead in the county.

Shame on you.

A42 Send Hill. Development of 40 houses.

This is the adjacent site to MM5 and is unsuitable for the same reason. The traffic at peak school times is already very dangerous by the Send Road traffic lights with cars dropping off children, making it a single access. Send Hill at the Potters Lane end is single track and could not take the additional traffic as there are no passing places.

Attached documents:
Send – Development plans

or perhaps the title should be “Send – plans to destroy a village”!

- four new housing developments,
- two traveller sites,
- an industrial/warehouse complex,
- an enlarged business centre,
- building on perimeter fields,
- two new A3 slip roads

and a related significant reduction in green space, increase in traffic congestion and increased burden on public services/infrastucture.

Yet another (fourth) consultation process, which in itself begs the question whether there is an attempt to wear down residents who have to keep finding time to read and respond! Perhaps this in itself is sufficient to warrant a judicial review, when instead of reducing the development burden upon Send in response to earlier objections, the plans appear to ignore the objections entirely? If through a process of continual consultations with no specific advantage to residents gained by each one, this leads resident to a view that there is little point in objecting or indeed there is just not the time in peoples’ busy lives to do so, then the action of the Council is certainly questionable.

Attached documents:

---

40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre

Whilst this consultation does not include the developments listed above, note that:

- This is the Wey Conservation area.
- Added to the the other housing sites and industrial space, such heavy concentration in one village, which could be more evenly shared with 40, is totally unreasonable.

Please take account of the objections/comments noted above. This is no NIMBY’ism but genuine concern.

Other Developments

A further 40 houses and a travellers site on Send Hill, 60 house at the Clockbarn Tannery Lane and the increase of industrial development in theSend Business Centre will again create massive impact on the traffic through small lanes poorly maintained by the current processes run by the Guildford Council. Again this area is meant to be protected under the Wey Conservation area.

We ask the question why two small villages are being asked to carry the weight of excessive housing numbers and incredible increase in industrial area requirements when there are many other sites still under developed and able to absorb most of what is being proposed.

We the locals, understand the need for housing but this must be done in consultation with the local villages it will impact most upon and the council needs to ensure the infrastructure can support the development before it is built rather than after when all is chaos and too late to prevent.

and the other developments planned, ClockBarn – 60 houses, SendHill travellers site and 40 houses, Send Business Centre, which is to be increased by 25% despite it being in a conservation area. These changes are huge for any town, to do this to a rural area on the edge of the green belt is totally unacceptable. If this was to be completed as Guildford Council have not dealt with any changes to local roads, schools, or health services should be shared around the entire council area, not all heaped in a single place, which is just foolish.

3.0 Areas Where Further Modifications Are Required

3.1 On the basis of these representations Bewley Homes’ considers that the following further modifications are required for the Plan to be capable of being found Sound:

1. The Council needs to revisit its appraisal of the options for meeting early years delivery and in particular to consider the potential from the following sources:

   • Ash and Tongham allocation
   • PDL in the Green Belt
   • Release of land around Green Belt villages

2. The Council needs to reword Policy A29 to bring the text at Parts (6) and (8) into line with the position it agreed with the Inspector at the Matter 17 hearing session as set out in Section 2 above.

3.2 Without these changes Bewley Homes’ does not consider the main modifications are sufficient to meet the tests of soundness.

Site specific

Proposals within the Horsley’s and other village sites

I have brought to GBC attention a number of windfall Brownfield development sites within the town centre, which could yield 500+ residential units. GBC needs to develop those sites prior to taking infill land within village site (mainly in the east of the borough) and including those within their plan.

Most of these sites are Green Belt sites; the Green Belt should remain to serve its intended purpose.

I object to the Limited Consultation Period.

I find it disingenuous to the last minute inclusion of new sites i.e. Garlick’s Arch with less than two weeks notice, just because it would appear that the developer has offered a new on and off slip to the A3.

Summary.
Your plans have blighted my family home for years, the 2014 plan originally put a development at the back of my house, and the 2016 plan changed it to the development at the front of my family home. Now your new plan does both!!!

You ill conceived plans have had a huge detrimental effect on the value of our family home, destroying our views of the farmland at the front and rear. Therefore your poorly thought through local plans have provided uncertainty and anxiety to myself and my family.

As no speed restrictions, speed camera or traffic calming measures on the blind corner heading towards send over the A3 is a accident waiting to happen. As it is we can only turn left when leaving our home and even then it is very dangerous.

You have not addressed the infrastructure requirements such as schools, health centres and hospital capacity, in these proposals, for new homes.

Therefore this plan needs to be thought through, and new alternative proposals need to be looked at..

I trust the above is to your satisfaction, [Response has been redacted due to statement containing personal data which cannot be disclosed due to the provisions of the General Data Protection Regulation 2018/Data Protection Act 2018]

Extra Comment:

It is disheartening to be having to object again and again to these proposals when it seems as if the planning department are merely paying “lip service” to the whole process but have already decided to overrule any local objections regardless of due process and democracy. It is a waste of local borough funds too. In mitigation of planning policy – we do need affordable housing for local people or more social housing to allow families to stay in the same locality – good community relationships are key to change and healthy family/community li

Attached documents:
Policy A22: Land North of Keens Lane, Guildford

Part of this site is within 400m of the Thames Basin Heaths SPA. Whilst the policy makes reference to a care home being allocated within the 400m exclusion zone, it must be ensured that future residents will be too infirm and/ or have reduced mobility making it unlikely that they will be able to recreate on the SPA.

This policy also states that 150 residential units are proposed. It must be ensured that these units are located outside of the 400m exclusion zone and must provide an appropriate suite of mitigation to ensure that impacts upon the SPA are avoided.

This site allocation is in very close proximity to the Whitmoor Common SSSI. Any direct or indirect impacts on this site should also be avoided or mitigated.

Attached documents:

Policy A23: Land North of Salt Box Road, Guildford

This site is within 400m of the Thames Basin Heaths SPA and whilst allocated for a new burial ground, potential impacts on the SPA must still be considered especially given that a new car park and site access is proposed. We would expect measures to be put in place to ensure that the car park is not available to the general public.

The site and the car park must not link to the Public Rights of Way which lead towards the SPA.

This site allocation is in very close proximity to the Whitmoor Common SSSI. Any direct or indirect impacts on this site should also be avoided or mitigated.

Attached documents:

Policy A27: Warren Farm, White Lane, Ash Green

This site is within close proximity to the Surrey Hills Area of Outstanding Natural Beauty. We advise the LPA to take into account the relevant Management Plan for the area and should seek the views of the AONB Partnership.

Development proposals brought forward through the plan should avoid significant impacts on protected landscapes, including those outside the plan’s area and early consideration should be given to the major development tests set out in paragraph 116 of the National Planning Policy Framework (NPPF).

This site is adjacent to ancient woodland. Any direct or indirect impacts on this site should be avoided or mitigated.

Attached documents:
Policy A32: Surrey Police Headquarters, Mount Browne, Sandy Lane, Guildford

Policy A33: The University of Law, Guildford

These sites are within the Surrey Hills Area of Outstanding Natural Beauty. We advise the LPA to take into account the relevant Management Plan for the area and should seek the views of the AONB Partnership. Development proposals brought forward through the plan should avoid significant impacts on protected landscapes, including those outside the plan’s area and early consideration should be given to the major development tests set out in paragraph 116 of the National Planning Policy Framework (NPPF).

These sites are adjacent to ancient woodland. The policies should ensure that any direct or indirect impacts on these sites are avoided or mitigated.

Comment: Other comments - LPMM18/6265  Respondent: Highways England (Patrick Blake) 15746081  Agent:

Thank you for the opportunity to comment on the Main Modifications of the Guildford Local Plan Strategy and Sites Consultation.

Highways England has been appointed by the Secretary of State for Transport as strategic highway company under the provisions of the Infrastructure Act 2015 and is the highway authority, traffic authority and street authority for the strategic road network (SRN). The SRN is a critical national asset and as such Highways England works to ensure that it operates and is managed in the public interest, both in respect of current activities and needs as well as in providing effective stewardship of its long-term operation and integrity. We will therefore be concerned with proposals that have the potential to impact the safe and efficient operation of the SRN, in this case the A3 and M25.

The Clockbarn site has been increased to 65 houses. There are to be 40 houses and 2 travellers’ sites in Send Hill. A 25% increase in the Send Business Centre despite the Wey Conservation Area. The impact on this village is unreasonable.

**Comment:** Other comments - LPMM18/5870  **Respondent:** Thakeham Homes (Sarah Sutcliffe) 17345441  **Agent:**

**Policy A38: Land west of West Horsley**

Thakeham remains fully supportive of the proposed allocation of this site under emerging policy A38. However as set out in our previous representations and hearing statements we do not consider that the overall quantum of development proposed has been established appropriately, and it is therefore our view that the restrictive wording of the policy could result in an inability to develop the site in the most efficient and comprehensive way.

Given the substantial shortfall which was identified throughout the examination hearings there is evidently a need for further housing sites and therefore Thakeham are supportive of the council’s proposals to allocate additional sites for housing. However, to ensure a robust approach to housing delivery the Council should also review existing proposed allocations and the wording of the associated policies to ensure that these sites can deliver housing in a comprehensive way to assist in meeting housing need in the Borough.

In the case of Policy A38: Land west of West Horsley, whilst the policy does allow for some flexibility in quantum: ‘The site is allocated for approximately 135 homes’, the council could ensure that this does not restrict the quantum of development significantly by amending to: ‘The site is allocated for a minimum of 135 homes’.

**Comment:** Other comments - LPMM18/1474  **Respondent:** Claire Attard 17417633  **Agent:**

Dear Sir / Madam

We have recently been informed by our local action group that we need to make any objections/comments regarding the modifications of the GBC Local Plan.
Firstly, it appears that you are no longer sending us emails, along with thousands of other local residents, due to the GDPR issue. I received around 100 emails, regarding GDPR, from other companies/organisations, and, if I no longer wished to receive their emails, I notified them to that effect. I am assuming that your GDPR email has requested everyone to opt in to continue receiving the emails, which means that the majority of people did not read your email carefully enough and, like me, did not request to continue receiving them. **Please can you make sure you add my name to continue receiving your emails from immediate effect.**

Finally, I note that Strategic sites are to be exempt from design constraints! This will result in inappropriate developments such as that proposed on Three Farm Meadows. There is also no evidence that recent case law, such as “People over Wind” has been taken into account.

For all the above reasons **I am calling for the hearing to be reopened**, specifically so that the latest Office of National Statistics can be used. I would also like to advise that I support the representation made by WAG (Wisley Action Group), which was written with advice from Richard Harwood QC.

We trust that the above objections are self-explanatory and would be grateful if the Council and the Planning Inspectorate could carefully consider the objections raised as above in relation to the Main Modifications as currently proposed to the Draft Local Plan, in order to secure a positive and safe future for Guildford Borough and its residents.

**Other Developments**
This consultation only allows comment on main modifications and so excludes the chance to object again to
• 40 houses and a travellers’ site on Send Hill,
• 60 houses at Clockbarn in Tannery Lane and
• A 25% increase in the size of the Send Business Centre despite the Wey Conservation area.

In summary I acknowledge and understand the need for additional housing and business in the borough but firmly believe that this local plan is not fair particularly around concentration, toward the residents of Send and Ripley and feel that overall this will be at the village’s detriment including those new residents planning to move into Ripley and Send.

Ripley and Send Village are already at capacity and I think GBC need to review the local plan and find an alternative solution that does not have a detrimental effect on existing communities that are already struggling for local services that are already oversubscribed.

This is a bad plan not thought through.

**General feedback**

I really don’t understand why it is necessary to comment again on these sites.

GBC do not appear to be following a democratic process. There have been over 7000 objections from Send and Ripley which is a very loud and clear message to say GBC have got it wrong. Now we are effectively gagged and can only comment on modifications to proposals which appear to be presented as a ‘done deal’.

I do not feel both my own and those of the many residents I know who all share the same feeling are being listened to and each time a plan is presented it is modified to an even more concentrated plan.

We in Send have expressed our views over the years but clearly no attention is paid to them as evidenced by the fact that despite everything that has been said even more houses are proposed to be built in Send than before.

The opening paragraph to the local plan states

“Our Proposed Submission Local Plan balances the needs of residents, businesses and visitors with protecting the borough’s most important countryside, landscapes and heritage. It addresses housing, employment, retail and leisure requirements, supported by suitable infrastructure including education, healthcare and transport. The new Local Plan will be in place until 2034.”

Furthermore there are signs at various points proclaiming

“The Surrey Hills an area of Outstanding Natural Beauty.”

The Guildford Plan has been presented almost as a “job done” situation and the complete lack of listening to resident’s views can only be seen as devastating and contrary to local reaction completely.

If 7000 objections does not get the message across then I fail to see what GBC need to get the message that they have these proposals completely wrong.

Comment: Other comments - LPMM18/42  Respondent: National Grid 20475361  Agent: Wood E&I Solutions UK Ltd (Hannah Lorna Bevins)

National Grid has appointed Wood to review and respond to development plan consultations on its behalf.

We have reviewed the above consultation document and can confirm that National Grid has no comments to make in response to this consultation.

**Further Advice**

National Grid is happy to provide advice and guidance to the Council concerning our networks. If we can be of any assistance to you in providing informal comments in confidence during your policy development, please do not hesitate to contact us.

To help ensure the continued safe operation of existing sites and equipment and to facilitate future infrastructure investment, National Grid wishes to be involved in the preparation, alteration and review of plans and strategies which may affect our assets. Please remember to consult National Grid on any Development Plan Document (DPD) or site-
specific proposals that could affect our infrastructure. We would be grateful if you could add our details shown below to
your consultation database.

I am not often motivated to write, but I have seldom viewed such poorly thought through local plan, and now the Local
Plan Public Examination.

I object to the creation of the new north and southbound slip roads to and from the A3.

I live on [Response has been redacted due to statement containing personal data which cannot be disclosed due to the
provisions of the General Data Protection Regulation 2018/Data Protection Act 2018] next to the A3, and worked in and
around Ripley since the late 80’s. The major bottle neck is Send Village, which this plan will on exacerbate.

The main danger is the off slip going North at Burnt Common, this will exacerbated with more people using it.

Comment: Other comments - LPMM18/160  Respondent: Miss P McAleese 20554817  Agent:

I object to the Limited Consultation Period.

I find it disingenuous to the last minute inclusion of new sites i.e. Garlick’s Arch with less than two weeks notice, just
because it would appear that the developer has offered a new on and off slip to the A3.

Summary.

Your plans have blighted my family home for years, the 2014 plan originally put a development at the back of my house,
and the 2016 plan changed it to the development at the front of my family home. Now your new plan does both!!!

You ill conceived plans have had a huge detrimental effect on the value of our family home, destroying our views of the
farmland at the front and rear. Therefore your poorly thought through local plans have provided uncertainty and anxiety
to myself and my family.

As no speed restrictions, speed camera or traffic calming measures on the blind corner heading towards send over the A3
is a accident waiting to happen. As it is we can only turn left when leaving our home and even then it is very dangerous.

You have not addressed the infrastructure requirements such as schools, health centres and hospital capacity, in these
proposals, for new homes.

Therefore this plan needs to be thought through, and new alternative proposals need to be looked at.:

I trust the above is to your satisfaction, however if you have any questions the best number to get through to me on is the
mobile on [Response has been redacted due to statement containing personal data which cannot be disclosed due to the

This consultation only allows comment on main modifications and so excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 Houses at Clockbarn in Tannery Land and a 25% increase in the size of the Send Business Centre despite the Wey Conservation area. Added to the other housing sites and industrial space such heavy concentration in one village, which could be more evenly shared with 40, is unreasonable.

**Comment:** Other comments - LPMM18/734  **Respondent:** Christina Reeves 20634753  **Agent:**

**Other Developments**

This consultation excludes the chance to object again to 40 houses and a travellers’ site on Send Hill, 60 Houses at Clockbarn in Tannery Lane and a 25% increase in the size of Send Business Centre despite the Wey Conservation Area. This consultation only allows comment on main modifications.

Such heavy concentration of development in one village is too much. Surely this could be more evenly shared with many other villages.

**Comment:** Other comments - LPMM18/967  **Respondent:** Jim Rattray 20658689  **Agent:**

Following my attendance at the Guildford Vision meeting on 16 Oct I remain concerned about the modified local plan.

**My principal request is that the Inspector’s Examination be reopened,** as there are too many issues (some very recent) that need to be sorted out before this plan be approved.

I intend to send a separate letter commenting on some of the issues.

I am a long term resident of the Borough

**Comment:** Other comments - LPMM18/1099  **Respondent:** Marc Lippiett 20664481  **Agent:**

**Other developments**

- This consultation does not provide for the ability to comment on other proposed developments at Send Hill, Clockbarn, Send Business Centre.
- These other developments, combined with the above developments, put further strain on the infrastructure, detract from the Green Belt and nature of the village, and compound the issue that Send is absorbing a disproportionate level of development relative to other local villages, and the development should be more evenly distributed.

My thanks for your taking the time to hear my objections and rationale. As a local resident I am extremely concerned about the impact of the proposed developments on the area, for the reasons given above, and trust that good judgement will confirm that the area of Send is not appropriate for and able to accommodate such a scale of development.

Flaws in the Local Plan process

3.11 WHPC, like EHPC, believes the Submission Local Plan Examination process contains a series of flaws in respect of Site Policy A35. These include:

   a) The Examiner’s decision on Site Policy A35 was made within a few minutes after the closing of the public Hearing in the afternoon of 5th July 2018. The Examining Inspector could not possibly have had the time to properly assess and weigh-up all of the arguments presented. **This is a clear case of pre-determination.**

   b) The Examiner did not recommend the removal of any sites from the Submission Local Plan. Given the large number of well-argued cases presented against the many sites located in the Green Belt, the absence of even one single site being proposed for removal implies **either** the Examination process in reviewing sites was little more than a token exercise having no real validity, **or** the benchmark level used by the Examiner for assessing the soundness of any site policy was set so high as to be effectively worthless.

   c) The Examiner forbade any further written submissions from Hearing participants on Site Policy A35 following the publication of the Secretary of State’s Appeal decision, other than from GBC. In view of the importance of the Appeal decision towards assessing the soundness of Site Policy A35, WHPC believes such submissions should have been allowed.

   d) GBC issued their Discussion Note on Site Policy A35 **within two days** of the Secretary of State refusing the WPIL Appeal. The extensive arguments made by the Appeal Inspector and the Secretary of State cannot possibly have been properly evaluated and assessed by GBC and its advisers. WHPC concludes that GBC are so determined to retain this site within the Submission Local Plan that even the reasoned arguments of the Appeal Inspector and the Secretary of State are ignored and considered to be of no consequence.

**Proposed Amendments to Guildford Borough Local Plan**

**General Objections**
I also object to the Council’s failure to communicate adequately with residents about the current amendments to the Local Plan under the guise of compliance with GDPR. All the 32,000 or so persons who responded to the plan in 2016 should have been given the opportunity respond this time and not to have done so is a clear and unilateral disenfranchisement.

Attached documents:

Comment: Other comments - LPMM18/3661  Respondent: Angus McIntosh 20794881  Agent:

At the Planning Inquiry, Jonathan Bloor, the Inspector, clearly asked GBC (I was in the room!) to prepare a Town Centre Plan (which was not produced at the inquiry). The few pages of words submitted are NOT A PLAN. There is no empirical evidence, nor clear view as to how these words related to a verifiable plan.

Were there any meeting as requested, and where are the Agendas and Minutes from each meeting? There may have been brief short meeting, but there is no evidence any of the ideas have been used from these very knowledgeable and highly qualified organisations.

Attached documents:

Comment: Other comments - LPMM18/3985  Respondent: Catherine Louise McGowan 20802593  Agent:

There are various other development proposals that local Send residents are not able to comment on as they are not main modifications to the Guildford Local Plan. These include 40 houses and a travellers’ site on Send Hill, 60 houses at Clockbarn in Tannery Lane and a 25% increase in the size of the Send Business Centre, despite the Wey Conservation Area. As these proposals fall within Send it seems unreasonable that we cannot consider these in conjunction with the Main Modifications to the Guildford Local Plan.

The Main Modifications to the Guildford Local Plan does not address how the existing infrastructure would adequately cope with a 45% increase in houses in Send, let alone what new infrastructure would be put in place. Surely this must be considered before any further development takes place?

Attached documents:

Comment: Other comments - LPMM18/4026  Respondent: Mr Anthony Allen 20804897  Agent:

Dear Sir / Madam

We have recently been informed by our local action group that we need to make any objections/comments regarding the modifications of the GBC Local Plan.

Firstly, it appears that you are no longer sending us emails, along with thousands of other local residents, due to the GDPR issue. I received around 100 emails, regarding GDPR, from other companies/organisations, and, if I no longer wished to receive their emails, I notified them to that effect. I am assuming that your GDPR email has requested everyone to opt in to continue receiving the emails, which means that the majority of people did not read your email carefully enough and, like me, did not request to continue receiving them. Please can you make sure you add my name to continue receiving your emails from immediate effect.
Comment: Other comments - LPMM18/4368  Respondent: Martin Taplin 20820321  Agent:

General Comment

Finally, I would wish to add that I think there is a danger that this whole review process has become intensely complex and divorced from the practise of town and country planning - certainly as I know it. It seems to me that we are moving towards a Local Plan which contains more and more words and policies but which, in the end, will be a Plan which will largely be indecipherable in terms of its application by both planning officers and developers involved in the development control process and certainly for Councillors who will be confused and bamboozled by the complexities.
